5. Although various formulas have been used by member countries to calculate the 183 day period, there is only one way which is consistent with the wording of this paragraph: the "days of physical presence" method. The application of this method is straightforward as the individual is either present in a country or he is not. The presence could also relatively easily be documented by the taxpayer when evidence is required by the tax authorities. Under this method the following days are included in the calculation: part of a day, day of arrival, day of departure and all other days spent inside the State of activity such as Saturdays and Sundays, national holidays, holidays before, during and after the activity, short breaks (training, strikes, lock-out, delays in supplies), days of sickness (unless they prevent the individual from leaving and he would have otherwise qualified for the exemption) and death or sickness in the family. However, days spent in the State of activity in transit in the course of a trip between two points outside the State of activity should be

excluded from the computation. It follows from these principles that any entire day spent outside the State of activity, whether for holidays, business trips, or any other reason, should not be taken into account. A day during any part of which, however brief, the taxpayer is present in a State counts as a day of presence in that State for purposes of computing the 183 day period.

(Amended on 21 September 1995; see HISTORY)

5.1 Days during which the taxpayer is a resident of the source State should not, however, be taken into account in the calculation. Subparagraph *a)* has to be read in the context of the first part of paragraph 2, which refers to "remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State", which does not apply to a person who resides and works in the same State. The words "the recipient is present", found in subparagraph *a)*, refer to the recipient of such remuneration and, during a period of residence in the source State, a person cannot be said to be the recipient of remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State. The following examples illustrate this conclusion:

— Example 1: From January 01 to December 01, X lives in, and is a resident of, State S. On 1 January 02, X is hired by an employer who is a resident of State R and moves to State R where he becomes a resident. X is subsequently sent to State S by his employer from 15 to 31 March 02. In that case, X is present in State S for 292 days between 1 April 01 and 31 March 02 but since he is a resident of State S between 1 April 01 and 31 December 01, this first period is not taken into account for purposes of the calculation of the periods referred to in subparagraph *a)*.

— Example 2: From 15 to 31 October 01, Y, a resident of State R, is present in State S to prepare the expansion in that country of the business of ACO, also a resident of State R. On 1 May 02, Y moves to State S where she becomes a resident and works as the manager of a newly created subsidiary of ACO resident of State S. In that case, Y is present in State S for 184 days between 15 October 01 and 14 October 02 but since she is a resident of State S between 1 May and 14 October 02, this last period is not taken into account for purposes of the calculation of the periods referred to in subparagraph *a)*.

(Added on 17 July 2008; see HISTORY)

6. The second condition is that the employer paying the remuneration must not be a resident of the State in which the employment is exercised. Some member countries may, however, consider that it is inappropriate to extend the exception of paragraph 2 to cases where the employer is not a resident of the State of residence of the employee, as there might then be

administrative difficulties in determining the employment income of the employee or in enforcing withholding obligations on the employer. Contracting States that share this view are free to adopt bilaterally the following alternative wording of subparagraph 2 *b)*:

b) the remuneration is paid by, or on behalf of, an employer who is a resident of the first-mentioned State, and

(Renumbered on 29 April 2000; see HISTORY)

6.1 The application of the second condition in the case of fiscally transparent partnerships presents difficulties since such partnerships cannot qualify as a resident of a Contracting State under Article 4 (see paragraph 8.2 of the Commentary on Article 4). While it is clear that such a partnership could qualify as an "employer" (especially under the domestic law definitions of the term in some countries, *e.g.* where an employer is defined as a person liable for a wage tax), the application of the condition at the level of the partnership regardless of the situation of the partners would therefore render the condition totally meaningless.

(Added on 29 April 2000; see HISTORY)

6.2 The object and purpose of subparagraphs *b)* and *c)* of paragraph 2 are to avoid the source taxation of short-term employments to the extent that the employment income is not allowed as a deductible expense in the State of source because the employer is not taxable in that State as he neither is a resident nor has a permanent establishment therein. These subparagraphs can also be justified by the fact that imposing source deduction requirements with respect to short-term employments in a given State may be considered to constitute an excessive administrative burden where the employer neither resides nor has a permanent establishment in that State. In order to achieve a meaningful interpretation of subparagraph *b)* that would accord with its context and its object, it should therefore be considered that, in the case of fiscally transparent partnerships, that subparagraph applies at the level of the partners. Thus, the concepts of "employer" and "resident", as found in subparagraph *b)*, are applied at the level of the partners rather than at the level of a fiscally transparent partnership. This approach is consistent with that under which other provisions of tax conventions must be applied at the partners' rather than at the partnership's level. While this interpretation could create difficulties where the partners reside in different States, such difficulties could be addressed through the mutual agreement procedure by determining, for example, the State in which the partners who own the majority of the interests in the partnership reside (*i.e.* the State in which the greatest part of the deduction will be claimed).

(Added on 29 April 2000; see HISTORY)

7. Under the third condition, if the employer has a permanent establishment in the State in which the employment is exercised, the exemption is given on condition that the remuneration is not borne by that permanent establishment. The phrase "borne by" must be interpreted in the light of the underlying purpose of subparagraph *c)* of the Article, which is to ensure that the exception provided for in paragraph 2 does not apply to remuneration that could give rise to a deduction, having regard to the principles of Article 7 and the nature of the remuneration, in computing the profits of a permanent establishment situated in the State in which the employment is exercised.

(Amended on 22 July 2010; see HISTORY)

7.1 The fact that the employer has, or has not, actually claimed a deduction for the remuneration in computing the profits attributable to the permanent establishment is not necessarily conclusive since the proper test is whether any deduction otherwise available with respect to that remuneration should be taken into account in determining the profits attributable to the permanent establishment. That test would be met, for instance, even if no amount were actually deducted as a result of the permanent establishment being exempt from tax in the source country or of the employer simply deciding not to claim a deduction to which he was entitled. The test would also be met where the remuneration is not deductible merely because of its nature (*e.g.* where the State takes the view that the issuing of shares pursuant to an employee stock-option does not give rise to a deduction) rather than because it should not be allocated to the permanent establishment.

(Renumbered and amended on 22 July 2010; see HISTORY)

7.2 For the purpose of determining the profits attributable to a permanent establishment pursuant to paragraph 2 of Article 7, the remuneration paid to an employee of an enterprise of a Contracting State for employment services rendered in the other State for the benefit of a permanent establishment of the enterprise situated in that other State may, given the circumstances, either give rise to a direct deduction or give rise to the deduction of a notional charge, *e.g.* for services rendered to the permanent establishment by another part of the enterprise. In the latter case, since the notional charge required by the legal fiction of the separate and independent enterprise that is applicable under paragraph 2 of Article 7 is merely a mechanism provided for by that paragraph for the sole purpose of determining the profits attributable to the permanent establishment, this fiction does not affect the determination of whether or not the remuneration is borne by the permanent establishment.

(Added on 22 July 2010; see HISTORY)

8. There is a direct relationship between the principles underlying the exception of paragraph 2 and Article 7. Article 7 is based on the principle that an enterprise of a Contracting State should not be subjected to tax in the other State unless its business presence in that other State has reached a level sufficient to constitute a permanent establishment. The exception of paragraph 2 of Article 15 extends that principle to the taxation of the employees of such an enterprise where the activities of these employees are carried on in the other State for a relatively short period. Subparagraphs *b*) and *c*) make it clear that the exception is not intended to apply where the employment services are rendered to an enterprise the profits of which are subjected to tax in a State either because it is carried on by a resident of that State or because it has a permanent establishment therein to which the services are attributable.

(Amended on 22 July 2010; see HISTORY)

8.1 It may be difficult, in certain cases, to determine whether the services rendered in a State by an individual resident of another State, and provided to an enterprise of the first State (or that has a permanent establishment in that State), constitute employment services, to which Article 15 applies, or services rendered by a separate enterprise, to which Article 7 applies or, more generally, whether the exception applies. While the Commentary previously dealt with cases where arrangements were structured for the main purpose of obtaining the benefits of the exception of paragraph 2 of Article 15, it was found that similar issues could arise in many other cases that did not involve tax-motivated transactions and the Commentary was amended to provide a more comprehensive discussion of these questions.

(Added on 22 July 2010; see HISTORY)

8.2 In some States, a formal contractual relationship would not be questioned for tax purposes unless there were some evidence of manipulation and these States, as a matter of domestic law, would consider that employment services are only rendered where there is a formal employment relationship.

(Added on 22 July 2010; see HISTORY)

8.3 If States where this is the case are concerned that such approach could result in granting the benefits of the exception provided for in paragraph 2 in unintended situations (*e.g.* in so-called “hiring-out of labour” cases), they are free to adopt bilaterally a provision drafted along the following lines:

> Paragraph 2 of this Article shall not apply to remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State and paid by, or on behalf of, an employer who is not a resident of that other State if:

a) the recipient renders services in the course of that employment to a person other than the employer and that person, directly or indirectly, supervises, directs or controls the manner in which those services are performed; and

b) those services constitute an integral part of the business activities carried on by that person.

(Added on 22 July 2010; see HISTORY)

8.4 In many States, however, various legislative or jurisprudential rules and criteria (e.g. substance over form rules) have been developed for the purpose of distinguishing cases where services rendered by an individual to an enterprise should be considered to be rendered in an employment relationship (contract of service) from cases where such services should be considered to be rendered under a contract for the provision of services between two separate enterprises (contract for services). That distinction keeps its importance when applying the provisions of Article 15, in particular those of subparagraphs 2 *b*) and *c*). Subject to the limit described in paragraph 8.11 and unless the context of a particular convention requires otherwise, it is a matter of domestic law of the State of source to determine whether services rendered by an individual in that State are provided in an employment relationship and that determination will govern how that State applies the Convention.

(Added on 22 July 2010; see HISTORY)

8.5 In some cases, services rendered by an individual to an enterprise may be considered to be employment services for purposes of domestic tax law even though these services are provided under a formal contract for services between, on the one hand, the enterprise that acquires the services, and, on the other hand, either the individual himself or another enterprise by which the individual is formally employed or with which the individual has concluded another formal contract for services.

(Added on 22 July 2010; see HISTORY)

8.6 In such cases, the relevant domestic law may ignore the way in which the services are characterised in the formal contracts. It may prefer to focus primarily on the nature of the services rendered by the individual and their integration into the business carried on by the enterprise that acquires the services to conclude that there is an employment relationship between the individual and that enterprise.

(Added on 22 July 2010; see HISTORY)

8.7 Since the concept of employment to which Article 15 refers is to be determined according to the domestic law of the State that applies the

Convention (subject to the limit described in paragraph 8.11 and unless the context of a particular convention requires otherwise), it follows that a State which considers such services to be employment services will apply Article 15 accordingly. It will, therefore, logically conclude that the enterprise to which the services are rendered is in an employment relationship with the individual so as to constitute his employer for purposes of subparagraph 2 *b*) and *c*). That conclusion is consistent with the object and purpose of paragraph 2 of Article 15 since, in that case, the employment services may be said to be rendered to a resident of the State where the services are performed.

(Added on 22 July 2010; see HISTORY)

8.8 As mentioned in paragraph 8.2, even where the domestic law of the State that applies the Convention does not offer the possibility of questioning a formal contractual relationship and therefore does not allow the State to consider that services rendered to a local enterprise by an individual who is formally employed by a non-resident are rendered in an employment relationship (contract of service) with that local enterprise, it is possible for that State to deny the application of the exception of paragraph 2 in abusive cases.

(Added on 22 July 2010; see HISTORY)

8.9 The various approaches that are available to States that want to deal with such abusive cases are discussed in the section "Improper use of the Convention" in the Commentary on Article 1. As explained in paragraph 9.1 of that Commentary, it is agreed that States do not have to grant the benefits of a tax convention where arrangements that constitute an abuse of the Convention have been entered into. As noted in paragraph 9.5 of that Commentary, however, it should not be lightly assumed that this is the case (see also paragraph 22.2 of that Commentary).

(Added on 22 July 2010; see HISTORY)

8.10 The approach described in the previous paragraphs therefore allows the State in which the activities are exercised to reject the application of paragraph 2 in abusive cases and in cases where, under that State's domestic law concept of employment, services rendered to a local enterprise by an individual who is formally employed by a non-resident are rendered in an employment relationship (contract of service) with that local enterprise. This approach ensures that relief of double taxation will be provided in the State of residence of the individual even if that State does not, under its own domestic law, consider that there is an employment relationship between the individual and the enterprise to which the services are provided. Indeed, as long as the State of residence acknowledges that the concept of employment in the domestic tax law of the State of source or the existence of arrangements that

constitute an abuse of the Convention allows that State to tax the employment income of an individual in accordance with the Convention, it must grant relief for double taxation pursuant to the obligations incorporated in Article 23 A and 23 B (see paragraphs 32.1 to 32.7 of the Commentary on these articles). The mutual agreement procedure provided by paragraph 1 of Article 25 will be available to address cases where the State of residence does not agree that the other State has correctly applied the approach described above and, therefore, does not consider that the other State has taxed the relevant income in accordance with the Convention.

(Added on 22 July 2010; see HISTORY)

8.11 The conclusion that, under domestic law, a formal contractual relationship should be disregarded must, however, be arrived at on the basis of objective criteria. For instance, a State could not argue that services are deemed, under its domestic law, to constitute employment services where, under the relevant facts and circumstances, it clearly appears that these services are rendered under a contract for the provision of services concluded between two separate enterprises. The relief provided under paragraph 2 of Article 15 would be rendered meaningless if States were allowed to deem services to constitute employment services in cases where there is clearly no employment relationship or to deny the quality of employer to an enterprise carried on by a non-resident where it is clear that that enterprise provides services, through its own personnel, to an enterprise carried on by a resident. Conversely, where services rendered by an individual may properly be regarded by a State as rendered in an employment relationship rather than as under a contract for services concluded between two enterprises, that State should logically also consider that the individual is not carrying on the business of the enterprise that constitutes that individual's formal employer; this could be relevant, for example, for purposes of determining whether that enterprise has a permanent establishment at the place where the individual performs his activities.

(Added on 22 July 2010; see HISTORY)

8.12 It will not always be clear, however, whether services rendered by an individual may properly be regarded by a State as rendered in an employment relationship rather than as under a contract for services concluded between two enterprises. Any disagreement between States as to whether this is the case should be solved having regard to the following principles and examples (using, where appropriate, the mutual agreement procedure).

(Added on 22 July 2010; see HISTORY)

8.13 The nature of the services rendered by the individual will be an important factor since it is logical to assume that an employee provides

services which are an integral part of the business activities carried on by his employer. It will therefore be important to determine whether the services rendered by the individual constitute an integral part of the business of the enterprise to which these services are provided. For that purpose, a key consideration will be which enterprise bears the responsibility or risk for the results produced by the individual's work. Clearly, however, this analysis will only be relevant if the services of an individual are rendered directly to an enterprise. Where, for example, an individual provides services to a contract manufacturer or to an enterprise to which business is outsourced, the services of that individual are not rendered to enterprises that will obtain the products or services in question.

(Added on 22 July 2010; see HISTORY)

8.14 Where a comparison of the nature of the services rendered by the individual with the business activities carried on by his formal employer and by the enterprise to which the services are provided points to an employment relationship that is different from the formal contractual relationship, the following additional factors may be relevant to determine whether this is really the case:

— who has the authority to instruct the individual regarding the manner in which the work has to be performed;

— who controls and has responsibility for the place at which the work is performed;

— the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided (see paragraph 8.15 below);

— who puts the tools and materials necessary for the work at the individual's disposal;

— who determines the number and qualifications of the individuals performing the work;

— who has the right to select the individual who will perform the work and to terminate the contractual arrangements entered into with that individual for that purpose;

— who has the right to impose disciplinary sanctions related to the work of that individual;

— who determines the holidays and work schedule of that individual.

(Added on 22 July 2010; see HISTORY)

8.15 Where an individual who is formally an employee of one enterprise provides services to another enterprise, the financial arrangements made between the two enterprises will clearly be relevant, although not necessarily

conclusive, for the purposes of determining whether the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided. For instance, if the fees charged by the enterprise that formally employs the individual represent the remuneration, employment benefits and other employment costs of that individual for the services that he provided to the other enterprise, with no profit element or with a profit element that is computed as a percentage of that remuneration, benefits and other employment costs, this would be indicative that the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided. That should not be considered to be the case, however, if the fee charged for the services bears no relationship to the remuneration of the individual or if that remuneration is only one of many factors taken into account in the fee charged for what is really a contract for services (*e.g.* where a consulting firm charges a client on the basis of an hourly fee for the time spent by one of its employees to perform a particular contract and that fee takes account of the various costs of the enterprise), provided that this is in conformity with the arm's length principle if the two enterprises are associated. It is important to note, however, that the question of whether the remuneration of the individual is directly charged by the formal employer to the enterprise to which the services are provided is only one of the subsidiary factors that are relevant in determining whether services rendered by that individual may properly be regarded by a State as rendered in an employment relationship rather than as under a contract for services concluded between two enterprises.

(Added on 22 July 2010; see HISTORY)

8.16 Example 1: Aco, a company resident of State A, concludes a contract with Bco, a company resident of State B, for the provision of training services. Aco is specialised in training people in the use of various computer software and Bco wishes to train its personnel to use recently acquired software. X, an employee of Aco who is a resident of State A, is sent to Bco's offices in State B to provide training courses as part of the contract.

(Added on 22 July 2010; see HISTORY)

8.17 In that case, State B could not argue that X is in an employment relationship with Bco or that Aco is not the employer of X for purposes of the convention between States A and B. X is formally an employee of Aco whose own services, when viewed in light of the factors in paragraphs 8.13 and 8.14, form an integral part of the business activities of Aco. The services that he renders to Bco are rendered on behalf of Aco under the contract concluded between the two enterprises. Thus, provided that X is not present in State B for more than 183 days during any relevant twelve month period and that Aco does not have in State B a permanent establishment which bears the cost of

X's remuneration, the exception of paragraph 2 of Article 15 will apply to X's remuneration.

(Added on 22 July 2010; see HISTORY)

8.18 Example 2: Cco, a company resident of State C, is the parent company of a group of companies that includes Dco, a company resident of State D. Cco has developed a new worldwide marketing strategy for the products of the group. In order to ensure that the strategy is well understood and followed by Dco, which sells the group's products, Cco sends X, one of its employees who has worked on the development of the strategy, to work in Dco's headquarters for four months in order to advise Dco with respect to its marketing and to ensure that Dco's communications department understands and complies with the worldwide marketing strategy.

(Added on 22 July 2010; see HISTORY)

8.19 In that case, Cco's business includes the management of the worldwide marketing activities of the group and X's own services are an integral part of that business activity. While it could be argued that an employee could have been easily hired by Dco to perform the function of advising the company with respect to its marketing, it is clear that such function is frequently performed by a consultant, especially where specialised knowledge is required for a relatively short period of time. Also, the function of monitoring the compliance with the group's worldwide marketing strategy belongs to the business of Cco rather than to that of Dco. The exception of paragraph 2 of Article 15 should therefore apply provided that the other conditions for that exception are satisfied.

(Added on 22 July 2010; see HISTORY)

8.20 Example 3: A multinational owns and operates hotels worldwide through a number of subsidiaries. Eco, one of these subsidiaries, is a resident of State E where it owns and operates a hotel. X is an employee of Eco who works in this hotel. Fco, another subsidiary of the group, owns and operates a hotel in State F where there is a shortage of employees with foreign language skills. For that reason, X is sent to work for five months at the reception desk of Fco's hotel. Fco pays the travel expenses of X, who remains formally employed and paid by Eco, and pays Eco a management fee based on X's remuneration, social contributions and other employment benefits for the relevant period.

(Added on 22 July 2010; see HISTORY)

8.21 In that case, working at the reception desk of the hotel in State F, when examined in light of the factors in paragraphs 8.13 and 8.14, may be viewed as forming an integral part of Fco's business of operating that hotel rather than

of Eco's business. Under the approach described above, if, under the domestic law of State F, the services of X are considered to have been rendered to Fco in an employment relationship, State F could then logically consider that Fco is the employer of X and the exception of paragraph 2 of Article 15 would not apply.

(Added on 22 July 2010; see HISTORY)

8.22 Example 4: Gco is a company resident of State G. It carries on the business of filling temporary business needs for highly specialised personnel. Hco is a company resident of State H which provides engineering services on building sites. In order to complete one of its contracts in State H, Hco needs an engineer for a period of five months. It contacts Gco for that purpose. Gco recruits X, an engineer resident of State X, and hires him under a five month employment contract. Under a separate contract between Gco and Hco, Gco agrees to provide the services of X to Hco during that period. Under these contracts, Gco will pay X's remuneration, social contributions, travel expenses and other employment benefits and charges.

(Added on 22 July 2010; see HISTORY)

8.23 In that case, X provides engineering services while Gco is in the business of filling short-term business needs. By their nature the services rendered by X are not an integral part of the business activities of his formal employer. These services are, however, an integral part of the business activities of Hco, an engineering firm. In light of the factors in paragraphs 8.13 and 8.14, State H could therefore consider that, under the approach described above, the exception of paragraph 2 of Article 15 would not apply with respect to the remuneration for the services of the engineer that will be rendered in that State.

(Added on 22 July 2010; see HISTORY)

8.24 Example 5: Ico is a company resident of State I specialised in providing engineering services. Ico employs a number of engineers on a full time basis. Jco, a smaller engineering firm resident of State J, needs the temporary services of an engineer to complete a contract on a construction site in State J. Ico agrees with Jco that one of Ico's engineers, who is a resident of State I momentarily not assigned to any contract concluded by Ico, will work for four months on Jco's contract under the direct supervision and control of one of Jco's senior engineers. Jco will pay Ico an amount equal to the remuneration, social contributions, travel expenses and other employment benefits of that engineer for the relevant period, together with a 5 per cent commission. Jco also agrees to indemnify Ico for any eventual claims related to the engineer's work during that period of time.

(Added on 22 July 2010; see HISTORY)

8.25 In that case, even if Ico is in the business of providing engineering services, it is clear that the work performed by the engineer on the construction site in State J is performed on behalf of Jco rather than Ico. The direct supervision and control exercised by Jco over the work of the engineer, the fact that Jco takes over the responsibility for that work and that it bears the cost of the remuneration of the engineer for the relevant period are factors that could support the conclusion that the engineer is in an employment relationship with Jco. Under the approach described above, State J could therefore consider that the exception of paragraph 2 of Article 15 would not apply with respect to the remuneration for the services of the engineer that will be rendered in that State.

(Added on 22 July 2010; see HISTORY)

8.26 Example 6: Kco, a company resident of State K, and Lco, a company resident of State L, are part of the same multinational group of companies. A large part of the activities of that group are structured along function lines, which requires employees of different companies of the group to work together under the supervision of managers who are located in different States and employed by other companies of the group. X is a resident of State K employed by Kco; she is a senior manager in charge of supervising human resources functions within the multinational group. Since X is employed by Kco, Kco acts as a cost centre for the human resource costs of the group; periodically, these costs are charged out to each of the companies of the group on the basis of a formula that takes account of various factors such as the number of employees of each company. X is required to travel frequently to other States where other companies of the group have their offices. During the last year, X spent three months in State L in order to deal with human resources issues at Lco.

(Added on 22 July 2010; see HISTORY)

8.27 In that case, the work performed by X is part of the activities that Kco performs for its multinational group. These activities, like other activities such as corporate communication, strategy, finance and tax, treasury, information management and legal support, are often centralised within a large group of companies. The work that X performs is thus an integral part of the business of Kco. The exception of paragraph 2 of Article 15 should therefore apply to the remuneration derived by X for her work in State L provided that the other conditions for that exception are satisfied.

(Added on 22 July 2010; see HISTORY)

8.28 Where, in accordance with the above principles and examples, a State properly considers that the services rendered on its territory by an individual have been rendered in an employment relationship rather than under a

contract for services concluded between two enterprises, there will be a risk that the enterprises would be required to withhold tax at source in two jurisdictions on the remuneration of that individual even though double taxation should ultimately be avoided (see paragraph 8.10 above). This compliance difficulty may be partly reduced by tax administrations making sure that their domestic rules and practices applicable to employment are clear and well understood by employers and are easily accessible. Also, the problem can be alleviated if the State of residence allows enterprises to quickly adjust the amount of tax to be withheld to take account of any relief for double taxation that will likely be available to the employee.

(Added on 22 July 2010; see HISTORY)

9. Paragraph 3 applies to the remuneration of crews of ships or aircraft operated in international traffic, or of boats engaged in inland waterways transport, a rule which follows up to a certain extent the rule applied to the income from shipping, inland waterways transport and air transport, that is, to tax them in the Contracting State in which the place of effective management of the enterprise concerned is situated. In the Commentary on Article 8, it is indicated that Contracting States may agree to confer the right to tax such income on the State of the enterprise operating the ships, boats or aircraft. The reasons for introducing that possibility in the case of income from shipping, inland waterways and air transport operations are valid also in respect of remuneration of the crew. Accordingly Contracting States are left free to agree on a provision which gives the right to tax such remuneration to the State of the enterprise. Such a provision, as well as that of paragraph 3 of Article 15, assumes that the domestic laws of the State on which the right to tax is conferred allows it to tax the remuneration of a person in the service of the enterprise concerned, irrespective of his residence. It is understood that paragraph 3 of Article 8 is applicable if the place of effective management of a shipping enterprise or of an inland waterways transport enterprise is aboard a ship or a boat. According to the domestic laws of some member countries, tax is levied on remuneration received by non-resident members of the crew in respect of employment aboard ships only if the ship has the nationality of such a State. For that reason conventions concluded between these States provide that the right to tax such remuneration is given to the State of the nationality of the ship. On the other hand many States cannot make use of such a taxation right and the provision could in such cases lead to non-taxation. However, States having that taxation principle in their domestic laws may agree bilaterally to confer the right to tax remuneration in respect of employment aboard ships on the State of the nationality of the ship.

(Renumbered on 23 July 1992; see HISTORY)

10. It should be noted that no special rules regarding the taxation of income of frontier workers or of employees working on trucks and trains travelling between States are included as it would be more suitable for the problems created by local conditions to be solved directly between the States concerned.

(Amended on 15 July 2005; see HISTORY)

11. No special provision has been made regarding remuneration derived by visiting professors or students employed with a view to their acquiring practical experience. Many conventions contain rules of some kind or other concerning such cases, the main purpose of which is to facilitate cultural relations by providing for a limited tax exemption. Sometimes, tax exemption is already provided under domestic taxation laws. The absence of specific rules should not be interpreted as constituting an obstacle to the inclusion of such rules in bilateral conventions whenever this is felt desirable.

(Renumbered on 23 July 1992; see HISTORY)

The treatment of employee stock-options

12. The different country rules for taxing employee stock-options create particular problems which are discussed below. While many of these problems arise with respect to other forms of employee remuneration, particularly those that are based on the value of shares of the employer or a related company, they are particularly acute in the case of stock-options. This is largely due to the fact that stock-options are often taxed at a time (*e.g.* when the option is exercised or the shares sold) that is different from the time when the employment services that are remunerated through these options are rendered.

(Added on 15 July 2005; see HISTORY)

12.1 As noted in paragraph 2.2, the Article allows the State of source to tax the part of the stock-option benefit that constitutes remuneration derived from employment exercised in that State even if the tax is levied at a later time when the employee is no longer employed in that State.

(Added on 15 July 2005; see HISTORY)

12.2 While the Article applies to the employment benefit derived from a stock-option granted to an employee regardless of when that benefit is taxed, there is a need to distinguish that employment benefit from the capital gain that may be derived from the alienation of shares acquired upon the exercise of the option. This Article, and not Article 13, will apply to any benefit derived from the option itself until it has been exercised, sold or otherwise alienated (*e.g.* upon cancellation or acquisition by the employer or issuer). Once the option is exercised or alienated, however, the employment benefit has been

realised and any subsequent gain on the acquired shares (*i.e.* the value of the shares that accrues after exercise) will be derived by the employee in his capacity of investor-shareholder and will be covered by Article 13. Indeed, it is at the time of exercise that the option, which is what the employee obtained from his employment, disappears and the recipient obtains the status of shareholder (and usually invests money in order to do so). Where, however, the option that has been exercised entitles the employee to acquire shares that will not irrevocably vest until the end of a period of required employment, it will be appropriate to apply this Article to the increase in value, if any, until the end of the required period of employment that is subsequent to the exercise of the option.

(Added on 15 July 2005; see HISTORY)

12.3 The fact that the Article does not apply to a benefit derived after the exercise or alienation of the option does not imply in any way that taxation of the employment income under domestic law must occur at the time of that exercise or alienation. As already noted, the Article does not impose any restriction as to when the relevant income may be taxed by the State of source. Thus, the State of source could tax the relevant income at the time the option is granted, at the time the option is exercised (or alienated), at the time the share is sold or at any other time. The State of source, however, may only tax the benefits attributable to the option itself and not what is attributable to the subsequent holding of shares acquired upon the exercise of that option (except in the circumstances described in the last sentence of the preceding paragraph).

(Added on 15 July 2005; see HISTORY)

12.4 Since paragraph 1 must be interpreted to apply to any benefit derived from the option until it has been exercised, sold or otherwise alienated, it does not matter how such benefit, or any part thereof, is characterised for domestic tax purposes. As a result, whilst the Article will be interpreted to allow the State of source to tax the benefits accruing up to the time when the option has been exercised, sold or otherwise alienated, it will be left to that State to decide how to tax such benefits, *e.g.* as either employment income or capital gain. If the State of source decides, for example, to impose a capital gains tax on the option when the employee ceases to be a resident of that country, that tax will be allowed under the Article. The same will be true in the State of residence. For example, while that State will have sole taxation right on the increase of value of the share obtained after exercise since this will be considered to fall under Article 13 of the Convention, it may well decide to tax such increase as employment income rather than as a capital gain under its domestic law.

(Added on 15 July 2005; see HISTORY)

12.5 The benefits resulting from a stock-option granted to an employee will not, as a general rule, fall under either Article 21, which does not apply to income covered by other Articles, or Article 18, which only applies to pension and other similar remuneration, even if the option is exercised after termination of the employment or retirement.

(Added on 15 July 2005; see HISTORY)

12.6 Paragraph 1 allows the State of source to tax salaries, wages and other similar remuneration derived from employment exercised in that State. The determination of whether and to what extent an employee stock-option is derived from employment exercised in a particular State must be done in each case on the basis of all the relevant facts and circumstances, including the contractual conditions associated with that option (*e.g.* the conditions under which the option granted may be exercised or disposed of). The following general principles should be followed for that purpose.

(Added on 15 July 2005; see HISTORY)

12.7 The first principle is that, as a general rule, an employee stock-option should not be considered to relate to any services rendered after the period of employment that is required as a condition for the employee to acquire the right to exercise that option. Thus, where a stock-option is granted to an employee on the condition that he provides employment services to the same employer (or an associated enterprise) for a period of three years, the employment benefit derived from that option should generally not be attributed to services performed after that three year period.

(Added on 15 July 2005; see HISTORY)

12.8 In applying the above principle, however, it is important to distinguish between a period of employment that is required to obtain the right to exercise an employee stock-option and a period of time that is merely a delay before such option may be exercised (a blocking period). Thus, for example, an option that is granted to an employee on the condition that he remains employed by the same employer (or an associated enterprise) during a period of three years can be considered to be derived from the services performed during these three years while an option that is granted, without any condition of subsequent employment, to an employee on a given date but which, under its terms and conditions, can only be exercised after a delay of three years, should not be considered to relate to the employment performed during these years as the benefit of such an option would accrue to its recipient even if he were to leave his employment immediately after receiving it and waited the required three years before exercising it.

(Added on 15 July 2005; see HISTORY)

12.9 It is also important to distinguish between a situation where a period of employment is required as a condition for the acquisition of the right to exercise an option, *i.e.* the vesting of the option, and a situation where an option that has already vested may be forfeited if it is not exercised before employment is terminated (or within a short period after). In the latter situation, the benefit of the option should not be considered to relate to services rendered after vesting since the employee has already obtained the benefit and could in fact realise it at any time. A condition under which the vested option may be forfeited if employment is terminated is not a condition for the acquisition of the benefit but, rather, one under which the benefit already acquired may subsequently be lost. The following examples illustrate this distinction:

— Example 1: On 1 January of year 1, a stock-option is granted to an employee. The acquisition of the option is conditional on the employee continuing to be employed by the same employer until 1 January of year 3. The option, once this condition is met, will be exercisable from 1 January of year 3 until 1 January of year 10 (a so-called "American" option[1]). It is further provided, however, that any option not previously exercised will be lost upon cessation of employment. In that example, the right to exercise that option has been acquired on 1 January of year 3 (*i.e.* the date of vesting) since no further period of employment is then required for the employee to obtain the right to exercise the option.

— Example 2: On 1 January of year 1, a stock-option is granted to an employee. The option is exercisable on 1 January of year 5 (a so-called "European" option). The option has been granted subject to the condition that it can only be exercised on 1 January of year 5 if employment is not terminated before that date. In that example, the right to exercise that option is not acquired until 1 January of year 5, which is the date of exercise, since employment until that date is required to acquire the right to exercise the option (*i.e.* for the option to vest).

(Added on 15 July 2005; see HISTORY)

12.10 There are cases where that first principle might not apply. One such case could be where the stock-option is granted without any condition to an employee at the time he either takes up an employment, is transferred to a new country or is given significant new responsibilities and, in each case, the option clearly relates to the new functions to be performed by the employee during a specific future period. In that case, it may be appropriate to consider

1 Under an "American" stock-option, the right to acquire a share may be exercised during a certain period (typically a number of years) whilst under a European stock-option, that right may only be exercised at a given moment (*i.e.* on a particular date).

C (15)

that the option relates to these new functions even if the right to exercise the option is acquired before these are performed. There are also cases where an option vested technically but where that option entitles the employee to acquire shares which will not vest until the end of a period of required employment. In such cases, it may be appropriate to consider that the benefit of the option relates to the services rendered in the whole period between the grant of the option and the vesting of the shares.

(Added on 15 July 2005; see HISTORY)

12.11 The second principle is that an employee stock-option should only be considered to relate to services rendered before the time when it is granted to the extent that such grant is intended to reward the provision of such services by the recipient for a specific period. This would be the case, for example, where the remuneration is demonstrably based on the employee's past performance during a certain period or is based on the employer's past financial results and is conditional on the employee having been employed by the employer or an associated enterprise during a certain period to which these financial results relate. Also, in some cases, there may be objective evidence demonstrating that during a period of past employment, there was a well-founded expectation among participants to an employee stock-option plan that part of their remuneration for that period would be provided through the plan by having stock-options granted at a later date. This evidence might include, for example, the consistent practice of an employer that has granted similar levels of stock-options over a number of years, as long as there was no indication that this practice might be discontinued. Depending on other factors, such evidence may be highly relevant for purposes of determining if and to what extent the stock-option relates to such a period of past employment.

(Added on 15 July 2005; see HISTORY)

12.12 Where a period of employment is required to obtain the right to exercise an employee's stock-option but such requirement is not applied in certain circumstances, *e.g.* where the employment is terminated by the employer or where the employee reaches retirement age, the stock-option benefit should be considered to relate only to the period of services actually performed when these circumstances have in fact occurred.

(Added on 15 July 2005; see HISTORY)

12.13 Finally, there may be situations in which some factors may suggest that an employee stock-option is rewarding past services but other factors seem to indicate that it relates to future services. In cases of doubt, it should be recognised that employee stock-options are generally provided as an incentive to future performance or as a way to retain valuable employees. Thus,

employee stock-options are primarily related to future services. However, all relevant facts and circumstances will need to be taken into account before such a determination can be made and there may be cases where it can be shown that a stock-option is related to combined specific periods of previous and future services (*e.g.* options are granted on the basis of the employee having achieved specific performance targets for the previous year, but they become exercisable only if the employee remains employed for another three years).

(Added on 15 July 2005; see HISTORY)

12.14 Where, based on the preceding principles, a stock-option is considered to be derived from employment exercised in more than one State, it will be necessary to determine which part of the stock-option benefit is derived from employment exercised in each State for purposes of the application of the Article and of Articles 23 A and 23 B. In such a case, the employment benefit attributable to the stock-option should be considered to be derived from a particular country in proportion of the number of days during which employment has been exercised in that country to the total number of days during which the employment services from which the stock-option is derived has been exercised. For that purpose, the only days of employment that should be taken into account are those that are relevant for the stock-option plan, *e.g.* those during which services are rendered to the same employer or to other employers the employment by whom would be taken into account to satisfy a period of employment required to acquire the right to exercise the option.

(Added on 15 July 2005; see HISTORY)

12.15 It is possible for member countries to depart from the case-by-case application of the above principles (in paragraphs 12.7 to 12.14) by agreeing to a specific approach in a bilateral context. For example, two countries that tax predominantly at exercise of an option may agree, as a general principle, to attribute the income from an option that relates primarily to future services to the services performed by an employee in the two States between date of grant and date of exercise. Thus, in the case of options that do not become exercisable until the employee has performed services for the employer for a specific period of time, two States could agree to an approach that attributes the income from the option to each State based on the number of days worked in each State by the employee for the employer in the period between date of grant and date of exercise. Another example would be for two countries that have similar rules for the tax treatment of employee stock-options to adopt provisions that would give to one of the Contracting States exclusive taxation rights on the employment benefit even if a minor part of the employment services to which the option relates have been rendered in the other State. Of

course, member countries should be careful in adopting such approaches because they may result in double taxation or double non-taxation if part of the employment is exercised in a third State that does not apply a similar approach.

(Added on 15 July 2005; see HISTORY)

Observations on the Commentary

13. *France* considers that paragraph 8.13 should not be interpreted as being sufficient in itself to question a formal contractual relationship. If, with respect to paragraph 8.13, the services rendered by an individual constitute an integral part of the business of the enterprise to which these services are provided, the situation should then be analysed in accordance with the provisions of paragraph 8.14.

(Replaced on 22 July 2010; see HISTORY)

13.1 With respect to paragraph 6.2, *Germany* holds the view that a partnership as such should be considered as the employer (as under the national law of most OECD member States even if these States do not tax the partnership as such). The residence of the partnership would then have to be determined hypothetically as if the partnership were liable to tax by reason of one of the criteria mentioned in paragraph 1.

(Added on 29 April 2000; see HISTORY)

Reservations on the Article

14. *Slovenia* reserves the right to add an article which addresses the situation of teachers, professors and researchers, subject to various conditions, and to make a corresponding modification to paragraph 1 of Article 15.

(Added on 22 July 2010; see HISTORY)

15. *Denmark*, *Norway* and *Sweden* reserve the right to insert special provisions regarding remuneration derived in respect of an employment exercised aboard an aircraft operated in international traffic by the air transport consortium Scandinavian Airlines System (SAS).

(Added on 23 July 1992; see HISTORY)

16. *Germany* and *Norway* reserve the right to include an express reference in paragraph 2 to income earned by hired-out personnel of one Contracting State working in the other Contracting State, in order to clarify the understanding that the exception in paragraph 2 does not apply in situations of "international hiring-out of labour" (see paragraph 8 above).

(Added on 23 July 1992; see HISTORY)

17. *Ireland*, *Norway* and the *United Kingdom* reserve the right to insert in a special article provisions regarding income derived from employment relating to offshore hydrocarbon exploration and exploitation and related activities.

(Amended on 29 April 2000; see HISTORY)

18. *(Deleted on 21 September 1995; see HISTORY)*

19. *Switzerland* reserves its position on subparagraph *a)* of paragraph 2 and wishes to insert in its conventions the words "in the fiscal year concerned" instead of the words "in any twelve month period commencing or ending in the fiscal year concerned".

(Added on 23 July 1992; see HISTORY)

20. In view of its particular situation in relation to shipping, *Greece* will retain its freedom of action with regard to the provisions in the Convention relating to remuneration of crews of ships in international traffic.

(Added on 31 March 1994; see HISTORY)

21. *Greece* reserves the right to insert special provisions regarding income from employment relating to offshore activities.

(Amended on 29 April 2000; see HISTORY)

HISTORY

Title: Amended by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, the title read as follows:

> "COMMENTARY ON ARTICLE 15 CONCERNING THE TAXATION OF DEPENDENT PERSONAL SERVICES."

Paragraph 1: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 1 read as follows:

> "1. Paragraph 1 establishes the general rule as to the taxation of income from employment (other than pensions), namely, that such income is taxable in the State where the employment is actually exercised. Employment is exercised in the place where the employee is physically present when performing the activities for which the employment income is paid. One consequence of this would be that a resident of a Contracting State who derived remuneration, in respect of an employment, from sources in the other State could not be taxed in that other State in respect of that remuneration merely because the results of this work were exploited in that other State."

Paragraph 1 was previously amended on 23 October 1997, by adding the second sentence, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. In the 1977 Model Convention and until 23 October 1997, paragraph 1 read as follows:

"1. Paragraph 1 establishes the general rule as to the taxation of income from employment (other than pensions), namely, that such income is taxable in the State where the employment is actually exercised. One consequence of this would be that a resident of a Contracting State who derived remuneration, in respect of an employment, from sources in the other State could not be taxed in that other State in respect of that remuneration merely because the results of this work were exploited in that other State."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

"1. The first paragraph of Article 15 establishes the general rule as to the taxation of income from employment (other than pensions), namely, that such income is taxable in the State where the employment is actually exercised. One consequence of this would be that a resident of a Contracting State who derived remuneration, in respect of an employment, from sources in the other State could not be taxed in that other State in respect of that remuneration merely because the results of his work were exploited in that other State."

Paragraph 2: Amended on 23 October 1997, by adding the word "Non-employment" at the beginning of the second sentence, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. In the 1977 Model Convention and until 23 October 1997, paragraph 2 read as follows:

"2. The general rule is subject to exception only in the case of pensions (Article 18) and of remuneration and pensions in respect of government service (Article 19). Remuneration of members of boards of directors of companies is the subject of Article 16."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. The general rule is subject to exception only in the case of pensions (Article 18) and of remuneration and pensions in respect of certain governmental functions (Article 19). Remuneration of members of boards of directors of companies is the object of a special provision (Article 16)."

Paragraph 2.1: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004). After 23 October 1997 and until 15 July 2005, paragraph 2.1 read as follows:

"2.1 Member countries have generally understood the term "salaries, wages and other similar remuneration" to include benefits in kind received in respect of an employment (*e.g.* the use of a residence or automobile, health or life insurance coverage and club memberships)."

Paragraph 2.1 was added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 3: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on

29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 3 read as follows:

> "3. Paragraph 2 contains, however, a general exception to the rule in paragraph 1. This exception covers all individuals rendering dependent personal services (sales representatives, construction workers, engineers, etc.), to the extent that their remuneration does not fall under the provisions of other Articles, such as those applying to government services or artistes and sportsmen."

Paragraph 3 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 60 of a previous report entitled "Taxation Issues Relating to International Hiring-out of Labour" (adopted by the OECD Council on 24 August 1984) and paragraph 27 of a previous report entitled "The 183 Day Rule: Some Problems of Application and Interpretation" (adopted by the OECD Council on 24 October 1991). In the 1977 Model Convention and until 23 July 1992, paragraph 3 read as follows:

> "3. Paragraph 2 contains, however, a general exception to the rule in paragraph 1. This exception, which concerns employment of short duration abroad, is mainly intended to facilitate the international movement of qualified personnel, as in the case of firms which sell capital goods and are responsible for installing and assembling them abroad. The three conditions prescribed in this paragraph must be satisfied for the remuneration to qualify for the exemption. The exemption is limited to the 183-day period. It is further stipulated that this time period may not be exceeded "in the fiscal year concerned". The formulation used may create difficulties in cases where the fiscal years of the Contracting States do not coincide. In order to avoid these difficulties such Contracting States may prefer to use another phrasing, for instance "fiscal year of that other State" or "calendar year". The employer paying the remuneration must not be a resident of the State in which the employment is exercised. Furthermore, should the employer have in that State a permanent establishment (or a fixed base if he performs professional services or other activities of an independent character), the exemption is given only on condition that the remuneration is not borne by a permanent establishment or a fixed base which the employer has in the other State. It should be noted that, under the provisions of Article 17, the exemption does not apply to remuneration of artistes and athletes."

Paragraph 3 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

> "3. The second paragraph of Article 15 contains, however, a general exception to the rule in paragraph 1. This exception, which concerns employment of short duration abroad, is mainly intended to facilitate the international movement of qualified personnel, as in the case of firms which sell capital goods and are responsible for installing and assembling them abroad. The three conditions prescribed in this paragraph must be satisfied concurrently for the remuneration to qualify for the exemption. The exemption is limited to the 183-day period which is stipulated in the Mexico and London Model Conventions of the League of Nations. The employer paying the remuneration must not be a resident of the State in which the employment is exercised. Furthermore, should the employer have in that State a permanent establishment (or a fixed base if he performs professional services or independent activities of a similar character), the exemption is given only on condition that the remuneration is not borne by a permanent establishment or a fixed base which the employer has in the other State. It should be noted that, under

the provisions of Article 17 the exemption does not apply to remuneration of public entertainers and athletes."

Paragraph 4: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 4 read as follows:

"4. The three conditions prescribed in this paragraph must be satisfied for the remuneration to qualify for the exemption. The first condition is that the exemption is limited to the 183 day period. It is further stipulated that this time period may not be exceeded "in any twelve month period commencing or ending in the fiscal year concerned". This contrasts with the 1963 Draft Convention and the 1977 Model Convention which provided that the 183 day period should not be exceeded "in the fiscal year concerned", a formulation that created difficulties where the fiscal years of the Contracting States did not coincide and which opened up opportunities in the sense that operations were sometimes organised in such a way that, for example, workers stayed in the State concerned for the last 5 ½ months of one year and the first 5 ½ months of the following year. The present wording of subparagraph 2 *a)* does away with such opportunities for tax avoidance."

Paragraph 4 was replaced on 23 July 1992. Paragraph 4 of the 1977 Model Convention was renumbered as paragraph 9 (see history of paragraph 9) and a new paragraph 4 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 27 of a previous report entitled "The 183 Day Rule: Some Problems of Application and Interpretation" (adopted by the OECD Council on 24 October 1991).

Paragraph 4 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

"4. The object of the third paragraph of Article 15 is to apply to the remuneration of crews of ships or aircraft in international traffic, or of boats engaged in inland waterways transport, a rule which follows up to a certain extent the rule applied to the income from shipping, inland waterways transport and air transport -- that is, to tax them in the Contracting State in which the place of effective management of the enterprise concerned is situated. This provision assumes that the internal law of that State allows it to tax the remuneration of a person in the service of the enterprise concerned, irrespective of his fiscal domicile. It is understood that paragraph 3 of Article 8 concerning shipping, inland waterways transport and air transport, is applicable if the place of effective management of a shipping enterprise or of an inland waterways transport enterprise is aboard a ship or boat."

Paragraph 5: Amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 5 read as follows:

"5. Although various formulas have been used by member countries to calculate the 183 day period, there is only one way which is consistent with the wording of this paragraph: the "days of physical presence" method. The application of this method is straightforward as the individual is either present in a country or he is not. The presence could also relatively easily be documented by the taxpayer when evidence is required by the tax authorities. Under this method the following days are included in the calculation: part of a day, day of arrival, day of departure and all other days spent inside the State of activity such as Saturdays and Sundays, national holidays, holidays (see paragraph 6 below) before, during and after the activity, short breaks (training, strikes, lock-out, delays in supplies), days of

sickness (unless they prevent the individual from leaving and he would have otherwise qualified for the exemption) and death or sickness in the family. The following days are not taken into account: transit between two different points outside the State of activity, holidays spent outside the State of activity and short breaks (for whatever reason) spent outside the State of activity."

Paragraph 5 was replaced on 23 July 1992. Paragraph 5 of the 1977 Model Convention was renumbered as paragraph 10 (see history of paragraph 10) and a new paragraph 5 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 27 of a previous report entitled "The 183 Day Rule: Some Problems of Application and Interpretation" (adopted by the OECD Council on 24 October 1991).

Paragraph 5 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

"5. It should be noted that no special rule regarding the taxation of income of frontier workers is included as it would be more suitable for the problems created by local conditions to be solved directly between the countries concerned."

Paragraph 5.1: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 6: Corresponds to paragraph 7 as it read before 29 April 2000. Paragraph 7 was renumbered as paragraph 6 on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 7 was amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 7 read as follows:

"7. The second condition is that the employer paying the remuneration must not be a resident of the State in which the employment is exercised. Thirdly, should the employer have in the State in which the employment is exercised a permanent establishment (or a fixed base if he performs professional services or other activities of an independent character), the exemption is given only on condition that the remuneration is not borne by a permanent establishment or a fixed base which he has in that State. It should be noted that, where remuneration is dealt with under a different Article of the Convention, such as Article 17, the provisions of that Article, and not of this Article, apply."

Paragraph 7 was replaced on 23 July 1992. Paragraph 7 of the 1977 Model Convention was renumbered as paragraph 12 (see history of paragraph 20), the preceding heading was moved with it and a new paragraph 7 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 27 of a previous report entitled "The 183 Day Rule: Some Problems of Application and Interpretation" (adopted by the OECD Council on 24 October 1991).

Paragraph 6 was deleted on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 6 read as follows:

"6. While holidays spent inside the State of activity are normally included in the calculation, some flexibility is acceptable if the taxpayer can demonstrate to the satisfaction of the tax authorities of both Contracting States that the holidays are clearly related or not related to the activity."

Paragraph 6 was replaced on 23 July 1992. Paragraph 6 of the 1977 Model Convention was renumbered as paragraph 11 (see history of paragraph 11) and a new paragraph 6 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 27 of a previous report entitled "The 183 Day Rule: Some Problems of Application and Interpretation" (adopted by the OECD Council on 24 October 1991).

Paragraph 6.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 6.2: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 7: Amended on 22 July 2010, by incorporating the third and subsequent sentences in a new paragraph 7.1, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 7 read as follows:

"7. Under the third condition, if the employer has a permanent establishment in the State in which the employment is exercised, the exemption is given on condition that the remuneration is not borne by that permanent establishment. The phrase "borne by" must be interpreted in the light of the underlying purpose of subparagraph *c)* of the Article, which is to ensure that the exception provided for in paragraph 2 does not apply to remuneration that could give rise to a deduction, having regard to the principles of Article 7 and the nature of the remuneration, in computing the profits of a permanent establishment situated in the State in which the employment is exercised. In this regard, it must be noted that the fact that the employer has, or has not, actually claimed a deduction for the remuneration in computing the profits attributable to the permanent establishment is not necessarily conclusive since the proper test is whether any deduction otherwise available for that remuneration would be allocated to the permanent establishment. That test would be met, for instance, even if no amount were actually deducted as a result of the permanent establishment being exempt from tax in the source country or of the employer simply deciding not to claim a deduction to which he was entitled. The test would also be met where the remuneration is not deductible merely because of its nature (*e.g.* where the State takes the view that the issuing of shares pursuant to an employee stock-option does not give rise to a deduction) rather than because it should not be allocated to the permanent establishment."

Paragraph 7 was previously amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004). After 29 April 2000 and until 15 July 2005, paragraph 7 read as follows:

"7. Under the third condition, if the employer has in the State in which the employment is exercised a permanent establishment, the exemption is given only

on condition that the remuneration is not borne by a permanent establishment which he has in that State. The phrase "borne by" must be interpreted in the light of the underlying purpose of subparagraph *c)* of the Article, which is to ensure that the exception provided for in paragraph 2 does not apply to remuneration that is deductible, having regard to the principles of Article 7, in computing the profits of a permanent establishment situated in the State in which the employment is exercised. In this regard, it must be noted that the fact that the employer has, or has not, actually deducted the remuneration in computing the profits attributable to the permanent establishment is not necessarily conclusive since the proper test is whether the remuneration would be allowed as a deduction for tax purposes; that test would be met, for instance, even if no amount were actually deducted as a result of the permanent establishment being exempt from tax in the source country or of the employer simply deciding not to claim a deduction to which he was entitled."

Paragraph 7 as it read after 29 April 2000 corresponded to paragraph 7.1. On 29 April 2000 paragraph 7 was renumbered as paragraph 6 (see history of paragraph 6) and paragraph 7.1 was amended and renumbered as paragraph 7 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 21 September 1995 and until 29 April 2000, paragraph 7.1 read as follows:

"7.1 Under the third condition, if the employer has in the State in which the employment is exercised a permanent establishment (or a fixed base if he performs professional services or other activities of an independent character), the exemption is given only on condition that the remuneration is not borne by a permanent establishment or a fixed base which he has in that State."

Paragraph 7.1 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 7.1: Corresponds to the third and subsequent sentences of paragraph 7 as they read before 22 July 2010. The third and subsequent sentences of paragraph 7 were amended and incorporated into paragraph 7.1 (see history of paragraph 7) by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 7.1 was amended and renumbered as paragraph 7 (see history of paragraph 7) on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000).

Paragraph 7.2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until 22 July 2010, paragraph 8 read as follows:

"8. Paragraph 2 has given rise to numerous cases of abuse through adoption of the practice known as "international hiring-out of labour". In this system, a local employer wishing to employ foreign labour for one or more periods of less than 183 days recruits through an intermediary established abroad who purports to be the employer and hires the labour out to the employer. The worker thus fulfils prima facie the three conditions laid down by paragraph 2 and may claim exemption

from taxation in the country where he is temporarily working. To prevent such abuse, in situations of this type, the term "employer" should be interpreted in the context of paragraph 2. In this respect, it should be noted that the term "employer" is not defined in the Convention but it is understood that the employer is the person having rights on the work produced and bearing the relative responsibility and risks. In cases of international hiring-out of labour, these functions are to a large extent exercised by the user. In this context, substance should prevail over form, *i.e.* each case should be examined to see whether the functions of employer were exercised mainly by the intermediary or by the user. It is therefore up to the Contracting States to agree on the situations in which the intermediary does not fulfil the conditions required for him to be considered as the employer within the meaning of paragraph 2. In settling this question, the competent authorities may refer not only to the above-mentioned indications but to a number of circumstances enabling them to establish that the real employer is the user of the labour (and not the foreign intermediary):

— the hirer does not bear the responsibility or risk for the results produced by the employee's work;

— the authority to instruct the worker lies with the user;

— the work is performed at a place which is under the control and responsibility of the user;

— the remuneration to the hirer is calculated on the basis of the time utilised, or there is in other ways a connection between this remuneration and wages received by the employee;

— tools and materials are essentially put at the employee's disposal by the user;

— the number and qualifications of the employees are not solely determined by the hirer."

Paragraph 8 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraphs 73 to 79 of a previous report entitled "Taxation Issues Relating to International Hiring-out of Labour" (adopted by the OECD Council on 24 August 1984).

Paragraph 8.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.3: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.4: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.5: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.6: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.7: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.8: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.9: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.10: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.11: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.12: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.13: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.14: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.15: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.16: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.17: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.18: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.19: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.20: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.21: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.22: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.23: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.24: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.25: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.26: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.27: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 8.28: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 9: Corresponds to paragraph 4 as it read before 23 July 1992. Paragraph 4 of the 1977 Model Convention was renumbered as paragraph 9 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 10: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 10 read as follows:

> "10. It should be noted that no special rule regarding the taxation of income of frontier workers is included as it would be more suitable for the problems created by local conditions to be solved directly between the States concerned."

Paragraph 10 corresponded to paragraph 5 as it read before 23 July 1992. Paragraph 5 of the 1977 Model Convention was renumbered as paragraph 10 on 23 July 1992 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 11: Corresponds to paragraph 6 as it read before 23 July 1992. Paragraph 6 of the 1977 Model Convention was renumbered as paragraph 11 on 23 July 1992 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 6 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 6 read as follows:

> "6. No special provision has been made regarding remuneration derived by visiting professors or students employed with a view to their acquiring practical experience. Most current Conventions contain rules of some kind or other concerning such cases, the main purpose of which is to facilitate cultural relations by providing for a limited tax exemption. Sometimes, tax exemption is already provided under national taxation laws. The absence of specific rules should not be interpreted as constituting an obstacle to the inclusion of such rules in bilateral Conventions whenever this is felt desirable."

Paragraph 12: Added together with the heading preceding it, on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12 as it read before 31 March 1994 was amended and renumbered as paragraph 20 (see history of paragraph 20) by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 12.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.3: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.4: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.5: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.6: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of

another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.7: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.8: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.9: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.10: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.11: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.12: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.13: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.14: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 12.15: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 13: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until it was deleted on 22 July 2010, paragraph 13 read as follows:

> "13. *Switzerland* is of the opinion that the comments in paragraph 8 above should only apply to situations of international hiring-out of labour in case of abusive arrangements."

Paragraph 13 was added together with the heading preceding it on 23 July 1992 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 13.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 14: Added on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 14 was previously deleted on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 14 read as follows:

"14. *Denmark* and *Norway* reserve the right, with reference to subparagraph 2 *b)* of the Article, to require that the remuneration be paid by, or on behalf of, an employer who is a resident of the State of which the recipient is a resident."

Paragraph 14 and the heading preceding it were added on 23 July 1992 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 15: Added on 23 July 1992 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 16: Added on 23 July 1992 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 17: Amended on 29 April 2000, by replacing the words "dependent personal services" with the word "employment", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 21 September 1995 and until 29 April 2000, paragraph 17 read as follows:

"17. *Ireland*, *Norway* and the *United Kingdom* reserve the right to insert in a special article provisions regarding income derived from dependent personal services relating to offshore hydrocarbon exploration and exploitation and related activities."

Paragraph 17 was previously amended on 21 September 1995, by adding Ireland to the list of countries making the reservation, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 31 March 1994 and until 21 September 1995, paragraph 17 read as follows:

"17. *Norway* and the *United Kingdom* reserve the right to insert in a special article provisions regarding income derived from dependent personal services relating to offshore hydrocarbon exploration and exploitation and related activities."

Paragraph 17 was previously amended on 31 March 1994, by adding United Kingdom as a country making the reservation, by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 17 read as follows:

"17. *Norway* reserves the right to insert in a special article provisions regarding income derived from dependent personal services relating to offshore hydrocarbon exploration and exploitation and related activities."

Paragraph 17 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 18: Deleted on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 18 read as follows:

"18. *Portugal* reserves the right, with reference to subparagraph 2 *b)* of the Article, to require that the remuneration be paid by, or on behalf of, an employer who is a resident of the State of which the recipient is a resident."

Paragraph 18 was added on 23 July 1992 by the report entitled “The Revision of the 1977 Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 19: Added on 23 July 1992 by the report entitled “The Revision of the 1977 Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 20: Corresponds to paragraph 12 as it read before 31 March 1994. Paragraph 12 was amended and renumbered as paragraph 20 on 31 March 1994 by the report entitled “1994 Update to the Model Tax Convention”, adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 12 read as follows:

> “12. In view of its particular situation in relation to shipping, *Greece* will retain its freedom of action with regard to the provisions in the Convention relating to profits from the operation of ships in international traffic, to remuneration of crews of such ships, to capital represented by ships in international traffic and by movable property pertaining to the operation of such ships, and to capital gains from the alienation of such ships and assets.”

Paragraph 12 as it read after 23 July 1992 corresponded to paragraph 7 of the 1977 Model Convention. Paragraph 7 was renumbered as paragraph 12 and the heading preceding paragraph 7 was deleted by the report entitled “The Revision of the 1977 Model Convention”, adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the heading preceding paragraph 7 read as follows:

> “Special Derogation”

Paragraph 7 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 21: Amended on 29 April 2000, by replacing the words “dependent personal services” with the word “employment”, by the report entitled “The 2000 Update to the Model Tax Convention”, adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled “Issues Related to Article 14 of the OECD Model Tax Convention” (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 21 September 1995 and until 29 April 2000, paragraph 21 read as follows:

> “21. *Greece* reserves the right to insert special provisions regarding income from dependent personal services relating to offshore activities.”

Paragraph 21 was added on 21 September 1995 by the report entitled “The 1995 Update to the Model Tax Convention”, adopted by the OECD Council on 21 September 1995.

COMMENTARY ON ARTICLE 16 CONCERNING THE TAXATION OF DIRECTORS' FEES

1. This Article relates to remuneration received by a resident of a Contracting State, whether an individual or a legal person, in the capacity of a member of a board of directors of a company which is a resident of the other Contracting State. Since it might sometimes be difficult to ascertain where the services are performed, the provision treats the services as performed in the State of residence of the company.

(Amended on 11 April 1977; see HISTORY)

1.1 Member countries have generally understood the term "fees and other similar payments" to include benefits in kind received by a person in that person's capacity as a member of the board of directors of a company (*e.g.* stock-options, the use of a residence or automobile, health or life insurance coverage and club memberships).

(Amended on 15 July 2005; see HISTORY)

2. A member of the board of directors of a company often also has other functions with the company, *e.g.* as ordinary employee, adviser, consultant, etc. It is clear that the Article does not apply to remuneration paid to such a person on account of such other functions.

(Replaced on 11 April 1977; see HISTORY)

3. In some countries organs of companies exist which are similar in function to the board of directors. Contracting States are free to include in bilateral conventions such organs of companies under a provision corresponding to Article 16.

(Added on 11 April 1977; see HISTORY)

3.1 Many of the issues discussed under paragraphs 12 to 12.15 of the Commentary on Article 15 in relation to stock-options granted to employees will also arise in the case of stock-options granted to members of the board of directors of companies. To the extent that stock-options are granted to a resident of a Contracting State in that person's capacity as a member of the board of directors of a company which is a resident of the other State, that other State will have the right to tax the part of the stock-option benefit that constitutes director's fees or a similar payment (see paragraph 1.1 above) even if the tax is levied at a later time when the person is no longer a member of that board. While the Article applies to the benefit derived from a stock-option granted to a member of the board of directors regardless of when that benefit is taxed, there is a need to distinguish that benefit from the capital gain that may be derived from the alienation of shares acquired upon the exercise of the

option. This Article, and not Article 13, will apply to any benefit derived from the option itself until it has been exercised, sold or otherwise alienated (*e.g.* upon cancellation or acquisition by the company or issuer). Once the option is exercised or alienated, however, the benefit taxable under this Article has been realised and any subsequent gain on the acquired shares (*i.e.* the value of the shares that accrues after exercise) will be derived by the member of the board of directors in his capacity of investor-shareholder and will be covered by Article 13. Indeed, it is at the time of exercise that the option, which is what the director obtained in his capacity as such, disappears and the recipient obtains the status of shareholder (and usually invests money in order to do so).

(Added on 15 July 2005; see HISTORY)

Reservations on the Article

4. *(Deleted on 17 July 2008; see HISTORY)*

5. The *United States* will require that any tax imposed on such fees be limited to the income earned from services performed in the country of source.

(Replaced on 23 July 1992; see HISTORY)

6. *Belgium* reserves the right to state that remuneration that a person dealt with in Article 16 receives in respect of daily activities as well as remuneration that a partner of a company, other than a company with share capital, receives in respect of his personal activities for the company shall be taxable in accordance with the provisions of Article 15.

(Amended on 15 July 2005; see HISTORY)

7. *Greece* reserves the right to apply Article 16 to remuneration of a partner who acts in the capacity of a manager of a Greek limited liability company or of a Greek partnership.

(Added on 21 September 1995; see HISTORY)

HISTORY

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. Article 16 relates to remuneration received by a resident of a Contracting State, whether an individual or a legal person, in the capacity of a member of a board of directors of a company which is a resident of the other Contracting State. Since it might sometimes be difficult to ascertain where the services are performed, the provision treats the services as performed in the country of residence of the company."

Paragraph 1.1: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-border Income Tax Issues Arising from Employee Stock-Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004). After 23 October 1997 and until 15 July 2005, paragraph 1.1 read as follows:

> "1.1 Member countries have generally understood the term "fees and other similar payments" to include benefits in kind received by a person in that person's capacity as a member of the board of directors of a company (*e.g.* the use of a residence or automobile, health or life insurance coverage and club memberships)."

Paragraph 1.1 was added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. Canada reserves its position with regard to this Article. When negotiating Conventions with other Member countries, the Canadian authorities would wish to have directors' fees included with remuneration and salary under Article 15."

Paragraph 3: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 3.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-border Income Tax Issues Arising from Employee Stock-Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 4: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. In the 1977 Model Convention and until 17 July 2008, paragraph 4 read as follows:

> "4. *Portugal* reserves the right to tax under Article 15 any remuneration of a member of the board of directors or of any other body of a company, for the carrying out of a permanent activity."

Paragraph 4 was added and the preceding heading was moved from immediately before paragraph 2 to immediately before paragraph 4 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 5: Replaced paragraph 5 as it read before 23 July 1992. Paragraph 5 of 1977 Model Convention was deleted and a new paragraph 5 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 5 read as follows:

> "5. The *United States* reserves its position with regard to this Article. The United States believe that directors' fees should be subject to tax under Article 14."

Paragraph 5 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 6: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004). After 28 January 2003 and until 15 July 2005, paragraph 6 read as follows:

> "6. *Belgium* reserves the right to also apply Article 16 to remuneration derived from functions which are other than that of an administrator or commission member but which are treated as such under Belgian domestic law. Also, Belgium wishes to apply Article 15, and not Article 16, not only in respect of remuneration for daily activities received by persons performing the functions of an administrator or commission member or similar functions, but also to remuneration derived by partners in commercial entities other than limited companies and companies limited by shares from their personal activities."

Paragraph 6 was previously amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 6 read as follows:

> "6. *Belgium* reserves the right to also apply Article 16 to remuneration derived from functions which are other than that of an administrator or commission member but which are treated as such under Belgian domestic law. Also, Belgium wishes to apply Article 15, and not Article 16, not only in respect of remuneration for daily activities received by persons performing the functions of an administrator or commission member or similar functions, but also to remuneration derived by partners in a Belgian partnership from their personal activities."

Paragraph 6 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 7: Added on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

COMMENTARY ON ARTICLE 17
CONCERNING THE TAXATION OF ARTISTES AND SPORTSMEN

Paragraph 1

1. Paragraph 1 provides that artistes and sportsmen who are residents of a Contracting State may be taxed in the other Contracting State in which their personal activities as such are performed, whether these are of a business or employment nature. This provision is an exception to the rules in Article 7 and to that in paragraph 2 of Article 15, respectively.

(Amended on 29 April 2000; see HISTORY)

2. This provision makes it possible to avoid the practical difficulties which often arise in taxing artistes and sportsmen performing abroad. Moreover, too strict provisions might in certain cases impede cultural exchanges. In order to overcome this disadvantage, the States concerned may, by common agreement, limit the application of paragraph 1 to business activities. To achieve this it would be sufficient to amend the text of the Article so that an exception is made only to the provisions of Article 7. In such a case, artistes and sportsmen performing in the course of an employment would automatically come within Article 15 and thus be entitled to the exemptions provided for in paragraph 2 of that Article.

(Amended on 29 April 2000; see HISTORY)

C (17)

3. Paragraph 1 refers to artistes and sportsmen. It is not possible to give a precise definition of "artiste", but paragraph 1 includes examples of persons who would be regarded as such. These examples should not be considered as exhaustive. On the one hand, the term "artiste" clearly includes the stage performer, film actor, actor (including for instance a former sportsman) in a television commercial. The Article may also apply to income received from activities which involve a political, social, religious or charitable nature, if an entertainment character is present. On the other hand, it does not extend to a visiting conference speaker or to administrative or support staff (*e.g.* cameramen for a film, producers, film directors, choreographers, technical staff, road crew for a pop group etc.). In between there is a grey area where it is necessary to review the overall balance of the activities of the person concerned.

(Replaced on 23 July 1992; see HISTORY)

4. An individual may both direct a show and act in it, or may direct and produce a television programme or film and take a role in it. In such cases it is necessary to look at what the individual actually does in the State where the performance takes place. If his activities in that State are predominantly of a performing nature, the Article will apply to all the resulting income he derives

in that State. If, however, the performing element is a negligible part of what he does in that State, the whole of the income will fall outside the Article. In other cases an apportionment should be necessary.

(Replaced on 23 July 1992; see HISTORY)

5. Whilst no precise definition is given of the term "sportsmen" it is not restricted to participants in traditional athletic events (*e.g.* runners, jumpers, swimmers). It also covers, for example, golfers, jockeys, footballers, cricketers and tennis players, as well as racing drivers.

(Replaced on 23 July 1992; see HISTORY)

6. The Article also applies to income from other activities which are usually regarded as of an entertainment character, such as those deriving from billiards and snooker, chess and bridge tournaments.

(Replaced on 23 July 1992; see HISTORY)

7. Income received by impresarios, etc. for arranging the appearance of an artiste or sportsman is outside the scope of the Article, but any income they receive on behalf of the artiste or sportsman is of course covered by it.

(Replaced on 23 July 1992; see HISTORY)

8. Paragraph 1 applies to income derived directly and indirectly by an individual artiste or sportsman. In some cases the income will not be paid directly to the individual or his impresario or agent. For instance, a member of an orchestra may be paid a salary rather than receive payment for each separate performance: a Contracting State where a performance takes place is entitled, under paragraph 1, to tax the proportion of the musician's salary which corresponds to such a performance. Similarly, where an artiste or sportsman is employed by *e.g.* a one person company, the State where the performance takes place may tax an appropriate proportion of any remuneration paid to the individual. In addition, where its domestic laws "look through" such entities and treat the income as accruing directly to the individual, paragraph 1 enables that State to tax income derived from appearances in its territory and accruing in the entity for the individual's benefit, even if the income is not actually paid as remuneration to the individual.

(Replaced on 23 July 1992; see HISTORY)

9. Besides fees for their actual appearances, artistes and sportsmen often receive income in the form of royalties or of sponsorship or advertising fees. In general, other Articles would apply whenever there was no direct link between the income and a public exhibition by the performer in the country concerned. Royalties for intellectual property rights will normally be covered by Article 12 rather than Article 17 (see paragraph 18 of the Commentary on Article 12), but

in general advertising and sponsorship fees will fall outside the scope of Article 12. Article 17 will apply to advertising or sponsorship income, etc. which is related directly or indirectly to performances or appearances in a given State. Similar income which could not be attributed to such performances or appearances would fall under the standard rules of Article 7 or Article 15, as appropriate. Payments received in the event of the cancellation of a performance are also outside the scope of Article 17, and fall under Articles 7 or 15, as the case may be.

(Amended on 29 April 2000; see HISTORY)

10. The Article says nothing about how the income in question is to be computed. It is for a Contracting State's domestic law to determine the extent of any deductions for expenses. Domestic laws differ in this area, and some provide for taxation at source, at a low rate based on the gross amount paid to artistes and sportsmen. Such rules may also apply to income paid to groups or incorporated teams, troupes, etc. Some States, however, may consider that the taxation of the gross amount may be inappropriate in some circumstances even if the applicable rate is low. These States may want to give the option to the taxpayer to be taxed on a net basis. This could be done through the inclusion of a paragraph drafted along the following lines:

> Where a resident of a Contracting State derives income referred to in paragraph 1 or 2 and such income is taxable in the other Contracting State on a gross basis, that person may, within [period to be determined by the Contracting States] request the other State in writing that the income be taxable on a net basis in that other State. Such request shall be allowed by that other State. In determining the taxable income of such resident in the other State, there shall be allowed as deductions those expenses deductible under the domestic laws of the other State which are incurred for the purposes of the activities exercised in the other State and which are available to a resident of the other State exercising the same or similar activities under the same or similar conditions.

(Amended on 17 July 2008; see HISTORY)

Paragraph 2

11. Paragraph 1 of the Article deals with income derived by individual artistes and sportsmen from their personal activities. Paragraph 2 deals with situations where income from their activities accrues to other persons. If the income of an entertainer or sportsman accrues to another person, and the State of source does not have the statutory right to look through the person receiving the income to tax it as income of the performer, paragraph 2 provides that the portion of the income which cannot be taxed in the hands of the performer may be taxed in the hands of the person receiving the

remuneration. If the person receiving the income carries on business activities, tax may be applied by the source country even if the income is not attributable to a permanent establishment there. But it will not always be so. There are three main situations of this kind:

a) The first is the management company which receives income for the appearance of *e.g.* a group of sportsmen (which is not itself constituted as a legal entity).

b) The second is the team, troupe, orchestra, etc. which is constituted as a legal entity. Income for performances may be paid to the entity. Individual members of the team, orchestra, etc. will be liable to tax under paragraph 1, in the State in which a performance is given, on any remuneration (or income accruing for their benefit) as a counterpart to the performance; however, if the members are paid a fixed periodic remuneration and it would be difficult to allocate a portion of that income to particular performances, member countries may decide, unilaterally or bilaterally, not to tax it. The profit element accruing from a performance to the legal entity would be liable to tax under paragraph 2.

c) The third situation involves certain tax avoidance devices in cases where remuneration for the performance of an artiste or sportsman is not paid to the artiste or sportsman himself but to another person, *e.g.* a so-called artiste company, in such a way that the income is taxed in the State where the activity is performed neither as personal service income to the artiste or sportsman nor as profits of the enterprise, in the absence of a permanent establishment. Some countries "look through" such arrangements under their domestic law and deem the income to be derived by the artiste or sportsman; where this is so, paragraph 1 enables them to tax income resulting from activities in their territory. Other countries cannot do this. Where a performance takes place in such a country, paragraph 2 permits it to impose a tax on the profits diverted from the income of the artiste or sportsman to the enterprise. It may be, however, that the domestic laws of some States do not enable them to apply such a provision. Such States are free to agree to other solutions or to leave paragraph 2 out of their bilateral conventions.

(Amended on 29 April 2000; see HISTORY)

11.1 The application of paragraph 2 is not restricted to situations where both the entertainer or sportsman and the other person to whom the income accrues, *e.g.* a star-company, are residents of the same Contracting State. The paragraph allows the State in which the activities of an entertainer or sportsman are exercised to tax the income derived from these activities and accruing to another person regardless of other provisions of the Convention

that may otherwise be applicable. Thus, notwithstanding the provisions of Article 7, the paragraph allows that State to tax the income derived by a star-company resident of the other Contracting State even where the entertainer or sportsman is not a resident of that other State. Conversely, where the income of an entertainer resident in one of the Contracting States accrues to a person, *e.g.* a star-company, who is a resident of a third State with which the State of source does not have a tax convention, nothing will prevent the Contracting State from taxing that person in accordance with its domestic laws.

(Added on 29 April 2000; see HISTORY)

11.2 As a general rule it should be noted, however, that, regardless of Article 7, the Convention would not prevent the application of general anti-avoidance rules of the domestic law of the State of source which would allow that State to tax either the entertainer/sportsman or the star-company in abusive cases, as is recognised in paragraph 24 of the Commentary on Article 1.

(Added on 29 April 2000; see HISTORY)

Additional considerations relating to paragraphs 1 and 2

12. Where, in the cases dealt with in paragraphs 1 and 2, the exemption method for relieving double taxation is used by the State of residence of the person receiving the income, that State would be precluded from taxing such income even if the State where the activities were performed could not make use of its right to tax. It is therefore understood that the credit method should be used in such cases. The same result could be achieved by stipulating a subsidiary right to tax for the State of residence of the person receiving the income, if the State where the activities are performed cannot make use of the right conferred on it by paragraphs 1 and 2. Contracting States are free to choose any of these methods in order to ensure that the income does not escape taxation.

(Renumbered and amended on 23 July 1992; see HISTORY)

13. Article 17 will ordinarily apply when the artiste or sportsman is employed by a Government and derives income from that Government; see paragraph 6 of the Commentary on Article 19. Certain conventions contain provisions excluding artistes and sportsmen employed in organisations which are subsidised out of public funds from the application of Article 17.

(Amended on 21 September 1995; see HISTORY)

14. Some countries may consider it appropriate to exclude from the scope of the Article events supported from public funds. Such countries are free to include a provision to achieve this but the exemptions should be based on

clearly definable and objective criteria to ensure that they are given only where intended. Such a provision might read as follows:

> The provisions of paragraphs 1 and 2 shall not apply to income derived from activities performed in a Contracting State by artistes or sportsmen if the visit to that State is wholly or mainly supported by public funds of one or both of the Contracting States or political subdivisions or local authorities thereof. In such a case, the income is taxable only in the Contracting State in which the artiste or the sportsman is a resident.

(Added on 23 July 1992; see HISTORY)

Observations on the Commentary

15. Concerning paragraphs 8 and 9, *Germany*, considering paragraph 18 of the Commentary on Article 12, takes the view that payments made as remuneration for live broadcasting rights of an event are income of the performing or appearing sportspersons or artistes under paragraph 1 of Article 17. This income may be taxed in accordance with paragraph 2 of Article 17 in the case of payments made to any other third party in the context of an economic exploitation of the live broadcasting rights.

(Added on 22 July 2010; see HISTORY)

15.1 *France* considers that the statement in the first sentence of paragraph 13, which is at variance with the wording prior to the 1995 revision, is incorrect, because it does not conform with reality to characterise *a priori* as business the public activities at issue — and in particular cultural activities — that do not ordinarily have a profit motive. In addition, this statement is not consistent with the second sentence of the same paragraph or with paragraph 14, which explicitly provides the right to apply a special exemption regime to the public activities in question: if applied generally to business activities, such a regime would be unjustified, because it would then be contrary to fiscal neutrality and tax equality.

(Amended on 29 April 2000; see HISTORY)

Reservations on the Article

16. *Canada*, *Switzerland* and the *United States* are of the opinion that paragraph 2 of the Article should apply only to cases mentioned in subparagraph 11 *c*) above and these countries reserve the right to propose an amendment to that effect.

(Amended on 23 October 1997; see HISTORY)

18. *(Deleted on 21 September 1995; see HISTORY)*

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

19. *(Deleted on 21 September 1995; see HISTORY)*

20. The *United States* reserves the right to limit paragraph 1 to situations where the entertainer or sportsman earns a specified amount.

(Renumbered and amended on 23 July 1992; see HISTORY)

HISTORY

Title: Replaced when the report entitled "The Revision of the Model Convention", was adopted by the OECD Council on 23 July 1992, on the basis of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987). In the 1977 Model Convention, the title read as follows:

> "COMMENTARY ON ARTICLE 17 CONCERNING THE TAXATION OF ARTISTES AND ATHLETES"

Paragraph 1: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 1 read as follows:

> "1. Paragraph 1 provides that artistes and sportsmen who are residents of a Contracting State may be taxed in the other Contracting State in which their personal activities as such are performed, whether these are of an independent or of a dependent nature. This provision is an exception to the rules in Article 14 and to that in paragraph 2 of Article 15, respectively."

Paragraph 1 was previously amended on 23 July 1992 and the heading preceding paragraph 1 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987). In the 1977 Model Convention and until 23 July 1992, paragraph 1 read as follows:

> "1. Paragraph 1 provides that entertainers and athletes who are residents of a Contracting State may be taxed in the other Contracting State in which their personal activities as such are performed, whether these are of an independent or of a dependent nature. This provision is an exception to the rules in Article 14 and to that in paragraph 2 of Article 15, respectively."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. The provisions of Article 17 relate to public entertainers and athletes and stipulate that they may be taxed in the State in which the activities are performed, whether these are of an independent or of a dependent nature. This provision is an exception, in the first case, to the rule laid down in Article 14, in the second case, to the rule laid down in paragraph 2 of Article 15."

Paragraph 2: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on

Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 2 read as follows:

> "2. This provision makes it possible to avoid the practical difficulties which often arise in taxing artistes and sportsmen performing abroad. Moreover, too strict provisions might in certain cases impede cultural exchanges. In order to overcome this disadvantage, the States concerned may, by common agreement, limit the application of paragraph 1 to independent activities. To achieve this it would be sufficient to amend the text of the Article so that an exception is made only to the provisions of Article 14. In such a case, artistes and sportsmen performing for a salary or wages would automatically come within Article 15 and thus be entitled to the exemptions provided for in paragraph 2 of that Article."

Paragraph 2 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987). In the 1977 Model Convention and until 23 July 1992, paragraph 2 read as follows:

> "2. This provision makes it possible to avoid the practical difficulties which often arise in taxing entertainers and athletes performing abroad. Moreover, too strict provisions might in certain cases impede cultural exchanges. In order to overcome this disadvantage, the States concerned may, by common agreement limit the application of paragraph 1 to independent activities by adding its provisions to those of Article 14. In such a case, entertainers and athletes performing for a salary or wages would automatically come within Article 15 and thus be entitled to the exemptions provided for in paragraph 2 of that Article."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. This provision makes it possible to avoid the practical difficulties which often arise in taxing public entertainers and athletes performing abroad. Certain Conventions, however, provide for certain exceptions such as those contained in paragraph 2 of Article 15. Moreover, too strict provisions might in certain cases impede cultural exchanges. In order to overcome this disadvantage, the States concerned may, by common agreement, limit the application of Article 17 to independent activities by adding its provisions to those of Article 14 relating to professional services and other independent activities of a similar character. In such case, public entertainers and athletes performing for a salary or wages would automatically come within Article 15 and thus be entitled to the exemptions provided for in paragraph 2 of that Article."

Paragraph 3: Replaced paragraph 3 as it read before 23 July 1992. Paragraph 3 of the 1977 Model Convention was amended and renumbered as paragraph 13 (see history of paragraph 13) and a new paragraph 3 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraphs 68 and 72 of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987).

Paragraph 4: Replaced paragraph 4 as it read before 23 July 1992. Paragraph 4 of the 1977 Model Convention was amended and included as part of new paragraph 11 (see history of paragraph 11) and a new paragraph 4 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 69 of a previous report entitled "The Taxation of Income

Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987).

Paragraph 5: Replaced paragraph 5 as it read before 23 July 1992. Paragraph 5 of the 1977 Model Convention was amended and renumbered as paragraph 12 (see history of paragraph 12) and a new paragraph 5 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 70 of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987).

Paragraph 6: Replaced paragraph 6 as it read before 23 July 1992. Paragraph 6 of the 1977 Model Convention was amended and renumbered as paragraph 16 (see history of paragraph 16), a new paragraph 6 was added and the heading preceding paragraph 6 was moved immediately before paragraph 15 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 71 of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987).

Paragraph 7: Replaced paragraph 7 as it read before 23 July 1992. Paragraph 7 of the 1977 Model Convention was amended and divided into new paragraphs 17 and 19 (see history of paragraphs 17 and 19), new paragraph 7 was added and the heading preceding paragraph 7 was moved immediately before paragraph 16 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraphs 73 and 74 of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987).

Paragraph 8: Replaced paragraph 8 as it read before 23 July 1992. Paragraph 8 of the 1977 Model Convention was amended and renumbered as paragraph 18 (see history of paragraph 18) and a new paragraph 8 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 76 of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987).

Paragraph 9: Amended on 29 April 2000, by deleting the references to "Article 14", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 9 read as follows:

> "9. Besides fees for their actual appearances, artistes and sportsmen often receive income in the form of royalties or of sponsorship or advertising fees. In general, other Articles would apply whenever there was no direct link between the income and a public exhibition by the performer in the country concerned. Royalties for intellectual property rights will normally be covered by Article 12 rather than Article 17 (see paragraph 18 of the Commentary on Article 12), but in general advertising and sponsorship fees will fall outside the scope of Article 12. Article 17 will apply to advertising or sponsorship income, etc. which is related directly or indirectly to performances or appearances in a given State. Similar income which could not be attributed to such performances or appearances would fall under the standard rules of Article 14 or Article 15, as appropriate. Payments received in the event of the cancellation of a performance are also outside the scope of Article 17, and fall under Articles 7, 14 or 15, as the case may be."

Paragraph 9 as it read before 23 July 1992 was replaced. Paragraph 9 of the 1977 Model Convention was amended and renumbered as paragraph 20 (see history of paragraph 20) and a new paragraph 9 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraphs 78 to 84 of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987).

Paragraph 10: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 July 1992 and until 17 July 2008, paragraph 10 read as follows:

> "10. The Article says nothing about how the income in question is to be computed. It is for a Contracting State's domestic law to determine the extent of any deductions for expenses. Domestic laws differ in this area, and some provide for taxation at source, at a low rate based on the gross amount paid to artistes and sportsmen. Such rules may also apply to income paid to groups or incorporated teams, troupes, etc."

Paragraph 10 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 94 of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987).

Paragraph 11: Amended on 29 April 2000 by replacing, in its preamble, the words "is an enterprise" with "carries on business activities" in the forth sentence and deleting the fifth sentence which read "If the person receiving the income is an individual, the income may be taxed even in the absence of a fixed base.", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, the preamble of paragraph 11 read as follows:

> "11. Paragraph 1 of the Article deals with income derived by individual artistes and sportsmen from their personal activities. Paragraph 2 deals with situations where income from their activities accrues to other persons. If the income of an entertainer or sportsman accrues to another person, and the State of source does not have the statutory right to look through the person receiving the income to tax it as income of the performer, paragraph 2 provides that the portion of the income which cannot be taxed in the hands of the performer may be taxed in the hands of the person receiving the remuneration. If the person receiving the income is an enterprise, tax may be applied by the source country even if the income is not attributable to a permanent establishment there. If the person receiving the income is an individual, the income may be taxed even in the absence of a fixed base. But it will not always be so. There are three main situations of this kind:"

Subparagraph *b)* of paragraph 11 was previously amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, subparagraph *b)* read as follows:

> *"b)* The second is the team, troupe, orchestra, etc. which is constituted as a legal entity. Income for performances may be paid to the entity. Individual members of the team, orchestra, etc. will be liable to tax under paragraph 1, in the State in which a performance is given, on any remuneration (or income accruing for their benefit) as a counterpart to the performance. The profit element accruing

from a performance to the legal entity would be liable to tax under paragraph 2."

Paragraph 11 was added on 23 July 1992 together with the heading preceding it. Subparagraph *c)* of new paragraph 11 corresponded to paragraph 4 of the 1977 Model Convention. Paragraph 11 was added, together with the heading preceding it, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraphs 85, 86, 89 and 91 of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987). In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977, and until 23 July 1992, paragraph 4 read as follows:

"4. The purpose of paragraph 2 is to counteract certain tax avoidance devices in cases where remuneration for the performance of an entertainer or athlete is not paid to the entertainer or athlete himself but to another person, *e.g.* a so-called artiste-company, in such a way that the income is taxed in the State where the activity is performed neither as personal service income to the entertainer or athlete nor as profits of the enterprise in the absence of a permanent establishment. Paragraph 2 permits the State in which the performance is given to impose a tax on the profits diverted from the income of the entertainer or athlete to the enterprise where for instance the entertainer or athlete has control over or rights to the income thus diverted or has obtained or will obtain some benefit directly or indirectly from that income. It may be, however, that the domestic laws of some States do not enable them to apply such a provision. Such States are free to agree to alternative solutions or to leave paragraph 2 out of their bilateral convention."

Paragraph 4 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 11.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 11.2: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 12: Corresponds to paragraph 5 as it read before 23 July 1992. Paragraph 5 of the 1977 Model Convention was amended and renumbered as paragraph 12 and the heading preceding it was added on 23 July 1992, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 5 read as follows:

"5. Where in the cases dealt with in paragraph 2 the exemption method for relieving double taxation is used by the State of residence of the person receiving the income, that State would be precluded from taxing such income even if the State where the activities were performed could not make use of its right to tax. It is therefore understood that the credit method should be used in such cases. The same result could be achieved by stipulating a subsidiary right to tax for the State of residence of the person receiving the income, if the State where the activities are performed cannot make use of the right conferred on it by paragraph 2. Contracting States are free to choose any of these methods in order to ensure that the income does not escape taxation."

Paragraph 5 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 13: Amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 13 read as follows:

> "13. The provisions of the Article do not apply when the artiste or sportsman is employed by a Government and derives the income from that Government. Such income is to be treated under the provisions of Article 19. Certain conventions contain provisions excluding artistes and sportsmen employed in organisations which are subsidised out of public funds from the application of Article 17."

Paragraph 13 corresponded to paragraph 3 as it read before 23 July 1992. Paragraph 3 of the 1977 Model Convention was amended and renumbered as paragraph 13 on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 3 read as follows:

> "3. The provisions of the Article shall not prevent Contracting States from agreeing bilaterally on particular provisions concerning such artistes and sportsmen. The provisions of the Article do not apply when the entertainer or athlete is employed by a Government and derives the income from that Government. Such income is to be treated under the provisions of Article 19. Certain conventions contain provisions excluding entertainers and athletes employed in organisations which are subsidised out of public funds from the application of Article 17. The provisions of the Article shall not prevent Contracting States from agreeing bilaterally on particular provisions concerning such entertainers and athletes."

Paragraph 3 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 14: Added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 98 of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987).

Paragraph 15: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 15 was previously deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 15 read as follows:

> "15. In *Germany*, the taxation of income derived by a company resident in a third country from activity exercised in Germany by artistes employed by it should take account of the legal relationship between the German organiser and that company. If there is no double taxation agreement with the third country, Germany can fully tax such income under its domestic legislation. Withholding tax is levied on gross receipts at the rate of 15 per cent. The same applies to third countries with which there is an agreement containing a provision corresponding to paragraph 2 of the Article."

Paragraph 15 was added on 23 July 1992 and the heading preceding paragraph 6 of the 1977 Model Convention was moved immediately before paragraph 15 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 93 of a previous report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987).

Paragraph 15.1: Amended on 29 April 2000 by replacing the words "industrial or commercial" with the word "business" by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 21 September 1995 and until 29 April 2000, paragraph 15.1 read as follows:

> "15.1 *France* considers that the statement in the first sentence of paragraph 13, which is at variance with the wording prior to the 1995 revision, is incorrect, because it does not conform with reality to characterize *a priori* as industrial or commercial the public activities at issue — and in particular cultural activities — that do not ordinarily have a profit motive. In addition, this statement is not consistent with the second sentence of the same paragraph or with paragraph 14, which explicitly provides the right to apply a special exemption regime to the public activities in question: if applied generally to industrial or commercial activities, such a regime would be unjustified, because it would then be contrary to fiscal neutrality and tax equality."

Paragraph 15.1 was added on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 16: Amended on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, paragraph 16 read as follows:

> "16. *Canada*, *Switzerland* and the *United States* are of the opinion that paragraph 2 of the Article should apply only to cases mentioned in subparagraph 11 *c)* above and these countries reserve the right to propose an amendment to that effect when negotiating conventions with other member countries."

Paragraph 16 corresponded to paragraph 6 as it read before 23 July 1992. Paragraph 6 of the 1977 Model Convention was amended and renumbered as paragraph 16 and the heading preceding paragraph 7 was moved immediately before paragraph 16 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 6 read as follows:

> "6. *Canada* and the *United States* are of the opinion that paragraph 2 of the Article applies only to cases mentioned in paragraph 4 above and these countries will propose an amendment to that effect when negotiating conventions with other member countries."

Paragraph 6 was added together with the preceding heading when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 17: Deleted on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 17 read as follows:

> "17. *Greece* reserves its right to apply the provisions of Article 17 to income paid to entertainers and sportsmen employed by a State, a political subdivision or a local authority thereof."

Paragraph 17 as it read after 23 July 1992 corresponded to the reservation by Greece in paragraph 7 of the 1977 Model Convention (see also history of paragraph 19). Paragraph 7 of the 1977 Model Convention was amended, divided and renumbered as paragraphs 17 and 19 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 7 read as follows:

"7. *Greece* and *Portugal* reserve the right to apply the provisions of Article 17, not 19, to income of Government artistes and athletes."

Paragraph 7 was added together with the preceding heading when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 18: Deleted on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 18 read as follows:

"18. *Japan* reserves the right to apply the provisions of this Article to income derived in connection with trade or business by entertainers or sportsmen who are employed by the Government."

Paragraph 18 corresponded to paragraph 8 as it read before 23 July 1992. Paragraph 8 was amended and renumbered as paragraph 18 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 8 read as follows:

"8. *Japan* reserves the right to apply the provisions of this Article to income derived in connection with trade or business by entertainers or athletes who are employed by the Government."

Paragraph 8 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 19: Deleted on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 19 read as follows:

"19. *Portugal* reserves the right to apply the provisions of Article 17, not 19, to income of Government entertainers and sportsmen."

Paragraph 19 as it read after 23 July 1992 corresponded to the reservation by Portugal in paragraph 7 of the 1977 Model Convention (see also history of paragraph 17). On 23 July 1992 paragraph 7 of the 1977 Model Convention was amended, divided and renumbered as paragraphs 17 and 19 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 7 read as follows:

"7. *Greece* and *Portugal* reserve the right to apply the provisions of Article 17, not 19, to income of Government artistes and athletes."

Paragraph 7 was added together with the preceding heading when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 20: Corresponds to paragraph 9 of the 1977 Model Convention. Paragraph 9 was renumbered as paragraph 20 and amended by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 9 read as follows:

"9. The *United States* reserves the right to limit paragraph 1 to situations where the entertainer or athlete is present in the other State for a specified period or earns a specified amount."

Paragraph 9 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

COMMENTARY ON ARTICLE 18 CONCERNING THE TAXATION OF PENSIONS

1. According to this Article, pensions paid in respect of private employment are taxable only in the State of residence of the recipient. Various policy and administrative considerations support the principle that the taxing right with respect to this type of pension, and other similar remuneration, should be left to the State of residence. For instance, the State of residence of the recipient of a pension is in a better position than any other State to take into account the recipient's overall ability to pay tax, which mostly depends on worldwide income and personal circumstances such as family responsibilities. This solution also avoids imposing on the recipient of this type of pension the administrative burden of having to comply with tax obligations in States other than that recipient's State of residence.

(Amended on 15 July 2005; see HISTORY)

2. Some States, however, are reluctant to adopt the principle of exclusive residence taxation of pensions and propose alternatives to the Article. Some of these alternatives and the issues that they raise are discussed in paragraphs 12 to 21 below, which deal with the various considerations related to the allocation of taxing rights with respect to pension benefits and the reasons supporting the Article as drafted.

(Replaced on 15 July 2005; see HISTORY)

Scope of the Article

3. The types of payment that are covered by the Article include not only pensions directly paid to former employees but also to other beneficiaries (*e.g.* surviving spouses, companions or children of the employees) and other similar payments, such as annuities, paid in respect of past employment. The Article also applies to pensions in respect of services rendered to a State or a political subdivision or local authority thereof which are not covered by the provisions of paragraph 2 of Article 19. The Article only applies, however, to payments that are in consideration of past employment; it would therefore not apply, for example, to an annuity acquired directly by the annuitant from capital that has not been funded from an employment pension scheme. The Article applies regardless of the tax treatment of the scheme under which the relevant payments are made; thus, a payment made under a pension plan that is not eligible for tax relief could nevertheless constitute a "pension or other similar remuneration" (the tax mismatch that could arise in such a situation is discussed below).

(Replaced on 15 July 2005; see HISTORY)

4. Various payments may be made to an employee following cessation of employment. Whether or not such payments fall under the Article will be determined by the nature of the payments, having regard to the facts and circumstances in which they are made, as explained in the following two paragraphs.

(Replaced on 15 July 2005; see HISTORY)

5. While the word "pension", under the ordinary meaning of the word, covers only periodic payments, the words "other similar remuneration" are broad enough to cover non-periodic payments. For instance, a lump-sum payment in lieu of periodic pension payments that is made on or after cessation of employment may fall within the Article.

(Replaced on 23 July 1992; see HISTORY)

6. Whether a particular payment is to be considered as other remuneration similar to a pension or as final remuneration for work performed falling under Article 15 is a question of fact. For example, if it is shown that the consideration for the payment is the commutation of the pension or the compensation for a reduced pension then the payment may be characterised as "other similar remuneration" falling under the Article. This would be the case where a person was entitled to elect upon retirement between the payment of a pension or a lump-sum computed either by reference to the total amount of the contributions or to the amount of pension to which that person would otherwise be entitled under the rules in force for the pension scheme. The source of the payment is an important factor; payments made from a pension scheme would normally be covered by the Article. Other factors which could assist in determining whether a payment or series of payments fall under the Article include: whether a payment is made on or after the cessation of the employment giving rise to the payment, whether the recipient continues working, whether the recipient has reached the normal age of retirement with respect to that particular type of employment, the status of other recipients who qualify for the same type of lump-sum payment and whether the recipient is simultaneously eligible for other pension benefits. Reimbursement of pension contributions (*e.g.* after temporary employment) does not constitute "other similar remuneration" under Article 18. Where cases of difficulty arise in the taxation of such payments, the Contracting States should solve the matter by recourse to the provisions of Article 25.

(Replaced on 15 July 2005; see HISTORY)

7. Since the Article applies only to pensions and other similar remuneration that are paid in consideration for past employment, it does not cover other pensions such as those that are paid with respect to previous independent personal services. Some States, however, extend the scope of the

Article to cover all types of pensions, including Government pensions; States wishing to do so are free to agree bilaterally to include provisions to that effect.

(Replaced on 15 July 2005; see HISTORY)

Cross-border issues related to pensions

8. The globalisation of the economy and the development of international communications and transportation have considerably increased the international mobility of individuals, both for work-related and personal reasons. This has significantly increased the importance of cross-border issues arising from the interaction of the different pension arrangements which exist in various States and which were primarily designed on the basis of purely domestic policy considerations. As these issues often affect large numbers of individuals, it is desirable to address them in tax conventions so as to remove obstacles to the international movement of persons, and employees in particular.

(Replaced on 15 July 2005; see HISTORY)

9. Many such issues relate to mismatches resulting from differences in the general tax policy that States adopt with respect to retirement savings. In many States, tax incentives are provided for pension contributions. Such incentives frequently take the form of a tax deferral so that the part of the income of an individual that is contributed to a pension arrangement as well as the income earned in the scheme or any pension rights that accrue to the individual are exempt from tax. Conversely, the pension benefits from these arrangements are taxable upon receipt. Other States, however, treat pension contributions like other forms of savings and neither exempt these contributions nor the return thereon; logically, therefore, they do not tax pension benefits. Between these two approaches exist a variety of systems where contributions, the return thereon, the accrual of pension rights or pension benefits are partially taxed or exempt.

(Replaced on 15 July 2005; see HISTORY)

10. Other issues arise from the existence of very different arrangements to provide retirement benefits. These arrangements are often classified under the following three broad categories:

— statutory social security schemes;

— occupational pension schemes;

— individual retirement schemes.

The interaction between these three categories of arrangements presents particular difficulties. These difficulties are compounded by the fact that each

State may have different tax rules for the arrangements falling in each of these categories as well as by the fact that there are considerable differences in the extent to which States rely on each of these categories to ensure retirement benefits to individuals (*e.g.* some States provide retirement benefits almost exclusively through their social security system while others rely primarily on occupational pension schemes or individual retirement schemes).

(Replaced on 15 July 2005; see HISTORY)

11. The issues arising from all these differences need to be fully considered in the course of bilateral negotiations, in particular to avoid double taxation or non-taxation, and, where appropriate, addressed through specific provisions. The following sections examine some of these cross-border issues.

(Replaced on 15 July 2005; see HISTORY)

Allocation of taxing rights with respect to pension benefits

12. As explained in paragraph 9 above, many States have adopted the approach under which, subject to various restrictions, tax is totally or partially deferred on contributions to, and earnings in, pension schemes or on the accrual of pension rights, but is recovered when pension benefits are paid.

(Replaced on 15 July 2005; see HISTORY)

13. Some of these States consider that because a deduction for pension contributions is a deferral of tax on the part of the employment income that is saved towards retirement, they should be able to recover the tax so deferred where the individual has ceased to be a resident before the payment of all or part of the pension benefits. This view is particularly prevalent where the benefits are paid through a lump-sum amount or over a short period of time as this increases risks of double non-taxation.

(Replaced on 15 July 2005; see HISTORY)

14. If the other State of which that individual then becomes a resident has adopted a similar approach and therefore taxes these pension benefits when received, the issue is primarily one of allocation of taxing rights between the two States. If, however, the individual becomes a resident of a State which adopts a different approach so as not to tax pension benefits, the mismatch in the approaches adopted by the two States will result in a situation where no tax will ever be payable on the relevant income.

(Replaced on 15 July 2005; see HISTORY)

15. For these reasons, some States seek to include in their tax conventions alternative provisions designed to secure either exclusive or limited source taxation rights with respect to pensions in consideration of past employment. The following are examples of provisions that some members have adopted in

consequence of these policy and administrative considerations; States are free to agree bilaterally to include such provisions:

a) *Provisions allowing exclusive source taxation of pension payments*

Under such a provision, the Article is drafted along the following lines:

> Subject to the provisions of paragraph 2 of Article 19, pensions and other similar remuneration arising in a Contracting State and paid to a resident of the other Contracting State in consideration of past employment shall be taxable only in the first-mentioned State.

b) *Provisions allowing non-exclusive source taxation of pension payments*

Under such a provision, the State of source is given the right to tax pension payments and the rules of Articles 23 A or 23 B results in that right being either exclusive or merely prior to that of the State of residence. The Article is then drafted along the following lines:

> Subject to the provisions of paragraph 2 of Article 19, pensions and other similar remuneration paid to a resident of a Contracting State in consideration of past employment shall be taxable only in that State. However such pensions and other similar remuneration may also be taxed in the other Contracting State if they arise in that State.

c) *Provisions allowing limited source taxation of pension*

Under such a provision, the State of source is given the right to tax pension payments but that right is subjected to a limit, usually expressed as a percentage of the payment. The Article is then drafted along the following lines:

> 1. Subject to the provisions of paragraph 2 of Article 19, pensions and other similar remuneration paid to a resident of a Contracting State in consideration of past employment may be taxed in that State.
>
> 2. However such pensions and other similar remuneration may also be taxed in the Contracting State in which they arise and according to the laws of that State but the tax so charged shall not exceed [percentage] of the gross amount of the payment.

Where such a provision is used, a reference to paragraph 2 of Article 18 is added to paragraph 2 of Article 23 A to ensure that the residence State, if it applies the exemption method, is allowed to tax the pension payments but needs to provide a credit for the tax levied by the source State.

d) Provisions allowing source taxation of pension payments only where the State of residence does not tax these payments

Such a provision is used by States that are primarily concerned with the structural mismatch described in paragraph 14 above. A paragraph 2 is then added along the following lines:

> 2. However such pensions and other similar remuneration may also be taxed in the Contracting State in which they arise if these payments are not subject to tax in the other Contracting State under the ordinary rules of its tax law.

(Replaced on 15 July 2005; see HISTORY)

16. Apart from the reasons presented in paragraphs 13 and 14 above, various policy and administrative considerations should be taken into account when considering such provisions.

(Replaced on 15 July 2005; see HISTORY)

17. First, the State of residence is in a better position to provide for adequate taxation of pension payments as it is easier for that State to take into account the worldwide income, and therefore the overall ability to pay tax, of the recipient so as to apply appropriate rates and personal allowances. By contrast, the source taxation of pensions may well result in excessive taxation where the source State imposes a final withholding tax on the gross amount paid. If little or no tax is levied in the residence State (*e.g.* because of available allowances), the pensioner may not be able to claim a credit in the residence State for the tax paid. However, some States have sought to relieve that problem by extending their personal allowances to non-residents who derive almost all their income from these States. Also, some States have allowed the pension payments made to non-resident recipients to be taxed at the marginal rate that would be applicable if that recipient were taxed on worldwide income (that system, however, involves administrative difficulties as it requires a determination of the worldwide income of the non-resident only for the purpose of determining the applicable rate of tax).

(Replaced on 15 July 2005; see HISTORY)

18. Second, equity considerations could be relevant since the level of pensions paid in the source State will generally have been set factoring local rates of tax. In this situation, an individual who has emigrated to another State with different tax rates will either be advantaged or disadvantaged by receiving an after-tax pension that will be different from that envisaged under the pension scheme.

(Replaced on 15 July 2005; see HISTORY)

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

19. Third, alternative provisions under which there is either exclusive or limited source taxation rights with respect to pensions require a determination of the State of source of pensions. Since a mere reference to a pension "arising in" a Contracting State could be construed as meaning either a pension paid by a fund established in that State or a pension derived from work performed in a State, States using such wording should clarify how it should be interpreted and applied.

(Replaced on 15 July 2005; see HISTORY)

19.1 Conceptually, the State of source might be considered to be the State in which the fund is established, the State where the relevant work has been performed or the State where deductions have been claimed. Each of these approaches would raise difficulties in the case of individuals who work in more than one State, change residence during their career or derive pensions from funds established in a State other than that in which they have worked. For example, many individuals now spend significant parts of their careers outside the State in which their pension funds are established and from which their pension benefits are ultimately paid. In such a case, treating the State in which the fund is established as the State of source would seem difficult to justify. The alternative of considering as the State of source the State where the work has been performed or deductions claimed would address that issue but would raise administrative difficulties for both taxpayers and tax authorities, particularly in the case of individuals who have worked in many States during their career, since it would create the possibility of different parts of the same pension having different States of source.

(Added on 15 July 2005; see HISTORY)

19.2 States that wish to use provisions under which there is either exclusive or limited source taxation rights with respect to pensions should take account of these issues related to the determination of the State of source of pensions. They should then address the administrative difficulties that will arise from the rule that they adopt for that purpose, for example to avoid situations where two States would claim to have source taxation rights on the same pension.

(Added on 15 July 2005; see HISTORY)

20. Fourth, another argument against these alternative provisions is that exclusive taxation by the State of residence means that pensioners only need to comply with the tax rules of their State of residence as regards payments covered by Article 18. Where, however, limited or exclusive source taxation of pensions is allowed, the pensioner will need to comply with the tax rules of both Contracting States.

(Replaced on 15 July 2005; see HISTORY)

21. Exclusive residence taxation may, however, give rise to concerns about the non-reporting of foreign pension income. Exchange of information coupled with adequate taxpayer compliance systems will, however, reduce the incidence of non-reporting of foreign pension payments.

(Replaced on 15 July 2005; see HISTORY)

Exempt pensions

22. As mentioned in paragraph 9 above, some States do not tax pension payments generally or otherwise exempt particular categories or parts of pension payments. In these cases, the provisions of the Article, which provides for taxation of pensions in the State of residence, may result in the taxation by that State of pensions which were designed not to be taxed and the amount of which may well have been determined having regard to that exemption. This may result in undue financial hardship for the recipient of the pension.

(Replaced on 15 July 2005; see HISTORY)

23. To avoid the problems resulting from this type of mismatch, some States include in their tax treaties provisions to preserve the exempt treatment of pensions when the recipient is a resident of the other Contracting State. These provisions may be restricted to specific categories of pensions or may address the issue in a more comprehensive way. An example of that latter approach would be a provision drafted along the following lines:

> Notwithstanding any provision of this Convention, any pension or other similar remuneration paid to a resident of a Contracting State in respect of past employment exercised in the other Contracting State shall be exempt from tax in the first-mentioned State if that pension or other remuneration would be exempt from tax in the other State if the recipient were a resident of that other State.

(Replaced on 15 July 2005; see HISTORY)

Issues related to statutory social security schemes

24. Depending on the circumstances, social security payments can fall under this Article as "pensions and other similar remuneration in consideration of past employment", under Article 19 as "pension[s] paid by, or out of funds created by, a Contracting State ... in respect of services rendered to that State..." or under Article 21 as "items of income ... not dealt with in the foregoing Articles". Social security pensions fall under this Article when they are paid in consideration of past employment, unless paragraph 2 of Article 19 applies (see below). A social security pension may be said to be "in consideration of past employment" if employment is a condition for that

pension. For instance, this will be the case where, under the relevant social security scheme:

— the amount of the pension is determined on the basis of either or both the period of employment and the employment income so that years when the individual was not employed do not give rise to pension benefits,

— the amount of the pension is determined on the basis of contributions to the scheme that are made under the condition of employment and in relation to the period of employment, or

— the amount of the pension is determined on the basis of the period of employment and either or both the contributions to the scheme and the investment income of the scheme.

(Replaced on 15 July 2005; see HISTORY)

25. Paragraph 2 of Article 19 will apply to a social security pension that would fall within Article 18 except for the fact that the past employment in consideration of which it is paid constituted services rendered to a State or a political subdivision or a local authority thereof, other than services referred to in paragraph 3 of Article 19.

(Replaced on 15 July 2005; see HISTORY)

26. Social security payments that do not fall within Articles 18 or 19 fall within Article 21. This would be the case, for instance, for payments made to self-employed persons as well as a pension purely based on resources, on age or disability which would be paid regardless of past employment or factors related to past employment (such as years of employment or contributions made during employment).

(Replaced on 15 July 2005; see HISTORY)

27. Some States, however, consider pensions paid out under a public pension scheme which is part of their social security system similar to Government pensions. Such States argue on that basis that the State of source, *i.e.* the State from which the pension is paid, should have a right to tax all such pensions. Many conventions concluded by these States contain provisions to that effect, sometimes including also other payments made under the social security legislation of the State of source. Contracting States having that view may agree bilaterally on an additional paragraph to the Article giving the State of source a right to tax payments made under its social security legislation. A paragraph of that kind could be drafted along the following lines:

> Notwithstanding the provisions of paragraph 1, pensions and other payments made under the social security legislation of a Contracting State may be taxed in that State.

Where the State of which the recipient of such payments is a resident applies the exemption method the payments will be taxable only in the State of source while States using the credit method may tax the payments and give credit for the tax levied in the State of source. Some States using the credit method as the general method in their conventions may, however, consider that the State of source should have an exclusive right to tax such payments. Such States should then substitute the words "shall be taxable only" for the words "may be taxed" in the above draft provision.

(Renumbered and amended on 15 July 2005; see HISTORY)

28. Although the above draft provision refers to the social security legislation of each Contracting State, there are limits to what it covers. "Social security" generally refers to a system of mandatory protection that a State puts in place in order to provide its population with a minimum level of income or retirement benefits or to mitigate the financial impact of events such as unemployment, employment-related injuries, sickness or death. A common feature of social security systems is that the level of benefits is determined by the State. Payments that may be covered by the provision include retirement pensions available to the general public under a public pension scheme, old age pension payments as well as unemployment, disability, maternity, survivorship, sickness, social assistance, and family protection payments that are made by the State or by public entities constituted to administer the funds to be distributed. As there may be substantial differences in the social security systems of the Contracting States, it is important for the States that intend to use the draft provision to verify, during the course of bilateral negotiations, that they have a common understanding of what will be covered by the provision.

(Replaced on 15 July 2005; see HISTORY)

Issues related to individual retirement schemes

29. In many States, preferential tax treatment (usually in the form of the tax deferral described in paragraph 9 above) is available to certain individual private saving schemes established to provide retirement benefits. These individual retirement schemes are usually available to individuals who do not have access to occupational pension schemes; they may also, however, be available to employees who wish to supplement the retirement benefits that they will derive from their social security and occupational pension schemes. These schemes take various legal forms. For example, they may be bank savings accounts, individual investment funds or individually subscribed full life insurance policies. Their common feature is a preferential tax treatment which is subject to certain contribution limits.

(Replaced on 15 July 2005; see HISTORY)

30. These schemes raise many of the cross-border issues that arise in the case of occupational schemes, such as the tax treatment, in one Contracting State, of contributions to such a scheme established in the other State (see paragraphs 31 to 65 below). There may be, however, issues that are specific to individual retirement schemes and which may need to be addressed separately during the negotiation of a bilateral convention. One such issue is the tax treatment, in each State, of income accruing in such a scheme established in the other State. Many States have rules (such as foreign investment funds (FIF) rules, rules that attribute the income of a trust to a settlor or beneficiary in certain circumstances or rules that provide for the accrual taxation of income with respect to certain types of investment, including full life insurance policies) that may, in certain circumstances, result in the taxation of income accruing in an individual retirement scheme established abroad. States which consider that result inappropriate in light of their approach to the taxation of retirement savings may wish to prevent such taxation. A provision dealing with the issue and restricted to those schemes which are recognised as individual retirement schemes could be drafted along the following lines:

> For purposes of computing the tax payable in a Contracting State by an individual who is a resident of that State and who was previously a resident of the other Contracting State, any income accruing under an arrangement
>
> *a)* entered into with a person established outside the first-mentioned State in order to secure retirement benefits for that individual,
>
> *b)* in which the individual participates and had participated when the individual was a resident of the other State,
>
> *c)* that is accepted by the competent authority of the first-mentioned State as generally corresponding to an individual retirement scheme recognised as such for tax purposes by that State,
>
> shall be treated as income accruing in an individual retirement scheme established in that State. This paragraph shall not restrict in any manner the taxation of any benefit distributed under the arrangement.

(Replaced on 15 July 2005; see HISTORY)

C (18)

The tax treatment of contributions to foreign pension schemes

A. General comments

31. It is characteristic of multinational enterprises that their staff are expected to be willing to work outside their home country from time to time. The terms of service under which staff are sent to work in other countries are

of keen interest and importance to both the employer and the employee. One consideration is the pension arrangements that are made for the employee in question. Similarly, individuals who move to other countries to provide independent services are often confronted with cross-border tax issues related to the pension arrangements that they have established in their home country.

(Renumbered and amended on 15 July 2005; see HISTORY)

32. Individuals working abroad will often wish to continue contributing to a pension scheme (including a social security scheme that provides pension benefits) in their home country during their absence abroad. This is both because switching schemes can lead to a loss of rights and benefits, and because many practical difficulties can arise from having pension arrangements in a number of countries.

(Renumbered and amended on 15 July 2005; see HISTORY)

33. The tax treatment accorded to pension contributions made by or for individuals working outside their home country varies both from country to country and depending on the circumstances of the individual case. Before taking up an overseas assignment or contract, pension contributions made by or for these individuals commonly qualify for tax relief in the home country. When the individual works abroad, the contributions in some cases continue to qualify for relief. Where the individual, for example, remains resident and fully taxable in the home country, pension contributions made to a pension scheme established in the home country will generally continue to qualify for relief there. But frequently, contributions paid in the home country by an individual working abroad do not qualify for relief under the domestic laws of either the home country or the host country. Where this is the case it can become expensive, if not prohibitive, to maintain membership of a pension scheme in the home country during a foreign assignment or contract. Paragraph 37 below suggests a provision which member countries can, if they wish, include in bilateral treaties to provide reliefs for the pension contributions made by or for individuals working outside their home country.

(Renumbered and amended on 15 July 2005; see HISTORY)

34. However, some member countries may not consider that the solution to the problem lies in a treaty provision, preferring, for example, the pension scheme to be amended to secure deductibility of contributions in the host State. Other countries may be opposed to including the provision below in treaties where domestic legislation allows relief only with respect to contributions paid to residents. In such cases it may be inappropriate to include the suggested provision in a bilateral treaty.

(Renumbered and amended on 15 July 2005; see HISTORY)

35. The suggested provision covers contributions made to all forms of pension schemes, including individual retirement schemes as well as social security schemes. Many member countries have entered into bilateral social security totalisation agreements which may help to partially avoid the problem with respect to contributions to social security schemes; these agreements, however, usually do not deal with the tax treatment of cross-border contributions. In the case of an occupational scheme to which both the employer and the employees contribute, the provision covers both these contributions. Also, the provision is not restricted to the issue of the deductibility of the contributions as it deals with all aspects of the tax treatment of the contributions as regards the individual who derive benefits from a pension scheme. Thus the provision deals with issues such as whether or not the employee should be taxed on the employment benefit that an employer's contribution constitutes and whether or not the investment income derived from the contributions should be taxed in the hands of the individual. It does not, however, deal with the taxation of the pension fund on its income (this issue is dealt with in paragraph 69 below). Contracting States wishing to modify the scope of the provision with respect to any of these issues may do so in their bilateral negotiations.

(Replaced on 15 July 2005; see HISTORY)

B. *Aim of the provision*

36. The aim of the provision is to ensure that, as far as possible, individuals are not discouraged from taking up overseas work by the tax treatment of their contributions to a home country pension scheme. The provision seeks, first, to determine the general equivalence of pension plans in the two countries and then to establish limits to the contributions to which the tax relief applies based on the limits in the laws of both countries.

(Renumbered and amended on 15 July 2005; see HISTORY)

C. *Suggested provision*

37. The following is the suggested text of the provision that could be included in bilateral conventions to deal with the problem identified above:

> 1. Contributions to a pension scheme established in and recognised for tax purposes in a Contracting State that are made by or on behalf of an individual who renders services in the other Contracting State shall, for the purposes of determining the individual's tax payable and the profits of an enterprise which may be taxed in that State, be treated in that State in the same way and subject to the same conditions and limitations as contributions made to a pension scheme that is recognised for tax purposes in that State, provided that:

C (18)

a) the individual was not a resident of that State, and was participating in the pension scheme, immediately before beginning to provide services in that State, and

b) the pension scheme is accepted by the competent authority of that State as generally corresponding to a pension scheme recognised as such for tax purposes by that State.

2. For the purposes of paragraph 1:

a) the term "a pension scheme" means an arrangement in which the individual participates in order to secure retirement benefits payable in respect of the services referred to in paragraph 1, and

b) a pension scheme is recognised for tax purposes in a State if the contributions to the scheme would qualify for tax relief in that State.

(Renumbered and amended on 15 July 2005; see HISTORY)

38. The above provision is restricted to pension schemes established in one of the two Contracting States. As it is not unusual for individuals to work in a number of different countries in succession, some States may wish to extend the scope of the provision to cover situations where an individual moves from one Contracting State to another while continuing to make contributions to a pension scheme established in a third State. Such an extension may, however, create administrative difficulties if the host State cannot have access to information concerning the pension scheme (*e.g.* through the exchange of information provisions of a tax convention concluded with the third State); it may also create a situation where relief would be given on a non-reciprocal basis because the third State would not grant similar relief to an individual contributing to a pension scheme established in the host State. States which, notwithstanding these difficulties, want to extend the suggested provision to funds established in third States can do so by adopting an alternative version of the suggested provision drafted along the following lines:

1. Contributions made by or on behalf of an individual who renders services in a Contracting State to a pension scheme

a) recognised for tax purposes in the other Contracting State,

b) in which the individual participated immediately before beginning to provide services in the first-mentioned State,

c) in which the individual participated at a time when that individual was providing services in, or was a resident of, the other State, and

d) that is accepted by the competent authority of the first-mentioned State as generally corresponding to a pension scheme recognised as such for tax purposes by that State,

shall, for the purposes of

e) determining the individual's tax payable in the first-mentioned State, and

f) determining the profits of an enterprise which may be taxed in the first-mentioned State,

be treated in that State in the same way and subject to the same conditions and limitations as contributions made to a pension scheme that is recognised for tax purposes in that first-mentioned State.

2. For the purposes of paragraph 1:

a) the term "a pension scheme" means an arrangement in which the individual participates in order to secure retirement benefits payable in respect of the services referred to in paragraph 1; and

b) a pension scheme is recognised for tax purposes in a State if the contributions to the scheme would qualify for tax relief in that State.

(Replaced on 15 July 2005; see HISTORY)

D. *Characteristics of the suggested provision*

39. The following paragraphs discuss the main characteristics of the suggested provision found in paragraph 37 above.

(Replaced on 15 July 2005; see HISTORY)

40. Paragraph 1 of the suggested provision lays down the characteristics of both the individual and the contributions in respect of which the provision applies. It also provides the principle that contributions made by or on behalf of an individual rendering services in one Contracting State (the host State) to a defined pension scheme in the other Contracting State (the home State) are to be treated for tax purposes in the host State in the same way and subject to the same conditions and limitations as contributions to domestic pension schemes of the host State.

(Renumbered and amended on 15 July 2005; see HISTORY)

41. Tax relief with respect to contributions to the home country pension scheme under the conditions outlined can be given by either the home country, being the country where the pension scheme is situated or by the host country, where the economic activities giving rise to the contributions are carried out.

(Renumbered and amended on 15 July 2005; see HISTORY)

42. A solution in which relief would be given by the home country might not be effective, since the individual might have no or little taxable income in that country. Practical considerations therefore suggest that it would be preferable

for relief to be given by the host country and this is the solution adopted in the suggested provision.

(Renumbered and amended on 15 July 2005; see HISTORY)

43. In looking at the characteristics of the individual, paragraph 1 makes it clear that, in order to get the relief from taxation in the host State, the individual must not have been resident in the host State immediately prior to working there.

(Renumbered and amended on 15 July 2005; see HISTORY)

44. Paragraph 1 does not, however, limit the application of the provision to individuals who become resident in the host State. In many cases, individuals working abroad who remain resident in their home State will continue to qualify for relief there, but this will not be so in all cases. The suggested provision therefore applies to non-residents working in the host State as well as to individuals who attain residence status there. In some member countries the domestic legislation may restrict deductibility to contributions borne by residents, and these member countries may wish to restrict the suggested provision to cater for this. Also, States with a special regime for non-residents (*e.g.* taxation at a special low rate) may, in bilateral negotiations, wish to agree on a provision restricted to residents.

(Renumbered and amended on 15 July 2005; see HISTORY)

45. In the case where individuals temporarily cease to be resident in the host country in order to join a pension scheme in a country with more relaxed rules, individual States may want a provision which would prevent the possibility of abuse. One form such a provision could take would be a nationality test which could exclude from the suggested provision individuals who are nationals of the host State.

(Renumbered on 15 July 2005; see HISTORY)

46. As already noted, it is not unusual for individuals to work in a number of different countries in succession; for that reason, the suggested provision is not limited to individuals who are residents of the home State immediately prior to providing services in the host State. The provision covers an individual coming to the host State from a third country as it is only limited to individuals who were not resident in the host country before starting to work there. However, Article 1 restricts the scope of the Convention to residents of one or both Contracting States. An individual who is neither a resident of the host State nor of the home State where the pension scheme is established is therefore outside the scope of the Convention between the two States.

(Renumbered and amended on 15 July 2005; see HISTORY)

47. The suggested provision places no limits on the length of time for which an individual can work in a host State. It could be argued that, if an individual works in the host State for long enough, it in effect becomes his home country and the provision should no longer apply. Indeed, some host countries already restrict relief for contributions to foreign pension schemes to cases where the individuals are present on a temporary basis.

(Renumbered and amended on 15 July 2005; see HISTORY)

48. In addition, the inclusion of a time limit may be helpful in preventing the possibility of abuse outlined in paragraph 45 above. In bilateral negotiations, individual countries may find it appropriate to include a limit on the length of time for which an individual may provide services in the host State after which reliefs granted by the suggested provision would no longer apply.

(Renumbered and amended on 15 July 2005; see HISTORY)

49. In looking at the characteristics of the contributions, paragraph 1 provides a number of tests. It makes it clear that the provision applies only to contributions made by or on behalf of an individual to a pension scheme established in and recognised for tax purposes in the home State. The phrase "recognised for tax purposes" is further defined in subparagraph 2 *b)* of the suggested provision. The phrase "made by or on behalf of" is intended to apply to contributions that are made directly by the individual as well as to those that are made for that individual's benefit by an employer or another party (*e.g.* a spouse). While paragraph 4 of Article 24 ensures that the employer's contributions to a pension fund resident of the other Contracting State are deductible under the same conditions as contributions to a resident pension fund, that provision may not be sufficient to ensure the similar treatment of employer's contributions to domestic and foreign pension funds. This will be the case, for example, where the employer's contributions to the foreign fund are treated as a taxable benefit in the hands of the employee or where the deduction of the employer's contributions is not dependent on the fund being a resident but, rather, on other conditions (*e.g.* registration with tax authorities or the presence of offices) which have the effect of generally excluding foreign pension funds. For these reasons, employer's contributions are covered by the suggested provision even though paragraph 4 of Article 24 may already ensure a similar relief in some cases.

(Renumbered and amended on 15 July 2005; see HISTORY)

50. The second test applied to the characteristics of the contributions is that the contributions should be made to a home State scheme recognised by the competent authority of the host State as generally corresponding to a scheme recognised as such for tax purposes by the host State. This operates on the premise that only contributions to recognised schemes qualify for relief in

member countries. This limitation does not, of course, necessarily secure equivalent tax treatment of contributions paid where an individual was working abroad and of contributions while working in the home country. If the host State's rules for recognising pension schemes were narrower than those of the home State, the individual could find that contributions to his home country pension scheme were less favourably treated when he was working in the host country than when working in the home country.

(Renumbered and amended on 15 July 2005; see HISTORY)

51. However, it would not be in accordance with the stated aim of securing, as far as possible, equivalent tax treatment of contributions to foreign schemes to give relief for contributions which do not — at least broadly — correspond to domestically recognised schemes. To do so would mean that the amount of relief in the host State would become dependent on legislation in the home State. In addition, it could be hard to defend treating individuals working side by side differently depending on whether their pension scheme was at home or abroad (and if abroad, whether it was one country rather than another). By limiting the suggested provision to schemes which generally correspond to those in the host country such difficulties are avoided.

(Renumbered and amended on 15 July 2005; see HISTORY)

52. The suggested provision makes it clear that it is for the competent authority of the host State to determine whether the scheme in the home State generally corresponds to recognised schemes in the host State. Individual States may wish, in bilateral negotiations, to specify expressly to which existing schemes the provision will apply or to establish what interpretation the competent authority places on the term "generally corresponding"; for example how widely it is interpreted and what tests are imposed.

(Renumbered and amended on 15 July 2005; see HISTORY)

53. The contributions covered by the provision are limited to payments to schemes in which the individual was participating before beginning to provide services in the host State. This means that contributions to new pension schemes which an individual joins while in the host State are excluded from the suggested provision.

(Renumbered and amended on 15 July 2005; see HISTORY)

54. It is, however, recognised that special rules may be needed to cover cases where new pension schemes are substituted for previous ones. For instance, in some member countries the common practice may be that, if a company employer is taken over by another company, the existing company pension scheme for its employees may be ended and a new scheme opened by the new

employer. In bilateral negotiations, therefore, individual States may wish to supplement the provision to cover such substitution schemes; this could be done by adding the following subparagraph to paragraph 2 of the suggested provision:

c) a pension scheme that is substituted for, but is substantially similar to, a pension scheme accepted by the competent authority of a Contracting State under subparagraph *b)* of paragraph 1 shall be deemed to be the pension scheme that was so accepted.

(Renumbered and amended on 15 July 2005; see HISTORY)

55. Paragraph 1 also sets out the relief to be given by the host State if the characteristics of the individual and the contributions fall within the terms of the provision. In brief, the contributions must be treated for tax purposes in a way which corresponds to the manner in which they would be treated if these contributions were to a scheme established in the host State. Thus, the contributions will qualify for the same tax relief (*e.g.* be deductible), for both the individual and the employer (where the individual is employed and contributions are made by the employer) as if these contributions had been made to a scheme in the host State. Also, the same treatment has to be given as regards the taxation of an employee on the employment benefit derived from an employer's contribution to either a foreign or a local scheme (see paragraph 58 below).

(Renumbered and amended on 15 July 2005; see HISTORY)

56. This measure of relief does not, of course, necessarily secure equivalent tax treatment given to contributions paid when an individual is working abroad and contributions paid when he is working in the home country. Similar considerations apply here to those discussed in paragraphs 50 and 51 above. The measure does, however, ensure equivalent treatment of the contributions of co-workers. The following example is considered. The home country allows relief for pension contributions subject to a limit of 18 per cent of income. The host country allows relief subject to a limit of 20 per cent. The suggested provision in paragraph 37 would require the host country to allow relief up to its domestic limit of 20 per cent. Countries wishing to adopt the limit in the home country would need to amend the wording of the provision appropriately.

(Renumbered and amended on 15 July 2005; see HISTORY)

57. The amount and method of giving the relief would depend upon the domestic tax treatment of pension contributions by the host State. This would settle such questions as whether contributions qualify for relief in full, or only in part, and whether relief should be given as a deduction in computing

taxable income (and if so, which income, *e.g.* in the case of an individual, only employment or business income or all income) or as a tax credit.

(Renumbered and amended on 15 July 2005; see HISTORY)

58. For an individual who participates in an occupational pension scheme, being assigned to work abroad may not only mean that this employee's contributions to a pension scheme in his home country cease to qualify for tax relief. It may also mean that contributions to the pension scheme by the employer are regarded as the employee's income for tax purposes. In some member countries employees are taxed on employer's contributions to domestic schemes whilst working in the home country whereas in others these contributions remain exempt. Since it applies to both employees' and employers' contributions, the suggested provision ensures that employers' contributions in the context of the employees' tax liability are accorded the same treatment that such contributions to domestic schemes would receive.

(Renumbered and amended on 15 July 2005; see HISTORY)

59. Subparagraph 2 *a)* defines a pension scheme for the purposes of paragraph 1. It makes it clear that, for these purposes, a pension scheme is an arrangement in which the individual who makes the payments participates in order to secure retirement benefits. These benefits must be payable in respect of services provided in the host State. All the above conditions must apply to the pension scheme before it can qualify for relief under the suggested provision.

(Renumbered and amended on 15 July 2005; see HISTORY)

60. Subparagraph 2 *a)* refers to the participation of the individual in the pension scheme in order to secure retirement benefits. This definition is intended to ensure that the proportion of contributions made to secure benefits other than periodic pension payments on retirement, *e.g.* a lump sum on retirement, will also qualify for relief under the provision.

(Renumbered and amended on 15 July 2005; see HISTORY)

61. The initial definition of a pension scheme is "an arrangement". This is a widely drawn term, the use of which is intended to encompass the various forms which pension schemes (whether social security, occupational or individual retirement schemes) may take in different member countries.

(Renumbered and amended on 15 July 2005; see HISTORY)

62. Although subparagraph 2 a) sets out that participation in this scheme has to be by the individual who provides services referred to in paragraph 1 there is no reference to the identity of the recipient of the retirement benefits secured by participation in the scheme. This is to ensure that any proportion of contributions intended to generate a pension for other beneficiaries (*e.g.*

surviving spouses, companions or children) may be eligible for relief under the suggested provision.

(Renumbered and amended on 15 July 2005; see HISTORY)

63. The definition of a pension scheme makes no distinction between pensions paid from State-run occupational pension schemes and similar privately-run schemes. Both are covered by the scope of the provision. Social security schemes are therefore covered by the provision to the extent that contributions to such schemes can be considered to be with respect to the services provided in the host State by an individual, whether as an employee or in an independent capacity.

(Renumbered and amended on 15 July 2005; see HISTORY)

64. Subparagraph 2 *b)* further defines the phrase "recognised for tax purposes". As the aim of the provision is, so far as possible, to ensure that contributions are neither more nor less favourably treated for tax purposes than they would be if the individual were resident in his home State, it is right to limit the scope of the provision to contributions which would have qualified for relief if the individual had remained in the home State. The provision seeks to achieve this aim by limiting its scope to contributions made to a scheme only if contributions to this scheme would qualify for tax relief in that State.

(Renumbered and amended on 15 July 2005; see HISTORY)

65. This method of attempting to achieve parity of treatment assumes that in all member countries only contributions to recognised pension schemes qualify for relief. The tax treatment of contributions to pension schemes under member countries' tax systems may differ from this assumption. It is recognised that, in bilateral negotiations, individual countries may wish to further define the qualifying pension schemes in terms that match the respective domestic laws of the treaty partners. They may also wish to define other terms used in the provision, such as "renders services" and "provides services".

(Renumbered and amended on 15 July 2005; see HISTORY)

Tax obstacles to the portability of pension rights

66. Another issue, which also relates to international labour mobility, is that of the tax consequences that may arise from the transfer of pension rights from a pension scheme established in one Contracting State to another scheme located in the other Contracting State. When an individual moves from one employer to another, it is frequent for the pension rights that this individual accumulated in the pension scheme covering the first employment to be transferred to a different scheme covering the second employment.

Similar arrangements may exist to allow for the portability of pension rights to or from an individual retirement scheme.

(Added on 15 July 2005; see HISTORY)

67. Such transfers usually give rise to a payment representing the actuarial value, at the time of the transfer, of the pension rights of the individual or representing the value of the contributions and earnings that have accumulated in the scheme with respect to the individual. These payments may be made directly from the first scheme to the second one; alternatively, they may be made by requiring the individual to contribute to the new pension scheme all or part of the amount received upon withdrawing from the previous scheme. In both cases, it is frequent for tax systems to allow such transfers, when they are purely domestic, to take place on a tax-free basis.

(Added on 15 July 2005; see HISTORY)

68. Problems may arise, however, where the transfer is made from a pension scheme located in one Contracting State to a scheme located in the other State. In such a case, the Contracting State where the individual resides may consider that the payment arising upon the transfer is a taxable benefit. A similar problem arises when the payment is made from a scheme established in a State to which the relevant tax convention gives source taxing rights on pension payments arising therefrom as that State may want to apply that taxing right to any benefit derived from the scheme. Contracting States that wish to address that issue are free to include a provision drafted along the following lines:

> Where pension rights or amounts have accumulated in a pension scheme established in and recognised for tax purposes in one Contracting State for the benefit of an individual who is a resident of the other Contracting State, any transfer of these rights or amounts to a pension scheme established in and recognised for tax purposes in that other State shall, in each State, be treated for tax purposes in the same way and subject to the same conditions and limitations as if it had been made from one pension scheme established in and recognised for tax purposes in that State to another pension scheme established in and recognised for tax purposes in the same State.

The above provision could be modified to also cover transfers to or from pensions funds established and recognised in third States (this, however, could raise similar concerns as those described in the preamble of paragraph 38 above).

(Added on 15 July 2005; see HISTORY)

Exemption of the income of a pension fund

69. Where, under their domestic law, two States follow the same approach of generally exempting from tax the investment income of pension funds established in their territory, these States, in order to achieve greater neutrality with respect to the location of capital, may want to extend that exemption to the investment income that a pension fund established in one State derives from the other State. In order to do so, States sometimes include in their conventions a provision drafted along the following lines:

> Notwithstanding any provision of this Convention, income arising in a Contracting State that is derived by a resident of the other Contracting State that was constituted and is operated exclusively to administer or provide pension benefits and has been accepted by the competent authority of the first-mentioned State as generally corresponding to a pension scheme recognised as such for tax purposes by that State, shall be exempt from tax in that State.

(Added on 15 July 2005; see HISTORY)

Observation on the Commentary

70. With regard to paragraphs 24 and 26, the *Netherlands* is of the opinion that social security payments can in some circumstances fall within Article 15 if they are paid whilst the employment still continues.

(Added on 15 July 2005; see HISTORY)

HISTORY

Paragraph 1: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 1 read as follows:

> "1. According to this Article, pensions paid in respect of private employment are taxable only in the State of residence of the recipient. The provision also covers widows' and orphans' pensions and other similar payments such as annuities paid in respect of past employment. It also applies to pensions in respect of services rendered to a State or a political subdivision or local authority thereof which are not covered by the provisions of paragraph 2 of Article 19."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. According to the rule stipulated in Article 18, pensions in respect of private employment are taxable only in the country of residence of the recipient. The provision also covers "widows" and "orphans" pensions and other similar payments such as annuities paid in respect of past employment. It also applies to pensions in respect of services rendered to a State or a political subdivision or local authority thereof which are not covered by the provision of paragraph 1 of Article 19."

Paragraph 2: Replaced paragraph 2 as it read before 15 July 2005. Paragraph 2 was amended and renumbered as paragraph 27 (see history of paragraph 27) and a new paragraph 2 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 3: Replaced paragraph 3 as it read before 15 July 2005 and the heading preceding it was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 3 read as follows:

> "3. The treatment under the taxation laws of the OECD member countries of amounts paid to an employee on the cessation of his employment is highly diversified. Some States regard such a payment as a pension, private or Government as the case may be, paid as a lump sum. In such a case it would be natural to consider the income as falling under Article 18 or 19. In the tax laws of other States such a payment is looked upon as the final remuneration for the work performed. Then it should of course be treated under Article 15 or 19, as the case may be. Others again consider such a payment as a bonus which is not taxable under their income tax laws but perhaps subjected to a gift tax or a similar tax. It has not been possible to reach a common solution on the tax treatment of payments of this kind under the Model Convention. If the question of taxing such payments should arise between Contracting States, the matter therefore has to be solved by recourse to the provisions of Article 25."

Paragraph 3 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 4: Replaced paragraph 4 as it read before 15 July 2005. Paragraph 4 was amended and renumbered as paragraph 31 (see history of paragraph 31), the headings preceding paragraph 4 were moved with it and a new paragraph 4 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 5: Replaced paragraph 5 as it read before 15 July 2005. Paragraph 5 was amended and renumbered as paragraph 32 (see history of paragraph 32) and a new paragraph 5 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 6: Replaced paragraph 6 as it read before 15 July 2005. Paragraph 6 was amended and renumbered as paragraph 33 (see history of paragraph 33) and a new paragraph 6 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7: Replaced paragraph 7 as it read before 15 July 2005. Paragraph 7 was amended and renumbered as paragraph 34 (see history of paragraph 34) and a new paragraph 7 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 8: Replaced paragraph 8 as it read before 15 July 2005 and the heading preceding it was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until it was deleted on 15 July 2005, paragraph 8 read as follows:

> "8. The suggested provision does not address itself to contributions made to social security schemes (general State pension schemes dependent upon contribution records, whether or not contributors are employees) as the right or obligation to join a social security scheme is primarily a matter of social legislation rather than tax law. Many member countries have entered into bilateral social security totalisation agreements which may help to avoid the problem with respect to contributions to social security schemes. The provision also does not contain

provisions relating either to the deductibility by the employer of employer pension contributions in respect of employees working abroad or to the treatment of income accrued within the plan. All of these issues can be dealt with in bilateral negotiations."

Paragraph 8 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 9: Replaced paragraph 9 on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until it was deleted on 15 July 2005, paragraph 9 read as follows:

"9. The provision is confined to the tax treatment of contributions to pension schemes by or on behalf of individuals who exercise employments within the meaning of Article 15 away from their home State. It does not deal with contributions by individuals who perform business activities covered by Article 7. However, States may wish, in bilateral negotiations, to agree on a provision covering individuals rendering services within both Article 7 and Article 15."

Paragraph 9 was amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 9 read as follows:

"9. The provision is confined to the tax treatment of contributions to pension schemes by or on behalf of individuals who exercise employments within the meaning of Article 15 away from their home State. It does not deal with contributions by individuals who render independent personal services within the meaning of Article 14. However, member countries may wish, in bilateral negotiations, to agree on a provision covering individuals rendering services within both Article 14 and Article 15."

Paragraph 9 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 10: Replaced paragraph 10 as it read before 15 July 2005. Paragraph 10 was renumbered as paragraph 36 (see history of paragraph 36), the heading preceding paragraph 10 was moved with it and a new paragraph 10 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 11: Replaced paragraph 11 as it read before 15 July 2005. Paragraph 11 was amended and renumbered as paragraph 37 (see history of paragraph 37), the heading preceding paragraph 11 was moved with it, and a new paragraph 10 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 12: Replaced paragraph 12 as it read before 15 July 2005. Paragraph 12 was amended and renumbered as paragraph 40 (see history of paragraph 40) and a new paragraph 12 was added together with the heading preceding it by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 13: Replaced paragraph 13 as it read before 15 July 2005. Paragraph 13 was amended and renumbered as paragraph 41 (see history of paragraph 41) and a new paragraph 13 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 14: Replaced paragraph 14 as it read before 15 July 2005. Paragraph 14 was amended and renumbered as paragraph 42 (see history of paragraph 42) and a new paragraph 14 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 15: Replaced paragraph 15 as it read before 15 July 2005. Paragraph 15 was amended and renumbered as paragraph 43 (see history of paragraph 43) and a new paragraph 15 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 16: Replaced paragraph 16 as it read before 15 July 2005. Paragraph 16 was amended and renumbered as paragraph 44 (see history of paragraph 44) and a new paragraph 16 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 17: Replaced paragraph 17 as it read before 15 July 2005. Paragraph 17 was amended and renumbered as paragraph 45 (see history of paragraph 45) and a new paragraph 17 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 18: Replaced paragraph 18 as it read before 15 July 2005. Paragraph 18 was amended and renumbered as paragraph 46 (see history of paragraph 46) and a new paragraph 18 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 19: Replaced paragraph 19 as it read before 15 July 2005. Paragraph 19 was amended and renumbered as paragraph 47 (see history of paragraph 47) and a new paragraph 19 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 19.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 19.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 20: Replaced paragraph 20 as it read before 15 July 2005. Paragraph 20 was amended and renumbered as paragraph 48 (see history of paragraph 48) and a new paragraph 20 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 21: Replaced paragraph 21 as it read before 15 July 2005. Paragraph 21 was amended and renumbered as paragraph 49 (see history of paragraph 49) and a new paragraph 21 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 22: Replaced paragraph 22 as it read before 15 July 2005. Paragraph 22 was amended and renumbered as paragraph 50 (see history of paragraph 50) and a new paragraph 22 was added together with the heading preceding it, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 23: Replaced paragraph 23 as it read before 15 July 2005. Paragraph 23 was amended and renumbered as paragraph 51 (see history of paragraph 51) and a new paragraph 23 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 24: Replaced paragraph 24 as it read before 15 July 2005. Paragraph 24 was amended and renumbered as paragraph 52 (see history of paragraph 52) and new paragraph 24 was added, together with the heading preceding it, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 25: Replaced paragraph 25 as it read before 15 July 2005. Paragraph 25 was amended and renumbered as paragraph 53 (see history of paragraph 53) and a new paragraph 25 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 26: Replaced paragraph 26 as it read before 15 July 2005. Paragraph 26 was amended and renumbered as paragraph 54 (see history of paragraph 54) and a new paragraph 26 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 27: Corresponds to paragraph 2 as it read before 15 July 2005. Paragraph 27 was amended and renumbered as paragraph 55 (see history of paragraph 55) and paragraph 2 was amended and renumbered as paragraph 27 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 2 read as follows:

> "2. Some States consider pensions paid out under a public pension scheme which is part of their social security system similar to Government pensions. Such States argue on that basis that the State of source, *i.e.* the State from which the pension is paid, should have a right to tax such pensions. Many conventions concluded by these States contain provisions to that effect, sometimes including also other payments made under the social security legislation of the State of source. Such payments are for instance sickness benefits, unemployment benefits and benefits on account of industrial injury. Contracting States having that view may agree bilaterally on an additional paragraph to the Article giving the State of source a right to tax payments made under its social security legislation. A paragraph of that kind could be drafted along the following lines:
>
> > "Notwithstanding the provisions of paragraph 1, pensions and other payments made under the social security legislation of a Contracting State may be taxed in that State."
>
> Where the State of which the recipient of such payments is a resident applies the exemption method the payments will be taxable only in the State of source while States using the credit method may tax the payments and give credit for the tax levied in the State of source. Some States using the credit method as the general method in their conventions may, however, consider that the State of source should have an exclusive right to tax such payments. Such States should then substitute the words "shall be taxable only" for the words "may be taxed" in the above draft provision."

Paragraph 2 of the 1977 Model Convention replaced paragraph 2 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, the heading preceding paragraph 2 was moved immediately before paragraph 4. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. Canada reserves its position on this Article for the purpose of preserving the right to tax certain lump sum payments, described in Section 31 A of the Income Tax Act of Canada, paid to persons formerly employed in Canada in respect of their employment in Canada."

C (18)

Paragraph 28: Replaced paragraph 28 as it read before 15 July 2005. Paragraph 28 was amended and renumbered as paragraph 56 (see history of paragraph 56) and a new paragraph 28 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 29: Replaced paragraph 29 as it read before 15 July 2005. Paragraph 29 was amended and renumbered as paragraph 57 (see history of paragraph 57) and a new paragraph 29 was added, together with the heading preceding it, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 30: Replaced paragraph 30 as it read before 15 July 2005. Paragraph 30 was amended and renumbered as paragraph 58 (see history of paragraph 58) and a new paragraph 30 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 31: Corresponds to paragraph 4 as it read before 15 July 2005. Paragraph 31 was amended and renumbered as paragraph 59 (see history of paragraph 59), paragraph 4 was amended and renumbered as paragraph 31 and the headings preceding paragraph 4 were moved with it by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 4 read as follows:

> "4. It is characteristic of multinational enterprises that their staff are expected to be willing to work outside their home country from time to time. The terms of service under which staff are sent to work in other countries are of keen interest and importance to both the employer and the employee. One consideration is the pension arrangements that are made for the employee in question."

Paragraph 4 as it read after 23 July 1992 replaced paragraph 4 of the 1977 Model Convention. On 23 July 1992 paragraph 4 of the 1977 Model Convention was renumbered as paragraph 39 (see history of paragraph 39) and a new paragraph 4 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 32: Corresponds to paragraph 5 as it read before 15 July 2005. Paragraph 32 was amended and renumbered as paragraph 60 (see history of paragraph 60) and paragraph 5 was amended and renumbered as paragraph 32 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 5 read as follows:

> "5. Employees sent abroad to work will often wish to continue contributing to a pension scheme in their home country during their absence abroad. This is both because switching schemes can lead to a loss of rights and benefits, and because many practical difficulties can arise from having pension arrangements in a number of countries."

Paragraph 5 as it read after 23 July 1992 replaced paragraph 5 of the 1977 Model Convention. On 23 July 1992 paragraph 5 of the 1977 Model Convention was renumbered as paragraph 40 (see history of paragraph 40) and new paragraph 5 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 33: Corresponds to paragraph 6 as it read before 15 July 2005. Paragraph 33 was amended and renumbered as paragraph 61 (see history of paragraph 61) and

paragraph 6 was amended and renumbered as paragraph 33 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 6 read as follows:

> "6. The tax treatment accorded to pension contributions of employees who are assigned to work outside their home country varies both from country to country and depending on the circumstances of the individual case. Before taking up an overseas assignment, employees commonly qualify for tax relief on pension contributions paid in the home country. When assigned abroad, employees in some cases continue to qualify for relief. Where an individual, for example, remains resident and fully taxable in the home country, pension contributions made to a pension scheme established in the home country will generally continue to qualify for relief there. But frequently, contributions paid in the home country by an individual assigned to work abroad do not qualify for relief under the domestic laws of either the home country or the host country. Where this is the case it can become expensive, if not prohibitive, to maintain membership of a pension scheme in the home country during a foreign assignment. Paragraph 11 below suggests a provision which member countries can, if they wish, include in bilateral treaties to provide reliefs for the pension contributions of employees assigned to work outside their home country."

Paragraph 6 as it read after 23 July 1992 replaced paragraph 6 of the 1977 Model Convention. On 23 July 1992 paragraph 6 of the 1977 Model Convention was amended and renumbered as paragraph 41 (see history of paragraph 41) and a new paragraph 6 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 34: Corresponds to paragraph 7 as it read before 15 July 2005. Paragraph 34 was amended and renumbered as paragraph 62 (see history of paragraph 62) and paragraph 7 was amended and renumbered as paragraph 34 on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 7 read as follows:

> "7. However, some member countries may not consider that the solution to the problem lies in a treaty provision, preferring, for example, the pension scheme to be amended to secure deductibility of contributions in the host State. Other countries may be opposed to including the provision in treaties where domestic legislation allows deductions only for contributions paid to residents. In such cases it may be inappropriate to include the suggested provision in a bilateral treaty."

Paragraph 7 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 35: Replaced paragraph 35 as it read after 23 July 1992. Paragraph 35 was amended and renumbered as paragraph 63 (see history of paragraph 63) and a new paragraph 35 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 36: Corresponds to paragraph 10 as it read before 15 July 2005. Paragraph 36 was amended and renumbered as paragraph 64 (see history of paragraph 64), paragraph 10 was amended and renumbered as paragraph 36 and the heading preceding paragraph 10 was moved with it by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 10 read as follows:

"10. The aim of the provision is to ensure that, as far as possible, an employee is not discouraged from taking up an overseas assignment by the tax treatment of contributions made to a home country pension scheme by an employee working abroad. The provision seeks, first, to determine the general equivalence of pension plans in the two countries and then to establish limits to the deductibility of employee contributions based on the limits in the laws of both countries."

Paragraph 10 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 37: Corresponds to paragraph 11 as it read before 15 July 2005. Paragraph 37 was amended and renumbered as paragraph 65 (see history of paragraph 65), paragraph 11 was amended and renumbered as paragraph 37 and the heading preceding paragraph 11 was moved with it by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 11 read as follows:

"11. The following is the suggested text of the provision that could be included in bilateral conventions to deal with the problem identified above:

a) Contributions borne by an individual who renders services in the course of an employment in a Contracting State to a pension scheme established in and recognised for tax purposes in the other Contracting State shall be deducted, in the first-mentioned State, in determining the individual's taxable income, and treated in that State, in the same way and subject to the same conditions and limitations as contributions made to a pension scheme that is recognised for tax purposes in that first-mentioned State, provided that:

(i) the individual was not a resident of that State, and was contributing to the pension scheme, immediately before he began to exercise employment in that State; and

(ii) the pension scheme is accepted by the competent authority of that State as generally corresponding to a pension scheme recognised as such for tax purposes by that State.

b) For the purposes of subparagraph *a)*:

(i) the term "a pension scheme" means an arrangement in which the individual participates in order to secure retirement benefits payable in respect of the employment referred to in subparagraph *a)*; and

(ii) a pension scheme is recognised for tax purposes in a State if the contributions to the scheme would qualify for tax relief in that State."

Paragraph 11 was amended on 29 April 2000, by replacing the words "dependent personal services" with "services in the course of an employment" and replacing the words "dependent personal services" with the word "employment", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 11 read as follows:

"11. The following is the suggested text of the provision that could be included in bilateral conventions to deal with the problem identified above:

"a) Contributions borne by an individual who renders dependent personal services in a Contracting State to a pension scheme established in and

recognised for tax purposes in the other Contracting State shall be deducted, in the first-mentioned State, in determining the individual's taxable income, and treated in that State, in the same way and subject to the same conditions and limitations as contributions made to a pension scheme that is recognised for tax purposes in that first-mentioned State, provided that:

(i) the individual was not a resident of that State, and was contributing to the pension scheme, immediately before he began to exercise employment in that State; and

(ii) the pension scheme is accepted by the competent authority of that State as generally corresponding to a pension scheme recognised as such for tax purposes by that State.

b) For the purposes of subparagraph *a)*:

(i) the term "a pension scheme" means an arrangement in which the individual participates in order to secure retirement benefits payable in respect of the dependent personal services referred to in subparagraph *a)*; and

(ii) a pension scheme is recognised for tax purposes in a State if the contributions to the scheme would qualify for tax relief in that State.""

Paragraph 11 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 38: Replaced paragraph 38 as it read before 15 July 2005 and the heading preceding paragraph 38 was moved immediately before paragraph 70 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 38 read as follows:

"38. *France* considers that the scope of the proposed provision in paragraph 11 above must be determined by taking into account not only the pension scheme to which the taxpayer contributed before his departure but also any scheme substituted therefore."

C (18)

Paragraph 38 was added on 23 July 1992 together with the heading preceding it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 39: Replaced paragraph 39 and the heading preceding it as they read before 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until they were deleted on 15 July 2005, paragraph 39 and the heading preceding it read as follows:

"Reservations on the Article

39. *Australia*, *Greece*, *Mexico*, *New Zealand* and *Portugal* reserve the right to propose that all pensions be taxable only in the country of residence of the recipient."

Paragraph 39 was amended on 28 January 2003, by adding Greece and Mexico to the list of countries making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 39 read as follows:

"39. *Australia*, *New Zealand* and *Portugal* reserve the right to propose that all pensions be taxable only in the country of residence of the recipient."

Paragraph 39 was previously amended on 29 April 2000, by adding New Zealand and Portugal as countries making the reservation, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 39 read as follows:

> "39. *Australia* reserves the right to propose that all pensions be taxable only in the country of residence of the recipient."

Paragraph 39 was previously amended on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 31 March 1994 and until 23 October 1997, paragraph 39 read as follows:

> "39. When negotiating with other member countries, *Australia* will propose that all pensions be taxable only in the country of residence of the recipient."

Paragraph 39 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 39 read as follows:

> "39. *Australia* reserves its position on this Article. When negotiating with other member countries, the Australian authorities will propose that all pensions be taxable only in the country of residence of the recipient."

Paragraph 39 as it read after 23 July 1992 corresponded to paragraph 4 of the 1977 Model Convention. On 23 July 1992 paragraph 4 of the 1977 Model Convention was renumbered as paragraph 39 and the heading preceding paragraph 4 was moved with it by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 4 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the heading preceding paragraph 2 was moved immediately before paragraph 4.

Paragraph 40: Corresponds to paragraph 12 as it read before 15 July 2005. Paragraph 40 as it read before 15 July 2005 was deleted and paragraph 12 was amended and renumbered as paragraph 40 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 12 read as follows:

> "12. Subparagraph *a)* of the suggested provision lays down the characteristics of both the employee and the contributions to which the provision applies. It also provides the principle that contributions borne by an individual rendering services in the course of an employment within the meaning of Article 15 in one Contracting State (the host State) to a defined pension scheme in the other Contracting State (the home State) are to be relieved from tax in the host State, subject to the same conditions and limitations as relief for contributions to domestic pension schemes of the host State."

Paragraph 12 was previously amended on 29 April 2000, by replacing the words "dependent personal services" with "services in the course of an employment", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 12 read as follows:

> "12. Subparagraph *a)* of the suggested provision lays down the characteristics of both the employee and the contributions to which the provision applies. It also provides the principle that contributions borne by an individual rendering dependent personal services within the meaning of Article 15 in one Contracting

State (the host State) to a defined pension scheme in the other Contracting State (the home State) are to be relieved from tax in the host State, subject to the same conditions and limitations as relief for contributions to domestic pension schemes of the host State."

Paragraph 12 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 40, as it read before 15 July 2005, was deleted by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 31 March 1994 and until 15 July 2005, paragraph 40 read as follows:

"40. *Canada* reserves its position on this Article. When negotiating conventions, the Canadian authorities will propose that the country in which the pensions arise be given a limited right to tax."

Paragraph 40 was amended on 31 March 1994, by deleting the third sentence of the paragraph, which was incorporated in part into a new paragraph 45 (see history of paragraph 45) by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 40 read as follows:

"40. *Canada* reserves its position on this Article. When negotiating conventions, the Canadian authorities will propose that the country in which the pensions arise be given a limited right to tax. Canada would also wish to apply this rule to pensions referred to in Article 19 in order to achieve uniformity of treatment."

Paragraph 40 as it read after 23 July 1992 corresponded to paragraph 5 of the 1977 Model Convention. Paragraph 5 of the 1977 Model Convention was renumbered as paragraph 40 on 23 July 1992 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 5 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 41: Corresponds to paragraph 13 as it read before 15 July 2005. Paragraph 41 as it read before 15 July 2005 was deleted and paragraph 13 was amended and renumbered as paragraph 41 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 13 read as follows:

"13. Relief for contributions to the home country pension scheme under the conditions outlined can be given by either the home country, being the country where the pension scheme is situated or by the host country, where the economic activities giving rise to the contributions are carried out."

Paragraph 13 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 41, as it read before 15 July 2005, was deleted by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 41 read as follows:

"41. *Finland* and *Sweden*, when negotiating conventions, would wish to retain the right to tax pensions paid to non-residents, where such pensions are paid in respect of past services rendered mainly within their respective territory."

Paragraph 41 was amended on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on

23 October 1997. After 23 July 1992 and until 23 October 1997, paragraph 41 read as follows:

> "41. *Finland* and *Sweden*, when negotiating conventions with other member countries, would wish to retain the right to tax pensions paid to non-residents, where such pensions are paid in respect of past services rendered mainly within their respective territory."

Paragraph 41 as it read after 23 July 1992 corresponded to paragraph 6 of the 1977 Model Convention. On 23 July 1992 paragraph 6 of the 1977 Model Convention was amended and renumbered as paragraph 41 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 6 read as follows:

> "6. *Sweden*, when negotiating conventions with other member countries, would wish to retain the right to tax pensions paid to non-residents of Sweden, where such pensions are paid in respect of past services rendered mainly within Sweden."

Paragraph 6 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 42: Corresponds to paragraph 14 as it read before 15 July 2005. Paragraph 42 as it read before 15 July 2005 was deleted and paragraph 14 was amended and renumbered as paragraph 42 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 14 read as follows:

> "14. A solution in which relief would be given by the home country might not be effective, since the employee might have no or little taxable income in that country. Practical considerations therefore suggest that it would be preferable for relief to be given by the host country and this is the solution adopted in the suggested provision."

Paragraph 14 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 42, as it read before 15 July 2005, was deleted by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 42 read as follows:

> "42. When negotiating bilateral conventions, *Belgium* will propose that the State of source be given the right to tax pensions arising from that State."

Paragraph 42 was amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 42 read as follows:

> "42. When negotiating bilateral conventions, *Belgium* will propose that the State of source be given in any case the right to tax pensions and allowances paid pursuant to the social legislation of a Contracting State or under a general scheme set up by this Contracting State to supplement the benefits provided under this social legislation."

Paragraph 42 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 43: Corresponds to paragraph 15 as it read before 15 July 2005. Paragraph 43 as it read before 15 July 2005 was deleted and paragraph 15 was amended and renumbered as paragraph 43 by the report entitled "The 2005 Update to

the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 15 read as follows:

> "15. In looking at the characteristics of the employee, subparagraph *a)* makes it clear that, in order to get the relief from taxation in the host State, the employee must not have been resident in the host State immediately prior to working there."

Paragraph 15 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 43, as it read before 15 July 2005, was deleted by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 43 read as follows:

> "43. *Denmark* and the *United States* reserve their position on this Article, including the right to insert a provision according to which pensions paid under the social security legislation of a Contracting State shall be taxable only in that State."

Paragraph 43 was amended on 29 April 2000, by adding the United States as a country making the reservation, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 43 read as follows:

> "43. *Denmark* reserves its position on this Article, including the right to insert a provision according to which pensions paid under the social security legislation of a Contracting State shall be taxable only in that State."

Paragraph 43 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 44: Corresponds to paragraph 16 as it read before 15 July 2005. Paragraph 44 as it read before 15 July 2005 was deleted and paragraph 16 was amended and renumbered as paragraph 44 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 16 read as follows:

> "16. Subparagraph *a)* does not, however, limit the application of the provision to secondees who become resident in the host State. In many cases employees working abroad who remain resident in their home State will continue to qualify for relief there, but this will not be so in all cases. The suggested provision therefore applies to non-residents working in the host State as well as to secondees to the host State who attain residence status there. In some member countries the domestic legislation may restrict deductibility to contributions borne by residents, and these member countries may wish to restrict the suggested provision to cater for this. Also, States with a special regime for non-residents (*e.g.* taxation at a special low rate) may, in bilateral negotiations, wish to agree on a provision restricted to residents."

Paragraph 16 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 44, as it read before 15 July 2005, was deleted by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 44 read as follows:

> "44. *Canada*, *Ireland* and the *United Kingdom* reserve the right to include within the Article an explicit reference to "annuities" (see paragraph 1 above)."

Paragraph 44 was amended on 28 January 2003, by deleting the words "paragraph 1 of", by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 42 read as follows:

> "44. *Canada*, *Ireland* and the *United Kingdom* reserve the right to include within paragraph 1 of the Article an explicit reference to "annuities" (see paragraph 1 above)."

Paragraph 44 was previously amended on 21 September 1995, by adding Ireland to the list of countries making the reservation, by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 42 read as follows:

> "44. *Canada* and the *United Kingdom* reserve the right to include within paragraph 1 of the Article an explicit reference to "annuities" (see paragraph 1 above)."

Paragraph 44 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 45: Corresponds to paragraph 17 as it read before 15 July 2005. Paragraph 45 as it read before 15 July 2005 was deleted and paragraph 17 was renumbered as paragraph 45 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 17 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 45 as it read before 15 July 2005 was deleted by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 45 read as follows:

> "45. *Belgium*, *Canada* and *Norway* reserve the right to extend the application of Article 18 to pensions referred to in Article 19 in order to achieve uniformity of treatment."

Paragraph 45 was amended on 28 January 2003, by adding Belgium to the list of countries making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 31 March 1994 and until 28 January 2003, paragraph 45 read as follows:

> "45. *Canada* and *Norway* reserve the right to extend the application of Article 18 to pensions referred to in Article 19 in order to achieve uniformity of treatment."

Paragraph 45 as it read after 31 March 1994 incorporated in part the third sentence of paragraph 40 and duplicated the reservation in paragraph 12 of the Commentary on Article 19 (see history of paragraph 40 and of paragraph 12 of the Commentary on Article 19), by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 46: Corresponds to paragraph 18 as it read before 15 July 2005. Paragraph 18 was amended and renumbered as paragraph 46 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 18 read as follows:

> "18. As it is not unusual for employees to be seconded to a number of different countries in succession, the suggested provision is not limited to employees who are residents of the home State immediately prior to exercising employment in the host State. The provision covers an employee coming to the host State from a third country as it is only limited to employees who were not resident in the

host country before taking up employment there. However, Article 1 restricts the scope of the Convention to residents of one or both Contracting States. An employee who is neither a resident of the host State nor of the home State where the pension scheme is established is therefore outside the scope of the Convention between the two States."

Paragraph 18 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 47: Corresponds to paragraph 19 as it read before 15 July 2005. Paragraph 19 was amended and renumbered as paragraph 47 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 19 read as follows:

"19. The suggested provision places no limits on the length of time for which an employee can work in a host State. It could be argued that, if an employee works in the host State for long enough, it in effect becomes his home country and the provision should no longer apply. Indeed, some host countries already restrict relief for contributions to foreign employee/employer pension schemes to cases where the seconded employees are present on a temporary basis."

Paragraph 19 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 48: Corresponds to paragraph 20 as it read before 15 July 2005. Paragraph 20 was amended and renumbered as paragraph 48 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 20 read as follows:

"20. In addition, the inclusion of a time limit may be helpful in preventing the possibility of abuse outlined in paragraph 17 above. In bilateral negotiations, individual countries may find it appropriate to include a limit on the length of time for which an employee may exercise an employment in the host State after which reliefs granted by the suggested provision would no longer apply."

Paragraph 20 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 49: Corresponds to paragraph 21 as it read before 15 July 2005. Paragraph 21 was amended and renumbered as paragraph 49 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 21 read as follows:

"21. In looking at the characteristics of the contributions, subparagraph *a)* provides a number of tests. It makes it clear that the provision applies only to contributions borne by an individual to a pension scheme established in and recognised for tax purposes in the home State. The phrase "recognised for tax purposes" is further defined in subdivision *b)(ii)* of the suggested provision."

Paragraph 21 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 50: Corresponds to paragraph 22 as it read before 15 July 2005. Paragraph 22 was amended and renumbered as paragraph 50 by the report entitled

"The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 22 read as follows:

> "22. The second test applied to the characteristics of the contributions is that the contributions should be made to a home State scheme recognised by the competent authority of the host State as generally corresponding to a scheme recognised as such for tax purposes by the host State. This operates on the premise that only contributions to recognised schemes qualify for relief in member countries. This limitation does not, of course, necessarily secure equivalent tax treatment of contributions paid where an employee was working abroad and of contributions while working in the home country. If the host State's rules for recognising pension schemes were narrower than those of the home State, the employee could find that contributions to his home country pension scheme were less favourably treated when he was working in the host country than when working in the home country."

Paragraph 22 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 51: Corresponds to paragraph 23 as it read before 15 July 2005. Paragraph 23 was amended and renumbered as paragraph 51 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 23 read as follows:

> "23. However, it would not be in accordance with the stated aim of securing, as far as possible, equivalent tax treatment of employee contributions to give relief for contributions which do not — at least broadly — correspond to domestically recognised schemes. To do so would mean that the amount of relief in the host State would become dependent on legislation in the home State. In addition, it could be hard to defend treating employees working side by side differently depending on whether their pension scheme was at home or abroad (and if abroad, whether it was one country rather than another). By limiting the suggested provision to schemes which generally correspond to those in the host country such difficulties are avoided."

Paragraph 23 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 52: Corresponds to paragraph 24 as it read before 15 July 2005. Paragraph 24 was amended and renumbered as paragraph 52 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 24 read as follows:

> "24. The suggested provision makes it clear that it is for the competent authority of the host State to determine whether the scheme in the home State generally corresponds to recognised schemes in the host State. Individual States may wish, in bilateral negotiations, to establish what interpretation the competent authority places on the term "generally corresponding"; for example how widely it is interpreted and what tests are imposed."

Paragraph 24 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 53: Corresponds to paragraph 25 as it read before 15 July 2005. Paragraph 25 was amended and renumbered as paragraph 53 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 25 read as follows:

> "25. The contributions covered by the provision are limited to payments to schemes to which the employee was contributing before he began to exercise his employment in the host State. This means that contributions to new pension schemes which an employee joins while in the host State are excluded from the suggested provision."

Paragraph 25 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 54: Corresponds to paragraph 26 as it read before 15 July 2005. Paragraph 26 was amended and renumbered as paragraph 54 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 26 read as follows:

> "26. It is, however, recognised that special rules may be needed to cover cases where new pension schemes are substituted for previous ones. For instance, in some member countries the common practice may be that, if a company employer is taken over by another company, the existing company pension scheme for its employees may be ended and a new scheme opened by the new employer. In bilateral negotiations, therefore, individual States may wish to supplement the provision to cover such substitution schemes."

Paragraph 26 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

C (18)

Paragraph 55: Corresponds to paragraph 27 as it read before 15 July 2005. Paragraph 27 was amended and renumbered as paragraph 55 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 27 read as follows:

> "27. Subparagraph *a)* also sets out the relief to be given by the host State if the characteristics of the employee and the contributions fall within the terms of the provision. In brief, the relief is to be given in a way which corresponds to the manner in which relief would be given if the contributions were to a scheme established in the host State."

Paragraph 27 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 56: Corresponds to paragraph 28 as it read before 15 July 2005. Paragraph 28 was amended and renumbered as paragraph 56 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 28 read as follows:

> "28. This measure of relief does not, of course, necessarily secure equivalent tax treatment given to contributions paid when an employee is working abroad and contributions paid when he is working in the home country. Similar considerations apply here to those discussed in paragraphs 22 and 23 above. The measure does, however, ensure equivalent treatment of the contributions of colleagues. The following example is considered. The home country allows relief for pension

contributions subject to a limit of 18 % of income. The host country allows relief subject to a limit of 20 %. The suggested provision in paragraph 11 would require the host country to allow relief up to its domestic limit of 20 %. Countries wishing to adopt the limit in the home country would need to amend the wording of the provision appropriately."

Paragraph 28 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 57: Corresponds to paragraph 29 as it read before 15 July 2005. Paragraph 29 was amended and renumbered as paragraph 57 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 29 read as follows:

"29. The amount and method of giving the relief would depend upon the domestic tax treatment of pension contributions by the host State. This would settle such questions as whether contributions qualify for relief in full, or only in part, and whether relief should be given as a deduction in computing taxable income (and if so, which income, *e.g.* only employment income or all income) or as a tax credit."

Paragraph 29 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 58: Corresponds to paragraph 30 as it read before 15 July 2005. Paragraph 30 was amended and renumbered as paragraph 58 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 30 read as follows:

"30. Being assigned to work abroad may not only mean that an employee's contributions to a pension scheme in his home country cease to qualify for tax relief. It may also mean that contributions to the pension scheme by the employer are regarded as the employee's income for tax purposes. In some member countries employees are taxed on employer's contributions to domestic schemes whilst working in the home country whereas in others these contributions remain exempt. The provision, therefore, is silent on the treatment of such contributions, although member countries may wish to extend the suggested provision in bilateral treaties, to ensure that employers contributions in the context of the employees' tax liability are accorded the same treatment that such contributions to domestic schemes would receive."

Paragraph 30 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 59: Corresponds to paragraph 31 as it read before 15 July 2005. Paragraph 31 was amended and renumbered as paragraph 59 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 31 read as follows:

"31. Subdivision *b)(i)* defines a pension scheme for the purposes of subparagraph *a)*. It makes it clear that, for these purposes, a pension scheme is an arrangement in which the individual who makes the payments participates in order to secure retirement benefits. These benefits must be payable in respect of the exercise of the employment in the host State. All the above conditions must

> apply to the pension scheme before it can qualify for relief under the suggested provision."

Paragraph 31 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 60: Corresponds to paragraph 32 as it read before 15 July 2005. Paragraph 32 was amended and renumbered as paragraph 60 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 32 read as follows:

> "32. Subdivision *b)(i)* refers to the participation of the individual in the pension scheme in order to secure retirement benefits. This definition is intended to ensure that the proportion of contributions made to secure benefits other than periodic pension payments on retirement, *e.g.* a lump sum on retirement, will also qualify for relief under the provision."

Paragraph 32 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 61: Corresponds to paragraph 33 as it read before 15 July 2005. Paragraph 33 was amended and renumbered as paragraph 61 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 33 read as follows:

> "33. The initial definition of a pension scheme is "an arrangement". This is a widely drawn term, the use of which is intended to encompass the various forms which pension schemes may take in individual member countries."

Paragraph 33 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 62: Corresponds to paragraph 34 as it read before 15 July 2005. Paragraph 34 was amended and renumbered as paragraph 62 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 34 read as follows:

> "34. Although subdivision *b)(i)* sets out that participation in this scheme has to be by the individual who exercises the employment referred to in subparagraph *a)*, there is no reference to the identity of the recipient of the retirement benefits secured by participation in the scheme. This is to ensure that any proportion of contributions intended to generate a widow or dependent's pension may be eligible for relief under the suggested provision."

Paragraph 34 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 63: Corresponds to paragraph 35 as it read before 15 July 2005. Paragraph 35 was amended and renumbered as paragraph 63 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 35 read as follows:

> "35. The definition of a pension scheme makes no distinction between pensions paid from State-run occupational pension schemes and similar privately-run

schemes. Both are covered by the scope of the provision. Any pensions, such as pensions from general State pension schemes dependent on contribution records whether or not contributors are employees, are excluded from the provision as the individual will not contribute to such schemes in order to receive benefits payable in respect of his employment."

Paragraph 35 was previously amended on 29 April 2000, by deleting the words "dependent personal services rendered", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 35 read as follows:

"35. The definition of a pension scheme makes no distinction between pensions paid from State-run occupational pension schemes and similar privately-run schemes. Both are covered by the scope of the provision. Any pensions, such as pensions from general State pension schemes dependent on contribution records whether or not contributors are employees, are excluded from the provision as the individual will not contribute to such schemes in order to receive benefits payable in respect of dependent personal services rendered."

Paragraph 35 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 64: Corresponds to paragraph 36 as it read before 15 July 2005. Paragraph 36 was amended and renumbered as paragraph 64 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 36 read as follows:

"36. Subdivision *b)(ii)* further defines the phrase "recognised for tax purposes". As the aim of the provision is, so far as possible, to ensure that contributions are neither more nor less favourably treated for tax purposes than they would be if the employee was resident in his home State, it is right to limit the provision to contributions which would have qualified for relief if the employee had remained in the home State. The provision seeks to achieve this aim by limiting its scope to contributions made to a scheme only if contributions to this scheme would qualify for tax relief in that State."

Paragraph 36 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 65: Corresponds to paragraph 37 as it read before 15 July 2005. Paragraph 37 was amended and renumbered as paragraph 65 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 37 read as follows:

"37. This method of attempting to achieve parity of treatment assumes that in all member countries only contributions to recognised pension schemes qualify for relief. The tax treatment of contributions to pension schemes under member countries' tax systems may differ from this assumption. It is recognised that, in bilateral negotiations, individual countries may wish to further define the qualifying pension schemes in terms that match the respective domestic laws of the treaty partners."

Paragraph 37 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Annex C of the Report entitled "The Tax Treatment of Employee's Contributions to Foreign Pension Schemes" (adopted by the OECD Council on 23 July 1992).

Paragraph 66: Added on 15 July 2005 together with the heading preceding it, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 67: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 68: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 69: Added on 15 July 2005 together with the heading preceding it, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 70: Paragraph 70 was added on 15 July 2005 and the heading preceding paragraph 38 was moved immediately before paragraph 70 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

COMMENTARY ON ARTICLE 19 CONCERNING THE TAXATION OF REMUNERATION IN RESPECT OF GOVERNMENT SERVICE

1. This Article applies to salaries, wages, and other similar remuneration, and pensions, in respect of government service. Similar provisions in old bilateral conventions were framed in order to conform with the rules of international courtesy and mutual respect between sovereign States. They were therefore rather limited in scope. However, the importance and scope of Article 19 has increased on account of the fact that, consequent on the growth of the public sector in many countries, governmental activities abroad have been considerably extended. According to the original version of paragraph 1 of Article 19 in the 1963 Draft Convention the paying State had a right to tax payments made for services rendered to that State or political subdivision or local authority thereof. The expression "may be taxed" was used and this did not connote an exclusive right of taxation.

(Amended on 31 March 1994; see HISTORY)

2. In the 1977 Model Convention, paragraph 1 was split into two paragraphs, paragraph 1 concerning salaries, wages, and other similar remuneration other than a pension and paragraph 2 concerning pensions, respectively. Unlike the original provision, subparagraph *a)* of paragraphs 1 and 2 are both based on the principle that the paying State shall have an exclusive right to tax the payments. Countries using the credit method as the general method for relieving double taxation in their conventions are thus, as an exception to that method, obliged to exempt from tax such payments to their residents as are dealt with under paragraphs 1 and 2. If both Contracting States apply the exemption method for relieving double taxation, they can continue to use the expression "may be taxed" instead of "shall be taxable only". In relation to such countries the effect will of course be the same irrespective of which of these expressions they use. It is understood that the expression "shall be taxable only" shall not prevent a Contracting State from taking into account the income exempted under subparagraph *a)* of paragraphs 1 and 2 in determining the rate of tax to be imposed on income derived by its residents from other sources. The principle of giving the exclusive taxing right to the paying State is contained in so many of the existing conventions between OECD member countries that it can be said to be already internationally accepted. It is also in conformity with the conception of international courtesy which is at the basis of the Article and with the provisions of the *Vienna Conventions on Diplomatic and Consular Relations*. It should, however, be observed that the Article is not intended to restrict the operation of any rules originating from international law in the

case of diplomatic missions and consular posts (see Article 28) but deals with cases not covered by such rules.

(Amended on 28 January 2003; see HISTORY)

2.1 In 1994, a further amendment was made to paragraph 1 by replacing the term "remuneration" by the words "salaries, wages, and other similar remuneration". This amendment was intended to clarify the scope of the Article, which only applies to State employees and to persons deriving pensions from past employment by a State, and not to persons rendering independent services to a State or deriving pensions related to such services.

(Added on 31 March 1994; see HISTORY)

2.2 Member countries have generally understood the term "salaries, wages and other similar remuneration ... paid" to include benefits in kind received in respect of services rendered to a State or political subdivision or local authority thereof (*e.g.* the use of a residence or automobile, health or life insurance coverage and club memberships).

(Replaced on 23 October 1997; see HISTORY)

3. The provisions of the Article apply to payments made not only by a State but also by its political subdivisions and local authorities (constituent states, regions, provinces, *départements*, cantons, districts, *arrondissements*, *Kreise*, municipalities, or groups of municipalities, etc.).

(Amended on 11 April 1977; see HISTORY)

4. An exception from the principle of giving exclusive taxing power to the paying State is contained in subparagraph *b)* of paragraph 1. It is to be seen against the background that, according to the Vienna Conventions mentioned above, the receiving State is allowed to tax remuneration paid to certain categories of personnel of foreign diplomatic missions and consular posts, who are permanent residents or nationals of that State. Given that pensions paid to retired government officials ought to be treated for tax purposes in the same way as salaries or wages paid to such employees during their active time, an exception like the one in subparagraph *b)* of paragraph 1 is incorporated also in subparagraph *b)* of paragraph 2 regarding pensions. Since the condition laid down in subdivision *b)(ii)* of paragraph 1 cannot be valid in relation to a pensioner, the only prerequisite for the receiving State's power to tax the pension is that the pensioner must be one of its own residents and nationals.

(Amended on 15 July 2005; see HISTORY)

5. According to Article 19 of the 1963 Draft Convention, the services rendered to the State, political subdivision or local authority had to be rendered "in the discharge of functions of a governmental nature". That

expression was deleted in the 1977 Model Convention. Some OECD member countries, however, thought that the exclusion would lead to a widening of the scope of the Article. Contracting States who are of that view and who feel that such a widening is not desirable may continue to use, and preferably specify, the expression "in the discharge of functions of a governmental nature" in their bilateral conventions.

(Amended on 23 July 1992; see HISTORY)

5.1 Whilst the word "pension", under the ordinary meaning of the word, covers only periodic payments, the words "other similar remuneration", which were added to paragraph 2 in 2005, are broad enough to cover non-periodic payments. For example, a lump-sum payment in lieu of periodic pension payments that is made to a former State employee after cessation of employment may fall within paragraph 2 of the Article. Whether a particular lump-sum payment made in these circumstances is to be considered as other remuneration similar to a pension falling under paragraph 2 or as final remuneration for work performed falling under paragraph 1 is a question of fact which can be resolved in light of the factors presented in paragraph 5 of the Commentary on Article 18.

(Added on 15 July 2005; see HISTORY)

5.2 It should be noted that the expression "out of funds created by" in subparagraph *a)* of paragraph 2 covers the situation where the pension is not paid directly by the State, a political subdivision or a local authority but out of separate funds created by a government body. In addition, the original capital of the fund would not need to be provided by the State, a political subdivision or a local authority. The phrase would cover payments from a privately administered fund established for the government body.

(Added on 15 July 2005; see HISTORY)

5.3 An issue arises where pensions are paid for combined private and government services. This issue may frequently arise where a person has been employed in both the private and public sector and receives one pension in respect of both periods of employment. This may occur either because the person participated in the same scheme throughout the employment or because the person's pension rights were portable. A trend towards greater mobility between private and public sectors may increase the significance of this issue.

(Added on 15 July 2005; see HISTORY)

5.4 Where a civil servant having rendered services to a State has transferred a right to a pension from a public scheme to a private scheme the pension payments would be taxed only under Article 18 because such payment would

not meet the technical requirement of subparagraph 2 *a)*.

(Added on 15 July 2005; see HISTORY)

5.5 Where the transfer is made in the opposite direction and the pension rights are transferred from a private scheme to a public scheme, some States tax the whole pension payments under Article 19. Other States, however, apportion the pension payments based on the relative source of the pension entitlement so that part is taxed under Article 18 and another part under Article 18. In so doing, some States consider that if one source has provided by far the principal amount of the pension, then the pension should be treated as having been paid exclusively from that source. Nevertheless, it is recognised that apportionment often raises significant administrative difficulties.

(Added on 15 July 2005; see HISTORY)

5.6 Contracting States may be concerned about the revenue loss or the possibility of double non-taxation if the treatment of pensions could be changed by transferring the fund between public and private schemes. Apportionment may counter this; however, to enable apportionment to be applied to pensions rights that are transferred from a public scheme to a private scheme, Contracting States may, in bilateral negotiations, consider extending subparagraph 2 *a)* to cover the part of any pension or other similar remuneration that it is paid in respect of services rendered to a Contracting State or a political subdivision or a local authority thereof. Such a provision could be drafted as follows:

> 2. *a)* Notwithstanding the provisions of paragraph 1, the part of any pension or other similar remuneration that is paid in respect of services rendered to a Contracting State or a political subdivision or a local authority thereof shall be taxable only in that Contracting State.

C (19)

Alternatively Contracting States may address the concern by subjecting all pensions to a common treatment.

(Added on 15 July 2005; see HISTORY)

6. Paragraphs 1 and 2 do not apply if the services are performed in connection with business carried on by the State, or one of its political subdivisions or local authorities, paying the salaries, wages, pensions or other similar remuneration. In such cases the ordinary rules apply: Article 15 for wages and salaries, Article 16 for directors' fees and other similar payments, Article 17 for artistes and sportsmen, and Article 18 for pensions. Contracting States, wishing for specific reasons to dispense with paragraph 3 in their bilateral conventions, are free to do so thus bringing in under paragraphs 1 and 2 also services rendered in connection with business. In view of the specific functions carried out by certain public bodies, *e.g.* State Railways, the

Post Office, State-owned theatres etc., Contracting States wanting to keep paragraph 3 may agree in bilateral negotiations to include under the provisions of paragraphs 1 and 2 salaries, wages, pensions, and other similar remuneration paid by such bodies, even if they could be said to be performing business activities.

(Amended on 15 July 2005; see HISTORY)

Observation on the Commentary

7. The *Netherlands* does not adhere to the interpretation in paragraphs 5.4 and 5.6. Apportionment of pension payments on the base of the relative source of the pension entitlements, private or government employment, is in the Netherlands view also possible if pension rights are transferred from a public pension scheme to a private scheme.

(Added on 15 July 2005; see HISTORY)

Reservations on the Article

8. *(Deleted on 15 July 2005; see HISTORY)*

9. The *United States* reserves the right to modify the text to indicate that its application is not limited by Article 1.

(Renumbered on 23 July 1992; see HISTORY)

10. *(Deleted on 29 April 2000; see HISTORY)*

11. *France* reserves the right to specify in its conventions that salaries, wages, and other similar remuneration paid by a Contracting State or a political subdivision or local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State if the individual is a national of both Contracting States. Also, France reserves its position concerning subdivision *b)(ii)* of paragraph 1 in view of the difficulties raised by this provision.

(Amended on 31 March 1994; see HISTORY)

12. *(Deleted on 15 July 2005; see HISTORY)*

13. *France* considers that the scope of the application of Article 19 should cover:

— remuneration paid by public legal entities of the State or a political subdivision or local authority thereof, because the identity of the payer is less significant than the public nature of the income;

— public remuneration of artistes and sportsmen in conformity with the wording of the Model prior to 1995 (without applying the criterion of

business activity, seldom relevant in these cases), as long as Article 17 does not contain a provision along the lines suggested in paragraph 14 of the Commentary on Article 17.

(Amended on 29 April 2000; see HISTORY)

HISTORY

Title: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title read as follows:

> "COMMENTARY ON ARTICLE 19 CONCERNING THE TAXATION OF REMUNERATION IN RESPECT OF GOVERNMENTAL FUNCTIONS."

Paragraph 1: Amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 1 read as follows:

> "1. This Article applies to remuneration in respect of government service. Similar provisions in old bilateral conventions were framed in order to conform with the rules of international courtesy and mutual respect between sovereign States. They were therefore rather limited in scope. However, the importance and scope of Article 19 has increased on account of the fact that, consequent on the growth of the public sector in many countries, governmental activities abroad have been considerably extended. According to the original version of paragraph 1 of Article 19 in the 1963 Draft Convention the paying State had a right to tax payments made for services rendered to that State or political subdivision or local authority thereof. The expression "may be taxed" was used and this did not connote an exclusive right of taxation."

Paragraph 1 was previously amended and the last sentence was incorporated into paragraph 2 in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

C (19)

> "1. Article 19 applies to remuneration in respect of governmental functions. The similar provisions which are frequently found in bilateral Convention were originally framed in order to conform with the rules of international courtesy and mutual respect between sovereign States (see Mexico Model Convention, Commentary ad Article VIII). They were therefore rather limited in scope. The first paragraph of Article 19 lays down a general principle, the scope of which may be determined by the Contracting States by means of special provisions. It should be observed that the Article is not intended to restrict the operation of any rules originating from international law in the case of diplomatic and consular missions (see Art. 27) but deals with cases not covered by such rules."

Paragraph 2: Amended on 28 January 2003, by replacing the reference to Article 27 by a reference to Article 28 as a consequence of the addition of a new Article 27 (Assistance in the Collection of Taxes) and the renumbering of Article 27, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 31 March 1994 and until 28 January 2003, paragraph 2 read as follows:

> "2. In the 1977 Model Convention, paragraph 1 was split into two paragraphs, paragraph 1 concerning salaries, wages, and other similar remuneration other than a pension and paragraph 2 concerning pensions, respectively. Unlike the original provision, subparagraph *a)* of paragraphs 1 and 2 are both based on the

principle that the paying State shall have an exclusive right to tax the payments. Countries using the credit method as the general method for relieving double taxation in their conventions are thus, as an exception to that method, obliged to exempt from tax such payments to their residents as are dealt with under paragraphs 1 and 2. If both Contracting States apply the exemption method for relieving double taxation, they can continue to use the expression "may be taxed" instead of "shall be taxable only". In relation to such countries the effect will of course be the same irrespective of which of these expressions they use. It is understood that the expression "shall be taxable only" shall not prevent a Contracting State from taking into account the income exempted under subparagraph *a)* of paragraphs 1 and 2 in determining the rate of tax to be imposed on income derived by its residents from other sources. The principle of giving the exclusive taxing right to the paying State is contained in so many of the existing conventions between OECD member countries that it can be said to be already internationally accepted. It is also in conformity with the conception of international courtesy which is at the basis of the Article and with the provisions of the Vienna Conventions on Diplomatic and Consular Relations. It should, however, be observed that the Article is not intended to restrict the operation of any rules originating from international law in the case of diplomatic missions and consular posts (see Article 27) but deals with cases not covered by such rules."

Paragraph 2 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 2 read as follows:

"2. In the 1977 Model Convention, paragraph 1 was split into two paragraphs, paragraph 1 concerning remuneration other than a pension and paragraph 2 concerning pensions, respectively. Unlike the original provision, subparagraph *a)* of paragraphs 1 and 2 are both based on the principle that the paying State shall have an exclusive right to tax the payments. Countries using the credit method as the general method for relieving double taxation in their conventions are thus, as an exception to that method, obliged to exempt from tax such payments to their residents as are dealt with under paragraphs 1 and 2. If both Contracting States apply the exemption method for relieving double taxation, they can continue to use the expression "may be taxed" instead of "shall be taxable only". In relation to such countries the effect will of course be the same irrespective of which of these expressions they use. It is understood that the expression "shall be taxable only" shall not prevent a Contracting State from taking into account the income exempted under subparagraph *a)* of paragraphs 1 and 2 in determining the rate of tax to be imposed on income derived by its residents from other sources. The principle of giving the exclusive taxing right to the paying State is contained in so many of the existing conventions between OECD member countries that it can be said to be already internationally accepted. It is also in conformity with the conception of international courtesy which is at the basis of the Article and with the provisions of the Vienna Conventions on Diplomatic and Consular Relations. It should, however, be observed that the Article is not intended to restrict the operation of any rules originating from international law in the case of diplomatic missions and consular posts (see Article 27) but deals with cases not covered by such rules."

Paragraph 2 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, by replacing the words "On revision of the Article" with "In the 1977 Model Convention" at the beginning of the paragraph. In the 1977 Model Convention and until 23 July 1992, paragraph 2 read as follows:

"2. On revision of the Article, paragraph 1 was split into two paragraphs, paragraph 1 concerning remuneration other than a pension and paragraph 2 concerning pensions, respectively. Unlike the original provision, subparagraph *a)* of paragraphs 1 and 2 are both based on the principle that the paying State shall have an exclusive right to tax the payments. Countries using the credit method as the general method for relieving double taxation in their conventions are thus, as an exception to that method, obliged to exempt from tax such payments to their residents as are dealt with under paragraphs 1 and 2. If both Contracting States apply the exemption method for relieving double taxation, they can continue to use the expression "may be taxed" instead of "shall be taxable only". In relation to such countries the effect will of course be the same irrespective of which of these expressions they use. It is understood that the expression "shall be taxable only" shall not prevent a Contracting State from taking into account the income exempted under subparagraph *a)* of paragraphs 1 and 2 in determining the rate of tax to be imposed on income derived by its residents from other sources. The principle of giving the exclusive taxing right to the paying State is contained in so many of the existing conventions between OECD member countries that it can be said to be already internationally accepted. It is also in conformity with the conception of international courtesy which is at the basis of the Article and with the provisions of the Vienna Conventions on Diplomatic and Consular Relations. It should, however, be observed that the Article is not intended to restrict the operation of any rules originating from international law in the case of diplomatic missions and consular posts (see Article 27) but deals with cases not covered by such rules."

Paragraph 2 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 2 of the 1963 Draft Convention was deleted and a new paragraph 2 that included the last sentence of paragraph 1 (see History of paragraph 1) was added when the 1977 Model Convention was adopted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. It should be noted that the term 'remuneration' used in Article 19 covers wages and salaries and pensions, to the exclusion of any other payments. The provisions of the Article apply to remuneration paid not only by a State but also by its political subdivisions and local authorities (member States, cantons, municipalities, etc...). Paragraph 1 of the Article does not apply if the services are performed in connection with trade or business carried on by the State, or one of its political subdivisions or local authorities, paying the remuneration. In such cases, the ordinary rule applies (Article 15 for wages and salaries, Article 16 for directors' fees and similar payments and Article 18 for pensions)."

Paragraph 2.1: Added on 31 March 1994, by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 2.2: Replaced on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 31 March 1994 and until 23 October 1997, paragraph 2.2 read as follows:

"2.2 It should be noted that the term "paid" has a very wide meaning in the context of paragraph 1. It would apply, for instance, to the provision of remuneration in the form of a taxable employment benefit (*e.g.* the payment by the employer of the rent for an apartment occupied by the employee) granted to an employee by a Contracting State or political subdivision or local authority thereof."

Paragraph 2.2 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 3: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the heading preceding paragraph 3 was moved immediately before paragraph 7. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

> "3. *Canada* reserves its position on this Article. When negotiating Conventions with the Member countries, the Canadian authorities would wish to have pensions excluded from this article so that all pension would be taxed only in the country where they are received."

Paragraph 4: Amended on 15 July 2005, by removing the last sentence, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 4 read as follows:

> "4. An exception from the principle of giving exclusive taxing power to the paying State is contained in subparagraph *b)* of paragraph 1. It is to be seen against the background that, according to the Vienna Conventions mentioned above, the receiving State is allowed to tax remuneration paid to certain categories of personnel of foreign diplomatic missions and consular posts, who are permanent residents or nationals of that State. Given that pensions paid to retired government officials ought to be treated for tax purposes in the same way as salaries or wages paid to such employees during their active time, an exception like the one in subparagraph *b)* of paragraph 1 is incorporated also in subparagraph *b)* of paragraph 2 regarding pensions. Since the condition laid down in subdivision *b)(ii)* of paragraph 1 cannot be valid in relation to a pensioner, the only prerequisite for the receiving State's power to tax the pension is that the pensioner must be one of its own residents and nationals. It should be noted that the expression "out of funds created by" in subparagraph *a)* of paragraph 2 covers the situation where the pension is not paid directly by the State, a political subdivision or a local authority but out of separate funds created by them."

Paragraph 4 was previously amended on 23 July 1992 by replacing the words "subparagraph *b)(ii)*" with "subdivision *b)(ii)*" by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 4 read as follows:

> "4. An exception from the principle of giving exclusive taxing power to the paying State is contained in subparagraph *b)* of paragraph 1. It is to be seen against the background that, according to the Vienna Conventions mentioned above, the receiving State is allowed to tax remuneration paid to certain categories of personnel of foreign diplomatic missions and consular posts, who are permanent residents or nationals of that State. Given that pensions paid to retired government officials ought to be treated for tax purposes in the same way as salaries or wages paid to such employees during their active time, an exception like the one in subparagraph *b)* of paragraph 1 is incorporated also in subparagraph *b)* of paragraph 2 regarding pensions. Since the condition laid down in subparagraph *b)(ii)* of paragraph 1 cannot be valid in relation to a pensioner, the only prerequisite for the receiving State's power to tax the pension is that the pensioner must be one of its own residents and nationals. It should be noted that the expression "out of funds created by" in subparagraph *a)* of paragraph 2 covers the situation where the pension is not paid directly by the State, a political subdivision or a local authority but out of separate funds created by them."

Paragraph 4 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 5: Amended on 23 July 1992, by replacing the second sentence, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 5 read as follows:

> "According to Article 19 of the 1963 Draft Convention, the services rendered to the State, political subdivision or local authority had to be rendered "in the discharge of functions of a governmental nature". In the course of the revision of the Article, it was decided to delete that expression. Some OECD member countries, however, thought that the exclusion would lead to a widening of the scope of the Article. Contracting States who are of that view and who feel that such a widening is not desirable may continue to use, and preferably specify, the expression "in the discharge of functions of a governmental nature" in their bilateral conventions."

Paragraph 5 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 5.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 5.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 5.3: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 5.4: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 5.5: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 5.6: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 6: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 21 September 1995 and until 15 July 2005, paragraph 6 read as follows:

> "6. Paragraphs 1 and 2 do not apply if the services are performed in connection with business carried on by the State, or one of its political subdivisions or local authorities, paying the salaries, wages, or other similar remuneration or the pensions. In such cases the ordinary rules apply: Article 15 for wages and salaries, Article 16 for directors' fees and other similar payments, Article 17 for artistes and sportsmen, and Article 18 for pensions. Contracting States, wishing for specific reasons to dispense with paragraph 3 in their bilateral conventions, are free to do so thus bringing in under paragraphs 1 and 2 also services rendered in connection with business. In view of the specific functions carried out by certain public bodies, *e.g.* State Railways, the Post Office, State-owned theatres etc., Contracting States wanting to keep paragraph 3 may agree in bilateral negotiations to include under the provisions of paragraphs 1 and 2 salaries, wages, and other similar remuneration, and pensions, paid by such bodies, even if they could be said to be performing business activities."

Paragraph 6 was previously amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 6 read as follows:

> "6. Paragraphs 1 and 2 do not apply if the services are performed in connection with business carried on by the State, or one of its political subdivisions or local authorities, paying the remuneration. In such cases the ordinary rules apply:

Article 15 for wages and salaries, Article 16 for directors' fees and other similar payments and Article 18 for pensions. Article 17 is not mentioned because paragraphs 1 and 2 of Article 19 are to apply to remuneration paid to artistes employed by the State, a political subdivision or a local authority thereof, irrespective of whether such artistes could be said to be rendering services in connection with business carried on by the State, the political subdivision or the local authority. Contracting States, wishing for specific reasons to dispense with paragraph 3 in their bilateral conventions, are free to do so thus bringing in under paragraphs 1 and 2 also services rendered in connection with business. In view of the specific functions carried out by certain public bodies, *e.g.* State Railways, the Post Office, State-owned theatres etc., Contracting States wanting to keep paragraph 3 may agree in bilateral negotiations to include under the provisions of paragraphs 1 and 2 remuneration paid by such bodies, even if they could be said to be performing business activities."

Paragraph 6 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 7: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7 was deleted on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 7 read as follows:

"7. *Greece* does not adhere to the interpretation given in paragraph 6 of the Commentary regarding the tax treatment of income derived from activities dealt with in Article 17."

Paragraph 7 as it read after 23 July 1992 replaced paragraph 7 of the 1977 Model Convention. On 23 July 1992 paragraph 7 of the 1977 Model Convention was amended and renumbered as paragraph 8 (see history of paragraph 8), the heading preceding paragraph 7 was moved with it and a new paragraph 7 was added together with the heading, "Observations on the Commentary", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 8: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 8 read as follows:

"8. The *United States* reserves the right to exclude from paragraph 2 of the Article, and tax as a social security benefit under Article 18, social security benefits paid in respect of Government service."

Paragraph 8 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 8, as it read before 21 September 1995, was deleted by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 8 read as follows:

"8. *Japan* believes that a reference to Article 17 should be added to paragraph 3, so that government-employed artistes may be governed by Article 17 if their services are rendered in connection with a business."

Paragraph 8 as it read before 23 July 1992 corresponded to paragraph 7 of the 1977 Model Convention. On 23 July 1992 paragraph 8 of the 1977 Model Convention was renumbered as paragraph 9 (see history of paragraph 9), paragraph 7 was amended by deleting the reference to the United States and renumbered as paragraph 8 and the heading preceding paragraph 7 was moved with it by the report entitled "The Revision

of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 7 read as follows:

"7. *Japan* and the *United States* believe that a reference to Article 17 should be added to paragraph 3, so that government-employed artistes may be governed by Article 17 if their services are rendered in connection with a business."

Paragraph 7 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 9: Corresponds to paragraph 8 as it read before 23 July 1992. Paragraph 8 of the 1977 Model Convention was renumbered as paragraph 9 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 8 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 10: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 10 read as follows:

"10. *Canada* is of the opinion that paragraph 1 should only apply in respect of services rendered in a State that is not the paying State and will propose an amendment to that effect while negotiating conventions."

Paragraph 10 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 11: Amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 11 read as follows:

"11. *France* reserves the right to specify in its conventions that remuneration paid by a Contracting State or a political subdivision or local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State if the individual is a national of both Contracting States. Also, France reserves its position concerning subdivision *b)(ii)* of paragraph 1 in view of the difficulties raised by this provision."

Paragraph 11 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 12: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 12 read as follows:

"12. *Belgium*, *Canada* and *Norway* reserve the right to extend the application of Article 18 to pensions referred to in Article 19 in order to achieve uniformity of treatment."

Paragraph 11 was amended on 28 January 2003, by adding Belgium as a country making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 31 March 1994 and until 28 January 2003, paragraph 12 read as follows:

"12. *Canada* and *Norway* reserve the right to extend the application of Article 18 to pensions referred to in Article 19 in order to achieve uniformity of treatment."

Paragraph 12 was previously amended on 31 March 1994, by adding Canada as a country making the reservation, by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 12 read as follows:

"12. *Norway* reserves the right to extend the application of Article 18 to pensions referred to in Article 19 in order to achieve uniformity of treatment."

Paragraph 12 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 13: Amended on 29 April 2000, by replacing the words "industrial or commercial" with the word "business", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 21 September 1995 and until 29 April 2000, paragraph 13 read as follows:

"13. *France* considers that the scope of the application of Article 19 should cover:

— remuneration paid by public legal entities of the State or a political subdivision or local authority thereof, because the identity of the payer is less significant than the public nature of the income;

— public remuneration of artistes and sportsmen in conformity with the wording of the Model prior to 1995 (without applying the criterion of industrial or commercial activity, seldom relevant in these cases), as long as Article 17 does not contain a provision along the lines suggested in paragraph 14 of the Commentary on Article 17."

Paragraph 13 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

COMMENTARY ON ARTICLE 20 CONCERNING THE TAXATION OF STUDENTS

1. The rule established in this Article concerns certain payments received by students or business apprentices for the purpose of their maintenance, education or training. All such payments received from sources outside the State in which the student or business apprentice concerned is staying shall be exempted from tax in that State.

(Amended on 11 April 1977; see HISTORY)

2. The word "immediately" was inserted in the 1977 Model Convention in order to make clear that the Article does not cover a person who has once been a resident of a Contracting State but has subsequently moved his residence to a third State before visiting the other Contracting State.

(Amended on 23 July 1992; see HISTORY)

3. The Article covers only payments received for the purpose of the recipient's maintenance, education or training. It does not, therefore, apply to a payment, or any part thereof, that is remuneration for services rendered by the recipient and which is covered by Article 15 (or by Article 7 in the case of independent services). Where the recipient's training involves work experience, however, there is a need to distinguish between a payment for services and a payment for the recipient's maintenance, education or training. The fact that the amount paid is similar to that paid to persons who provide similar services and are not students or business apprentices would generally indicate that the payment is a remuneration for services. Also, payments for maintenance, education or training should not exceed the level of expenses that are likely to be incurred to ensure the recipient's maintenance, education or training.

(Replaced on 15 July 2005; see HISTORY)

4. For the purpose of the Article, payments that are made by or on behalf of a resident of a Contracting State or that are borne by a permanent establishment which a person has in that State are not considered to arise from sources outside that State.

(Added on 15 July 2005; see HISTORY)

HISTORY

Title: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title read as follows:

> "COMMENTARY ON ARTICLE 20 ON THE TAXATION OF STUDENTS AND BUSINESS APPRENTICES ABROAD"

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. The rule established in Article 20 concerns certain payments received by students or business apprentices for the purpose of their maintenance, education or training. The exemption provided for is already fairly well established in existing bilateral Conventions. All such payments received from sources outside the State in which the student or business apprentice concerned is staying shall be exempted from tax in that State."

Paragraph 2: Amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 2 read as follows:

> "2. In the course of revision of the 1963 Draft Convention it was decided to insert the word "immediately" in order to make clear that the Article does not cover a person who has once been a resident of a Contracting State but has subsequently moved his residence to a third State before visiting the other Contracting State."

Paragraph 2 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 3: Paragraph 3 as it read before 15 July 2005 was replaced and the heading preceding it was moved immediately before paragraph 4 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 3 read as follows:

> "3. *Australia* and *New Zealand* reserve the right to have the operation of this Article limited to students."

Paragraph 3 was previously amended on 29 April 2000, by adding New Zealand as a country making the reservation, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. In the 1977 Model Convention and until 29 April 2000, paragraph 3 read as follows:

> "3. *Australia* reserves the right to have the operation of this Article limited to students."

Paragraph 3 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 4: Added on 15 July 2005 together with the heading preceding it by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

COMMENTARY ON ARTICLE 21
CONCERNING THE TAXATION OF OTHER INCOME

1. This Article provides a general rule relating to income not dealt with in the foregoing Articles of the Convention. The income concerned is not only income of a class not expressly dealt with but also income from sources not expressly mentioned. The scope of the Article is not confined to income arising in a Contracting State; it extends also to income from third States. Where, for instance, a person who would be a resident of two Contracting States under the provisions of paragraph 1 of Article 4 is deemed to be a resident of only one of these States pursuant to the provisions of paragraph 2 or 3 of that Article, this Article will prevent the other State from taxing the person on income arising in third states even if the person is resident of this other State for domestic law purposes (see also paragraph 8.2 of the Commentary on Article 4 as regards the effect of paragraphs 2 and 3 of Article 4 for purposes of the conventions concluded between this other State and third states).

(Amended on 17 July 2008; see HISTORY)

Paragraph 1

2. Under this paragraph the exclusive right to tax is given to the State of residence. In cases of conflict between two residences, Article 4 will also allocate the taxation right in respect of third State income.

(Replaced on 11 April 1977; see HISTORY)

3. The rule set out in the paragraph applies irrespective of whether the right to tax is in fact exercised by the State of residence, and thus, when the income arises in the other Contracting State, that State cannot impose tax even if the income is not taxed in the first-mentioned State. Likewise, when income arises in a third State and the recipient of this income is considered as a resident by both Contracting States under their domestic law, the application of Article 4 will result in the recipient being treated as a resident of one Contracting State only and being liable to comprehensive taxation ("full tax liability") in that State only. In this case, the other Contracting State may not impose tax on the income arising from the third State, even if the recipient is not taxed by the State of which he is considered a resident under Article 4. In order to avoid non-taxation, Contracting States may agree to limit the scope of the Article to income which is taxed in the Contracting State of which the recipient is a resident and may modify the provisions of the paragraph accordingly. In fact, this problem is merely a special aspect of the general

problem dealt with in paragraphs 34 and 35 of the Commentary on Article 23 A.

(Renumbered and amended on 11 April 1977; see HISTORY)

Paragraph 2

4. This paragraph provides for an exception from the provisions of paragraph 1 where the income is associated with the activity of a permanent establishment which a resident of a Contracting State has in the other Contracting State. The paragraph includes income from third States. In such a case, a right to tax is given to the Contracting State in which the permanent establishment is situated. paragraph 2 does not apply to immovable property for which, according to paragraph 4 of Article 6, the State of situs has a primary right to tax (see paragraphs 3 and 4 of the Commentary on Article 6). Therefore, immovable property situated in a Contracting State and forming part of the business property of a permanent establishment of an enterprise of that State situated in the other Contracting State shall be taxable only in the first-mentioned State in which the property is situated and of which the recipient of the income is a resident. This is in consistency with the rules laid down in Articles 13 and 22 in respect of immovable property since paragraph 2 of those Articles applies only to movable property of a permanent establishment.

(Amended on 29 April 2000; see HISTORY)

5. The paragraph also covers the case where the beneficiary and the payer of the income are both residents of the same Contracting State, and the income is attributed to a permanent establishment which the beneficiary of the income has in the other Contracting State. In such a case a right to tax is given to the Contracting State in which the permanent establishment is situated. Where double taxation occurs, the State of residence should give relief under the provisions of Article 23 A or 23 B. However, a problem may arise as regards the taxation of dividends and interest in the State of residence as the State of source: the combination of Articles 7 and 23 A prevents that State from levying tax on that income, whereas if it were paid to a resident of the other State, the first State, being the State of source of the dividends or interest, could tax such dividends or interest at the rates provided for in paragraph 2 of Articles 10 and 11. Contracting States which find this position unacceptable may include in their conventions a provision according to which the State of residence would be entitled, as State of source of the dividends or interest, to levy a tax on such income at the rates provided for in paragraph 2 of Articles 10 and 11. The State where the permanent establishment is situated would give a credit for such tax on the lines of the provisions of paragraph 2 of Article 23 A or of paragraph 1 of Article 23 B; of course, this

credit should not be given in cases where the State in which the permanent establishment is situated does not tax the dividends or interest attributed to the permanent establishment, in accordance with its domestic laws.

(Amended on 29 April 2000; see HISTORY)

5.1 For the purposes of the paragraph, a right or property in respect of which income is paid will be effectively connected with a permanent establishment if the "economic" ownership of that right or property is allocated to that permanent establishment under the principles developed in the Committee's report entitled *Attribution of Profits to Permanent Establishments*[1] (see in particular paragraphs 72-97 of Part I of the report) for the purposes of the application of paragraph 2 of Article 7. In the context of that paragraph, the "economic" ownership of a right or property means the equivalent of ownership for income tax purposes by a separate enterprise, with the attendant benefits and burdens (*e.g.* the right to the income attributable to the ownership of the right or property, the right to any available depreciation and the potential exposure to gains or losses from the appreciation or depreciation of that right or property).

(Added on 22 July 2010; see HISTORY)

5.2 In the case of the permanent establishment of an enterprise carrying on insurance activities, the determination of whether a right or property is effectively connected with the permanent establishment shall be made by giving due regard to the guidance set forth in Part IV of the Committee's report with respect to whether the income on or gain from that right or property is taken into account in determining the permanent establishment's yield on the amount of investment assets attributed to it (see in particular paragraphs 165-170 of Part IV). That guidance being general in nature, tax authorities should consider applying a flexible and pragmatic approach which would take into account an enterprise's reasonable and consistent application of that guidance for purposes of identifying the specific assets that are effectively connected with the permanent establishment.

(Added on 22 July 2010; see HISTORY)

6. Some States which apply the exemption method (Article 23 A) may have reason to suspect that the treatment accorded in paragraph 2 may provide an inducement to an enterprise of a Contracting State to attach assets such as shares, bonds or patents, to a permanent establishment situated in the other Contracting State in order to obtain more favourable tax treatment there. To counteract such arrangements which they consider would represent abuse, some States might take the view that the transaction is artificial and, for this

1 *Attribution of Profits to Permanent Establishments*, OECD, Paris, 2010.

reason, would regard the assets as not effectively connected with the permanent establishment. Some other States may strengthen their position by adding in paragraph 2 a condition providing that the paragraph shall not apply to cases where the arrangements were primarily made for the purpose of taking advantage of this provision. Also, the requirement that a right or property be "effectively connected" with such a location requires more than merely recording the right or property in the books of the permanent establishment for accounting purposes.

(Amended on 22 July 2010; see HISTORY)

7. Some countries have encountered difficulties in dealing with income arising from certain nontraditional financial instruments when the parties to the instrument have a special relationship. These countries may wish to add the following paragraph to Article 21:

> 3. Where, by reason of a special relationship between the person referred to in paragraph 1 and some other person, or between both of them and some third person, the amount of the income referred to in paragraph 1 exceeds the amount (if any) which would have been agreed upon between them in the absence of such a relationship, the provisions of this Article shall apply only to the last mentioned amount. In such a case, the excess part of the income shall remain taxable according to the laws of each Contracting State, due regard being had to the other applicable provisions of this Convention.

The inclusion of this additional paragraph should carry no implication about the treatment of innovative financial transactions between independent persons or under other provisions of the Convention.

(Amended on 17 July 2008; see HISTORY)

8. This paragraph restricts the operation of the provisions concerning the taxation of income not dealt with in other Articles in the same way that paragraph 6 of Article 11 restricts the operation of the provisions concerning the taxation of interest. In general, the principles enunciated in paragraphs 32-34 of the Commentary on Article 11 apply to this paragraph as well.

(Replaced on 21 September 1995; see HISTORY)

9. Although the restriction could apply to any income otherwise subject to Article 21, it is not envisaged that in practice it is likely to be applied to payments such as alimony payments or social security payments but rather that it is likely to be most relevant where certain nontraditional financial instruments are entered into in circumstances and on terms such that they

would not have been entered into in the absence of the special relationship (see paragraph 21.1 of the Commentary on Article 11).

(Replaced on 21 September 1995; see HISTORY)

10. The restriction of Article 21 differs from the restriction of Article 11 in two important respects. First, the paragraph permits, where the necessary circumstances exist, all of the payments under a nontraditional financial instrument to be regarded as excessive. Second, income that is removed from the operation of the interest Article might still be subject to some other Article of the Convention, as explained in paragraphs 35-36 of the Commentary on Article 11. Income to which Article 21 would otherwise apply is by definition not subject to any other Article. Therefore, if the Article 21 restriction removes a portion of income from the operation of that Article, then Articles 6 through 20 of the Convention are not applicable to that income at all, and each Contracting State may tax it under its domestic law.

(Added on 21 September 1995; see HISTORY)

11. Other provisions of the Convention, however, will continue to be applicable to such income, such as Article 23 (Relief from Double Taxation), Article 25 (Mutual Agreement Procedure) and Article 26 (Exchange of Information).

(Added on 21 September 1995; see HISTORY)

12. *(Deleted on 17 July 2008; see HISTORY)*

Reservations on the Article

13. *Australia*, *Canada*, *Chile*, *Mexico*, *New Zealand*, *Portugal* and the *Slovak Republic* reserve their positions on this Article and would wish to maintain the right to tax income arising from sources in their own country.

(Amended on 22 July 2010; see HISTORY)

C (21)

14. *Finland* and *Sweden* would wish to retain the right to tax certain annuities and similar payments to non-residents, where such payments are made on account of a pension insurance issued in their respective country.

(Amended on 23 October 1997; see HISTORY)

15. The *United Kingdom* wishes to maintain the right to tax income paid by its residents to non-residents in the form of income from a trust or from estates of deceased persons in the course of administration.

(Amended on 17 July 2008; see HISTORY)

16. In order to avoid non-taxation, *Belgium* reserves the right to allow the State in which income arises to tax that income where the State of residence,

which would otherwise have the exclusive right to tax that income, does not effectively exercise that right.

(Added on 23 October 1997; see HISTORY)

17. The *United States* reserves the right to provide for exemption in both States of child support payments.

(Added on 29 April 2000; see HISTORY)

HISTORY

Title: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title read as follows:

> "COMMENTARY ON ARTICLE 21 CONCERNING INCOME NOT EXPRESSLY MENTIONED IN THE CONVENTION"

Paragraph 1: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. In the 1977 Model Convention and until 17 July 2008, paragraph 1 read as follows:

> "1. This Article provides a general rule relating to income not dealt with in the foregoing Articles of the Convention. The income concerned is not only income of a class not expressly dealt with but also income from sources not expressly mentioned. The scope of the Article is not confined to income arising in a Contracting State; it extends also to income from third States."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. The aim of the Article, which appears in the same or similar form in most Conventions for the avoidance of double taxation, is to provide a general rule relating to items of income not expressly mentioned in the preceding Articles of the Convention. The State of which the recipient is a resident is given the exclusive right to tax such items of income."

Paragraph 2: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 2 of the 1963 Draft Convention was amended and renumbered as paragraph 3 (see history of paragraph 3) and a new paragraph 2 together with the heading preceding it were added when the 1977 Model Convention was adopted.

Paragraph 3: Corresponds to paragraph 2 of the 1963 Draft Convention. Paragraph 3 of the 1963 Draft Convention was deleted and the preceding heading was moved immediately before paragraph 7 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 2 of the 1963 Draft Convention was amended and renumbered as paragraph 3. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. As the Article is drafted, this rule applies irrespective of whether the right to tax is in fact exercised. If the income arises in the other Contracting State, that State cannot therefore impose tax even if the income is not taxed in the first-mentioned State. In order to avoid non-taxation, the Contracting States can agree to limit the scope of the Article to items of income which are subject to tax in the

Contracting States of which the recipient is a resident and modify the Article in this way."

Paragraph 3 of the 1963 Draft Convention, until it was deleted when the 1977 Model Convention was adopted, read as follows:

"3. Canada reserves its position on this Article. The Canadian authorities, in negotiating Conventions with other Member countries, would wish to maintain the right to tax income paid by residents of Canada to non-residents of Canada in the form of income from a trust or estate, alimony, and certain payments from a registered retirement savings plan, as well as certain lump sum payments to former employees in Canada in respect of their employment in Canada as described in Section 31 A of the Income Tax Act."

Paragraph 4: Amended on 29 April 2000, by deleting the words "or fixed base" and "or the fixed base", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 4 read as follows:

"4. This paragraph provides for an exception from the provisions of paragraph 1 where the income is associated with the activity of a permanent establishment or fixed base which a resident of a Contracting State has in the other Contracting State. The paragraph includes income from third States. In such a case, a right to tax is given to the Contracting State in which the permanent establishment or the fixed base is situated. Paragraph 2 does not apply to immovable property for which, according to paragraph 4 of Article 6, the State of situs has a primary right to tax (see paragraphs 3 and 4 of the Commentary on Article 6). Therefore, immovable property situated in a Contracting State and forming part of the business property of a permanent establishment of an enterprise of that State situated in the other Contracting State shall be taxable only in the first-mentioned State in which the property is situated and of which the recipient of the income is a resident. This is in consistency with the rules laid down in Articles 13 and 22 in respect of immovable property since paragraph 2 of those Articles applies only to movable property of a permanent establishment."

Paragraph 4 was added together with the preceding heading when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 5: Amended on 29 April 2000, by deleting the words "or a fixed base" and "or the fixed base", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 5 read as follows:

"5. The paragraph also covers the case where the beneficiary and the payer of the income are both residents of the same Contracting State, and the income is attributed to a permanent establishment or a fixed base, which the beneficiary of the income has in the other Contracting State. In such a case a right to tax is given to the Contracting State in which the permanent establishment or the fixed base is situated. Where double taxation occurs, the State of residence should give relief under the provisions of Article 23 A or 23 B. However, a problem may arise as regards the taxation of dividends and interest in the State of residence as the State of source: the combination of Articles 7 and 23 A prevents that State from levying tax on that income, whereas if it were paid to a resident of the other State, the first State, being the State of source of the dividends or interest, could tax such

dividends or interest at the rates provided for in paragraph 2 of Articles 10 and 11. Contracting States which find this position unacceptable may include in their conventions a provision according to which the State of residence would be entitled, as State of source of the dividends or interest, to levy a tax on such income at the rates provided for in paragraph 2 of Articles 10 and 11. The State where the permanent establishment is situated would give a credit for such tax on the lines of the provisions of paragraph 2 of Article 23 A or of paragraph 1 of Article 23 B; of course, this credit should not be given in cases where the State in which the permanent establishment is situated does not tax the dividends or interest attributed to the permanent establishment, in accordance with its domestic laws."

Paragraph 5 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 5.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 5.2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 6: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. In the 1977 Model Convention and until 22 July 2010, paragraph 6 read as follows:

"6. Some States which apply the exemption method (Article 23 A) may have reason to suspect that the treatment accorded in paragraph 2 may provide an inducement to an enterprise of a Contracting State to attach assets such as shares, bonds or patents, to a permanent establishment situated in the other Contracting State in order to obtain more favourable tax treatment there. To counteract such arrangements which they consider would represent abuse, some States might take the view that the transaction is artificial and, for this reason, would regard the assets as not effectively connected with the permanent establishment. Some other States may strengthen their position by adding in paragraph 2 a condition providing that the paragraph shall not apply to cases where the arrangements were primarily made for the purpose of taking advantage of this provision."

Paragraph 6 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 7: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 21 September 1995 and until 17 July 2008, paragraph 7 read as follows:

"7. Some countries have encountered difficulties in dealing with income arising from certain nontraditional financial instruments when the parties to the instrument have a special relationship. These countries may wish to add the following paragraph to Article 21:

"3. Where, by reason of a special relationship between the person referred to in paragraph 1 and some other person, or between both of them and some third person, the amount of the income referred to in paragraph 1 exceeds the amount (if any) which would have been agreed upon between them in the absence of such a relationship, the provisions of this Article shall apply only to the last mentioned amount. In such a case, the excess part of the income shall remain taxable according to the laws of each Contracting State, due regard being had to the other applicable provisions of this Convention.""

Paragraph 7 as it read before 21 September 1995 was replaced. Paragraph 7 was amended and renumbered paragraph 13 (see history of paragraph 13), the heading preceding paragraph 7 was moved with it and a new paragraph 7 was added by the

report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 8: Replaced paragraph 8 as it read before 21 September 1995. Paragraph 8 was renumbered paragraph 14 (see history of paragraph 14) and a new paragraph 8 was added by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 9: Replaced paragraph 9 as it read before 21 September 1995. Paragraph 9 was renumbered paragraph 15 (see history of paragraph 15) and a new paragraph 9 was added by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 10: Added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 11: Added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 12: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 21 September 1995 and until 17 July 2008, paragraph 12 read as follows:

> "12. The Committee on Fiscal Affairs is actively studying the taxation of nontraditional financial instruments. Further changes to the Model or Commentaries may be necessary. The inclusion of proposed paragraph 3 carries no implication about the treatment of innovative financial transactions between independent persons or under other provisions of the Convention."

Paragraph 12 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 13: Amended on 22 July 2010, by adding Chile to the list of countries making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 13 read as follows:

> "13. *Australia*, *Canada*, *Mexico*, *New Zealand*, *Portugal* and the *Slovak Republic* reserve their positions on this Article and would wish to maintain the right to tax income arising from sources in their own country."

Paragraph 13 was previously amended on 28 January 2003, by adding the Slovak Republic to the list of countries making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 13 read as follows:

> "13. *Australia*, *Canada*, *Mexico*, *New Zealand*, *Portugal* and the *Slovak Republic* reserve their positions on this Article and would wish to maintain the right to tax income arising from sources in their own country."

Paragraph 13 corresponded to paragraph 7 as it read before 21 September 1995. Paragraph 7 was amended, by adding Mexico to the list of countries making the reservation, renumbered as paragraph 13 and the heading preceding paragraph 7 was moved with it by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 7 read as follows:

> "7. *Australia*, *Canada*, *New Zealand* and *Portugal* reserve their positions on this Article and would wish to maintain the right to tax income arising from sources in their own country."

Paragraph 7 was previously amended on 23 July 1992, by deleting Spain from the list of countries making the reservation, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 7 read as follows:

> "7. *Australia*, *Canada*, *New Zealand*, *Portugal* and *Spain* reserve their positions on this Article and would wish to maintain the right to tax income arising from sources in their own country."

Paragraph 7 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, the heading preceding paragraph 3 was moved immediately before paragraph 7.

Paragraph 14: Amended on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 14 read as follows:

> "14. *Finland* and *Sweden*, when negotiating conventions with other member countries, would wish to retain the right to tax certain annuities and similar payments to non-residents, where such payments are made on account of a pension insurance issued in their respective country."

Paragraph 14 corresponded to paragraph 8 as it read before 21 September 1995. Paragraph 8 was renumbered as paragraph 14 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 8 was previously amended on 23 July 1992, by adding Finland as a country making the reservation, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 8 read as follows:

> "8. *Sweden*, when negotiating conventions with other member countries, would wish to retain the right to tax certain annuities and similar payments to non-residents of Sweden, where such payments are made on account of a pension insurance issued in Sweden."

Paragraph 8 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 15: Amended on 17 July 2008, by deleting Ireland from the list of countries making the reservation, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 15 read as follows:

> "15. *Ireland* and the *United Kingdom* wish to maintain the right to tax income paid by their residents to non-residents in the form of income from a trust or from estates of deceased persons in the course of administration."

Paragraph 15 was previously amended on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 15 read as follows:

> "15. In negotiating conventions with other member countries, *Ireland* and the *United Kingdom* wish to maintain the right to tax income paid by their residents to non-residents in the form of income from a trust or from estates of deceased persons in the course of administration."

Paragraph 15 corresponded to paragraph 9 as it read before 21 September 1995. Paragraph 9 was renumbered as paragraph 15 on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 9 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 9 read as follows:

> "9. In negotiating conventions with other member States, the *United Kingdom* also wishes to maintain the right to tax income paid by residents of the United Kingdom to non-residents of the United Kingdom in the form of income from a trust."

Paragraph 9 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 16: Added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 17: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

COMMENTARY ON ARTICLE 22 CONCERNING THE TAXATION OF CAPITAL

1. This Article deals only with taxes on capital, to the exclusion of taxes on estates and inheritances and on gifts and of transfer duties. Taxes on capital to which the Article applies are those referred to in Article 2.

(Amended on 11 April 1977; see HISTORY)

2. Taxes on capital generally constitute complementary taxation of income from capital. Consequently, taxes on a given element of capital can be levied, in principle, only by the State which is entitled to tax the income from this element of capital. However, it is not possible to refer purely and simply to the rules relating to the taxation of such class of income, for not all items of income are subject to taxation exclusively in one State.

(Amended on 11 April 1977; see HISTORY)

3. The Article, therefore, enumerates first property which may be taxed in the State in which they are situated. To this category belong immovable property referred to in Article 6 which a resident of a Contracting State owns and which is situated in the other Contracting State (paragraph 1) and movable property forming part of the business property of a permanent establishment which an enterprise of a Contracting State has in the other Contracting State (paragraph 2).

(Amended on 29 April 2000; see HISTORY)

3.1 For the purposes of paragraph 2, property will form part of the business property of a permanent establishment if the "economic" ownership of the property is allocated to that permanent establishment under the principles developed in the Committee's report entitled *Attribution of Profits to Permanent Establishments*[1] (see in particular paragraphs 72-97 of Part I of the report) for the purposes of the application of paragraph 2 of Article 7. In the context of that paragraph, the "economic" ownership of property means the equivalent of ownership for income tax purposes by a separate enterprise, with the attendant benefits and burdens (*e.g.* the right to any income attributable to the ownership of that property, the right to any available depreciation and the potential exposure to gains or losses from the appreciation or depreciation of that property). The mere fact that the property has been recorded, for accounting purposes, on a balance sheet prepared for the permanent establishment will therefore not be sufficient to conclude that it is effectively connected with that permanent establishment.

(Added on 22 July 2010; see HISTORY)

1 *Attribution of Profits to Permanent Establishments*, OECD, Paris, 2010.

3.2 In the case of the permanent establishment of an enterprise carrying on insurance activities, the determination of whether property will form part of the business property of the permanent establishment shall be made by giving due regard to the guidance set forth in Part IV of the Committee's report with respect to whether the income on or gain from that property is taken into account in determining the permanent establishment's yield on the amount of investment assets attributed to it (see in particular paragraphs 165-170 of Part IV). That guidance being general in nature, tax authorities should consider applying a flexible and pragmatic approach which would take into account an enterprise's reasonable and consistent application of that guidance for purposes of identifying the specific assets that form part of the business property of the permanent establishment.

(Added on 22 July 2010; see HISTORY)

4. Normally, ships and aircraft operated in international traffic and boats engaged in inland waterways transport and movable property pertaining to the operation of such ships, boats or aircraft shall be taxable only in the State in which the place of effective management of the enterprise is situated (paragraph 3). This rule corresponds to the provisions of Article 8 and of paragraph 3 of Article 13. It is understood that paragraph 3 of Article 8 is applicable if the place of effective management of a shipping enterprise or of an inland waterways transport enterprise is aboard a ship or boat. Contracting States which would prefer to confer the exclusive taxing right on the State of residence or to use a combination of the residence criterion and the place of effective management criterion are free in bilateral conventions to substitute for paragraph 3 a provision corresponding to those proposed in paragraphs 2 and 3 of the Commentary on Article 8. Immovable property pertaining to the operation of ships, boats or aircraft may be taxed in the State in which they are situated in accordance with the rule laid down in paragraph 1.

(Amended on 28 January 2003; see HISTORY)

4.1 Paragraph 3 applies where the enterprise that owns the property operates itself the boats, ships or aircraft referred to in the paragraph, whether for its own transportation activities or when leasing the boats, ships or aircraft on charter fully equipped, manned and supplied. It does not apply, however, where the enterprise owning the boats, ships or aircraft does not operate them (for example, where the enterprise leases the property to another person, other than in the case of an occasional bare boat lease as referred to in paragraph 5 of the Commentary on Article 8). In such a case, the capital will be covered by paragraph 2 or 4.

(Added on 28 January 2003; see HISTORY)

4.2 In their bilateral conventions, member countries are free to clarify further the application of Article 22 in this situation. They might adopt the following alternative version of paragraph 3 of the Article (see also paragraphs 28.1 and 28.2 of the Commentary on Article 13):

> 3. Capital represented by property forming part of the business property of an enterprise the place of effective management of which is situated in a Contracting State, and consisting of ships and aircraft operated by such enterprise in international traffic and of movable property pertaining to the operation of such ships and aircraft shall be taxable only in that State.

(Added on 28 January 2003; see HISTORY)

5. As regards elements of capital other than those listed in paragraphs 1 to 3, the Article provides that they are taxable only in the Contracting State of which the person to whom they belong is a resident (paragraph 4).

(Amended on 11 April 1977; see HISTORY)

6. If, when the provisions of paragraph 4 are applied to elements of movable property under usufruct, double taxation subsists because of the disparity between domestic laws, the States concerned may resort to the mutual agreement procedure or settle the question by means of bilateral negotiations.

(Amended on 11 April 1977; see HISTORY)

7. The Article does not provide any rule about the deductions of debts. The laws of OECD member countries are too different to allow a common solution for such a deduction. The problem of the deduction of debts which could arise when the taxpayer and the creditor are not residents of the same State is dealt with in paragraph 4 of Article 24.

(Amended on 23 July 1992; see HISTORY)

8. *(Renumbered and amended on 31 March 1994; see HISTORY)*

Reservations on the Article

9. *Finland* reserves the right to tax shares or other corporate rights in Finnish companies, where the ownership of such shares or other corporate rights entitles to the enjoyment of immovable property situated in Finland and held by the company.

(Amended on 23 July 1992; see HISTORY)

10. *New Zealand*, *Portugal* and *Turkey* reserve their positions on this Article if and when they impose taxes on capital.

(Amended on 23 July 1992; see HISTORY)

11. *France* can accept the provisions of paragraph 4 but wishes to retain the possibility of applying the provisions of its law relative to the taxation of shares or rights which are part of a substantial participation in a company which is a resident of France, or of shares or rights of companies the assets of which consist mainly of immovable property situated in France.

(Replaced on 23 July 1992; see HISTORY)

12. *Denmark*, *Norway* and *Sweden* reserve the right to insert special provisions regarding capital represented by aircraft operated in international traffic, when owned by the air transport consortium Scandinavian Airlines System (SAS).

(Added on 23 July 1992; see HISTORY)

13. *Spain* reserves its right to tax capital represented by shares or other rights in a company whose assets consist mainly of immovable property situated in Spain, by shares or other corporate rights which entitle its owner to a right of enjoyment of immovable property situated in Spain or by shares or other rights constituting a substantial participation in a company which is a resident of Spain.

(Added on 23 July 1992; see HISTORY)

14. In view of its particular situation in relation to shipping, *Greece* will retain its freedom of action with regard to the provisions in the Convention relating to capital represented by ships in international traffic and by movable property pertaining to the operation of such ships.

(Renumbered and amended on 31 March 1994; see HISTORY)

HISTORY

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. The Article deals with taxes on capital, to the exclusion of taxes on estates and inheritances and on donations and of transfer duties. Taxes on capital to which the Article applies are those specified in Article 2 concerning taxes covered by the Convention."

Paragraph 2: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. Taxes on capital generally constitute supplementary taxation of income from capital. Consequently, taxes on capital can be levied, in principle, only by the State which is entitled to tax the income from the capital. However, it is not possible to refer purely and simply to the rules relating to the taxation of the income, for not all income is subject to taxation exclusively in one State."

Paragraph 3: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 3 read as follows:

> "3. The Article, therefore, enumerates first property which may be taxed in the State in which they are situated. To this category belong immovable property referred to in Article 6 which a resident of a Contracting State owns and which is situated in the other Contracting State (paragraph 1), and movable property forming part of the business property of a permanent establishment which an enterprise of a Contracting State has in the other Contracting State, or pertaining to a fixed base which a resident of a Contracting State has in the other Contracting State for the performance of independent personal services (paragraph 2)."

Paragraph 3 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

> "3. The Article, therefore, enumerates first property and assets which may be taxed in the State in which they are situated. To this category belong immovable property, as defined in Article 6 on the taxation of income from immovable property, and movable property forming part of the business property employed in a permanent establishment of an enterprise, or pertaining to a fixed base used for the performance of professional services (paragraphs 1 and 2)."

Paragraph 3.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 3.2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 4: Amended on 28 January 2003, by adding the word "Normally" at the beginning of the paragraph, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 4 read as follows:

> "4. Ships and aircraft operated in international traffic and boats engaged in inland waterways transport and movable property pertaining to the operation of such ships, boats or aircraft shall be taxable only in the State in which the place of effective management of the enterprise is situated (paragraph 3). This rule corresponds to the provisions of Article 8 and of paragraph 3 of Article 13. It is understood that paragraph 3 of Article 8 is applicable if the place of effective management of a shipping enterprise or of an inland waterways transport enterprise is aboard a ship or boat. Contracting States which would prefer to confer the exclusive taxing right on the State of residence or to use a combination of the residence criterion and the place of effective management criterion are free in bilateral conventions to substitute for paragraph 3 a provision corresponding to those proposed in paragraphs 2 and 3 of the Commentary on Article 8. Immovable property pertaining to the operation of ships, boats or aircraft may be taxed in the State in which they are situated in accordance with the rule laid down in paragraph 1."

Paragraph 4 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

"4. Ships and aircraft operated in international traffic and boats engaged in inland waterways transport and assets, other than immovable property, pertaining to the operation of such ships, aircraft and boats are taxable only in the State in which the effective place of management of the enterprise is situated (paragraph 3). This rule is based on the provisions of Article 8 on taxation of income from shipping, inland waterways transport and air transport. It is understood that paragraph 3 of Article 8 concerning shipping, inland waterways transport and air transport, is applicable if the place of effective management of a shipping enterprise or of an inland waterways transport enterprise is aboard a ship or boat. Immovable property pertaining to the operation of ships, aircraft and boats, may be taxed in the State in which they are situated, in accordance with the rule laid down in paragraph 1."

Paragraph 4.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 4.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 5: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

"5. As regards other elements of capital than those listed in paragraphs 1 to 3, the Article provides that they are taxable only in the State of which the person to whom they belong is a resident (paragraph 4)."

Paragraph 6: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 6 read as follows:

"6. If, following the application of paragraph 4 to elements of movable property under usufruct, double taxation subsists because of the disparity between national laws, the States concerned may resort to the mutual agreement procedure or settle the question by means of bilateral negotiations."

Paragraph 7: Amended on 23 July 1992, by replacing the reference therein to paragraph 5 of Article 24 with a reference to paragraph 4 of that Article, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 7 read as follows:

"7. The Article does not provide any rule about the deductions of debts. The laws of OECD member countries are too different to allow a common solution for such a deduction. The problem of the deduction of debts which could arise when the taxpayer and the creditor are not residents of the same State is dealt with in paragraph 5 of Article 24."

Paragraph 7 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 8: Amended and renumbered on 31 March 1994 as paragraph 14 (see history of paragraph 14) by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. At the same time, the heading preceding paragraph 8 was deleted. In the 1977 Model Convention and until 31 March 1994, the heading preceding paragraph 8 read as follows:

"Special Derogation"

Paragraph 9: Amended on 23 July 1992, by substituting the word "held" for "owned", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 9 read as follows:

> "9. *Finland* reserves the right to tax shares or other corporate rights in Finnish companies, where the ownership of such shares or other corporate rights entitles to the enjoyment of immovable property situated in Finland and owned by the company."

Paragraph 9 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 10: Amended on 23 July 1992, by adding Turkey to the list of countries making the reservation, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 10 read as follows:

> "10. *New Zealand* and *Portugal* reserve their positions on this Article if and when they impose taxes on capital."

Paragraph 10 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 11: Replaced paragraph 11 as it read before 23 July 1992. Paragraph 11 of the 1977 Model Convention was deleted and a new paragraph 11 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 11 read as follows:

> "11. The *United Kingdom* reserves its position on this Article pending the introduction of a wealth tax."

Paragraph 11 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 12: Added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 13: Added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 14: Corresponds to paragraph 8 as it read before 31 March 1994. Paragraph 8 was amended and renumbered as paragraph 14 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 8 read as follows:

> "8. In view of its particular situation in relation to shipping, *Greece* will retain its freedom of action with regard to the provisions in the Convention relating to profits from the operation of ships in international traffic, to remuneration of crews of such ships, to capital represented by ships in international traffic and by movable property pertaining to the operation of such ships, and to capital gains from the alienation of such ships and assets."

Paragraph 8 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

COMMENTARY ON ARTICLES 23 A AND 23 B CONCERNING THE METHODS FOR ELIMINATION OF DOUBLE TAXATION

I. Preliminary remarks

A. The scope of the Articles

1. These Articles deal with the so-called juridical double taxation where the same income or capital is taxable in the hands of the same person by more than one State.

(Amended on 11 April 1977; see HISTORY)

2. This case has to be distinguished especially from the so-called economic double taxation, *i.e.* where two different persons are taxable in respect of the same income or capital. If two States wish to solve problems of economic double taxation, they must do so in bilateral negotiations.

(Amended on 11 April 1977; see HISTORY)

3. International juridical double taxation may arise in three cases:

a) where each Contracting State subjects the same person to tax on his worldwide income or capital (concurrent full liability to tax, see paragraph 4 below);

b) where a person is a resident of a Contracting State (R)[1] and derives income from, or owns capital in, the other Contracting State (S or E) and both States impose tax on that income or capital (see paragraph 5 below);

c) where each Contracting State subjects the same person, not being a resident of either Contracting State to tax on income derived from, or capital owned in, a Contracting State; this may result, for instance, in the case where a non-resident person has a permanent establishment in one Contracting State (E) through which he derives income from, or owns capital in, the other Contracting State (S) (concurrent limited tax liability, see paragraph 11 below).

(Amended on 29 April 2000; see HISTORY)

4. The conflict in case *a)* is reduced to that of case *b)* by virtue of Article 4. This is because that Article defines the term "resident of a Contracting State" by reference to the liability to tax of a person under domestic law by reason of

1 Throughout the Commentary on Articles 23 A and 23 B, the letter "R" stands for the State of residence within the meaning of the Convention, "S" for the State of source or situs, and "E" for the State where a permanent establishment is situated.

his domicile, residence, place of management or any other criterion of a similar nature (paragraph 1 of Article 4) and by listing special criteria for the case of double residence to determine which of the two States is the State of residence (R) within the meaning of the Convention (paragraphs 2 and 3 of Article 4).

(Replaced on 11 April 1977; see HISTORY)

4.1 Article 4, however, only deals with cases of concurrent full liability to tax. The conflict in case *a)* may therefore not be solved if the same item of income is subject to the full liability to tax of two countries but at different times. The following example illustrates that problem. Assume that a resident of State R1 derives a taxable benefit from an employee stock-option that is granted to that person. State R1 taxes that benefit when the option is granted. The person subsequently becomes a resident of State R2, which taxes the benefit at the time of its subsequent exercise. In that case, the person is taxed by each State at a time when he is a resident of that State and Article 4 does not deal with the issue as there is no concurrent residence in the two States.

(Added on 15 July 2005; see HISTORY)

4.2 The conflict in that situation will be reduced to that of case *b)* and solved accordingly to the extent that the employment services to which the option relates have been rendered in one of the Contracting States so as to be taxable by that State under Article 15 because it is the State where the relevant employment is exercised. Indeed, in such a case, the State in which the services have been rendered will be the State of source for purposes of elimination of double taxation by the other State. It does not matter that the first State does not levy tax at the same time (see paragraph 32.8). It also does not matter that that State considers that it levies tax as a State of residence as opposed to a State of source (see the last sentence of paragraph 8).

(Added on 15 July 2005; see HISTORY)

4.3 Where, however, the relevant employment services have not been rendered in either State, the conflict will not be one of source-residence double taxation. The mutual agreement procedure could be used to deal with such a case. One possible basis to solve the case would be for the competent authorities of the two States to agree that each State should provide relief as regards the residence-based tax that was levied by the other State on the part of the benefit that relates to services rendered during the period while the employee was a resident of that other State. Thus, in the above example, if the relevant services were rendered in a third State before the person became a resident of State R2, it would be logical for the competent authority of State R2 to agree to provide relief (either through the credit or exemption method) for the State R1 tax that has been levied on the part of the employment benefit

that relates to services rendered in the third State since, at the time when these services were rendered, the taxpayer was a resident of State R1 and not of State R2 for purposes of the convention between these two States.

(Added on 15 July 2005; see HISTORY)

5. The conflict in case *b)* may be solved by allocation of the right to tax between the Contracting States. Such allocation may be made by renunciation of the right to tax either by the State of source or situs (S) or of the situation of the permanent establishment (E), or by the State of residence (R), or by a sharing of the right to tax between the two States. The provisions of the Chapters III and IV of the Convention, combined with the provisions of Article 23 A or 23 B, govern such allocation.

(Amended on 29 April 2000; see HISTORY)

6. For some items of income or capital, an exclusive right to tax is given to one of the Contracting States, and the relevant Article states that the income or capital in question "shall be taxable only" in a Contracting State.[1] The words "shall be taxable only" in a Contracting State preclude the other Contracting State from taxing, thus double taxation is avoided. The State to which the exclusive right to tax is given is normally the State of which the taxpayer is a resident within the meaning of Article 4, that is State R, but in four Articles[2] the exclusive right may be given to the other Contracting State (S) of which the taxpayer is not a resident within the meaning of Article 4.

(Amended on 17 July 2008; see HISTORY)

7. For other items of income or capital, the attribution of the right to tax is not exclusive, and the relevant Article then states that the income or capital in question "may be taxed" in the Contracting State (S or E) of which the taxpayer is not a resident within the meaning of Article 4. In such case the State of residence (R) must give relief so as to avoid the double taxation. Paragraphs 1 and 2 of Article 23 A and paragraph 1 of Article 23 B are designed to give the necessary relief.

(Replaced on 11 April 1977; see HISTORY)

8. Article 23 A and 23 B apply to the situation in which a resident of State R derives income from, or owns capital in, the other Contracting State E or S (not being the State of residence within the meaning of the Convention) and

1 See first sentence of paragraph 1 of Article 7, paragraphs 1 and 2 of Article 8, paragraph 1 of Article 12, paragraphs 3 and 5 of Article 13, first sentence of paragraph 1 and paragraph 2 of Article 15, Article 18, paragraphs 1 and 2 of Article 19, paragraph 1 of Article 21 and paragraphs 3 and 4 of Article 22.

2 See paragraphs 1 and 2 of Article 8, paragraph 3 of Article 13, subparagraph *a)* of paragraphs 1 and 2 of Article 19 and paragraph 3 of Article 22.

that such income or capital, in accordance with the Convention, may be taxed in such other State E or S. The Articles, therefore, apply only to the State of residence and do not prescribe how the other Contracting State E or S has to proceed.

(Replaced on 11 April 1977; see HISTORY)

9. Where a resident of the Contracting State R derives income from the same State R through a permanent establishment which he has in the other Contracting State E, State E may tax such income (except income from immovable property situated in State R) if it is attributable to the said permanent establishment (paragraph 2 of Article 21). In this instance too, State R must give relief under Article 23 A or Article 23 B for income attributable to the permanent establishment situated in State E, notwithstanding the fact that the income in question originally arises in State R (see paragraph 5 of the Commentary on Article 21). However, where the Contracting States agree to give to State R which applies the exemption method a limited right to tax as the State of source of dividends or interest within the limits fixed in paragraph 2 of the Articles 10 or 11 (see paragraph 5 of the Commentary on Article 21), then the two States should also agree upon a credit to be given by State E for the tax levied by State R, along the lines of paragraph 2 of Article 23 A or of paragraph 1 of Article 23 B.

(Amended on 29 April 2000; see HISTORY)

10. Where a resident of State R derives income from a third State through a permanent establishment which he has in State E, such State E may tax such income (except income from immovable property situated in the third State) if it is attributable to such permanent establishment (paragraph 2 of Article 21). State R must give relief under Article 23 A or Article 23 B in respect of income attributable to the permanent establishment in State E. There is no provision in the Convention for relief to be given by Contracting State E for taxes levied in the third State where the income arises; however, under paragraph 3 of Article 24 any relief provided for in the domestic laws of State E (double taxation conventions excluded) for residents of State E is also to be granted to a permanent establishment in State E of an enterprise of State R (see paragraphs 67 to 72 of the Commentary on Article 24).

(Amended on 17 July 2008; see HISTORY)

11. The conflict in case *c)* of paragraph 3 above is outside the scope of the Convention as, under Article 1, it applies only to persons who are residents of one or both of the States. It can, however, be settled by applying the mutual

agreement procedure (see also paragraph 10 above).

(Replaced on 11 April 1977; see HISTORY)

B. *Description of methods for elimination of double taxation*

12. In the existing conventions, two leading principles are followed for the elimination of double taxation by the State of which the taxpayer is a resident. For purposes of simplicity, only income tax is referred to in what follows; but the principles apply equally to capital tax.

(Renumbered and amended on 11 April 1977; see HISTORY)

1. *The principle of exemption*

13. Under the principle of exemption, the State of residence R does not tax the income which according to the Convention may be taxed in State E or S (nor, of course, also income which shall be taxable only in State E or S; see paragraph 6 above).

(on 11 April 1977; see HISTORY)

14. The principle of exemption may be applied by two main methods:

a) the income which may be taxed in State E or S is not taken into account at all by State R for the purposes of its tax; State R is not entitled to take the income so exempted into consideration when determining the tax to be imposed on the rest of the income; this method is called "full exemption";

b) the income which may be taxed in State E or S is not taxed by State R, but State R retains the right to take that income into consideration when determining the tax to be imposed on the rest of the income; this method is called "exemption with progression".

(Renumbered and amended on 11 April 1977; see HISTORY)

2. *The principle of credit*

15. Under the principle of credit, the State of residence R calculates its tax on the basis of the taxpayer's total income including the income from the other State E or S which, according to the Convention, may be taxed in that other State (but not including income which shall be taxable only in State S; see paragraph 6 above). It then allows a deduction from its own tax for the tax paid in the other State.

(Renumbered and amended on 11 April 1977; see HISTORY)

16. The principle of credit may be applied by two main methods:

a) State R allows the deduction of the total amount of tax paid in the other State on income which may be taxed in that State, this method is called "full credit";

b) the deduction given by State R for the tax paid in the other State is restricted to that part of its own tax which is appropriate to the income which may be taxed in the other State; this method is called "ordinary credit".

(Renumbered and amended on 11 April 1977; see HISTORY)

17. Fundamentally, the difference between the methods is that the exemption methods look at income, while the credit methods look at tax.

(Renumbered and amended on 11 April 1977; see HISTORY)

C. *Operation and effects of the methods*

18. An example in figures will facilitate the explanation of the effects of the various methods. Suppose the total income to be 100,000, of which 80,000 is derived from one State (State of residence R) and 20,000 from the other State (State of source S). Assume that in State R the rate of tax on an income of 100,000 is 35 per cent and on an income of 80,000 is 30 per cent. Assume further that in State S the rate of tax is either 20 per cent — case (*i*) — or 40 per cent — case (*ii*) — so that the tax payable therein on 20,000 is 4,000 in case (*i*) or 8,000 in case *(ii)*, respectively.

(Renumbered and amended on 11 April 1977; see HISTORY)

19. If the taxpayer's total income of 100,000 arises in State R, his tax would be 35,000. If he had an income of the same amount, but derived in the manner set out above, and if no relief is provided for in the domestic laws of State R and no conventions exists between State R and State S, then the total amount of tax would be, in case (*i*): 35,000 plus 4,000 = 39,000, and in case (*ii*): 35,000 plus 8,000 = 43,000.

(Renumbered and amended on 11 April 1977; see HISTORY)

1. *Exemption methods*

20. Under the exemption methods, State R limits its taxation to that part of the total income which, in accordance with the various Articles of the Convention, it has a right to tax, *i.e.* 80,000.

a) Full exemption

State R imposes tax on 80,000 at the rate of tax applicable to 80,000, *i.e.* at 30 per cent.

	Case (*i*)	Case (*ii*)
Tax in State R, 30% of 80,000	24,000	24,000
Plus tax in State S	4,000	8,000
Total taxes	28,000	32,000
Relief has been given by State R in the amount of	11,000	11,000

b) Exemption with progression

State R imposes tax on 80,000 at the rate of tax applicable to total income wherever it arises (100,000), *i.e.* at 35 per cent.

	Case (*i*)	Case (*ii*)
Tax in State R, 35% of 80,000	28,000	28,000
Plus tax in State S	4,000	8,000
Total taxes	32,000	36,000
Relief has been given by State R in the amount of	7,000	7,000

(Renumbered and amended on 11 April 1977; see HISTORY)

21. In both cases, the level of tax in State S does not affect the amount of tax given up by State R. If the tax on the income from State S is lower in State S than the relief to be given by State R — cases *a (i)*, *a (ii)*, and *b (i)* — then the taxpayer will fare better than if his total income were derived solely from State R. In the converse case — case *b (ii)* — the taxpayer will be worse off.

(Replaced on 11 April 1977; see HISTORY)

22. The example shows also that the relief given where State R applies the full exemption method may be higher than the tax levied in State S, even if the rates of tax in State S are higher than those in State R. This is due to the fact that under the full exemption method, not only the tax of State R on the income from State S is surrendered (35 per cent of 20,000 = 7,000; as under the exemption with progression), but that also the tax on remaining income (80,000) is reduced by an amount corresponding to the differences in rates at the two income levels in State R (35 less 30 = 5 per cent applied to 80,000 = 4,000).

(Replaced on 11 April 1977; see HISTORY)

2. *Credit methods*

23. Under the credit methods, State R retains its right to tax the total income of the taxpayer, but against the tax so imposed, it allows a deduction.

a) Full credit

State R computes tax on total income of 100,000 at the rate of 35 per cent and allows the deduction of the tax due in State S on the income from S.

	Case (*i*)	Case (*ii*)
Tax in State R, 35% of 100,000	35,000	35,000
less tax in State S	- 4,000	- 8,000
Tax due	31,000	27,000
Total taxes	35,000	35,000
Relief has been given by State R in the amount of	4,000	8,000

b) Ordinary credit

State R computes tax on total income of 100,000 at the rate of 35 per cent and allows the deduction of the tax due in State S on the income from S, but in no case it allows more than the portion of tax in State R attributable to the income from S (maximum deduction). The maximum deduction would be 35 per cent of 20,000 = 7,000.

	Case (*i*)	Case (*ii*)
Tax in State R, 35% of 100,000	35,000	35,000
less tax in State S	- 4,000	
less maximum tax		- 7,000
Tax due	31,000	28,000
Total taxes	35,000	36,000
Relief has been given by State R in the amount of	4,000	7,000

(Amended on 23 July 1992; see HISTORY)

C (23)

24. A characteristic of the credit methods compared with the exemption methods is that State R is never obliged to allow a deduction of more than the tax due in State S.

(Renumbered and amended on 11 April 1977; see HISTORY)

25. Where the tax due in State S is lower than the tax of State R appropriate to the income from State S (maximum deduction), the taxpayer will always have to pay the same amount of taxes as he would have had to pay if he were taxed only in State R, *i.e.* as if his total income were derived solely from State R.

(Renumbered and amended on 11April 1977; see HISTORY)

26. The same result is achieved, where the tax due in State S is the higher while State R applies the full credit, at least as long as the total tax due to State R is as high or higher than the amount of the tax due in State S.

(Renumbered and amended on 11 April 1977; see HISTORY)

27. Where the tax due in State S is higher and where the credit is limited (ordinary credit), the taxpayer will not get a deduction for the whole of the tax paid in State S. In such event the result would be less favourable to the taxpayer than if his whole income arose in State R, and in these circumstances the ordinary credit method would have the same effect as the method of exemption with progression.

Table 23-1 Total amount of tax in the different cases illustrated above

A. All income arising in State R	Total tax = 35,000	
B. Income arising in two States, *viz.* 80,000 in State R and 20,000 in State S	Total tax if tax in State S is	
	4,000 (case *(i)*)	8,000 (case *(ii)*)
No convention (19)[1]	39,000	43,000
Full exemption (20*a*)	28,000	32,000
Exemption with progression (20*b*)	32,000	36,000
Full credit (23*a*)	35,000	35,000
Ordinary credit (23*b*)	35,000	36,000

1. Numbers in brackets refer to paragraphs in this Commentary.

Table 23-2 Amount of tax given up by the state of residence

	If tax in State S is	
	4,000 (case *(i)*)	8,000 (case *(ii)*)
No convention	0	0
Full exemption (20*a*)[1]	11,000	11,000
Exemption with progression (20*b*)	7,000	7,000
Full credit (23*a*)	4,000	8,000
Ordinary credit (23*b*)	4,000	7,000

1. Numbers in brackets refer to paragraphs in this Commentary.

(Renumbered and amended on 11 April 1977; see HISTORY)

D. *The methods proposed in the Articles*

28. In the conventions concluded between OECD member countries both leading principles have been followed. Some States have a preference for the first one, some for the other. Theoretically a single principle could be held to be more desirable, but, on account of the preferences referred to, each State has been left free to make its own choice.

(Renumbered and amended on 11 April 1977; see HISTORY)

29. On the other hand, it has been found important to limit the number of methods based on each leading principle to be employed. In view of this limitation, the Articles have been drafted so that member countries are left free to choose between two methods:

— the exemption method with progression (Article 23 A), and

— the ordinary credit method (Article 23 B).

(Renumbered and amended on 11 April 1977; see HISTORY)

30. If two Contracting States both adopt the same method, it will be sufficient to insert the relevant Article in the convention. On the other hand, if the two Contracting States adopt different methods, both Articles may be amalgamated in one, and the name of the State must be inserted in each appropriate part of the Article, according to the method adopted by that State.

(Amended on 11 April 1977; see HISTORY)

31. Contracting States may use a combination of the two methods. Such combination is indeed necessary for a Contracting State R which generally adopts the exemption method in the case of income which under Articles 10 and 11 may be subjected to a limited tax in the other Contracting State S. For such case, Article 23 A provides in paragraph 2 a credit for the limited tax levied in the other Contracting State S (adjustments to paragraphs 1 and 2 of Article 23 A may, however, be required in the case of distributions from Real Estate Investment Trusts (REITs) where provisions similar to those referred to in paragraphs 67.1 to67.7 of the Commentary on Article 10 have been adopted by the Contracting States). Moreover, States which in general adopt the exemption method may wish to exclude specific items of income from exemption and to apply to such items the credit method. In such case, paragraph 2 of Article 23 A could be amended to include these items of income.

(Amended on 17 July 2008; see HISTORY)

31.1 One example where paragraph 2 could be so amended is where a State that generally adopts the exemption method considers that that method should not apply to items of income that benefit from a preferential tax

treatment in the other State by reason of a tax measure that has been introduced in that State after the date of signature of the Convention. In order to include these items of income, paragraph 2 could be amended as follows:

2. Where a resident of a Contracting State derives an item of income which

a) in accordance with the provisions of Articles 10 and 11, may be taxed in the other Contracting State, or

b) in accordance with the provisions of this Convention, may be taxed in the other Contracting State but which benefits from a preferential tax treatment in that other State by reason of a tax measure

(i) that has been introduced in the other Contracting State after the date of signature of the Convention, and

(ii) in respect of which that State has notified the competent authorities of the other Contracting State, before the item of income is so derived and after consultation with that other State, that this paragraph shall apply,

the first-mentioned State shall allow as a deduction from the tax on the income of that resident an amount equal to the tax paid in that other State. Such deduction shall not, however, exceed that part of the tax, as computed before the deduction is given, which is attributable to such item of income derived from that other State.

(Added on 28 January 2003; see HISTORY)

32. The two Articles are drafted in a general way and do not give detailed rules on how the exemption or credit is to be computed, this being left to the domestic laws and practice applicable. Contracting States which find it necessary to settle any problem in the Convention itself are left free to do so in bilateral negotiations.

(Replaced on 11 April 1977; see HISTORY)

E. Conflicts of qualification

32.1 Both Articles 23 A and 23 B require that relief be granted, through the exemption or credit method, as the case may be, where an item of income or capital may be taxed by the State of source in accordance with the provisions of the Convention. Thus, the State of residence has the obligation to apply the exemption or credit method in relation to an item of income or capital where the Convention authorises taxation of that item by the State of source.

(Added on 29 April 2000; see HISTORY)

32.2 The interpretation of the phrase "in accordance with the provisions of this Convention, may be taxed", which is used in both Articles, is particularly

important when dealing with cases where the State of residence and the State of source classify the same item of income or capital differently for purposes of the provisions of the Convention.

(Added on 29 April 2000; see HISTORY)

32.3 Different situations need to be considered in that respect. Where, due to differences in the domestic law between the State of source and the State of residence, the former applies, with respect to a particular item of income or capital, provisions of the Convention that are different from those that the State of residence would have applied to the same item of income or capital, the income is still being taxed in accordance with the provisions of the Convention, as interpreted and applied by the State of source. In such a case, therefore, the two Articles require that relief from double taxation be granted by the State of residence notwithstanding the conflict of qualification resulting from these differences in domestic law.

(Added on 29 April 2000; see HISTORY)

32.4 This point may be illustrated by the following example. A business is carried on through a permanent establishment in State E by a partnership established in that State. A partner, resident in State R, alienates his interest in that partnership. State E treats the partnership as fiscally transparent whereas State R treats it as taxable entity. State E therefore considers that the alienation of the interest in the partnership is, for the purposes of its Convention with State R, an alienation by the partner of the underlying assets of the business carried on by the partnership, which may be taxed by that State in accordance with paragraph 1 or 2 of Article 13. State R, as it treats the partnership as a taxable entity, considers that the alienation of the interest in the partnership is akin to the alienation of a share in a company, which could not be taxed by State E by reason of paragraph 5 of Article 13. In such a case, the conflict of qualification results exclusively from the different treatment of partnerships in the domestic laws of the two States and State E must be considered by State R to have taxed the gain from the alienation "in accordance with the provisions of the Convention" for purposes of the application of Article 23 A or Article 23 B. State R must therefore grant an exemption pursuant to Article 23 A or give a credit pursuant to Article 23 B irrespective of the fact that, under its own domestic law, it treats the alienation gain as income from the disposition of shares in a corporate entity and that, if State E's qualification of the income were consistent with that of State R, State R would not have to give relief under Article 23 A or Article 23 B. No double taxation will therefore arise in such a case.

(Amended on 28 January 2003; see HISTORY)

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

32.5 Article 23 A and Article 23 B, however, do not require that the State of residence eliminate double taxation in all cases where the State of source has imposed its tax by applying to an item of income a provision of the Convention that is different from that which the State of residence considers to be applicable. For instance, in the example above, if, for purposes of applying paragraph 2 of Article 13, State E considers that the partnership carried on business through a fixed place of business but State R considers that paragraph 5 applies because the partnership did not have a fixed place of business in State E, there is actually a dispute as to whether State E has taxed the income in accordance with the provisions of the Convention. The same may be said if State E, when applying paragraph 2 of Article 13, interprets the phrase "forming part of the business property" so as to include certain assets which would not fall within the meaning of that phrase according to the interpretation given to it by State R. Such conflicts resulting from different interpretation of facts or different interpretation of the provisions of the Convention must be distinguished from the conflicts of qualification described in the above paragraph where the divergence is based not on different interpretations of the provisions of the Convention but on different provisions of domestic law. In the former case, State R can argue that State E has not imposed its tax in accordance with the provisions of the Convention if it has applied its tax based on what State R considers to be a wrong interpretation of the facts or a wrong interpretation of the Convention. States should use the provisions of Article 25 (Mutual Agreement Procedure), and in particular paragraph 3 thereof, in order to resolve this type of conflict in cases that would otherwise result in unrelieved double taxation.

(Amended on 28 January 2003; see HISTORY)

32.6 The phrase "in accordance with the provisions of this Convention, may be taxed" must also be interpreted in relation to possible cases of double non-taxation that can arise under Article 23 A. Where the State of source considers that the provisions of the Convention preclude it from taxing an item of income or capital which it would otherwise have had the right to tax, the State of residence should, for purposes of applying paragraph 1 of Article 23 A, consider that the item of income may not be taxed by the State of source in accordance with the provisions of the Convention, even though the State of residence would have applied the Convention differently so as to have the right to tax that income if it had been in the position of the State of source. Thus the State of residence is not required by paragraph 1 to exempt the item of income, a result which is consistent with the basic function of Article 23 which is to eliminate double taxation.

(Amended on 17 July 2008; see HISTORY)

32.7 This situation may be illustrated by reference to a variation of the example described above. A business is carried on through a fixed place of business in State E by a partnership established in that State and a partner, resident in State R, alienates his interest in that partnership. Changing the facts of the example, however, it is now assumed that State E treats the partnership as a taxable entity whereas State R treats it as fiscally transparent; it is further assumed that State R is a State that applies the exemption method. State E, as it treats the partnership as a corporate entity, considers that the alienation of the interest in the partnership is akin to the alienation of a share in a company, which it cannot tax by reason of paragraph 5 of Article 13. State R, on the other hand, considers that the alienation of the interest in the partnership should have been taxable by State E as an alienation by the partner of the underlying assets of the business carried on by the partnership to which paragraphs 1 or 2 of Article 13 would have been applicable. In determining whether it has the obligation to exempt the income under paragraph 1 of Article 23 A, State R should nonetheless consider that, given the way that the provisions of the Convention apply in conjunction with the domestic law of State E, that State may not tax the income in accordance with the provisions of the Convention. State R is thus under no obligation to exempt the income.

(Amended on 28 January 2003; see HISTORY)

F. *Timing mismatch*

32.8 The provisions of the Convention that allow the State of source to tax particular items of income or capital do not provide any restriction as to when such tax is to be levied (see, for instance, paragraph 2.2 of the Commentary on Article 15). Since both Articles 23 A and 23 B require that relief be granted where an item of income or capital may be taxed by the State of source in accordance with the provisions of the Convention, it follows that such relief must be provided regardless of when the tax is levied by the State of source. The State of residence must therefore provide relief of double taxation through the credit or exemption method with respect to such item of income or capital even though the State of source taxes it in an earlier or later year. Some States, however, do not follow the wording of Article 23 A or 23 B in their bilateral conventions and link the relief of double taxation that they give under tax conventions to what is provided under their domestic laws. These countries, however, would be expected to seek other ways (the mutual agreement procedure, for example) to relieve the double taxation which might otherwise arise in cases where the State of source levies tax in a different taxation year.

(Added on 15 July 2005; see HISTORY)

II. Commentary on the provisions of Article 23 A (exemption method)

Paragraph 1

A. The obligation of the State of residence to give exemption

33. In the Article it is laid down that the State of residence R shall exempt from tax income and capital which in accordance with the Convention "may be taxed" in the other State E or S.

(Renumbered and amended on 11 April 1977; see HISTORY)

34. The State of residence must accordingly exempt income and capital which may be taxed by the other State in accordance with the Convention whether or not the right to tax is in effect exercised by that other State. This method is regarded as the most practical one since it relieves the State of residence from undertaking investigations of the actual taxation position in the other State.

(Amended on 29 April 2000; see HISTORY)

34.1 The obligation imposed on the State of residence to exempt a particular item of income or capital depends on whether this item may be taxed by the State of source in accordance with the Convention. Paragraphs 32.1 to 32.7 above discuss how this condition should be interpreted. Where the condition is met, however, the obligation may be considered as absolute, subject to the exceptions of paragraphs 2 and 4 of Article 23 A. Paragraph 2 addresses the case, already mentioned in paragraph 31 above, of items of income which may only be subjected to a limited tax in the State of source. For such items of income, the paragraph provides for the credit method (see paragraph 47 below). Paragraph 4 addresses the case of certain conflicts of qualification which would result in double non-taxation as a consequence of the application of the Convention if the State of residence were obliged to give exemption (see paragraphs 56.1 to 56.3 below).

(Added on 29 April 2000; see HISTORY)

C (23)

35. Occasionally, negotiating States may find it reasonable in certain circumstances, in order to avoid double non-taxation, to make an exception to the absolute obligation on the State of residence to give exemption in cases where neither paragraph 3 or 4 would apply. Such may be the case where no tax on specific items of income or capital is provided under the domestic laws of the State of source, or tax is not effectively collected owing to special circumstances such as the set-off of losses, a mistake, or the statutory time limit having expired. To avoid such double non-taxation of specific items of income, Contracting States may agree to amend the relevant Article itself (see

paragraph 9 of the Commentary on Article 15 and paragraph 12 of the Commentary on Article 17; for the converse case where relief in the State of source is subject to actual taxation in the State of residence, see paragraph 20 of the Commentary on Article 10, paragraph 10 of the Commentary on Article 11, paragraph 6 of the Commentary on Article 12, paragraph 21 of the Commentary on Article 13 and paragraph 3 of the Commentary on Article 21). One might also make an exception to the general rule, in order to achieve a certain reciprocity, where one of the States adopts the exemption method and the other the credit method. Finally, another exception to the general rule may be made where a State wishes to apply to specific items of income the credit method rather than exemption (see paragraph 31 above).

(Amended on 29 April 2000; see HISTORY)

36. *(Deleted on 29 April 2000; see HISTORY)*

B. *Alternative formulation of the Article*

37. An effect of the exemption method as it is drafted in the Article is that the taxable income or capital in the State of residence is reduced by the amount exempted in that State. If in a particular State the amount of income as determined for income tax purposes is used as a measure for other purposes, *e.g.* social benefits, the application of the exemption method in the form proposed may have the effect that such benefits may be given to persons who ought not to receive them. To avoid such consequences, the Article may be altered so that the income in question is included in the taxable income in the State of residence. The State of residence must, in such cases, give up that part of the total tax appropriate to the income concerned. This procedure would give the same result as the Article in the form proposed. States can be left free to make such modifications in the drafting of the Article. If a State wants to draft the Article as indicated above, paragraph 1 may be drafted as follows:

> Where a resident of a Contracting State derives income or owns capital which, in accordance with the provisions of this Convention, shall be taxable only or may be taxed in the other Contracting State, the first-mentioned State shall, subject to the provisions of paragraph 2, allow as a deduction from the income tax or capital tax that part of the income tax or capital tax, respectively, which is applicable, as the case may be, to the income derived from or the capital owned in that other State.

If the Article is so drafted, paragraph 3 would not be necessary and could be omitted.

(Amended on 11 April 1977; see HISTORY)

C. *Miscellaneous problems*

38. Article 23 A contains the principle that the State of residence has to give exemption, but does not give detailed rules on how the exemption has to be implemented. This is consistent with the general pattern of the Convention. Articles 6 to 22 too lay down rules attributing the right to tax in respect of the various types of income or capital without dealing, as a rule, with the determination of taxable income or capital, deductions, rate of tax, etc. (see, however, Article 24). Experience has shown that many problems may arise. This is especially true with respect to Article 23 A. Some of them are dealt with in the following paragraphs. In the absence of a specific provision in the Convention, the domestic laws of each Contracting State are applicable. Some conventions contain an express reference to the domestic laws but of course this would not help where the exemption method is not used in the domestic laws. In such cases, Contracting States which face this problem should establish rules for the application of Article 23 A, if necessary, after having consulted with the competent authority of the other Contracting State (paragraph 3 of Article 25).

(Amended on 22 July 2010; see HISTORY)

1. *Amount to be exempted*

39. The amount of income to be exempted from tax by the State of residence is the amount which, but for the Convention, would be subjected to domestic income tax according to the domestic laws governing such tax. It may, therefore, differ from the amount of income subjected to tax by the State of source according to its domestic laws.

(Replaced on 11 April 1977; see HISTORY)

40. Normally, the basis for the calculation of income tax is the total net income, *i.e.* gross income less allowable deductions. Therefore, it is the gross income derived from the State of source less any allowable deductions (specified or proportional) connected with such income which is to be exempted.

(Replaced on 11 July 1977; see HISTORY)

41. Problems arise from the fact that most countries provide in their respective taxation laws for additional deductions from total income or

specific items of income to arrive at the income subject to tax. A numerical example may illustrate the problem:

a)	Domestic income (gross less allowable expenses)	100
b)	Income from the other State (gross less allowable expenses)	100
c)	Total income	200
d)	Deductions for other expenses provided for under the laws of the State of residence which are not connected with any of the income under *a* or *b*, such as insurance premiums, contributions to welfare institutions	-20
e)	"Net" income	180
f)	Personal and family allowances	-30
g)	Income subject to tax	150

The question is, what amount should be exempted from tax, *e.g.*

— 100 (line *b)*, leaving a taxable amount of 50;

— 90 (half of line *e*, according to the ratio between line *b* and line *c)*, leaving 60 (line *f* being fully deducted from domestic income);

— 75 (half of line *g*, according to the ratio between line *b* and line *c)*, leaving 75;

— or any other amount.

(Replaced on 11 April 1977; see HISTORY)

42. A comparison of the laws and practices of the OECD member countries shows that the amount to be exempted varies considerably from country to country. The solution adopted by a State will depend on the policy followed by that State and its tax structure. It may be the intention of a State that its residents always enjoy the full benefit of their personal and family allowances and other deductions. In other States these tax free amounts are apportioned. In many States personal or family allowances form part of the progressive scale, are granted as a deduction from tax, or are even unknown, the family status being taken into account by separate tax scales.

(Replaced on 11 April 1977; see HISTORY)

43. In view of the wide variety of fiscal policies and techniques in the different States regarding the determination of tax, especially deductions, allowances and similar benefits, it is preferable not to propose an express and uniform solution in the Convention, but to leave each State free to apply its own legislation and technique. Contracting States which prefer to have special problems solved in their convention are, of course, free to do so in bilateral negotiations. Finally, attention is drawn to the fact that the problem is also of importance for States applying the credit method (see paragraph 62 below).

(Replaced on 11 April 1977; see HISTORY)

2. *Treatment of losses*

44. Several States in applying Article 23 A treat losses incurred in the other State in the same manner as they treat income arising in that State: as State of residence (State R), they do not allow deduction of a loss incurred from immovable property or a permanent establishment situated in the other State (E or S). Provided that this other State allows carry-over of such loss, the taxpayer will not be at any disadvantage as he is merely prevented from claiming a double deduction of the same loss namely in State E (or S) and in State R. Other States may, as State of residence R, allow a loss incurred in State E (or S) as a deduction from the income they assess. In such a case State R should be free to restrict the exemption under paragraph 1 of Article 23 A for profits or income which are made subsequently in the other State E (or S) by deducting from such subsequent profits or income the amount of earlier losses which the taxpayer can carry over in State E (or S). As the solution depends primarily on the domestic laws of the Contracting States and as the laws of the OECD member countries differ from each other substantially, no solution can be proposed in the Article itself, it being left to the Contracting States, if they find it necessary, to clarify the above-mentioned question and other problems connected with losses (see paragraph 62 below for the credit method) bilaterally, either in the Article itself or by way of a mutual agreement procedure (paragraph 3 of Article 25).

(Renumbered and amended on 11 April 1977; see HISTORY)

3. *Taxation of the rest of the income*

45. Apart from the application of progressive tax rates which is now dealt with in paragraph 3 of the Article (see paragraphs 55 and 56 below), some problems may arise from specific provisions of the tax laws. Thus, *e.g.* some tax laws provide that taxation starts only if a minimum amount of taxable income is reached or exceeded (tax exempt threshold). Total income before application of the Convention may clearly exceed such tax free threshold, but by virtue of the exemption resulting from the application of the Convention which leads to a deduction of the tax exempt income from total taxable income, the remaining taxable income may be reduced to an amount below this threshold. For the reasons mentioned in paragraph 43 above, no uniform solution can be proposed. It may be noted, however, that the problem will not arise, if the alternative formulation of paragraph 1 of Article 23 A (as set out in paragraph 37 above) is adopted.

(Replaced on 11 April 1977; see HISTORY)

46. Certain States have introduced special systems for taxing corporate income (see paragraphs 40 to 67 of the Commentary on Article 10). In States

applying a split rate corporation tax (paragraph 43 of the said Commentary), the problem may arise whether the income to be exempted has to be deducted from undistributed income (to which the normal rate of tax applies) or from distributed income (to which the reduced rate applies) or whether the income to be exempted has to be attributed partly to distributed and partly to undistributed income. Where, under the laws of a State applying the split rate corporation tax, a supplementary tax is levied in the hands of a parent company on dividends which it received from a domestic subsidiary company but which it does not redistribute (on the grounds that such supplementary tax is a compensation for the benefit of a lower tax rate granted to the subsidiary on the distributions), the problem arises, whether such supplementary tax may be charged where the subsidiary pays its dividends out of income exempt from tax by virtue of the Convention. Finally a similar problem may arise in connection with taxes (*précompte*, Advance Corporation Tax) which are levied on distributed profits of a corporation in order to cover the tax credit attributable to the shareholders (see paragraph 47 of the Commentary on Article 10). The question is whether such special taxes connected with the distribution of profits, could be levied insofar as distributions are made out of profits exempt from tax. It is left to Contracting States to settle these questions by bilateral negotiations.

(Amended on 23 July 1992; see HISTORY)

Paragraph 2

47. In Articles 10 and 11 the right to tax dividends and interest is divided between the State of residence and the State of source. In these cases, the State of residence is left free not to tax if it wants to do so (see *e.g.* paragraphs 72 to 78 below) and to apply the exemption method also to the above-mentioned items of income. However, where the State of residence prefers to make use of its right to tax such items of income, it cannot apply the exemption method to eliminate the double taxation since it would thus give up fully its right to tax the income concerned. For the State of residence, the application of the credit method would normally seem to give a satisfactory solution. Moreover, as already indicated in paragraph 31 above, States which in general apply the exemption method may wish to apply to specific items of income the credit method rather than exemption. Consequently, the paragraph is drafted in accordance with the ordinary credit method. The Commentary on Article 23 B hereafter applies *mutatis mutandis* to paragraph 2 of Article 23 A.

(Amended on 23 July 1992; see HISTORY)

48. In the cases referred to in the previous paragraph, certain maximum percentages are laid down for tax reserved to the State of source. In such

cases, the rate of tax in the State of residence will very often be higher than the rate in the State of source. The limitation of the deduction which is laid down in the second sentence of paragraph 2 and which is in accordance with the ordinary credit method is therefore of consequence only in a limited number of cases. If, in such cases, the Contracting States prefer to waive the limitation and to apply the full credit method, they can do so by deleting the second sentence of paragraph 2 (see also paragraph 63 below).

(Renumbered and amended on 11 April 1977; see HISTORY)

Dividends from substantial holdings by a company

49. The combined effect of paragraphs 1 and 2 of Article 10 and Article 23 (Article 23 A and 23 B as appropriate) is that the State of residence of the shareholder is allowed to tax dividends arising in the other State, but that it must credit against its own tax on such dividends the tax which has been collected by the State where the dividends arise at a rate fixed under paragraph 2 of Article 10. This regime equally applies when the recipient of the dividends is a parent company receiving dividends from a subsidiary; in this case, the tax withheld in the State of the subsidiary — and credited in the State of the parent company — is limited to 5 per cent of the gross amount of the dividends by the application of subparagraph *a)* of paragraph 2 of Article 10.

(Replaced on 11 April 1977; see HISTORY)

50. These provisions effectively avoid the juridical double taxation of dividends but they do not prevent recurrent corporate taxation on the profits distributed to the parent company: first at the level of the subsidiary and again at the level of the parent company. Such recurrent taxation creates a very important obstacle to the development of international investment. Many States have recognised this and have inserted in their domestic laws provisions designed to avoid this obstacle. Moreover, provisions to this end are frequently inserted in double taxation conventions.

(Replaced on 11 April 1977; see HISTORY)

51. The Committee on Fiscal Affairs has considered whether it would be appropriate to modify Article 23 of the Convention in order to settle this question. Although many States favoured the insertion of such a provision in the Model Convention this met with many difficulties, resulting from the diverse opinions of States and the variety of possible solutions. Some States, fearing tax evasion, preferred to maintain their freedom of action and to settle the question only in their domestic laws.

(Replaced on 11 April 1977; see HISTORY)

52. In the end, it appeared preferable to leave States free to choose their own solution to the problem. For States preferring to solve the problem in their conventions, the solutions would most frequently follow one of the principles below:

a) *Exemption with progression*

The State of which the parent company is a resident exempts the dividends it receives from its subsidiary in the other State, but it may nevertheless take these dividends into account in computing the tax due by the parent company on the remaining income (such a provision will frequently be favoured by States applying the exemption method specified in Article 23 A).

b) *Credit for underlying taxes*

As regards dividends received from the subsidiary, the State of which the parent company is a resident gives credit as provided for in paragraph 2 of Article 23 A or in paragraph 1 of Article 23 B, as appropriate, not only for the tax on dividends as such, but also for the tax paid by the subsidiary on the profits distributed (such a provision will frequently be favoured by States applying as a general rule the credit method specified in Article 23 B).

c) *Assimilation to a holding in a domestic subsidiary*

The dividends that the parent company derives from a foreign subsidiary are treated, in the State of the parent company, in the same way for tax purposes as dividends received from a subsidiary which is a resident of that State.

(Replaced on 11 April 1977; see HISTORY)

53. When the State of the parent company levies taxes on capital, a similar solution should also be applied to such taxes.

(Added on 11 April 1977; see HISTORY)

54. Moreover, States are free to fix the limits and methods of application of these provisions (definition and minimum duration of holding of the shares, proportion of the dividends deemed to be taken up by administrative or financial expenses) or to make the relief granted under the special regime subject to the condition that the subsidiary is carrying out a genuine economic activity in the State of which it is a resident, or that it derives the major part of its income from that State or that it is subject to a substantial taxation on profits therein.

(Added on 11 April 1977; see HISTORY)

Paragraph 3

55. The 1963 Draft Convention reserved expressly the application of the progressive scale of tax rates by the State of residence (last sentence of paragraph 1 of Article 23 A) and most conventions concluded between OECD member countries which adopt the exemption method follow this principle. According to paragraph 3 of Article 23 A, the State of residence retains the right to take the amount of exempted income or capital into consideration when determining the tax to be imposed on the rest of the income or capital. The rule applies even where the exempted income (or items of capital) and the taxable income (or items of capital) accrue to those persons (*e.g.* husband and wife) whose incomes (or items of capital) are taxed jointly according to the domestic laws. This principle of progression applies to income or capital exempted by virtue of paragraph 1 of Article 23 A as well as to income or capital which under any other provision of the Convention "shall be taxable only" in the other Contracting State (see paragraph 6 above). This is the reason why, in the 1977 Model Convention, the principle of progression was transferred from paragraph 1 of Article 23 A to a new paragraph 3 of the said Article, and reference was made to exemption "in accordance with any provision of the Convention".

(Amended on 23 July 1992; see HISTORY)

56. paragraph 3 of Article 23 A relates only to the State of residence. The form of the Article does not prejudice the application by the State of source of the provisions of its domestic laws concerning the progression.

(Added on 11 April 1977; see HISTORY)

Paragraph 4

56.1 The purpose of this paragraph is to avoid double non taxation as a result of disagreements between the State of residence and the State of source on the facts of a case or on the interpretation of the provisions of the Convention. The paragraph applies where, on the one hand, the State of source interprets the facts of a case or the provisions of the Convention in such a way that an item of income or capital falls under a provision of the Convention that eliminates its right to tax that item or limits the tax that it can impose while, on the other hand, the State of residence adopts a different interpretation of the facts or of the provisions of the Convention and thus considers that the item may be taxed in the State of source in accordance with the Convention, which, absent this paragraph, would lead to an obligation for the State of residence to give exemption under the provisions of paragraph 1.

(Added on 29 April 2000; see HISTORY)

56.2 The paragraph only applies to the extent that the State of source has applied the provisions of the Convention to exempt an item of income or capital or has applied the provisions of paragraph 2 of Article 10 or 11 to an item of income. The paragraph would therefore not apply where the State of source considers that it may tax an item of income or capital in accordance with the provisions of the Convention but where no tax is actually payable on such income or capital under the provisions of the domestic laws of the State of source. In such a case, the State of residence must exempt that item of income under the provisions of paragraph 1 because the exemption in the State of source does not result from the application of the provisions of the Convention but, rather, from the domestic law of the State of source (see paragraph 34 above). Similarly, where the source and residence States disagree not only with respect to the qualification of the income but also with respect to the amount of such income, paragraph 4 applies only to that part of the income that the State of source exempts from tax through the application of the Convention or to which that State applies paragraph 2 of Article 10 or 11.

(Added on 29 April 2000; see HISTORY)

56.3 Cases where the paragraph applies must be distinguished from cases where the qualification of an item of income under the domestic law of the State of source interacts with the provisions of the Convention to preclude that State from taxing an item of income or capital in circumstances where the qualification of that item under the domestic law of the State of residence would not have had the same result. In such a case, which is discussed in paragraphs 32.6 and 32.7 above, paragraph 1 does not impose an obligation on the State of residence to give exemption because the item of income may not be taxed in the State of source in accordance with the Convention. Since paragraph 1 does not apply, the provisions of paragraph 4 are not required in such a case to ensure the taxation right of the State of residence.

(Added on 29 April 2000; see HISTORY)

III. Commentary on the provisions of Article 23 B (credit method)

Paragraph 1

A. Methods

57. Article 23 B, based on the credit principle, follows the ordinary credit method: the State of residence (R) allows, as a deduction from its own tax on the income or capital of its resident, an amount equal to the tax paid in the other State E (or S) on the income derived from, or capital owned in, that other

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

State E (or S), but the deduction is restricted to the appropriate proportion of its own tax.

(Renumbered and amended on 11 April 1977; see HISTORY)

58. The ordinary credit method is intended to apply also for a State which follows the exemption method but has to give credit, under paragraph 2 of Article 23 A, for the tax levied at limited rates in the other State on dividends and interest (see paragraph 47 above). The possibility of some modification as mentioned in paragraphs 47 and 48 above (full credit) could, of course, also be of relevance in the case of dividends and interest paid to a resident of a State which adopted the ordinary credit method (see also paragraph 63 below).

(Renumbered and amended on 11 April 1977; see HISTORY)

59. The obligation imposed by Article 23 B on a State R to give credit for the tax levied in the other State E (or S) on an item of income or capital depends on whether this item may be taxed by the State E (or S) in accordance with the Convention. Paragraphs 32.1 to 32.7 above discuss how this condition should be interpreted. Items of income or capital which according to Article 8, to paragraph 3 of Article 13, to subparagraph *a)* of paragraphs 1 and 2 of Article 19 and to paragraph 3 of Article 22, "shall be taxable only" in the other State, are from the outset exempt from tax in State R (see paragraph 6 above), and the Commentary on Article 23 A applies to such exempted income and capital. As regards progression, reference is made to paragraph 2 of the Article (and paragraph 79 below).

(Amended on 29 April 2000; see HISTORY)

60. Article 23 B sets out the main rules of the credit method, but does not give detailed rules on the computation and operation of the credit. This is consistent with the general pattern of the Convention. Experience has shown that many problems may arise. Some of them are dealt with in the following paragraphs. In many States, detailed rules on credit for foreign tax already exist in their domestic laws. A number of conventions, therefore, contain a reference to the domestic laws of the Contracting States and further provide that such domestic rules shall not affect the principle laid down in Article 23 B. Where the credit method is not used in the domestic laws of a Contracting State, this State should establish rules for the application of Article 23 B, if necessary after consultation with the competent authority of the other Contracting State (paragraph 3 of Article 25).

(Added on 11 April 1977; see HISTORY)

61. The amount of foreign tax for which a credit has to be allowed is the tax effectively paid in accordance with the Convention in the other Contracting State. Problems may arise, *e.g.* where such tax is not calculated on the income

of the year for which it is levied but on the income of a preceding year or on the average income of two of more preceding years. Other problems may arise in connection with different methods of determining the income or in connection with changes in the currency rates (devaluation or revaluation). However, such problems could hardly be solved by an express provision in the Convention.

(Added on 11 April 1977; see HISTORY)

62. According to the provisions of the second sentence of paragraph 1 of Article 23 B, the deduction which the State of residence (R) is to allow is restricted to that part of the income tax which is appropriate to the income derived from the State S, or E (so-called "maximum deduction"). Such maximum deduction may be computed either by apportioning the total tax on total income according to the ratio between the income for which credit is to be given and the total income, or by applying the tax rate for total income to the income for which credit is to be given. In fact, in cases where the tax in State E (or S) equals or exceeds the appropriate tax of State R, the credit method will have the same effect as the exemption method with progression. Also under the credit method, similar problems as regards the amount of income, tax rate, etc. may arise as are mentioned in the Commentary on Article 23 A (see especially paragraphs 39 to 41 and 44 above). For the same reasons mentioned in paragraphs 42 and 43 above, it is preferable also for the credit method not to propose an express and uniform solution in the Convention, but to leave each State free to apply its own legislation and technique. This is also true for some further problems which are dealt with below.

(Added on 11 April 1977; see HISTORY)

63. The maximum deduction is normally computed as the tax on net income, *i.e.* on the income from State E (or S) less allowable deductions (specified or proportional) connected with such income (see paragraph 40 above). For such reason, the maximum deduction in many cases may be lower than the tax effectively paid in State E (or S). This may especially be true in the case where, for instance, a resident of State R deriving interest from State S has borrowed funds from a third person to finance the interest-producing loan. As the interest due on such borrowed money may be offset against the interest derived from State S, the amount of net income subject to tax in State R may be very small, or there may even be no net income at all. This problem could be solved by using the full credit method in State R as mentioned in paragraph 48 above. Another solution would be to exempt such income from tax in State S, as it is proposed in the Commentary in respect of

interest on credit sales and on loans granted by banks (see paragraph 15 of the Commentary on Article 11).

(Added on 11 April 1977; see HISTORY)

64. If a resident of State R derives income of different kinds from State S, and the latter State, according to its tax laws imposes tax only on one of these items, the maximum deduction which State R is to allow will normally be that part of its tax which is appropriate only to that item of income which is taxed in State S. However, other solutions are possible, especially in view of the following broader problem: the fact that credit has to be given, *e.g.* for several items of income on which tax at different rates is levied in State S, or for income from several States, with or without conventions, raises the question whether the maximum deduction or the credit has to be calculated separately for each item of income, or for each country, or for all foreign income qualifying for credit under domestic laws and under conventions. Under an "overall credit" system, all foreign income is aggregated, and the total of foreign taxes is credited against the domestic tax appropriate to the total foreign income.

(Added on 11 April 1977; see HISTORY)

65. Further problems may arise in case of losses. A resident of State R, deriving income from State E (or S), may have a loss in State R, or in State E (or S) or in a third State. For purposes of the tax credit, in general, a loss in a given State will be set off against other income from the same State. Whether a loss suffered outside State R (*e.g.* in a permanent establishment) may be deducted from other income, whether derived from State R or not depends on the domestic laws of State R. Here similar problems may arise, as mentioned in the Commentary on Article 23 A (paragraph 44 above). When the total income is derived from abroad, and no income but a loss not exceeding the income from abroad arises in State R, then the total tax charged in State R will be appropriate to the income from State S, and the maximum deduction which State R is to allow will consequently be the tax charged in State R. Other solutions are possible.

(Added on 11 April 1977; see HISTORY)

66. The aforementioned problems depend very much on domestic laws and practice, and the solution must, therefore, be left to each State. In this context, it may be noted that some States are very liberal in applying the credit method. Some States are also considering or have already adopted the possibility of carrying over unused tax credits. Contracting States are, of course, free in bilateral negotiations to amend the Article to deal with any of the aforementioned problems.

(Added on 11 April 1977; see HISTORY)

67. In so-called "thin capitalisation" situations, the Model Convention allows the State of the borrower company, under certain conditions, to treat an interest payment as a distribution of dividends in accordance with its domestic legislation; the essential condition is that the contributor of the loan should effectively share the risks run by the borrower company. This gives rise to two consequences:

— the taxing at source of such "interest" at the rate for dividends (paragraph 2 of Article 10);

— the inclusion of such "interest" in the taxable profits of the lender company.

(Replaced on 23 July 1992; see HISTORY)

68. If the relevant conditions are met, the State of residence of the lender would be obliged to give relief for any juridical or economic double taxation of the interest as if the payment was in fact a dividend. It should then give credit for tax effectively withheld on this interest in the State of residence of the borrower at the rate applicable to dividends and, in addition, if the lender is the parent company of the borrower company, apply to such "interest" any additional relief under its parent/subsidiary regime. This obligation may result:

a) from the actual wording of Article 23 of the Convention, when it grants relief in respect of income defined as dividends in Article 10 or of items of income dealt with in Article 10;

b) from the context of the Convention, *i.e.* from a combination of Articles 9, 10, 11, and 23 and if need be, by way of the mutual agreement procedure:

— where the interest has been treated in the country of residence of the borrower company as a dividend under rules which are in accordance with paragraph 1 of Article 9 or paragraph 6 of Article 11 and where the State of residence of the lender agrees that it has been properly so treated and is prepared to apply a corresponding adjustment;

— when the State of residence of the lender applies similar thin capitalisation rules and would treat the payment as a dividend in a reciprocal situation, *i.e.* if the payment were made by a company established in its territory to a resident in the other Contracting State;

— in all other cases where the State of residence of the lender recognises that it was proper for the State of residence of the borrower to treat the interest as a dividend.

(Replaced on 23 July 1992; see HISTORY)

69. As regards dividends from a substantial holding by a company, reference is made to paragraphs 49 to 54 above.

(Renumbered on 23 July 1992; see HISTORY)

69.1 Problems may arise where Contracting States treat entities such as partnerships in a different way. Assume, for example, that the State of source treats a partnership as a company and the State of residence of a partner treats it as fiscally transparent. The State of source may, subject to the applicable provisions of the Convention, tax the partnership on its income when that income is realised and, subject to the limitations of paragraph 2 of Article 10, may also tax the distribution of profits by the partnership to its non-resident partners. The State of residence, however, will only tax the partner on his share of the partnership's income when that income is realised by the partnership.

(Added on 29 April 2000; see HISTORY)

69.2 The first issue that arises in this case is whether the State of residence, which taxes the partner on his share in the partnership's income, is obliged, under the Convention, to give credit for the tax that is levied in the State of source on the partnership, which that latter State treats as a separate taxable entity. The answer to that question must be affirmative. To the extent that the State of residence flows through the income of the partnership to the partner for the purpose of taxing him, it must adopt a coherent approach and flow through to the partner the tax paid by the partnership for the purposes of eliminating double taxation arising from its taxation of the partner. In other words, if the corporate status given to the partnership by the State of source is ignored by the State of residence for purposes of taxing the partner on his share of the income, it should likewise be ignored for purposes of the foreign tax credit.

(Added on 29 April 2000; see HISTORY)

69.3 A second issue that arises in this case is the extent to which the State of residence must provide credit for the tax levied by the State of source on the distribution, which is not taxed in the State of residence. The answer to that question lies in that last fact. Since the distribution is not taxed in the State of residence, there is simply no tax in the State of residence against which to credit the tax levied by the State of source upon the distribution. A clear distinction must be made between the generation of profits and the distribution of those profits and the State of residence should not be expected to credit the tax levied by the State of source upon the distribution against its own tax levied upon generation (see the first sentence of paragraph 64 above).

(Added on 29 April 2000; see HISTORY)

B. *Remarks concerning capital tax*

70. As paragraph 1 is drafted, credit is to be allowed for income tax only against income tax and for capital tax only against capital tax. Consequently, credit for or against capital tax will be given only if there is a capital tax in both Contracting States.

(Renumbered on 23 July 1992; see HISTORY)

71. In bilateral negotiations, two Contracting States may agree that a tax called a capital tax is of a nature closely related to income tax and may, therefore, wish to allow credit for it against income tax and vice versa. There are cases where, because one State does not impose a capital tax or because both States impose capital taxes only on domestic assets, no double taxation of capital will arise. In such cases it is, of course, understood that the reference to capital taxation may be deleted. Furthermore, States may find it desirable, regardless of the nature of the taxes under the convention, to allow credit for the total amount of tax in the State of source or situs against the total amount of tax in the State of residence. Where, however, a convention includes both real capital taxes and capital taxes which are in their nature income taxes, the States may wish to allow credit against income tax only for the latter capital taxes. In such cases, States are free to alter the proposed Article so as to achieve the desired effect.

(Renumbered on 23 July 1992; see HISTORY)

C. *Tax sparing*

72. Some States grant different kinds of tax incentives to foreign investors for the purpose of attracting foreign investment. When the State of residence of a foreign investor applies the credit method, the benefit of the incentive granted by a State of source may be reduced to the extent that the State of residence, when taxing income that has benefited from the incentive, will allow a deduction only for the tax actually paid in the State of source. Similarly, if the State of residence applies the exemption method but subject the application of that method to a certain level of taxation by the State of source, the granting of a tax reduction by the State of source may have the effect of denying the investor the application of the exemption method in his State of residence.

(Replaced on 29 April 2000; see HISTORY)

73. To avoid any such effect in the State of residence, some States that have adopted tax incentive programmes wish to include provisions, usually referred to as "tax sparing" provisions, in their conventions. The purpose of these provisions is to allow non-residents to obtain a foreign tax credit for the taxes that have been "spared" under the incentive programme of the source

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

State or to ensure that these taxes will be taken into account for the purposes of applying certain conditions that may be attached to exemption systems.

(Replaced on 29 April 2000; see HISTORY)

74. Tax sparing provisions constitute a departure from the provisions of Articles 23 A and 23 B. Tax sparing provisions may take different forms, as for example:

a) the State of residence will allow as a deduction the amount of tax which the State of source could have imposed in accordance with its general legislation or such amount as limited by the Convention (*e.g.* limitations of rates provided for dividends and interest in Articles 10 and 11) even if the State of source has waived all or part of that tax under special provisions for the promotion of its economic development;

b) as a counterpart for the tax reduction by the State of the State of residence agrees to allow a deduction against its own tax of an amount (in part fictitious) fixed at a higher rate;

c) the State of residence exempts the income which has benefited from tax incentives in the State of source.

(Replaced on 29 April 2000; see HISTORY)

75. A 1998 report by the Committee of Fiscal Affairs, entitled “Tax Sparing: a Reconsideration”,[1] analyses the tax policy considerations that underlie tax sparing provisions as well as their drafting. The report identifies a number of concerns that put into question the overall usefulness of the granting of tax sparing relief. These concerns relate in particular to:

— the potential for abuse offered by tax sparing;

— the effectiveness of tax sparing as an instrument of foreign aid to promote economic development of the source country; and

— general concerns with the way in which tax sparing may encourage States to use tax incentives.

(Replaced on 29 April 2000; see HISTORY)

76. Experience has shown that tax sparing is very vulnerable to taxpayer abuse, which can be very costly in terms of lost revenue to both the State of residence and the State of source. This kind of abuse is difficult to detect. In addition, even where it is detected, it is difficult for the State of residence to react quickly against such abuse. The process of removing or modifying

1 Reproduced in Volume II at page R(14)-1.

existing tax sparing provisions to prevent such abuses is often slow and cumbersome.

(Replaced on 29 April 2000; see HISTORY)

77. Furthermore, tax sparing is not necessarily an effective tool to promote economic development. A reduction or elimination of the benefit of the tax incentive by the State of residence will, in most cases, only occur to the extent that profits are repatriated. By promoting the repatriation of profits, tax sparing may therefore provide an inherent incentive to foreign investors to engage in short-term investment projects and a disincentive to operate in the source State on a long-term basis. Also, foreign tax credit systems are usually designed in a way that allows a foreign investor, in computing its foreign tax credit, to offset to some extent the reduction of taxes resulting from a particular tax incentive with the higher taxes paid in that or other country so that, ultimately, no additional taxes are levied by the State of residence as a result of the tax incentive.

(Replaced on 29 April 2000; see HISTORY)

78. Finally, the accelerating integration of national economies has made many segments of the national tax bases increasingly geographically mobile. These developments have induced some States to adopt tax regimes that have as their primary purpose the erosion of the tax bases of other countries. These types of tax incentives are specifically tailored to target highly mobile financial and other services that are particularly sensitive to tax differentials. The potentially harmful effects of such regimes may be aggravated by the existence of ill-designed tax sparing provisions in treaties. This is particularly so where a State adopts a tax regime subsequent to the conclusion of treaties and tailors this regime so as to ensure that it is covered by the scope of the existing tax sparing provision.

(Replaced on 29 April 2000; see HISTORY)

78.1 The Committee concluded that member States should not necessarily refrain from adopting tax sparing provisions. The Committee expressed the view, however, that tax sparing should be considered only in regard to States the economic level of which is considerably below that of OECD member States. Member States should employ objective economic criteria to define States eligible for tax sparing. Where States agree to insert a tax sparing provision, they are therefore encouraged to follow the guidance set out in section VI of the tax sparing report. The use of these "best practices" will minimise the potential for abuse of such provisions by ensuring that they apply exclusively to genuine investments aimed at developing the domestic infrastructure of the source State. A narrow provision applying to real

investment would also discourage harmful tax competition for geographically mobile activities.

(Added on 29 April 2000; see HISTORY)

Paragraph 2

79. This paragraph has been added to enable the State of residence to retain the right to take the amount of income or capital exempted in that State into consideration when determining the tax to be imposed on the rest of the income or capital. The right so retained extends to income or capital which "shall be taxable only" in the other State. The principle of progression is thus safeguarded for the State of residence, not only in relation to income or capital which "may be taxed" in the other State, but also for income or capital which "shall be taxable only" in that other State. The Commentary on paragraph 3 of Article 23 A in relation to the State of source also applies to paragraph 2 of Article 23 B.

(Renumbered on 23 July 1992; see HISTORY)

Observations on the Commentary

80. The *Netherlands* in principle is in favour of solving situations of both double taxation and double non-taxation due to conflicts of qualification between Contracting States, since in the Netherlands view such situations are not intended by the Contracting States and moreover go against the object and purpose of a tax treaty. However, the Netherlands does not agree with the interpretation given in paragraphs 32.4 and 32.6 to the phrase "in accordance with the provisions of this Convention" in Articles 23 A and 23 B of the Convention that in cases of conflicts of qualification that are due to differences in domestic law between the State of source and the State of residence as a rule the qualification given by the State of source would prevail for purposes of the application by the State of residence of Article 23 A or 23 B. The Netherlands wishes to preserve its right to subject a solution and its modalities for a certain conflict of qualification to the circumstances of the cases at hand and to the relationship with the Contracting State concerned. The Netherlands therefore will adhere to said interpretation in paragraphs 32.4 and 32.6 only, and to the extent which, it is explicitly so confirmed in a specific tax treaty, as a result of mutual agreement between competent authorities as meant in Article 25 of the Convention or as unilateral policy.

(Added on 29 April 2000; see HISTORY)

81. *Switzerland* reserves its right not to apply the rules laid down in paragraph 32 in cases where a conflict of qualification results from a

modification to the internal law of the State of source subsequent to the conclusion of a Convention.

HISTORY

Title: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title read as follows:

"COMMENTARY ON ON ARTICLES 23(A) AND 23(B) CONCERNING THE METHODS FOR AVOIDANCE OF DOUBLE TAXATION"

Paragraph 1: Amended together with the chapter heading preceding it in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 and the preceding chapter heading read as follows:

I. GENERAL OBSERVATION

"1. The Articles deal with the so-called juridical double taxation, where the same income or capital is taxable in the hands of the same person by more than one State."

Paragraph 2: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. This case has to be distinguished especially from the so-called economic double taxation, *i.e.* a taxation of the same income or capital in the hands of two different persons both chargeable to tax. If two States wish so solve problems of economic double taxation, they must do so in bilateral negotiations."

Paragraph 3: Amended on 29 April 2000. Paragraph 3 and the footnote thereto were amended, to delete the references therein to "fixed base", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 3 and its footnote read as follows:

"3. International juridical double taxation may arise in three cases:

a) where each Contracting State subjects the same person to tax on his worldwide income or capital (concurrent full liability to tax, see paragraph 4 below);

b) where a person is a resident of a Contracting State (R)[1] and derives income from, or owns capital in, the other Contracting State (S or E) and both States impose tax on that income or capital (see paragraph 5 below);

c) where each Contracting State subjects the same person, not being a resident of either Contracting State to tax on income derived from, or capital owned in, a Contracting State; this may result, for instance, in the case where a non-resident person has a permanent establishment or fixed base in one Contracting State (E) through which he derives income from, or owns capital

in, the other Contracting State (S) (concurrent limited tax liability, see paragraph 11 below).

1 Throughout the Commentary on Articles 23 A and 23 B, the letter "R" stands for the State of residence within the meaning of the Convention, "S" for the State of source or situs, and "E" for the State where a permanent establishment or fixed base is situated."

Paragraph 3 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. International juridical double taxation may arise in three cases:

a) where each of two States under its domestic taxation law treats the same person as having his residence within its territory;

b) where each of two States imposes tax on the same income or capital (limited tax liability in both States), *e.g.* where a permanent establishment in one State derives income from immovable property in another State, and neither State is the State of residence of the owner of the permanent establishment;

c) where a person who has his residence in one State derives income from or owns capital in another State and both States impose tax on that income or capital."

Paragraph 4: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 4 read as follows:

"4. The Articles do not deal with the first two cases. The conflict in case (a) may be solved in accordance with Article 4 on fiscal domicile. The conflict in case (b) is outside the scope of the Conventions, as this is confined by Article 1 on the personal scope of the Convention, to persons who are residents of one or both of the Contracting States. It can, however be settled by applying the mutual agreement procedure."

Paragraph 4.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 4.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 4.3: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 5: Amended on 29 April 2000, by deleting the words "or the fixed base", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 5 read as follows:

"5. The conflict in case *b)* may be solved by allocation of the right to tax between the Contracting States. Such allocation may be made by renunciation of the right to tax either by the State of source or situs (S) or of the situation of the permanent establishment or the fixed base (E), or by the State of residence (R), or by a sharing of the right to tax between the two States. The provisions of the Chapters III and IV of the Convention, combined with the provisions of Article 23 A or 23 B, govern such allocation."

Paragraph 5 of the 1977 Model Convention replaced paragraph 5 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 5 read as follows:

"5. The conflict in case (c) may be solved by a renunciation either by the State of residence or by the State of source. In this connection it is to be noted that, in a number of special Articles of the Convention, the allocation of the right to tax has been given either to the State of residence or to the State of source."

Paragraph 6: Amended on 17 July 2008, to remove the reference to Article 14 in the footnote. After 28 January 2003 and until 17 July 2008, the first footnote of paragraph 6 read as follows:

"1 see first sentence of paragraph 1 of Article 7, paragraphs 1 and 2 of Article 8, paragraph 1 of Article 12, paragraphs 3 and 5 of Article 13, first sentence of paragraph 1 of Article 14, first sentence of paragraph 1 and paragraph 2 of Article 15, Article 18, paragraphs 1 and 2 of Article 19, paragraph 1 of Article 21 and paragraphs 3 and 4 of Article 22."

The first footnote of paragraph 6 was previously amended on 28 January 2003, by replacing the words "and 4 of Article 13" with "and 5 of Article 13" in the first footnote to the paragraph, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, the first footnote of paragraph 6 read as follows:

"1 see first sentence of paragraph 1 of Article 7, paragraphs 1 and 2 of Article 8, paragraph 1 of Article 12, paragraphs 3 and 4 of Article 13, first sentence of paragraph 1 of Article 14, first sentence of paragraph 1 and paragraph 2 of Article 15, Article 18, paragraphs 1 and 2 of Article 19, paragraph 1 of Article 21 and paragraphs 3 and 4 of Article 22."

The first footnote of paragraph 6 was previously amended on 23 July 1992, by deleting the reference therein to paragraph 2 of Article 13, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 28 January 2003, the first footnote of paragraph 6 read as follows:

"1 see first sentence of paragraph 1 of Article 7, paragraphs 1 and 2 of Article 8, paragraph 1 of Article 12, paragraphs 2, 3 and 4 of Article 13, first sentence of paragraph 1 of Article 14, first sentence of paragraph 1 and paragraph 2 of Article 15, Article 18, paragraphs 1 and 2 of Article 19, paragraph 1 of Article 21 and paragraphs 3 and 4 of Article 22."

Paragraph 6 of the 1977 Model Convention (adopted by the OECD Council on 11 April 1977), replaced paragraph 6 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963). Paragraph 6 of the 1963 Draft Convention was deleted and a new paragraph 6 was added when the 1977 Model Convention was adopted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 6 read as follows:

"6. In the case where the State of source renounces its right to tax, the relevant Article states that the income and capital in question "shall be taxable only" in the other State. Accordingly, no question of double taxation arises here."

Paragraph 7: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 7 of the 1963 Draft Convention was deleted and a new paragraph 7 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 7 read as follows:

"7. In the case where the State of source does not renounce its right to tax, *i.e.* where the relevant Article states that the income or capital "may be taxed" in the State of source, the State of residence must give relief so as to avoid double

taxation. Therefore, in the Articles submitted, the prior right of taxation in the State of source is implied, and the State of residence is left to provide the means by which double taxation is to be avoided."

Paragraph 8: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 8 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 12 (see history of paragraph 12), the heading preceding paragraph 8 was amended moved with it and a new paragraph 8 was added when the 1977 Model Convention was adopted.

Paragraph 9: Amended on 29 April 2000, by deleting the words "or a fixed base" and "or fixed base", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 9 read as follows:

"9. Where a resident of the Contracting State R derives income from the same State R through a permanent establishment or a fixed base which he has in the other Contracting State E, State E may tax such income (except income from immovable property situated in State R) if it is attributable to the said permanent establishment or fixed base (paragraph 2 of Article 21). In this instance too, State R must give relief under Article 23 A or Article 23 B for income attributable to the permanent establishment or fixed base situated in State E, notwithstanding the fact that the income in question originally arises in State R (see paragraph 5 of the Commentary on Article 21). However, where the Contracting States agree to give to State R which applies the exemption method a limited right to tax as the State of source of dividends or interest within the limits fixed in paragraph 2 of the Articles 10 or 11 (see paragraph 5 of the Commentary on Article 21), then the two States should also agree upon a credit to be given by State E for the tax levied by State R, along the lines of paragraph 2 of Article 23 A or of paragraph 1 of Article 23 B."

Paragraph 9 of the 1977 Model Convention replaced paragraph 9 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the heading preceding paragraph 9 was amended. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 9 and the preceding heading read as follows:

"1. *The Exemption System*

9. This system implies that the State to which the Convention has not given the right to tax a certain income shall leave out that income when determining the amount which is chargeable to income tax in that State."

Paragraph 10: Amended on 17 July 2008, by replacing the cross-reference to "paragraphs 49 to 54" of the Commentary on Article 24 with "paragraphs 67 to 72", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 10 read as follows:

"10. Where a resident of State R derives income from a third State through a permanent establishment which he has in State E, such State E may tax such income (except income from immovable property situated in the third State) if it is attributable to such permanent establishment (paragraph 2 of Article 21). State R must give relief under Article 23 A or Article 23 B in respect of income attributable to the permanent establishment in State E. There is no provision in the Convention for relief to be given by Contracting State E for taxes levied in the third State where

the income arises; however, under paragraph 3 of Article 24 any relief provided for in the domestic laws of State E (double taxation conventions excluded) for residents of State E is also to be granted to a permanent establishment in State E of an enterprise of State R (see paragraphs 49 to 54 of the Commentary on Article 24)."

Paragraph 10 was previously amended on 28 January 2003, by replacing the cross-reference "paragraph 4 of Article 24" with "paragraph 3 of Article 24". This amendment related to the implementation of the redesignation of paragraph 2 of Article 24 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. After 27 January 2000 and until 28 January 2003, paragraph 10 read as follows:

"10. Where a resident of State R derives income from a third State through a permanent establishment which he has in State E, such State E may tax such income (except income from immovable property situated in the third State) if it is attributable to such permanent establishment (paragraph 2 of Article 21). State R must give relief under Article 23 A or Article 23 B in respect of income attributable to the permanent establishment in State E. There is no provision in the Convention for relief to be given by Contracting State E for taxes levied in the third State where the income arises; however, under paragraph 4 of Article 24 any relief provided for in the domestic laws of State E (double taxation conventions excluded) for residents of State E is also to be granted to a permanent establishment in State E of an enterprise of State R (see paragraphs 49 to 54 of the Commentary on Article 24)."

Paragraph 10 was previously amended on 27 January 2000, by deleting the words "or a fixed base" and "or fixed base", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 27 January 2000, paragraph 10 read as follows:

"10. Where a resident of State R derives income from a third State through a permanent establishment or a fixed base which he has in State E, such State E may tax such income (except income from immovable property situated in the third State) if it is attributable to such permanent establishment or fixed base (paragraph 2 of Article 21). State R must give relief under Article 23 A or Article 23 B in respect of income attributable to the permanent establishment or fixed base in State E. There is no provision in the Convention for relief to be given by Contracting State E for taxes levied in the third State where the income arises; however, under paragraph 4 of Article 24 any relief provided for in the domestic laws of State E (double taxation conventions excluded) for residents of State E is also to be granted to a permanent establishment in State E of an enterprise of State R (see paragraphs 49 to 54 of the Commentary on Article 24)."

Paragraph 10 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 60 of another report entitled "Triangular Cases" (adopted by the OECD Council on 23 July 1992). In the 1977 Model Convention and until 23 July 1992, paragraph 10 read as follows:

"10. Where a resident of State R derives income from a third State through a permanent establishment or a fixed base which he has in State E, such State E may tax such income (except income from immovable property situated in the third State) if it is attributable to such permanent establishment or fixed base (paragraph 2 of Article 21). State R must give relief under Article 23 A or Article 23 B in respect of income attributable to the permanent establishment or fixed base in State E. There is no provision in the Convention for relief to be given by Contracting

State E for taxes levied in the third State where the income arises; however, under paragraph 4 of Article 24 any relief provided for in the domestic laws of State E (double taxation conventions excluded) for residents of State E is also to be granted to a permanent establishment in State E of an enterprise of State R (see paragraphs 51 to 55 of the Commentary on Article 24). Cases in which more than two States are involved (triangular cases) raise many problems in regard to which not only the convention between the States R and E but also conventions between States R and/or E with State S may come into play. It could be argued that a provision in a convention between State R and State E obliging State E to give credit or exemption for income derived from a third State leads to a more favourable treatment of the permanent establishment than is granted by State E to its own residents, and that the effect of the combined application of domestic laws and of one or more conventions may even result in double or multiple relief. It is, therefore, left to Contracting States to settle the question bilaterally either generally in a convention to be concluded between them or by way of a mutual agreement procedure (Article 25)."

Paragraph 10 of the 1977 Model Convention replaced paragraph 10 of 1963 Draft Convention, which was amended and renumbered as paragraph 14 (see history of paragraph 14) and a new paragraph 10 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 11: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 11 read as follows:

"11. Where the exemption system is adopted in Conventions, and the State of residence is not given the right to tax, it normally follows the form described under *(b)*."

Paragraph 12: Corresponds to paragraph 8 of the 1963 Draft Convention. Paragraph 12 of the 1963 Draft Convention was amended and renumbered as paragraph 15 (see history of paragraph 15) and the preceding heading was amended and moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 8 of the 1963 Draft Convention was amended and renumbered as paragraph 12 of the 1977 Model Convention and the preceding heading was amended and moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 8 and the preceding heading read as follows:

"B. Description of Methods for Avoidance of Double Taxation

8. A study of Convention concluded between O.E.C.D. Member countries shows that two leading principles are followed for the avoidance of double taxation. For purposes of simplicity only income tax is referred to in what follows, but the principles apply similarly to capital tax."

Paragraph 13: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 13 of the 1963 Draft Convention, was amended and renumbered as paragraph 16 (see history of paragraph 16) and a new paragraph 13 was added.

Paragraph 14: Corresponds to paragraph 10 of the 1963 Draft Convention. Paragraph 14 of the 1963 Draft Convention was amended and renumbered as paragraph 17 (see history of paragraph 17) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 10 of the 1963 Draft Convention was amended and renumbered as paragraph 14 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 10 read as follows:

"10. The exemption system is found in two different forms:

a) The income in question may be left out altogether, so that the State concerned is not entitled to take that income into consideration when determining the rate of tax to be imposed on the rest of the income. Hereinafter this method is referred to as "full exemption".

b) The income in question is left out, but the State concerned retains the right to take that income into consideration when determining the rate of tax to be imposed on the rest of the income. Hereinafter this method is referred to as "exemption with progression"."

Paragraph 15: Corresponds to paragraph 12 of the 1963 Draft Convention. Paragraph 15 of the 1963 Draft Convention was amended and renumbered as paragraph 18 (see history of paragraph 18) and the preceding heading was amended and moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 12 of the 1963 Draft Convention was amended and renumbered as paragraph 15 of the 1977 Model Convention and the preceding heading was amended and moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 12 and the preceding heading read as follows:

"2. *The credit system*

12. The adoption of this system implies that the State applying it imposes tax on the basis of the taxpayer's total income including the income from another State, and then allows a deduction from its own tax for tax paid in that other State."

Paragraph 16: Corresponds to paragraph 13 of the 1963 Draft Convention. Paragraph 16 of the 1963 Draft Convention was amended and renumbered as paragraph 19 (see history of paragraph 19) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 13 of the 1963 Draft Convention was amended and renumbered as paragraph 16 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 13 read as follows:

"13. The credit system is found in different forms:

a) The deduction given by the State of residence may be restricted so that the deduction does not exceed that part of its own tax appropriate to the income from the other State. Hereinafter this method is referred to as "ordinary credit".

b) In some forms of the credit system the State of residence allows a deduction of the total amount of tax paid in the State of source. Hereinafter this method is referred to as "full credit".

c) Further variations of the credit system are possible, *e.g.* where the State of residence limits the deduction to an amount not exceeding the tax which it would itself have imposed on that income if the taxpayer had no other income."

Paragraph 17: Corresponds to paragraph 14 of the 1963 Draft Convention. Paragraph 17 of the 1963 Draft Convention was amended and incorporated into paragraphs 20 and 23 (see history of paragraph 20) and Table 1 that followed paragraph 17 was amended and moved immediately after paragraph 23 (see History of paragraph 23) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 14 of the 1963 Draft Convention was amended and renumbered as paragraph 17 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 14 read as follows:

"14. Fundamentally the difference between the exemption system and the credit system is that the exemption system looks at income, the credit system at tax on income."

Paragraph 18: Corresponded to paragraph 15 of the 1963 Draft Convention. Paragraph 18 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 15 of the 1963 Draft Convention was amended and renumbered as paragraph 18 and the preceding heading was amended and moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 15 and the preceding heading read as follows:

"C. The Functions and Effects of the Methods

"15. An example in figures will facilitate the explanation of the effects of the various methods. Suppose the income to be 100,000, 80,000 being derived from one State (the State of residence) and 20,000 derived from the other State (the State of source). Assume that in the State of residence the rate of tax on an income of 100,000 is 35 per cent and that the rate of tax on an income of 80,000 is 30 per cent. Assume, too, that in the State of source the rate of tax is either: (*i*) 20 per cent or (*ii*) 40 per cent, so that the tax payable therein is (*i*) 20 per cent of 20,000 = 4,000 or (*ii*) 40 per cent of 20,000 = 8,000."

Paragraph 18 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until it was deleted when the 1977 Model Convention was adopted, read as follows:

"18. Under the exemption system the State of residence limits its charge of taxation to that part of the total income which, in accordance with the various Articles in a Convention, it has a right to tax. It will impose tax on that part of the income either at the rate of tax applicable to that amount of income (full exemption) or at the rate of tax applicable to the total income wherever it arises (exemption with progression). In either event, the level of the tax in the State of source would have no influence on the amount of tax given up by the State of residence."

Paragraph 19: Corresponds to paragraph 16 of the 1963 Draft Convention. Paragraph 19 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 16 of the 1963 Draft Convention was amended and renumbered as paragraph 19. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 16 read as follows:

"16. If the taxpayer's total income of 100,000 arises in the State of residence his tax would be 35,000, If he had an income of the same amount derived in the manner set out above, and, if there were no Convention between the State of residence and the State of source, the total amount of the tax would be, in case (*i*), 35,000 + 4,000 = 39,000 and, in case (*ii*), 35,000 + 8,000 = 43,000."

Paragraph 19 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until it was deleted when the 1977 Model Convention was adopted, read as follows:

"19. Under the exemption system if the rate of tax in the State of source were the lower, the taxpayer would fare better than a taxpayer with the same total income arising solely in the State of residence. In the examples given, the tax in the case of full exemption would be 28,000 and, in the case of exemption with progression,

32,000, as compared with 35,000 if the total income arose solely in the State of residence."

Paragraph 20: Corresponds to the first sentence and subparagraphs a) and b) of paragraph 17 of the 1963 Draft Convention. Paragraph 20 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 17 of the 1963 Draft Convention was amended and incorporated into paragraphs 20 and 23 and the table following paragraph 17 was amended and moved immediately after paragraph 23 (see History of paragraph 23). In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 17 read as follows:

"17. If a Convention were concluded between the two States, based on one of the following methods, the respective results in figures would be:

a) *Full exemption:*

The tax in the State of residence would be 30 per cent of 80,000 = 24,000. The total amount of tax payable would therefore be, in case (i), 24,000 + 4,000 = 28,000 and, in case (ii), 24,000 + 8,000 = 32,000.

b) *Exemption with progression:*

The tax in the State of residence would be 35 per cent of 80,000 = 28,000. The total amount of tax payable would therefore be, in case (i), 28,000 + 4,000 = 32,000 and, in case (ii), 28,000 + 8,000 = 36,000.

c) *Ordinary credit:*

The State of residence would compute tax on the total income at a rate of 35 per cent, *i.e.* 35,000. The amount of tax in the State of residence corresponding to the income from the State of source would be 35 per cent of 20,000 = 7,000 (maximum credit). In case (i) the tax in the State of source would be 4,000 and the State of residence would allow a deduction of this amount since the question of restriction does not arise. The tax in the State of residence would therefore be 35,000 - 4,000 = 31,000. The total amount of tax would be 31,000 + 4,000 = 35,000. In case (ii) the tax in the State of source would be 8,000 and the State of residence would allow a deduction of 7,000 only, that is the amount of the maximum credit. The tax in the State of residence would therefore be 35,000 - 7,000 = 28,000. The total amount of tax would be 28,000 + 8,000 = 36,000.

d) *Full credit:*

The State of residence would compute tax on the total income at a rate of 35 per cent, *i.e.* 35,000. In case (i) the tax in the State of source would be 4,000 and the State of residence would allow a deduction of this amount. The tax in the State of residence would therefore be 35,000 - 4,000 = 31,000 and the total amount of tax would be 31,000 + 4,000 = 35,000. In case (ii) the tax in the State of source would be 8,000 and the State of residence would allow a deduction of this amount. The tax in the State of residence 8,000 = 35,000."

Paragraph 20 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until it was deleted when the 1977 Model Convention was adopted, read as follows:

"20. If the rate of tax in the State of source were the higher, the result, in the case of exemption with progression, would be unfavourable for the taxpayer. In the examples given for case (*ii*) in paragraph 15, the figure would be 36,000, as compared with 35,000 if the total income arose in the State of residence. But in the Case of full exemption, the result, in the example given, would be in the taxpayer's favour, *i.e.* 32,000, as compared with 35,000."

Paragraph 21: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 21 of the 1963 Draft Convention was deleted and a new paragraph 21 was added when the 1977 Model Convention was adopted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 21 read as follows:

"21. Under these forms of exemption the State of residence would give up tax as follows:

a) *Full exemption*:

11,000 irrespective of whether the tax in the State of source is 4,000 or 8,000

b) *Exemption with progression*:

7,000 irrespective of whether the tax in the State of source is 4,000 or 8,000."

Paragraph 22: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 22 of the 1963 Draft Convention was amended and renumbered as paragraph 24 (see history of paragraph 24) and a new paragraph 22 was added.

Paragraph 23: The tables following paragraph 27 were relocated immediately after paragraph 27 (see history of paragraph 27) on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 23 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 23 of the 1963 Draft Convention was amended and renumbered as paragraph 25 (see history of paragraph 25) and a new paragraph 23 was added when the 1977 Model Convention was adopted. At the same time Tables I and II that followed paragraphs 17 and 28 respectively were amended and moved immediately after paragraph 23. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, Tables I and II, which previously followed paragraphs 17 and 28 respectively read as follows:

TABLE I. TOTAL AMOUNT OF TAX IN THE DIFFERENT CASES ILLUSTRATED ABOVE

I. All income arising in the State of residence:		tax 35,000
II. Income arising in two States, viz. 80,000 in the State of residence and 20,000 in the State of source.	Tax in State of source 4,000 (case *i*)	Tax in State of source 8,000 (case *ii*)
No Convention	39,000	43,000
a) Full exemption	28,000	32,000
b) Exemption with progression	32,000	36,000
c) Ordinary credit	35,000	36,000
d) Full credit	35,000	35,000

TABLE II. AMOUNT OF TAX GIVEN UP BY THE STATE OF RESIDENCE

	Tax in State of source 4,000 (case *i*)	Tax in State of source 8,000 (case *ii*)
No Convention	0	0
a) Full exemption	11,000	11,000
b) Exemption with progression	7,000	7,000
c) Ordinary credit	4,000	7,000
d) Full credit	4,000	8,000

Paragraph 24: Corresponds to paragraph 22 of the 1963 Draft Convention. Paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 27 (see history of paragraph 27) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 22 of the 1963 Draft Convention was amended and renumbered as paragraph 24 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 22 read as follows:

> "22. Under the credit system the State of residence retains its right to tax the total income of the taxpayer, but against the tax so imposed it allows a certain deduction. A characteristic of the credit systems described above is that the State of residence is never obliged to allow a deduction greater than the tax paid in the State of source."

Paragraph 25: Corresponds to paragraph 23 of the 1963 Draft Convention. Paragraph 25 of the 1963 Draft Convention was deleted and paragraph 23 of the 1963 Draft Convention was amended and renumbered as paragraph 25 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 23 read as follows:

> "23. Where the tax in the State of source is the lower, the taxpayer will always have to pay the same amount of tax as he would have had to pay if he were taxed solely in the State of residence. [In case (*i*) 35,000 — 4,000 + 4,000 = 35,000.]"

Paragraph 25 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until it was deleted when the 1977 Model Convention was adopted, read as follows:

> "25. If the tax in the State of source were the higher, and the State of residence were to allow full credit, the taxpayer would have to pay the same amount of tax as if he were taxed solely in the State of residence. [In case (*ii*) 35,000 - 8,000 + 8,000 = 35,000.]"

Paragraph 26: Corresponds to paragraph 28 of the 1963 Draft Convention. Paragraph 26 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 28 of the 1963 Draft Convention was amended and renumbered as paragraph 26 and the preceding heading was moved immediately before paragraph 29. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 28 read as follows:

> "28. A system where the State of residence gives up the part of its own tax appropriate to the income from the State of source — irrespective of the tax paid in

the State of source — produces the same result as an exemption system with progression."

Paragraph 26 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until it was deleted when the 1977 Model Convention was adopted, read as follows:

"26. Under the various forms of the credit system described above, the State of residence never gives up an amount of its tax greater than the tax levied in the State of source. This underlines a fundamental distinction between the credit and the exemption systems."

Paragraph 27: The tables following paragraph 27 correspond to the tables that followed paragraph 23 as they read before 23 July 1992. The tables were relocated by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 27 corresponds to paragraph 24 of the 1963 Draft Convention. Paragraph 27 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 27. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 24 read as follows:

"24. Where the tax in the State of source is the higher, and where the deduction is limited to the appropriate part of the tax imposed in the State of residence, the taxpayer will not get a deduction for the whole amount of the tax paid in the State of source. In such an event the result would be less favourable for the taxpayer than of his whole income arose in the State of residence. [In case (*ii*) 35,000 — 7,000 + 8,000 = 36,000.]"

Paragraph 27 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until it was deleted when the 1977 Model Convention was adopted, read as follows:

"27. In the above-mentioned examples the State of residence gives up the following amounts of tax:

a) Ordinary Credit :

Where the tax in the State of source is 4,000	4,000
Where the tax in the State of source is 8,000	7,000

b) Full credit :

Where the tax in the State of source is 4,000	4,000
Where the tax in the State of source is 8,000	7,000

Paragraph 28: Corresponds to paragraph 29 of the 1963 Draft Convention. Paragraph 28 of the 1963 Draft Convention was amended and renumbered as paragraph 26 (see history of paragraph 26) and Table II, which followed paragraph 28, was amended and moved immediately after paragraph 23 (see history of paragraph 23) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 29 of the 1963 Draft Convention was amended and renumbered as paragraph 28 of the 1977 Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 29 read as follows:

"29. In the Conventions concluded between O.E.C.D. Member countries both systems have been adopted. Some States have a preference for one system, some

have a preference for the other. Theoretically a single system could be held to be more desirable, but, on account of the preferences referred to, each State has been left free to make its own choice. On the other hand, it has been found important to limit inside each system the number of methods to be employed."

Paragraph 29: Corresponds in part to paragraph 29 of the 1963 Draft Convention. Paragraph 29 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and incorporated into paragraphs 28 and 29 (see history of paragraph 28) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the heading preceding paragraph 29 was moved immediately before paragraph 28.

Paragraph 30: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 30 read as follows:

"30. In view of this limitation, the Articles have been drafted so that Member countries are left free to choose between two methods: the exemption method with progression [Article 23(A)] and the ordinary credit method [Article 23(B)]. If two Contracting States both adopt the same method, it will be sufficient of the relevant Article is inserted in the Convention. On the other hand, if the two Contracting States adopt different methods, the name of the State must be inserted each in the appropriate Article, according to the method adopted by that State."

Paragraph 31: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Tax Treaty Issues Relating to REITs" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). In the 1977 Model Convention and until 17 July 2008, paragraph 31 read as follows:

"31. Contracting States may use a combination of the two methods. Such combination is indeed necessary for a Contracting State R which generally adopts the exemption method in the case of income which under Articles 10 and 11 may be subjected to a limited tax in the other Contracting State S. For such case, Article 23 A provides in paragraph 2 a credit for the limited tax levied in the other Contracting State S. Moreover, States which in general adopt the exemption method may wish to exclude specific items of income from exemption and to apply to such items the credit method. In such case, paragraph 2 of Article 23 A could be amended to include these items of income."

Paragraph 31 of the 1977 Model Convention replaced paragraph 31 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 31 read as follows:

"31. Perhaps it may be of interest to add that, in particular circumstances, both methods could be combined with advantage. Thus it will be noted from paragraph 39 that paragraph 2 of Article 23(A) -- the exemption Article -- is drafted in accordance with the credit method, and from paragraphs 47 to 51 that the adoption of the exemption method, in respect of the type of income referred to therein, would obviate difficulties that arise under the credit method."

Paragraph 31.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 32: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 32 of the 1963 Draft Convention was amended and incorporated into paragraphs 33 and 34 (see history of paragraph 33). At the same time, the preceding headings were amended and moved immediately before paragraph 33 and a new paragraph 32 was added.

Paragraph 32.1: Paragraph 32.1 and the heading preceding it were added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 32.2: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 32.3: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 32.4: Amended on 28 January 2003, by replacing the words "paragraph 4 of Article 13" in the sixth sentence, with "paragraph 5 of Article 13", by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 32.4 read as follows:

> "32.4 This point may be illustrated by the following example. A business is carried on through a permanent establishment in State E by a partnership established in that State. A partner, resident in State R, alienates his interest in that partnership. State E treats the partnership as fiscally transparent whereas State R treats it as taxable entity. State E therefore considers that the alienation of the interest in the partnership is, for the purposes of its Convention with State R, an alienation by the partner of the underlying assets of the business carried on by the partnership, which may be taxed by that State in accordance with paragraph 1 or 2 of Article 13. State R, as it treats the partnership as a taxable entity, considers that the alienation of the interest in the partnership is akin to the alienation of a share in a company, which could not be taxed by State E by reason of paragraph 4 of Article 13. In such a case, the conflict of qualification results exclusively from the different treatment of partnerships in the domestic laws of the two States and State E must be considered by State R to have taxed the gain from the alienation "in accordance with the provisions of the Convention" for purposes of the application of Article 23 A or Article 23 B. State R must therefore grant an exemption pursuant to Article 23 A or give a credit pursuant to Article 23 B irrespective of the fact that, under its own domestic law, it treats the alienation gain as income from the disposition of shares in a corporate entity and that, if State E's qualification of the income were consistent with that of State R, State R would not have to give relief under Article 23 A or Article 23 B. No double taxation will therefore arise in such a case."

Paragraph 32.4 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the

OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 32.5: Amended on 28 January 2003, by replacing the words "paragraph 4" in the second sentence, with "paragraph 5", by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 32.5 read as follows:

> "32.5 Article 23 A and Article 23 B, however, do not require that the State of residence eliminate double taxation in all cases where the State of source has imposed its tax by applying to an item of income a provision of the Convention that is different from that which the State of residence considers to be applicable. For instance, in the example above, if, for purposes of applying paragraph 2 of Article 13, State E considers that the partnership carried on business through a fixed place of business but State R considers that paragraph 4 applies because the partnership did not have a fixed place of business in State E, there is actually a dispute as to whether State E has taxed the income in accordance with the provisions of the Convention. The same may be said if State E, when applying paragraph 2 of Article 13, interprets the phrase "forming part of the business property" so as to include certain assets which would not fall within the meaning of that phrase according to the interpretation given to it by State R. Such conflicts resulting from different interpretation of facts or different interpretation of the provisions of the Convention must be distinguished from the conflicts of qualification described in the above paragraph where the divergence is based not on different interpretations of the provisions of the Convention but on different provisions of domestic law. In the former case, State R can argue that State E has not imposed its tax in accordance with the provisions of the Convention if it has applied its tax based on what State R considers to be a wrong interpretation of the facts or a wrong interpretation of the Convention. States should use the provisions of Article 25 (Mutual Agreement Procedure), and in particular paragraph 3 thereof, in order to resolve this type of conflict in cases that would otherwise result in unrelieved double taxation."

Paragraph 32.5 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 32.6: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 32.6 read as follows:

> "32.6 The phrase "in accordance with the provisions of this Convention, may be taxed" must also be interpreted in relation to possible cases of double non-taxation that can arise under Article 23 A. Where the State of source considers that the provisions of the Convention preclude it from taxing an item of income or capital which it would otherwise have taxed, the State of residence should, for purposes of applying paragraph 1 of Article 23 A, consider that the item of income may not be taxed by the State of source in accordance with the provisions of the Convention, even though the State of residence would have applied the Convention differently so as to tax that income if it had been in the position of the State of source. Thus the State of residence is not required by paragraph 1 to exempt the item of income, a result which is consistent with the basic function of Article 23 which is to eliminate double taxation."

Paragraph 32.6 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on

29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 32.7: Amended on 28 January 2003, by replacing the words "paragraph 4 of Article 13" in the fourth sentence, with "paragraph 5 of Article 13", by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 32.7 read as follows:

> "32.7 This situation may be illustrated by reference to a variation of the example described above. A business is carried on through a fixed place of business in State E by a partnership established in that State and a partner, resident in State R, alienates his interest in that partnership. Changing the facts of the example, however, it is now assumed that State E treats the partnership as a taxable entity whereas State R treats it as fiscally transparent; it is further assumed that State R is a State that applies the exemption method. State E, as it treats the partnership as a corporate entity, considers that the alienation of the interest in the partnership is akin to the alienation of a share in a company, which it cannot tax by reason of paragraph 4 of Article 13. State R, on the other hand, considers that the alienation of the interest in the partnership should have been taxable by State E as an alienation by the partner of the underlying assets of the business carried on by the partnership to which paragraphs 1 or 2 of Article 13 would have been applicable. In determining whether it has the obligation to exempt the income under paragraph 1 of Article 23 A, State R should nonetheless consider that, given the way that the provisions of the Convention apply in conjunction with the domestic law of State E, that State may not tax the income in accordance with the provisions of the Convention. State R is thus under no obligation to exempt the income."

Paragraph 32.7 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 32.8: Added together with the heading preceding it on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 33: Corresponds to part of paragraph 32 of the 1963 Draft Convention. Paragraph 33 of the 1963 Draft Convention was amended and renumbered as paragraph 35 (see history of paragraph 35) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 32 of the 1963 Draft Convention was amended and incorporated into paragraphs 33 and 34 of the 1977 Model Convention and the preceding headings were amended and moved immediately before paragraph 33. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 32 and the preceding headings read as follows:

> "II. COMMENTS ON ARTICLE 23(A) (EXEMPTION)
>
> *Paragraph 1*
>
> A. The obligation of the state of residence to give exemption
>
> 32. In the Article it is laid down that the State of residence shall exempt from tax income and capital, which in accordance with the Convention "may be taxed" in

the other State. The State of residence must accordingly give exemption whether or not the income or capital in question is actually taxed in the State of source. This is in accordance with most Conventions based on the exemption system between O.E.C.D. Member countries. It is regarded as the most practical method since it relieves the State of residence from undertaking onerous and time-consuming investigations of the actual taxation position in the State of source."

Paragraph 34: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999). In the 1977 Model Convention and until 29 April 2000, paragraph 34 read as follows:

"34. The State of residence must accordingly give exemption whether or not the right to tax is in effect exercised by the other State. This method is regarded as the most practical one since it relieves the State of residence from undertaking investigations of the actual taxation position in the other State."

Paragraph 34 of the 1977 Model Convention corresponded to part of paragraph 32 of the 1963 Draft Convention. Paragraph 34 and the preceding heading, as they read in the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), were deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 32 of the 1963 Draft Convention was amended and incorporated into paragraphs 33 and 34 (see history of paragraph 33).

Paragraph 34 and the preceding heading as they read in the 1963 Draft Convention and until they were deleted on 11 April 1977 when the 1977 Model Convention was adopted, read as follows:

"B. The reservation of the progression

34. In most of the Conventions concluded between O.E.C.D. Member countries on the basis of the exemption system the State of residence retains the right to take the amount of exempted income or capital into consideration when determining the rate of tax to be imposed on the rest of the income or capital. A similar provision therefore is inserted in the Article."

Paragraph 34.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 35: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999). After 23 July 1992 and until 29 April 2000, paragraph 35 read as follows:

"35. Occasionally, negotiating States may find it reasonable in certain circumstances to make an exception to the absolute obligation on the State of residence to give exemption. Such may be the case, in order to avoid non-taxation, where under the domestic laws of the State of source no tax on specific items of income or capital is provided, or tax is not effectively collected owing to special circumstances such as the set-off of losses, a mistake, or the statutory time limit having expired. To avoid non-taxation of specific items of income, Contracting States may agree to amend the relevant Article itself (see paragraph 9 of the Commentary on Article 15 and paragraph 12 of the Commentary on Article 17; for

the converse case where relief in the State of source is subject to actual taxation in the State of residence, see paragraph 20 of the Commentary on Article 10, paragraph 10 of the Commentary on Article 11, paragraph 6 of the Commentary on Article 12, paragraph 21 of the Commentary on Article 13 and paragraph 3 of the Commentary on Article 21). One might also make an exception to the general rule, in order to achieve a certain reciprocity, where one of the States adopts the exemption method and the other the credit method. Finally, another exception to the general rule may be made where a State wishes to apply to specific items of income the credit method rather than exemption (see paragraph 31 above)."

Paragraph 35 was previously amended on 23 July 1992, by replacing the references therein to paragraph 4 of the Commentary on Article 15 and to paragraph 5 of the Commentary on Article 17 with references to paragraphs 9 and 12 respectively, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 35 read as follows:

"35. Occasionally, negotiating States may find it reasonable in certain circumstances to make an exception to the absolute obligation on the State of residence to give exemption. Such may be the case, in order to avoid non-taxation, where under the domestic laws of the State of source no tax on specific items of income or capital is provided, or tax is not effectively collected owing to special circumstances such as the set-off of losses, a mistake, or the statutory time limit having expired. To avoid non-taxation of specific items of income, Contracting States may agree to amend the relevant Article itself (see paragraph 4 of the Commentary on Article 15 and paragraph 5 of the Commentary on Article 17; for the converse case where relief in the State of source is subject to actual taxation in the State of residence, see paragraph 20 of the Commentary on Article 10, paragraph 10 of the Commentary on Article 11, paragraph 6 of the Commentary on Article 12, paragraph 21 of the Commentary on Article 13 and paragraph 3 of the Commentary on Article 21). One might also make an exception to the general rule, in order to achieve a certain reciprocity, where one of the States adopts the exemption method and the other the credit method. Finally, another exception to the general rule may be made where a State wishes to apply to specific items of income the credit method rather than exemption (see paragraph 31 above)."

Paragraph 35 of the 1977 Model Convention corresponded to paragraph 33 of the 1963 Draft Convention. Paragraph 35 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 33 of the 1963 Draft Convention was amended and renumbered as paragraph 35. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 33 read as follows:

"33. Exceptionally some negotiating States may find it reasonable in certain circumstances to deviate from the provision concerning the absolute obligation of the State of residence to give exemption. Such may be the case where one of the States adopts the credit method and the other State the exemption method. It may also be the case that the internal legislation of the State of source does not enable the fiscal authorities of that State to make use of a right to tax conferred on it by the Convention — *e.g.* where it does not impose capital tax. In such cases it is left to the negotiating States to agree upon the necessary modifications in the provision mentioned."

Paragraph 35 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until it was deleted when the 1977 Model Convention was adopted, read as follows:

"35. The provision concerning progression, proposed in the Article, relates only to the State of residence. A question arises, however, when a State of source which applies a progressive tax scale gives up the right to tax and the non-resident taxpayer derives other income from that State. Different principles may be applied by a State of source in determining its progression. Its internal tax law may provide for the calculation of the progression on the global income of the taxpayer or only on the total income arising to the taxpayer in the State of source."

Paragraph 36: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999). In the 1977 Model Convention and until 29 April 2000, paragraph 36 read as follows:

"36. As already mentioned in paragraph 31 above, the exemption method does not apply to such items of income which according to the Convention may be taxed in the State of residence but may also be subjected to a limited tax in the other Contracting State. For such items of income, paragraph 2 of Article 23 A provides for the credit method (see paragraph 47 below)."

Paragraph 36 of the 1977 Model Convention replaced paragraph 36 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 36 read as follows:

"36. The form of the Article does not prejudice the application by the State of source of the provisions of its national legislation concerning the progression. If two Contracting States wish to clarify whether, or to what extent, the State of source shall have the right to use a progression they are left free to do so in bilateral negotiations."

Paragraph 37: Paragraph 37 was amended and the preceding heading was renumbered "B", in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 37 and the preceding heading read as follows:

"C. Alternative Formulation of the Article

37. An effect of the exemption system as it is drafted in the Article is that the taxable income or capital in the State of residence is reduced by the amount which the State of residence exempts. If in a particular State the amount of income as determined for income tax purposes is used as a measure for other purposes, e.g. social benefits, the application of the exemption system in the form proposed may have the effect that such benefits may be given to persons who ought not to receive them. To avoid such consequences, the Article may be altered so that the income in question is included in the taxable income in the State of residence. The State of residence must then in such cases give up that part of the total tax appropriate to the income concerned. This procedure would give the same result as the Article in the form proposed. States can be left free to make such modifications in the drafting of the Article. If a State wants to draft the Article as indicated above, paragraph 1 may be drafted as follows:

"Where a resident of a Contracting State derives income or owns capital which, in accordance with the provisions of this Convention, may be taxed in the other Contracting State, the first-mentioned State shall, subject to the provisions of paragraph 2, allow as a deduction from the income tax or capital tax that part of the income tax or capital tax, respectively, which is appropriate, as the case may

be, to the income derived from or the capital owned in that other Contracting State.””

Paragraph 38: Amended on 22 July 2010 by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010. In the 1977 Model Convention and until 22 July 2010, paragraph 38 read as follows:

“38. Article 23 A contains the principle that the State of residence has to give exemption, but does not give detailed rules on how the exemption has to be implemented. This is consistent with the general pattern of the Convention. Articles 6 to 22 too lay down rules attributing the right to tax in respect of the various types of income or capital without dealing, as a rule, with the determination of taxable income or capital, deductions, rate of tax, etc. (see, however, paragraph 3 of Article 7 and Article 24). Experience has shown that many problems may arise. This is especially true with respect to Article 23 A. Some of them are dealt with in the following paragraphs. In the absence of a specific provision in the Convention, the domestic laws of each Contracting State are applicable. Some conventions contain an express reference to the domestic laws but of course this would not help where the exemption method is not used in the domestic laws. In such cases, Contracting States which face this problem should establish rules for the application of Article 23 A, if necessary, after having consulted with the competent authority of the other Contracting State (paragraph 3 of Article 25).”

Paragraph 38 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 38 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 44 (see history of paragraph 44) and the preceding heading was amended and moved with it. At the same time and a new paragraph 38 and preceding heading were added.

Paragraph 39: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 39 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 47 (see history of paragraph 47) and the preceding heading was amended and moved with it. At the same time a new paragraph 39 and preceding heading were added.

Paragraph 40: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 40 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 48 (see history of paragraph 48) and a new paragraph 40 was added.

Paragraph 41: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 41 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 57 (see history of paragraph 57), the preceding headings were amended and moved with it and a new paragraph 41 was added.

Paragraph 42: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 42 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 58 (see history of paragraph 58) and a new paragraph 42 was added.

Paragraph 43: Replaced paragraph 43 of the 1977 Model Convention replaced paragraph 43 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 43 read as follows:

"43. According to the Article the deduction, which the State of residence is to allow, shall not exceed that part of the income tax which is appropriate to the income derived from the State of source. If a resident of one State derives income of different kinds from the State of source and that State, according to its tax law, imposes tax only on one of these incomes, the maximum deduction which the State of residence is to allow will be that part of its tax which is appropriate only to that item of income which is taxed in the State of source. If a resident of one State, deriving income from another State, has a loss in his State of residence — less than the income from abroad — the total tax charged in the State of residence will be appropriate to the income from the State of source, and the maximum deduction which the State of residence is to allow will consequently be the tax charged in that State."

Paragraph 44: Corresponded to 38 of the 1963 Draft Convention. Paragraph 44 of the 1963 Draft Convention was deleted and paragraph 38 was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the heading preceding paragraph 38 was amended and moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 38 and the preceding heading read as follows:

"D. Special Treatment of Losses

38. Where the State of residence allows as a deduction from the income it assesses the amount of a loss incurred in the other State, there should be no objection if, when profits are made subsequently in the other State, the exemption for the later years is restricted appropriately. States are left free in this respect and, if it is found necessary for clarification, can refer to such a restriction in the Article."

Paragraph 44 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until it was deleted when the 1977 Model Convention was adopted, read as follows:

"44. A modification of the credit method was requested by Italy. The Italian taxation system is based predominantly on the principle of the territoriality of the tax, that is to say, in principle, any income arising abroad is not taxable in Italy for the purposes of the impersonal or schedular taxes (i.e. tax on income from movable property, tax on income from built-up property, tax on income from land, etc.) but, when taxable, is charged to the progressive complementary tax or to the company tax. In view of that fact, Italy wishes to limit the credit to that part only of the tax paid abroad which exceeds the Italian impersonal or schedular tax not charged in Italy. It is agreed that Italy can be left free to apply the credit method with such modification."

Paragraph 45: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 45 of the 1963 Draft Convention was amended and renumbered as paragraph 68 (see history of paragraph 70), the preceding heading was amended and renumbered and a new paragraph 45 and preceding heading were added.

Paragraph 46: Amended on 23 July 1992, by replacing the references therein to paragraphs 36 to 65, 39 and 43 of the Commentary on Article 10 with references to paragraphs 40 to 67, 43 and 47 respectively, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 46 read as follows:

"46. Certain States have introduced special systems for taxing corporate income (see paragraphs 36 to 65 of the Commentary on Article 10). In States applying a split rate corporation tax (paragraph 39 of the said Commentary), the problem may

arise whether the income to be exempted has to be deducted from undistributed income (to which the normal rate of tax applies) or from distributed income (to which the reduced rate applies) or whether the income to be exempted has to be attributed partly to distributed and partly to undistributed income. Where, under the laws of a State applying the split rate corporation tax, a supplementary tax is levied in the hands of a parent company on dividends which it received from a domestic subsidiary company but which it does not redistribute (on the grounds that such supplementary tax is a compensation for the benefit of a lower tax rate granted to the subsidiary on the distributions), the problem arises, whether such supplementary tax may be charged where the subsidiary pays its dividends out of income exempt from tax by virtue of the Convention. Finally a similar problem may arise in connection with taxes (*précompte*, Advance Corporation Tax) which are levied on distributed profits of a corporation in order to cover the tax credit attributable to the shareholders (see paragraph 43 of the Commentary on Article 10). The question is whether such special taxes connected with the distribution of profits, could be levied insofar as distributions are made out of profits exempt from tax. It is left to Contracting States to settle these questions by bilateral negotiations."

Paragraph 46 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 46 of the 1963 Draft Convention was amended and renumbered as paragraph 69 (see history of paragraph 71) and a new paragraph 46 was added.

Paragraph 47: Amended on 23 July 1992, by replacing the references therein to paragraphs 70 to 76 with a reference to paragraphs 72 to 78, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 47 read as follows:

"47. In Articles 10 and 11 the right to tax dividends and interest is divided between the State of residence and the State of source. In these cases, the State of residence is left free not to tax if it wants to do so (see *e.g.* paragraphs 70 to 76 below) and to apply the exemption method also to the above-mentioned items of income. However, where the State of residence prefers to make use of its right to tax such items of income, it cannot apply the exemption method to eliminate the double taxation since it would thus give up fully its right to tax the income concerned. For the State of residence, the application of the credit method would normally seem to give a satisfactory solution. Moreover, as already indicated in paragraph 31 above, States which in general apply the exemption method may wish to apply to specific items of income the credit method rather than exemption. Consequently, the paragraph is drafted in accordance with the ordinary credit method. The Commentary on Article 23 B hereafter applies *mutatis mutandis* to paragraph 2 of Article 23 A."

Paragraph 47 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 47 of the 1963 Draft Convention was amended and renumbered as paragraph 70 (see history of paragraph 72) and the preceding heading was moved with it. At the same time a new paragraph 47 and preceding heading were added.

Paragraph 48: Corresponds to paragraph 40 of the 1963 Draft Convention. Paragraph 48 of the 1963 Draft Convention was amended and renumbered as paragraph 71 (see history of paragraph 73) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 40 of the 1963 Draft Convention was amended and renumbered as paragraph 48 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 40 read as follows:

"40. In the cases referred to in the previous paragraph certain maximum percentages are laid down for tax reserved to the State of source. In such cases the rate of tax in the State of residence will very often be higher than the rate in the State of course. Consequently, a limitation of the deduction in accordance with the ordinary credit method would have only a limited significance. If in such cases the Contracting States find it preferable to use the full credit method they can do so by deleting the second sentence of the paragraph."

Paragraph 49: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 49 of the 1963 Draft Convention was amended and renumbered as paragraph 72 (see history of paragraph 74) and a new paragraph 49 and preceding heading were added.

Paragraph 50: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 50 of the 1963 Draft Convention was amended and incorporated into paragraph 73 (see history of paragraph 75) and a new paragraph 50 was added.

Paragraph 51: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 51 of the 1963 Draft Convention was amended and incorporated into paragraph 73 (see history of paragraph 75) and a new paragraph 51 was added.

Paragraph 52: Paragraph 52 of the 1977 Model Convention replaced paragraph 31 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, the heading preceding paragraph 52 was deleted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until they were deleted when the 1977 Model Convention was adopted, paragraph 52 and the preceding heading read as follows:

"D. Special Credit With Respect to Dividends

52. Certain States wishing to apply the credit method allow in their Conventions, in respect of dividends received from companies in other States, credit, not only for the amount of tax directly levied on the dividends in those other States, but also for that part of the companies' tax which is appropriate to the dividends. Member States applying this method are left free to do so."

Paragraph 53: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 54: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 55: Amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 55 read as follows:

"55. The 1963 Draft Convention reserved expressly the application of the progressive scale of tax rates by the State of residence (last sentence of paragraph 1 of Article 23 A) and most conventions concluded between OECD member countries, which adopt the exemption method follow this principle. According to paragraph 3 of Article 23 A, as amended, the State of residence retains the right to take the amount of exempted income or capital into consideration when determining the tax to be imposed on the rest of the income or capital. The rule applies even where the exempted income (or items of capital) and the taxable income (or items of capital) accrue to those persons (*e.g.* husband and wife) whose incomes (or items of capital) are taxed jointly according to the domestic laws. This principle of progression applies to income or capital exempted by virtue of paragraph 1 of Article 23 A as well as to income or capital which under any other provision of the Convention "shall be taxable only" in the other Contracting State

(see paragraph 6 above). This is the reason why the principle of progression is transferred from paragraph 1 of Article 23 A to a new paragraph 3 of the said Article, and reference is made to exemption "in accordance with any provision of the Convention"."

Paragraph 55 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 56: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 56.1: Paragraph 56.1 and the heading preceding it were added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 56.2: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 56.3: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 57: Corresponds to paragraph 41 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 41 of the 1963 Draft Convention was amended and renumbered as paragraph 57 and the preceding headings were amended and moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 41 and the preceding headings read as follows:

"III. Comments on Article 23(B) (Credit)

A. Methods

41. Article 23(B) which embodies the credit provision, follows the ordinary credit method: The State of residence allows, as a deduction from its own tax on the income or capital of its resident, an amount equal to the tax paid in the other State on the income derived from, or capital owned in, that other State, but the deduction is restricted to the appropriate proportion of its own tax."

Paragraph 58: Corresponds to paragraph 42 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 42 of the 1963 Draft Convention was amended and renumbered as paragraph 58 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 42 read as follows:

"42. The ordinary credit method is intended to apply, inter alia, to dividends and interest where the State of source has a limited right to tax, but the possibility of a certain modification is referred to under paragraphs 39 and 40 above."

Paragraph 59: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the

OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999). After 23 July 1992 and until 29 April 2000, paragraph 59 read as follows:

> "59. It is to be noted that Article 23 B applies in a State R only to items of income or capital which, in accordance with the Convention, "may be taxed" in the other State E (or S). Items of income or capital which according to Article 8, to paragraph 3 of Article 13, to subparagraph *a)* of paragraphs 1 and 2 of Article 19 and to paragraph 3 of Article 22, "shall be taxable only" in the other State, are from the outset exempt from tax in State R (see paragraph 6 above), and the Commentary on Article 23 A applies to such exempted income and capital. As regards progression, reference is made to paragraph 2 of the Article (and paragraph 79 below)."

Paragraph 59 was previously amended on 23 July 1992, by replacing the reference therein to paragraph 77 by a reference to paragraph 79, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 59 read as follows:

> "59. It is to be noted that Article 23 B applies in a State R only to items of income or capital which, in accordance with the Convention, "may be taxed" in the other State E (or S). Items of income or capital which according to Article 8, to paragraph 3 of Article 13, to subparagraph *a)* of paragraphs 1 and 2 of Article 19 and to paragraph 3 of Article 22, "shall be taxable only" in the other State, are from the outset exempt from tax in State R (see paragraph 6 above), and the Commentary on Article 23 A applies to such exempted income and capital. As regards progression, reference is made to paragraph 2 of the Article (and paragraph 77 below)."

Paragraph 59 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 60: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 61: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 62: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 63: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 64: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 65: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 66: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 67: Replaced paragraph 67 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 67 was renumbered as paragraph 69 (see history of paragraph 69) and a new paragraph 67 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 86 of a previous report entitled "Thin Capitalisation" (adopted by the OECD Council on 26 November 1986).

Paragraph 68: Replaced paragraph 68 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 68 was renumbered as paragraph 70 (see history of paragraph 70), the heading preceding paragraph 68 was moved with it and a new paragraph 68 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of

paragraph 86 of a previous report entitled "Thin Capitalisation" (adopted by the OECD Council on 26 November 1986).

Paragraph 69: Corresponds to paragraph 67 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 69 was renumbered as paragraph 71 (see history of paragraph 71) and paragraph 67 was renumbered as paragraph 69 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 67 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 69.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 69.2: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 69.3: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000).

Paragraph 70: Corresponds to paragraph 68 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 70 was renumbered as paragraph 72 (see history of paragraph 72), the heading preceding paragraph 70 was moved with it, paragraph 68 was renumbered as paragraph 70 and the heading preceding paragraph 68 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 68 of the 1977 Model Convention corresponded to paragraph 45 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 45 of the 1963 Draft Convention was amended and renumbered as paragraph 68 and the preceding heading was amended and moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 45 and the preceding heading read as follows:

> "B. Remarks Concerning Tax on Capital
>
> 45. Capital taxes are included in the present Article. As paragraph 1 is drafted, credit is to be allowed for income tax only against income tax and for capital tax only against capital tax. Consequently, credit for or against capital tax will be given only if there is a capital tax in both Contracting States."

Paragraph 71: Corresponds to paragraph 69 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 71 was renumbered as paragraph 73 (see history of paragraph 73) and paragraph 69 was renumbered as paragraph 71 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 69 of the 1977 Model Convention corresponded to paragraph 46 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 46 of the 1963 Draft Convention was amended and renumbered as paragraph 69 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963

Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 46 read as follows:

"46. Under bilateral negotiations, two Contracting States may agree that a tax called a capital tax is of a nature closely related to income tax and may, therefore, wish to allow credit for it against income tax and vice versa. There will be cases where, because one State does not impose a capital tax or because both States impose capital taxes only on domestic assets, no double taxation of capital will arise. In such cases it is, of course understood that the reference to capital taxation may be deleted. Furthermore, negotiating States may find it desirable, regardless of the nature of the taxes included under the Convention, to allow credit for the total amount of tax in the State of source against the total amount of tax in the State of residence. Where, however, a Convention includes both real capital taxes and capital taxes which are in their nature income taxes, the Contracting States may wish to allow credit against income tax only for the latter mentioned capital taxes. In such cases, Contracting States are free to alter the proposed Article so as to achieve the desired effect."

Paragraph 72: Replaced, together with the preceding headings, on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of another report entitled "Tax Sparing: a Reconsideration" (adopted by the OECD Council on 23 October 1997). After 23 July 1992 and until 29 April 2000, paragraph 72 and the preceding heading read as follows:

"*C. The relation in special cases between the taxation in the State of source and the ordinary credit method*

72. In certain cases a State, especially a developing country, may for particular reasons give concessions to taxpayers, *e.g.* tax incentive reliefs to encourage industrial output. In a similar way, a State may exempt from tax certain kinds of income, *e.g.* pensions to war wounded soldiers."

Paragraph 72 corresponded to paragraph 70 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 72 of the 1977 Model Convention was renumbered as paragraph 74 (see history of paragraph 74), paragraph 70 was renumbered as paragraph 72 and the heading preceding paragraph 70 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 70 of the 1977 Model Convention corresponded to paragraph 47 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 47 of the 1963 Draft Convention was amended and renumbered as paragraph 70 and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 47 read as follows:

"47. In certain cases a State, particularly a State which is commonly referred to as an industrially under-developed State, may for particular reasons give concessions to taxpayers, e.g. tax incentive reliefs to encourage industrial output. In a similar way, a State may wish to free from taxation certain kinds of income, e.g. pensions to war wounded soldiers."

Paragraph 73: Replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of another report entitled "Tax Sparing: a Reconsideration" (adopted by the OECD Council on 23 October 1997). After 23 July 1992 and until 29 April 2000, paragraph 73 read as follows:

"73. When such a State concludes a convention with a State which applies the exemption method, no restriction of the relief given to the taxpayers arises, because that other State must give exemption regardless of the amount of tax, if any, imposed in the State of source (see paragraph 34 above). But when the other State applies the credit method, the concession may be nullified to the extent that such other State will allow a deduction only of the tax paid in the State of source. By reason of the concessions, that other State secures what may be called an uncovenanted gain for its own Exchequer."

Paragraph 73 as it read after 23 July 1992 corresponded to paragraph 71 of the 1977 Model Convention. On 23 July 1992 paragraph 73 was renumbered as paragraph 75 (see history of paragraph 75) and paragraph 71 was renumbered as paragraph 73 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 71 of the 1977 Model Convention corresponded to paragraph 48 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 48 of the 1963 Draft Convention was amended and renumbered as paragraph 71 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 48 read as follows:

"48. When such a State concludes a Convention with a State which applies the exemption system, no restriction of the relief given to the taxpayers arises, because that other State must give exemption regardless of the amount of tax, if any, imposed in the State of source. But when the other State applies the credit system the concession is nullified, inasmuch as that other State will allow a deduction only of the tax paid in the State of source. Moreover, by reason of the concessions, that other State secures what may be called an uncovenanted gain for its own Exchequer."

Paragraph 74: Replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of another report entitled "Tax Sparing: a Reconsideration" (adopted by the OECD Council on 23 October 1997). After 23 July 1992 and until 29 April 2000, paragraph 74 read as follows:

"74. Should the two States agree that the benefit of the concessions given to the taxpayers in the State of source are not to be nullified, a derogation from paragraph 2 of Article 23 A, or from Article 23 B will be necessary."

Paragraph 74 as it read after 23 July 1992 corresponded to paragraph 72 of the 1977 Model Convention. On 23 July 1992 paragraph 74 was renumbered as paragraph 76 (see history of paragraph 76) and paragraph 72 was renumbered as paragraph 74 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 72 of the 1977 Model Convention corresponded to paragraph 49 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 49 of the 1963 Draft Convention was amended and renumbered as paragraph 72 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 49 read as follows:

"49. Should the two Contracting States agree that the benefit of the concessions given to the taxpayers in the State of source are not to be nullified, a deviation from Article 23(A) paragraph 2, and Article 23(B) will be necessary."

Paragraph 75: Replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on

29 April 2000 on the basis of another report entitled "Tax Sparing: a Reconsideration" (adopted by the OECD Council on 23 October 1997). After 23 July 1992 and until 29 April 2000, paragraph 75 read as follows:

"75. Various formulae can be used to this effect, as for example:

a) the State of residence will allow as a deduction the amount of tax which the State of source could have imposed in accordance with its general legislation or such amount as limited by the Convention (*e.g.* limitations of rates provided for dividends and interest in Articles 10 and 11) even if the State of source, as a developing country, has waived all or part of that tax under special provisions for the promotion of its economic development;

b) as a counterpart for the tax sacrifice which the developing country makes by reducing in a general way its tax at the source, the State of residence agrees to allow a deduction against its own tax of an amount (in part fictitious) fixed at a higher rate;

c) the State of residence exempts the income which has benefited from tax incentives in the developing country.

Contracting States are free to devise other formulae in the course of bilateral negotiations."

Paragraph 75 as it read after 23 July 1992 corresponded to paragraph 73 of the 1977 Model Convention. On 23 July 1992 paragraph 75 was renumbered as paragraph 77 (see history of paragraph 77) and paragraph 73 was renumbered as paragraph 75 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 73 of the 1977 Model Convention corresponded to paragraphs 50 and 51 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraphs 50 and 51, as they read in the 1963 Draft Convention were amended and incorporated into paragraph 73 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraphs 50 and 51 read as follows:

"50. One method of deviation might be that, where such "tax-spared" income is in question, the exemption method could, as pointed out in paragraph 48, be applied. Already, to cover special cases, a deviation from the exemption method, which embodies the credit method, has been proposed in paragraph 2 of Article 23(A), so that a deviation in this case from the credit method embodying the exemption method might be acceptable. Another deviation might be the adoption of what is called "matching credit". This method secures that the State of residence will allow as a deduction from its own tax an amount corresponding to the tax which would have been paid in the State of source if no concession had been granted by that State. In order that the system should give satisfactory results, it is necessary that the State of source should be able to notify to the State of residence the amount of tax that would have been paid if no relief had been granted.

51. Member States are left free to settle in such cases whether deviations are to be made from the ordinary credit method, and, if so, what form the deviations are to take, and what conditions are to be fulfilled before the deviations."

Paragraph 76: Replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of another report entitled "Tax Sparing: a Reconsideration" (adopted by the OECD Council on 23 October 1997). After 23 July 1992 and until 29 April 2000, paragraph 76 read as follows:

"76. If a Contracting State agrees to stimulate especially investments in the other State being a developing country, the above provisions will generally be accompanied by guarantees for the investors, that is to say, the Convention will limit the rate of tax which can be imposed in the State of source on dividends, interest and royalties."

Paragraph 76 as it read after 23 July 1992 corresponded to paragraph 74 of the 1977 Model Convention. On 23 July 1992 paragraph 76 was renumbered as paragraph 78 (see history of paragraph 78) and paragraph 74 was renumbered as paragraph 76 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 74 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 77: Replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of another report entitled "Tax Sparing: a Reconsideration" (adopted by the OECD Council on 23 October 1997). After 23 July 1992 and until 29 April 2000, paragraph 77 read as follows:

"77. Moreover, time restrictions or time limits can be provided for the application of the advantages referred to in formula *a)*, and possibly *c)*, above: the extended credit (or the exemption) may be granted only in respect of incentives applied temporarily in developing countries, or only for investments made or contracts concluded in the future (for instance, from the date of entry into force of the Convention) or for a determined period of time."

Paragraph 77 as it read after 23 July 1992 corresponded to paragraph 75 of the 1977 Model Convention. On 23 July 1992 paragraph 77 was renumbered as paragraph 79 (see history of paragraph 79), the heading preceding paragraph 77 was moved with it and paragraph 75 was renumbered as paragraph 77 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 75 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 78: Replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of another report entitled "Tax Sparing: a Reconsideration" (adopted by the OECD Council on 23 October 1997). After 23 July 1992 and until 29 April 2000, paragraph 78 read as follows:

"78. Thus, there exists a considerable number of solutions to this problem. In fact, the concrete effects of the provisions concerned can also vary as a result of other factors such as the amount to be included in the taxable income in the State of residence (formulae *a)* and *b)* above); it may be the net income derived (after deduction of the tax effectively paid in the State of source), or the net income grossed-up by an amount equal to the tax effectively paid in the State of source, or to the tax which could have been levied in accordance with the Convention (rates provided for in Articles 10 and 11) or to the tax which the State of residence agrees to allow as a deduction."

Paragraph 78 as it read after 23 July 1992 corresponded to paragraph 76 of the 1977 Model Convention. On 23 July 1992 paragraph 76 was renumbered as paragraph 78 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 76 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 78.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of another report entitled "Tax Sparing: a Reconsideration" (adopted by the OECD Council on 23 October 1997).

Paragraph 79: Corresponds to paragraph 77 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 77 was renumbered as paragraph 79 and the heading preceding paragraph 77 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 77 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 80: Added, together with the heading preceding it, on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 81: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 82: Deleted together with the heading preceding it on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 82 and the heading preceding it read as follows:

> *"Reservation on the Article*
>
> 82. *Portugal* reserves its position on paragraph 4 of Article 23 A."

Paragraph 82 was added, together with the heading preceding it, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

COMMENTARY ON ARTICLE 24 CONCERNING NON-DISCRIMINATION

General remarks

1. This Article deals with the elimination of tax discrimination in certain precise circumstances. All tax systems incorporate legitimate distinctions based, for example, on differences in liability to tax or ability to pay. The non-discrimination provisions of the Article seek to balance the need to prevent unjustified discrimination with the need to take account of these legitimate distinctions. For that reason, the Article should not be unduly extended to cover so-called "indirect" discrimination. For example, whilst paragraph 1, which deals with discrimination on the basis of nationality, would prevent a different treatment that is really a disguised form of discrimination based on nationality such as a different treatment of individuals based on whether or not they hold, or are entitled to, a passport issued by the State, it could not be argued that non-residents of a given State include primarily persons who are not nationals of that State to conclude that a different treatment based on residence is indirectly a discrimination based on nationality for purposes of that paragraph.

(Replaced on 17 July 2008; see HISTORY)

2. Likewise, the provisions of the Article cannot be interpreted as to require most-favoured-nation treatment. Where a State has concluded a bilateral or multilateral agreement which affords tax benefits to nationals or residents of the other Contracting State(s) party to that agreement, nationals or residents of a third State that is not a Contracting State of the treaty may not claim these benefits by reason of a similar non-discrimination provision in the double taxation convention between the third State and the first-mentioned State. As tax conventions are based on the principle of reciprocity, a tax treatment that is granted by one Contracting State under a bilateral or multilateral agreement to a resident or national of another Contracting State party to that agreement by reason of the specific economic relationship between those Contracting States may not be extended to a resident or national of a third State under the non-discrimination provision of the tax convention between the first State and the third State.

(Replaced on 17 July 2008; see HISTORY)

3. The various provisions of Article 24 prevent differences in tax treatment that are solely based on certain specific grounds (*e.g.* nationality, in the case of paragraph 1). Thus, for these paragraphs to apply, other relevant aspects must be the same. The various provisions of Article 24 use different wording to achieve that result (*e.g.* "in the same circumstances" in paragraphs 1 and 2;

“carrying on the same activities” in paragraph 3; “similar enterprises” in paragraph 5). Also, whilst the Article seeks to eliminate distinctions that are solely based on certain grounds, it is not intended to provide foreign nationals, non-residents, enterprises of other States or domestic enterprises owned or controlled by non-residents with a tax treatment that is better than that of nationals, residents or domestic enterprises owned or controlled by residents (see, for example, paragraph 34 below).

(Replaced on 17 July 2008; see HISTORY)

4. Finally, as illustrated by paragraph 79 below, the provisions of the Article must be read in the context of the other Articles of the Convention so that measures that are mandated or expressly authorised by the provisions of these Articles cannot be considered to violate the provisions of the Article even if they only apply, for example, as regards payments to non-residents. Conversely, however, the fact that a particular measure does not constitute a violation of the provisions of the Article does not mean that it is authorised by the Convention since that measure could violate other Articles of the Convention.

(Replaced on 17 July 2008; see HISTORY)

Paragraph 1

5. This paragraph establishes the principle that for purposes of taxation discrimination on the grounds of nationality is forbidden, and that, subject to reciprocity, the nationals of a Contracting State may not be less favourably treated in the other Contracting State than nationals of the latter State in the same circumstances.

(Renumbered on 17 July 2008; see HISTORY)

6. It is noteworthy that the principle of non-discrimination, under various descriptions and with a more or less wide scope, was applied in international fiscal relations well before the appearance, at the end of the 19th Century, of the classic type of double taxation conventions. Thus, in a great many agreements of different kinds (consular or establishment conventions, treaties of friendship or commerce, etc.) concluded by States, especially in the 19th Century, in order to extend and strengthen the diplomatic protection of their nationals wherever resident, there are clauses under which each of the two Contracting States undertakes to accord nationals of the other State equality of treatment with its own nationals. The fact that such clauses subsequently found their way into double taxation conventions has in no way affected their original justification and scope. The text of paragraph 1 provides that the application of this paragraph is not restricted by Article 1 to nationals solely who are residents of a Contracting State, but on the contrary, extends to

all nationals of each Contracting State, whether or not they be residents of one of them. In other words, all nationals of a Contracting State are entitled to invoke the benefit of this provision as against the other Contracting State. This holds good, in particular, for nationals of the Contracting States who are not residents of either of them but of a third State.

(Renumbered on 17 July 2008; see HISTORY)

7. The expression "in the same circumstances" refers to taxpayers (individuals, legal persons, partnerships and associations) placed, from the point of view of the application of the ordinary taxation laws and regulations, in substantially similar circumstances both in law and in fact. The expression "in particular with respect to residence" makes clear that the residence of the taxpayer is one of the factors that are relevant in determining whether taxpayers are placed in similar circumstances. The expression "in the same circumstances" would be sufficient by itself to establish that a taxpayer who is a resident of a Contracting State and one who is not a resident of that State are not in the same circumstances. In fact, whilst the expression "in particular with respect to residence" did not appear in the 1963 Draft Convention or in the 1977 Model Convention, the member countries have consistently held, in applying and interpreting the expression "in the same circumstances", that the residence of the taxpayer must be taken into account. However, in revising the Model Convention, the Committee on Fiscal Affairs felt that a specific reference to the residence of the taxpayers would be a useful clarification as it would avoid any possible doubt as to the interpretation to be given to the expression "in the same circumstances" in this respect.

(Renumbered on 17 July 2008; see HISTORY)

8. In applying paragraph 1, therefore, the underlying question is whether two persons who are residents of the same State are being treated differently solely by reason of having a different nationality. Consequently if a Contracting State, in giving relief from taxation on account of family responsibilities, distinguishes between its own nationals according to whether they reside in its territory or not, that State cannot be obliged to give nationals of the other State who do not reside in its territory the same treatment as it gives its resident nationals but it undertakes to extend to them the same treatment as is available to its nationals who reside in the other State. Similarly, paragraph 1 does not apply where a national of a Contracting State (State R) who is also a resident of State R is taxed less favourably in the other Contracting State (State S) than a national of State S residing in a third State (for instance, as a result of the application of provisions aimed at discouraging the use of tax havens) as the two persons are not in the same circumstances with respect to their residence.

(Renumbered on 17 July 2008; see HISTORY)

9. The expression "in the same circumstances" can in some cases refer to a person's tax situation. This would be the case, for example, where a country would subject its nationals, or some of them, to a more comprehensive tax liability than non-nationals (this, for example, is a feature of the United States tax system). As long as such treatment is not itself a violation of paragraph 1, it could not be argued that persons who are not nationals of that State are in the same circumstances as its nationals for the purposes of the application of the other provisions of the domestic tax law of that State with respect to which the comprehensive or limited liability to tax of a taxpayer would be relevant (*e.g.* the granting of personal allowances).

(Replaced on 17 July 2008; see HISTORY)

10. Likewise, the provisions of paragraph 1 are not to be construed as obliging a State which accords special taxation privileges to its own public bodies or services as such, to extend the same privileges to the public bodies and services of the other State.

(Renumbered on 17 July 2008; see HISTORY)

11. Neither are they to be construed as obliging a State which accords special taxation privileges to private institutions not for profit whose activities are performed for purposes of public benefit, which are specific to that State, to extend the same privileges to similar institutions whose activities are not for its benefit.

(Renumbered on 17 July 2008; see HISTORY)

12. To take the first of these two cases, if a State accords immunity from taxation to its own public bodies and services, this is justified because such bodies and services are integral parts of the State and at no time can their circumstances be comparable to those of the public bodies and services of the other State. Nevertheless, this reservation is not intended to apply to State corporations carrying on gainful undertakings. To the extent that these can be regarded as being on the same footing as private business undertakings, the provisions of paragraph 1 will apply to them.

(Renumbered on 17 July 2008; see HISTORY)

13. As for the second case, if a State accords taxation privileges to certain private institutions not for profit, this is clearly justified by the very nature of these institutions' activities and by the benefit which that State and its nationals will derive from those activities.

(Renumbered on 17 July 2008; see HISTORY)

14. Furthermore, paragraph 1 has been deliberately framed in a negative form. By providing that the nationals of a Contracting State may not be subjected in the other Contracting State to any taxation or any requirement

connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of the other Contracting State in the same circumstances are or may be subjected, this paragraph has the same mandatory force as if it enjoined the Contracting States to accord the same treatment to their respective nationals. But since the principal object of this clause is to forbid discrimination in one State against the nationals of the other, there is nothing to prevent the first State from granting to persons of foreign nationality, for special reasons of its own, or in order to comply with a special stipulation in a double taxation convention, such as, notably, the requirement that profits of permanent establishments are to be taxed in accordance with Article 7, certain concessions or facilities which are not available to its own nationals. As it is worded, paragraph 1 would not prohibit this.

(Amended on 22 July 2010; see HISTORY)

15. Subject to the foregoing observation, the words "… shall not be subjected … to any taxation or any requirement connected therewith which is other or more burdensome …" mean that when a tax is imposed on nationals and foreigners in the same circumstances, it must be in the same form as regards both the basis of charge and the method of assessment, its rate must be the same and, finally, the formalities connected with the taxation (returns, payment, prescribed times, etc.) must not be more onerous for foreigners than for nationals.

(Renumbered on 17 July 2008; see HISTORY)

16. In view of the legal relationship created between the company and the State under whose law it is constituted, which from certain points of view is closely akin to the relationship of nationality in the case of individuals, it seems justifiable not to deal with legal persons, partnerships and associations in a special provision, but to assimilate them with individuals under paragraph 1. This result is achieved through the definition of the term "national" in subparagraph *g)* of paragraph 1 of Article 3.

(Renumbered and amended on 17 July 2008; see HISTORY)

17. By virtue of that definition, in the case of a legal person such as a company, "national of a Contracting State" means a legal person "deriving its status as such from the laws in force in that Contracting State". A company will usually derive its status as such from the laws in force in the State in which it has been incorporated or registered. Under the domestic law of many countries, however, incorporation or registration constitutes the criterion, or one of the criteria, to determine the residence of companies for the purposes of Article 4. Since paragraph 1 of Article 24 prevents different treatment based on nationality but only with respect to persons or entities "in the same

circumstances, in particular with respect to residence", it is therefore important to distinguish, for purposes of that paragraph, a different treatment that is solely based on nationality from a different treatment that relates to other circumstances and, in particular, residence. As explained in paragraphs 7 and 8 above, paragraph 1 only prohibits discrimination based on a different nationality and requires that all other relevant factors, including the residence of the entity, be the same. The different treatment of residents and non-residents is a crucial feature of domestic tax systems and of tax treaties; when Article 24 is read in the context of the other Articles of the Convention, most of which provide for a different treatment of residents and non-residents, it is clear that two companies that are not residents of the same State for purposes of the Convention (under the rules of Article 4) are usually not in the same circumstances for purposes of paragraph 1.

(Replaced on 17 July 2008; see HISTORY)

18. Whilst residents and non-residents are usually not in the same circumstances for the purposes of paragraph 1, it is clear, however, that this is not the case where residence has no relevance whatsoever with respect to the different treatment under consideration.

(Replaced on 17 July 2008; see HISTORY)

19. The following examples illustrate these principles.

(Replaced on 17 July 2008; see HISTORY)

20. Example 1: Under the domestic income tax law of State A, companies incorporated in that State or having their place of effective management in that State are residents thereof. The State A - State B tax convention is identical to this Model Tax Convention. The domestic tax law of State A provides that dividends paid to a company incorporated in that country by another company incorporated in that country are exempt from tax. Since a company incorporated in State B that would have its place of effective management in State A would be a resident of State A for purposes of the State A - State B Convention, the fact that dividends paid to such a company by a company incorporated in State A would not be eligible for this exemption, even though the recipient company is in the same circumstances as a company incorporated in State A with respect to its residence, would constitute a breach of paragraph 1 absent other relevant different circumstances.

(Replaced on 17 July 2008; see HISTORY)

21. Example 2: Under the domestic income tax law of State A, companies incorporated in that State are residents thereof and companies incorporated abroad are non-residents. The State A - State B tax convention is identical to

this Model Tax Convention except that paragraph 3 of Article 4 provides that if a legal person is a resident of both States under paragraph 1 of that Article, that legal person shall be deemed to be a resident of the State in which it has been incorporated. The domestic tax law of State A provides that dividends paid to a company incorporated in that country by another company incorporated in that country are exempt from tax. paragraph 1 does not extend that treatment to dividends paid to a company incorporated in State B. Even if a company incorporated in State A and a company incorporated in State B that receive such dividends are treated differently, these companies are not in the same circumstances with regards to their residence and residence is a relevant factor in this case (as can be concluded, for example, from paragraph 5 of Article 10, which would prevent the subsequent taxation of dividends paid by a non-resident company but not those paid by a resident company).

(Replaced on 17 July 2008; see HISTORY)

22. Example 3: Under the domestic income tax law of State A, companies that are incorporated in that State are residents thereof. Under the domestic tax law of State B, companies that have their place of effective management in that State are residents thereof. The State A - State B tax convention is identical to this Model Tax Convention. The domestic tax law of State A provides that a non-resident company that is a resident of a State with which State A does not have a tax treaty that allows for the exchange of tax information is subject to an annual tax equal to 3 per cent of the value of its immovable property instead of a tax on the net income derived from that property. A company incorporated in State B but which is a resident of a State with which State A does not have a tax treaty that allows for the exchange of tax information cannot claim that paragraph 1 prevents the application of the 3 per cent tax levied by State A because it is treated differently from a company incorporated in State A. In that case, such a company would not be in the same circumstances, with respect to its residence, as a company incorporated in State A and the residence of the company would be relevant (*e.g.* for purposes of accessing the information necessary to verify the net income from immovable property derived by a non-resident taxpayer).

(Replaced on 17 July 2008; see HISTORY)

23. Example 4: Under the domestic income tax law of State A, companies incorporated in that State are residents of State A and companies incorporated abroad are non-residents. The State A - State B tax convention is identical to this Model Tax Convention except that paragraph 3 of Article 4 provides that if a legal person is a resident of both States under paragraph 1 of that Article, that legal person shall be deemed to be a resident of the State in which it has been incorporated. Under State A's payroll tax law, all companies

that employ resident employees are subject to a payroll tax that does not make any distinction based on the residence of the employer but that provides that only companies incorporated in State A shall benefit from a lower rate of payroll tax. In that case, the fact that a company incorporated in State B will not have the same residence as a company incorporated in State A for the purposes of the A-B convention has no relevance at all with respect to the different tax treatment under the payroll tax and that different treatment would therefore be in violation of paragraph 1 absent other relevant different circumstances.

(Replaced on 17 July 2008; see HISTORY)

24. Example 5: Under the domestic income tax law of State A, companies incorporated in that State or which have their place of effective management in that State are residents of the State and companies that do not meet one of these two conditions are non-residents. Under the domestic income tax law of State B, companies incorporated in that State are residents of that State. The State A - State B tax convention is identical to this Model Tax Convention except that paragraph 3 of Article 4 provides that if a legal person is a resident of both States under paragraph 1 of that Article, that legal person shall be deemed to be a resident only of the State in which it has been incorporated. The domestic tax law of State A further provides that companies that have been incorporated and that have their place of effective management in that State are entitled to consolidate their income for tax purposes if they are part of a group of companies that have common shareholders. Company X, which was incorporated in State B, belongs to the same group as two companies incorporated in State A and all these companies are effectively managed in State A. Since it was not incorporated in State A, company X is not allowed to consolidate its income with that of the two other companies.

(Replaced on 17 July 2008; see HISTORY)

25. In that case, even if company X is a resident of State A under the domestic law of that State, it is not a resident of State A for purposes of the Convention by virtue of paragraph 3 of Article 4. It will therefore not be in the same circumstances as the other companies of the group as regards residence and paragraph 1 will not allow it to obtain the benefits of consolidation even if the different treatment results from the fact that company X has not been incorporated in State A. The residence of company X is clearly relevant with respect to the benefits of consolidation since certain provisions of the Convention, such as Articles 7 and 10, would prevent State A from taxing certain types of income derived by company X.

(Replaced on 17 July 2008; see HISTORY)

Paragraph 2

26. On 28 September 1954, a number of States concluded in New York a Convention relating to the status of stateless persons, under Article 25 of which stateless persons must be accorded national treatment. The signatories of the Convention include several OECD member countries.

(Renumbered on 17 July 2008; see HISTORY)

27. It should, however, be recognised that the provisions of paragraph 2 will, in a bilateral convention, enable national treatment to be extended to stateless persons who, because they are in one of the situations enumerated in paragraph 2 of Article 1 of the above-mentioned Convention of 28 September 1954, are not covered by that Convention. This is mainly the case, on the one hand, of persons receiving at the time of signature of that Convention, protection or assistance from organs or agencies of the United Nations other than the United Nations High Commissioner for Refugees, and, on the other hand, of persons who are residents of a country and who there enjoy and are subject to the rights and obligations attaching to the possession of that country's nationality.

(Renumbered on 17 July 2008; see HISTORY)

28. The purpose of paragraph 2 is to limit the scope of the clause concerning equality of treatment with nationals of a Contracting State solely to stateless persons who are residents of that or of the other Contracting State.

(Renumbered on 17 July 2008; see HISTORY)

29. By thus excluding stateless persons who are residents of neither Contracting State, such a clause prevents their being privileged in one State as compared with nationals of the other State.

(Renumbered on 17 July 2008; see HISTORY)

30. However, if States were to consider it desirable in their bilateral relations to extend the application of paragraph 2 to all stateless persons, whether residents of a Contracting State or not, so that in all cases they enjoy the most favourable treatment accorded to nationals of the State concerned, in order to do this they would need only to adopt the following text which contains no condition as to residence in a Contracting State:

> Notwithstanding the provisions of Article 1, stateless persons shall not be subjected in a Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that State in the same circumstances, in particular with respect to residence, are or may be subjected.

(Renumbered on 17 July 2008; see HISTORY)

31. It is possible that in the future certain States will take exception to the provisions of paragraph 2 as being too liberal insofar as they entitle stateless persons who are residents of one State to claim equality of treatment not only in the other State but also in their State of residence and thus benefit in particular in the latter from the provisions of double taxation conventions concluded by it with third States. If such States wished to avoid this latter consequence, they would have to modify paragraph 2 as follows:

> Stateless persons who are residents of a Contracting State shall not be subjected in the other Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances, in particular with respect to residence, are or may be subjected.

(Renumbered on 17 July 2008; see HISTORY)

32. Finally, it should be understood that the definition of the term "stateless person" to be used for the purposes of such a clause can only be that laid down in paragraph 1 of Article 1 of the Convention of 28 September 1954, which defines a stateless person as "a person who is not considered as a national by any State under the operation of its law".

(Renumbered on 17 July 2008; see HISTORY)

Paragraph 3

33. Strictly speaking, the type of discrimination which this paragraph is designed to end is discrimination based not on nationality but on the actual situs of an enterprise. It therefore affects without distinction, and irrespective of their nationality, all residents of a Contracting State who have a permanent establishment in the other Contracting State.

(Renumbered on 17 July 2008; see HISTORY)

34. It appears necessary first to make it clear that the wording of the first sentence of paragraph 3 must be interpreted in the sense that it does not constitute discrimination to tax non-resident persons differently, for practical reasons, from resident persons, as long as this does not result in more burdensome taxation for the former than for the latter. In the negative form in which the provision concerned has been framed, it is the result alone which counts, it being permissible to adapt the mode of taxation to the particular circumstances in which the taxation is levied. For example, paragraph 3 does not prevent the application of specific mechanisms that apply only for the purposes of determining the profits that are attributable to a permanent establishment. The paragraph must be read in the context of the Convention and, in particular, of paragraph 2 of Article 7 which provides that the profits

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

attributable to the permanent establishment are those that a separate and independent enterprise engaged in the same or similar activities under the same or similar conditions would have been expected to make. Clearly, rules or administrative practices that seek to determine the profits that are attributable to a permanent establishment on the basis required by paragraph 2 of Article 7 cannot be considered to violate paragraph 3, which is based on the same principle since it requires that the taxation on the permanent establishment be not less favourable than that levied on a domestic enterprise carrying on similar activities.

(Amended on 22 July 2010; see HISTORY)

35. By the terms of the first sentence of paragraph 3, the taxation of a permanent establishment shall not be less favourably levied in the State concerned than the taxation levied on enterprises of that State carrying on the same activities. The purpose of this provision is to end all discrimination in the treatment of permanent establishments as compared with resident enterprises belonging to the same sector of activities, as regards taxes based on business activities, and especially taxes on business profits.

(Renumbered on 17 July 2008; see HISTORY)

36. However, the second sentence of paragraph 3 specifies the conditions under which the principle of equal treatment set forth in the first sentence should be applied to individuals who are residents of a Contracting State and have a permanent establishment in the other State. It is designed mainly to ensure that such persons do not obtain greater advantages than residents, through entitlement to personal allowances and reliefs for family responsibilities, both in the State of which they are residents, by the application of its domestic laws, and in the other State by virtue of the principle of equal treatment. Consequently, it leaves it open to the State in which the permanent establishment is situated whether or not to give personal allowances and reliefs to the persons concerned in the proportion which the amount of the permanent establishment's profits bears to the world income taxable in the other State.

(Renumbered on 17 July 2008; see HISTORY)

37. It is also clear that, for purposes of paragraph 3, the tax treatment in one Contracting State of the permanent establishment of an enterprise of the other Contracting State should be compared to that of an enterprise of the first-mentioned State that has a legal structure that is similar to that of the enterprise to which the permanent establishment belongs. Thus, for example, paragraph 3 does not require a State to apply to the profits of the permanent establishment of an enterprise carried on by a non-resident individual the

same rate of tax as is applicable to an enterprise of that State that is carried on by a resident company.

(Replaced on 17 July 2008; see HISTORY)

38. Similarly, regulated and unregulated activities would generally not constitute the "same activities" for the purposes of paragraph 3. Thus, for instance, paragraph 3 would not require that the taxation on a permanent establishment whose activities include the borrowing and lending of money but which is not registered as a bank be not less favourably levied than that of domestic banks since the permanent establishment does not carry on the same activities. Another example would be that of activities carried on by a State or its public bodies, which, since they are controlled by the State, could not be considered, for the purposes of paragraph 3, to be similar to activities that an enterprise of the other State performs through a permanent establishment.

(Replaced on 17 July 2008; see HISTORY)

39. As regards the first sentence, experience has shown that it was difficult to define clearly and completely the substance of the principle of equal treatment and this has led to wide differences of opinion with regard to the many implications of this principle. The main reason for difficulty seems to reside in the actual nature of the permanent establishment, which is not a separate legal entity but only a part of an enterprise that has its head office in another State. The situation of the permanent establishment is different from that of a domestic enterprise, which constitutes a single entity all of whose activities, with their fiscal implications, can be fully brought within the purview of the State where it has its head office. The implications of the equal treatment clause will be examined below under several aspects of the levying of tax.

(Renumbered on 17 July 2008; see HISTORY)

A. Assessment of tax

40. With regard to the basis of assessment of tax, the principle of equal treatment normally has the following implications:

a) Permanent establishments must be accorded the same right as resident enterprises to deduct the trading expenses that are, in general, authorised by the taxation law to be deducted from taxable profits. Such deductions should be allowed without any restrictions other than those also imposed on resident enterprises (see also paragraphs 33 and 34 of the Commentary on Article 7).

b) Permanent establishments must be accorded the same facilities with regard to depreciation and reserves. They should be entitled to avail

themselves without restriction not only of the depreciation facilities which are customarily available to enterprises (straight line depreciation, declining balance depreciation), but also of the special systems that exist in a number of countries ("wholesale" writing down, accelerated depreciation, etc.). As regards reserves, it should be noted that these are sometimes authorised for purposes other than the offsetting — in accordance with commercial accounting principles — of depreciation on assets, expenses or losses which have not yet occurred but which circumstances make likely to occur in the near future. Thus, in certain countries, enterprises are entitled to set aside, out of taxable profit, provisions or "reserves" for investment. When such a right is enjoyed by all enterprises, or by all enterprises in a given sector of activity, it should normally also be enjoyed, under the same conditions, by non-resident enterprises with respect to their permanent establishments situated in the State concerned, insofar, that is, as the activities to which such provisions or reserves would pertain are taxable in that State.

c) Permanent establishments should also have the option that is available in most countries to resident enterprises of carrying forward or backward a loss brought out at the close of an accounting period within a certain period of time (*e.g.* 5 years). It is hardly necessary to specify that in the case of permanent establishments it is the loss on their own business activities which will qualify for such carry-forward.

d) Permanent establishments should further have the same rules applied to resident enterprises, with regard to the taxation of capital gains realised on the alienation of assets, whether during or on the cessation of business.

(Amended on 22 July 2010; see HISTORY)

41. As clearly stated in subparagraph *c)* above, the equal treatment principle of paragraph 3 only applies to the taxation of the permanent establishment's own activities. That principle, therefore, is restricted to a comparison between the rules governing the taxation of the permanent establishment's own activities and those applicable to similar business activities carried on by an independent resident enterprise. It does not extend to rules that take account of the relationship between an enterprise and other enterprises (*e.g.* rules that allow consolidation, transfer of losses or tax-free transfers of property between companies under common ownership) since the latter rules do not focus on the taxation of an enterprise's own business activities similar to those of the permanent establishment but, instead, on the taxation of a resident enterprise as part of a group of associated enterprises. Such rules will often operate to ensure or facilitate tax compliance and administration within

a domestic group. It therefore follows that the equal treatment principle has no application. For the same reasons, rules related to the distribution of the profits of a resident enterprise cannot be extended to a permanent establishment under paragraph 3 as they do not relate to the business activities of the permanent establishment (see paragraph 59 below).

(Replaced on 17 July 2008; see HISTORY)

42. Also, it is clear that the application of transfer pricing rules based on the arm's length standard in the case of transfers from a permanent establishment to its head office (or vice versa) cannot be considered to be a violation of paragraph 3 even if such rules do not apply to transfers within an enterprise of the Contracting State where the permanent establishment is located. Indeed, the application of the arm's length standard to the determination of the profits attributable to a permanent establishment is mandated by paragraph 2 of Article 7 and that paragraph forms part of the context in which paragraph 3 of Article 24 must be read; also, since Article 9 would authorise the application of the arm's length standard to a transfer between a domestic enterprise and a foreign related enterprise, one cannot consider that its application in the case of a permanent establishment results in less favourable taxation than that levied on an enterprise of the Contracting State where the permanent establishment is located.

(Replaced on 17 July 2008; see HISTORY)

43. Although the general rules mentioned above rarely give rise to any difficulties with regard to the principle of non-discrimination, they do not constitute an exhaustive list of the possible consequences of that principle with respect to the determination of the tax base. The application of that principle may be less clear in the case of tax incentive measures which most countries, faced with such problems as decentralisation of industry, development of economically backward regions, or the promotion of new activities necessary for the expansion of the economy, have introduced in order to facilitate the solution of these problems by means of tax exemptions, reductions or other tax advantages given to enterprises for investment which is in line with official objectives.

(Renumbered and amended on 17 July 2008; see HISTORY)

44. As such measures are in furtherance of objectives directly related to the economic activity proper of the State concerned, it is right that the benefit of them should be extended to permanent establishments of enterprises of another State which has a double taxation convention with the first embodying the provisions of Article 24, once they have been accorded the right to engage in business activity in that State, either under its legislation or

under an international agreement (treaties of commerce, establishment conventions, etc.) concluded between the two States.

(Renumbered on 17 July 2008; see HISTORY)

45. It should, however, be noted that although non-resident enterprises are entitled to claim these tax advantages in the State concerned, they must fulfil the same conditions and requirements as resident enterprises. They may, therefore, be denied such advantages if their permanent establishments are unable or refuse to fulfil the special conditions and requirements attached to the granting of them.

(Renumbered on 17 July 2008; see HISTORY)

46. Also, it goes without saying that non-resident enterprises are not entitled to tax advantages attaching to activities the exercise of which is strictly reserved, on grounds of national interest, defence, protection of the national economy, etc., to domestic enterprises, since non-resident enterprises are not allowed to engage in such activities.

(Renumbered and amended on 17 July 2008; see HISTORY)

47. Finally, the provisions of paragraph 3 should not be construed as obliging a State which accords special taxation privileges to non-profit institutions whose activities are performed for purposes of public benefit that are specific to that State, to extend the same privileges to permanent establishments of similar institutions of the other State whose activities are not exclusively for the first-mentioned State's public benefit.

(Replaced on 17 July 2008; see HISTORY)

B. Special treatment of dividends received in respect of holdings owned by permanent establishments

48. In many countries special rules exist for the taxation of dividends distributed between companies (parent company-subsidiary treatment, the *Schachtelprivileg*, the rule *non bis in idem*). The question arises whether such treatment should, by effect of the provisions of paragraph 3, also be enjoyed by permanent establishments in respect of dividends on holdings forming part of their assets.

(Renumbered on 17 July 2008; see HISTORY)

49. On this point opinions differ. Some States consider that such special treatment should be accorded to permanent establishments. They take the view that such treatment was enacted in order to avoid double taxation on profits made by a subsidiary and distributed to a parent company. In principle, profits tax should be levied once, in the hands of the subsidiary performing the profit-generating activities. The parent company should be exempted

from tax on such profits when received from the subsidiary or should, under the indirect credit method, be given relief for the taxation borne by the subsidiary. In cases where shares are held as direct investment by a permanent establishment the same principle implies that such a permanent establishment receiving dividends from the subsidiary should likewise be granted the special treatment in view of the fact that a profits tax has already been levied in the hands of the subsidiary. On the other hand, it is hardly conceivable on this line of thought to leave it to the State where the head office of the parent company is situated to give relief from double taxation brought about by a second levying of tax in the State of the permanent establishment. The State of the parent company, in which no activities giving rise to the doubly taxed profits have taken place, will normally exempt the profits in question or will levy a profits tax which is not sufficient to bear a double credit (*i.e.* for the profits tax on the subsidiary as well as for such tax on the permanent establishment). All this assumes that the shares held by the permanent establishment are effectively connected with its activity. Furthermore, an obvious additional condition is that the profits out of which the dividends are distributed should have borne a profits tax.

(Renumbered on 17 July 2008; see HISTORY)

50. Other States, on the contrary, consider that assimilating permanent establishments to their own enterprises does not entail any obligation to accord such special treatment to the former. They justify their position on various grounds. The purpose of such special treatment is to avoid economic double taxation of dividends and it should be for the recipient company's State of residence and not the permanent establishment's State to bear its cost, because it is more interested in the aim in view. Another reason put forward relates to the sharing of tax revenue between States. The loss of tax revenue incurred by a State in applying such special treatment is partly offset by the taxation of the dividends when they are redistributed by the parent company which has enjoyed such treatment (withholding tax on dividends, shareholder's tax). A State which accorded such treatment to permanent establishments would not have the benefit of such a compensation. Another argument made is that when such treatment is made conditional upon redistribution of the dividends, its extension to permanent establishments would not be justified, for in such a case the permanent establishment, which is only a part of a company of another State and does not distribute dividends, would be more favourably treated than a resident company. Finally, the States which feel that paragraph 3 does not entail any obligation to extend such treatment to permanent establishments argue that there is a risk that companies of one State might transfer their holdings in companies of another

State to their permanent establishments in that other State for the sole purpose of availing themselves of such treatment.

(Renumbered on 23 July 1992; see HISTORY)

51. The fact remains that there can be very valid reasons for a holding being owned and managed by a permanent establishment rather than by the head office of the enterprise, *viz.*,

- — reasons of necessity arising principally from a legal or regulatory obligation on banks and financial institutions and insurance companies to keep deposited in countries where they operate a certain amount of assets, particularly shares, as security for the performance of their obligations;
- — or reasons of expediency, where the holdings are in companies which have business relations with the permanent establishment or whose head offices are situated in the same country as the permanent establishment;
- — or simple reasons of practical convenience, in line with the present tendency towards decentralisation of management functions in large enterprises.

(Renumbered on 17 July 2008; see HISTORY)

52. In view of these divergent attitudes, as well as of the existence of the situations just described, it would be advisable for States, when concluding bilateral conventions, to make clear the interpretation they give to the first sentence of paragraph 3. They can, if they so desire, explain their position, or change it as compared with their previous practice, in a protocol or any other document annexed to the convention.

(Renumbered on 17 July 2008; see HISTORY)

53. A solution could also be provided in such a document to meet the objection mentioned above that the extension of the treatment of holdings in a State (A) to permanent establishments of companies which are residents of another State (B) results in such companies unduly enjoying privileged treatment as compared with other companies which are residents of the same State and whose head offices own holdings in the capital of companies which are residents of State A, in that whereas the dividends on their holdings can be repatriated by the former companies without bearing withholding tax, such tax is levied on dividends distributed to the latter companies at the rate of 5 or 15 per cent as the case may be. Tax neutrality and the equality of tax burdens as between permanent establishments and subsidiary companies, as advocated by the States concerned, could be ensured by adapting, in the bilateral convention between States A and B, the provisions of paragraphs 2

C (24)

and 4 of Article 10, so as to enable withholding tax to be levied in State A on dividends paid by companies which are residents of that State to permanent establishments of companies which are residents of State B in the same way as if they are received directly *i.e.* by the head offices of the latter companies, *viz.*, at the rate of:

— 5 per cent in the case of a holding of at least 25 per cent;

— 15 per cent in all other cases.

(Renumbered on 17 July 2008; see HISTORY)

54. Should it not be possible, because of the absence of appropriate provisions in the domestic laws of the State concerned, to levy a withholding tax there on dividends paid to permanent establishments, the treatment of inter-company dividends could be extended to permanent establishments, as long as its application is limited in such manner that the tax levied by the State of source of the dividends is the same whether the dividends are received by a permanent establishment of a company which is a resident of the other State or are received directly by such a company.

(Renumbered on 17 July 2008; see HISTORY)

C. *Structure and rate of tax*

55. In countries where enterprises, mainly companies, are charged a tax on their profits which is specific to them, the provisions of paragraph 3 raise, with regard to the rate applicable in the case of permanent establishments, some specific issues related to the fact that the permanent establishment is only a part of a legal entity which is not under the jurisdiction of the State where the permanent establishment is situated.

(Renumbered and amended on 17 July 2008; see HISTORY)

56. When the taxation of profits made by companies which are residents of a given State is calculated according to a progressive scale of rates, such a scale should, in principle, be applied to permanent establishments situated in that State. If in applying the progressive scale, the permanent establishment's State takes into account the profits of the whole company to which such a permanent establishment belongs, such a rule would not appear to conflict with the equal treatment rule, since resident companies are in fact treated in the same way (see paragraphs 55, 56 and 79 of the Commentary on Articles 23 A and 23 B). States that tax their own companies in this way could therefore define in their bilateral conventions the treatment applicable to permanent establishments.

(Renumbered on 17 July 2008; see HISTORY)

57. When a system of taxation based on a progressive scale of rates includes a rule that a minimum rate is applicable to permanent establishments, it cannot be claimed *a priori* that such a rule is incompatible with the equal treatment principle. The profits of the whole enterprise to which the permanent establishment belongs should be taken into account in determining the rate applicable according to the progressive scale. The provisions of the first sentence of paragraph 3 are not observed only if the minimum rate is higher.

(Renumbered on 17 July 2008; see HISTORY)

58. However, even if the profits of the whole enterprise to which the permanent establishment belongs are taken into account when applying either a progressive scale of rates or a minimum rate, this should not conflict with the principle of the separate and independent enterprise, according to which the profits of the permanent establishment must be determined under paragraph 2 of Article 7. The minimum amount of the tax levied in the State where the permanent establishment is situated is, therefore, the amount which would be due if it were a separate and independent enterprise, without reference to the profits of the whole enterprise to which it belongs. The State where the permanent establishment is situated is, therefore, justified in applying the progressive scale applicable to resident enterprises solely to the profits of the permanent establishment, leaving aside the profits of the whole enterprise when the latter are less than those of the permanent establishment. This State may likewise tax the profits of the permanent establishment at a minimum rate, provided that the same rate applies also to resident enterprises, even if taking into account the profits of the whole enterprise to which it belongs would result in a lower amount of tax, or no tax at all.

(Amended on 22 July 2010; see HISTORY)

59. Since a permanent establishment, by its very nature, does not distribute dividends, the tax treatment of distributions made by the enterprise to which the permanent establishment belongs is therefore outside the scope of paragraph 3. Paragraph 3 is restricted to the taxation of the profits from the activities of the permanent establishment itself and does not extend to the taxation of the enterprise as a whole. This is confirmed by the second sentence of the paragraph, which confirms that tax aspects related to the taxpayer that owns the permanent establishment, such as personal allowances and deductions, are outside the scope of the paragraph. Thus, issues related to various systems for the integration of the corporate and shareholder's taxes (*e.g.* advance corporate tax, *précompte mobilier*,

computation of franked income and related dividend tax credits) are outside the scope of the paragraph.

(Replaced on 17 July 2008; see HISTORY)

60. In some States, the profits of a permanent establishment of an enterprise of another Contracting State are taxed at a higher rate than the profits of enterprises of that State. This additional tax, sometimes referred to as a "branch tax", may be explained by the fact that if a subsidiary of the foreign enterprise earned the same profits as the permanent establishment and subsequently distributed these profits as a dividend, an additional tax would be levied on these dividends in accordance with paragraph 2 of Article 10. Where such tax is simply expressed as an additional tax payable on the profits of the permanent establishment, it must be considered as a tax levied on the profits of the activities of the permanent establishment itself and not as a tax on the enterprise in its capacity as owner of the permanent establishment. Such a tax would therefore be contrary to paragraph 3.

(Replaced on 17 July 2008; see HISTORY)

61. That situation must, however, be distinguished from that of a tax that would be imposed on amounts deducted, for instance as interest, in computing the profits of a permanent establishment (*e.g.* "branch level interest tax"); in that case, the tax would not be levied on the permanent establishment itself but, rather, on the enterprise to which the interest is considered to be paid and would therefore be outside the scope of paragraph 3 (depending on the circumstances, however, other provisions, such as those of Articles 7 and 11, may be relevant in determining whether such a tax is allowed by the Convention; see the last sentence ofparagraph 4).

(Replaced on 17 July 2008; see HISTORY)

D. Withholding tax on dividends, interest and royalties received by a permanent establishment

62. When permanent establishments receive dividends, interest, or royalties such income, by virtue of paragraph 4 of Articles 10 and 11 and paragraph 3 of Article 12, respectively, comes under the provisions of Article 7 and consequently — subject to the observations made in paragraph 53 above as regards dividends received on holdings of permanent establishment — falls to be included in the taxable profits of such permanent establishments (see paragraph 74 of the Commentary on Article 7).

(Amended on 22 July 2010; see HISTORY)

63. According to the respective Commentaries on the above-mentioned provisions of Articles 10, 11 and 12 (see respectively paragraphs 31, 24 and 20), these provisions dispense the State of source of the dividends, interest or

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

royalties received by the permanent establishment from applying any limitation provided for in those Articles, which means — and this is the generally accepted interpretation — that they leave completely unaffected the right of the State of source, where the permanent establishment is situated, to apply its withholding tax at the full rate.

(Renumbered on 17 July 2008; see HISTORY)

64. While this approach does not create any problems with regard to the provisions of paragraph 3 of Article 24 in the case of countries where a withholding tax is levied on all such income, whether the latter be paid to residents (permanent establishments, like resident enterprises, being allowed to set such withholding tax off against the tax on profits due by virtue of Article 7) or to non residents (subject to the limitations provided for in Articles 10, 11 and 12), the position is different when withholding tax is applied exclusively to income paid to non-residents.

(Renumbered on 17 July 2008; see HISTORY)

65. In this latter case, in fact, it seems difficult to reconcile the levy of withholding tax with the principle set out in paragraph 3 that for the purpose of taxing the income which is derived from their activity, or which is normally connected with it — as is recognised to be the case with dividends, interest and royalties referred to in paragraph 4 of Articles 10 and 11 and in paragraph 3 of Article 12 — permanent establishments must be treated as resident enterprises and hence in respect of such income be subjected to tax on profits solely.

(Renumbered on 17 July 2008; see HISTORY)

66. In any case, it is for Contracting States which have this difficulty to settle it in bilateral negotiations in the light of their peculiar circumstances.

(Renumbered on 17 July 2008; see HISTORY)

E. Credit for foreign tax

67. In a related context, when foreign income is included in the profits attributable to a permanent establishment, it is right by virtue of the same principle to grant to the permanent establishment credit for foreign tax borne by such income when such credit is granted to resident enterprises under domestic laws.

(Renumbered on 17 July 2008; see HISTORY)

68. If in a Contracting State (A) in which is situated a permanent establishment of an enterprise of the other Contracting State (B), credit for tax levied in a third State (C) can be allowed only by virtue of a convention, then the more general question arises as to the extension to permanent

establishments of the benefit of credit provisions included in tax conventions concluded with third States. Whilst the permanent establishment is not itself a person and is therefore not entitled to the benefits of these tax conventions, this issue is relevant to the taxation on the permanent establishment. This question is examined below in the particular case of dividends and interest.

(Renumbered and amended on 17 July 2008; see HISTORY)

F. Extension to permanent establishments of the benefit of the credit provisions of double taxation conventions concluded with third States

69. When the permanent establishment in a Contracting State of a resident enterprise of another Contracting State receives dividends or interest from a third State, then the question arises as to whether and to what extent the Contracting State in which the permanent establishment is situated should credit the tax that cannot be recovered from the third State.

(Renumbered and amended on 17 July 2008; see HISTORY)

70. There is agreement that double taxation arises in these situations and that some method of relief should be found. The majority of member countries are able to grant credit in these cases on the basis of their domestic law or under paragraph 3. States that cannot give credit in such a way or that wish to clarify the situation may wish to supplement the provision in their convention with the Contracting State in which the enterprise is resident by wording that allows the State in which the permanent establishment is situated to credit the tax liability in the State in which the income originates to an amount that does not exceed the amount that resident enterprises in the Contracting State in which the permanent establishment is situated can claim on the basis of the Contracting State's convention with the third State. If the tax that cannot be recovered under the convention between the third State and the State of residence of the enterprise which has a permanent establishment in the other Contracting State is lower than that under the convention between the third State and the Contracting State in which the permanent establishment is situated, then only the lower tax collected in the third State shall be credited. This result would be achieved by adding the following words after the first sentence of paragraph 3:

> When a permanent establishment in a Contracting State of an enterprise of the other Contracting State receives dividends or interest from a third State and the holding or debt-claim in respect of which the dividends or interest are paid is effectively connected with that permanent establishment, the first-mentioned State shall grant a tax credit in respect of the tax paid in the third State on the dividends or interest, as the case may be, by applying the rate of tax provided in the convention with respect to taxes on income and capital between the State of which the enterprise is a resident and the

> third State. However, the amount of the credit shall not exceed the amount that an enterprise that is a resident of the first-mentioned State can claim under that State's convention on income and capital with the third State.

If the convention also provides for other categories of income that may be taxed in the State in which they arise and for which credit should be given (*e.g.* royalties, in some conventions), the above provision should be amended to also cover these.

(Renumbered and amended on 17 July 2008; see HISTORY)

71. Where a permanent establishment situated in a Contracting State of an enterprise resident of another Contracting State (the State of residence) receives dividends, interest or royalties from a third State (the State of source) and, according to the procedure agreed to between the State of residence and the State of source, a certificate of domicile is requested by the State of source for the application of the withholding tax at the rate provided for in the convention between the State of source and the State of residence, this certificate must be issued by the latter State. While this procedure may be useful where the State of residence employs the credit method, it seems to serve no purposes where that State uses the exemption method as the income from the third State is not liable to tax in the State of residence of the enterprise. On the other hand, the State in which the permanent establishment is located could benefit from being involved in the certification procedure as this procedure would provide useful information for audit purposes. Another question that arises with triangular cases is that of abuses. If the Contracting State of which the enterprise is a resident exempts from tax the profits of the permanent establishment located in the other Contracting State, there is a danger that the enterprise will transfer assets such as shares, bonds or patents to permanent establishments in States that offer very favourable tax treatment, and in certain circumstances the resulting income may not be taxed in any of the three States. To prevent such practices, which may be regarded as abusive, a provision can be included in the convention between the State of which the enterprise is a resident and the third State (the State of source) stating that an enterprise can claim the benefits of the convention only if the income obtained by the permanent establishment situated in the other State is taxed normally in the State of the permanent establishment.

(Renumbered on 17 July 2008; see HISTORY)

72. In addition to the typical triangular case considered here, other triangular cases arise, particularly that in which the State of the enterprise is also the State from which the income ascribable to the permanent establishment in the other State originates (see also paragraph 5 of the Commentary on Article 21). States can settle these matters in bilateral

negotiations.

(Renumbered on 17 July 2008; see HISTORY)

Paragraph 4

73. This paragraph is designed to end a particular form of discrimination resulting from the fact that in certain countries the deduction of interest, royalties and other disbursements allowed without restriction when the recipient is resident, is restricted or even prohibited when he is a non-resident. The same situation may also be found in the sphere of capital taxation, as regards debts contracted to a non-resident. It is however open to Contracting States to modify this provision in bilateral conventions to avoid its use for tax avoidance purposes.

(Renumbered on 17 July 2008; see HISTORY)

74. Paragraph 4 does not prohibit the country of the borrower from applying its domestic rules on thin capitalisation insofar as these are compatible with paragraph 1 of Article 9 or paragraph 6 of Article 11. However, if such treatment results from rules which are not compatible with the said Articles and which only apply to non-resident creditors (to the exclusion of resident creditors), then such treatment is prohibited by paragraph 4.

(Renumbered and amended on 17 July 2008; see HISTORY)

75. Also, paragraph 4 does not prohibit additional information requirements with respect to payments made to non-residents since these requirements are intended to ensure similar levels of compliance and verification in the case of payments to residents and non-residents.

(Added on 17 July 2008; see HISTORY)

Paragraph 5

76. This paragraph forbids a Contracting State to give less favourable treatment to an enterprise, the capital of which is owned or controlled, wholly or partly, directly or indirectly, by one or more residents of the other Contracting State. This provision, and the discrimination which it puts an end to, relates to the taxation only of enterprises and not of the persons owning or controlling their capital. Its object therefore is to ensure equal treatment for taxpayers residing in the same State, and not to subject foreign capital, in the hands of the partners or shareholders, to identical treatment to that applied to domestic capital.

(Renumbered on 17 July 2008; see HISTORY)

77. Since the paragraph relates only to the taxation of resident enterprises and not to that of the persons owning or controlling their capital, it follows

that it cannot be interpreted to extend the benefits of rules that take account of the relationship between a resident enterprise and other resident enterprises (*e.g.* rules that allow consolidation, transfer of losses or tax-free transfer of property between companies under common ownership). For example, if the domestic tax law of one State allows a resident company to consolidate its income with that of a resident parent company, paragraph 5 cannot have the effect to force the State to allow such consolidation between a resident company and a non-resident parent company. This would require comparing the combined treatment of a resident enterprise and the non-resident that owns its capital with that of a resident enterprise of the same State and the resident that owns its capital, something that clearly goes beyond the taxation of the resident enterprise alone.

(Added on 17 July 2008; see HISTORY)

78. Also, because paragraph 5 is aimed at ensuring that all resident companies are treated equally regardless of who owns or control their capital and does not seek to ensure that distributions to residents and non-residents are treated in the same way (see paragraph 76 above), it follows that withholding tax obligations that are imposed on a resident company with respect to dividends paid to non-resident shareholders but not with respect to dividends paid to resident shareholders cannot be considered to violate paragraph 5. In that case, the different treatment is not dependent on the fact that the capital of the company is owned or controlled by non-residents but, rather, on the fact that dividends paid to non-residents are taxed differently. A similar example would be that of a State that levies a tax on resident companies that make distributions to their shareholders regardless of whether or not they are residents or non-residents, but which, in order to avoid a multiple application of that tax, would not apply it to distributions made to related resident companies that are themselves subject to the tax upon their own distributions. The fact that the latter exemption would not apply to distributions to non-resident companies should not be considered to violate paragraph 5. In that case, it is not because the capital of the resident company is owned or controlled by non-residents that it is treated differently; it is because it makes distributions to companies that, under the provisions of the treaty, cannot be subjected to the same tax when they re-distribute the dividends received from that resident company. In this example, all resident companies are treated the same way regardless of who owns or controls their capital and the different treatment is restricted to cases where distributions are made in circumstances where the distribution tax could be avoided.

(Added on 17 July 2008; see HISTORY)

79. Since the paragraph prevents the discrimination of a resident enterprise that is solely based on who owns or controls the capital of that enterprise, it

would not *prima facie* be relevant with respect to rules that provide for a different treatment of an enterprise based on whether it pays interest to resident or non-resident creditors. The paragraph is not concerned with rules based on a debtor-creditor relationship as long as the different treatment resulting from the rules is not based on whether or not non-residents own or control, wholly or partly, directly or indirectly, the capital of the enterprise. For example, if under a State's domestic thin capitalisation rules, a resident enterprise is not allowed to deduct interest paid to a non-resident associated enterprise, that rule would not be in violation of paragraph 5 even where it would be applied to payments of interest made to a creditor that would own or control the capital of the enterprise, provided that the treatment would be the same if the interest had been paid to a non-resident associated enterprise that did not itself own or control any of the capital of the payer. Clearly, however, such a domestic law rule could be in violation of paragraph 4 to the extent that different conditions would apply for the deduction of interest paid to residents and non-residents and it will therefore be important to determine, for purposes of that paragraph, whether the application of the rule is compatible with the provisions of paragraph 1 of Article 9 or paragraph 6 of Article 11 (see paragraph 74 above). This would also be important for purposes of paragraph 5 in the case of thin capitalisation rules that would apply only to enterprises of a Contracting State the capital of which is wholly or partly owned or controlled, directly or indirectly, by non-residents. Indeed, since the provisions of paragraph 1 of Article 9 or paragraph 6 of Article 11 form part of the context in which paragraph 5 must be read (as required by Article 31 of the *Vienna Convention on the Law of Treaties*), adjustments which are compatible with these provisions could not be considered to violate the provisions of paragraph 5.

(Added on 17 July 2008; see HISTORY)

80. In the case of transfer pricing enquiries, almost all member countries consider that additional information requirements which would be more stringent than the normal requirements, or even a reversal of the burden of proof, would not constitute discrimination within the meaning of the Article.

(Renumbered on 17 July 2008; see HISTORY)

Paragraph 6

81. This paragraph states that the scope of the Article is not restricted by the provisions of Article 2. The Article therefore applies to taxes of every kind and description levied by, or on behalf of, the State, its political subdivisions or local authorities.

(Renumbered on 17 July 2008; see HISTORY)

Observations on the Commentary

82. The interpretation given in paragraphs 57 and 58 above is not endorsed by *Germany*, the tax laws of which require the application of a minimum rate on exclusively inbound sources with respect to non-residents; the minimum rate is close to the lower end of the progressive tax scale.

(Renumbered and amended on 17 July 2008; see HISTORY)

83. The *United States* observes that its non-resident citizens are not in the same circumstances as other non-residents, since the United States taxes its non-resident citizens on their worldwide income.

(Renumbered and amended on 17 July 2008; see HISTORY)

84. With respect to paragraph 71, the *Netherlands* acknowledges that States may wish to include in their bilateral conventions a provision to assure that the benefits of the Convention are denied in "triangular cases" which may be regarded as abusive. In drafting provisions like this, however, the starting point should always be that the benefits of the Convention can be claimed unless the situation is regarded to be abusive. Further the Netherlands would like to express the opinion that the notion "normally taxed" is too ambiguous to serve as a decisive landmark in determining whether a situation is abusive or not.

(Renumbered and amended on 17 July 2008; see HISTORY)

Reservations on the Article

85. *Canada* and *New Zealand* reserve their positions on this Article.

(Renumbered and amended on 17 July 2008; see HISTORY)

86. *Australia* reserves the right to propose amendments to ensure that Australia can continue to apply certain provisions of its domestic law relating to deductions for R&D and withholding tax collection.

(Added on 17 July 2008; see HISTORY)

87. The *United States* reserves its right to apply its branch tax.

(Renumbered on 17 July 2008; see HISTORY)

Paragraph 1

88. *France* wishes to reserve the possibility of applying the provisions of paragraph 1 only to individuals, in view of the French case law and of the fact that paragraphs 3, 4 and 5 already provide companies with wide protection against discrimination.

(Renumbered on 17 July 2008; see HISTORY)

89. *Chile* and the *United Kingdom* reserve their position on the second sentence of paragraph 1.

(Amended on 22 July 2010; see HISTORY)

Paragraph 2

90. *Chile* and *Switzerland* reserve the right not to insert paragraph 2 in their conventions.

(Amended on 22 July 2010; see HISTORY)

Paragraph 3

90.1 In view of its particular taxation system, *Chile* retains its freedom of action with regard to the provisions in the Convention relating to the rate and form of distribution of profits by permanent establishments.

(Added on 22 July 2010; see HISTORY)

Paragraph 4

91. *France* accepts the provisions of paragraph 4 but wishes to reserve the possibility of applying the provisions in its domestic laws relative to the limitation to the deduction of interest paid by a French company to an associated or related company.

(Renumbered on 17 July 2008; see HISTORY)

Paragraph 6

92. *Chile*, *Greece*, *Ireland* and the *United Kingdom* reserve the right to restrict the application of the Article to the taxes covered by the Convention.

(Amended on 22 July 2010; see HISTORY)

HISTORY

Title: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title read as follows:

> "COMMENTARY ON ARTICLE 24 CONCERNING TAX DISCRIMINATION ON GROUNDS OF NATIONALITY OR OTHER SIMILAR GROUNDS"

Paragraph 1: Replaced paragraph 1 as it read before 17 July 2008. On 17 July 2008 paragraph 1 was renumbered as paragraph 5 (see history of paragraph 5) and the heading preceding paragraph 1 was moved with it, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). At the same time, new paragraph 1 was added together with the new heading preceding it.

Paragraph 2: Replaced paragraph 2 as it read before 17 July 2008. On 17 July 2008 paragraph 2 was renumbered as paragraph 6 (see history of paragraph 6) and a new paragraph 2 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 3: Replaced paragraph 3 as it read before 17 July 2008. On 17 July 2008 paragraph 3 was renumbered as paragraph 7 (see history of paragraph 7) and a new paragraph 3 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 4: Replaced paragraph 4 as it read before 17 July 2008. On 17 July 2008 paragraph 4 was renumbered as paragraph 8 (see history of paragraph 8) and a new paragraph 4 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 5: Corresponds to paragraph 1 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) as it read before 17 July 2008. On 17 July 2008 paragraph 5 was renumbered as paragraph 10 (see history of paragraph 10), paragraph 1 was renumbered as paragraph 5 and the heading preceding paragraph 1 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 6: Corresponds to paragraph 2 of the 1977 Model Convention as it read before 17 July 2008. On 17 July 2008 paragraph 6 was renumbered as paragraph 11 (see history of paragraph 11) and paragraph 2 was renumbered as paragraph 6 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 2 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 2 of the 1963 Draft Convention was amended and renumbered as paragraph 3 (see history of paragraph 7) and a new paragraph 2 was added.

Paragraph 7: Corresponds to paragraph 3 as it read before 17 July 2008. On 17 July 2008 paragraph 7 was renumbered as paragraph 12 (see history of paragraph 12) and paragraph 3 was renumbered as paragraph 7 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 7 was amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 3 read as follows:

> "3. The expression "in the same circumstances" refers to taxpayers (individuals, legal persons, partnerships and associations) placed, from the point of view of the application of the ordinary taxation laws and regulations, in substantially similar circumstances both in law and in fact."

Paragraph 3 of the 1977 Model Convention corresponded to paragraph 2 of the 1963 Draft Convention. Paragraph 3 of the 1963 Draft Convention was amended and renumbered as paragraph 4 (see history of paragraph 8) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 2 of the 1963 Draft Convention was amended and renumbered as paragraph 3 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. The expression "in the same circumstances" which appears in the text refers to taxpayers (individuals, legal persons, partnerships and associations) placed, from the point of view of the application of the ordinary taxation law and regulations, in substantially similar circumstances both in law and in fact."

Paragraph 8: Corresponds to paragraph 4 as it read before 17 July 2008. On 17 July 2008 paragraph 8 was renumbered as paragraph 13 (see history of paragraph 13) and paragraph 4 was renumbered as paragraph 8 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 4 was amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 4 read as follows:

> "4. Consequently if a Contracting State, in giving relief from taxation on account of family responsibilities, distinguishes between its own nationals according to whether they reside in its territory or not, that State cannot be obliged to give nationals of the other State who do not reside in its territory the same treatment as it gives its resident nationals but it undertakes to extend to them the same treatment as is available to its non-resident nationals."

Paragraph 4 of the 1977 Model Convention corresponded to paragraph 3 of the 1963 Draft Convention. Paragraph 4 of the 1963 Draft Convention was renumbered as paragraph 5 (see history of paragraph 10) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 3 of the 1963 Draft Convention was amended and renumbered as paragraph 4 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

> "3. Consequently if one of the Contracting States, in giving relief from taxation on account of family responsibilities, distinguishes between its own nationals according to whether they reside in its territory or not, that State cannot be obliged to give nationals of the other State who do not reside in its territory the same treatment as it gives its resident nationals but it undertakes to extend to them the same treatment as is available to its non-resident nationals."

Paragraph 9: Replaced paragraph 9 as it read before 17 July 2008. On 17 July 2008 paragraph 9 was renumbered as paragraph 14 (see history of paragraph 14) and a new paragraph 9 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 10: Corresponds to paragraph 5 of the 1977 Model Convention as it read before 17 July 2008. On 17 July 2008 paragraph 10 was renumbered as paragraph 15 (see history of paragraph 15) and paragraph 5 was renumbered as paragraph 10 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and

Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 5 of the 1977 Model Convention corresponded to paragraph 4 of the 1963 Draft Convention. Paragraph 5 of the 1963 Draft Convention was renumbered as paragraph 6 (see history of paragraph 11) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 4 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) was renumbered as paragraph 5 of the 1977 Model Convention.

Paragraph 11: Corresponds to paragraph 6 of the 1977 Model Convention as it read before 17 July 2008. On 17 July 2008 paragraph 11 was amended and renumbered as paragraph 16 (see history of paragraph 16) and paragraph 6 was renumbered as paragraph 11 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 6 of the 1977 Model Convention corresponded to paragraph 5 of the 1963 Draft Convention. Paragraph 6 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 7 (see history of paragraph 12) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 5 of the 1963 Draft Convention was renumbered as paragraph 6 of the 1977 Model Convention.

Paragraph 12: Corresponds to paragraph 7 as it read before 17 July 2008. On 17 July 2008 paragraph 12 was renumbered as paragraph 26 (see history of paragraph 26), the heading preceding paragraph 12 was moved with it and paragraph 7 was renumbered as paragraph 12 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 7 was amended on 29 April 2000, by replacing the words "industrial and commercial" with "business", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 7 read as follows:

> "7. To take the first of these two cases, if a State accords immunity from taxation to its own public bodies and services, this is justified because such bodies and services are integral parts of the State and at no time can their circumstances be comparable to those of the public bodies and services of the other State. Nevertheless, this reservation is not intended to apply to State corporations carrying on gainful undertakings. To the extent that these can be regarded as being on the same footing as private industrial and commercial undertakings, the provisions of paragraph 1 will apply to them."

Paragraph 7 of the 1977 Model Convention corresponded to paragraph 6 of the 1963 Draft Convention. Paragraph 7 of the 1963 Draft Convention was renumbered as paragraph 8 (see history of paragraph 13) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 6 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was renumbered as paragraph 7 of the 1977 Model Convention.

Paragraph 13: Corresponds to paragraph 8 of the 1977 Model Convention as it read before 17 July 2008. On 17 July 2008 paragraph 13 was renumbered as paragraph 27 (see history of paragraph 27) and paragraph 8 was renumbered as paragraph 13 by the

report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 8 of the 1977 Model Convention corresponded to paragraph 7 of the 1963 Draft Convention. Paragraph 8 of the 1963 Draft Convention was amended and renumbered as paragraph 9 (see history of paragraph 14) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 7 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was renumbered as paragraph 8 of the 1977 Model Convention.

Paragraph 14: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008, and until 22 July 2010, paragraph 14 read as follows:

> "14. Furthermore, paragraph 1 has been deliberately framed in a negative form. By providing that the nationals of a Contracting State may not be subjected in the other Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of the other Contracting State in the same circumstances are or may be subjected, this paragraph has the same mandatory force as if it enjoined the Contracting States to accord the same treatment to their respective nationals. But since the principal object of this clause is to forbid discrimination in one State against the nationals of the other, there is nothing to prevent the first State from granting to persons of foreign nationality, for special reasons of its own, or in order to comply with a special stipulation in a double taxation convention, such as, notably, the requirement that profits of permanent establishments are to be taxed on the basis of separate accounts, certain concessions or facilities which are not available to its own nationals. As it is worded, paragraph 1 would not prohibit this"

Paragraph 14, as it read after 17 July 2008, corresponded to paragraph 9 of the 1977 Model Convention. On 17 July 2008 paragraph 14 was renumbered as paragraph 28 (see history of paragraph 28) and paragraph 9 was renumbered as paragraph 14 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 9 of the 1977 Model Convention corresponded to paragraph 8 of the 1963 Draft Convention. Paragraph 9 of the 1963 Draft Convention was amended and renumbered as paragraph 10 (see history of paragraph 15) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 8 of the 1963 Draft Convention was amended and renumbered as paragraph 9 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 8 read as follows:

> "8. To take the first of these two cases, if a State accords immunity from taxation to its own public bodies and services, this is justified because such bodies and services are integral parts of the State and at no time can their circumstances be comparable to those of the public bodies and services of the other State. Nevertheless, this reservation is not intended to apply to State corporations carrying on gainful undertakings. To the extent that these can be regarded as being on the same footing as private industrial and commercial undertakings, the provisions of paragraph 1 will apply to them."

Paragraph 15: Corresponds to paragraph 10 of the 1977 Model Convention as it read before 17 July 2008. On 17 July 2008 paragraph 15 was renumbered as paragraph 29 (see history of paragraph 29) and paragraph 10 was renumbered as paragraph 15 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 10 of the 1977 Model Convention corresponded to paragraph 9 of the 1963 Draft Convention. Paragraph 10 of the 1963 Draft Convention was amended and renumbered as paragraph 11 (see history of paragraph 8 of the Commentary on Article 3) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 9 of the 1963 Draft Convention was amended and renumbered as paragraph 10 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 9 read as follows:

> "9. Subject to the foregoing observations, the words "…shall not be subjected… to any taxation or any requirement connected therewith which is other or more burdensome…" mean that when a tax is imposed on nationals and foreigners in the same circumstances, it must be in the same form for both, its basis of charge and method of assessment must be the same, its rate must be the same, and, finally, the formalities connected with the taxation (returns, payment, prescribed times, etc.) must not be more onerous for foreigners than for nationals."

Paragraph 16: Corresponds to paragraph 11 as it read before 17 July 2008. On 17 July 2008 paragraph 16 was renumbered as paragraph 30 (see history of paragraph 30) and paragraph 11 was renumbered as paragraph 16 and amended, by replacing the cross-reference to subparagraph *f)* with a cross-reference to subparagraph *g)*, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 11 read as follows:

> "11. In view of the legal relationship created between the company and the State under whose law it is constituted, which from certain points of view is closely akin to the relationship of nationality in the case of individuals, it seems justifiable not to deal with legal persons, partnerships and associations in a special provision, but to assimilate them with individuals under paragraph 1. This result is achieved through the definition of the term "national" in subparagraph *f)* of paragraph 1 of Article 3."

Paragraph 11 as it read after 23 July 1992 corresponded to paragraph 13 of the 1977 Model Convention. On 23 July 1992 paragraph 11 of the 1977 Model Convention was amended and renumbered as paragraph 8 of the Commentary on Article 3 (see history of paragraph 8 of the Commentary on Article 3), the heading preceding paragraph 11 was deleted and paragraph 13 was amended and renumbered as paragraph 11 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the heading preceding paragraph 11 read as follows:

> *"Paragraph 2"*

In the 1977 Model Convention and until 23 July 1992, paragraph 13 read as follows:

> "13. Moreover, in view of the legal relationship created between the company and the State under whose law it is constituted, which from certain points of view is closely akin to the relationship of nationality in the case of individuals, it seems

justifiable not to deal with legal persons, partnerships and associations in a special provision, but to assimilate them with individuals under the term "nationals"."

Paragraph 13 of the 1977 Model Convention corresponded to paragraph 12 of the 1963 Draft Convention. Paragraph 13 of the 1963 Draft Convention was amended and renumbered as paragraph 14 (see history of paragraph 26) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 12 of the 1963 Draft Convention was amended and renumbered as paragraph 13 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 12 read as follows:

"12. Moreover, in view of the legal relationship created between the company and the State under whose law it is constituted, which from certain points of view is closely akin to the relationship of nationality in the case on individuals, it seems justifiable not to deal with legal persons, partnerships and associations in a special provision, but to bring them under the same term with individuals."

Paragraph 17: Replaced paragraph 17 as it read before 17 July 2008. On 17 July 2008 paragraph 17 was renumbered as paragraph 31 (see history of paragraph 31) and a new paragraph 17 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 18: Replaced paragraph 18 as it read before 17 July 2008. On 17 July 2008 paragraph 18 was renumbered as paragraph 32 (see history of paragraph 32) and a new paragraph 18 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 19: Replaced paragraph 19 as it read before 17 July 2008. On 17 July 2008 paragraph 19 was renumbered as paragraph 33 (see history of paragraph 33), the heading preceding paragraph 19 was moved with it and a new paragraph 19 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 20: Replaced paragraph 20 as it read before 17 July 2008. On 17 July 2008 paragraph 20 was renumbered as paragraph 34 (see history of paragraph 34) and a new paragraph 20 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 21: Replaced paragraph 21 as it read before 17 July 2008. On 17 July 2008, paragraph 21 was renumbered as paragraph 35 (see history of paragraph 35) and a new paragraph 21 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 22: Replaced paragraph 22 as it read before 17 July 2008. On 17 July 2008, paragraph 22 was renumbered as paragraph 36 (see history of paragraph 36) and a new paragraph 22 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 23: Replaced paragraph 23 as it read before 17 July 2008. On 17 July 2008, paragraph 23 was renumbered as paragraph 39 (see history of paragraph 39) and a new paragraph 23 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 24: Replaced paragraph 24 as it read before 17 July 2008. On 17 July 2008, paragraph 24 was renumbered as paragraph 40 (see history of paragraph 40), the heading preceding paragraph 24 was moved with it and a new paragraph 24 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 25: Replaced paragraph 25 as it read before 17 July 2008. On 17 July 2008, paragraph 25 was amended and renumbered as paragraph 43 (see history of paragraph 43) and a new paragraph 25 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 26: Corresponds to paragraph 12 as it read before 17 July 2008. On 17 July 2008 paragraph 26 was renumbered as paragraph 44 (see history of paragraph 44), paragraph 12 was renumbered as paragraph 26 and the heading preceding paragraph 12 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 12, as it read after 23 July 1992, corresponded to paragraph 14 of the 1977 Model Convention. On 23 July 1992 paragraph 12 of the 1977 Model Convention was amended and renumbered as paragraph 9 of the Commentary on Article 3 (see history of paragraph 9 of the Commentary on Article 3), paragraph 14 was renumbered as paragraph 12, the heading preceding paragraph 14 was moved with it and amended by replacing "Paragraph 3" with "Paragraph 2" and by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the heading preceding paragraph 14 read as follows:

> *"Paragraph 3"*

Paragraph 14 of the 1977 Model Convention corresponded to paragraph 13 of the 1963 Draft Convention. Paragraph 14 of the 1963 Draft Convention was amended and renumbered as paragraph 21 (see history of paragraph 33) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 13 of the 1963 Draft Convention was amended and renumbered as paragraph 14 of the 1977 Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 13 read as follows:

> "13. On 28th September, 1954, a number of States concluded a Convention relating to the status of stateless persons, under Article 29 of which stateless persons must be accorded national treatment. The signatories of the Convention include several O.E.C.D. Member countries. Such a provision, however, is mainly suitable for insertion in a multilateral Convention."

Paragraph 27: Corresponds to paragraph 13 as it read before 17 July 2008. On 17 July 2008 paragraph 27 was renumbered as paragraph 45 (see history of paragraph 45) and

paragraph 13 was renumbered as paragraph 27 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 13 as it read after 23 July 1992 corresponded to paragraph 15 of the 1977 Model Convention. On 23 July 1992 paragraph 13 of the 1977 Model Convention was amended and renumbered as paragraph 11 (see history of paragraph 16) and paragraph 15 was renumbered as paragraph 13 and amended, by replacing the reference therein to paragraph 3 with a reference to paragraph 2, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 15 read as follows:

> "15. It should, however, be recognised that the provisions of paragraph 3 will, in a bilateral convention, enable national treatment to be extended to stateless persons who, because they are in one of the situations enumerated in paragraph 2 of Article 1 of the above-mentioned Convention of 28 September 1954, are not covered by that Convention. This is mainly the case, on the one hand, of persons receiving at the time of signature of that Convention, protection or assistance from organs or agencies of the United Nations other than the United Nations High Commissioner for Refugees, and, on the other hand, of persons who are residents of a country and who there enjoy and are subject to the rights and obligations attaching to the possession of that country's nationality."

Paragraph 15 of the 1977 Model Convention (adopted by the OECD Council on 11 April 1977), replaced paragraph 15 of the 1963 Draft Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 15 read as follows:

> "15. This provision does not mean, however, that a Contracting State must give an individual residing in the other Contracting State, in connection with the taxation for which he is liable in the first Contracting State in respect of a permanent establishment owned by him therein, any personal allowances, reliefs and reductions on account of civil status or family responsibilities which it gives to its own residents. This reservation, moreover, is expressly contained in the text of the Article."

Paragraph 28: Corresponds to paragraph 14 as it read before 17 July 2008. On 17 July 2008 paragraph 28 was amended and renumbered as paragraph 46 (see history of paragraph 46) and paragraph 14 was renumbered as paragraph 28 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 14 as it read after 23 July 1992 corresponded to paragraph 16 of the 1977 Model Convention. On 23 July 1992 paragraph 14 of the 1977 Model Convention was renumbered as paragraph 12 (see history of paragraph 26), the heading preceding paragraph 14 was moved with it and amended (see history of paragraph 26) and paragraph 16 was amended, by replacing the reference therein to paragraph 3 by a reference to paragraph 2, and renumbered as paragraph 14 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 16 read as follows:

> "16. The purpose of paragraph 3 is to limit the scope of the clause concerning equality of treatment with nationals of a Contracting State solely to stateless persons who are residents of that or of the other Contracting State."

Paragraph 16 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 16 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 22 (see history of paragraph 34) and a new paragraph 16 was added.

Paragraph 29: Corresponds to paragraph 15 as it read before 17 July 2008. On 17 July 2008 paragraph 29 was renumbered as paragraph 48 (see history of paragraph 48), the heading preceding paragraph 29 was moved with it and paragraph15 was renumbered as paragraph 29 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 15 as it read after 23 July 1992 corresponded to paragraph 17 of the 1977 Model Convention. On 23 July 1992 paragraph 15 of the 1977 Model Convention was amended and renumbered as paragraph 13 (see history of paragraph 27) and paragraph 17 was renumbered as paragraph 15 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 17 of the 1977 Model Convention replaced paragraph 17 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 17 read as follows:

> "17. Finally, with regard to the use of the word "enterprise" in the first sub-paragraph of paragraph 4, the question was raised whether it would not be better to use the word "entrepreneur" instead which had the merit of designating both individuals and legal persons and of thus being applicable where it is not the enterprise itself that is taxed but the individual carrying on the enterprise. The word "enterprise" was finally selected."

Paragraph 30: Corresponds to paragraph 16 as it read before 17 July 2008. On 17 July 2008 paragraph 30 was renumbered as paragraph 49 (see history of paragraph 49) and paragraph 16 was renumbered as paragraph 30 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 16, as it read after 23 July 1992, corresponded to paragraph 18 of the 1977 Model Convention. On 23 July 1992 paragraph 16 of the 1977 Model Convention was amended and renumbered as paragraph 14 (see history of paragraph 28) and paragraph 18 was renumbered as paragraph 16 and amended, by replacing the reference therein to paragraph 3 by a reference to paragraph 2 and by adding the words "in particular with respect to residence" at the end of the suggested provision included therein, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 18 read as follows:

> "18. However, if States were to consider it desirable in their bilateral relations to extend the application of paragraph 3 to all stateless persons, whether residents of a Contracting State or not, so that in all cases they enjoy the most favourable treatment accorded to nationals of the State concerned, in order to do this they would need only to adopt the following text which contains no condition as to residence in a Contracting State:
>
> > "Notwithstanding the provisions of Article 1, stateless persons shall not be subjected in a Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected

requirements to which nationals of that State in the same circumstances are or may be subjected.""

Paragraph 18 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 18 of the 1963 Draft Convention was amended and renumbered as paragraph 57 (see history of paragraph 76), the preceding heading was moved immediately before paragraph 56 and a new paragraph 18 was added.

Paragraph 31: Corresponds to paragraph 17 as it read before 17 July 2008. On 17 July 2008 paragraph 31 was renumbered as paragraph 50 (see history of paragraph 50) and paragraph 17 was renumbered as paragraph 31 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 17, as it read after 23 July 1992, corresponded to paragraph 19 of the 1977 Model Convention. On 23 July 1992 paragraph 17 of the 1977 Model Convention was renumbered as paragraph 15 (see history of paragraph 29) and paragraph 19 was renumbered as paragraph 17 and amended, by replacing the reference therein to paragraph 3 by a reference to paragraph 2 and by adding the words "in particular with respect to residence" at the end of the suggested provision included therein, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 19 read as follows:

> "19. It is possible that in the future certain States will take exception to the provisions of paragraph 3 as being too liberal insofar as they entitle stateless persons who are residents of one State to claim equality of treatment not only in the other State but also in their State of residence and thus benefit in particular in the latter from the provisions of double taxation conventions concluded by it with third States. If such States wished to avoid this latter consequence, they would have to modify paragraph 3 as follows:
>
> > "Stateless persons who are residents of a Contracting State shall not be subjected in the other Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances, are or may be subjected.""

Paragraph 19 of the 1977 Model Convention replaced paragraph 19 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the heading preceding paragraph 19 was moved immediately before paragraph 57. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 19 read as follows:

> "19. This paragraph states that the word "taxation" used in the preceding paragraphs of the Article means taxes of every kind and description levied by, or on behalf of the State, its political subdivisions or local authorities. It does not call for any special comment."

Paragraph 32: Corresponds to paragraph 18 as it read before 17 July 2008. On 17 July 2008 paragraph 32 was renumbered as paragraph 51 (see history of paragraph 51) and paragraph 18 was renumbered as paragraph 32 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 18, as it read after 23 July 1992, corresponded to paragraph 20 of the 1977 Model Convention. On 23 July 1992 paragraph 18 of the 1977 Model Convention was amended and renumbered as paragraph 16 (see history of paragraph 30) and paragraph 20 was renumbered as paragraph 18 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 20 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 20 of the 1963 Draft Convention was amended and renumbered as paragraph 61 (see history of paragraph 85), the preceding heading was moved with it and a new paragraph 20 was added.

Paragraph 33: Corresponds to paragraph 19 as it read before 17 July 2008. On 17 July 2008 paragraph 33 was renumbered as paragraph 52 (see history of paragraph 52), paragraph 19 was renumbered as paragraph 33 and the heading preceding paragraph 19 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 19 as it read after 23 July 1992 corresponded to paragraph 21 of the 1977 Model Convention. On 23 July 1992 paragraph 19 of the 1977 Model Convention was amended and renumbered as paragraph 17 (see history of paragraph 31), paragraph 21 was renumbered as paragraph 19 and the heading preceding paragraph 21 was moved with it and amended by replacing "Paragraph 4" by "Paragraph 3", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the heading preceding paragraph 21 read as follows:

"Paragraph 4"

Paragraph 21 of the 1977 Model Convention corresponded to the first and second sentences of paragraph 14 of the 1963 Draft Convention. Paragraph 21 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 14 of the 1963 Draft Convention was amended and renumbered as paragraph 21 and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 14 read as follows:

"14. Strictly speaking, the type of discrimination which this paragraph is designed to end is discrimination based not on nationality, but on the actual situs of an enterprise. It therefore affects without distinction, and irrespective of their nationality, all residents of a Contracting State who have permanent establishments in the other Contracting State. In this connection, while it is true that most Conventions for the avoidance of double taxation lay down the principle that, for the purpose of charging tax, a permanent establishment of an enterprise of a Contracting State in the other Contracting State must be regarded as an independent enterprise and treated as such, nevertheless the other State does not always extend to the permanent establishment the full benefit of the treatment it applies to its own enterprises. Thus, the permanent establishment may not be allowed the same depreciation facilities, or a proportion of the principal enterprise's overheads is not always allowed to be attributed to the permanent establishment, or any losses incurred by the permanent establishment are not allowed to be set off. The purpose of paragraph 4 is to put an end to these differences in treatment by stipulating that a permanent establishment which an enterprise of a Contracting State has in the other Contracting State must not be less favourably taxed by that other Contracting State than enterprises of that State carrying on the same activities."

Paragraph 21 of the 1963 Draft Convention, until it was deleted when the 1977 Model Convention was adopted, read as follows:

> "21. Ireland reserves the right not to grant to companies incorporated or managed and controlled outside Ireland certain temporary tax reliefs available to Irish companies on mining profits; and the right to impose a higher rate of Stamp Duty on acquisitions of agricultural land by aliens than that payable by nationals."

Paragraph 34: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 34 read as follows:

> "34. It appears necessary first to make it clear that the wording of the first sentence of paragraph 3 must be interpreted in the sense that it does not constitute discrimination to tax non-resident persons differently, for practical reasons, from resident persons, as long as this does not result in more burdensome taxation for the former than for the latter. In the negative form in which the provision concerned has been framed, it is the result alone which counts, it being permissible to adapt the mode of taxation to the particular circumstances in which the taxation is levied."

Paragraph 34 as it read after 17 July 2008 corresponded to paragraph 20. On 17 July 2008 paragraph 34 was renumbered as paragraph 53 (see history of paragraph 53) and paragraph 20 was renumbered as paragraph 34 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 20, as it read after 23 July 1992, corresponded to paragraph 22 of the 1977 Model Convention. On 23 July 1992 paragraph 20 of the 1977 Model Convention was renumbered as paragraph 18 (see history of paragraph 32) and paragraph 22 was amended by replacing the reference therein to paragraph 4 by a reference to paragraph 3 and renumbered as paragraph 20 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 22 read as follows:

> "22. It appears necessary first to make it clear that the wording of the first sentence of paragraph 4 must be interpreted in the sense that it does not constitute discrimination to tax non-resident persons differently, for practical reasons, from resident persons, as long as this does not result in more burdensome taxation for the former than for the latter. In the negative form in which the provision concerned has been framed, it is the result alone which counts, it being permissible to adapt the mode of taxation to the particular circumstances in which the taxation is levied."

Paragraph 22 of the 1977 Model Convention corresponded to paragraph 16 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 16 of the 1963 Draft Convention was amended and renumbered as paragraph 22 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 16 read as follows:

> "16. Furthermore, it seems indispensable to specify that the wording of the first sub-paragraph of paragraph 4 must be interpreted in the sense that it does not constitute discrimination to tax non-resident persons, for reasons of practical convenience, differently from resident persons so long as this does not result in more burdensome taxation for the former than for the latter. In the negative form in which the provision has been framed it is the result alone that counts, it being

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

permissible to adapt the taxation on the particular circumstances in which it is levied."

Paragraph 35: Corresponds to paragraph 21 as it read before 17 July 2008. On 17 July 2008 paragraph 35 was renumbered as paragraph 54 (see history of paragraph 54) and paragraph 21 was renumbered as paragraph 35 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 21 was previously amended on 29 April 2000, by replacing the words "industrial and commercial" with the word "business", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 21 read as follows:

"21. By the terms of the first sentence of paragraph 3, the taxation of a permanent establishment shall not be less favourably levied in the State concerned than the taxation levied on enterprises of that State carrying on the same activities. The purpose of this provision is to end all discrimination in the treatment of permanent establishments as compared with resident enterprises belonging to the same sector of activities, as regards taxes based on industrial and commercial activities, and especially taxes on business profits."

Paragraph 21, as it read after 23 July 1992, corresponded to paragraph 23 of the 1977 Model Convention. On 23 July 1992 paragraph 21 of the 1977 Model Convention was renumbered as paragraph 19 (see history of paragraph 33), the heading preceding paragraph 21 was moved with it and amended and paragraph 23 was amended by replacing the reference therein to paragraph 4 by a reference to paragraph 3 and renumbered as paragraph 21 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 23 read as follows:

"23. By the terms of the first sentence of paragraph 4, the taxation of a permanent establishment shall not be less favourably levied in the State concerned than the taxation levied on enterprises of that State carrying on the same activities. The purpose of this provision is to end all discrimination in the treatment of permanent establishments as compared with resident enterprises belonging to the same sector of activities, as regards taxes based on business activities, and especially taxes on business profits."

Paragraph 23 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 36: Corresponds to paragraph 22 as it read before 17 July 2008. On 17 July 2008 paragraph 36 was amended and renumbered as paragraph 55 (see history of paragraph 55), the heading preceding paragraph 36 was moved with it and paragraph 22 was renumbered as paragraph 36 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 22 as it read after 23 July 1992 corresponded to paragraph 24 of the 1977 Model Convention. On 23 July 1992 paragraph 22 of the 1977 Model Convention was amended and renumbered as paragraph 20 (see history of paragraph 34) and paragraph 24 was renumbered as paragraph 22 and amended, by replacing the

reference therein to paragraph 4 by a reference to paragraph 3, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 24 read as follows:

"24. However, the second sentence of paragraph 4 specifies the conditions under which the principle of equal treatment set forth in the first sentence should be applied to individuals who are residents of a Contracting State and have a permanent establishment in the other State. It is designed mainly to ensure that such persons do not obtain greater advantages than residents, through entitlement to personal allowances and reliefs for family responsibilities, both in the State of which they are residents, by the application of its domestic laws, and in the other State by virtue of the principle of equal treatment. Consequently, it leaves it open to the State in which the permanent establishment is situated whether or not to give personal allowances and reliefs to the persons concerned in the proportion which the amount of the permanent establishment's profits bears to the world income taxable in the other State."

Paragraph 24 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 37: Replaced paragraph 37 as it read before 17 July 2008. On 17 July 2008 paragraph 37 was renumbered as paragraph 56 (see history of paragraph 56) and a new paragraph 37 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 38: Replaced paragraph 38 as it read before 17 July 2008. On 17 July 2008 paragraph 38 was renumbered as paragraph 57 (see history of paragraph 57) and a new paragraph 38 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 39: Corresponds to paragraph 23 as it read before 17 July 2008. On 17 July 2008 paragraph 39 was renumbered as paragraph 58 (see history of paragraph 58) and paragraph 23 was renumbered as paragraph 39 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 23, as it read after 23 July 1992, corresponded to paragraph 25 of the 1977 Model Convention. On 23 July 1992 paragraph 23 of the 1977 Model Convention was amended and renumbered as paragraph 21 (see history of paragraph 35) and paragraph 25 was renumbered as paragraph 23 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 25 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 40: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 40 read as follows:

"40. With regard to the basis of assessment of tax, the principle of equal treatment normally has the following implications:

a) Permanent establishments must be accorded the same right as resident enterprises to deduct the trading expenses that are, in general, authorised by the taxation law to be deducted from taxable profits in addition to the right

to attribute to the permanent establishment a proportion of the overheads of the head office of the enterprise. Such deductions should be allowed without any restrictions other than those also imposed on resident enterprises.

b) Permanent establishments must be accorded the same facilities with regard to depreciation and reserves. They should be entitled to avail themselves without restriction not only of the depreciation facilities which are customarily available to enterprises (straight line depreciation, declining balance depreciation), but also of the special systems that exist in a number of countries ("wholesale" writing down, accelerated depreciation, etc.). As regards reserves, it should be noted that these are sometimes authorised for purposes other than the offsetting — in accordance with commercial accounting principles — of depreciation on assets, expenses or losses which have not yet occurred but which circumstances make likely to occur in the near future. Thus, in certain countries, enterprises are entitled to set aside, out of taxable profit, provisions or "reserves" for investment. When such a right is enjoyed by all enterprises, or by all enterprises in a given sector of activity, it should normally also be enjoyed, under the same conditions, by non-resident enterprises with respect to their permanent establishments situated in the State concerned, insofar, that is, as the activities to which such provisions or reserves would pertain are taxable in that State.

c) Permanent establishments should also have the option that is available in most countries to resident enterprises of carrying forward or backward a loss brought out at the close of an accounting period within a certain period of time (*e.g.* 5 years). It is hardly necessary to specify that in the case of permanent establishments it is the loss on their own business activities, as shown in the separate accounts for these activities, which will qualify for such carry-forward.

d) Permanent establishments should further have the same rules applied to resident enterprises, with regard to the taxation of capital gains realised on the alienation of assets, whether during or on the cessation of business."

Paragraph 40 as it read after 17 July 2008 corresponded to paragraph 24. On 17 July 2008 paragraph 40 was deleted and paragraph 24 was renumbered as paragraph 40 and the heading preceding paragraph 24 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 24 as it read after 23 July 1992 corresponded to paragraph 26 of the 1977 Model Convention. On 23 July 1992 paragraph 24 was amended and renumbered as paragraph 22 (see history of paragraph 36) and paragraph 26 was renumbered as paragraph 24 and amended, by changes to the last sentence of subparagraph *b)* and the heading preceding paragraph 26 was moved with it, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, subparagraph *b)* of paragraph 26 read as follows:

"b) When such a right is enjoyed by all enterprises, or by all enterprises in a given sector of activity, it should normally also be enjoyed, under the same conditions, by non-resident enterprises, or by all enterprises in a given sector of activity, it should in the State concerned, insofar, that is, as the activities to which such provisions or reserves would pertain are taxable in that State."

Paragraph 26 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

C (24)

Paragraph 40, as it read after 23 July 1992 and until 17 July 2008, when it was deleted, read as follows:

> "40. As regards the split-rate system of company tax, it should first be pointed out as being a fact central to the issue here that most OECD member countries which have adopted this system do not consider themselves bound by the provisions of paragraph 3 to extend it to permanent establishments of non-resident companies. This attitude is based, in particular, on the view that the split-rate is only one element amongst others (in particular a withholding tax on distributed income) in a system of taxing company profits and dividends which must be considered as a whole and is therefore, both for legal and technical reasons, of domestic application only. The State where the permanent establishment is situated could claim the right not to tax such profits at the reduced rate as, generally, it does not tax the dividends distributed by the company to which the permanent establishment belongs. Moreover, a State which has adopted a split-rate system usually has other economic policy objectives, such as the promotion of the capital market, by encouraging resident companies to distribute dividends. The extension of the reduced rate to the profits of the permanent establishment would not serve such a purpose at all, as the company distributing the dividends is not a resident of the State concerned."

Paragraph 40 as it read after 23 July 1992 corresponded to paragraph 42 of the 1977 Model Convention. On 23 July 1992 paragraph 40 of the 1977 Model Convention was amended and renumbered as paragraph 38 (see history of paragraph 57) and paragraph 42 was amended, by replacing the reference therein to paragraph 4 with a reference to paragraph 3, and renumbered as paragraph 40 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 42 read as follows:

> "42. As regards the split-rate system of company tax, it should first be pointed out as being a fact central to the issue here that most OECD member countries which have adopted this system do not consider themselves bound by the provisions of paragraph 4 to extend it to permanent establishments of non-resident companies. This attitude is based, in particular, on the view that the split-rate is only one element amongst others (in particular a withholding tax on distributed income) in a system of taxing company profits and dividends which must be considered as a whole and is therefore, both for legal and technical reasons, of domestic application only. The State where the permanent establishment is situated could claim the right not to tax such profits at the reduced rate as, generally, it does not tax the dividends distributed by the company to which the permanent establishment belongs. Moreover, a State which has adopted a split-rate system usually has other economic policy objectives, such as the promotion of the capital market, by encouraging resident companies to distribute dividends. The extension of the reduced rate to the profits of the permanent establishment would not serve such a purpose at all, as the company distributing the dividends is not a resident of the State concerned."

Paragraph 42 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 41: Replaced paragraph 41 on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 41 read as follows:

> "41. This view is, however, disputed. The States in favour of extending the split-rate system to permanent establishments urge that as the essential feature of this

system is a special technique of taxing profits which enterprises in a corporate form derive from their activities, and is designed to afford immediate relief from the double taxation levied on the profits distributed, it should be applied to permanent establishments in bilateral conventions against double taxation. It is generally recognised that, by the effects of their provisions, such conventions necessarily result in some integration of the taxation systems of the Contracting States. On this account, it is perfectly conceivable that profits made in a State (A) by a permanent establishment of a company resident in another State (B) should be taxed in State A according to the split-rate system. As a practical rule, the tax could in such case be calculated at the reduced rate (applicable to distributed profits) on that proportion of an establishment's profits which corresponds to the ratio between the profit distributed by the company to which it belongs and the latter's total profit; the remaining profit could be taxed at the higher rate. Of course, the two Contracting States would have to consult together and exchange all information necessary for giving practical effect to this solution. Similar considerations apply to systems where distributions of profits made can be deducted from the taxable income of a company."

Paragraph 41 as it read after 23 July 1992 corresponded to paragraph 43 of the 1977 Model Convention. On 23 July 1992 paragraph 41 of the 1977 Model Convention was renumbered as paragraph 39 (see history of paragraph 58) and paragraph 43 was renumbered as paragraph 41 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 43 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 42: Replaced paragraph 42 on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 42 read as follows:

"42. As regards the imputation system ("*avoir fiscal*" or "tax credit"), it seems doubtful, at least on a literal interpretation of the provisions of paragraph 3, whether it should be extended to non-resident companies in respect of dividends paid out of profits made by their permanent establishments. In fact, it has identical effects to those of the split-rate system but these effects are not immediate as they occur only at the time of the shareholder's personal taxation. From a purely economic and financial standpoint, however, it is conceivable that such profits should be treated as though they were profits of a distinct company in State A where the permanent establishment of a company which is a resident of State B is situated, and, to the extent that they are distributed, carry the *avoir fiscal* or tax credit. But to take the matter further, to avoid all discrimination it is necessary that this advantage should already have been accorded to shareholders who are residents of State B of companies which are residents of State A. From the practical standpoint, the two States concerned should, of course, agree upon the conditions and procedures for allowing the *avoir fiscal* or tax credit to shareholders who are themselves residents of either State, of the companies concerned that are residents of State B."

Paragraph 42 as it read after 23 July 1992 corresponded to paragraph 44 of the 1977 Model Convention. On 23 July 1992 paragraph 42 of the 1977 Model Convention was amended and renumbered as paragraph 40 (see history of paragraph 40) and paragraph 44 was renumbered as paragraph 42 and amended, by replacing the reference therein to paragraph 4 by a reference to paragraph 3, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 44 read as follows:

"44. As regards the imputation system ("*avoir fiscal*" or "tax credit"), it seems doubtful, at least on a literal interpretation of the provisions of paragraph 4, whether it should be extended to non-resident companies in respect of dividends paid out of profits made by their permanent establishments. In fact, it has identical effects to those of the split-rate system but these effects are not immediate as they occur only at the time of the shareholder's personal taxation. From a purely economic and financial standpoint, however, it is conceivable that such profits should be treated as though they were profits of a distinct company in State A where the permanent establishment of a company which is a resident of State B is situated, and, to the extent that they are distributed, carry the *avoir fiscal* or tax credit. But to take the matter further, to avoid all discrimination it is necessary that this advantage should already have been accorded to shareholders who are residents of State B of companies which are residents of State A. From the practical standpoint, the two States concerned should, of course, agree upon the conditions and procedures for allowing the *avoir fiscal* or tax credit to shareholders who are themselves residents of either State, of the companies concerned that are residents of State B."

Paragraph 44 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 43: Corresponds to paragraph 25 as it read before 17 July 2008. On 17 July 2008 paragraph 43 was deleted and paragraph 25 was amended and renumbered as paragraph 43 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 25 read as follows:

"25. Although the general rules mentioned above rarely give rise to any difficulties with regard to the principle of non-discrimination, the same does not always hold good for the tax incentive measures which most countries, faced with such problems as decentralisation of industry, development of economically backward regions, or the promotion of new activities necessary for the expansion of the economy, have introduced in order to facilitate the solution of these problems by means of tax exemptions, reductions or other tax advantages given to enterprises for investment which is in line with official objectives."

Paragraph 25 as it read after 23 July 1992 corresponded to paragraph 27 of the 1977 Model Convention. On 23 July 1992, paragraph 25 of the 1977 Model Convention was renumbered as paragraph 23 (see history of paragraph 39) and paragraph 27 was renumbered as paragraph 25 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 27 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 43, as it read after 23 July 1992 and until 17 July 2008, when it was deleted, read as follows:

"43. Contracting States which are faced with the problems described above may settle them in bilateral negotiations in the light of their peculiar circumstances."

Paragraph 43 as it read after 23 July 1992 corresponded to paragraph 45 of the 1977 Model Convention. On 23 July 1992 paragraph 43 of the 1977 Model Convention was renumbered as paragraph 41 (see history of paragraph 41) and paragraph 45 was renumbered as paragraph 43 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 45 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 44: Corresponds to paragraph 26 as it read before 17 July 2008. On 17 July 2008 paragraph 44 was renumbered as paragraph 62 (see history of paragraph 62), the heading preceding paragraph 44 was moved with it and paragraph 26 was renumbered as paragraph 44 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 26 was previously amended on 29 April 2000, by replacing the words "industrial and commercial" with the word "business", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 26 read as follows:

> "26. As such measures are in furtherance of objectives directly related to the economic activity proper of the State concerned, it is right that the benefit of them should be extended to permanent establishments of enterprises of another State which has a double taxation convention with the first embodying the provisions of Article 24, once they have been accorded the right to engage in industrial or commercial activity in that State, either under its legislation or under an international agreement (treaties of commerce, establishment conventions, etc.) concluded between the two States."

Paragraph 26 as it read after 23 July 1992 corresponded to paragraph 28 of the 1977 Model Convention. On 23 July 1992, paragraph 26 of the 1977 Model Convention was amended and renumbered as paragraph 24 (see history of paragraph 40), the heading preceding paragraph 26 was moved with it and paragraph 28 was renumbered as paragraph 26 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 28 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 45: Corresponds to paragraph 27 as it read before 17 July 2008. On 17 July 2008 paragraph 45 was renumbered as paragraph 63 (see history of paragraph 63) and paragraph 27 was renumbered as paragraph 45 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 27 as it read after 23 July 1992 corresponded to paragraph 29 of the 1977 Model Convention. On 23 July 1992 paragraph 27 of the 1977 Model Convention was renumbered as paragraph 25 (see history of paragraph 43) and paragraph 29 was renumbered as paragraph 27 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 29 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 46: Corresponds to paragraph 28 as it read before 17 July 2008. On 17 July 2008 paragraph 46 was renumbered as paragraph 64 (see history of paragraph 64) and paragraph 28 was renumbered as paragraph 46 and amended, by replacing the word "Finally" with "Also" at the beginning of the paragraph, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July

2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 28 read as follows:

> "28. Finally, it goes without saying that non-resident enterprises are not entitled to tax advantages attaching to activities the exercise of which is strictly reserved, on grounds of national interest, defence, protection of the national economy, etc., to domestic enterprises, since non-resident enterprises are not allowed to engage in such activities."

Paragraph 28 as it read after 23 July 1992 corresponded to paragraph 30 of the 1977 Model Convention. On 23 July 1992 paragraph 28 of the 1977 Model Convention was renumbered as paragraph 26 (see history of paragraph 44) and paragraph 30 was renumbered as paragraph 28 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 30 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 47: Replaced paragraph 47 as it read before 17 July 2008. On 17 July 2008 paragraph 47 was renumbered as paragraph 65 (see history of paragraph 65) and a new paragraph 47 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 48: Corresponds to paragraph 29 as it read before 17 July 2008. On 17 July 2008 paragraph 48 was renumbered as paragraph 66 (see history of paragraph 66), paragraph 29 was renumbered as paragraph 48 and the heading preceding paragraph 29 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 29 as it read after 23 July 1992 corresponded to paragraph 31 of the 1977 Model Convention. On 23 July 1992 paragraph 29 of the 1977 Model Convention was renumbered as paragraph 27 (see history of paragraph 45), paragraph 31 was renumbered as paragraph 29 and amended, by replacing the reference therein to paragraph 4 by a reference to paragraph 3, and the heading preceding paragraph 31 was moved with it, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 31 read as follows:

> "31. In many countries special rules exist for the taxation of dividends distributed between companies (parent company-subsidiary treatment, the *Schachtelprivileg*, the rule *non bis in idem*). The question arises whether such treatment should, by effect of the provisions of paragraph 4, also be enjoyed by permanent establishments in respect of dividends on holdings forming part of their assets."

Paragraph 31 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 49: Corresponds to paragraph 30 as it read before 17 July 2008. On 17 July 2008 paragraph 49 was amended and renumbered as paragraph 67 (see history of paragraph 67), the heading preceding paragraph 49 was moved with it and paragraph 30 was renumbered as paragraph 49 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

Paragraph 30 as it read after 23 July 1992 corresponded to paragraph 32 of the 1977 Model Convention. On 23 July 1992 paragraph 30 of the 1977 Model Convention was renumbered as paragraph 28 (see history of paragraph 46) and paragraph 32 was renumbered as paragraph 30 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 32 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 50: Corresponds to paragraph 31 as it read before 17 July 2008. On 17 July 2008 paragraph 50 was amended and renumbered as paragraph 68 (see history of paragraph 68) and paragraph 31 was renumbered as paragraph 50 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “The Application and Interpretation of Article 24 (Non-Discrimination” (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 31 as it read after 23 July 1992 corresponded to paragraph 33 of the 1977 Model Convention. On 23 July 1992 paragraph 31 of the 1977 Model Convention was amended and renumbered as paragraph 29 (see history of paragraph 48), the heading preceding paragraph 31 was moved with it and paragraph 33 was renumbered as paragraph 31 and amended, by replacing the reference therein to paragraph 4 by a reference to paragraph 3, by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 33 read as follows:

> “33. Other States, on the contrary, consider that assimilating permanent establishments to their own enterprises does not entail any obligation to accord such special treatment to the former. They justify their position on various grounds. The purpose of such special treatment is to avoid economic double taxation of dividends and it should be for the recipient company’s State of residence and not the permanent establishment’s State to bear its cost, because it is more interested in the aim in view. Another reason put forward relates to the sharing of tax revenue between States. The loss of tax revenue incurred by a State in applying such special treatment is partly offset by the taxation of the dividends when they are redistributed by the parent company which has enjoyed such treatment (withholding tax on dividends, shareholder’s tax). A State which accorded such treatment to permanent establishments would not have the benefit of such a compensation. Another argument made is that when such treatment is made conditional upon redistribution of the dividends, its extension to permanent establishments would not be justified, for in such a case the permanent establishment, which is only a part of a company of another State and does not distribute dividends, would be more favourably treated than a resident company. Finally, the States which feel that paragraph 4 does not entail any obligation to extend such treatment to permanent establishments argue that there is a risk that companies of one State might transfer their holdings in companies of another State to their permanent establishments in that other State for the sole purpose of availing themselves of such treatment.”

Paragraph 33 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 51: Corresponds to paragraph 32 as it read before 17 July 2008. On 17 July 2008 paragraph 51 was renumbered as paragraph 69 (see history of paragraph 69), the heading preceding paragraph 51 was amended and moved with it and paragraph 32 was renumbered as paragraph 51 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another

report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 32 as it read after 23 July 1992 corresponded to paragraph 34 of the 1977 Model Convention. On 23 July 1992 paragraph 32 of the 1977 Model Convention was renumbered as paragraph 30 (see history of paragraph 49) and paragraph 34 was renumbered as paragraph 32 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 34 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 52: Corresponds to paragraph 33 as it read before 17 July 2008. On 17 July 2008 paragraph 52 was amended and renumbered as paragraph 70 (see history of paragraph 70) and paragraph 33 was renumbered as paragraph 52 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 33 as it read after 23 July 1992 corresponded to paragraph 35 of the 1977 Model Convention. On 23 July 1992, paragraph 33 of the 1977 Model Convention was amended and renumbered as paragraph 31 (see history of paragraph 50) and paragraph 35 was renumbered as paragraph 33 and amended, by replacing the reference therein to paragraph 4 by a reference to paragraph 3, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 35 read as follows:

> "35. In view of these divergent attitudes, as well as of the existence of the situations just described, it would be advisable for States, when concluding bilateral conventions, to make clear the interpretation they give to the first sentence of paragraph 4. They can, if they so desire, explain their position, or change it as compared with their previous practice, in a protocol or any other document annexed to the convention."

Paragraph 35 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 53: Corresponds to paragraph 34 as it read before 17 July 2008. On 17 July 2008 paragraph 53 was renumbered as paragraph 71 (see history of paragraph 71) and paragraph 34 was renumbered as paragraph 53 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 34 as it read after 23 July 1992 corresponded to paragraph 36 of the 1977 Model Convention. On 23 July 1992 paragraph 34 of the 1977 Model Convention was renumbered as paragraph 32 (see history of paragraph 51) and paragraph 36 was renumbered as paragraph 34 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 36 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 54: Corresponds to paragraph 35 as it read before 17 July 2008. On 17 July 2008 paragraph 54 was renumbered as paragraph 72 (see history of paragraph 72) and paragraph 35 was renumbered as paragraph 54 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of

Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 35 as it read after 23 July 1992 corresponded to paragraph 37 of the 1977 Model Convention. On 23 July 1992 paragraph 35 of the 1977 Model Convention was amended and renumbered as paragraph 33 (see history of paragraph 52) and paragraph 37 was renumbered as paragraph 35 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 37 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 55: Corresponds to paragraph 36 as it read before 17 July 2008. On 17 July 2008 paragraph 55 was renumbered as paragraph 73 (see history of paragraph 73), the heading preceding paragraph 55 was moved with it, paragraph 36 was amended and renumbered as paragraph 55 and the heading preceding paragraph 36 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 36 read as follows:

> "36. In countries where enterprises, mainly companies, are charged a tax on their profits which is specific to them, the provisions of paragraph 3 raise, with regard to the rate applicable in the case of permanent establishments, especially difficult and delicate problems, which here too arise from the fact that the permanent establishment is only a part of a legal entity which is not under the jurisdiction of the State where the permanent establishment is situated."

Paragraph 36 as it read after 23 July 1992 corresponded to paragraph 38 of the 1977 Model Convention. On 23 July 1992 paragraph 36 of the 1977 Model Convention was renumbered as paragraph 34 (see history of paragraph 53), paragraph 38 was amended, by replacing the reference therein to paragraph 4 with a reference to paragraph 3, renumbered as paragraph 36 and the heading preceding paragraph 38 was moved with it, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 38 read as follows:

> "38. In countries where enterprises, mainly companies, are charged a tax on their profits which is specific to them, the provisions of paragraph 4 raise, with regard to the rate applicable in the case of permanent establishments, especially difficult and delicate problems, which here too arise from the fact that the permanent establishment is only a part of a legal entity which is not under the jurisdiction of the State where the permanent establishment is situated."

Paragraph 38 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 56: Corresponds to paragraph 37 as it read before 17 July 2008. On 17 July 2008 paragraph 56 was amended and renumbered as paragraph 74 (see history of paragraph 74) and paragraph 37 was renumbered as paragraph 56 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 37 as it read after 23 July 1992 corresponded to paragraph 39 of the 1977 Model Convention. On 23 July 1992 paragraph 37 of the 1977 Model Convention was renumbered as paragraph 35 (see history of paragraph 54) and paragraph 39 was renumbered as paragraph 37 and amended, by replacing the reference therein to

paragraph 77 by a reference to paragraph 79 of the Commentary on Articles 23A and 23B, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 39 read as follows:

> "39. When the taxation of profits made by companies which are residents of a given State is calculated according to a progressive scale of rates, such a scale should, in principle, be applied to permanent establishments situated in that State. If in applying the progressive scale, the permanent establishment's State takes into account the profits of the whole company to which such a permanent establishment belongs, such a rule would not appear to conflict with the equal treatment rule, since resident companies are in fact treated in the same way (see paragraphs 55, 56 and 77 of the Commentary on Articles 23 A and 23 B). States that tax their own companies in this way could therefore define in their bilateral conventions the treatment applicable to permanent establishments."

Paragraph 39 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 57: Corresponds to paragraph 38 as it read before 17 July 2008. On 17 July 2008, paragraph 57 was renumbered as paragraph 76 (see history of paragraph 76), the heading preceding paragraph 57 was moved with it and paragraph 38 was renumbered as paragraph 57 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 38 as it read after 23 July 1992 corresponded to paragraph 40 of the 1977 Model Convention. On 23 July 1992 paragraph 38 of the 1977 Model Convention was amended and renumbered as paragraph 36 (see history of paragraph 55), the heading preceding paragraph 38 was moved with it and paragraph 40 was renumbered as paragraph 38 and amended, by replacing the reference therein to paragraph 4 by a reference to paragraph 3, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 40 read as follows:

> "40. When a system of taxation based on a progressive scale of rates includes a rule that a minimum rate is applicable to permanent establishments, it cannot be claimed *a priori* that such a rule is incompatible with the equal treatment principle. The profits of the whole enterprise to which the permanent establishment belongs should be taken into account in determining the rate applicable according to the progressive scale. The provisions of the first sentence of paragraph 4 are not observed only if the minimum rate is higher."

Paragraph 40 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 58: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008, and until 22 July 2010, paragraph 58 read as follows:

> "58. However, even if the profits of the whole enterprise to which the permanent establishment belongs are taken into account when applying either a progressive scale of rates or a minimum rate, this should not conflict with the principle of the distinct and separate enterprise, according to which the profits of the permanent establishment must be determined under paragraph 2 of Article 7. The minimum amount of the tax levied in the State where the permanent establishment is situated is, therefore, the amount which would be due if it were a distinct and separate enterprise, without reference to the profits of the whole enterprise to which it belongs. The State where the permanent establishment is situated is,

therefore, justified in applying the progressive scale applicable to resident enterprises solely to the profits of the permanent establishment, leaving aside the profits of the whole enterprise when the latter are less than those of the permanent establishment. This State may likewise tax the profits of the permanent establishment at a minimum rate, provided that the same rate applies also to resident enterprises, even if taking into account the profits of the whole enterprise to which it belongs would result in a lower amount of tax, or no tax at all."

Paragraph 58 as it read after 17 July 2008 corresponded to paragraph 39. On 17 July 2008 paragraph 58 was deleted and paragraph 39 was renumbered as paragraph 58 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 39 as it read after 23 July 1992 corresponded to paragraph 41 of the 1977 Model Convention. On 23 July 1992 paragraph 39 of the 1977 Model Convention was amended and renumbered as paragraph 37 (see history of paragraph 56) and paragraph 41 was renumbered as paragraph 39 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 41 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 58, as it read after 23 July 1992 and until 17 July 2008, when it was deleted, read as follows:

"58. Paragraph 5, though relevant in principle to thin capitalisation, is worded in such general terms that it must take second place to more specific provisions in the Convention. Thus paragraph 4 (referring to paragraph 1 of Article 9 and paragraph 6 of Article 11) takes precedence over this paragraph in relation to the deduction of interest."

Paragraph 58 of the 1977 Model Convention was replaced on 23 July 1992. On 23 July 1992 paragraph 58 of the 1977 Model Convention was renumbered as paragraph 60 (see history of paragraph 81), the heading preceding paragraph 58 was amended and moved with it (see history of paragraph 81) and a new paragraph 58 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of subparagraph 87 b) of a previous report entitled "Thin Capitalisation" (adopted by the OECD Council on 26 November 1986).

Paragraph 59: Replaced paragraph 59 as it read before 17 July 2008. On 17 July 2008 paragraph 59 was renumbered as paragraph 80 (see history of paragraph 80) and a new paragraph 59 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008), on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 60: Replaced paragraph 60 as it read before 17 July 2008. On 17 July 2008 paragraph 60 was renumbered as paragraph 81 (see history of paragraph 81), the heading preceding paragraph 60 was moved with it and a new paragraph 60 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 61: Replaced paragraph 61 as it read before 17 July 2008. On 17 July 2008 paragraph 61 was renumbered as paragraph 82 (see history of paragraph 82) and a new paragraph 61 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 62: Amended on 22 July 2010, by replacing the cross reference to "paragraph 62" of the Commentary on Article 7 with "paragraph 74" by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 62 read as follows:

> "62. When permanent establishments receive dividends, interest, or royalties such income, by virtue of paragraph 4 of Articles 10 and 11 and paragraph 3 of Article 12, respectively, comes under the provisions of Article 7 and consequently — subject to the observations made in paragraph 53 above as regards dividends received on holdings of permanent establishment — falls to be included in the taxable profits of such permanent establishments (see paragraph 62 of the Commentary on Article 7)."

Paragraph 62 as it read after 17 July 2008 corresponded to paragraph 44. On 17 July 2008 paragraph 62 as it read before 17 July 2008 was renumbered as paragraph 83 (see history of paragraph 83), paragraph 44 was renumbered as paragraph 62 and amended, by replacing the cross-references "paragraph 34 above" with "paragraph 53 above" and replacing "paragraph 35" of the Commentary on Article 7 with "paragraph 62", and the heading preceding paragraph 44 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 44 read as follows:

> "44. When permanent establishments receive dividends, interest, or royalties such income, by virtue of paragraph 4 of Articles 10 and 11 and paragraph 3 of Article 12, respectively, comes under the provisions of Article 7 and consequently — subject to the observations made in paragraph 34 above as regards dividends received on holdings of permanent establishment — falls to be included in the taxable profits of such permanent establishments (see paragraph 35 of the Commentary on Article 7)."

Paragraph 44 as it read after 23 July 1992 corresponded to paragraph 46 of the 1977 Model Convention. On 23 July 1992 paragraph 44 of the 1977 Model Convention was amended and renumbered as paragraph 42 (see history of paragraph 42), paragraph 46 was renumbered as paragraph 44 and amended, by replacing the cross-references to "paragraph 36" and "paragraph 34" with "paragraph 34" and "paragraph 35" respectively, and the heading preceding paragraph 46 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 46 read as follows:

> "46. When permanent establishments receive dividends, interest, or royalties such income, by virtue of paragraph 4 of Articles 10 and 11 and paragraph 3 of Article 12, respectively, comes under the provisions of Article 7 and consequently — subject to the observations made in paragraph 36 above as regards dividends received on holdings of permanent establishment — falls to be included in the taxable profits of such permanent establishments (see paragraph 34 of the Commentary on Article 7)."

Paragraph 46 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 63: Corresponds to paragraph 45 as it read before 17 July 2008. On 17 July 2008 paragraph 63 was amended and renumbered as paragraph 84 (see history of paragraph 84) and paragraph 45 was renumbered as paragraph 63 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 45 as it read after 23 July 1992 corresponded to paragraph 47 of the 1977 Model Convention. On 23 July 1992 paragraph 45 of the 1977 Model Convention was renumbered as paragraph 43 (see history of paragraph 43) and paragraph 47 was renumbered as paragraph 45 and amended, by replacing the references therein to paragraphs 30, 22 and 15 of the Commentary on Articles 10, 11 and 12 respectively with references to paragraph 31, 24 and 20 thereof, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 47 read as follows:

> "47. According to the respective Commentaries on the above-mentioned provisions of Articles 10, 11 and 12 (see respectively paragraphs 30, 22 and 15), these provisions dispense the State of source of the dividends, interest or royalties received by the permanent establishment from applying any limitation provided for in those Articles, which means — and this is the generally accepted interpretation — that they leave completely unaffected the right of the State of source, where the permanent establishment is situated, to apply its withholding tax at the full rate."

Paragraph 47 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 64: Corresponds to paragraph 46 as it read before 17 July 2008. On 17 July 2008, paragraph 64 was amended and renumbered as paragraph 85 (see history of paragraph 85) and paragraph 46 was renumbered as paragraph 64 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 46 as it read after 23 July 1992 corresponded to paragraph 48 of the 1977 Model Convention. On 23 July 1992 paragraph 46 of the 1977 Model Convention was amended and renumbered as paragraph 44 (see history of paragraph 62), the heading preceding paragraph 46 was moved with it and paragraph 48 was amended by replacing the reference therein to paragraph 4 by a reference to paragraph 3 and renumbered as paragraph 46 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 48 read as follows:

> "48. While this approach does not create any problems with regard to the provisions of paragraph 4 of Article 24 in the case of countries where a withholding tax is levied on all such income, whether the latter be paid to residents (permanent establishments, like resident enterprises, being allowed to set such withholding tax off against the tax on profits due by virtue of Article 7) or to non residents (subject to the limitations provided for in Articles 10, 11 and 12), the position is different when withholding tax is applied exclusively to income paid to non-residents."

Paragraph 48 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 65: Corresponds to paragraph 47 as it read before 17 July 2008. On 17 July 2008 paragraph 65 was renumbered as paragraph 87 (see history of paragraph 87) and paragraph 47 was renumbered as paragraph 65 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 47 as it read after 23 July 1992 corresponded to paragraph 49 of the 1977 Model Convention. On 23 July 1992 paragraph 47 of the 1977 Model Convention was amended and renumbered as paragraph 45 (see history of paragraph 63) and paragraph 49 was amended, by replacing the reference therein to paragraph 4 with a reference to paragraph 3, and renumbered as paragraph 47 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 49 read as follows:

> "49. In this latter case, in fact, it seems difficult to reconcile the levy of withholding tax with the principle set out in paragraph 4 that for the purpose of taxing the income which is derived from their activity, or which is normally connected with it — as is recognised to be the case with dividends, interest and royalties referred to in paragraph 4 of Articles 10 and 11 and in paragraph 3 of Article 12 — permanent establishments must be treated as resident enterprises and hence in respect of such income be subjected to tax on profits solely."

Paragraph 49 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 66: Corresponds to paragraph 48 as it read before 17 July 2008. On 17 July 2008 paragraph 66 as it read before 17 July 2008 was renumbered as paragraph 88 (see history of paragraph 88), the heading preceding paragraph 66 was moved with it and paragraph 48 was renumbered as paragraph 66 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 48 as it read after 23 July 1992 corresponded to paragraph 50 of the 1977 Model Convention. On 23 July 1992 paragraph 48 of the 1977 Model Convention was amended and renumbered as paragraph 46 (see history of paragraph 64) and paragraph 50 was renumbered as paragraph 48 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 50 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 67: Corresponds to paragraph 49 as it read before 17 July 2008. On 17 July 2008 paragraph 67 was renumbered as paragraph 89 (see history of paragraph 89), paragraph 49 was amended and renumbered as paragraph 67 and the heading preceding paragraph 49 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 49 read as follows:

> "49. In a related context, when a permanent establishment receives foreign income which is included in its taxable profits, it is right by virtue of the same principle to grant to the permanent establishment credit for foreign tax borne by such income when such credit is granted to resident enterprises under domestic laws."

Paragraph 49 as it read after 23 July 1992 corresponded to paragraph 51 of the 1977 Model Convention. On 23 July 1992 paragraph 49 of the 1977 Model Convention was amended and renumbered as paragraph 47 (see history of paragraph 65), paragraph 51 was renumbered as paragraph 49 and the heading preceding paragraph 51 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 51 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 68: Corresponds to paragraph 50 as it read before 17 July 2008. On 17 July 2008 paragraph 68 was renumbered as paragraph 90 (see history of paragraph 90), the heading preceding paragraph 68 was moved with it and paragraph 50 was amended and renumbered as paragraph 68 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 50 read as follows:

> "50. If in a Contracting State (A) in which is situated a permanent establishment of an enterprise of the other Contracting State (B), credit for tax levied in a third State (C) can be allowed only by virtue of a convention, then the more general question arises as to the extension to permanent establishments of the benefit of conventions concluded with third States. This question is examined below, the particular case of dividends, interest and royalties being dealt with in paragraph 51."

Paragraph 50 as it read after 23 July 1992 corresponded to paragraph 52 of the 1977 Model Convention. On 23 July 1992 paragraph 50 of the 1977 Model Convention was renumbered as paragraph 48 (see history of paragraph 66) and paragraph 52 was amended and renumbered as paragraph 50 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 60 of another report entitled "Triangular Cases" (adopted by the OECD Council on 23 July 1992). In the 1977 Model Convention and until 23 July 1992, paragraph 52 read as follows:

> "52. If in a Contracting State (A) in which is situated a permanent establishment of an enterprise of the other Contracting State (B) credit for tax levied in a third State (C) can be allowed only by virtue of a convention, then the more general question arises, as to the extension to permanent establishments of the benefit of conventions concluded with third States, which is examined in paragraph 54 below."

Paragraph 52 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 69: Corresponds to paragraph 51 as it read before 17 July 2008. On 17 July 2008 paragraph 51 was amended and renumbered as paragraph 69 and the heading preceding paragraph 51 was amended and replaced the heading preceding paragraph 69 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 51 and the heading preceding it read as follows:

> *"F. Extension to permanent establishments of the benefit of double taxation conventions concluded with third States*
>
> 51. When the permanent establishment in a Contracting State of a resident enterprise of another Contracting State receives dividends, interest or royalties

C (24)

from a third State, then the question arises as to whether and to what extent the Contracting State in which the permanent establishment is situated should credit the tax that cannot be recovered from the third State."

Paragraph 51 as it read after 23 July 1992 replaced paragraph 51 of the 1977 Model Convention. On 23 July 1992 paragraph 51 of the 1977 Model Convention was renumbered as paragraph 49 (see history of paragraph 67), the heading preceding paragraph 51 was moved with it, a new paragraph 51 was added and the heading preceding paragraph 54 was moved immediately before paragraph 51 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 60 of another report entitled "Triangular Cases" (adopted by the OECD Council on 23 July 1992).

Paragraph 69 as it read before 23 October 1997 was deleted by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, paragraph 69 and the heading preceding it read as follows:

"Paragraph 3

69. *Belgium* reserves in principle the right to apply the provisions of its internal law for the purpose of taxing the profits of Belgian permanent establishments of companies resident in countries with which it undertakes negotiations. However, whenever such an attitude is warranted by the general treatment accorded in such countries to permanent establishments of companies resident in Belgium, Belgium will agree to tax these profits at the normal rate applicable to Belgian companies. Belgium also reserves the right to levy, as a minimum tax, its movable property prepayment (*précompte mobilier*) on dividends received by Belgian permanent establishments of non-resident companies."

Paragraph 69 as it read after 23 July 1992, corresponded to paragraph 64 of the 1977 Model Convention. On 23 July 1992 paragraph 64 of the 1977 Model Convention was amended and renumbered as paragraph 69 and the heading preceding paragraph 64 was moved with it and amended by replacing "Paragraph 4" with "Paragraph 3" by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 64 and the heading preceding it read as follows:

"Paragraph 4

64. *Belgium* reserves the right to apply the provisions of its internal law for the purpose of taxing the profits of Belgian permanent establishments of companies and associations resident in countries with which it undertakes negotiations, whenever such an attitude is warranted by the general treatment accorded in such countries to permanent establishments of companies and associations resident in Belgium (paragraph 4)."

Paragraph 64 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 70: Corresponds to paragraph 52 as it read before 17 July 2008. On 17 July 2008 paragraph 70 was amended and renumbered as paragraph 91 (see history of paragraph 91) and paragraph 52 was renumbered as paragraph 70 and amended, by amending the suggested provision and adding the final sentence, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 October 1997 and until 17 July 2008, paragraph 52 read as follows:

"52. There is agreement that double taxation arises in these situations and that some method of relief should be found. The majority of member countries are able to grant credit in these cases on the basis of their domestic law or under paragraph 3. States that cannot give credit in such a way or that wish to clarify the situation may wish to supplement the provision in their convention with the Contracting State in which the enterprise is resident by wording that allows the State in which the permanent establishment is situated to credit the tax liability in the State in which the income originates to an amount that does not exceed the amount that resident enterprises in the Contracting State in which the permanent establishment is situated can claim on the basis of the Contracting State's convention with the third State. If the tax that cannot be recovered under the convention between the third State and the State of residence of the enterprise which has a permanent establishment in the other Contracting State is lower than that under the convention between the third State and the Contracting State in which the permanent establishment is situated, then only the lower tax collected in the third State shall be credited. This result would be achieved by adding the following words after the first sentence of paragraph 3.

"When a permanent establishment in a Contracting State of an enterprise of the other Contracting State receives dividends, interest or royalties from a third State and the right or the asset in respect of which the dividends, interest or royalties are paid is effectively connected with that permanent establishment, the first-mentioned State shall grant a tax credit in respect of the tax paid in the third State on the dividends, interest or royalties, as the case may be, by applying the rate of tax provided in the convention with respect to taxes on income and capital between the State of which the enterprise is a resident and the third State. However, the amount of the credit shall not exceed the amount that an enterprise that is a resident of the first-mentioned State can claim under that State's convention on income and capital with the third State.""

Paragraph 52 was previously amended on 23 October 1997, by replacing the suggested provision included at the end of the paragraph, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, the suggested provision of paragraph 52 read as follows:

"When a permanent establishment in a Contracting State of an enterprise of the other Contracting State receives dividends, interest or royalties from a third State and the right or the asset in respect of which the dividends, interest or royalties are paid is effectively connected with that permanent establishment, the first-mentioned State shall grant a tax credit in respect of the tax paid in the third State on the dividends, interest or royalties, as the case may be, but the amount of such credit shall not exceed the amount calculated by applying the appropriate rate provided for under the convention with respect to taxes on income and on capital between the Contracting State of which the enterprise is a resident and the third."

Paragraph 52 as it read after 23 July 1992 replaced paragraph 52 of the 1977 Model Convention. On 23 July 1992 paragraph 52 of the 1977 Model Convention was amended and renumbered as paragraph 50 (see history of paragraph 68) and new paragraph 52 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 60 of another report entitled "Triangular Cases" (adopted by the OECD Council on 23 July 1992).

Paragraph 71: Corresponds to paragraph 53 as it read before 17 July 2008. On 17 July 2008 paragraph 53 was renumbered as paragraph 71 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of

Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 53 as it read after 23 July 1992 replaced paragraph 53 of the 1977 Model Convention. On 23 July 1992 paragraph 53 of the 1977 Model Convention was deleted and new paragraph 53 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 60 of another report entitled "Triangular Cases" (adopted by the OECD Council on 23 July 1992). In the 1977 Model Convention and until 23 July 1992, paragraph 53 read as follows:

> "53. It should, however, be pointed out that difficulties may arise as to the amount of the credit to be allowed, if permanent establishments in State A benefit from the convention which State B has concluded with State C. Such amount may be either the amount of tax effectively collected by State C or the amount of tax which State C may collect by virtue either of its convention with State A or its convention with State B. Moreover, the question arises whether such credit is not given twice, *i.e.* once in State A, where the permanent establishment is situated and again in State B, the State of residence. It is for Contracting States to settle such problems, if necessary, in their bilateral negotiations."

Paragraph 53 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 71, as it read after 23 July 1992 and until 31 March 1994, when it was deleted, read as follows:

> "71. *Greece* accepts the provisions of paragraph 4 but wishes to reserve the possibility of not applying the provisions of Articles 11 and 12 where the debt-claim in respect of which the interest is paid, and the property or the right giving rise to royalties, were created or assigned mainly for the purpose of taking advantage of Articles 11 and 12 respectively and not for bona fide commercial reasons."

Paragraph 71 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 72: Corresponds to paragraph 54 as it read before 17 July 2008. On 17 July 2008 paragraph 72 was renumbered as paragraph 92 (see history of paragraph 92), the heading preceding paragraph 72 was moved with it and paragraph 54 was renumbered as paragraph 72 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 54 as it read after 23 July 1992 replaced paragraph 54 of the 1977 Model Convention. On 23 July 1992 paragraph 54 of the 1977 Model Convention was deleted, the heading preceding paragraph 54 was moved immediately before paragraph 51 and a new paragraph 54 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 60 of another report entitled "Triangular Cases" (adopted by the OECD Council on 23 July 1992). In the 1977 Model Convention and until 23 July 1992, paragraph 54 read as follows:

> "54. While an enterprise of a State (A) can normally claim, in respect of the permanent establishment which it possesses in another State (B), the benefit of the provisions of the convention between those two States A and B, it nevertheless cannot, should such permanent establishment derive income from a third State (C), invoke the provisions of the convention between States B and C for the benefit of such permanent establishment since it, the enterprise, is in fact resident

of neither of those two States (see Article 1). This is the consequence of the well-known principle of the relative effect of treaties, which means that they have effect only as between the Contracting States."

Paragraph 54 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 73: Corresponds to paragraph 55 as it read before 17 July 2008. On 17 July 2008 paragraph 55 was renumbered as paragraph 73 and the heading preceding paragraph 55 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 55 as it read after 23 July 1992 corresponded to paragraph 56 of the 1977 Model Convention. On 23 July 1992 paragraph 55 of the 1977 Model Convention was deleted, paragraph 56 was renumbered as paragraph 55, the heading preceding paragraph 56 was moved with it and amended by replacing "Paragraph 5" with "Paragraph 4", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 56 was added and the preceding heading was moved from immediately before paragraph 18 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 55 and the heading preceding paragraph 56 read as follows:

> "55. Nor could such an enterprise invoke for this purpose a most-favoured-nation clause, however general its terms, included in a treaty or agreement concluded between States A and B. In fact, it has always been accepted that such a clause did not apply in the case of double taxation conventions because these are essentially based on the principle of reciprocity. It should, however, be noted that some States have made provision in their double taxation conventions enabling the provisions of the latter to be applied, "in special cases", to permanent establishments of enterprises of a third State."
>
> *Paragraph* 5"

Paragraph 55 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 74: Corresponds to paragraph 56 as it read before 17 July 2008. On 17 July 2008 paragraph 56 was amended and renumbered as paragraph 74 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 56 read as follows:

> "56. Paragraph 4 does not prohibit the country of the borrower from treating interest as a dividend under its domestic rules on thin capitalisation insofar as these are compatible with paragraph 1 of Article 9 or paragraph 6 of Article 11. However, if such treatment results from rules which are not compatible with the said Articles and which only apply to non-resident creditors (to the exclusion of resident creditors), then such treatment is prohibited by paragraph 4."

Paragraph 56 of the 1977 Model Convention was replaced on 23 July 1992. On 23 July 1992 paragraph 56 of the 1977 Model Convention was renumbered as paragraph 55 (see history of paragraph 74), the heading preceding paragraph 56 was moved with it and amended and a new paragraph 56 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992,

on the basis of subparagraph 66 *a)* of a previous report entitled "Thin Capitalisation" (adopted by the OECD Council on 26 November 1986).

Paragraph 75: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 76: Corresponds to paragraph 57 of the 1977 Model Convention and until 17 July 2008. On 17 July 2008 paragraph 57 was renumbered as paragraph 76 and the heading preceding paragraph 57 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

The heading preceding paragraph 57 of the 1977 Model Convention was amended on 23 July 1992, by replacing "Paragraph 6" with "paragraph 5" by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the heading preceding paragraph 57 read as follows:

"Paragraph 6"

Paragraph 57 of the 1977 Model Convention corresponded to paragraph 18 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 18 of the 1963 Draft Convention was amended and renumbered as paragraph 57 and the heading preceding paragraph 19 was moved immediately before paragraph 57 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 18 read as follows:

> "18. Paragraph 5 forbids a State to give different treatment to two enterprises residing on its territory, the capital of one of which is wholly or partly owned or controller, directly or indirectly, by one or more residents of the other Contracting State. This provision, and the discrimination which it puts an end to, relates to the taxation only of enterprises and not of the persons owning or controlling their capital. Its object therefore is to ensure equal treatment for taxpayers residing in the same State, and not to subject foreign capital, in the hands of the partners or shareholders, to identical treatment to that applied to domestic capital. Paragraph 5 has no connection with nationality as defined in paragraph 2 and in no way does it purport to introduce into the Article a new concept of "nationality of capital"."

Paragraph 77: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 78: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 79: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 80: Corresponds to paragraph 59 as it read before 17 July 2008. On 17 July 2008, paragraph 59 was renumbered as paragraph 80 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008,

on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 59 of the 1977 Model Convention was replaced on 23 July 1992. On 23 July 1992 paragraph 59 of the 1977 Model Convention was amended and renumbered as paragraph 61 (see history of paragraph 82), the heading preceding paragraph 59 was moved with it and a new paragraph 59 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraphs 30 and 31 of a previous report entitled "Double Taxation Conventions and the Use of Base Companies" (adopted by the OECD Council on 27 November 1986).

Paragraph 81: Corresponds to paragraph 60 as it read before 17 July 2008. On 17 July 2008, paragraph 60 was renumbered as paragraph 81 and the heading preceding paragraph 60 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 60 as it read after 23 July 1992 and until 17 July 2008 corresponded to paragraph 58 of the 1977 Model Convention. On 23 July 1992 paragraph 60 of the 1977 Model Convention was renumbered as paragraph 62 (see history of paragraph 83), paragraph 58 was renumbered as paragraph 60, the heading preceding paragraph 58 was moved with it and amended, by replacing "Paragraph 7" with "Paragraph 6" by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the heading preceding paragraph 58 read as follows:

> *"Paragraph 7"*

Paragraph 58 of the 1977 Model Convention corresponded to paragraph 19 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 19 of the 1963 Draft Convention was amended and renumbered as paragraph 58 and the preceding heading was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 19 read as follows:

> "19. This paragraph states that the word "taxation" used in the preceding paragraphs of the Article means taxes of every kind and description levied by, or on behalf of the State, its political subdivisions or local authorities. It does not call for any special comment."

Paragraph 82: Corresponds to paragraph 61 as it read before 17 July 2008. On 17 July 2008 paragraph 61 was amended, by replacing the cross-references to paragraphs "38 and 39" with "57 and 58", and renumbered as paragraph 82 and the heading preceding paragraph 61 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 31 March 1994 and until 17 July 2008, paragraph 61 read as follows:

> "61. The interpretation given in paragraphs 38 and 39 above is not endorsed by *Germany*, the tax laws of which require the application of a minimum rate on exclusively inbound sources with respect to non-residents; the minimum rate is close to the lower end of the progressive tax scale."

Paragraph 61 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 61 read as follows:

"61. The interpretation given in paragraphs 38 and 39 above is not endorsed by *Germany*, the tax laws of which require the application of a minimum rate with respect to non-residents. Under German tax laws, the profits of a permanent establishment of an enterprise operated in Germany by a non-resident individual are charged income tax at a minimum rate of 25 per cent. On the other hand, the German tax laws restrict the application of higher rates by strictly limiting the basis for determining the rate applicable to profits derived from German sources — thus excluding any profits derived by those parts of the enterprise which are situated abroad. Moreover, since the minimum rate of 25 per cent is close to the lower end of the progressive tax scale which ranges from 22 per cent to 56 per cent, Germany is of the opinion that the application of the minimum rate of 25 per cent does not violate the provisions of paragraph 3."

Paragraph 61 as it read after 23 July 1992 corresponded to paragraph 59 of the 1977 Model Convention. On 23 July 1992, paragraph 61 of the 1977 Model Convention was renumbered as paragraph 64 (see history of paragraph 85), the heading preceding paragraph 61 was moved with it, paragraph 59 was renumbered as paragraph 61 and amended, by replacing the references therein to paragraphs 40 and 41 and to paragraph 4 of the Article by references to paragraphs 38 and 39 and to paragraph 3 of the Article respectively, and the heading preceding paragraph 59 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 59 read as follows:

"59. The interpretation given in paragraphs 40 and 41 above is not endorsed by *Germany*, the tax laws of which require the application of a minimum rate with respect to non-residents. Under German tax laws, the profits of a permanent establishment of an enterprise operated in Germany by a non-resident individual are charged income tax at a minimum rate of 25 per cent. On the other hand, the German tax laws restrict the application of higher rates by strictly limiting the basis for determining the rate applicable to profits derived from German sources — thus excluding any profits derived by those parts of the enterprise which are situated abroad. Moreover, since the minimum rate of 25 per cent is close to the lower end of the progressive tax scale which ranges from 22 per cent to 56 per cent, Germany is of the opinion that the application of the minimum rate of 25 per cent does not violate the provisions of paragraph 4."

Paragraph 59 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 83: Corresponds to paragraph 62 as it read before 17 July 2008. On 17 July 2008 paragraph 62 was amended and renumbered as paragraph 83 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 62 as it read after 23 July 1992 corresponded to paragraph 60 of the 1977 Model Convention. On 23 July 1992 paragraph 62 of the 1977 Model Convention was amended and renumbered as paragraph 66 (see history of paragraph 88), the heading preceding paragraph 62 was moved with it and paragraph 60 was renumbered as paragraph 62 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 60 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 84: Corresponds to paragraph 63 as it read before 17 July 2008. On 17 July 2008 paragraph 63 was amended, by replacing the cross-reference to "paragraph 53" with a cross-reference to "paragraph 71", and renumbered as paragraph 84 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 63 read as follows:

> "63. With respect to paragraph 53, the *Netherlands* acknowledges that States may wish to include in their bilateral conventions a provision to assure that the benefits of the Convention are denied in "triangular cases" which may be regarded as abusive. In drafting provisions like this, however, the starting point should always be that the benefits of the Convention can be claimed unless the situation is regarded to be abusive. Further the Netherlands would like to express the opinion that the notion "normally taxed" is too ambiguous to serve as a decisive landmark in determining whether a situation is abusive or not."

Paragraph 63 of the 1977 Model Convention was replaced on 23 July 1992. On 23 July 1992 paragraph 63 of the 1977 Model Convention was renumbered as paragraph 67 (see history of paragraph 89) and a new paragraph 63 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 85: Corresponds to paragraph 64 as it read before 17 July 2008. On 17 July 2008 paragraph 64 was amended, by deleting Australia from the list of countries making the observation, renumbered as paragraph 85 and the heading preceding paragraph 64 was moved with it, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 64 read as follows:

> "64. *Australia*, *Canada* and *New Zealand* reserve their positions on this Article."

Paragraph 64 as it read after 23 July 1992 corresponded to paragraph 61 of the 1977 Model Convention. Paragraph 64 of the 1977 Model Convention was amended and renumbered as paragraph 69 (see history of paragraph 69), and the heading preceding paragraph 64 was moved with it and amended by replacing "Paragraph 4" with "Paragraph 3", paragraph 61 was renumbered as paragraph 64 and the heading preceding paragraph 61 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 61 of the 1977 Model Convention corresponded to paragraph 20 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 20 of the 1963 Draft Convention was amended and renumbered as paragraph 61 and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 20 read as follows:

> "20. Canada reserves its position on this Article."

Paragraph 86: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 87: Corresponds to paragraph 65 as it read before 17 July 2008. On 17 July 2008 paragraph 65 was renumbered as paragraph 87 by the report entitled "The 2008

Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 65 of the 1977 Model Convention was replaced on 23 July 1992. On 23 July 1992 paragraph 65 of the 1977 Model Convention was deleted and a new paragraph 65 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 65 read as follows:

> "65. *Japan* reserves the right not to extend to the permanent establishments of non-residents the benefit of tax incentive measures introduced for national policy objectives."

Paragraph 65 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 88: Corresponds to paragraph 66 as it read before 17 July 2008. On 17 July 2008 paragraph 66 was renumbered as paragraph 88 and the heading preceding paragraph 66 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 66 was previously amended on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 66 read as follows:

> "66. *France* wishes to reserve the possibility of applying the provisions of paragraph 1 only to individuals, in view of the French case law and of the fact that paragraphs 3, 4 and 5 already provide companies with wide protection against discrimination. It also wishes to reserve the possibility of granting only to French nationals the exemption, provided for in its domestic laws, of gains from the alienation of immovable property which constitutes the residence in France of French nationals who are domiciled abroad."

Paragraph 66 as it read after 23 July 1992 corresponded to paragraph 62 of the 1977 Model Convention. On 23 July 1992 paragraph 66 of the 1977 Model Convention was amended and renumbered as paragraph 70 (see history of paragraph 91), the heading preceding paragraph 66 was moved with it and amended, paragraph 62 was amended and renumbered as paragraph 66 and the heading preceding paragraph 62 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 62 read as follows:

> "62. *France* accepts the provisions of paragraph 1 but wishes to reserve the possibility of granting only to French nationals the exemption, provided for in its domestic laws, of gains from the alienation of immovable property which constitutes, whether in whole or in part, the residence in France of French nationals who are domiciled abroad."

Paragraph 62 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 89: Amended on 22 July 2010, by adding Chile as a country making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 89 read as follows:

> "89. The *United Kingdom* reserves its position on the second sentence of paragraph 1."

Paragraph 89 as it read after 17 July 2008 corresponded to paragraph 67. On 17 July 2008, paragraph 67 was renumbered as paragraph 89 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 67 as it read after 23 July 1992 corresponded to paragraph 63 of the 1977 Model Convention. On 23 July 1992 paragraph 63 of the 1977 Model Convention was renumbered as paragraph 67 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 63 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 90: Amended on 22 July 2010, by adding Chile as a country making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 90 read as follows:

> "90. *Switzerland* reserves the right not to insert paragraph 2 in its conventions."

Paragraph 90 as it read after 17 July 2008 corresponded to paragraph 68. On 17 July 2008 paragraph 68 was renumbered as paragraph 90 and the heading preceding paragraph 68 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 68 and the heading preceding it were added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 90.1: Added together with the preceding heading on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 91: Corresponds to paragraph 70 as it read before 17 July 2008. On 17 July 2008 paragraph 70 was amended and renumbered as paragraph 91 and the heading preceding paragraph 70 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 23 July 1992 and until 17 July 2008, paragraph 70 read as follows:

> "70. *France* accepts the provisions of paragraph 4 but wishes to reserve the possibility of applying the provisions in its domestic laws relative to the limitation to the deduction of interest paid by a French company to a foreign parent company."

Paragraph 70 as it read after 23 July 1992 corresponded to paragraph 66 of the 1977 Model Convention. On 23 July 1992 paragraph 66 of the 1977 Model Convention was amended by replacing the reference therein to paragraph 5 by a reference to paragraph 4, renumbered paragraph 70, and the heading preceding paragraph 66 was moved with it and amended, by replacing "Paragraph 5" with "Paragraph 4", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 66 and the heading preceding it read as follows:

"Paragraph 5

66. *France* accepts the provisions of paragraph 5 but wishes to reserve the possibility of applying the provisions in its domestic laws relative to the limitation to the deduction of interest paid by a French company to a foreign parent company."

Paragraph 66 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 92: Amended on 22 July 2010, by changing the list of countries making the reservation by adding Chile and deleting Luxembourg, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 92 read as follows:

"92. *Greece*, *Ireland*, *Luxembourg* and the *United Kingdom* reserve the right to restrict the application of the Article to the taxes covered by the Convention."

Corresponds to paragraph 72 as it read before 17 July 2008. On 17 July 2008 paragraph 72 was renumbered as paragraph 92 and the heading preceding paragraph 72 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 72 was previously amended on 28 January 2003, by adding Luxembourg to the list of countries making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 72 read as follows:

"72. *Greece*, *Ireland* and the *United Kingdom* reserve the right to restrict the scope of the Article to the taxes covered by the Convention."

Paragraph 72 was previously amended on 21 September 1995 by adding Greece and Ireland to the list of countries making the reservation, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 72 read as follows:

"72. The *United Kingdom* reserves the right to restrict the scope of the Article to the taxes covered by the Convention."

Paragraph 72 and the heading preceding it were was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

COMMENTARY ON ARTICLE 25 CONCERNING THE MUTUAL AGREEMENT PROCEDURE

I. Preliminary remarks

1. This Article institutes a mutual agreement procedure for resolving difficulties arising out of the application of the Convention in the broadest sense of the term.

(Replaced on 11 April 1977; see HISTORY)

2. It provides first, in paragraph 1 and 2, that the competent authorities shall endeavour by mutual agreement to resolve the situation of taxpayers subjected to taxation not in accordance with the provisions of the Convention.

(Replaced on 11 April 1977; see HISTORY)

3. It also, in paragraph 3, invites and authorises the competent authorities of the two States to resolve by mutual agreement problems relating to the interpretation or application of the Convention and, furthermore, to consult together for the elimination of double taxation in cases not provided for in the Convention.

(Replaced on 11 April 1977; see HISTORY)

4. As regards the practical operation of the mutual agreement procedure, the Article, in paragraph 4, merely authorises the competent authorities to communicate with each other directly, without going through diplomatic channels, and, if it seems advisable to them, to have an oral exchange of opinions through a joint commission appointed especially for the purpose. Article 26 applies to the exchange of information for the purposes of the provisions of this Article. The confidentiality of information exchanged for the purposes of a mutual agreement procedure is thus ensured.

(Amended on 17 July 2008; see HISTORY)

5. Finally, paragraph 5 provides a mechanism that allows a taxpayer to request the arbitration of unresolved issues that have prevented competent authorities from reaching a mutual agreement within two years. Whilst the mutual agreement procedure provides a generally effective and efficient method of resolving disputes arising under the Convention, there may be cases where the competent authorities are unable to agree that the taxation by both States is in accordance with the Convention. The arbitration process provided for under paragraph 5 allows such cases to be resolved by allowing an independent decision of the unresolved issues, thereby allowing a mutual agreement to be reached. This process is an integral part of the mutual

agreement procedure and does not constitute an alternative route to solving disputes concerning the application of the Convention.

(Replaced on 17 July 2008; see HISTORY)

6. Since the Article merely lays down general rules concerning the mutual agreement procedure, the comments below are intended to clarify the purpose of such rules, and also to amplify them, if necessary, by referring, in particular, to the rules and practices followed at international level in the conduct of mutual agreement procedures or at the internal level in the conduct of the procedures which exist in most OECD member countries for dealing with disputed claims regarding taxes. In particular, since paragraph 5 expressly requires the competent authorities to agree on the mode of application of the arbitration process that it provides, the comments below discuss in detail various procedural aspects of that process. An annex to this Commentary contains a sample form of agreement that the competent authorities may use as a basis for settling the mode of application of the arbitration process; that annex addresses various structural and procedural issues, discusses the various provisions of the sample agreement and, in some cases, puts forward alternatives.

(Renumbered and amended on 17 July 2008; see HISTORY)

II. Commentary on the provisions of the Article

Paragraphs 1 and 2

7. The rules laid down in paragraph 1 and 2 provide for the elimination in a particular case of taxation which does not accord with the Convention. As is known, in such cases it is normally open to taxpayers to litigate in the tax court, either immediately or upon the dismissal of their objections by the taxation authorities. When taxation not in accordance with the Convention arises from an incorrect application of the Convention in both States, taxpayers are then obliged to litigate in each State, with all the disadvantages and uncertainties that such a situation entails. So paragraph 1 makes available to taxpayers affected, without depriving them of the ordinary legal remedies available, a procedure which is called the mutual agreement procedure because it is aimed, in its second stage, at resolving the dispute on an agreed basis, *i.e.* by agreement between competent authorities, the first stage being conducted exclusively in the State of residence (except where the procedure for the application of paragraph 1 of Article 24 is set in motion by the taxpayer in the State of which he is a national) from the presentation of the objection up to the decision taken regarding it by the competent authority on the matter.

(Renumbered and amended on 17 July 2008; see HISTORY)

8. In any case, the mutual agreement procedure is clearly a special procedure outside the domestic law. It follows that it can be set in motion solely in cases coming within paragraph 1, *i.e.* cases where tax has been charged, or is going to be charged, in disregard of the provisions of the Convention. So where a charge of tax has been made contrary both to the Convention and the domestic law, this case is amenable to the mutual agreement procedure to the extent only that the Convention is affected, unless a connecting link exists between the rules of the Convention and the rules of the domestic law which have been misapplied.

(Renumbered on 17 July 2008; see HISTORY)

9. In practice, the procedure applies to cases — by far the most numerous — where the measure in question leads to double taxation which it is the specific purpose of the Convention to avoid. Among the most common cases, mention must be made of the following:

- — questions relating to the attribution of profits to a permanent establishment under paragraph 2 of Article 7;
- — the taxation in the State of the payer — in case of a special relationship between the payer and the beneficial owner — of the excess part of interest and royalties, under the provisions of Article 9, paragraph 6 of Article 11 or paragraph 4 of Article 12;
- — cases of application of legislation to deal with thin capitalisation when the State of the debtor company has treated interest as dividends, insofar as such treatment is based on clauses of a convention corresponding for example to Article 9 or paragraph 6 of Article 11;
- — cases where lack of information as to the taxpayer's actual situation has led to misapplication of the Convention, especially in regard to the determination of residence (paragraph 2 of Article 4), the existence of a permanent establishment (Article 5), or the temporary nature of the services performed by an employee (paragraph 2 of Article 15).

(Amended on 22 July 2010; see HISTORY)

10. Article 25 also provides machinery to enable competent authorities to consult with each other with a view to resolving, in the context of transfer pricing problems, not only problems of juridical double taxation but also those of economic double taxation, and especially those resulting from the inclusion of profits of associated enterprises under paragraph 1 of Article 9; the corresponding adjustments to be made in pursuance of paragraph 2 of the same Article thus fall within the scope of the mutual agreement procedure, both as concerns assessing whether they are well-founded and for determining their amount.

(Renumbered on 17 July 2008; see HISTORY)

11. This in fact is implicit in the wording of paragraph 2 of Article 9 when the bilateral convention in question contains a clause of this type. When the bilateral convention does not contain rules similar to those of paragraph 2 of Article 9 (as is usually the case for conventions signed before 1977) the mere fact that Contracting States inserted in the convention the text of Article 9, as limited to the text of paragraph 1 — which usually only confirms broadly similar rules existing in domestic laws — indicates that the intention was to have economic double taxation covered by the Convention. As a result, most member countries consider that economic double taxation resulting from adjustments made to profits by reason of transfer pricing is not in accordance with — at least — the spirit of the convention and falls within the scope of the mutual agreement procedure set up under Article 25.

(Renumbered and amended on 17 July 2008; see HISTORY)

12. Whilst the mutual agreement procedure has a clear role in dealing with issues arising as to the sorts of adjustments referred to in paragraph 2 of Article 9, it follows that even in the absence of such a provision, States should be seeking to avoid double taxation, including by giving corresponding adjustments in cases of the type contemplated in paragraph 2. Whilst there may be some difference of view, States would therefore generally regard a taxpayer initiated mutual agreement procedure based upon economic double taxation contrary to the terms of Article 9 as encompassing issues of whether a corresponding adjustment should have been provided, even in the absence of a provision similar to paragraph 2 of Article 9. States which do not share this view do, however, in practice, find the means of remedying economic double taxation in most cases involving *bona fide* companies by making use of provisions in their domestic laws.

(Added on 17 July 2008; see HISTORY)

13. The mutual agreement procedure is also applicable in the absence of any double taxation contrary to the Convention, once the taxation in dispute is in direct contravention of a rule in the Convention. Such is the case when one State taxes a particular class of income in respect of which the Convention gives an exclusive right to tax to the other State even though the latter is unable to exercise it owing to a gap in its domestic laws. Another category of cases concerns persons who, being nationals of one Contracting State but residents of the other State, are subjected in that other State to taxation treatment which is discriminatory under the provisions of paragraph 1 of Article 24.

(Renumbered on 17 July 2008; see HISTORY)

14. It should be noted that the mutual agreement procedure, unlike the disputed claims procedure under domestic law, can be set in motion by a

taxpayer without waiting until the taxation considered by him to be "not in accordance with the Convention" has been charged against or notified to him. To be able to set the procedure in motion, he must, and it is sufficient if he does, establish that the "actions of one or both of the Contracting States" will result in such taxation, and that this taxation appears as a risk which is not merely possible but probable. Such actions mean all acts or decisions, whether of a legislative or a regulatory nature, and whether of general or individual application, having as their direct and necessary consequence the charging of tax against the complainant contrary to the provisions of the Convention. Thus, for example, if a change to a Contracting State's tax law would result in a person deriving a particular type of income being subjected to taxation not in accordance with the Convention, that person could set the mutual agreement procedure in motion as soon as the law has been amended and that person has derived the relevant income or it becomes probable that the person will derive that income. Other examples include filing a return in a self assessment system or the active examination of a specific taxpayer reporting position in the course of an audit, to the extent that either event creates the probability of taxation not in accordance with the Convention (*e.g.* where the self assessment reporting position the taxpayer is required to take under a Contracting State's domestic law would, if proposed by that State as an assessment in a non-self assessment regime, give rise to the probability of taxation not in accordance with the Convention, or where circumstances such as a Contracting State's published positions or its audit practice create a significant likelihood that the active examination of a specific reporting position such as the taxpayer's will lead to proposed assessments that would give rise to the probability of taxation not in accordance with the Convention). Another example might be a case where a Contracting State's transfer pricing law requires a taxpayer to report taxable income in an amount greater than would result from the actual prices used by the taxpayer in its transactions with a related party, in order to comply with the arm's length principle, and where there is substantial doubt whether the taxpayer's related party will be able to obtain a corresponding adjustment in the other Contracting State in the absence of a mutual agreement procedure. As indicated by the opening words of paragraph 1, whether or not the actions of one or both of the Contracting States will result in taxation not in accordance with the Convention must be determined from the perspective of the taxpayer. Whilst the taxpayer's belief that there will be such taxation must be reasonable and must be based on facts that can be established, the tax authorities should not refuse to consider a request under paragraph 1 merely because they consider that it has not been proven (for example to domestic law standards of proof on the "balance of probabilities") that such taxation will occur.

(Renumbered and amended on 17 July 2008; see HISTORY)

15. Since the first steps in a mutual agreement procedure may be set in motion at a very early stage based upon the mere probability of taxation not in accordance with the Convention, the initiation of the procedure in this manner would not be considered the presentation of the case to the competent authority for the purposes of determining the start of the two year period referred to in paragraph 5 of the Article. paragraph 8 of the annex to the Commentary on Article 25 describes the circumstances in which that two year period commences.

(Replaced on 17 July 2008; see HISTORY)

16. To be admissible objections presented under paragraph 1 must first meet a twofold requirement expressly formulated in that paragraph: in principle, they must be presented to the competent authority of the taxpayer's State of residence (except where the procedure for the application of paragraph 1 of Article 24 is set in motion by the taxpayer in the State of which he is a national), and they must be so presented within three years of the first notification of the action which gives rise to taxation which is not in accordance with the Convention. The Convention does not lay down any special rule as to the form of the objections. The competent authorities may prescribe special procedures which they feel to be appropriate. If no special procedure has been specified, the objections may be presented in the same way as objections regarding taxes are presented to the tax authorities of the State concerned.

(Renumbered on 17 July 2008; see HISTORY)

17. The requirement laid on the taxpayer to present his case to the competent authority of the State of which he is a resident (except where the procedure for the application of paragraph 1 of Article 24 is set in motion by the taxpayer in the State of which he is a national) is of general application, regardless of whether the taxation objected to has been charged in that or the other State and regardless of whether it has given rise to double taxation or not. If the taxpayer should have transferred his residence to the other Contracting State subsequently to the measure or taxation objected to, he must nevertheless still present his objection to the competent authority of the State of which he was a resident during the year in respect of which such taxation has been or is going to be charged.

(Renumbered on 17 July 2008; see HISTORY)

18. However, in the case already alluded to where a person who is a national of one State but a resident of the other complains of having been subjected in that other State to an action or taxation which is discriminatory under paragraph 1 of Article 24, it appears more appropriate for obvious reasons to allow him, by way of exception to the general rule set forth above, to present

his objection to the competent authority of the Contracting State of which he is a national. Finally, it is to the same competent authority that an objection has to be presented by a person who, while not being a resident of a Contracting State, is a national of a Contracting State, and whose case comes under paragraph 1 of Article 24.

(Renumbered on 17 July 2008; see HISTORY)

19. On the other hand, Contracting States may, if they consider it preferable, give taxpayers the option of presenting their cases to the competent authority of either State. In such a case, paragraph 1 would have to be modified as follows:

> 1. Where a person considers that the actions of one or both of the Contracting States result or will result for him in taxation not in accordance with the provisions of this Convention, he may, irrespective of the remedies provided by the domestic law of those States, present his case to the competent authority of either Contracting State. The case must be presented within three years from the first notification of the action resulting in taxation not in accordance with the provisions of the Convention.

(Renumbered on 17 July 2008; see HISTORY)

20. The time limit of three years set by the second sentence of paragraph 1 for presenting objections is intended to protect administrations against late objections. This time limit must be regarded as a minimum, so that Contracting States are left free to agree in their bilateral conventions upon a longer period in the interests of taxpayers, *e.g.* on the analogy in particular of the time limits laid down by their respective domestic regulations in regard to tax conventions. Contracting States may omit the second sentence of paragraph 1 if they concur that their respective domestic regulations apply automatically to such objections and are more favourable in their effects to the taxpayers affected, either because they allow a longer time for presenting objections or because they do not set any time limits for such purpose.

(Renumbered on 17 July 2008; see HISTORY)

21. The provision fixing the starting point of the three year time limit as the date of the "first notification of the action resulting in taxation not in accordance with the provisions of the Convention" should be interpreted in the way most favourable to the taxpayer. Thus, even if such taxation should be directly charged in pursuance of an administrative decision or action of general application, the time limit begins to run only from the date of the notification of the individual action giving rise to such taxation, that is to say, under the most favourable interpretation, from the act of taxation itself, as evidenced by a notice of assessment or an official demand or other instrument

for the collection or levy of tax. Since a taxpayer has the right to present a case as soon as the taxpayer considers that taxation will result in taxation not in accordance with the provisions of the Convention, whilst the three year limit only begins when that result has materialised, there will be cases where the taxpayer will have the right to initiate the mutual agreement procedure before the three year time limit begins (see the examples of such a situation given in paragraph 14 above).

(Renumbered and amended on 17 July 2008; see HISTORY)

22. In most cases it will be clear what constitutes the relevant notice of assessment, official demand or other instrument for the collection or levy of tax, and there will usually be domestic law rules governing when that notice is regarded as "given". Such domestic law will usually look to the time when the notice is sent (time of sending), a specific number of days after it is sent, the time when it would be expected to arrive at the address it is sent to (both of which are times of presumptive physical receipt), or the time when it is in fact physically received (time of actual physical receipt). Where there are no such rules, either the time of actual physical receipt or, where this is not sufficiently evidenced, the time when the notice would normally be expected to have arrived at the relevant address should usually be treated as the time of notification, bearing in mind that this provision should be interpreted in the way most favourable to the taxpayer.

(Replaced on 17 July 2008; see HISTORY)

23. In self assessment cases, there will usually be some notification effecting that assessment (such as a notice of a liability or of denial or adjustment of a claim for refund), and generally the time of notification, rather than the time when the taxpayer lodges the self-assessed return, would be a starting point for the three year period to run. There may, however, be cases where there is no notice of a liability or the like. In such cases, the relevant time of "notification" would be the time when the taxpayer would, in the normal course of events, be regarded as having been made aware of the taxation that is in fact not in accordance with the Convention. This could, for example, be when information recording the transfer of funds is first made available to a taxpayer, such as in a bank balance or statement. The time begins to run whether or not the taxpayer actually regards the taxation, at that stage, as contrary to the Convention, provided that a reasonably prudent person in the taxpayer's position would have been able to conclude at that stage that the taxation was not in accordance with the Convention. In such cases, notification of the fact of taxation to the taxpayer is enough. Where, however, it is only the combination of the self assessment with some other circumstance that would cause a reasonably prudent person in the taxpayer's position to conclude that the taxation was contrary to the Convention (such as

a judicial decision determining the imposition of tax in a case similar to the taxpayer's to be contrary to the provisions of the Convention), the time begins to run only when the latter circumstance materialises.

(Replaced on 17 July 2008; see HISTORY)

24. If the tax is levied by deduction at the source, the time limit begins to run from the moment when the income is paid; however, if the taxpayer proves that only at a later date did he know that the deduction had been made, the time limit will begin from that date. Where it is the combination of decisions or actions taken in both Contracting States that results in taxation not in accordance with the Convention, the time limit begins to run only from the first notification of the most recent decision or action. This means that where, for example, a Contracting State levies a tax that is not in accordance with the Convention but the other State provides relief for such tax pursuant to Article 23 A or Article 23 B so that there is no double taxation, a taxpayer will in practice often not initiate the mutual agreement procedure in relation to the action of the first State. If, however, the other State subsequently notifies the taxpayer that the relief is denied so that double taxation now arises, a new time limit begins from that notification, since the combined actions of both States then result in the taxpayer's being subjected to double taxation contrary to the provisions of the Convention. In some cases, especially of this type, the records held by taxing authorities may have been routinely destroyed before the period of the time limit ends, in accordance with the normal practice of one or both of the States. The Convention obligations do not prevent such destruction, or require a competent authority to accept the taxpayer's arguments without proof, but in such cases the taxpayer should be given the opportunity to supply the evidential deficiency, as the mutual agreement procedure continues, to the extent domestic law allows. In some cases, the other Contracting State may be able to provide sufficient evidence, in accordance with Article 26 of the Model Tax Convention. It is, of course, preferable that such records be retained by tax authorities for the full period during which a taxpayer is able to seek to initiate the mutual agreement procedure in relation to a particular matter.

(Replaced on 17 July 2008; see HISTORY)

25. The three year period continues to run during any domestic law (including administrative) proceedings (*e.g.* a domestic appeal process). This could create difficulties by in effect requiring a taxpayer to choose between domestic law and mutual agreement procedure remedies. Some taxpayers may rely solely on the mutual agreement procedure, but many taxpayers will attempt to address these difficulties by initiating a mutual agreement procedure whilst simultaneously initiating domestic law action, even though the domestic law process is initially not actively pursued. This could result in

mutual agreement procedure resources being inefficiently applied. Where domestic law allows, some States may wish to specifically deal with this issue by allowing for the three year (or longer) period to be suspended during the course of domestic law proceedings. Two approaches, each of which is consistent with Article 25 are, on one hand, requiring the taxpayer to initiate the mutual agreement procedure, with no suspension during domestic proceedings, but with the competent authorities not entering into talks in earnest until the domestic law action is finally determined, or else, on the other hand, having the competent authorities enter into talks, but without finally settling an agreement unless and until the taxpayer agrees to withdraw domestic law actions. This second possibility is discussed at paragraph 42 of this Commentary. In either of these cases, the taxpayer should be made aware that the relevant approach is being taken. Whether or not a taxpayer considers that there is a need to lodge a "protective" appeal under domestic law (because, for example, of domestic limitation requirements for instituting domestic law actions) the preferred approach for all parties is often that the mutual agreement procedure should be the initial focus for resolving the taxpayer's issues, and for doing so on a bilateral basis.

(Replaced on 17 July 2008; see HISTORY)

26. Some States may deny the taxpayer the ability to initiate the mutual agreement procedure under paragraph 1 of Article 25 in cases where the transactions to which the request relates are regarded as abusive. This issue is closely related to the issue of "improper use of the Convention" discussed in paragraph 9.1 and the following paragraphs of the Commentary on Article 1. In the absence of a special provision, there is no general rule denying perceived abusive situations going to the mutual agreement procedure, however. The simple fact that a charge of tax is made under an avoidance provision of domestic law should not be a reason to deny access to mutual agreement. However, where serious violations of domestic laws resulting in significant penalties are involved, some States may wish to deny access to the mutual agreement procedure. The circumstances in which a State would deny access to the mutual agreement procedure should be made clear in the Convention.

(Replaced on 17 July 2008; see HISTORY)

27. Some States regard certain issues as not susceptible to resolution by the mutual agreement procedure generally, or at least by taxpayer initiated mutual agreement procedure, because of constitutional or other domestic law provisions or decisions. An example would be a case where granting the taxpayer relief would be contrary to a final court decision that the tax authority is required to adhere to under that State's constitution. The recognised general principle for tax and other treaties is that domestic law,

even domestic constitutional law, does not justify a failure to meet treaty obligations, however. Article 27 of the *Vienna Convention on the Law of Treaties* reflects this general principle of treaty law. It follows that any justification for what would otherwise be a breach of the Convention needs to be found in the terms of the Convention itself, as interpreted in accordance with accepted tax treaty interpretation principles. Such a justification would be rare, because it would not merely govern how a matter will be dealt with by the two States once the matter is within the mutual agreement procedure, but would instead prevent the matter from even reaching the stage when it is considered by both States. Since such a determination might in practice be reached by one of the States without consultation with the other, and since there might be a bilateral solution that therefore remains unconsidered, the view that a matter is not susceptible of taxpayer initiated mutual agreement procedure should not be lightly made, and needs to be supported by the terms of the Convention as negotiated. A competent authority relying upon a domestic law impediment as the reason for not allowing the mutual agreement procedure to be initiated by a taxpayer should inform the other competent authority of this and duly explain the legal basis of its position. More usually, genuine domestic law impediments will not prevent a matter from entering into the mutual agreement procedure, but if they will clearly and unequivocally prevent a competent authority from resolving the issue in a way that avoids taxation of the taxpayer which is not in accordance with the Convention, and there is no realistic chance of the other State resolving the issue for the taxpayer, then that situation should be made public to taxpayers, so that taxpayers do not have false expectations as to the likely outcomes of the procedure.

(Replaced on 17 July 2008; see HISTORY)

28. In other cases, initiation of the mutual agreement procedure may have been allowed but domestic law issues that have arisen since the negotiation of the treaty may prevent a competent authority from resolving, even in part, the issue raised by the taxpayer. Where such developments have a legally constraining effect on the competent authority, so that bilateral discussions can clearly not resolve the matter, most States would accept that this change of circumstances is of such significance as to allow that competent authority to withdraw from the procedure. In some cases, the difficulty may be only temporary however; such as whilst rectifying legislation is enacted, and in that case, the procedure should be suspended rather than terminated. The two competent authorities will need to discuss the difficulty and its possible effect on the mutual agreement procedure. There will also be situations where a decision wholly or partially in the taxpayer's favour is binding and must be followed by one of the competent authorities but where there is still scope for

mutual agreement discussions, such as for example in one competent authority's demonstrating to the other that the latter should provide relief.

(Replaced on 17 July 2008; see HISTORY)

29. There is less justification for relying on domestic law for not implementing an agreement reached as part of the mutual agreement procedure. The obligation of implementing such agreements is unequivocally stated in the last sentence of paragraph 2, and impediments to implementation that were already existing should generally be built into the terms of the agreement itself. As tax conventions are negotiated against a background of a changing body of domestic law that is sometimes difficult to predict, and as both parties are aware of this in negotiating the original Convention and in reaching mutual agreements, subsequent unexpected changes that alter the fundamental basis of a mutual agreement would generally be considered as requiring revision of the agreement to the extent necessary. Obviously where there is a domestic law development of this type, something that should only rarely occur, good faith obligations require that it be notified as soon as possible, and there should be a good faith effort to seek a revised or new mutual agreement, to the extent the domestic law development allows. In these cases, the taxpayer's request should be regarded as still operative, rather than a new application's being required from that person.

(Replaced on 17 July 2008; see HISTORY)

30. As regards the procedure itself, it is necessary to consider briefly the two distinct stages into which it is divided (see paragraph 7 above).

(Renumbered and amended on 17 July 2008; see HISTORY)

31. In the first stage, which opens with the presentation of the taxpayer's objections, the procedure takes place exclusively at the level of dealings between him and the competent authorities of his State of residence (except where the procedure for the application of paragraph 1 of Article 24 is set in motion by the taxpayer in the State of which he is a national). The provisions of paragraph 1 give the taxpayer concerned the right to apply to the competent authority of the State of which he is a resident, whether or not he has exhausted all the remedies available to him under the domestic law of each of the two States. On the other hand, that competent authority is under an obligation to consider whether the objection is justified and, if it appears to be justified, take action on it in one of the two forms provided for in paragraph 2.

(Renumbered on 17 July 2008; see HISTORY)

32. If the competent authority duly approached recognises that the complaint is justified and considers that the taxation complained of is due wholly or in part to a measure taken in the taxpayer's State of residence, it must give the complainant satisfaction as speedily as possible by making such adjustments or allowing such reliefs as appear to be justified. In this situation, the issue can be resolved without resort to the mutual agreement procedure. On the other hand, it may be found useful to exchange views and information with the competent authority of the other Contracting State, in order, for example, to confirm a given interpretation of the Convention.

(Renumbered on 17 July 2008; see HISTORY)

33. If, however, it appears to that competent authority that the taxation complained of is due wholly or in part to a measure taken in the other State, it will be incumbent on it, indeed it will be its duty — as clearly appears by the terms of paragraph 2 — to set in motion the mutual agreement procedure proper. It is important that the authority in question carry out this duty as quickly as possible, especially in cases where the profits of associated enterprises have been adjusted as a result of transfer pricing adjustments.

(Renumbered on 17 July 2008; see HISTORY)

34. A taxpayer is entitled to present his case under paragraph 1 to the competent authority of the State of which he is a resident whether or not he may also have made a claim or commenced litigation under the domestic law of that State. If litigation is pending, the competent authority of the State of residence should not wait for the final adjudication, but should say whether it considers the case to be eligible for the mutual agreement procedure. If it so decides, it has to determine whether it is itself able to arrive at a satisfactory solution or whether the case has to be submitted to the competent authority of the other Contracting State. An application by a taxpayer to set the mutual agreement procedure in motion should not be rejected without good reason.

(Renumbered on 17 July 2008; see HISTORY)

35. If a claim has been finally adjudicated by a court in the State of residence, a taxpayer may wish even so to present or pursue a claim under the mutual agreement procedure. In some States, the competent authority may be able to arrive at a satisfactory solution which departs from the court decision. In other States, the competent authority is bound by the court decision. It may nevertheless present the case to the competent authority of the other Contracting State and ask the latter to take measures for avoiding double taxation.

(Renumbered on 17 July 2008; see HISTORY)

36. In its second stage — which opens with the approach to the competent authority of the other State by the competent authority to which the taxpayer has applied — the procedure is henceforward at the level of dealings between States, as if, so to speak, the State to which the complaint was presented had given it its backing. But whilst this procedure is indisputably a procedure between States, it may, on the other hand, be asked:

— whether, as the title of the Article and the terms employed in the first sentence of paragraph 2 suggest, it is no more than a simple procedure of mutual agreement, or constitutes the implementation of a *pactum de contrahendo* laying on the parties a mere duty to negotiate but in no way laying on them a duty to reach agreement;

— or whether on the contrary, it is to be regarded (based on the existence of the arbitration process provided for in paragraph 5 to address unresolved issues or on the assumption that the procedure takes place within the framework of a joint commission) as a procedure of a jurisdictional nature laying on the parties a duty to resolve the dispute.

(Renumbered and amended on 17 July 2008; see HISTORY)

37. paragraph 2 no doubt entails a duty to negotiate; but as far as reaching mutual agreement through the procedure is concerned, the competent authorities are under a duty merely to use their best endeavours and not to achieve a result. paragraph 5, however, provides a mechanism that will allow an agreement to be reached even if there are issues on which the competent authorities have been unable to reach agreement through negotiations.

(Renumbered and amended on 17 July 2008; see HISTORY)

38. In seeking a mutual agreement, the competent authorities must first, of course, determine their position in the light of the rules of their respective taxation laws and of the provisions of the Convention, which are as binding on them as much as they are on the taxpayer. Should the strict application of such rules or provisions preclude any agreement, it may reasonably be held that the competent authorities, as in the case of international arbitration, can, subsidiarily, have regard to considerations of equity in order to give the taxpayer satisfaction.

(Renumbered on 17 July 2008; see HISTORY)

39. The purpose of the last sentence of paragraph 2 is to enable countries with time limits relating to adjustments of assessments and tax refunds in their domestic law to give effect to an agreement despite such time limits. This provision does not prevent, however, such States as are not, on constitutional or other legal grounds, able to overrule the time limits in the domestic law from inserting in the mutual agreement itself such time limits as are adapted to their internal statute of limitation. In certain extreme cases, a

Contracting State may prefer not to enter into a mutual agreement, the implementation of which would require that the internal statute of limitation had to be disregarded. Apart from time limits there may exist other obstacles such as "final court decisions" to giving effect to an agreement. Contracting States are free to agree on firm provisions for the removal of such obstacles. As regards the practical implementation of the procedure, it is generally recommended that every effort should be made by tax administrations to ensure that as far as possible the mutual agreement procedure is not in any case frustrated by operational delays or, where time limits would be in point, by the combined effects of time limits and operational delays.

(Renumbered on 17 July 2008; see HISTORY)

40. The Committee on Fiscal Affairs made a number of recommendations on the problems raised by corresponding adjustments of profits following transfer pricing adjustments (implementation of paragraph 1 and 2 of Article 9) and of the difficulties of applying the mutual agreement procedure to such situations:

a) Tax authorities should notify taxpayers as soon as possible of their intention to make a transfer pricing adjustment (and, where the date of any such notification may be important, to ensure that a clear formal notification is given as soon as possible), since it is particularly useful to ensure as early and as full contacts as possible on all relevant matters between tax authorities and taxpayers within the same jurisdiction and, across national frontiers, between the associated enterprises and tax authorities concerned.

b) Competent authorities should communicate with each other in these matters in as flexible a manner as possible, whether in writing, by telephone, or by face-to-face or round-the-table discussion, whichever is most suitable, and should seek to develop the most effective ways of solving relevant problems. Use of the provisions of Article 26 on the exchange of information should be encouraged in order to assist the competent authority in having well-developed factual information on which a decision can be made.

c) In the course of mutual agreement proceedings on transfer pricing matters, the taxpayers concerned should be given every reasonable opportunity to present the relevant facts and arguments to the competent authorities both in writing and orally.

(Renumbered on 17 July 2008; see HISTORY)

41. As regards the mutual agreement procedure in general, the Committee recommended that:

a) The formalities involved in instituting and operating the mutual agreement procedure should be kept to a minimum and any unnecessary formalities eliminated.

b) Mutual agreement cases should each be settled on their individual merits and not by reference to any balance of the results in other cases.

c) Competent authorities should, where appropriate, formulate and publicise domestic rules, guidelines and procedures concerning use of the mutual agreement procedure.

(Renumbered on 17 July 2008; see HISTORY)

42. The case may arise where a mutual agreement is concluded in relation to a taxpayer who has brought a suit for the same purpose in the competent court of either Contracting State and such suit is still pending. In such a case, there would be no grounds for rejecting a request by a taxpayer that he be allowed to defer acceptance of the solution agreed upon as a result of the mutual agreement procedure until the court had delivered its judgment in that suit. Also, a view that competent authorities might reasonably take is that where the taxpayer's suit is ongoing as to the particular issue upon which mutual agreement is sought by that same taxpayer, discussions of any depth at the competent authority level should await a court decision. If the taxpayer's request for a mutual agreement procedure applied to different tax years than the court action, but to essentially the same factual and legal issues, so that the court outcome would in practice be expected to affect the treatment of the taxpayer in years not specifically the subject of litigation, the position might be the same, in practice, as for the cases just mentioned. In either case, awaiting a court decision or otherwise holding a mutual agreement procedure in abeyance whilst formalised domestic recourse proceedings are underway will not infringe upon, or cause time to expire from, the two year period referred to in paragraph 5 of the Article. Of course, if competent authorities consider, in either case, that the matter might be resolved notwithstanding the domestic law proceedings (because, for example, the competent authority where the court action is taken will not be bound or constrained by the court decision) then the mutual agreement procedure may proceed as normal.

(Renumbered and amended on 17 July 2008; see HISTORY)

43. The situation is also different if there is a suit ongoing on an issue, but the suit has been taken by another taxpayer than the one who is seeking to initiate the mutual agreement procedure. In principle, if the case of the taxpayer seeking the mutual agreement procedure supports action by one or both competent authorities to prevent taxation not in accordance with the Convention, that should not be unduly delayed pending a general clarification

of the law at the instance of another taxpayer, although the taxpayer seeking mutual agreement might agree to this if the clarification is likely to favour that taxpayer's case. In other cases, delaying competent authority discussions as part of a mutual agreement procedure may be justified in all the circumstances, but the competent authorities should as far as possible seek to prevent disadvantage to the taxpayer seeking mutual agreement in such a case. This could be done, where domestic law allows, by deferring payment of the amount outstanding during the course of the delay, or at least during that part of the delay which is beyond the taxpayer's control.

(Replaced on 17 July 2008; see HISTORY)

44. Depending upon domestic procedures, the choice of redress is normally that of the taxpayer and in most cases it is the domestic recourse provisions such as appeals or court proceedings that are held in abeyance in favour of the less formal and bilateral nature of mutual agreement procedure.

(Replaced on 17 July 2008; see HISTORY)

44.1 *(Renumbered on 17 July 2008; see HISTORY)*

44.2 *(Renumbered on 17 July 2008; see HISTORY)*

44.3 *(Renumbered on 17 July 2008; see HISTORY)*

44.4 *(Renumbered on 17 July 2008; see HISTORY)*

44.5 *(Renumbered on 17 July 2008; see HISTORY)*

44.6 *(Renumbered on 17 July 2008; see HISTORY)*

44.7 *(Renumbered on 17 July 2008; see HISTORY)*

45. As noted above, there may be a pending suit by the taxpayer on an issue, or else the taxpayer may have preserved the right to take such domestic law action, yet the competent authorities might still consider that an agreement can be reached. In such cases, it is, however, necessary to take into account the concern of a particular competent authority to avoid any divergences or contradictions between the decision of the court and the mutual agreement that is being sought, with the difficulties or risks of abuse that these could entail. In short, therefore, the implementation of such a mutual agreement should normally be made subject:

— to the acceptance of such mutual agreement by the taxpayer, and

— to the taxpayer's withdrawal of the suit at law concerning those points settled in the mutual agreement.

(Replaced on 17 July 2008; see HISTORY)

46. Some States take the view that a mutual agreement procedure may not be initiated by a taxpayer unless and until payment of all or a specified portion of the tax amount in dispute has been made. They consider that the requirement for payment of outstanding taxes, subject to repayment in whole or in part depending on the outcome of the procedure, is an essentially procedural matter not governed by Article 25, and is therefore consistent with it. A contrary view, held by many States, is that Article 25 indicates all that a taxpayer must do before the procedure is initiated, and that it imposes no such requirement. Those States find support for their view in the fact that the procedure may be implemented even before the taxpayer has been charged to tax or notified of a liability (as noted at paragraph 14 above) and in the acceptance that there is clearly no such requirement for a procedure initiated by a competent authority under paragraph 3.

(Replaced on 17 July 2008; see HISTORY)

47. Article 25 gives no absolutely clear answer as to whether a taxpayer initiated mutual agreement procedure may be denied on the basis that there has not been the necessary payment of all or part of the tax in dispute. However, whatever view is taken on this point, in the implementation of the Article it should be recognised that the mutual agreement procedure supports the substantive provisions of the Convention and that the text of Article 25 should therefore be understood in its context and in the light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance. States therefore should as far as possible take into account the cash flow and possible double taxation issues in requiring advance payment of an amount that the taxpayer contends was at least in part levied contrary to the terms of the relevant Convention. As a minimum, payment of outstanding tax should not be a requirement to initiate the mutual agreement procedure if it is not a requirement before initiating domestic law review. It also appears, as a minimum, that if the mutual agreement procedure is initiated prior to the taxpayer's being charged to tax (such as by an assessment), a payment should only be required once that charge to tax has occurred.

(Replaced on 17 July 2008; see HISTORY)

48. There are several reasons why suspension of the collection of tax pending resolution of a mutual agreement procedure can be a desirable policy, although many States may require legislative changes for the purpose of its implementation. Any requirement to pay a tax assessment specifically as a condition of obtaining access to the mutual agreement procedure in order to get relief from that very tax would generally be inconsistent with the policy of making the mutual agreement procedure broadly available to resolve such disputes. Even if a mutual agreement procedure ultimately eliminates any

double taxation or other taxation not in accordance with the Convention, the requirement to pay tax prior to the conclusion of the mutual agreement procedure may permanently cost the taxpayer the time value of the money represented by the amount inappropriately imposed for the period prior to the mutual agreement procedure resolution, at least in the fairly common case where the respective interest policies of the relevant Contracting States do not fully compensate the taxpayer for that cost. Thus, this means that in such cases the mutual agreement procedure would not achieve the goal of fully eliminating, as an economic matter, the burden of the double taxation or other taxation not in accordance with the Convention. Moreover, even if that economic burden is ultimately removed, a requirement on the taxpayer to pay taxes on the same income to two Contracting States can impose cash flow burdens that are inconsistent with the Convention's goals of eliminating barriers to cross border trade and investment. Finally, another unfortunate complication may be delays in the resolution of cases if a country is less willing to enter into good faith mutual agreement procedure discussions when a probable result could be the refunding of taxes already collected. Where States take the view that payment of outstanding tax is a precondition to the taxpayer initiated mutual agreement procedure, this should be notified to the treaty partner during negotiations on the terms of a Convention. Where both States party to a Convention take this view, there is a common understanding, but also the particular risk of the taxpayer's being required to pay an amount twice. Where domestic law allows it, one possibility which States might consider to deal with this would be for the higher of the two amounts to be held in trust, escrow or similar, pending the outcome of the mutual agreement procedure. Alternatively, a bank guarantee provided by the taxpayer's bank could be sufficient to meet the requirements of the competent authorities. As another approach, one State or the other (decided by time of assessment, for example, or by residence State status under the treaty) could agree to seek a payment of no more than the difference between the amount paid to the other State, and that which it claims, if any. Which of these possibilities is open will ultimately depend on the domestic law (including administrative requirements) of a particular State, but they are the sorts of options that should as far as possible be considered in seeking to have the mutual agreement procedure operate as effectively as possible. Where States require some payment of outstanding tax as a precondition to the taxpayer initiated mutual agreement procedure, or to the active consideration of an issue within that procedure, they should have a system in place for refunding an amount of interest on any underlying amount to be returned to the taxpayer as the result of a mutual agreement reached by the competent authorities. Any such interest payment should sufficiently reflect the value of

the underlying amount and the period of time during which that amount has been unavailable to the taxpayer.

(Replaced on 17 July 2008; see HISTORY)

49. States take differing views as to whether administrative interest and penalty charges are treated as taxes covered by Article 2 of the Convention. Some States treat them as taking the character of the underlying amount in dispute, but other States do not. It follows that there will be different views as to whether such interest and penalties are subject to a taxpayer initiated mutual agreement procedure. Where they are covered by the Convention as taxes to which it applies, the object of the Convention in avoiding double taxation, and the requirement for States to implement conventions in good faith, suggest that as far as possible interest and penalty payments should not be imposed in a way that effectively discourages taxpayers from initiating a mutual agreement procedure, because of the cost and the cash flow impact that this would involve. Even when administrative interest and penalties are not regarded as taxes covered by the Convention under Article 2, they should not be applied in a way that severely discourages or nullifies taxpayer reliance upon the benefits of the Convention, including the right to initiate the mutual agreement procedure as provided by Article 25. For example, a State's requirements as to payment of outstanding penalties and interest should not be more onerous to taxpayers in the context of the mutual agreement procedure than they would be in the context of taxpayer initiated domestic law review.

(Replaced on 17 July 2008; see HISTORY)

Paragraph 3

50. The first sentence of this paragraph invites and authorises the competent authorities to resolve, if possible, difficulties of interpretation or application by means of mutual agreement. These are essentially difficulties of a general nature which concern, or which may concern, a category of taxpayers, even if they have arisen in connection with an individual case normally coming under the procedure defined in paragraph 1 and 2.

(Renumbered on 17 July 2008; see HISTORY)

51. This provision makes it possible to resolve difficulties arising from the application of the Convention. Such difficulties are not only those of a practical nature, which might arise in connection with the setting up and operation of procedures for the relief from tax deducted from dividends, interest and royalties in the Contracting State in which they arise, but also those which could impair or impede the normal operation of the clauses of the Convention as they were conceived by the negotiators, the solution of which

does not depend on a prior agreement as to the interpretation of the Convention.

(Renumbered on 17 July 2008; see HISTORY)

52. Under this provision the competent authorities can, in particular:

— where a term has been incompletely or ambiguously defined in the Convention, complete or clarify its definition in order to obviate any difficulty;

— where the laws of a State have been changed without impairing the balance or affecting the substance of the Convention, settle any difficulties that may emerge from the new system of taxation arising out of such changes;

— determine whether, and if so under what conditions, interest may be treated as dividends under thin capitalisation rules in the country of the borrower and give rise to relief for double taxation in the country of residence of the lender in the same way as for dividends (for example relief under a parent/subsidiary regime when provision for such relief is made in the relevant bilateral convention).

(Renumbered on 17 July 2008; see HISTORY)

53. paragraph 3 confers on the "competent authorities of the Contracting States", i.e. generally the Ministers of Finance or their authorised representatives normally responsible for the administration of the Convention, authority to resolve by mutual agreement any difficulties arising as to the interpretation of the Convention. However, it is important not to lose sight of the fact that, depending on the domestic law of Contracting States, other authorities (Ministry of Foreign Affairs, courts) have the right to interpret international treaties and agreements as well as the "competent authority" designated in the Convention, and that this is sometimes the exclusive right of such other authorities.

(Renumbered on 17 July 2008; see HISTORY)

54. Mutual agreements resolving general difficulties of interpretation or application are binding on administrations as long as the competent authorities do not agree to modify or rescind the mutual agreement.

(Renumbered on 17 July 2008; see HISTORY)

C (25)

55. The second sentence of paragraph 3 enables the competent authorities to deal also with such cases of double taxation as do not come within the scope of the provisions of the Convention. Of special interest in this connection is the case of a resident of a third State having permanent establishments in both Contracting States. It is not merely desirable, but in most cases also will particularly reflect the role of Article 25 and the mutual

agreement procedure in providing that the competent authorities may consult together as a way of ensuring the Convention as a whole operates effectively, that the mutual agreement procedure should result in the effective elimination of the double taxation which can occur in such a situation. The opportunity for such matters to be dealt with under the mutual agreement procedure becomes increasingly important as Contracting States seek more coherent frameworks for issues of profit allocation involving branches, and this is an issue that could usefully be discussed at the time of negotiating conventions or protocols to them. There will be Contracting States whose domestic law prevents the Convention from being complemented on points which are not explicitly or at least implicitly dealt with in the Convention, however, and in these situations the Convention could be complemented by a protocol dealing with this issue. In most cases, however, the terms of the Convention itself, as interpreted in accordance with accepted tax treaty interpretation principles, will sufficiently support issues involving two branches of a third state entity being subject to the paragraph 3 procedures.

(Renumbered and amended on 17 July 2008; see HISTORY)

Paragraph 4

56. This paragraph determines how the competent authorities may consult together for the resolution by mutual agreement, either of an individual case coming under the procedure defined in paragraph 1 and 2 or of general problems relating in particular to the interpretation or application of the Convention, and which are referred to in paragraph 3.

(Renumbered on 17 July 2008; see HISTORY)

57. It provides first that the competent authorities may communicate with each other directly. It would therefore not be necessary to go through diplomatic channels.

(Renumbered on 17 July 2008; see HISTORY)

58. The competent authorities may communicate with each other by letter, facsimile transmission, telephone, direct meetings, or any other convenient means. They may, if they wish, formally establish a joint commission for this purpose.

(Amended on 21 September 1995; see HISTORY)

59. As to this joint commission, paragraph 4 leaves it to the competent authorities of the Contracting States to determine the number of members and the rules of procedure of this body.

(Renumbered on 17 July 2008; see HISTORY)

60. However, whilst the Contracting States may avoid any formalism in this field, it is nevertheless their duty to give taxpayers whose cases are brought before the joint commission under paragraph 2 certain essential guarantees, namely:

— the right to make representations in writing or orally, either in person or through a representative;

— the right to be assisted by counsel.

(Renumbered and amended on 17 July 2008; see HISTORY)

61. However, disclosure to the taxpayer or his representatives of the papers in the case does not seem to be warranted, in view of the special nature of the procedure.

(Renumbered on 17 July 2008; see HISTORY)

62. Without infringing upon the freedom of choice enjoyed in principle by the competent authorities in designating their representatives on the joint commission, it would be desirable for them to agree to entrust the chairmanship of each Delegation — which might include one or more representatives of the service responsible for the procedure — to a high official or judge chosen primarily on account of his special experience; it is reasonable to believe, in fact, that the participation of such persons would be likely to facilitate reaching an agreement.

(Renumbered on 17 July 2008; see HISTORY)

Paragraph 5

63. This paragraph provides that, in the cases where the competent authorities are unable to reach an agreement under paragraph 2 within two years, the unresolved issues will, at the request of the person who presented the case, be solved through an arbitration process. This process is not dependent on a prior authorization by the competent authorities: once the requisite procedural requirements have been met, the unresolved issues that prevent the conclusion of a mutual agreement must be submitted to arbitration.

(Added on 17 July 2008; see HISTORY)

64. The arbitration process provided for by the paragraph is not an alternative or additional recourse: where the competent authorities have reached an agreement that does not leave any unresolved issues as regards the application of the Convention, there are no unresolved issues that can be brought to arbitration even if the person who made the mutual agreement request does not consider that the agreement reached by the competent authorities provides a correct solution to the case. The paragraph is, therefore,

an extension of the mutual agreement procedure that serves to enhance the effectiveness of that procedure by ensuring that where the competent authorities cannot reach an agreement on one or more issues that prevent the resolution of a case, a resolution of the case will still be possible by submitting those issues to arbitration. Thus, under the paragraph, the resolution of the case continues to be reached through the mutual agreement procedure, whilst the resolution of a particular issue which is preventing agreement in the case is handled through an arbitration process. This distinguishes the process established in paragraph 5 from other forms of commercial or government-private party arbitration where the jurisdiction of the arbitral panel extends to resolving the whole case.

(Added on 17 July 2008; see HISTORY)

65. It is recognised, however, that in some States, national law, policy or administrative considerations may not allow or justify the type of arbitration process provided for in the paragraph. For example, there may be constitutional barriers preventing arbitrators from deciding tax issues. In addition, some countries may only be in a position to include this paragraph in treaties with particular States. For these reasons, the paragraph should only be included in the Convention where each State concludes that the process is capable of effective implementation.

(Added on 17 July 2008; see HISTORY)

66. In addition, some States may wish to include paragraph 5 but limit its application to a more restricted range of cases. For example, access to arbitration could be restricted to cases involving issues which are primarily factual in nature. It could also be possible to provide that arbitration would always be available for issues arising in certain classes of cases, for example, highly factual cases such as those related to transfer pricing or the question of the existence of a permanent establishment, whilst extending arbitration to other issues on a case-by-case basis.

(Added on 17 July 2008; see HISTORY)

67. States which are members of the European Union must co-ordinate the scope of paragraph 5 with their obligations under the European Arbitration Convention.

(Added on 17 July 2008; see HISTORY)

68. The taxpayer should be able to request arbitration of unresolved issues in all cases dealt with under the mutual agreement procedure that have been presented under paragraph 1 on the basis that the actions of one or both of the Contracting States have resulted for a person in taxation not in accordance with the provisions of this Convention. Where the mutual agreement

procedure is not available, for example because of the existence of serious violations involving significant penalties (see paragraph 26), it is clear that paragraph 5 is not applicable.

(Added on 17 July 2008; see HISTORY)

69. Where two Contracting States that have not included the paragraph in their Convention wish to implement an arbitration process for general application or to deal with a specific case, it is still possible for them to do so by mutual agreement. In that case, the competent authorities can conclude a mutual agreement along the lines of the sample wording presented in the annex, to which they would add the following first paragraph:

> 1. Where,
>
> *a)* under paragraph 1 of Article 25 of the Convention, a person has presented a case to the competent authority of a Contracting State on the basis that the actions of one or both of the Contracting States have resulted for that person in taxation not in accordance with the provisions of this Convention, and
>
> *b)* the competent authorities are unable to reach an agreement to resolve that case pursuant to paragraph 2 of the Article within two years from the presentation of the case to the competent authority of the other Contracting State,
>
> any unresolved issues arising from the case shall be submitted to arbitration in accordance with the following paragraphs if the person so requests. These unresolved issues shall not, however, be submitted to arbitration if a decision on these issues has already been rendered by a court or administrative tribunal of either State. Unless a person directly affected by the case does not accept the mutual agreement that implements the arbitration decision, the competent authorities hereby agree to consider themselves bound by the arbitration decision and to resolve the case pursuant to paragraph 2 of Article 25 on the basis of that decision.

This agreement would go on to address the various structural and procedural issues discussed in the annex. Whilst the competent authorities would thus be bound by such process, such agreement would be given as part of the mutual agreement procedure and would therefore only be effective as long as the competent authorities continue to agree to follow that process to solve cases that they have been unable to resolve through the traditional mutual agreement procedure.

(Added on 17 July 2008; see HISTORY)

70. paragraph 5 provides that a person who has presented a case to the competent authority of a Contracting State pursuant to paragraph 1 on the

basis that the actions of one or both of the Contracting States have resulted for that person in taxation not in accordance with the provisions of this Convention may request that any unresolved issues arising from the case be submitted to arbitration. This request may be made at any time after a period of two years that begins when the case is presented to the competent authority of the other Contracting State. Recourse to arbitration is therefore not automatic; the person who presented the case may prefer to wait beyond the end of the two year period (for example, to allow the competent authorities more time to resolve the case under paragraph 2) or simply not to pursue the case. States are free to provide that, in certain circumstances, a longer period of time will be required before the request can be made.

(Added on 17 July 2008; see HISTORY)

71. Under paragraph 2 of Article 25, the competent authorities must endeavour to resolve a case presented under paragraph 1 with a view to the avoidance of taxation not in accordance with the Convention. For the purposes of paragraph 5, a case should therefore not be considered to have been resolved as long as there is at least one issue on which the competent authorities disagree and which, according to one of the competent authorities, indicates that there has been taxation not in accordance with the Convention. One of the competent authorities could not, therefore, unilaterally decide that such a case is closed and that the person involved cannot request the arbitration of unresolved issues; similarly, the two competent authorities could not consider that the case has been resolved and deny the request for arbitration if there are still unresolved issues that prevent them from agreeing that there has not been taxation not in accordance with the Convention. Where, however, the two competent authorities agree that taxation by both States has been in accordance with the Convention, there are no unresolved issues and the case may be considered to have been resolved, even in the case where there might be double taxation that is not addressed by the provisions of the Convention.

(Added on 17 July 2008; see HISTORY)

72. The arbitration process is only available in cases where the person considers that taxation not in accordance with the provisions of the Convention has actually resulted from the actions of one or both of the Contracting States; it is not available, however, in cases where it is argued that such taxation will eventually result from such actions even if the latter cases may be presented to the competent authorities under paragraph 1 of the Article (see paragraph 70 above). For that purpose, taxation should be considered to have resulted from the actions of one or both of the Contracting States as soon as, for example, tax has been paid, assessed or otherwise

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

determined or even in cases where the taxpayer is officially notified by the tax authorities that they intend to tax him on a certain element of income.

(Added on 17 July 2008; see HISTORY)

73. As drafted, paragraph 5 only provides for arbitration of unresolved issues arising from a request made under paragraph 1 of the Article. States wishing to extend the scope of the paragraph to also cover mutual agreement cases arising under paragraph 3 of the Article are free to do so. In some cases, a mutual agreement case may arise from other specific treaty provisions, such as subparagraph 2 *d*) of Article 4. Under that subparagraph, the competent authorities are, in certain cases, required to settle by mutual agreement the question of the status of an individual who is a resident of both Contracting States. As indicated in paragraph 20 of the Commentary on Article 4, such cases must be resolved according to the procedure established in Article 25. If the competent authorities fail to reach an agreement on such a case and this results in taxation not in accordance with the Convention (according to which the individual should be a resident of only one State for purposes of the Convention), the taxpayer's case comes under paragraph 1 of Article 25 and, therefore, paragraph 5 is applicable.

(Added on 17 July 2008; see HISTORY)

74. In some States, it may be possible for the competent authorities to deviate from a court decision on a particular issue arising from the case presented to the competent authorities. Those States should therefore be able to omit the second sentence of the paragraph.

(Added on 17 July 2008; see HISTORY)

75. The presentation of the case to the competent authority of the other State, which is the beginning of the two year period referred to in the paragraph, may be made by the person who presented the case to the competent authority of the first State under paragraph 1 of Article 25 (*e.g.* by presenting the case to the competent authority of the other State at the same time or at a later time) or by the competent authority of the first State, who would contact the competent authority of the other State pursuant to paragraph 2 if it is not itself able to arrive at a satisfactory solution of the case. For the purpose of determining the start of the two year period, a case will only be considered to have been presented to the competent authority of the other State if sufficient information has been presented to that competent authority to allow it to decide whether the objection underlying the case appears to be justified. The mutual agreement providing for the mode of application of paragraph 5 (see the annex) should specify which type of information will normally be sufficient for that purpose.

(Added on 17 July 2008; see HISTORY)

76. The paragraph also deals with the relationship between the arbitration process and rights to domestic remedies. For the arbitration process to be effective and to avoid the risk of conflicting decisions, a person should not be allowed to pursue the arbitration process if the issues submitted to arbitration have already been resolved through the domestic litigation process of either State (which means that any court or administrative tribunal of one of the Contracting States has already rendered a decision that deals with these issues and that applies to that person). This is consistent with the approach adopted by most countries as regards the mutual agreement procedure and according to which:

a) A person cannot pursue simultaneously the mutual agreement procedure and domestic legal remedies. Where domestic legal remedies are still available, the competent authorities will generally either require that the taxpayer agree to the suspension of these remedies or, if the taxpayer does not agree, will delay the mutual agreement procedure until these remedies are exhausted.

b) Where the mutual agreement procedure is first pursued and a mutual agreement has been reached, the taxpayer and other persons directly affected by the case are offered the possibility to reject the agreement and pursue the domestic remedies that had been suspended; conversely, if these persons prefer to have the agreement apply, they will have to renounce the exercise of domestic legal remedies as regards the issues covered by the agreement.

c) Where the domestic legal remedies are first pursued and are exhausted in a State, a person may only pursue the mutual agreement procedure in order to obtain relief of double taxation in the other State. Indeed, once a legal decision has been rendered in a particular case, most countries consider that it is impossible to override that decision through the mutual agreement procedure and would therefore restrict the subsequent application of the mutual agreement procedure to trying to obtain relief in the other State.

The same general principles should be applicable in the case of a mutual agreement procedure that would involve one or more issues submitted to arbitration. It would not be helpful to submit an issue to arbitration if it is known in advance that one of the countries is limited in the response that it could make to the arbitral decision. This, however, would not be the case if the country could, in a mutual agreement procedure, deviate from a court decision (see paragraph 74) and in that case paragraph 5 could be adjusted accordingly.

(Added on 17 July 2008; see HISTORY)

77. A second issue involves the relationship between existing domestic legal remedies and arbitration where the taxpayer has not undertaken (or has not

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

exhausted) these legal remedies. In that case, the approach that would be the most consistent with the basic structure of the mutual agreement procedure would be to apply the same general principles when arbitration is involved. Thus, the legal remedies would be suspended pending the outcome of the mutual agreement procedure involving the arbitration of the issues that the competent authorities are unable to resolve and a tentative mutual agreement would be reached on the basis of that decision. As in other mutual agreement procedure cases, that agreement would then be presented to the taxpayer who would have to choose to accept the agreement, which would require abandoning any remaining domestic legal remedies, or reject the agreement to pursue these remedies.

(Added on 17 July 2008; see HISTORY)

78. This approach is in line with the nature of the arbitration process set out in paragraph 5. The purpose of that process is to allow the competent authorities to reach a conclusion on the unresolved issues that prevent an agreement from being reached. When that agreement is achieved though the aid of arbitration, the essential character of the mutual agreement remains the same.

(Added on 17 July 2008; see HISTORY)

79. In some cases, this approach will mean that the parties will have to expend time and resources in an arbitration process that will lead to a mutual agreement that will not be accepted by the taxpayer. As a practical matter, however, experience shows that there are very few cases where the taxpayer rejects a mutual agreement to resort to domestic legal remedies. Also, in these rare cases, one would expect the domestic courts or administrative tribunals to take note of the fact that the taxpayer had been offered an administrative solution to his case that would have bound both States.

(Added on 17 July 2008; see HISTORY)

80. In some States, unresolved issues between competent authorities may only be submitted to arbitration if domestic legal remedies are no longer available. In order to implement an arbitration approach, these States could consider the alternative approach of requiring a person to waive the right to pursue domestic legal remedies before arbitration can take place. This could be done by replacing the second sentence of the paragraph by "these unresolved issues shall not, however, be submitted to arbitration if any person directly affected by the case is still entitled, under the domestic law of either State, to have courts or administrative tribunals of that State decide these issues or if a decision on these issues has already been rendered by such a court or administrative tribunal." To avoid a situation where a taxpayer would be required to waive domestic legal remedies without any assurance as to the

outcome of the case, it would then be important to also modify the paragraph to include a mechanism that would guarantee, for example, that double taxation would in fact be relieved. Also, since the taxpayer would then renounce the right to be heard by domestic courts, the paragraph should also be modified to ensure that sufficient legal safeguards are granted to the taxpayer as regards his participation in the arbitration process to meet the requirements that may exist under domestic law for such a renunciation to be acceptable under the applicable legal system (*e.g.* in some countries, such renunciation might not be effective if the person were not guaranteed the right to be heard orally during the arbitration).

(Added on 17 July 2008; see HISTORY)

81. paragraph 5 provides that, unless a person directly affected by the case does not accept the mutual agreement that implements the arbitration decision, that decision shall be binding on both States. Thus, the taxation of any person directly affected by the case will have to conform with the decision reached on the issues submitted to arbitration and the decisions reached in the arbitral process will be reflected in the mutual agreement that will be presented to these persons.

(Added on 17 July 2008; see HISTORY)

82. As noted in subparagraph 76 *b*) above, where a mutual agreement is reached before domestic legal remedies have been exhausted, it is normal for the competent authorities to require, as a condition for the application of the agreement, that the persons affected renounce the exercise of domestic legal remedies that may still exist as regards the issues covered by the agreement. Without such renunciation, a subsequent court decision could indeed prevent the competent authorities from applying the agreement. Thus, for the purpose of paragraph 5, if a person to whom the mutual agreement that implements the arbitration decision has been presented does not agree to renounce the exercise of domestic legal remedies, that person must be considered not to have accepted that agreement.

(Added on 17 July 2008; see HISTORY)

83. The arbitration decision is only binding with respect to the specific issues submitted to arbitration. Whilst nothing would prevent the competent authorities from solving other similar cases (including cases involving the same persons but different taxable periods) on the basis of the decision, there is no obligation to do so and each State therefore has the right to adopt a different approach to deal with these other cases.

(Added on 17 July 2008; see HISTORY)

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

84. Some States may wish to allow the competent authorities to depart from the arbitration decision, provided that they can agree on a different solution (this, for example, is allowed under Article 12 of the EU Arbitration Convention). States wishing to do so are free to amend the third sentence of the paragraph as follows:

… Unless a person directly affected by the case does not accept the mutual agreement that implements the arbitration decision or the competent authorities and the persons directly affected by the case agree on a different solution within six months after the decision has been communicated to them, the arbitration decision shall be binding on both States and shall be implemented notwithstanding any time limits in the domestic laws of these States.

(Added on 17 July 2008; see HISTORY)

85. The last sentence of the paragraph leaves the mode of application of the arbitration process to be settled by mutual agreement. Some aspects could also be covered in the Article itself, a protocol or through an exchange of diplomatic notes. Whatever form the agreement takes, it should set out the structural and procedural rules to be followed in applying the paragraph, taking into account the paragraph's requirement that the arbitration decision be binding on both States. Ideally, that agreement should be drafted at the same time as the Convention so as to be signed, and to apply, immediately after the paragraph becomes effective. Also, since the agreement will provide the details of the process to be followed to bring unresolved issues to arbitration, it would be important that this agreement be made public. A sample form of such agreement is provided in the annex together with comments on the procedural rules that it puts forward.

(Added on 17 July 2008; see HISTORY)

Use of other supplementary dispute resolution mechanisms

86. Regardless of whether or not paragraph 5 is included in a Convention or an arbitration process is otherwise implemented using the procedure described in paragraph 69 above, it is clear that supplementary dispute resolution mechanisms other than arbitration can be implemented on an ad hoc basis as part of the mutual agreement procedure. Where there is disagreement about the relative merits of the positions of the two competent authorities, the case may be helped if the issues are clarified by a mediator. In such situations the mediator listens to the positions of each party and then communicates a view of the strengths and weaknesses of each side. This helps each party to better understand its own position and that of the other party. Some tax administrations are now successfully using mediation to

resolve internal disputes and the extension of such techniques to mutual agreement procedures could be useful.

(Added on 17 July 2008; see HISTORY)

87. If the issue is a purely factual one, the case could be referred to an expert whose mandate would simply be to make the required factual determinations. This is often done in judicial procedures where factual matters are referred to an independent party who makes factual findings which are then submitted to the court. Unlike the dispute resolution mechanism which is established in paragraph 5, these procedures are not binding on the parties but nonetheless can be helpful in allowing them to reach a decision before an issue would have to be submitted to arbitration under that paragraph.

(Added on 17 July 2008; see HISTORY)

III. Interaction of the mutual agreement procedure with the dispute resolution mechanism provided by the General Agreement on Trade in Services

88. The application of the General Agreement on Trade in Services (GATS), which entered into force on 1 January 1995 and which all member countries have signed, raises particular concerns in relation to the mutual agreement procedure.

(Renumbered on 17 July 2008; see HISTORY)

89. Paragraph 3 of Article XXII of the GATS provides that a dispute as to the application of Article XVII of the Agreement, a national treatment rule, may not be dealt with under the dispute resolution mechanisms provided by Articles XXII and XXIII of the Agreement if the disputed measure "falls within the scope of an international agreement between them relating to the avoidance of double taxation" (*e.g.* a tax convention). If there is disagreement over whether a measure "falls within the scope" of such an international agreement, paragraph 3 goes on to provide that either State involved in the dispute may bring the matter to the Council on Trade in Services, which shall refer the dispute for binding arbitration. A footnote to paragraph 3, however, contains the important exception that if the dispute relates to an international agreement "which exist[s] at the time of the entry into force" of the Agreement, the matter may not be brought to the Council on Trade in Services unless both States agree.

(Renumbered on 17 July 2008; see HISTORY)

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

90. That paragraph raises two particular problems with respect to tax treaties.

(Renumbered on 17 July 2008; see HISTORY)

91. First, the footnote thereto provides for the different treatment of tax conventions concluded before and after the entry into force of the GATS, something that may be considered inappropriate, in particular where a convention in existence at the time of the entry into force of the GATS is subsequently renegotiated or where a protocol is concluded after that time in relation to a convention existing at that time.

(Renumbered on 17 July 2008; see HISTORY)

92. Second, the phrase "falls within the scope" is inherently ambiguous, as indicated by the inclusion in paragraph 3 of Article XXII of the GATS of both an arbitration procedure and a clause exempting pre-existing conventions from its application in order to deal with disagreements related to its meaning. Whilst it seems clear that a country could not argue in good faith[1] that a measure relating to a tax to which no provision of a tax convention applied fell within the scope of that convention, it is unclear whether the phrase covers all measures that relate to taxes that are covered by all or only some provisions of the tax convention.

(Renumbered and amended on 17 July 2008; see HISTORY)

93. Contracting States may wish to avoid these difficulties by extending bilaterally the application of the footnote to paragraph 3 of Article XXII of the GATS to conventions concluded after the entry into force of the GATS. Such a bilateral extension, which would supplement — but not violate in any way — the Contracting States' obligations under the GATS, could be incorporated in the convention by the addition of the following provision:

> For purposes of paragraph 3 of Article XXII (Consultation) of the General Agreement on Trade in Services, the Contracting States agree that, notwithstanding that paragraph, any dispute between them as to whether a measure falls within the scope of this Convention may be brought before the Council for Trade in Services, as provided by that paragraph, only with the consent of both Contracting States. Any doubt as to the interpretation of this paragraph shall be resolved under paragraph 3 of Article 25 or, failing

1 The obligation of applying and interpreting treaties in good faith is expressly recognised in Articles 26 and 31 of the *Vienna Convention on the Law of Treaties*; thus, the exception in paragraph 3 of Article XXII of the GATS applies only to good faith disputes.

agreement under that procedure, pursuant to any other procedure agreed to by both Contracting States.

(Renumbered on 17 July 2008; see HISTORY)

94. Problems similar to those discussed above may arise in relation with other bilateral or multilateral agreements related to trade or investment. Contracting States are free, in the course of their bilateral negotiations, to amend the provision suggested above so as to ensure that issues relating to the taxes covered by their tax convention are dealt with through the mutual agreement procedure rather than through the dispute settlement mechanism of such agreements.

(Renumbered on 17 July 2008; see HISTORY)

Observation on the Commentary

95. *Hungary* does not fully share the interpretation in paragraph 27 of the Commentary on Article 25 and is not in a position to pursue a mutual agreement procedure where a Hungarian court has already rendered a decision on the merits of the case.

(Added on 17 July 2008; see HISTORY)

Reservations on the Article

96. With respect to paragraph 1 of the Article, *Turkey* reserves the right to provide that the case must be presented to its competent authority within a period of five years following the related taxation year. However, if the notification is made in the last year of that period, such application should be made within one year from the notification.

(Renumbered on 17 July 2008; see HISTORY)

97. The *United Kingdom* reserves its position on the last sentence of paragraph 1 on the grounds that it conflicts with the six year time limit under its domestic legislation.

(Renumbered on 17 July 2008; see HISTORY)

98. *Chile*, *Greece*, *Italy*, *Mexico*, *Poland*, *Portugal*, the *Slovak Republic* and *Switzerland* reserve their positions on the second sentence of paragraph 2. These countries consider that the implementation of reliefs and refunds following a mutual agreement ought to remain linked to time limits prescribed by their domestic laws.

(Amended on 22 July 2010; see HISTORY)

99. *Turkey* reserves its position on the second sentence of paragraph 2. Turkey's tax law provides that refunds of tax, like the assessment itself, must

be made within a specific period. According to these provisions, if the administration finds an application for repayment acceptable, it must notify the fact to the taxpayer so that he can present his claim within a period of one year of such notification. If the taxpayer exceeds this time limit, his right to claim repayment lapses. The same procedure applies to the enforcement of judgements of courts under which repayments are required to be made. That is why Turkey is obliged to fix a time limit for the implementation of agreed mutual agreement procedures as is done for all repayments. For this reason Turkey wishes to reserve the right to mention in the text of bilateral conventions a definite time limit as regards their implementation.

(Renumbered on 17 July 2008; see HISTORY)

100. *Canada* reserves the right to include a provision, as referred to in paragraph 10 of the Commentary on Article 9, which effectively sets a time limit within which a Contracting State is under an obligation to make an appropriate adjustment following an upward adjustment of the profits of an enterprise in the other Contracting State.

(Added on 17 July 2008; see HISTORY)

101. *Hungary* reserves its position on the last sentence of paragraph 1 as it could not agree to pursue a mutual agreement procedure in the case of a request that would be presented to its competent authority outside the prescription period provided for under its domestic legislation.

(Added on 17 July 2008; see HISTORY)

ANNEX

SAMPLE MUTUAL AGREEMENT ON ARBITRATION

1. The following is a sample form of agreement that the competent authorities may use as a basis for a mutual agreement to implement the arbitration process provided for in paragraph 5 of the Article (see paragraph 85 above). paragraph 2 to 43 below discuss the various provisions of the agreement and, in some cases, put forward alternatives. Competent authorities are of course free to modify, add or delete any provisions of this sample agreement when concluding their bilateral agreement.

Mutual agreement on the implementation of paragraph 5 of Article 25

The competent authorities of [State A] and [State B] have entered into the following mutual agreement to establish the mode of application of the arbitration process provided for in paragraph 5 of Article 25 of the [title of the Convention], which entered into force on [date of entry into force]. The competent authorities may modify or supplement this agreement by an exchange of letters between them.

1. *Request for submission of case to arbitration*

   A request that unresolved issues arising from a mutual agreement case be submitted to arbitration pursuant to paragraph 5 of Article 25 of the Convention (the "request for arbitration") shall be made in writing and sent to one of the competent authorities. The request shall contain sufficient information to identify the case. The request shall also be accompanied by a written statement by each of the persons who either made the request or is directly affected by the case that no decision on the same issues has already been rendered by a court or administrative tribunal of the States. Within 10 days of the receipt of the request, the competent authority who received it shall send a copy of the request and the accompanying statements to the other competent authority.

2. *Time for submission of the case to arbitration*

   A request for arbitration may only be made after two years from the date on which a case presented to the competent authority of one Contracting State under paragraph 1 of Article 25 has also been presented to the competent authority of the other State. For this purpose, a case shall be considered to have been presented to the competent authority of the other State only if the following information has been presented: [the necessary information and documents will be specified in the agreement].

3. *Terms of Reference*

Within three months after the request for arbitration has been received by both competent authorities, the competent authorities shall agree on the questions to be resolved by the arbitration panel and communicate them in writing to the person who made the request for arbitration. This will constitute the "Terms of Reference" for the case. Notwithstanding the following paragraphs of this agreement, the competent authorities may also, in the Terms of Reference, provide procedural rules that are additional to, or different from, those included in these paragraphs and deal with such other matters as are deemed appropriate.

4. *Failure to communicate the Terms of Reference* If the Terms of Reference have not been communicated to the person who made the request for arbitration within the period referred to in paragraph 3 above, that person and each competent authority may, within one month after the end of that period, communicate in writing to each other a list of issues to be resolved by the arbitration. All the lists so communicated during that period shall constitute the tentative Terms of Reference. Within one month after all the arbitrators have been appointed as provided in paragraph 5 below, the arbitrators shall communicate to the competent authorities and the person who made the request for arbitration a revised version of the tentative Terms of Reference based on the lists so communicated. Within one month after the revised version has been received by both of them, the competent authorities will have the possibility to agree on different Terms of Reference and to communicate them in writing to the arbitrators and the person who made the request for arbitration. If they do so within that period, these different Terms of Reference shall constitute the Terms of Reference for the case. If no different Terms of Reference have been agreed to between the competent authorities and communicated in writing within that period, the revised version of the tentative Terms of Reference prepared by the arbitrators shall constitute the Terms of Reference for the case.

5. *Selection of arbitrators*

Within three months after the Terms of Reference have been received by the person who made the request for arbitration or, where paragraph 4 applies, within four months after the request for arbitration has been received by both competent authorities, the competent authorities shall each appoint one arbitrator. Within two months of the latter appointment, the arbitrators so appointed will appoint a third arbitrator who will function as Chair. If any appointment is not made within the required

time period, the arbitrator(s) not yet appointed shall be appointed by the Director of the OECD Centre for Tax Policy and Administration within 10 days of receiving a request to that effect from the person who made the request for arbitration. The same procedure shall apply with the necessary adaptations if for any reason it is necessary to replace an arbitrator after the arbitral process has begun. Unless the Terms of Reference provide otherwise, the remuneration of all arbitrators …. [the mode of remuneration should be described here; one possibility would be to refer to the method used in the Code of Conduct on the EC Arbitration Convention].

6. *Streamlined arbitration process*

If the competent authorities so indicate in the Terms of Reference (provided that these have not been agreed to after the selection of arbitrators pursuant to paragraph 4 above), the following rules shall apply to a particular case notwithstanding paragraphs 5, 11, 15, 16 and 17 of this agreement:

a) Within one month after the Terms of Reference have been received by the person who made the request for arbitration, the two competent authorities shall, by common consent, appoint one arbitrator. If, at the end of that period, the arbitrator has not yet been appointed, the arbitrator will be appointed by the Director of the OECD Centre for Tax Policy and Administration within 10 days of receiving a request to that effect from the person who made the request referred to in paragraph 1. The remuneration of the arbitrator shall be determined as follows … [the mode of remuneration should be described here; one possibility would be to refer to the method used in the Code of Conduct on the EC Arbitration Convention].

b) Within two months from the appointment of the arbitrator, each competent authority will present in writing to the arbitrator its own reply to the questions contained in the Terms of Reference.

c) Within one month from having received the last of the replies from the competent authorities, the arbitrator will decide each question included in the Terms of Reference in accordance with one of the two replies received from the competent authorities as regards that question and will notify the competent authorities of the choice, together with short reasons explaining that choice. Such decision will be implemented as provided in paragraph 19.

7. *Eligibility and appointment of arbitrators*

Any person, including a government official of a Contracting State, may be appointed as an arbitrator, unless that person has been involved in prior stages of the case that results in the arbitration process. An arbitrator will be considered to have been appointed when a letter confirming that appointment has been signed both by the person or persons who have the power to appoint that arbitrator and by the arbitrator himself.

8. *Communication of information and confidentiality*

For the sole purposes of the application of the provisions of Article 25 and 26, and of the domestic laws of the Contracting States, concerning the communication and the confidentiality of the information related to the case that results in the arbitration process, each arbitrator shall be designated as authorised representative of the competent authority that has appointed that arbitrator or, if that arbitrator has not been appointed exclusively by one competent authority, of the competent authority of the Contracting State to which the case giving rise to the arbitration was initially presented. For the purposes of this agreement, where a case giving rise to arbitration was initially presented simultaneously to both competent authorities, "the competent authority of the Contracting State to which the case giving rise to the arbitration was initially presented" means the competent authority referred to in paragraph 1 of Article 25.

9. *Failure to provide information in a timely manner*

Notwithstanding paragraphs 5 and 6, where both competent authorities agree that the failure to resolve an issue within the two year period provided in paragraph 5of Article 25 is mainly attributable to the failure of a person directly affected by the case to provide relevant information in a timely manner, the competent authorities may postpone the nomination of the arbitrator for a period of time corresponding to the delay in providing that information.

10. *Procedural and evidentiary rules*

Subject to this agreement and the Terms of Reference, the arbitrators shall adopt those procedural and evidentiary rules that they deem necessary to answer the questions set out in the Terms of Reference. They will have access to all information necessary to decide the issues submitted to arbitration, including confidential information. Unless the competent authorities agree otherwise, any information that was not available to both competent authorities before the request for arbitration was received

by both of them shall not be taken into account for purposes of the decision.

11. *Participation of the person who requested the arbitration*

The person who made the request for arbitration may, either directly or through his representatives, present his position to the arbitrators in writing to the same extent that he can do so during the mutual agreement procedure. In addition, with the permission of the arbitrators, the person may present his position orally during the arbitration proceedings.

12. *Logistical arrangements*

Unless agreed otherwise by the competent authorities, the competent authority to which the case giving rise to the arbitration was initially presented will be responsible for the logistical arrangements for the meetings of the arbitral panel and will provide the administrative personnel necessary for the conduct of the arbitration process. The administrative personnel so provided will report only to the Chair of the arbitration panel concerning any matter related to that process.

13. *Costs*

Unless agreed otherwise by the competent authorities:

a) each competent authority and the person who requested the arbitration will bear the costs related to his own participation in the arbitration proceedings (including travel costs and costs related to the preparation and presentation of his views);

b) each competent authority will bear the remuneration of the arbitrator appointed exclusively by that competent authority, or appointed by the Director of the OECD Centre for Tax Policy and Administration because of the failure of that competent authority to appoint that arbitrator, together with that arbitrator's travel, telecommunication and secretariat costs;

c) the remuneration of the other arbitrators and their travel, telecommunication and secretariat costs will be borne equally by the two Contracting States;

d) costs related to the meetings of the arbitral panel and to the administrative personnel necessary for the conduct of the arbitration process will be borne by the competent authority to which the case giving rise to the arbitration was initially presented, or if presented in both States, will be shared equally; and

e) all other costs (including costs of translation and of recording the proceedings) related to expenses that both competent authorities have agreed to incur, will be borne equally by the two Contracting States.

14. *Applicable Legal Principles*

The arbitrators shall decide the issues submitted to arbitration in accordance with the applicable provisions of the treaty and, subject to these provisions, of those of the domestic laws of the Contracting States. Issues of treaty interpretation will be decided by the arbitrators in the light of the principles of interpretation incorporated in Articles 31 to 33 of the *Vienna Convention on the Law of Treaties*, having regard to the Commentaries of the OECD Model Tax Convention as periodically amended, as explained in paragraphs 28 to 36.1 of the Introduction to the OECD Model Tax Convention. Issues related to the application of the arm's length principle should similarly be decided having regard to the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations. The arbitrators will also consider any other sources which the competent authorities may expressly identify in the Terms of Reference.

15. *Arbitration decision*

Where more than one arbitrator has been appointed, the arbitration decision will be determined by a simple majority of the arbitrators. Unless otherwise provided in the Terms of Reference, the decision of the arbitral panel will be presented in writing and shall indicate the sources of law relied upon and the reasoning which led to its result. With the permission of the person who made the request for arbitration and both competent authorities, the decision of the arbitral panel will be made public in redacted form without mentioning the names of the parties involved or any details that might disclose their identity and with the understanding that the decision has no formal precedential value.

16. *Time allowed for communicating the arbitration decision*

The arbitration decision must be communicated to the competent authorities and the person who made the request for arbitration within six months from the date on which the Chair notifies in writing the competent authorities and the person who made the request for arbitration that he has received all the information necessary to begin consideration of the case. Notwithstanding the first part of this paragraph, if at any time within two months from the date on which the last arbitrator was appointed, the Chair, with the consent of one of the competent authorities, notifies in writing the other competent authority

and the person who made the request for arbitration that he has not received all the information necessary to begin consideration of the case, then

a) if the Chair receives the necessary information within two months after the date on which that notice was sent, the arbitration decision must be communicated to the competent authorities and the person who made the request for arbitration within six months from the date on which the information was received by the Chair, and

b) if the Chair has not received the necessary information within two months after the date on which that notice was sent, the arbitration decision must, unless the competent authorities agree otherwise, be reached without taking into account that information even if the Chair receives it later and the decision must be communicated to the competent authorities and the person who made the request for arbitration within eight months from the date on which the notice was sent.

17. *Failure to communicate the decision within the required period*

In the event that the decision has not been communicated to the competent authorities within the period provided for in paragraphs 6 *c)* or 16, the competent authorities may agree to extend that period for a period not exceeding six months or, if they fail to do so within one month from the end of the period provided for in paragraphs 6 *c)* or 16, they shall appoint a new arbitrator or arbitrators in accordance with paragraph 5 or 6 *a)*, as the case may be.

18. *Final decision*

The arbitration decision shall be final, unless that decision is found to be unenforceable by the courts of one of the Contracting States because of a violation of paragraph 5 of Article 25 or of any procedural rule included in the Terms of Reference or in this agreement that may reasonably have affected the decision. If a decision is found to be unenforceable for one of these reasons, the request for arbitration shall be considered not to have been made and the arbitration process shall be considered not to have taken place (except for the purposes of paragraphs 8 “Communication of information and confidentiality” and 13 “Costs”).

19. *Implementing the arbitration decision*

The competent authorities will implement the arbitration decision within six months from the communication of the decision to them by reaching a mutual agreement on the case that led to the arbitration.

20. *Where no arbitration decision will be provided*

Notwithstanding paragraphs 6, 15, 16 and 17, where, at any time after a request for arbitration has been made and until the arbitrators have delivered a decision to the competent authorities and the person who made the request for arbitration, the competent authorities notify in writing the arbitrators and that person that they have solved all the unresolved issues described in the Terms of Reference, the case shall be considered as solved under the mutual agreement procedure and no arbitration decision shall be provided.

This agreement applies to any request for arbitration made pursuant to paragraph 5 of Article 25 of the Convention after that provision has become effective.

[Date of signature of the agreement]

[Signature of the competent authority of each Contracting State]

General approach of the sample agreement

2. A number of approaches can be taken to structuring the arbitral process which is used to supplement the mutual agreement procedure. Under one approach, which might be referred to as the "independent opinion" approach, the arbitrators would be presented with the facts and arguments by the parties based on the applicable law, and would then reach their own independent decision which would be based on a written, reasoned analysis of the facts involved and applicable legal sources.

3. Alternatively, under the so-called "last best offer" or "final offer" approach, each competent authority would be required to give to the arbitral panel a proposed resolution of the issue involved and the arbitral panel would choose between the two proposals which were presented to it. There are obviously a number of variations between these two positions. For example, the arbitrators could reach an independent decision but would not be required to submit a written decision but simply their conclusions. To some extent, the appropriate method depends on the type of issue to be decided.

4. The above sample agreement takes as its starting point the "independent opinion" approach which is thus the generally applicable process but, in recognition of the fact that many cases, especially those which involve primarily factual questions, may be best handled differently, it also provides for an alternative "streamlined" process, based on the "last best offer" or "final offer" approach. Competent authorities can therefore agree to use that streamlined process on a case-by-case basis. Competent authorities may of course adopt this combined approach, adopt the streamlined process

as the generally applicable process with the independent opinion as an option in some circumstances or limit themselves to only one of the two approaches.

The request for arbitration

5. Paragraph 1 of the sample agreement provides the manner in which a request for arbitration should be made. Such request should be presented in writing to one of the competent authorities involved in the case. That competent authority should then inform the other competent authority within 10 days of the receipt of the request.

6. In order to determine that the conditions of paragraph 5 of Article 25 have been met (see paragraph 76 of the Commentary on this Article) the request should be accompanied by statements indicating that no decision on these issues has already been rendered by domestic courts or administrative tribunals in either Contracting State.

7. Since the arbitration process is an extension of the mutual agreement procedure that is intended to deal with cases that cannot be solved under that procedure, it would seem inappropriate to ask the person who makes the request to pay in order to make such request or to reimburse the expenses incurred by the competent authorities in the course of the arbitration proceedings. Unlike taxpayers' requests for rulings or other types of advance agreements, where a charge is sometimes made, providing a solution to disputes between the Contracting States is the responsibility of these States for which they in general should bear the costs.

8. A request for arbitration may not be made before two years from the date when a mutual agreement case presented to the competent authority of a Contracting State has also been presented to the competent authority of the other Contracting State. Paragraph 2 of the sample agreement provides that for this purpose, a case shall only be considered to have been presented to the competent authority of that other State if the information specified in that paragraph has been so provided. The paragraph should therefore include a list of the information required; in general, that information will correspond to the information and documents that were required to initiate the mutual agreement procedure.

Terms of Reference

9. Paragraph 3 of the sample agreement refers to the "Terms of Reference", which is the document that sets forth the questions to be resolved by the arbitrators. It establishes the jurisdictional basis for the issues which are to be decided by the arbitral panel. It is to be established by the competent authorities who may wish in that connection to consult with the person who made the request for arbitration. If the competent authorities cannot agree on

the Terms of Reference within the period provided for in paragraph 3, some mechanism is necessary to ensure that the procedure goes forward. Paragraph 4 provides for that eventuality.

10. Whilst the Terms of Reference will generally be limited to a particular issue or set of issues, it would be possible for the competent authorities, given the nature of the case and the interrelated nature of the issues, to draft the Terms of Reference so that the whole case (and not only certain specific issues) be submitted to arbitration.

11. The procedural rules provided for in the sample agreement shall apply unless the competent authorities provide otherwise in the Terms of Reference. It is therefore possible for the competent authorities, through the Terms of Reference, to depart from any of these rules or to provide for additional rules in a particular case.

Streamlined process

12. The normal process provided for by the sample agreement allows the consideration of questions of either law or fact, as well as of mixed questions of law and fact. Generally, it is important that the arbitrators support their decision with the reasoning leading to it. Showing the method through which the decision was reached may be important in assuring acceptance of the decision.

13. In some cases, however, the unresolved issues will be primarily factual and the decision may be simply a statement of the final disposition, for example a determination of the amount of adjustments to the income and deductions of the respective related parties. Such circumstances will often arise in transfer pricing cases, where the unresolved issue may be simply the determination of an arm's length transfer price or range of prices (although there are other transfer pricing cases that involve complex factual issues); there are also cases in which an analogous principle may apply, for example, the determination of the existence of a permanent establishment. In some cases, the decision may be a statement of the factual premises on which the appropriate legal principles should then be applied by the competent authorities. Paragraph 5 of the sample agreement provides a streamlined process which the competent authorities may wish to apply in these types of cases. That process, which will then override other procedural rules of the sample agreement, takes the form of the so-called "last best offer" or "final offer" arbitration, under which each competent authority is required to give to an arbitrator appointed by common consent that competent authority's own reply to the questions included in the Terms of Reference and the arbitrator simply chooses one of the submitted replies. The competent authorities may,

as for most procedural rules, amend or supplement the streamlined process through the Terms of Reference applicable to a particular case.

Selection of arbitrators

14. Paragraph 5 of the sample agreement describes how arbitrators will be selected unless the Terms of Reference drafted for a particular case provide otherwise (for instance, by opting for the streamlined process described in the preceding paragraph or by providing for more than one arbitrator to be appointed by each competent authority). Normally, the two competent authorities will each appoint one arbitrator. These appointments must be made within three months after the Terms of Reference have been received by the person who made the request for arbitration (a different deadline is provided for cases where the competent authorities do not agree on the Terms of Reference within the required period). The arbitrators thus appointed will select a Chair who must be appointed within two months of the time at which the last of the initial appointments was made. If the competent authorities do not appoint an arbitrator during the required period, or if the arbitrators so appointed do not appoint the third arbitrator within the required period, the paragraph provides that the appointment will be made by the Director of the OECD Centre for Tax Policy and Administration. The competent authorities may, of course, provide for other ways to address these rare situations but it seems important to provide for an independent appointing authority to solve any deadlock in the selection of the arbitrators.

15. There is no need for the agreement to stipulate any particular qualifications for an arbitrator as it will be in the interests of the competent authorities to have qualified and suitable persons act as arbitrators and in the interests of the arbitrators to have a qualified Chair. However, it might be possible to develop a list of qualified persons to facilitate the appointment process and this function could be developed by the Committee on Fiscal Affairs. It is important that the Chair of the panel have experience with the types of procedural, evidentiary and logistical issues which are likely to arise in the course of the arbitral proceedings as well as having familiarity with tax issues. There may be advantages in having representatives of each Contracting State appointed as arbitrators as they would be familiar with this type of issue. Thus it should be possible to appoint to the panel governmental officials who have not been directly involved in the case. Once an arbitrator has been appointed, it should be clear that his role is to decide the case on a neutral and objective basis; he is no longer functioning as an advocate for the country that appointed him.

16. Paragraph 9 of the sample agreement provides that the appointment of the arbitrators may be postponed where both competent authorities agree

that the failure to reach a mutual agreement within the two year period is mainly attributable to the lack of cooperation by a person directly affected by the case. In that case, the approach taken by the sample agreement is to allow the competent authorities to postpone the appointment of the arbitrators by a period of time corresponding to the undue delay in providing them with the relevant information. If that information has not yet been provided when the request for arbitration is submitted, the period of time corresponding to the delay in providing the information continues to run until such information is finally provided. Where, however, the competent authorities are not provided with the information necessary to solve a particular case, there is nothing that prevents them from resolving the case on the basis of the limited information that is at their disposal, thereby preventing any access to arbitration. Also, it would be possible to provide in the agreement that if within an additional period (*e.g.* one year), the taxpayer still had not provided the necessary information for the competent authorities to properly evaluate the issue, the issue would no longer be required to be submitted to arbitration.

Communication of information and confidentiality

17. It is important that arbitrators be allowed full access to the information needed to resolve the issues submitted to arbitration but, at the same time, be subjected to the same strict confidentiality requirements as regards that information as apply to the competent authorities themselves. The proposed approach to ensure that result, which is incorporated in paragraph 8 of the sample agreement, is to make the arbitrators authorised representatives of the competent authorities. This, however, will only be for the purposes of the application of the relevant provisions of the Convention (*i.e.* Article 25 and 26) and of the provisions of the domestic laws of the Contracting States, which would normally include the sanctions applicable in case of a breach of confidentiality. The designation of the arbitrator as authorised representative of a competent authority would typically be confirmed in the letter of appointment but may need to be done differently if domestic law requires otherwise or if the arbitrator is not appointed by a competent authority.

Procedural and evidentiary rules

18. The simplest way to establish the evidentiary and other procedural rules that will govern the arbitration process and that have not already been provided in the agreement or the Terms of Reference is to leave it to the arbitrators to develop these rules on an ad hoc basis. In doing so, the arbitrators are free to refer to existing arbitration procedures, such as the International Chamber of Commerce Rules which deal with many of these questions. It should be made clear in the procedural rules that as general

matter, the factual material on which the arbitral panel will base its decision will be that developed in the mutual agreement procedure. Only in special situations would the panel be allowed to investigate factual issues which had not been developed in the earlier stages of the case.

19. Paragraph 10 of the sample agreement follows that approach. Thus, decisions as regards the dates and format of arbitration meetings will be made by the arbitrators unless the agreement or Terms of Reference provide otherwise. Also, whilst the arbitrators will have access to all information necessary to decide the issues submitted to arbitration, including confidential information, any information that was not available to both competent authorities shall not be taken into account by the arbitrators unless the competent authorities agree otherwise.

Taxpayer participation in the supplementary dispute resolution process

20. Paragraph 11 of the sample agreement provides that the person requesting arbitration, either directly or through his representatives, is entitled to present a written submission to the arbitrators and, if the arbitrators agree, to make an oral presentation during a meeting of the arbitrators.

Practical arrangements

21. A number of practical arrangements will need to be made in connection with the actual functioning of the arbitral process. They include the location of the meetings, the language of the proceedings and possible translation facilities, the keeping of a record, dealing with practical details such as filing etc.

22. As regards the location and the logistical arrangements for the arbitral meetings, the easiest solution is to leave the matter to be dealt with by the competent authority to which the case giving rise to the arbitration was initially presented. That competent authority should also provide the administrative personnel necessary for the conduct of the arbitration process. This is the approach put forward in paragraph 12 of the sample agreement. It is expected that, for these purposes, the competent authority will use meeting facilities and personnel that it already has at its disposal. The two competent authorities are, however, entitled to agree otherwise (*e.g.* to take advantage of another meeting in a different location that would be attended by both competent authorities and the arbitrators).

23. It is provided that the administrative personnel provided for the conduct of the arbitration process will report only to the Chair of the arbitration panel concerning any matter related to that procedure.

24. The language of the proceedings and whether, and which, translation facilities should be provided is a matter that should normally be dealt with in the Terms of Reference. It may be, however, that a need for translation or recording will only arise after the beginning of the proceedings. In that case, the competent authorities are entitled to reach agreement for that purpose. In the absence of such agreement, the arbitrators could, at the request of one competent authority and pursuant to paragraph 10 of the sample agreement, decide to provide such translation or recording; in that case, however, the costs thereof would have to be borne by the requesting party (see under "Costs" below).

25. Other practical details (*e.g.* notice and filing of documents) should be similarly dealt with. Thus, any such matter should be decided by agreement between the competent authorities (ideally, included in the Terms of Reference) and, failing such agreement, by decision of the arbitrators.

Costs

26. Different costs may arise in relation to the arbitration process and it should be clear who should bear these costs. Paragraph 13 of the sample agreement, which deals with this issue, is based on the principle that where a competent authority or a person involved in the case can control the amount of a particular cost, this cost should be borne by that party and that other costs should be borne equally by the two competent authorities.

27. Thus, it seems logical to provide that each competent authority, as well as the person who requested the arbitration, should pay for its own participation in the arbitration proceedings. This would include costs of being represented at the meetings and of preparing and presenting a position and arguments, whether in writing or orally.

28. The fees to be paid to the arbitrators are likely to be one of the major costs of the arbitration process. Each competent authority will bear the remuneration of the arbitrator appointed exclusively by that competent authority (or appointed by the Director of the OECD Centre for Tax Policy and Administration because of the failure of that competent authority to appoint that arbitrator), together with that arbitrator's travel, telecommunication and secretariat costs.

29. The fees and the travel, telecommunication and secretariat costs of the other arbitrators will, however, be shared equally by the competent authorities. The competent authorities will normally agree to incur these costs at the time that the arbitrators are appointed and this would typically be confirmed in the letter of appointment. The fees should be large enough to ensure that appropriately qualified experts could be recruited. One possibility

would be to use a fee structure similar to that established under the EU Arbitration Convention Code of Conduct.

30. The costs related to the meetings of the arbitral panel, including those of the administrative personnel necessary for the conduct of the arbitration process, should be borne by the competent authority to which the case giving rise to the arbitration was initially presented, as long as that competent authority is required to arrange such meetings and provide the administrative personnel (see paragraph 12 of the sample agreement). In most cases, that competent authority will use meeting facilities and personnel that it already has at its disposal and it would seem inappropriate to try to allocate part of the costs thereof to the other competent authority. Clearly, the reference to "costs related to the meetings" does not include the travel and accommodation costs incurred by the participants; these are dealt with above.

31. The other costs (not including any costs resulting from the taxpayers' participation in the process) should be borne equally by the two competent authorities as long as they have agreed to incur the relevant expenses. This would include costs related to translation and recording that both competent authorities have agreed to provide. In the absence of such agreement, the party that has requested that particular costs be incurred should pay for these.

32. As indicated in paragraph 13 of the sample agreement, the competent authorities may, however, agree to a different allocation of costs. Such agreement can be included in the Terms of Reference or be made afterwards (*e.g.* when unforeseen expenses arise).

Applicable legal principles

33. An examination of the issues on which competent authorities have had difficulties reaching an agreement shows that these are typically matters of treaty interpretation or of applying the arm's length principle underlying Article 9 and paragraph 2 of Article 7. As provided in paragraph 14 of the sample agreement, matters of treaty interpretation should be decided by the arbitrators in the light of the principles of interpretation incorporated in Articles 31 to 33 of the *Vienna Convention on the Law of Treaties*, having regard to these Commentaries as periodically amended, as explained in paragraphs 28 to 36.1 of the Introduction. Issues related to the application of the arm's length principle should similarly be decided in the light of the OECD *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*. Since Article 32 of the *Vienna Convention on the Law of Treaties* permits a wide access to supplementary means of interpretation, arbitrators will, in practice, have considerable latitude in determining relevant sources for the interpretation of treaty provisions.

34. In many cases, the application of the provisions of a tax convention depends on issues of domestic law (for example, the definition of immovable property in paragraph 2 of Article 6 depends primarily on the domestic law meaning of that term). As a general rule, it would seem inappropriate to ask arbitrators to make an independent determination of purely domestic legal issues and the description of the issues to be resolved, which will be included in the Terms of Reference, should take this into account. There may be cases, however, where there would be legitimate differences of views on a matter of domestic law and in such cases, the competent authorities may wish to leave that matter to be decided by an arbitrator who is an expert in the relevant area.

35. Also, there may be cases where the competent authorities agree that the interpretation or application of a provision of a tax treaty depends on a particular document (*e.g.* a memorandum of understanding or mutual agreement concluded after the entry into force of a treaty) but may disagree about the interpretation of that document. In such a case, the competent authorities may wish to make express reference to that document in the Terms of Reference.

Arbitration decision

36. Paragraph 15 of the sample agreement provides that where more than one arbitrator has been appointed, the arbitration decision will be determined by a simple majority of the arbitrators. Unless otherwise provided in the Terms of Reference, the decision is presented in writing and indicates the sources of law relied upon and the reasoning which led to its result. It is important that the arbitrators support their decision with the reasoning leading to it. Showing the method through which the decision was reached is important in assuring acceptance of the decision by all relevant participants.

37. Pursuant to paragraph 16, the arbitration decision must be communicated to the competent authorities and the person who made the request for arbitration within six months from the date on which the Chair notifies in writing the competent authorities and the person who made the request for arbitration that he has received all of the information necessary to begin consideration of the case. However, at any time within two months from the date on which the last arbitrator was appointed, the Chair, with the consent of one of the competent authorities, may notify in writing the other competent authority and the person who made the request for arbitration that he has not received all the information necessary to begin consideration of the case. In that case, a further two months will be given for the necessary information to be sent to the Chair. If the information is not received by the Chair within that period, it is provided that the decision will be rendered

within the next six months without taking that information into account (unless both competent authorities agree otherwise). If, on the other hand, the information is received by the Chair within the two month period, that information will be taken into account and the decision will be communicated within six months from the reception of that information.

38. In order to deal with the unusual circumstances in which the arbitrators may be unable or unwilling to present an arbitration decision, paragraph 17 provides that if the decision is not communicated within the relevant period, the competent authorities may agree to extend the period for presenting the arbitration decision or, if they fail to reach such agreement within one month, appoint new arbitrators to deal with the case. In the case of the appointment of new arbitrators, the arbitration process would go back to the point where the original arbitrators were appointed and will continue with the new arbitrators.

Publication of the decision

39. Decisions on individual cases reached under the mutual agreement procedure are generally not made public. In the case of reasoned arbitral decisions, however, publishing the decisions would lend additional transparency to the process. Also, whilst the decision would not be in any sense a formal precedent, having the material in the public domain could influence the course of other cases so as to avoid subsequent disputes and lead to a more uniform approach to the same issue.

40. Paragraph 15 of the sample agreement therefore provides for the possibility to publish the decision. Such publication, however, should only be made if both competent authorities and the person who made the arbitration request so agree. Also, in order to maintain the confidentiality of information communicated to the competent authorities, the publication should be made in a form that would not disclose the names of the parties nor any element that would help to identify them.

Implementing the decision

41. Once the arbitration process has provided a binding solution to the issues that the competent authorities have been unable to resolve, the competent authorities will proceed to conclude a mutual agreement that reflects that decision and that will be presented to the persons directly affected by the case. In order to avoid further delays, it is suggested that the mutual agreement that incorporates the solution arrived at should be completed and presented to the taxpayer within six months from the date of the communication of the decision. This is provided in paragraph 19 of the sample agreement.

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

42. paragraph 2 of Article 25 provides that the competent authorities have the obligation to implement the agreement reached notwithstanding any time limit in their domestic law. paragraph 5 of the Article also provides that the arbitration decision is binding on both Contracting States. Failure to assess taxpayers in accordance with the agreement or to implement the arbitration decision through the conclusion of a mutual agreement would therefore result in taxation not in accordance with the Convention and, as such, would allow the person whose taxation is affected to seek relief through domestic legal remedies or by making a new request pursuant to paragraph 1 of the Article.

43. Paragraph 20 of the sample agreement deals with the case where the competent authorities are able to solve the unresolved issues that led to arbitration before the decision is rendered. Since the arbitration process is an exceptional mechanism to deal with issues that cannot be solved under the usual mutual agreement procedure, it is appropriate to put an end to that exceptional mechanism if the competent authorities are able to resolve these issues by themselves. The competent authorities may agree on a resolution of these issues as long as the arbitration decision has not been rendered.

HISTORY

Paragraph 1: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 1 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) was deleted and a new paragraph 1 and the heading preceding it were added. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 1 read as follows:

> "1. In the Article are set out the rules governing the mutual agreement procedure to be followed where differences of opinion or other difficulties arise as to the application of the Convention. The Article also embodies some general rules regarding the exchange of views between the competent authorities concerned on the interpretation or the application of the Convention."

Paragraph 2: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 2 of the 1963 Draft Convention was amended and renumbered as paragraph 6 (see history of paragraph 7), the preceding heading was moved with it and a new paragraph 2 was added.

Paragraph 3: Replaced paragraph 3 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 3 read as follows:

> "3. The competent authority of the Contracting State of which the taxpayer is a resident will, of course, subject his application to a careful examination and ask for all evidence available. As a result of such an examination the authority may find that the matter can be solved without recourse to the mutual agreement procedure. On the other hand, although adjustments might be required in the State of residence only, an exchange of views as well as of information with the competent authority of the other Contracting State may be useful, *e.g.* to obtain support for a certain interpretation of the Convention."

Paragraph 4: Amended on 17 July 2008, by deleting "Finally," at the beginning of the first sentence, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 15 July 2005 and until 17 July 2008, paragraph 4 read as follows:

> "4. Finally, as regards the practical operation of the mutual agreement procedure, the Article, in paragraph 4, merely authorises the competent authorities to communicate with each other directly, without going through diplomatic channels, and, if it seems advisable to them, to have an oral exchange of opinions through a joint commission appointed especially for the purpose. Article 26 applies to the exchange of information for the purposes of the provisions of this Article. The confidentiality of information exchanged for the purposes of a mutual agreement procedure is thus ensured."

Paragraph 4 was previously amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). In the 1977 Model Convention and until 15 July 2005, paragraph 4 read as follows:

> "4. Finally, as regards the practical operation of the mutual agreement procedure, the Article, in paragraph 4, merely authorises the competent authorities to communicate with each other directly, without going through diplomatic channels, and, if it seems advisable to them, to have an oral exchange of opinions through a joint commission appointed especially for the purpose."

Paragraph 4 of the 1977 Model Convention replaced paragraph 4 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 4 read as follows:

> "4. In paragraph 2 it is laid down that in case the State of residence is not itself able to arrive at an appropriate solution, the competent authority of that State shall communicate with the competent authority of the other State with a view to reaching an agreement regarding the taxation in dispute. Among the cases in which this procedure could be applied might be mentioned the case where one Contracting State which, in the particular case, is considered by the other State to have no right to tax under the Convention, taxes income not being subject to tax under the laws of that other Contracting State. Other examples are the case of the application of non-discrimination clauses and the case of difficulties arising in the allocation of profits among associated enterprises."

Paragraph 5: Replaced paragraph 5 as it read before 17 July 2008. On 17 July 2008 paragraph 5 was renumbered as paragraph 6 (see history of paragraph 6) and a new paragraph 5 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 6: Corresponds to paragraph 5 of the 1977 Model Convention as it read before 17 July 2008. On 17 July 2008 paragraph 6 was renumbered as paragraph 7 (see history of paragraph 7), the headings preceding paragraph 6 were moved with it and paragraph 5 was amended and renumbered as paragraph 6 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax

Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). In the 1977 Model Convention and until 17 July 2008, paragraph 5 read as follows:

> "5. Since the Article merely lays down general rules concerning the mutual agreement procedure, the comments now following are intended to clarify the purpose of such rules, and also to amplify them, if necessary, by referring, in particular, to the rules followed at international level in the conduct of mutual agreement procedures or at the internal level in the conduct of the procedures which exist in most OECD member countries for dealing with disputed claims regarding taxes."

Paragraph 5 of the 1977 Model Convention replaced paragraph 5 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 5 read as follows:

> "5. No time-limit is specified in the Article for presenting claims under paragraph 1. Any time-limit that may be fixed upon bilaterally should be reasonably generous."

Paragraph 7: Corresponds to paragraph 6 of the 1977 Model Convention as it read before 17 July 2008. On 17 July 2008 paragraph 7 was renumbered as paragraph 8 (see history of paragraph 8), paragraph 6 was amended, by replacing the word "amicable" with "agreed", and renumbered as paragraph 7 and the headings preceding paragraph 6 were moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). In the 1977 Model Convention and until 17 July 2008, paragraph 6 read as follows:

> "6. The rules laid down in paragraphs 1 and 2 provide for the elimination in a particular case of taxation which does not accord with the Convention. As is known, in such cases it is normally open to taxpayers to litigate in the tax court, either immediately or upon the dismissal of their objections by the taxation authorities. When taxation not in accordance with the Convention arises from an incorrect application of the Convention in both States, taxpayers are then obliged to litigate in each State, with all the disadvantages and uncertainties that such a situation entails. So paragraph 1 makes available to taxpayers affected, without depriving them of the ordinary legal remedies available, a procedure which is called the mutual agreement procedure because it is aimed, in its second stage, at resolving the dispute on an amicable basis, *i.e.* by agreement between competent authorities, the first stage being conducted exclusively in the State of residence (except where the procedure for the application of paragraph 1 of Article 24 is set in motion by the taxpayer in the State of which he is a national) from the presentation of the objection up to the decision taken regarding it by the competent authority on the matter."

Paragraph 6 of the 1977 Model Convention corresponded to paragraph 2 of the 1963 Draft Convention. Paragraph 6 of the 1963 Draft Convention was amended and renumbered as paragraph 29 (see history of paragraph 50) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 2 of the 1963 Draft Convention was amended and renumbered as paragraph 6 of the 1977 Model Convention, the heading preceding paragraph 2 was moved with it and a new section heading was added. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. The rules laid down in paragraphs 1 and 2 provide for the elimination in a particular case of taxation which does not accord with the Convention. The provisions of paragraph 1 establish a right for the taxpayer concerned to address himself to the competent authority of the Contracting State of which he is a resident. The taxpayer may use this right whether or not he has exhausted all the legal remedies open to him according to the national tax laws of both States. Neither is it a prerequisite for the use of this right that the actions concerned have already resulted in incorrect taxation; the evident risk of such taxation as a consequence of the measures already taken would be sufficient."

Paragraph 8: Corresponds to paragraph 7 as it read before 17 July 2008. On 17 July 2008 paragraph 8 of the 1977 Model Convention was renumbered as paragraph 9 (see history of paragraph 9) and paragraph 7 was renumbered as paragraph 8 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 7 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 7 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 34 (see history of paragraph 55) and a new paragraph 7 was added.

Paragraph 9: Amended on 22 July 2010, by replacing the first bullet point, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 9 read as follows:

"9. In practice, the procedure applies to cases — by far the most numerous — where the measure in question leads to double taxation which it is the specific purpose of the Convention to avoid. Among the most common cases, mention must be made of the following:

- — the questions relating to attribution to a permanent establishment of a proportion of the executive and general administrative expenses incurred by the enterprise, under paragraph 3 of Article 7;
- — the taxation in the State of the payer — in case of a special relationship between the payer and the beneficial owner — of the excess part of interest and royalties, under the provisions of Article 9, paragraph 6 of Article 11 or paragraph 4 of Article 12;
- — cases of application of legislation to deal with thin capitalisation when the State of the debtor company has treated interest as dividends, insofar as such treatment is based on clauses of a convention corresponding for example to Article 9 or paragraph 6 of Article 11;
- — cases where lack of information as to the taxpayer's actual situation has led to misapplication of the Convention, especially in regard to the determination of residence (paragraph 2 of Article 4), the existence of a permanent establishment (Article 5), or the temporary nature of the services performed by an employee (paragraph 2 of Article 15).

Paragraph 9 as it read after 17 July 2008 corresponded to paragraph 8. On 17 July 2008 paragraph 9 was renumbered as paragraph 10 (see history of paragraph 10) and paragraph 8 was renumbered as paragraph 9 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 8 of the 1977 Model Convention was amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of subparagraph 88 *a)* of a previous report entitled "Thin Capitalisation" (adopted by the OECD Council on 26 November 1986). In the 1977 Model Convention and until 23 July 1992, paragraph 8 read as follows:

> "8. In practice, the procedure applies to cases — by far the most numerous — where the measure in question leads to double taxation which it is the specific purpose of the Convention to avoid. Among the most common cases, mention must be made of the following:
>
> — the questions relating to attribution to a permanent establishment of a proportion of the executive and general administrative expenses incurred by the enterprise, under paragraph 3 of Article 7;
>
> — the taxation in the State of the payer — n case of a special relationship between the payer and the beneficial owner — of the excess part of interest and royalties, under the provisions of Article 9, paragraph 6 of Article 11 or paragraph 4 of Article 12;
>
> — cases where lack of information as to the taxpayer's actual situation has led to misapplication of the Convention, especially in regard to the determination of residence (paragraph 2 of Article 4), the existence of a permanent establishment (Article 5), or the temporary nature of the services performed by an employee (paragraph 2 of Article 15)."

Paragraph 8 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 8 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 35 (see history of paragraph 56) and a new paragraph 8 was added when the 1977 Model Convention was adopted.

Paragraph 10: Corresponds to paragraph 9 as it read before 17 July 2008. On 17 July 2008 paragraph 10 was split into two paragraphs. All but the last sentence of paragraph 10 was renumbered as paragraph 11 (see history of paragraph 11), the last sentence of paragraph 10 was incorporated into paragraph 12, and paragraph 9 was renumbered as paragraph 10, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 9 as it read after 23 July 1992 replaced paragraph 9 of the 1977 Model Convention. Paragraph 9 of the 1977 Model Convention was deleted on 23 July 1992 and a new paragraph 9 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 79 and subdivision 115 *b)(ii)* of a previous report entitled "Transfer Pricing, Corresponding Adjustments and the Mutual Agreement Procedure" (adopted by the OECD Council on 24 November 1982). In the 1977 Model Convention and until 23 July 1992, paragraph 9 read as follows:

> "9. As regards adjustments to be made correlatively with the reinstatement of profits in the trading results of associated enterprises under the provisions of paragraphs 1 and 2 of Article 9, there is ground for considering that they may properly be dealt with through the mutual agreement procedure when determining their amount gives rise to difficulty."

Paragraph 9 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 9 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and

renumbered as paragraph 44 (see history of paragraph 47) and a new paragraph 9 was added when the 1977 Model Convention was adopted.

Paragraph 11: Corresponds to paragraph 10 as it read before 17 July 2008. On 17 July 2008 paragraph 11 was renumbered as paragraph 13 (see history of paragraph 13) and paragraph 10 was amended, by removing the final sentence and relocating it into paragraph 12 (see history of paragraph 12), and renumbered as paragraph 11 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 10 read as follows:

> "10. This in fact is implicit in the wording of paragraph 2 of Article 9 when the bilateral convention in question contains a clause of this type. When the bilateral convention does not contain rules similar to those of paragraph 2 of Article 9 (as is usually the case for conventions signed before 1977) the mere fact that Contracting States inserted in the convention the text of Article 9, as limited to the text of paragraph 1 — which usually only confirms broadly similar rules existing in domestic laws — indicates that the intention was to have economic double taxation covered by the Convention. As a result, most member countries consider that economic double taxation resulting from adjustments made to profits by reason of transfer pricing is not in accordance with — at least — the spirit of the convention and falls within the scope of the mutual agreement procedure set up under Article 25. States which do not share this view do, however, in practice, find the means of remedying economic double taxation in most cases involving *bona fide* companies by making use of provisions in their domestic laws."

Paragraph 10 as it read after 23 July 1992 replaced paragraph 10 of the 1977 Model Convention. Paragraph 10 of the 1977 Model Convention was renumbered as paragraph 11 (see history of paragraph 13) and new paragraph 10 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 79 of a previous report entitled "Transfer Pricing, Corresponding Adjustments and the Mutual Agreement Procedure" (adopted by the OECD Council on 24 November 1982).

Paragraph 12: Replaced paragraph 12 as it read before 17 July 2008. On 17 July 2008 paragraph 12 was amended and renumbered as paragraph 14 (see history of paragraph 14) and a new paragraph 12, which incorporated the final sentence of paragraph 10 as it read before 17 July, was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 13: Corresponds to paragraph 11 as it read before 17 July 2008. On 17 July 2008 paragraph 13 was renumbered as paragraph 16 (see history of paragraph 16) and paragraph 11 was renumbered as paragraph 13 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 11 as it read after 23 July 1992 corresponded to paragraph 10 of the 1977 Model Convention. Paragraph 11 of the 1977 Model Convention was renumbered as paragraph 12 (see history of paragraph 14) and paragraph 10 was renumbered as paragraph 11 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 10 of the 1977 Model Convention replaced paragraph 10 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on

11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 10 read as follows:

> "10. In future, when a multilateral Convention may have been agreed upon, it might be useful to consider more precise rules on such an international consultative procedure."

Paragraph 14: Corresponds to paragraph 12 as it read before 17 July 2008. On 17 July 2008 paragraph 14 was renumbered as paragraph 17 (see history of paragraph 17) and paragraph 12 was amended, by adding examples to the paragraph, and renumbered as paragraph 14 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 12 read as follows:

> "12. It should be noted that the mutual agreement procedure, unlike the disputed claims procedure under domestic law, can be set in motion by a taxpayer without waiting until the taxation considered by him to be "not in accordance with the Convention" has been charged against or notified to him. To be able to set the procedure in motion, he must, and it is sufficient if he does, establish that the "actions of one or both of the Contracting States" will result in such taxation, and that this taxation appears as a risk which is not merely possible but probable. Such actions mean all acts or decisions, whether of a legislative or a regulatory nature, and whether of general or individual application, having as their direct and necessary consequence the charging of tax against the complainant contrary to the provisions of the Convention."

Paragraph 12 as it read after 23 July 1992 corresponded to paragraph 11 of the 1977 Model Convention. Paragraph 12 of the 1977 Model Convention was renumbered as paragraph 13 (see history of paragraph 16) and paragraph 11 was renumbered as paragraph 12 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 11 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 15: Replaced paragraph 15 as it read before 17 July 2008. On 17 July 2008 paragraph 15 was renumbered as paragraph 18 (see history of paragraph 18) and a new paragraph 15 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 16: Corresponds to paragraph 13 as it read before 17 July 2008. On 17 July 2008 paragraph 16 was renumbered as paragraph 19 (see history of paragraph 19) and paragraph 13 was renumbered as paragraph 16 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 13, as it read after 23 July 1992, corresponded to paragraph 12 of the 1977 Model Convention. Paragraph 13 of the 1977 Model Convention was renumbered as paragraph 14 (see history of paragraph 17) and paragraph 12 was renumbered as paragraph 13 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 12 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 17: Corresponds to paragraph 14 as it read before 17 July 2008. On 17 July 2008 paragraph 17 was renumbered as paragraph 20 (see history of paragraph 20) and paragraph 14 was renumbered as paragraph 17 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 14 as it read after 23 July 1992 corresponded to paragraph 13 of the 1977 Model Convention. Paragraph 14 of the 1977 Model Convention was renumbered as paragraph 15 (see history of paragraph 18) and paragraph 13 was renumbered as paragraph 14 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 13 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 18: Corresponds to paragraph 15 as it read before 17 July 2008. On 17 July 2008 paragraph 18 was amended and renumbered as paragraph 21 (see history of paragraph 21) and paragraph 15 was renumbered as paragraph 18 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 15 as it read after 23 July 1992 corresponded to paragraph 14 of the 1977 Model Convention. Paragraph 15 of the 1977 Model Convention was renumbered as paragraph 16 (see history of paragraph 19) and paragraph 14 was renumbered as paragraph 15 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 14 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 19: Corresponds to paragraph 16 as it read before 17 July 2008. On 17 July 2008 paragraph 19 was amended and renumbered as paragraph 30 (see history of paragraph 30) and paragraph 16 was renumbered as paragraph 19 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 16 as it read after 23 July 1992 corresponded to paragraph 15 of the 1977 Model Convention. Paragraph 16 of the 1977 Model Convention was renumbered as paragraph 17 (see history of paragraph 20) and paragraph 15 was renumbered as paragraph 16 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 15 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 20: Corresponds to paragraph 17 as it read before 17 July 2008. On 17 July 2008 paragraph 20 was renumbered as paragraph 31 (see history of paragraph 31) and paragraph 17 was renumbered as paragraph 20 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 17 as it read after 23 July 1992 corresponded to paragraph 16 of the 1977 Model Convention. Paragraph 17 of the 1977 Model Convention was renumbered as paragraph 18 (see history of paragraph 21) and paragraph 16 was renumbered as

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

paragraph 17 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 16 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 21: Corresponds to paragraph 18 as it read before 17 July 2008. On 17 July 2008 paragraph 21 was renumbered as paragraph 32 (see history of paragraph 32) and paragraph 18 was amended by replacing the 3rd and last sentences (which were incorporated into paragraph 24), and renumbered as paragraph 21 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 18 read as follows:

> "18. The provision fixing the starting point of the three-year time limit as the date of the "first notification of the action resulting in taxation not in accordance with the provisions of the Convention" should be interpreted in the way most favourable to the taxpayer. Thus, even if such taxation should be directly charged in pursuance of an administrative decision or action of general application, the time limit begins to run only from the date of the notification of the individual action giving rise to such taxation, that is to say, under the most favourable interpretation, from the act of taxation itself, as evidenced by a notice of assessment or an official demand or other instrument for the collection or levy of tax. If the tax is levied by deduction at the source, the time limit begins to run from the moment when the income is paid; however, if the taxpayer proves that only at a later date did he know that the deduction had been made, the time limit will begin from that date. Furthermore, where it is the combination of decisions or actions taken in both Contracting States resulting in taxation not in accordance with the Convention, it begins to run only from the first notification of the most recent decision or action."

Paragraph 18 as it read after 23 July 1992 corresponded to paragraph 17 of the 1977 Model Convention. Paragraph 18 of the 1977 Model Convention was renumbered as paragraph 19 (see history of paragraph 30) and paragraph 17 was renumbered as paragraph 18 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 17 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 22: Replaced paragraph 22 as it read before 17 July 2008. On 17 July 2008 paragraph 22 was renumbered as paragraph 33 (see history of paragraph 33) and a new paragraph 22 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 23: Replaced paragraph 23 as it read before 17 July 2008. On 17 July 2008 paragraph 23 was renumbered as paragraph 34 (see history of paragraph 34) and a new paragraph 23 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 24: Corresponds in part to the 3rd and final sentences of paragraph 18 as it read before 17 July 2008. On 17 July 2008 paragraph 24 was renumbered as paragraph 35 (see history of paragraph 35) and a new paragraph 24, incorporating the 3rd and final sentences of paragraph 18, was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008,

on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 25: Replaced paragraph 25 as it read before 17 July 2008. On 17 July 2008 paragraph 25 was amended and renumbered as paragraph 36 (see history of paragraph 36) and a new paragraph 25 was added by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 26: Replaced paragraph 26 as it read before 17 July 2008. On 17 July 2008 paragraph 26 was amended and renumbered as paragraph 37 (see history of paragraph 37) and a new paragraph 26 was added by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 27: Replaced paragraph 27 as it read before 17 July 2008. On 17 July 2008 paragraph 27 was renumbered as paragraph 38 (see history of paragraph 38) and a new paragraph 27 was added by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 28: Replaced paragraph 28 as it read before 17 July 2008. On 17 July 2008 paragraph 28 was renumbered as paragraph 39 (see history of paragraph 39) and a new paragraph 28 was added by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 29: Replaced paragraph 29 as it read before 17 July 2008. On 17 July 2008 paragraph 29 was renumbered as paragraph 40 (see history of paragraph 40) and a new paragraph 29 was added by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 30: Corresponds to paragraph 19 as it read before 17 July 2008. On 17 July 2008 paragraph 30 was renumbered as paragraph 41 (see history of paragraph 41) and paragraph 19 was amended by replacing the cross-reference to “paragraph 6” with “paragraph 7”, and renumbered as paragraph 30 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 19 read as follows:

> “19. As regards the procedure itself, it is necessary to consider briefly the two distinct stages into which it is divided (see paragraph 6 above).”

Paragraph 19 as it read after 23 July 1992 corresponded to paragraph 18 of the 1977 Model Convention. Paragraph 19 of the 1977 Model Convention was renumbered as paragraph 20 (see history of paragraph 31) and paragraph 18 was renumbered as paragraph 19 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 18 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 31: Corresponds to paragraph 20 as it read before 17 July 2008. On 17 July 2008 paragraph 31 was divided and incorporated into paragraphs 42 and 45 with

amendment (see history of paragraph 42) and paragraph 20 was renumbered as paragraph 31 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 20 as it read after 23 July 1992 corresponded to paragraph 19 of the 1977 Model Convention. Paragraph 20 of the 1977 Model Convention was renumbered as paragraph 21 (see history of paragraph 32) and paragraph 19 was renumbered as paragraph 20 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 19 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 32: Corresponds to paragraph 21 as it read before 17 July 2008. On 17 July 2008 paragraph 32 was renumbered as paragraph 50, the heading preceding paragraph 32 was moved with it (see history of paragraph 50) and paragraph 21 was renumbered as paragraph 32 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 21 as it read after 23 July 1992 corresponded to paragraph 20 of the 1977 Model Convention. Paragraph 21 of the 1977 Model Convention was amended and renumbered as paragraph 22 (see history of paragraph 33) and paragraph 20 was renumbered as paragraph 21 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 20 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 33: Corresponds to paragraph 22 as it read before 17 July 2008. On 17 July 2008 paragraph 33 was renumbered as paragraph 51 (see history of paragraph 51) and paragraph 22 was renumbered as paragraph 33 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 22 as it read after 23 July 1992 corresponded to paragraph 21 of the 1977 Model Convention. Paragraph 22 of the 1977 Model Convention was amended and renumbered as paragraph 23 (see history of paragraph 34) and paragraph 21 was amended and renumbered as paragraph 22 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992, on the basis of subparagraph 116 i) of a previous report entitled “Transfer Pricing, Corresponding Adjustments and the Mutual Agreement Procedure” (adopted by the OECD Council on 24 November 1982). In the 1977 Model Convention and until 23 July 1992, paragraph 21 read as follows:

> “21. If, however, it appears to that competent authority that the taxation complained of is due wholly or in part to a measure taken in the other State. it will be incumbent on it, indeed it will be its duty — as clearly appears by the terms of paragraph 2 — to set in motion the mutual agreement procedure proper.”

Paragraph 21 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 34: Corresponds to paragraph 23 as it read before 17 July 2008. On 17 July 2008 paragraph 34 was renumbered as paragraph 52 (see history of paragraph 52) and paragraph 23 was renumbered as paragraph 34 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008,

on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 23 as it read after 23 July 1992 corresponded to paragraph 22 of the 1977 Model Convention. Paragraph 23 of the 1977 Model Convention was renumbered as paragraph 24 (see history of paragraph 35) and paragraph 22 was amended and renumbered as paragraph 23 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of subparagraph 116 *i)* of a previous report entitled "Transfer Pricing, Corresponding Adjustments and the Mutual Agreement Procedure" (adopted by the OECD Council on 24 November 1982). In the 1977 Model Convention and until 23 July 1992, paragraph 22 read as follows:

> "22. A taxpayer is entitled to present his case under paragraph 1 to the competent authority of the State of which he is a resident whether or not he may also have made a claim or commenced litigation under the domestic law of that State. If litigation is pending, the competent authority of the State of residence should not wait for the final adjudication, but should say whether it considers the case to be eligible for the mutual agreement procedure. If it so decides, it has to determine whether it is itself able to arrive at a satisfactory solution or whether the case has to be submitted to the competent authority of the other Contracting State."

Paragraph 22 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 35: Corresponds to paragraph 24 as it read before 17 July 2008. On 17 July 2008 paragraph 35 was renumbered as paragraph 53 (see history of paragraph 53) and paragraph 24 was renumbered as paragraph 35 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 24 as it read after 23 July 1992 corresponded to paragraph 23 of the 1977 Model Convention. Paragraph 24 of the 1977 Model Convention was renumbered as paragraph 25 (see history of paragraph 36) and paragraph 23 was renumbered as paragraph 24 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 23 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 36: Corresponds to paragraph 25 as it read before 17 July 2008. On 17 July 2008 paragraph 36 was renumbered as paragraph 54 (see history of paragraph 54) and paragraph 25 was amended and renumbered as paragraph 36 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 25 read as follows:

> "25. In its second stage — which opens with the approach to the competent authority of the other State by the competent authority to which the taxpayer has applied — the procedure is henceforward at the level of dealings between States, as if, so to speak, the State to which the complaint was presented had given it its backing. But while this procedure is indisputably a procedure between States, it may, on the other hand, be asked:
>
> — whether, as the title of the Article and the terms employed in the first sentence of paragraph 2 suggest, it is no more than a simple procedure of mutual agreement, or constitutes the implementation of a *pactum de*

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

contrahendo laying on the parties a mere duty to negotiate but in no way laying on them a duty to reach agreement;

— or whether on the contrary, it is to be regarded (on the assumption of course that it takes place within the framework of a joint commission) as a procedure of a jurisdictional nature laying on the parties a duty to resolve the dispute."

Paragraph 25 as it read after 23 July 1992 corresponded to paragraph 24 of the 1977 Model Convention. Paragraph 25 of the 1977 Model Convention was renumbered as paragraph 26 (see history of paragraph 37) and paragraph 24 was renumbered as paragraph 25 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 24 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 37: Corresponds to paragraph 26 as it read before 17 July 2008. On 17 July 2008 paragraph 37 was amended and renumbered as paragraph 55 (see history of paragraph 55) and paragraph 26 was amended and renumbered as paragraph 37 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 26 read as follows:

"26. Paragraph 2 no doubt entails a duty to negotiate; but as far as reaching mutual agreement through the procedure is concerned, the competent authorities are under a duty merely to use their best endeavours and not to achieve a result. However, Contracting States could agree on a more far-reaching commitment whereby the mutual agreement procedure, and above all the discussions in the joint commission, would produce a solution to the dispute. Such a rule could be established either by an amendment to paragraph 2 or by an interpretation specified in a protocol or an exchange of letters annexed to the Convention."

Paragraph 26 as it read after 23 July 1992 corresponded to paragraph 25 of the 1977 Model Convention. Paragraph 26 of the 1977 Model Convention was renumbered as paragraph 27 (see history of paragraph 38) and paragraph 25 was renumbered as paragraph 26 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 25 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 38: Corresponds to paragraph 27 as it read before 17 July 2008. On 17 July 2008 paragraph 38 was renumbered as paragraph 56 (see history of paragraph 56), the heading preceding paragraph 38 was moved with it and paragraph 27 was renumbered as paragraph 38 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 27 as it read after 23 July 1992 corresponded to paragraph 26 of the 1977 Model Convention. Paragraph 27 of the 1977 Model Convention was amended and renumbered as paragraph 28 (see history of paragraph 39) and paragraph 26 was renumbered as paragraph 27 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 26 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 39: Corresponds to paragraph 28 as it read before 17 July 2008. On 17 July 2008 paragraph 39 was renumbered as paragraph 57 (see history of paragraph 57) and paragraph 28 was renumbered as paragraph 39 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 28 as it read after 23 July 1992 corresponded to paragraph 27 of the 1977 Model Convention. Paragraph 28 of the 1977 Model Convention was renumbered as paragraph 31 (see history of paragraph 42) and paragraph 27 was amended and renumbered as paragraph 28 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of subparagraph 116 *i)* of a previous report entitled "Transfer Pricing, Corresponding Adjustments and the Mutual Agreement Procedure" (adopted by the OECD Council on 24 November 1982). In the 1977 Model Convention and until 23 July 1992, paragraph 27 read as follows:

> "27. The purpose of the last sentence of paragraph 2 is to enable countries with time limits relating to adjustments of assessments and tax refunds in their domestic law to give effect to an agreement despite such time limits. This provision does not prevent, however, such States as are not, on constitutional or other legal grounds, able to overrule the time limits in the domestic law from inserting in the mutual agreement itself such time limits as are adapted to their internal statute of limitation. In certain extreme cases, a Contracting State may prefer not to enter into a mutual agreement, the implementation of which would require that the internal statute of limitation had to be disregarded. Apart from time limits there may exist other obstacles such as "final court decisions" to giving effect to an agreement. Contracting States are free to agree on firm provisions for the removal of such obstacles."

Paragraph 27 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 40: Corresponds to paragraph 29 as it read before 17 July 2008. On 17 July 2008, paragraph 40 was renumbered as paragraph 58 (see history of paragraph 58) and paragraph 29 was renumbered as paragraph 40 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 29 as it read after 23 July 1992 replaced paragraph 29 of the 1977 Model Convention. Paragraph 29 of the 1977 Model Convention was renumbered as paragraph 32 (see history of paragraph 50) and new paragraph 29 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of subparagraphs 116 (iii), (iv) and (v) of a previous report entitled "Transfer Pricing, Corresponding Adjustments and the Mutual Agreement Procedure" (adopted by the OECD Council on 24 November 1982).

Paragraph 41: Corresponds to paragraph 30 as it read before 17 July 2008. On 17 July 2008 paragraph 41 was renumbered as paragraph 59 (see history of paragraph 59) and paragraph 30 was renumbered as paragraph 41 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 30 as it read after 23 July 1992 replaced paragraph 30 of the 1977 Model Convention. Paragraph 30 of the 1977 Model Convention was renumbered as paragraph 33 (see history of paragraph 51) and new paragraph 30 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council

on 23 July 1992, on the basis of subparagraphs 116 (vi), (vii) and (viii) of a previous report entitled “Transfer Pricing, Corresponding Adjustments and the Mutual Agreement Procedure” (adopted by the OECD Council on 24 November 1982).

Paragraph 42: Corresponds to paragraph 31 as it read before 17 July 2008. On 17 July 2008 paragraph 42 was amended and renumbered as paragraph 60 (see history of paragraph 60), paragraph 31 was amended, with minor amendments and by replacing the third and subsequent sentences, which were incorporated into paragraph 45 with other amendments, and paragraph 31 was renumbered as paragraph 42 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 31 read as follows:

> “31. Finally, the case may arise where a mutual agreement is concluded in relation to a taxpayer who has brought a suit for the same purpose in the competent court of either Contracting State and such suit is still pending. In such a case, there would be no grounds for rejecting a request by a taxpayer that he be allowed to defer acceptance of the solution agreed upon as a result of the mutual agreement procedure until the court had delivered its judgment in the suit still pending. On the other hand, it is necessary to take into account the concern of the competent authority to avoid any divergence or contradiction between the decision of the court and the mutual agreement, with the difficulties or risks of abuse that they could entail. In short, therefore, it seems normal that the implementation of a mutual agreement should be made subject:
>
> — to the acceptance of such mutual agreement by the taxpayer, and
>
> — to the taxpayer’s withdrawal of his suit at law concerning the points settled in the mutual agreement.”

Paragraph 31 as it read after 23 July 1992 corresponded to paragraph 28 of the 1977 Model Convention. Paragraph 31 of the 1977 Model Convention was amended and renumbered as paragraph 34 (see history of paragraph 52) and paragraph 28 was renumbered as paragraph 31 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 28 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 43: Replaced paragraph 43 as it read before 17 July 2008. On 17 July 2008 paragraph 43 was renumbered as paragraph 61 (see history of paragraph 61) and a new paragraph 43 was added by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 44: Replaced paragraph 44 as it read before 17 July 2008. On 17 July 2008 paragraph 44 was renumbered as paragraph 62 (see history of paragraph 62) and a new paragraph 44 was added by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 44.1: Renumbered as paragraph 88 (see history of paragraph 88) by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008.

Paragraph 44.2: Renumbered as paragraph 89 (see history of paragraph 89) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 44.3: Renumbered as paragraph 90 (see history of paragraph 90) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 44.4: Renumbered as paragraph 91 (see history of paragraph 91) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 44.5: Renumbered as paragraph 92 (see history of paragraph 92) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 44.6: Renumbered as paragraph 93 (see history of paragraph 93) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 44.7: Renumbered as paragraph 94 (see history of paragraph 94) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 45: Corresponds to the third sentence and subsequent sentences of paragraph 31 as they read before 17 July 2008. On 17 July 2008 the third and subsequent sentences of paragraph 31 were incorporated in part into a new paragraph 45 (see history of paragraph 31) and paragraph 45 and the heading preceding it were deleted by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 21 September 1995 and until 17 July 2008, the heading preceding paragraph 45 read as follows:

> *"IV. Final observations"*

After 23 July 1992 and until 17 July 2008, paragraph 45 read as follows:

> "45. On the whole, the mutual agreement procedure has proved satisfactory. Treaty practice shows that Article 25 has generally represented the maximum that Contracting States were prepared to accept. It must, however, be admitted that this provision is not yet entirely satisfactory from the taxpayer's viewpoint. This is because the competent authorities are required only to seek a solution and are not obliged to find one (see paragraph 26 above). The conclusion of a mutual agreement depends to a large extent on the powers of compromise which the domestic law allows the competent authorities. Thus, if a convention is interpreted or applied differently in two Contracting States, and if the competent authorities are unable to agree on a joint solution within the framework of a mutual agreement procedure, double taxation is still possible although contrary to the sense and purpose of a convention aimed at avoiding double taxation."

The heading preceding paragraph 45, "III. Final observations", as it read after 23 July 1992 and until 21 September 1995, was renumbered as "IV. Final observations" by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 45 as it read after 23 July 1992 corresponded to paragraph 42 of the 1977 Model Convention. Paragraph 45 of the 1977 Model Convention was amended and renumbered as paragraph 48 (see history of paragraph 48), paragraph 42 was amended and renumbered as paragraph 45 and the heading preceding paragraph 42 was moved with it by the report entitled "The Revision of the Model Convention",

adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 42 and the heading preceding it read as follows:

> "III. *Final observations*
>
> 42. On the whole, the mutual agreement procedure has proved satisfactory. The most recent treaty practice shows that Article 25 represents the maximum that Contracting States are prepared to accept. It must, however, be admitted that this provision is not yet entirely satisfactory from the taxpayer's viewpoint. This is because the competent authorities are required only to seek a solution and are not obliged to find one (see paragraph 25 above). The conclusion of a mutual agreement depends to a large extent on the powers of compromise which the domestic law allows the competent authorities. Thus, if a convention is interpreted or applied differently in two Contracting States, and if the competent authorities are unable to agree on a joint solution within the framework of a mutual agreement procedure, double taxation is still possible although contrary to the sense and purpose of a convention aimed at avoiding double taxation."

Paragraph 42 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 46: Replaced on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 46 read as follows:

> "46. It is difficult to avoid this situation without going outside the framework of the mutual agreement procedure. The first approach to a solution might consist of seeking an advisory opinion: the two Contracting States would agree to ask the opinion of an impartial third party, although the final decision would still rest with the States."

Paragraph 46 as it read after 23 July 1992 corresponded to paragraph 43 of the 1977 Model Convention. Paragraph 46 of the 1977 Model Convention was renumbered as paragraph 50 (see history of paragraph 50) and paragraph 43 was renumbered as paragraph 46 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 43 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 47: Replaced on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 47 read as follows:

> "47. The provisions embodied in this Convention, as well as the Commentary related thereto, are the result of close international joint work within the Committee on Fiscal Affairs. A possibility near at hand would be to call upon the Committee on Fiscal Affairs to give an opinion on the correct understanding of the provisions where special difficulties of interpretation arise as to particular points. Such a practice, which would be in line with the mandate and aims of the Committee on Fiscal Affairs, might well make a valuable contribution to arriving at a desirable uniformity in the application of the provisions."

Paragraph 47 as it read after 23 July 1992 corresponded to paragraph 44 of the 1977 Model Convention. Paragraph 47 of the 1977 Model Convention was amended and renumbered as paragraph 53 (see history of paragraph 98) and paragraph 44 was

renumbered as paragraph 47 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 44 of the 1977 Model Convention corresponded to paragraph 9 of the 1963 Draft Convention. Paragraph 9 of the 1963 Draft Convention was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 9 read as follows:

> "9. As the provisions embodied in this Convention as well as the Commentaries annexed thereto are the result of a close international joint work within the Fiscal Committee, a possibility near at hand would be to call upon the Fiscal Committee to, give an opinion on the correct understanding of the provisions where special difficulties of interpretation arise as to particular points. Such a practice, which would be in line with the mandate and aims of the Fiscal Committee with regard to the progressive elaboration of uniform law for the avoidance of double taxation, might well make a valuable contribution to arriving at a desirable uniformity in the application of the provisions."

Paragraph 48: Replaced on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 48 read as follows:

> "48. Another solution is that of arbitration. This is the solution adopted by the member States of the European Communities through their multilateral Arbitration Convention, which was signed on 23 July 1990 and which provides that certain cases of double taxation that have not been solved through the mutual agreement procedure must be submitted to an arbitration procedure. Also, some recent bilateral conventions provide that the Contracting States may agree to submit unresolved disagreements to arbitration."

Paragraph 48 as it read after 23 July 1992 corresponded to paragraph 45 of the 1977 Model Convention. Paragraph 48 of the 1977 Model Convention was renumbered as paragraph 54 (see history of paragraph 99) and paragraph 45 was amended and renumbered as paragraph 48 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 45 read as follows:

> "45. It might also be feasible to ask the opinion of certain persons acting as independent arbitrators. In the case of OECD member countries, the Committee on Fiscal Affairs could, for example, periodically draw up a list of persons from among whom the competent authorities of the two States concerned could choose the third party to be asked to give an advisory opinion."

Paragraph 45 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 49: Replaced on 17 July 2008 and the heading preceding paragraph 49 was moved immediately before paragraph 95 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 28 January 2003 and until 17 July 2008, paragraph 49 read as follows:

> "49. *Belgium* believes that, in the context of a bilateral or multilateral APAs, the first sentence of paragraph 3 allows the competent authorities to solve difficulties related to the application of the arms' length principle provided for in paragraph 1

of Article 9 even where the convention does not include paragraph 2 of that Article."

Paragraph 49 was previously replaced on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 49 read as follows:

"49. *Belgium* expresses doubts about the interpretation given in paragraphs 9 and 10 above. In particular, where a convention does not include provisions corresponding to paragraph 2 of Article 9, Belgium believes that there is no provision in the Convention that appears to allow the enterprise the profits of which have been diverted, or the enterprise that has benefitted from this diversion, the right to make a request for adjustment under the mutual agreement procedure because the profits that have been abusively transferred may have been subject to economic double taxation. However, where the adjusted profits are also subject to juridical double taxation, *e.g.* where the profits transferred to the associated enterprise are subjected to a tax on dividends as a hidden distribution after having been included in the taxable profits of the other enterprise, nothing would prevent the application of Article 25."

Paragraph 49 was added on 23 July 1992 together with the heading preceding it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 50: Corresponds to paragraph 32 as it read before 17 July 2008. On 17 July 2008, paragraph 32 was renumbered as paragraph 50, the heading preceding paragraph 32 was moved with it, paragraph 50 was deleted and the heading preceding paragraph 50 was moved immediately before paragraph 96 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 32 as it read after 23 July 1992 corresponded to paragraph 29 of the 1977 Model Convention. Paragraph 32 of the 1977 Model Convention was renumbered as paragraph 35 (see history of paragraph 53), paragraph 29 was renumbered as paragraph 32 and the heading preceding paragraph 29 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 29 of the 1977 Model Convention corresponded to paragraph 6 of the 1963 Draft Convention. Paragraph 6 of the 1963 Draft Convention was amended and renumbered as paragraph 29 and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 6 read as follows:

"6. The provisions of paragraph 3 invite the competent authorities to resolve general difficulties of interpretation or application by means of mutual agreement and enable the authorities to enter into such agreement, if possible."

Paragraph 50, as it read after 23 July 1992 and until 17 July 2008, when it was deleted, read as follows:

"50. *Canada* and *Portugal* reserve their positions on the last sentence of paragraph 1 as they could not accept such a long time-limit."

Paragraph 50 as it read after 23 July 1992 corresponded to paragraph 46 of the 1977 Model Convention. Paragraph 46 of the 1977 Model Convention was renumbered as paragraph 50 and the heading preceding paragraph 46 was moved with it by the report

entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 46 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 51: Corresponds to paragraph 33 as it read before 17 July 2008. On 17 July 2008 paragraph 51 was renumbered as paragraph 96 (see history of paragraph 96) and paragraph 33 was renumbered as paragraph 51 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 33 as it read after 23 July 1992 corresponded to paragraph 30 of the 1977 Model Convention. Paragraph 33 of the 1977 Model Convention was renumbered as paragraph 36 (see history of paragraph 54) and paragraph 30 was renumbered as paragraph 33 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 30 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 52: Corresponds to paragraph 34 as it read before 17 July 2008. On 17 July 2008 paragraph 52 was renumbered as paragraph 97 (see history of paragraph 97) and paragraph 34 was renumbered as paragraph 52 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 34 as it read after 23 July 1992 corresponded to paragraph 31 of the 1977 Model Convention. Paragraph 34 of the 1977 Model Convention was renumbered as paragraph 37 (see history of paragraph 55) and paragraph 31 was amended and renumbered as paragraph 34 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992, on the basis of subparagraph 88 *b)* of a previous report entitled “Thin Capitalisation” (adopted by the OECD Council on 26 November 1986). In the 1977 Model Convention and until 23 July 1992, paragraph 31 read as follows:

> “31. Under this provision the competent authorities can, in particular:
>
> — where a term has been incompletely or ambiguously defined in the Convention, complete or clarify its definition in order to obviate any difficulty;
>
> — where the laws of a State have been changed without impairing the balance or affecting the substance of the Convention, settle any difficulties that may emerge from the new system of taxation arising out of such changes.”

Paragraph 31 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 53: Corresponds to paragraph 35 as it read before 17 July 2008. On 17 July 2008 paragraph 53 was amended and renumbered as paragraph 98 (see history of paragraph 98) and paragraph 35 was renumbered as paragraph 53 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 35 as it read after 23 July 1992 corresponded to paragraph 32 of the 1977 Model Convention. Paragraph 35 of the 1977 Model Convention was renumbered as paragraph 38 (see history of paragraph 56) and paragraph 32 was renumbered as

paragraph 35 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 32 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 54: Corresponds to paragraph 36 as it read before 17 July 2008. On 17 July 2008 paragraph 54 was renumbered as paragraph 99 (see history of paragraph 99) and paragraph 36 was renumbered as paragraph 54 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 36 as it read after 23 July 1992 corresponded to paragraph 33 of the 1977 Model Convention. Paragraph 36 of the 1977 Model Convention was renumbered as paragraph 39 (see history of paragraph 57) and paragraph 33 was renumbered as paragraph 36 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 33 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 55: Corresponds to paragraph 37 as it read before 17 July 2008. On 17 July 2008 paragraph 37 was amended and renumbered as paragraph 55 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 37 read as follows:

> "37. The second sentence of paragraph 3 enables the competent authorities to deal also with such cases of double taxation as do not come within the scope of the provisions of the Convention. Of special interest in this connection is the case of a resident of a third State having permanent establishments in both Contracting States. It is of course desirable that the mutual agreement procedure should result in the effective elimination of the double taxation which can occur in such a situation. An exception must, however, be made for the case of Contracting States whose domestic law prevents the Convention from being complemented on points which are not explicitly or at least implicitly dealt with; in such a case, the Convention could be complemented only by a protocol subject, like the Convention itself, to ratification or approval."

Paragraph 37 as it read after 23 July 1992 corresponded to paragraph 34 of the 1977 Model Convention. Paragraph 37 of the 1977 Model Convention was renumbered as paragraph 40 (see history of paragraph 58) and paragraph 34 was renumbered as paragraph 37 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 34 of the 1977 Model Convention corresponded to paragraph 7 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 7 of the 1963 Draft Convention was amended and renumbered as paragraph 34 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 7 read as follows:

> "7. In the second sentence of paragraph 3, a possibility is indicated for the competent authorities to deal also with such cases of double taxation as do not come within the scope of the provisions of the Convention. Of special interest in this connection is the case of a resident of a third State having permanent establishments in both Contracting States. It is, of course, desirable that the

consultations concerned should result in the effective elimination of the double taxation in question."

Paragraph 55 as it read after 21 September 1995 and until 15 July 2005, was deleted by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 21 September 1995 and until 15 July 2005, paragraph 55 read as follows:

"55. *Mexico* reserves its position on the second sentence of paragraph 3 on the grounds that it has no authority under its law to eliminate double taxation in cases not provided for in the Convention."

Paragraph 55 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 56: Corresponds to paragraph 38 as it read before 17 July 2008. On 17 July 2008 paragraph 38 was renumbered as paragraph 56 and the heading preceding paragraph 38 was moved with it, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 38 as it read after 23 July 1992 corresponded to paragraph 35 of the 1977 Model Convention. Paragraph 38 of the 1977 Model Convention was renumbered as paragraph 41 (see history of paragraph 59), paragraph 35 was renumbered as paragraph 38 and the heading preceding paragraph 35 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 35 of the 1977 Model Convention corresponded to paragraph 8 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 8 of the 1963 Draft Convention was amended and renumbered and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 8 read as follows:

"8. This paragraph provides that the competent authorities of the Contracting States may communicate with each other directly. It would thus not be necessary to go through diplomatic channels. As suggested by the second sentence of paragraph 4, the setting up of a Commission may in certain cases be advisable. When dealing with a particular case, it might be found of value to allow the taxpayer to make representations in writing or orally. If agreed upon unanimously, this procedure should be open to the Commission."

Paragraph 57: Corresponds to paragraph 39 as it read before 17 July 2008. On 17 July 2008 paragraph 39 was renumbered as paragraph 57 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 39 as it read after 23 July 1992 corresponded to paragraph 36 of the 1977 Model Convention. Paragraph 39 of the 1977 Model Convention was renumbered as paragraph 42 (see history of paragraph 60) and paragraph 36 was renumbered as paragraph 39 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 36 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 58: Corresponds to paragraph 40 as it read before 17 July 2008. On 17 July 2008 paragraph 40 was renumbered as paragraph 58 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 40 was previously amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 40 read as follows:

> "40. Such exchange of opinions will normally take place by letter. However, if the competent authorities deem it useful, in order to reach an agreement more easily, they may also — as provided in the second sentence of paragraph 4 — exchange views orally. They may, moreover, agree that such exchanges should take place in a commission consisting of representatives of the said authorities."

Paragraph 40 as it read after 23 July 1992 corresponded to paragraph 37 of the 1977 Model Convention. Paragraph 40 of the 1977 Model Convention was renumbered as paragraph 43 (see history of paragraph 61) and paragraph 37 was renumbered as paragraph 40 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 37 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 59: Corresponds to paragraph 41 as it read before 17 July 2008. On 17 July 2008 paragraph 41 was renumbered as paragraph 59 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 41 as it read after 23 July 1992 corresponded to paragraph 38 of the 1977 Model Convention. Paragraph 41 of the 1977 Model Convention was renumbered as paragraph 44 (see history of paragraph 62) and paragraph 38 was renumbered as paragraph 41 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 38 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 60: Corresponds to paragraph 42 as it read before 17 July 2008. On 17 July 2008 paragraph 42 was amended, by replacing the word "while" in the first sentence with "whilst", and renumbered as paragraph 60 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 42 read as follows:

> "42. However, while the Contracting States may avoid any formalism in this field, it is nevertheless their duty to give taxpayers whose cases are brought before the joint commission under paragraph 2 certain essential guarantees, namely:
>
> — the right to make representations in writing or orally, either in person or through a representative;
>
> — the right to be assisted by counsel."

Paragraph 42 as it read after 23 July 1992 corresponded to paragraph 39 of the 1977 Model Convention. Paragraph 42 of the 1977 Model Convention was amended and renumbered as paragraph 45 (see history of paragraph 45) and paragraph 39 was

renumbered as paragraph 42 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 39 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 61: Corresponds to paragraph 43 as it read before 17 July 2008. On 17 July 2008 paragraph 43 was renumbered as paragraph 61 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 43 as it read after 23 July 1992 corresponded to paragraph 40 of the 1977 Model Convention. Paragraph 43 of the 1977 Model Convention was renumbered as paragraph 46 (see history of paragraph 46) and paragraph 40 was renumbered as paragraph 43 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 40 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 62: Corresponds to paragraph 44 as it read before 17 July 2008. On 17 July 2008 paragraph 44 was renumbered as paragraph 62 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 44 as it read after 23 July 1992 corresponded to paragraph 41 of the 1977 Model Convention. Paragraph 44 of the 1977 Model Convention was renumbered as paragraph 47 (see history of paragraph 47) and paragraph 41 was renumbered as paragraph 44 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 41 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 63: Added on 17 July 2008, together with the heading preceding it, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 64: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 65: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 66: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 67: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 68: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 69: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 70: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 71: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 72: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 73: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 74: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 75: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 76: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 77: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 78: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 79: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 80: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of

another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 81: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 82: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 83: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 84: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 85: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 86: Added on 17 July 2008, together with the heading preceding it by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 87: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 88: Corresponds to paragraph 44.1 as it read before 17 July 2008. On 17 July 2008 paragraph 44.1 was renumbered as paragraph 88 and the heading preceding paragraph 44.1 was moved with it by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 44.1 was added on 21 September 1995, together with the heading preceding it by the report entitled “The 1995 Update to the Model Tax Convention”, adopted by the OECD Council on 21 September 1995.

Paragraph 89: Corresponds to paragraph 44.2 as it read before 17 July 2008. On 17 July 2008 paragraph 44.2 was renumbered as paragraph 89 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Improving the Resolution of Tax Disputes” (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 44.2 was added on 21 September 1995 by the report entitled “The 1995 Update to the Model Tax Convention”, adopted by the OECD Council on 21 September 1995.

Paragraph 90: Corresponds to paragraph 44.3 as it read before 17 July 2008. On 17 July 2008 paragraph 44.3 was renumbered as paragraph 91 by the report entitled “The 2008

Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 44.3 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 91: Corresponds to paragraph 44.4 as it read before 17 July 2008. On 17 July 2008 paragraph 44.4 was renumbered as paragraph 91 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 44.4 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 92: Corresponds to paragraph 44.5 as it read before 17 July 2008. On 17 July 2008 paragraph 44.5 was amended, by replacing the word "While" with "Whilst" at the beginning of the second sentence, and renumbered as paragraph 92 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 21 September 1995 and until 17 July 2008, paragraph 44.5 read as follows:

> "44.5 Second, the phrase "falls within the scope" is inherently ambiguous, as indicated by the inclusion in paragraph 3 of Article XXII of the GATS of both an arbitration procedure and a clause exempting pre-existing conventions from its application in order to deal with disagreements related to its meaning. While it seems clear that a country could not argue in good faith[1] that a measure relating to a tax to which no provision of a tax convention applied fell within the scope of that convention, it is unclear whether the phrase covers all measures that relate to taxes that are covered by all or only some provisions of the tax convention.
>
> 1 The obligation of applying and interpreting treaties in good faith is expressly recognized in Articles 26 and 31 of the *Vienna Convention on the Law of Treaties*; thus, the exception in paragraph 3 of Article XXII of the GATS applies only to good faith disputes."

Paragraph 44.5 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 93: Corresponds to paragraph 44.6 as it read before 17 July 2008. On 17 July 2008 paragraph 44.6 was renumbered as paragraph 93 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 44.6 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 94: Corresponds to paragraph 44.7 as it read before 17 July 2008. On 17 July 2008 paragraph 44.7 was renumbered as paragraph 94 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007).

Paragraph 44.7 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 95: Added on 17 July 2008 and the heading preceding paragraph 49 was moved immediately before paragraph 95 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 96: Corresponds to paragraph 51 as it read before 17 July 2008. On 17 July 2008 paragraph 51 was renumbered as paragraph 96 and the heading preceding paragraph 50 was moved immediately before paragraph 96 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 51 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 97: Corresponds to paragraph 52 as it read before 17 July 2008. On 17 July 2008 paragraph 52 was renumbered as paragraph 97 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 52 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 98: Amended on 22 July 2010, by changing the list of countries making the reservation by adding Chile and deleting Spain, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 98 read as follows:

> "98. *Greece*, *Italy*, *Mexico*, *Poland*, *Portugal*, the *Slovak Republic*, *Spain* and *Switzerland* reserve their positions on the second sentence of paragraph 2. These countries consider that the implementation of reliefs and refunds following a mutual agreement ought to remain linked to time-limits prescribed by their domestic laws."

Paragraph 98 as it read after 17 July 2008 corresponded to paragraph 53. On 17 July 2008 paragraph 53 was amended, by adding Poland and deleting Canada, Ireland and the United Kingdom from the list of countries making the reservation, and renumbered as paragraph 98 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 53 read as follows:

> "53. *Canada*, *Greece*, *Ireland*, *Italy*, *Mexico*, *Portugal*, the *Slovak Republic*, *Spain*, *Switzerland* and the *United Kingdom* reserve their positions on the second sentence of paragraph 2. These countries consider that the implementation of reliefs and refunds following a mutual agreement ought to remain linked to time-limits prescribed by their domestic laws."

Paragraph 53 was previously amended on 28 January 2003, by adding the Slovak Republic to the list of countries making the reservation by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 53 read as follows:

> "53. *Canada*, *Greece*, *Ireland*, *Italy*, *Mexico*, *Portugal*, *Spain*, *Switzerland* and the *United Kingdom* reserve their positions on the second sentence of paragraph 2. These countries consider that the implementation of reliefs and refunds following a mutual agreement ought to remain linked to time-limits prescribed by their domestic laws."

Paragraph 53 was previously amended on 23 October 1997, by deleting Belgium from the list of countries making the reservation, by the report entitled "The 1997 Update to

the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 53 read as follows:

> "53. *Canada*, *Belgium*, *Greece*, *Ireland*, *Italy*, *Mexico*, *Portugal*, *Spain*, *Switzerland* and the *United Kingdom* reserve their positions on the second sentence of paragraph 2. These countries consider that the implementation of reliefs and refunds following a mutual agreement ought to remain linked to time-limits prescribed by their domestic laws."

Paragraph 53 was previously amended on 21 September 1995, by adding Mexico to the list of countries making the Reservation, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 53 read as follows:

> "53. *Canada*, *Belgium*, *Greece*, *Ireland*, *Italy*, *Portugal*, *Spain*, *Switzerland* and the *United Kingdom* reserve their positions on the second sentence of paragraph 2. These countries consider that the implementation of reliefs and refunds following a mutual agreement ought to remain linked to time-limits prescribed by their domestic laws."

Paragraph 53 as it read after 23 July 1992 corresponded to paragraph 47 of the 1977 Model Convention. Paragraph 47 of the 1977 Model Convention was renumbered as paragraph 53 and amended, by adding Belgium and Switzerland to the list of countries making the reservation, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 47 read as follows:

> "47. *Canada*, *Greece*, *Ireland*, *Italy*, *Portugal*, *Spain* and *the United Kingdom* reserve their positions on the second sentence of paragraph 2. These countries consider that the implementation of reliefs and refunds following a mutual agreement ought to remain linked to time-limits prescribed by their domestic laws."

Paragraph 47 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 99: Corresponds to paragraph 54 as it read before 17 July 2008. On 17 July 2008 paragraph 54 was renumbered as paragraph 99 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 54 as it read after 23 July 1992 corresponded to paragraph 48 of the 1977 Model Convention. Paragraph 48 of the 1977 Model Convention was renumbered as paragraph 54 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 48 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 100: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 101: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

ANNEX - Sample Mutual Agreement on Arbitration: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

COMMENTARY ON ARTICLE 26
CONCERNING THE EXCHANGE OF INFORMATION

I. Preliminary remarks

1. There are good grounds for including in a convention for the avoidance of double taxation provisions concerning co-operation between the tax administrations of the two Contracting States. In the first place it appears to be desirable to give administrative assistance for the purpose of ascertaining facts in relation to which the rules of the convention are to be applied. Moreover, in view of the increasing internationalisation of economic relations, the Contracting States have a growing interest in the reciprocal supply of information on the basis of which domestic taxation laws have to be administered, even if there is no question of the application of any particular article of the Convention.

(Replaced on 11 April 1977; see HISTORY)

2. Therefore the present Article embodies the rules under which information may be exchanged to the widest possible extent, with a view to laying the proper basis for the implementation of the domestic tax laws of the Contracting States and for the application of specific provisions of the Convention. The text of the Article makes it clear that the exchange of information is not restricted by Article 1 and 2, so that the information may include particulars about non-residents and may relate to the administration or enforcement of taxes not referred to in Article 2.

(Amended on 15 July 2005; see HISTORY)

3. The matter of administrative assistance for the purpose of tax collection is dealt with in Article 27.

(Replaced on 28 January 2003; see HISTORY)

4. In 2002, the Committee on Fiscal Affairs undertook a comprehensive review of Article 26 to ensure that it reflects current country practices. That review also took into account recent developments such as the *Model Agreement on Exchange of Information on Tax Matters*[1] developed by the OECD Global Forum Working Group on Effective Exchange of Information and the ideal standard of access to bank information as described in the report *Improving Access to Bank Information for Tax Purposes*.[2] As a result, several changes to both the text of the Article and the Commentary were made in 2005.

(Replaced on 15 July 2005; see HISTORY)

1 Available on *www.oecd.org/taxation*.

2 OECD, Paris, 2000. Available on *www.oecd.org/taxation*.

4.1 Many of the changes that were then made to the Article were not intended to alter its substance, but instead were made to remove doubts as to its proper interpretation. For instance, the change from "necessary" to "foreseeably relevant" and the insertion of the words "to the administration or enforcement" in paragraph 1 were made to achieve consistency with the *Model Agreement on Exchange of Information on Tax Matters* and were not intended to alter the effect of the provision. New paragraph 4 was added to incorporate into the text of the Article the general understanding previously expressed in the Commentary (see paragraph 19.6). New paragraph 5 was added to reflect current practices among the vast majority of OECD member countries (see paragraph 19.10). The insertion of the words "or the oversight of the above" into new paragraph 2, on the other hand, constitutes a reversal of the previous rule.

(Added on 15 July 2005; see HISTORY)

4.2 The Commentary also has been expanded considerably. This expansion in part reflects the addition of new paragraph 4 and 5 to the Article. Other changes were made to the Commentary to take into account recent developments and current country practices and more generally to remove doubts as to the proper interpretation of the Article.

(Added on 15 July 2005; see HISTORY)

II. Commentary on the provisions of the Article

Paragraph 1

5. The main rule concerning the exchange of information is contained in the first sentence of the paragraph. The competent authorities of the Contracting States shall exchange such information as is foreseeably relevant to secure the correct application of the provisions of the Convention or of the domestic laws of the Contracting States concerning taxes of every kind and description imposed in these States even if, in the latter case, a particular Article of the Convention need not be applied. The standard of "foreseeable relevance" is intended to provide for exchange of information in tax matters to the widest possible extent and, at the same time, to clarify that Contracting States are not at liberty to engage in "fishing expeditions" or to request information that is unlikely to be relevant to the tax affairs of a given taxpayer. Contracting States may agree to an alternative formulation of this standard that is consistent with the scope of the Article (*e.g.* by replacing, "foreseeably relevant" with "necessary" or "relevant"). The scope of exchange of information covers all tax matters without prejudice to the general rules and legal provisions governing the rights of defendants and witnesses in judicial proceedings. Exchange of information for criminal tax matters can also be

based on bilateral or multilateral treaties on mutual legal assistance (to the extent they also apply to tax crimes). In order to keep the exchange of information within the framework of the Convention, a limitation to the exchange of information is set so that information should be given only insofar as the taxation under the domestic taxation laws concerned is not contrary to the Convention.

(Amended on 15 July 2005; see HISTORY)

5.1 The information covered by paragraph 1 is not limited to taxpayer-specific information. The competent authorities may also exchange other sensitive information related to tax administration and compliance improvement, for example risk analysis techniques or tax avoidance or evasion schemes.

(Added on 15 July 2005; see HISTORY)

5.2 The possibilities of assistance provided by the Article do not limit, nor are they limited by, those contained in existing international agreements or other arrangements between the Contracting States which relate to co-operation in tax matters. Since the exchange of information concerning the application of custom duties has a legal basis in other international instruments, the provisions of these more specialised instruments will generally prevail and the exchange of information concerning custom duties will not, in practice, be governed by the Article.

(Renumbered and amended on 15 July 2005; see HISTORY)

6. The following examples may clarify the principle dealt with in paragraph 5 above. In all such cases information can be exchanged under paragraph 1.

(Replaced on 11 April 1977; see HISTORY)

7. Application of the Convention

a) When applying Article 12, State A where the beneficiary is resident asks State B where the payer is resident, for information concerning the amount of royalty transmitted.

b) Conversely, in order to grant the exemption provided for in Article 12, State B asks State A whether the recipient of the amounts paid is in fact a resident of the last-mentioned State and the beneficial owner of the royalties.

c) Similarly, information may be needed with a view to the proper allocation of profits between associated enterprises in different States or the proper determination of the profits attributable to a permanent establishment situated in one State of an enterprise of the other State (Article 7, 9, 23 A and 23 B).

d) Information may be needed for the purposes of applying Article 25.

e) When applying Article 15 and 23 A, State A, where the employee is resident, informs State B, where the employment is exercised for more than 183 days, of the amount exempted from taxation in State A.

(Amended on 22 July 2010; see HISTORY)

8. Implementation of the domestic laws

a) A company in State A supplies goods to an independent company in State B. State A wishes to know from State B what price the company in State B paid for the goods with a view to a correct application of the provisions of its domestic laws.

b) A company in State A sells goods through a company in State C (possibly a low-tax country) to a company in State B. The companies may or may not be associated. There is no convention between State A and State C, nor between State B and State C. Under the convention between A and B, State A, with a view to ensuring the correct application of the provisions of its domestic laws to the profits made by the company situated in its territory, asks State B what price the company in State B paid for the goods.

c) State A, for the purpose of taxing a company situated in its territory, asks State B, under the convention between A and B, for information about the prices charged by a company in State B, or a group of companies in State B with which the company in State A has no business contacts in order to enable it to check the prices charged by the company in State A by direct comparison (*e.g.* prices charged by a company or a group of companies in a dominant position). It should be borne in mind that the exchange of information in this case might be a difficult and delicate matter owing in particular to the provisions of subparagraph *c)* of paragraph 3 relating to business and other secrets.

d) State A, for the purpose of verifying VAT input tax credits claimed by a company situated in its territory for services performed by a company resident in State B, requests confirmation that the cost of services was properly entered into the books and records of the company in State B.

(Amended on 15 July 2005; see HISTORY)

9. The rule laid down in paragraph 1 allows information to be exchanged in three different ways:

a) on request, with a special case in mind, it being understood that the regular sources of information available under the internal taxation procedure should be relied upon in the first place before a request for information is made to the other State;

b) automatically, for example when information about one or various categories of income having their source in one Contracting State and received in the other Contracting State is transmitted systematically to the other State (see the OECD Council Recommendation C(81)39, dated 5 May 1981, entitled *Recommendation of the Council concerning a standardised form for automatic exchanges of information under international tax agreements*, the OECD Council Recommendation C(92)50, dated 23 July 1992, entitled *Recommendation of the Council concerning a standard magnetic format for automatic exchange of tax information*, the *OECD Council Recommendation on the use of Tax Identification Numbers in an international context* C(97)29/FINAL dated 13 March 1997, the OECD Council Recommendation C(97)30/FINAL dated 10 July 1997 entitled *Recommendation of the Council of the OECD on the Use of the Revised Standard Magnetic Format for Automatic Exchange of Information* and the *OECD Council Recommendation on the use of the OECD Model Memorandum of Understanding on Automatic Exchange of Information for Tax Purposes* C(2001)28/FINAL);[1]

c) spontaneously, for example in the case of a State having acquired through certain investigations, information which it supposes to be of interest to the other State.

(Amended on 15 July 2005; see HISTORY)

9.1 These three forms of exchange (on request, automatic and spontaneous) may also be combined. It should also be stressed that the Article does not restrict the possibilities of exchanging information to these methods and that the Contracting States may use other techniques to obtain information which may be relevant to both Contracting States such as simultaneous examinations, tax examinations abroad and industry-wide exchange of information. These techniques are fully described in the publication *Tax Information Exchange between OECD Member Countries: A Survey of Current Practices*[2] and can be summarised as follows:

— a simultaneous examination is an arrangement between two or more parties to examine simultaneously each in its own territory, the tax affairs of (a) taxpayer(s) in which they have a common or related interest, with a view of exchanging any relevant information which they so obtain (see the OECD Council Recommendation C(92)81, dated 23 July 1992, on an OECD Model agreement for the undertaking of simultaneous examinations);

— a tax examination abroad allows for the possibility to obtain information through the presence of representatives of the competent authority of

1 OECD Recommendations are available on *www.oecd.org/taxation*.
2 OECD, Paris, 1994.

the requesting Contracting State. To the extent allowed by its domestic law, a Contracting State may permit authorised representatives of the other Contracting State to enter the first Contracting State to interview individuals or examine a person's books and records, — or to be present at such interviews or examinations carried out by the tax authorities of the first Contracting State — in accordance with procedures mutually agreed upon by the competent authorities. Such a request might arise, for example, where the taxpayer in a Contracting State is permitted to keep records in the other Contracting State. This type of assistance is granted on a reciprocal basis. Countries' laws and practices differ as to the scope of rights granted to foreign tax officials. For instance, there are States where a foreign tax official will be prevented from any active participation in an investigation or examination on the territory of a country; there are also States where such participation is only possible with the taxpayer's consent. The Joint Council of Europe/OECD Convention on Mutual Administrative Assistance in Tax Matters specifically addresses tax examinations abroad in its Article 9;

— an industry-wide exchange of information is the exchange of tax information especially concerning a whole economic sector (*e.g.* the oil or pharmaceutical industry, the banking sector, etc.) and not taxpayers in particular.

(Amended on 15 July 2005; see HISTORY)

10. The manner in which the exchange of information agreed to in the Convention will finally be effected can be decided upon by the competent authorities of the Contracting States. For example, Contracting States may wish to use electronic or other communication and information technologies, including appropriate security systems, to improve the timeliness and quality of exchanges of information. Contracting States which are required, according to their law, to observe data protection laws, may wish to include provisions in their bilateral conventions concerning the protection of personal data exchanged. Data protection concerns the rights and fundamental freedoms of an individual, and in particular, the right to privacy, with regard to automatic processing of personal data. See, for example, the *Council of Europe Convention for the Protection of Individuals with regard to Automatic Processing of Personal Data* of 28 January 1981.[1]

(Amended on 15 July 2005; see HISTORY)

10.1 Before 2000, the paragraph only authorised the exchange of information, and the use of the information exchanged, in relation to the taxes covered by the Convention under the general rules of Article 2. As drafted, the paragraph

1 See *http://conventions.coe.int*.

did not oblige the requested State to comply with a request for information concerning the imposition of a sales tax as such a tax was not covered by the Convention. The paragraph was then amended so as to apply to the exchange of information concerning any tax imposed on behalf of the Contracting States, or of their political subdivisions or local authorities, and to allow the use of the information exchanged for purposes of the application of all such taxes. Some Contracting States may not, however, be in a position to exchange information, or to use the information obtained from a treaty partner, in relation to taxes that are not covered by the Convention under the general rules of Article 2. Such States are free to restrict the scope of paragraph 1 of the Article to the taxes covered by the Convention.

(Renumbered and amended on 15 July 2005; see HISTORY)

10.2 In some cases, a Contracting State may need to receive information in a particular form to satisfy its evidentiary or other legal requirements. Such forms may include depositions of witnesses and authenticated copies of original records. Contracting States should endeavour as far as possible to accommodate such requests. Under paragraph 3, the requested State may decline to provide the information in the specific form requested if, for instance, the requested form is not known or permitted under its law or administrative practice. A refusal to provide the information in the form requested does not affect the obligation to provide the information.

(Added on 15 July 2005; see HISTORY)

10.3 Nothing in the Convention prevents the application of the provisions of the Article to the exchange of information that existed prior to the entry into force of the Convention, as long as the assistance with respect to this information is provided after the Convention has entered into force and the provisions of the Article have become effective. Contracting States may find it useful, however, to clarify the extent to which the provisions of the Article are applicable to such information, in particular when the provisions of that convention will have effect with respect to taxes arising or levied from a certain time.

(Added on 15 July 2005; see HISTORY)

Paragraph 2

11. Reciprocal assistance between tax administrations is feasible only if each administration is assured that the other administration will treat with proper confidence the information which it will receive in the course of their co-operation. The confidentiality rules of paragraph 2 apply to all types of information received under paragraph 1, including both information provided in a request and information transmitted in response to a request. The

maintenance of secrecy in the receiving Contracting State is a matter of domestic laws. It is therefore provided in paragraph 2 that information communicated under the provisions of the Convention shall be treated as secret in the receiving State in the same manner as information obtained under the domestic laws of that State. Sanctions for the violation of such secrecy in that State will be governed by the administrative and penal laws of that State.

(Amended on 15 July 2005; see HISTORY)

11.1 *(Renumbered on 15 July 2005; see HISTORY)*

11.2 *(Renumbered on 15 July 2005; see HISTORY)*

12. The information obtained may be disclosed only to persons and authorities involved in the assessment or collection of, the enforcement or prosecution in respect of, the determination of appeals in relation to the taxes with respect to which information may be exchanged according to the first sentence of paragraph 1, or the oversight of the above. This means that the information may also be communicated to the taxpayer, his proxy or to the witnesses. This also means that information can be disclosed to governmental or judicial authorities charged with deciding whether such information should be released to the taxpayer, his proxy or to the witnesses. The information received by a Contracting State may be used by such persons or authorities only for the purposes mentioned in paragraph 2 Furthermore, information covered by paragraph 1, whether taxpayer-specific or not, should not be disclosed to persons or authorities not mentioned in paragraph 2, regardless of domestic information disclosure laws such as freedom of information or other legislation that allows greater access to governmental documents.

(Amended on 15 July 2005; see HISTORY)

12.1 Information can also be disclosed to oversight bodies. Such oversight bodies include authorities that supervise tax administration and enforcement authorities as part of the general administration of the Government of a Contracting State. In their bilateral negotiations, however, Contracting States may depart from this principle and agree to exclude the disclosure of information to such supervisory bodies.

(Amended on 15 July 2005; see HISTORY)

12.2 The information received by a Contracting State may not be disclosed to a third country unless there is an express provision in the bilateral treaty between the Contracting States allowing such disclosure.

(Added on 15 July 2005; see HISTORY)

12.3 Similarly, if the information appears to be of value to the receiving State for other purposes than those referred to in paragraph 12, that State may not use the information for such other purposes but it must resort to means specifically designed for those purposes (*e.g.* in case of a non-fiscal crime, to a treaty concerning judicial assistance). However, Contracting States may wish to allow the sharing of tax information by tax authorities with other law enforcement agencies and judicial authorities on certain high priority matters (*e.g.*, to combat money laundering, corruption, terrorism financing). Contracting States wishing to broaden the purposes for which they may use information exchanged under this Article may do so by adding the following text to the end of paragraph 2:

> Notwithstanding the foregoing, information received by a Contracting State may be used for other purposes when such information may be used for such other purposes under the laws of both States and the competent authority of the supplying State authorises such use.

(Added on 15 July 2005; see HISTORY)

13. As stated in paragraph 12, the information obtained can be communicated to the persons and authorities mentioned and on the basis of the last sentence of paragraph 2 of the Article can be disclosed by them in court sessions held in public or in decisions which reveal the name of the taxpayer. Once information is used in public court proceedings or in court decisions and thus rendered public, it is clear that from that moment such information can be quoted from the court files or decisions for other purposes even as possible evidence. But this does not mean that the persons and authorities mentioned in paragraph 2 are allowed to provide on request additional information received. If either or both of the Contracting States object to the information being made public by courts in this way, or, once the information has been made public in this way, to the information being used for other purposes, because this is not the normal procedure under their domestic laws, they should state this expressly in their convention.

(Amended on 15 July 2005; see HISTORY)

Paragraph 3

14. This paragraph contains certain limitations to the main rule in favour of the requested State. In the first place, the paragraph contains the clarification that a Contracting State is not bound to go beyond its own internal laws and administrative practice in putting information at the disposal of the other Contracting State. However, internal provisions concerning tax secrecy should not be interpreted as constituting an obstacle to the exchange of information under the present Article. As mentioned above, the authorities of the

requesting State are obliged to observe secrecy with regard to information received under this Article.

(Amended on 15 July 2005; see HISTORY)

14.1 Some countries' laws include procedures for notifying the person who provided the information and/or the taxpayer that is subject to the enquiry prior to the supply of information. Such notification procedures may be an important aspect of the rights provided under domestic law. They can help prevent mistakes (*e.g.* in cases of mistaken identity) and facilitate exchange (by allowing taxpayers who are notified to co-operate voluntarily with the tax authorities in the requesting State). Notification procedures should not, however, be applied in a manner that, in the particular circumstances of the request, would frustrate the efforts of the requesting State. In other words, they should not prevent or unduly delay effective exchange of information. For instance, notification procedures should permit exceptions from prior notification, *e.g.* in cases in which the information request is of a very urgent nature or the notification is likely to undermine the chance of success of the investigation conducted by the requesting State. A Contracting State that under its domestic law is required to notify the person who provided the information and/or the taxpayer that an exchange of information is proposed should inform its treaty partners in writing that it has this requirement and what the consequences are for its obligations in relation to mutual assistance. Such information should be provided to the other Contracting State when a convention is concluded and thereafter whenever the relevant rules are modified.

(Added on 15 July 2005; see HISTORY)

15. Furthermore, the requested State does not need to go so far as to carry out administrative measures that are not permitted under the laws or practice of the requesting State or to supply items of information that are not obtainable under the laws or in the normal course of administration of the requesting State. It follows that a Contracting State cannot take advantage of the information system of the other Contracting State if it is wider than its own system. Thus, a State may refuse to provide information where the requesting State would be precluded by law from obtaining or providing the information or where the requesting State's administrative practices (*e.g.* failure to provide sufficient administrative resources) result in a lack of reciprocity. However, it is recognised that too rigorous an application of the principle of reciprocity could frustrate effective exchange of information and that reciprocity should be interpreted in a broad and pragmatic manner. Different countries will necessarily have different mechanisms for obtaining and providing information. Variations in practices and procedures should not be used as a basis for denying a request unless the effect of these variations

would be to limit in a significant way the requesting State's overall ability to obtain and provide the information if the requesting State itself received a legitimate request from the requested State.

(Amended on 15 July 2005; see HISTORY)

15.1 The principle of reciprocity has no application where the legal system or administrative practice of only one country provides for a specific procedure. For instance, a country requested to provide information could not point to the absence of a ruling regime in the country requesting information and decline to provide information on a ruling it has granted, based on a reciprocity argument. Of course, where the requested information itself is not obtainable under the laws or in the normal course of the administrative practice of the requesting State, a requested State may decline such a request.

(Added on 15 July 2005; see HISTORY)

15.2 Most countries recognise under their domestic laws that information cannot be obtained from a person to the extent that such person can claim the privilege against self-incrimination. A requested State may, therefore, decline to provide information if the requesting State would have been precluded by its own self-incrimination rules from obtaining the information under similar circumstances. In practice, however, the privilege against self-incrimination should have little, if any, application in connection with most information requests. The privilege against self-incrimination is personal and cannot be claimed by an individual who himself is not at risk of criminal prosecution. The overwhelming majority of information requests seek to obtain information from third parties such as banks, intermediaries or the other party to a contract and not from the individual under investigation. Furthermore, the privilege against self-incrimination generally does not attach to persons other than natural persons.

(Added on 15 July 2005; see HISTORY)

16. Information is deemed to be obtainable in the normal course of administration if it is in the possession of the tax authorities or can be obtained by them in the normal procedure of tax determination, which may include special investigations or special examination of the business accounts kept by the taxpayer or other persons, provided that the tax authorities would make similar investigations or examinations for their own purposes.

(Amended on 15 July 2005; see HISTORY)

17. The requested State is at liberty to refuse to give information in the cases referred to in the paragraphs above. However if it does give the requested information, it remains within the framework of the agreement on the exchange of information which is laid down in the Convention; consequently

it cannot be objected that this State has failed to observe the obligation to secrecy.

18. If the structure of the information systems of two Contracting States is very different, the conditions under subparagraphs *a)* and *b)* of paragraph 3 will lead to the result that the Contracting States exchange very little information or perhaps none at all. In such a case, the Contracting States may find it appropriate to broaden the scope of the exchange of information.

(Amended on 15 July 2005; see HISTORY)

18.1 Unless otherwise agreed to by the Contracting States, it can be assumed that the requested information could be obtained by the requesting State in a similar situation if that State has not indicated to the contrary.

(Added on 15 July 2005; see HISTORY)

19. In addition to the limitations referred to above, subparagraph *c)* of paragraph 3 contains a reservation concerning the disclosure of certain secret information. Secrets mentioned in this subparagraph should not be taken in too wide a sense. Before invoking this provision, a Contracting State should carefully weigh if the interests of the taxpayer really justify its application. Otherwise it is clear that too wide an interpretation would in many cases render ineffective the exchange of information provided for in the Convention. The observations made in paragraph 17 above apply here as well. The requested State in protecting the interests of its taxpayers is given a certain discretion to refuse the requested information, but if it does supply the information deliberately the taxpayer cannot allege an infraction of the rules of secrecy.

(Amended on 15 July 2005; see HISTORY)

19.1 In its deliberations regarding the application of secrecy rules, the Contracting State should also take into account the confidentiality rules of paragraph 2 of the Article. The domestic laws and practices of the requesting State together with the obligations imposed under paragraph 2, may ensure that the information cannot be used for the types of unauthorised purposes against which the trade or other secrecy rules are intended to protect. Thus, a Contracting State may decide to supply the information where it finds that there is no reasonable basis for assuming that a taxpayer involved may suffer any adverse consequences incompatible with information exchange.

(Added on 15 July 2005; see HISTORY)

19.2 In most cases of information exchange no issue of trade, business or other secret will arise. A trade or business secret is generally understood to mean facts and circumstances that are of considerable economic importance and that can be exploited practically and the unauthorised use of which may

lead to serious damage (*e.g.* may lead to severe financial hardship). The determination, assessment or collection of taxes as such could not be considered to result in serious damage. Financial information, including books and records, does not by its nature constitute a trade, business or other secret. In certain limited cases, however, the disclosure of financial information might reveal a trade, business or other secret. For instance, a request for information on certain purchase records may raise such an issue if the disclosure of such information revealed the proprietary formula used in the manufacture of a product. The protection of such information may also extend to information in the possession of third persons. For instance, a bank might hold a pending patent application for safe keeping or a secret trade process or formula might be described in a loan application or in a contract held by a bank. In such circumstances, details of the trade, business or other secret should be excised from the documents and the remaining financial information exchanged accordingly.

(Added on 15 July 2005; see HISTORY)

19.3 A requested State may decline to disclose information relating to confidential communications between attorneys, solicitors or other admitted legal representatives in their role as such and their clients to the extent that the communications are protected from disclosure under domestic law. However, the scope of protection afforded to such confidential communications should be narrowly defined. Such protection does not attach to documents or records delivered to an attorney, solicitor or other admitted legal representative in an attempt to protect such documents or records from disclosure required by law. Also, information on the identity of a person such as a director or beneficial owner of a company is typically not protected as a confidential communication. Whilst the scope of protection afforded to confidential communications might differ among states, it should not be overly broad so as to hamper effective exchange of information. Communications between attorneys, solicitors or other admitted legal representatives and their clients are only confidential if, and to the extent that, such representatives act in their capacity as attorneys, solicitors or other admitted legal representatives and not in a different capacity, such as nominee shareholders, trustees, settlors, company directors or under a power of attorney to represent a company in its business affairs. An assertion that information is protected as a confidential communication between an attorney, solicitor or other admitted legal representative and its client should be adjudicated exclusively in the Contracting State under the laws of which it arises. Thus, it is not intended that the courts of the requested State should adjudicate claims based on the laws of the requesting State.

(Added on 15 July 2005; see HISTORY)

19.4 Contracting States wishing to refer expressly to the protection afforded to confidential communications between a client and an attorney, solicitor or other admitted legal representative may do so by adding the following text at the end of paragraph 3:

d) to obtain or provide information which would reveal confidential communications between a client and an attorney, solicitor or other admitted legal representative where such communications are:

(i) produced for the purposes of seeking or providing legal advice or

(ii) produced for the purposes of use in existing or contemplated legal proceedings.

(Added on 15 July 2005; see HISTORY)

19.5 paragraph 3 also includes a limitation with regard to information which concerns the vital interests of the State itself. To this end, it is stipulated that Contracting States do not have to supply information the disclosure of which would be contrary to public policy (ordre public). However, this limitation should only become relevant in extreme cases. For instance, such a case could arise if a tax investigation in the requesting State were motivated by political, racial, or religious persecution. The limitation may also be invoked where the information constitutes a state secret, for instance sensitive information held by secret services the disclosure of which would be contrary to the vital interests of the requested State. Thus, issues of public policy (ordre public) rarely arise in the context of information exchange between treaty partners.

(Added on 15 July 2005; see HISTORY)

Paragraph 4

19.6 paragraph 4 was added in 2005 to deal explicitly with the obligation to exchange information in situations where the requested information is not needed by the requested State for domestic tax purposes. Prior to the addition of paragraph 4 this obligation was not expressly stated in the Article, but was clearly evidenced by the practices followed by member countries which showed that, when collecting information requested by a treaty partner, Contracting States often use the special examining or investigative powers provided by their laws for purposes of levying their domestic taxes even though they do not themselves need the information for these purposes. This principle is also stated in the report Improving Access to Bank Information for Tax Purposes.[1]

(Added on 15 July 2005; see HISTORY)

1 OECD, Paris, 2000 (at paragraph 21 *b*).

19.7 According to paragraph 4, Contracting States must use their information gathering measures, even though invoked solely to provide information to the other Contracting State. The term “information gathering measures” means laws and administrative or judicial procedures that enable a Contracting State to obtain and provide the requested information.

(Added on 15 July 2005; see HISTORY)

19.8 The second sentence of paragraph 4 makes clear that the obligation contained in paragraph 4 is subject to the limitations of paragraph 3 but also provides that such limitations cannot be construed to form the basis for declining to supply information where a country’s laws or practices include a domestic tax interest requirement. Thus, whilst a requested State cannot invoke paragraph 3 and argue that under its domestic laws or practices it only supplies information in which it has an interest for its own tax purposes, it may, for instance, decline to supply the information to the extent that the provision of the information would disclose a trade secret.

(Added on 15 July 2005; see HISTORY)

19.9 For many countries the combination of paragraph 4 and their domestic law provide a sufficient basis for using their information gathering measures to obtain the requested information even in the absence of a domestic tax interest in the information. Other countries, however, may wish to clarify expressly in the convention that Contracting States must ensure that their competent authorities have the necessary powers to do so. Contracting States wishing to clarify this point may replace paragraph 4 with the following text:

> 4. In order to effectuate the exchange of information as provided in paragraph 1, each Contracting State shall take the necessary measures, including legislation, rule-making, or administrative arrangements, to ensure that its competent authority has sufficient powers under its domestic law to obtain information for the exchange of information regardless of whether that Contracting State may need such information for its own tax purposes.

(Added on 15 July 2005; see HISTORY)

Paragraph 5

19.10 paragraph 1 imposes a positive obligation on a Contracting State to exchange all types of information. paragraph 5 is intended to ensure that the limitations of paragraph 3 cannot be used to prevent the exchange of information held by banks, other financial institutions, nominees, agents and fiduciaries as well as ownership information. Whilst paragraph 5, which was added in 2005, represents a change in the structure of the Article 26 it should not be interpreted as suggesting that the previous version of the Article did

not authorise the exchange of such information. The vast majority of OECD member countries already exchanged such information under the previous version of the Article and the addition of paragraph 5 merely reflects current practice.

(Added on 15 July 2005; see HISTORY)

19.11 paragraph 5 stipulates that a Contracting State shall not decline to supply information to a treaty partner solely because the information is held by a bank or other financial institution. Thus, paragraph 5 overrides paragraph 3 to the extent that paragraph 3 would otherwise permit a requested Contracting State to decline to supply information on grounds of bank secrecy. The addition of this paragraph to the Article 26 reflects the international trend in this area as reflected in the Model Agreement on Exchange of Information on Tax Matters[1] and as described in the report, Improving Access to Bank Information for Tax Purposes.[2] In accordance with that report, access to information held by banks or other financial institutions may be by direct means or indirectly through a judicial or administrative process. The procedure for indirect access should not be so burdensome and time-consuming as to act as an impediment to access to bank information.

(Added on 15 July 2005; see HISTORY)

19.12 paragraph 5 also provides that a Contracting State shall not decline to supply information solely because the information is held by persons acting in an agency or fiduciary capacity. For instance, if a Contracting State had a law under which all information held by a fiduciary was treated as a "professional secret" merely because it was held by a fiduciary, such State could not use such law as a basis for declining to provide the information to the other Contracting State. A person is generally said to act in a "fiduciary capacity" when the business which the person transacts, or the money or property which the person handles, is not its own or for its own benefit, but for the benefit of another person as to whom the fiduciary stands in a relation implying and necessitating confidence and trust on the one part and good faith on the other part, such as a trustee. The term "agency" is very broad and includes all forms of corporate service providers (e.g. company formation agents, trust companies, registered agents, lawyers).

(Added on 15 July 2005; see HISTORY)

19.13 Finally, paragraph 5 states that a Contracting State shall not decline to supply information solely because it relates to an ownership interest in a person, including companies and partnerships, foundations or similar

1 OECD, Paris, 2000. Available on *www.oecd.org/taxation*.
2 OECD, Paris, 2000.

organisational structures. Information requests cannot be declined merely because domestic laws or practices may treat ownership information as a trade or other secret.

(Added on 15 July 2005; see HISTORY)

19.14 paragraph 5 does not preclude a Contracting State from invoking paragraph 3 to refuse to supply information held by a bank, financial institution, a person acting in an agency or fiduciary capacity or information relating to ownership interests. However, such refusal must be based on reasons unrelated to the person's status as a bank, financial institution, agent, fiduciary or nominee, or the fact that the information relates to ownership interests. For instance, a legal representative acting for a client may be acting in an agency capacity but for any information protected as a confidential communication between attorneys, solicitors or other admitted legal representatives and their clients, paragraph 3 continues to provide a possible basis for declining to supply the information.

(Added on 15 July 2005; see HISTORY)

19.15 The following examples illustrate the application of paragraph 5:

a) Company X owns a majority of the stock in a subsidiary company Y, and both companies are incorporated under the laws of State A. State B is conducting a tax examination of business operations of company Y in State B. In the course of this examination the question of both direct and indirect ownership in company Y becomes relevant and State B makes a request to State A for ownership information of any person in company Y's chain of ownership. In its reply State A should provide to State B ownership information for both company X and Y.

b) An individual subject to tax in State A maintains a bank account with Bank B in State B. State A is examining the income tax return of the individual and makes a request to State B for all bank account income and asset information held by Bank B in order to determine whether there were deposits of untaxed earned income. State B should provide the requested bank information to State A.

HISTORY

Title: Amended, by inserting the word "THE", when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title read as follows:

"COMMENTARY ON ARTICLE 26 CONCERNING EXCHANGE OF INFORMATION"

Paragraph 1: Replaced together with the preceding heading when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on the adoption of the 1977 Model Convention, paragraph 1 and the preceding heading read as follows:

"I. GENERAL OBSERVATIONS

1. The application of a Convention for the avoidance of double taxation implies a cooperation between the tax administrations of the two Contracting States which may be more or less close according to the circumstances. An obvious instance is the administrative assistance in particular cases for purposes of ascertaining the facts in relation to which the national tax legislation and the rules of the Convention are to be applied. The present Article embodies the rules according to which information may be exchanged with a view to laying the proper basis for a taxation under the Convention."

Paragraph 2: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). In the 1977 Model Convention and until 15 July 2005, paragraph 2 read as follows:

"2. Therefore the present Article embodies the rules under which information may be exchanged to the widest possible extent, with a view to laying the proper basis for the implementation of the domestic laws of the Contracting States concerning taxes covered by the Convention and for the application of specific provisions of the Convention. The text of the Article makes it clear that the exchange of information is not restricted by Article 1, so that the information may include particulars about non-residents."

Paragraph 2 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 2 of the 1963 Draft Convention was amended and renumbered as paragraph 3 (see history of paragraph 3) and a new paragraph 2 was added.

Paragraph 3: Replaced on 15 July 2005 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 3 read as follows:

"3. The matter of administrative assistance for the purpose of tax collection is not dealt with in the Article. This matter is dealt with in the Convention on Mutual Administrative Assistance in Tax Matters, a multilateral convention that entered into force on 1 April 1995. This Convention was drawn up within the Council of Europe on the basis of a first draft prepared by the Committee on Fiscal Affairs and is open to the signature of the member States of the Council of Europe and member countries of the OECD. This matter can also form the subject of a separate bilateral agreement that can be negotiated between the Contracting States on the basis of the Model Convention for Mutual Administrative Assistance in the Recovery of Tax Claims adopted by the Committee on Fiscal Affairs on 29 June 1979; alternatively, provisions on assistance in the field of tax collection may be introduced in a double taxation convention, whenever Contracting States find it preferable."

Paragraph 3 was amended on 21 September 1995, by replacing the words "which was opened for signature on 25 January 1988" with the words "that entered into force on 1 April 1995", by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 3 read as follows:

"3. The matter of administrative assistance for the purpose of tax collection is not dealt with in the Article. This matter is dealt with in the Convention on Mutual Administrative Assistance in Tax Matters, a multilateral convention which was opened for signature on 25 January 1988. This Convention was drawn up within the Council of Europe on the basis of a first draft prepared by the Committee on Fiscal Affairs and is open to the signature of the member States of the Council of Europe and member countries of the OECD. This matter can also form the subject of a separate bilateral agreement that can be negotiated between the Contracting States on the basis of the Model Convention for Mutual Administrative Assistance in the Recovery of Tax Claims adopted by the Committee on Fiscal Affairs on 29 June 1979; alternatively, provisions on assistance in the field of tax collection may be introduced in a double taxation convention, whenever Contracting States find it preferable."

Paragraph 3 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 3 read as follows:

"3. The matter of administrative assistance for the purpose of tax collection is not dealt with in the Article. This matter often forms the subject of a separate agreement, whether bilateral or multilateral, between the Contracting States; alternatively, the provisions on assistance in the field of tax collection may be introduced in the double taxation convention, whenever Contracting States find it preferable."

Paragraph 3 of the 1977 Model Convention corresponded to paragraph 2 of the 1963 Draft Convention. Paragraph 3 of the 1963 Draft Convention was amended and renumbered as paragraph 5 (see history of paragraph 5) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 2 of the 1963 Draft Convention was amended and renumbered as paragraph 3 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. The matter of administrative assistance for the purpose of tax collection is not dealt with in the Article. This matter often forms the subject of a separate bilateral agreement between the Contracting States; alternatively, the provisions

on assistance in the field of tax collection may be introduced in the double taxation Convention, whenever this is found preferable."

Paragraph 4: Replaced on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 23 July 1992 and until 15 July 2005, paragraph 4 read as follows:

"4. Experience between 1963 and 1977 had shown that the text of the Article in the 1963 Draft Convention left room for differing interpretations. Therefore it was felt desirable to clarify its meaning in the 1977 Model Convention by a change in the wording of the Article and its Commentary without altering its effects. Apart from a single point of substance (see paragraph 13 below) the main purpose of the changes made has been to remove grounds for divergent interpretations."

Paragraph 4 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 4 read as follows:

"4. Experience in recent years has shown that the text of the Article in the 1963 Draft Convention left room for differing interpretations. Therefore it was felt desirable to clarify its meaning by a change in the wording of the Article and its Commentary without altering its effects. Apart from a single point of substance (see paragraph 13 below) the main purpose of the changes made has been to remove grounds for divergent interpretations."

Paragraph 4 of the 1977 Model Convention replaced paragraph 4 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 4 read as follows:

"4. The following examples may illustrate the principle dealt with in paragraph 3 above. Thus, when applying the provisions of Article 12 on the taxation of royalties the competent authority of the State where the recipient is resident may find it necessary to request information from the competent authority of the State where the payer is resident, concerning the amount of royalty transmitted by the payer to the recipient. And vice versa, in determining the taxation of the payer, the competent authority of the State of the payer's residence may have occasion to inquire, officially, about the identity of the recipient and if there exist between the payer and the recipient special relations which may be of relevance for the tax treatment. For this purpose, certain information is sometimes also of importance, such as information on prices quoted between two enterprises situated in two different Contracting States or between a permanent establishment in one country and its head office in another country. Generally, the exchange of information in this field will be needed with a view to properly allocating taxable profits between two associated enterprises or adjusting the amounts of profits shown in the accounts of a permanent establishment and in the accounts of its head office. As a further typical example reference may be made to the information necessary for the application of Article 23(A) and 23(B) on the methods for the avoidance of double taxation."

Paragraph 4.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 4.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of

another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 5: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 29 April 2000 and until 15 July 2005, paragraph 5 read as follows:

> "5. The main rule concerning the exchange of information is contained in the first sentence of the paragraph. The competent authorities of the Contracting States shall exchange such information as is necessary to secure the correct application of the provisions of the Convention or of the domestic laws of the Contracting States concerning taxes of every kind and description imposed in these States even if, in the latter case, a particular Article of the Convention need not be applied. Some countries replace "necessary" with "relevant" in their bilateral conventions, regarding this as a better way to express the sense of the provision; in the view of the Committee on Fiscal Affairs, either word may be used in that context. In order to keep the exchange of information within the framework of the Convention, a limitation to the exchange of information is set so that information should be given only insofar as the taxation under the domestic taxation laws concerned is not contrary to the Convention."

Paragraph 5 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 5 read as follows:

> "5. The main rule concerning the exchange of information is contained in the first sentence of the paragraph. The competent authorities of the Contracting States shall exchange such information as is necessary to secure the correct application of the provisions of the Convention or of the domestic laws of the Contracting States concerning taxes covered by the Convention even if, in the latter case, a particular Article of the Convention need not be applied. Some countries replace "necessary" with "relevant" in their bilateral conventions, regarding this as a better way to express the sense of the provision; in the view of the Committee on Fiscal Affairs, either word may be used in that context. In order to keep the exchange of information within the framework of the Convention, a limitation to the exchange of information is set so that information should be given only insofar as the national tax in question is covered by the Convention and the taxation under the domestic taxation laws concerned is not contrary to the Convention. An illustration may be cited in this connection: a request for information concerning the imposition of a sales tax need not be complied with by the requested State as it is not covered by the Convention."

Paragraph 5 was previously amended on 23 October 1997, by adding the third sentence, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. In the 1977 Model Convention and until 23 October 1997, paragraph 5 read as follows:

> "5. The main rule concerning the exchange of information is contained in the first sentence of the paragraph. The competent authorities of the Contracting States shall exchange such information as is necessary to secure the correct application of the provisions of the Convention or of the domestic laws of the Contracting States concerning taxes covered by the Convention even if, in the latter case, a particular Article of the Convention need not be applied. In order to keep the exchange of information within the framework of the Convention, a limitation to the exchange of information is set so that information should be given only

insofar as the national tax in question is covered by the Convention and the taxation under the domestic taxation laws concerned is not contrary to the Convention. An illustration may be cited in this connection: a request for information concerning the imposition of a sales tax need not be complied with by the requested State as it is not covered by the Convention."

Paragraph 5 of the 1977 Model Convention corresponded to paragraph 3 of the 1963 Draft Convention. Paragraph 5 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 3 of the 1963 Draft Convention was amended and renumbered as paragraph 5 and the preceding headings were amended and moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 and the preceding headings read as follows:

"II. COMMENTARY ON THE DRAFT ARTICLE

Paragraph 1

3. The main rule concerning the exchange of information is contained in the first sentence of the paragraph. It is stipulated that the competent authorities of the Contracting States shall exchange such information as is necessary in order to secure the correct application of the articles of the Convention and also of the internal laws of the Contracting States concerning taxes covered by the Convention. In order to keep the exchange of information within the framework of the Convention, a limitation to the compulsory exchange of information is set so that information should be given only insofar as the national tax in question is covered by the Convention and the taxation under the national tax law concerned is in accordance with the Convention."

Paragraph 5 of the 1963 Draft Convention, until it was deleted when the 1977 Model Convention was adopted, read as follows:

"5. As was indicated in paragraph 3 above, the obligation to furnish information does not extend to the case where the national tax law concerned is not covered by or is contrary to the Convention. An illustration may be cited in this connection *e.g.* information for the purposes of the imposition of an extra-ordinary tax on capital appreciation with respect to which a given Convention is not applicable."

Paragraph 5.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 5.2: Corresponds to paragraph 11.2 as it read before 15 July 2005. Paragraph 11.2 was amended and renumbered as paragraph 5.2 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 29 April 2000 and until 15 July 2005, paragraph 11.2 read as follows:

"11.2 Since the exchange of information concerning the application of custom duties is governed by other international conventions, the provisions of these more specialised conventions will generally prevail and the exchange of information concerning custom duties will not, in practice, be governed by the Article."

Paragraph 11.2 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 6: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council

on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 6 read as follows:

> "6. It should be noticed that the main rule on exchange of information is applicable in many cases where information is required for the prevention of fiscal fraud or fiscal evasion. The Contracting States should be free, however, to agree bilaterally on special provisions intended to prevent fiscal fraud or evasion of tax."

Paragraph 7: Amended on 22 July 2010, by revising subparagraph *c)*, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 7 read as follows:

> "7. Application of the Convention
>
> *a)* When applying Article 12, State A where the beneficiary is resident asks State B where the payer is resident, for information concerning the amount of royalty transmitted.
>
> *b)* Conversely, in order to grant the exemption provided for in Article 12, State B asks State A whether the recipient of the amounts paid is in fact a resident of the last-mentioned State and the beneficial owner of the royalties.
>
> *c)* Similarly, information may be needed with a view to the proper allocation of taxable profits between associated companies in different States or the adjustment of the profits shown in the accounts of a permanent establishment in one State and in the accounts of the head office in the other State (Articles 7, 9, 23 A and 23 B).
>
> *d)* Information may be needed for the purposes of applying Article 25.
>
> *e)* When applying Articles 15 and 23 A, State A, where the employee is resident, informs State B, where the employment is exercised for more than 183 days, of the amount exempted from taxation in State A."

Paragraph 7 was previously amended on 15 July 2005, by adding subparagraphs *d)* and *e)* by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). In the 1977 Model Convention and until 15 July 2005, paragraph 7 read as follows:

> "7. Application of the Convention
>
> *a)* When applying Article 12, State A where the beneficiary is resident asks State B where the payer is resident, for information concerning the amount of royalty transmitted.
>
> *b)* Conversely, in order to grant the exemption provided for in Article 12, State B asks State A whether the recipient of the amounts paid is in fact a resident of the last-mentioned State and the beneficial owner of the royalties.
>
> *c)* Similarly, information may be needed with a view to the proper allocation of taxable profits between associated companies in different States or the adjustment of the profits shown in the accounts of a permanent establishment in one State and in the accounts of the head office in the other State (Articles 7, 9, 23 A and 23 B)."

Paragraph 7 of the 1977 Model Convention replaced paragraph 7 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 7 read as follows:

"7. The rule laid down in paragraph 1 of the Article presupposes that information shall be exchanged only on application. Obviously, the regular sources of information available to the responsible tax authority under the internal taxation procedure should be relied upon in the first place. Assistance under the present Article would therefore normally be requested when, in a particular case, the information obtained from the regularly available sources is insufficient or is in need of corroboration. In general, requests for assistance from the authorities of the co-Contracting State would have to be restricted to particulars which are required in connection with the examination of specific tax cases. Wide-ranging requests for information, concerning for example all payments of royalty made from one Contracting State to residents of the requiring State might, if the information is at all available, entail administrative difficulties and should be subjected to special agreements between the Contracting States."

Paragraph 8: Amended on 15 July 2005, by adding subparagraph *d)*, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). In the 1977 Model Convention and until 15 July 2005, paragraph 8 read as follows:

"8. Implementation of the domestic laws

a) A company in State A supplies goods to an independent company in State B. State A wishes to know from State B what price the company in State B paid for the goods with a view to a correct application of the provisions of its domestic laws.

b) A company in State A sells goods through a company in State C (possibly a low-tax country) to a company in State B. The companies may or may not be associated. There is no convention between State A and State C, nor between State B and State C. Under the convention between A and B, State A, with a view to ensuring the correct application of the provisions of its domestic laws to the profits made by the company situated in its territory, asks State B what price the company in State B paid for the goods.

c) State A, for the purpose of taxing a company situated in its territory, asks State B, under the convention between A and B, for information about the prices charged by a company in State B, or a group of companies in State B with which the company in State A has no business contacts in order to enable it to check the prices charged by the company in State A by direct comparison (*e.g.* prices charged by a company or a group of companies in a dominant position). It should be borne in mind that the exchange of information in this case might be a difficult and delicate matter owing in particular to the provisions of subparagraph *c)* of paragraph 2 relating to business and other secrets."

Paragraph 8 of the 1977 Model Convention replaced paragraph 8 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 8 read as follows:

"8. A number of existing Conventions provide for a scheme of regular and automatic exchange of certain categories of information for taxation purposes. Such an arrangement may be adopted bilaterally by Member countries; it will then be necessary to list the items of information which shall be transmitted by the competent authorities."

Paragraph 9: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of

another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 29 April 2000 and until 15 July 2005, paragraph 9 read as follows:

> "9. The rule laid down in paragraph 1 allows information to be exchanged in three different ways:
>
> *a)* on request, with a special case in mind, it being understood that the regular sources of information available under the internal taxation procedure should be relied upon in the first place before request for information is made to the other State;
>
> *b)* automatically, for example when information about one or various categories of income having their source in one Contracting State and received in the other Contracting State is transmitted systematically to the other State (see the OECD Council Recommendation C(81)39, dated 5 May 1981, entitled "Recommendation of the Council concerning a standardised form for automatic exchanges of information under international tax agreements" and the OECD Council Recommendation C(92)50, dated 23 July 1992, entitled "Recommendation of the Council concerning a standard magnetic format for automatic exchange of tax information");[1]
>
> *c)* spontaneously, for example in the case of a State having acquired through certain investigations, information which it supposes to be of interest to the other State.
>
> 1 These two recommendations are reproduced and discussed in *Tax Information Exchange between OECD Member Countries: A Survey of Current Practices*, OECD, Paris, 1994."

Subparagraph *b)* was amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 21 September 1995 and until 29 April 2000, subparagraph *b)* read as follows:

> *"b)* automatically, for example when information about one or various categories of income having their source in one Contracting State and received in the other Contracting State is transmitted systematically to the other State (see OECD Council Recommendation C(81)39/Final (5 May 1981) ("Recommendation of the Council Concerning a Standardised Form for Automatic Exchanges of Information under International Tax Agreements") and OECD Council Recommendation C(92)50/Final (23 July 1992) ("Recommendation of the Council Concerning a Standard Magnetic Format for Automatic Exchange of Tax Information"), both of which are discussed in "Tax Information Exchange Between OECD Member Countries: A Survey of Current Practices", OECD, Paris, 1994);"

Subparagraph *b)* was been previously amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, subparagraph *b* read as follows:

> *"b)* automatically, for example when information about one or various categories of income having their source in one Contracting State and received in the other Contracting State is transmitted systematically to the other State;"

Paragraph 9 of the 1977 Model Convention replaced paragraph 9 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 9 read as follows:

"9. The obligation to treat as secret the information which is received under the present Article applies to all authorities of the Contracting State, including those which are empowered with the jurisdiction of disputes as to tax liabilities. In this connection, and to the extent required or permitted by the constitutional procedures and judicial organisation of certain States, special measures may be taken to safeguard the secrecy of such information if it is used in the course of court proceedings. Of course, the Contracting States are free to agree bilaterally that such information may be used in public court proceedings. To this end, the last sentence of paragraph 1 of the Article may be drafted as follows:

> "Any information so exchanged shall be treated as secret and shall not be disclosed to any persons or authorities other than those concerned with the assessment, including judicial determination, or collection of the taxes which are the subject of this Convention.""

Paragraph 9.1: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 29 April 2000 and until 15 July 2005, paragraph 9.1 read as follows:

"9.1 These three forms of exchange (on request, automatic and spontaneous) may also be combined. It should also be stressed that the Article does not restrict the possibilities of exchanging information to these methods and that the Contracting States may use other techniques to obtain information which may be relevant to both Contracting States such as simultaneous examinations, tax examinations abroad and industry-wide exchange of information. These techniques are fully described in the publication *Tax Information Exchange between OECD Member Countries: A Survey of Current Practices*[2] and can be summarised as follows:

- — a simultaneous examination is an arrangement between two or more parties to examine simultaneously each in its own territory, the tax affairs of (a) taxpayer (s) in which they have a common or related interest, with a view of exchanging any relevant information which they so obtain (see the OECD Council Recommendation C(92)81, dated 23 July 1992, on an OECD Model agreement for the undertaking of simultaneous examinations);
- — a tax examination abroad allows for the possibility to obtain information through the presence of representatives of the competent authority of the requesting Contracting. This type of assistance is granted on a reciprocal basis. Countries' laws and practices differ as to the scope of rights granted to foreign tax officials. For instance, there are States where a foreign tax official will be prevented from any active participation in an investigation or examination on the territory of a country; there are also States where such participation is only possible with the taxpayer's consent;
- — an industry-wide exchange of information is the exchange of tax information especially concerning a whole economic sector (*e.g.* the oil or pharmaceutical industry, the banking sector, etc.) and not taxpayers in particular.

2 Id."

C (26)

Paragraph 9.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 10: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). In the 1977 Model Convention and until 15 July 2005, paragraph 10 read as follows:

> "10. The manner in which the exchange of information agreed to in the Convention will finally be effected can be decided upon by the competent authorities of the Contracting States."

Paragraph 10 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 10 of the 1963 Draft Convention was amended and renumbered as paragraph 14 (see history of paragraph 14), the preceding heading was moved with it and a new paragraph 10 was added.

Paragraph 10.1: Corresponds to paragraph 11.1 as it read before 15 July 2005. Paragraph 11.1 was amended and renumbered as paragraph 10.1 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 29 April 2000 and until 15 July 2005, paragraph 11.1 read as follows:

> "11.1 Before 2000, the paragraph only authorised the exchange of information, and the use of the information exchanged, in relation to the taxes covered by the Convention under the general rules of Article 2. As drafted, the paragraph did not oblige the requested State to comply with a request for information concerning the imposition of a sales tax as such a tax was not covered by the Convention. The paragraph was then amended so as to apply to the exchange of information concerning any tax imposed on behalf of the Contracting States, or of their political subdivisions or local authorities, and to allow the use of the information exchanged for purposes of the application of all such taxes. Some Contracting States may not, however, be in a position to exchange information, or to use the information obtained from a treaty partner, in relation to taxes that are not covered by the Convention under the general rules of Article 2. Such States are free to restrict the scope of paragraph 1 of Article 26 by adopting bilaterally the following previous wording of the paragraph:
>
> > "1. The competent authorities of the Contracting States shall exchange such information as is necessary for carrying out the provisions of this Convention or of the domestic laws of the Contracting States concerning taxes covered by the Convention insofar as the taxation thereunder is not contrary to the Convention. The exchange of information is not restricted by Article 1. Any information received by a Contracting State shall be treated as secret in the same manner as information obtained under the domestic laws of that State and shall be disclosed only to persons or authorities (including courts and administrative bodies) concerned with the assessment or collection of, the enforcement or prosecution in respect of, or the determination of appeals in relation to, the taxes covered by the Convention. Such persons or authorities shall use the information only for such purposes. They may disclose the information in public court proceedings or in judicial decisions."

Paragraph 11.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 10.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 10.3: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of

another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 11: Amended on 15 July 2005. Paragraph 11 was amended and the heading preceding it was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). In the 1977 Model Convention and until 15 July 2005, paragraph 11 read as follows:

> "11. Reciprocal assistance between tax administrations is feasible only if each administration is assured that the other administration will treat with proper confidence the information which it will receive in the course of their co-operation. At the same time maintenance of such secrecy in the receiving Contracting State is a matter of domestic laws. It is therefore provided in paragraph 1 that information communicated under the provisions of the Convention shall be treated as secret in the receiving State in the same manner as information obtained under the domestic laws of that State. Sanctions for the violation of such secrecy in that State will be governed by the administrative and penal laws of that State."

Paragraph 11 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 11 of the 1963 Draft Convention was amended and renumbered as paragraph 15 (see history of paragraph 15) and a new paragraph 11 was added.

Paragraph 11.1: Paragraph 11.1 as it read before 15 July 2005 was renumbered as paragraph 10.1 (see history of paragraph 10.1) on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 11.2: Paragraph 11.2 as it read before 15 July 2005 was renumbered as paragraph 5.2 (see history of paragraph 5.2) by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 12: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 29 April 2000 and until 15 July 2005, paragraph 12 read as follows:

> "12. The information obtained may be disclosed only to persons and authorities involved in the assessment or collection of, the enforcement or prosecution in respect of, or the determination of appeals in relation to the taxes with respect to which information may be exchanged according to the first sentence of the paragraph. This means that the information may also be communicated to the taxpayer, his proxy or to the witnesses. The information received by a Contracting State may be used by such persons or authorities only for the purposes mentioned in paragraph 1. If the information appears to be of value to the receiving State for other purposes than those referred to, that State may not use the information for such other purposes but it must resort to means specially designed for those purposes (*e.g.* in case of a non-fiscal crime, to a treaty concerning judicial assistance)."

Paragraph 12 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal

Affairs on 29 April 2000. In the 1977 Model Convention and until 29 April 2000, paragraph 12 read as follows:

> "12. The information obtained may be disclosed only to persons and authorities involved in the assessment or collection of, the enforcement or prosecution in respect of, or the determination of appeals in relation to, the taxes covered by the Convention. This means that the information may also be communicated to the taxpayer, his proxy or to the witnesses. The information received by a Contracting State may be used by such persons or authorities only for the purposes mentioned in paragraph 1. If the information appears to be of value to the receiving State for other purposes than those referred to, that State may not use the information for such other purposes but it must resort to means specially designed for those purposes (*e.g.* in case of a non-fiscal crime, to a treaty concerning judicial assistance)."

Paragraph 12 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 12 of the 1963 Draft Convention was amended and renumbered as paragraph 16 (see history of paragraph 16) and a new paragraph 12 was added.

Paragraph 12.1: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 21 September 1995 and until 15 July 2005, paragraph 12.1 read as follows:

> "12.1 Under this Article, information may not be disclosed to authorities that supervise the general administration of the Government of a Contracting State, but are not involved specifically in tax matters. In their bilateral negotiations, however, member countries may agree to provide for disclosure to such supervisory bodies."

Paragraph 12.1 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 12.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 12.3: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 13: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). In the 1977 Model Convention and until 15 July 2005, paragraph 13 read as follows:

> "13. As stated above, the information obtained can be communicated to the persons and authorities mentioned but it does not follow from this that it can be disclosed by them in court sessions held in public or in decisions which reveal the name of the taxpayer. The last sentence of the paragraph, however, opens up this possibility. Once information is used in public court proceedings or in court decisions and thus rendered public, it is clear that from that moment such information can be quoted from the court files or decisions for other purposes even as possible evidence. But this does not mean that the persons and authorities mentioned in paragraph 1 are allowed to provide on request additional

information received. If either or both of the Contracting States object to the information being made public by courts in this way, or, once the information has been made public in this way, to the information being used for other purposes, because this is not the normal procedure under their domestic laws, they should state this expressly in their convention."

Paragraph 13 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 13 of the 1963 Draft Convention was amended and renumbered as paragraph 19 (see history of paragraph 19) and a new paragraph 13 was added.

Paragraph 14: On 15 July 2005, paragraph 14 and the heading preceding it were amended by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 21 September 1995 and until 15 July 2005, paragraph 14 and the heading preceding it read as follows:

"Paragraph 2

14. This paragraph contains certain limitations to the main rule in favour of the requested State. In the first place, the paragraph contains the clarification that a Contracting State is not bound to go beyond its own internal laws and administrative practice in putting information at the disposal of the other Contracting State. However, types of administrative measures authorised for the purpose of the requested State's tax must be utilised, even though invoked solely to provide information to the other Contracting State. Likewise, internal provisions concerning tax secrecy should not be interpreted as constituting an obstacle to the exchange of information under the present Article. As mentioned above, the authorities of the requesting State are obliged to observe secrecy with regard to information received under this Article. A Contracting State that under its domestic law is required to notify the taxpayer that an exchange of information is proposed should inform its treaty partners in writing that it has this requirement and what the consequences are for its obligations in relation to mutual assistance."

Paragraph 14 was previously amended on 21 September 1995, by adding the last sentence, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 14 read as follows:

"14. This paragraph contains certain limitations to the main rule in favour of the requested State. In the first place, the paragraph contains the clarification that a Contracting State is not bound to go beyond its own internal laws and administrative practice in putting information at the disposal of the other Contracting State. However, types of administrative measures authorised for the purpose of the requested State's tax must be utilised, even though invoked solely to provide information to the other Contracting State. Likewise, internal provisions concerning tax secrecy should not be interpreted as constituting an obstacle to the exchange of information under the present Article. As mentioned above, the authorities of the requesting State are obliged to observe secrecy with regard to information received under this Article. As mentioned above, the authorities of the requesting State are obliged to observe secrecy with regard to information received under this Article."

Paragraph 14 of the 1977 Model Convention corresponded to paragraph 10 of the 1963 Draft Convention. Paragraph 14 of the 1963 Draft Convention was amended and renumbered as paragraph 23 (see history of paragraph 24) and the heading preceding paragraph 14 was moved immediately before paragraph 22 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time

paragraph 10 of the 1963 Draft Convention was amended and renumbered as paragraph 14 of the 1977 Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 10 read as follows:

> "10. This paragraph embodies certain limitations to the main rule. In the first place, the paragraph contains the clarification that a Contracting State is not bound to go beyond its own internal laws and administrative practice in putting information at the disposal of another Contracting State. In this connection, the internal provisions concerning tax secrecy should not be interpreted as constituting an obstacle to the exchange of information under the present Article. As was mentioned above, the authorities of a Contracting State are obliged to observe secrecy with regard to information received under this Article."

Paragraph 14.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 15: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). In the 1977 Model Convention and until 15 July 2005, paragraph 15 read as follows:

> "15. Furthermore, the requested State does not need to go so far as to carry out administrative measures that are not permitted under the laws or practice of the requesting State or to supply items of information that are not obtainable under the laws or in the normal course of administration of the requesting State. It follows that a Contracting State cannot take advantage of the information system of the other Contracting State if it is wider than its own system."

Paragraph 15 of the 1977 Model Convention corresponded to paragraph 11 of the 1963 Draft Convention. Paragraph 11 of the 1963 Draft Convention was amended and renumbered as paragraph 15 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 11 read as follows:

> "11. Furthermore, since the main rule on exchange of information is based on the general principle of reciprocity, a Contracting State is not obliged to carry out administrative measures that are not permitted under the laws or practice of the requiring State or to supply items of information that are not obtainable under the laws or in the normal course of administration of the requiring State. It follows that a Contracting State cannot take advantage of the information system of the other Contracting State if it is wider than its own system. On the other side, if the structure of the information systems of two Contracting States is very different, the conditions under sub-paragraphs a) and b) will allow the Contracting States to exchange very little information or perhaps none at all. In such a case, the Contracting States may find it appropriate to modify the principle of reciprocity by means of an understanding reached on the basis of Article 25 on mutual agreement procedure."

Paragraph 15.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 15.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of

another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 16: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 28 January 2003 and until 15 July 2005, paragraph 16 read as follows:

> "16. Information is deemed to be obtainable in the normal course of administration if it is in the possession of the tax authorities or can be obtained by them in the normal procedure of tax determination, which may include special investigations or special examination of the business accounts kept by the taxpayer or other persons, provided that the tax authorities would make similar investigations or examinations for their own purposes. This means that the requested State has to collect the information the other State needs in the same way as if its own taxation was involved, under the proviso mentioned in paragraph 15 above. This obligation is clearly evidenced by the practices followed by member countries which show that, when collecting information requested by a treaty partner, Contracting States often use the special examining or investigative powers provided by their laws for purposes of the application of their domestic taxes even though they do not themselves need the information for applying these taxes."

Paragraph 16 was previously amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 16 read as follows:

> "16. Information is deemed to be obtainable in the normal course of administration if it is in the possession of the tax authorities or can be obtained by them in the normal procedure of tax determination, which may include special investigations or special examination of the business accounts kept by the taxpayer or other persons, provided that the tax authorities would make similar investigations or examination for their own purposes. This means that the requested State has to collect the information the other State needs in the same way as if its own taxation was involved, under the proviso mentioned in paragraph 15 above."

Paragraph 16 of the 1977 Model Convention corresponded to paragraph 12 of the 1963 Draft Convention. Paragraph 12 of the 1963 Draft Convention was amended and renumbered as paragraph 16 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 12 read as follows:

> "12. Information is deemed to be obtainable in the normal course of administration if it is in the possession of the tax authorities or can be obtained by them in the normal procedure of tax determination, but not if it cannot be obtained without special investigations or special examination of the business accounts kept by the taxpayer or other persons."

Paragraph 17: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 18: Amended on 15 July 2005, by changing the cross-reference to paragraph 2, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD

Committee on Fiscal Affairs on 1 June 2004). In the 1977 Model Convention and until 15 July 2005, paragraph 18 read as follows:

> "18. If the structure of the information systems of two Contracting States is very different, the conditions under subparagraphs *a)* and *b)* of paragraph 2 will lead to the result that the Contracting States exchange very little information or perhaps none at all. In such a case, the Contracting States may find it appropriate to broaden the scope of the exchange of information."

Paragraph 18 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 18.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). In the 1977 Model Convention and until 15 July 2005, paragraph 19 read as follows:

> "19. In addition to the limitations referred to above, subparagraph *c)* of paragraph 2 contains a reservation concerning the disclosure of certain secret information. Secrets mentioned in this subparagraph should not be taken in too wide a sense. Before invoking this provision, a Contracting State should carefully weigh if the interests of the taxpayer really justify its application. Otherwise it is clear that too wide an interpretation would in many cases render ineffective the exchange of information provided for in the Convention. The observations made in paragraph 17 above apply here as well. The requested State in protecting the interests of its taxpayers is given a certain discretion to refuse the requested information, but if it does supply the information deliberately the taxpayer cannot allege an infraction of the rules of secrecy. It is open to the Contracting States to add further dispensations from the obligation to supply information to the items listed in subparagraph *c)*, for example, information protected by provisions on banker's discretion. It has been felt necessary also to prescribe a limitation with regard to information which concerns the vital interests of the State itself. To this end, it is stipulated that Contracting States do not have to supply information the disclosure of which would be contrary to public policy (*ordre public*)."

Paragraph 19 of the 1977 Model Convention corresponded to paragraph 13 of the 1963 Draft Convention. Paragraph 13 of the 1963 Draft Convention was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 13 read as follows:

> "13. In addition to the limitations refereed to above, sub-paragraph c) of paragraph 2 contains a reservation concerning the disclosure of certain secret information. Already under the internal laws of many Member States the access to or the supplying of certain information is prohibited and it has been considered desirable to make explicit mention in the Article of this kind of limitation. It is open to Contracting States to add further dispensations form the obligation to supply information to the items listed in subparagraph c), for example information protected by provisions on banker's discretion. It has been felt necessary also to prescribe a limitation with regard to information which concerns the vital interests of the State itself. To this end, it is stipulated that Contracting States do not have to

supply information the disclosure of which would be contrary, to public policy (ordre public)."

Paragraph 19.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.3: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.4: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.5: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.6: Added on 15 July 2005, together with the heading preceding it, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.7: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.8: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.9: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.10: Added on 15 July 2005, together with the heading preceding it, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.11: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.12: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of

another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.13: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.14: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 19.15: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 20: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. In the 1977 Model Convention and until 22 July 2010, paragraph 20 read as follows:

> "20. *Japan* wishes to indicate that with respect to paragraph 11 above, it would be difficult for Japan, in view of its strict domestic laws and administrative practice as to the procedure to make public the information obtained under the domestic laws, to provide information requested unless a requesting State has comparable domestic laws and administrative practice as to this procedure."

Paragraph 20 was added together with the heading preceding it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 21: Replaced on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 28 January 2003 and until 15 July 2005, paragraph 21 read as follows:

> "21. Contrary to the interpretation put forward in paragraphs 14 to 16 above, *Japan* takes the view that the Article imposes no obligation on it to carry out enquiries on behalf of a Contracting State in cases where no liability to its own tax is at issue, since to carry out such enquiries would be contrary to its laws and administrative practice."

Paragraph 21 was amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 31 March 1994 and until 28 January 2003, paragraph 21 read as follows:

> "21. Contrary to the interpretation put forward in paragraphs 14 to 16 above, *Japan* and the *United Kingdom* take the view that the Article imposes no obligation on them to carry out enquiries on behalf of a Contracting State in cases where no liability to their own tax is at issue, since to carry out such enquiries would be contrary to their laws and administrative practice."

Paragraph 21 was previously amended on 31 March 1994, by redrafting the reservation and including the reservation of the United Kingdom previously in paragraph 22 (see history of paragraph 22), by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 21 read as follows:

> "21. With respect to paragraphs 14 to 16 above, *Japan* can only supply information obtained through special investigation or special examination as long as such investigation or examination is concerned with taxation in Japan."

Paragraph 21 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 22: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 28 January 2003 and until 15 July 2005, paragraph 22 read as follows:

> "22. Contrary to the interpretation put forward in paragraphs 14 to 16 above, the *United Kingdom* takes the view that the Article as drafted does not impose an obligation on it to invoke statutory information powers on behalf of a Contracting State in cases where no liability to its own tax is at issue, since to invoke such powers in these circumstances is in some cases contrary to its law. In order to foster the effective exchange of information, United Kingdom legislation has therefore been enacted to permit the introduction of such an obligation into the text of the Article by making appropriate modifications."

Paragraph 22 as it read after 28 January 2003 was added by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 22, as it read before 31 March 1994, was deleted and the reservation was incorporated into paragraph 21 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 22 read as follows:

> "22. The *United Kingdom* takes the view that the Article imposes no obligation on it to carry out enquiries on behalf of a Contracting State in cases where no liability to United Kingdom tax is at issue, since to carry out such enquiries would be contrary to its laws and administrative practice (see the last sentence of paragraph 16 above)."

Paragraph 22, as it read after 23 July 1992 replaced paragraph 22 of the 1977 Model Convention. Paragraph 22 of the 1977 Model Convention was renumbered as paragraph 23 (see history of paragraph 23), the heading preceding paragraph 22 was moved with it and a new paragraph 22 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 23: Deleted on 22 July 2010 together with the preceding heading, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 23 and the preceding heading read as follows:

> "Reservations on the Article
>
> 23. *Austria* reserves the right not to include paragraph 5 in its conventions. However, Austria is authorised to exchange information held by a bank or other financial institution where such information is requested within the framework of a criminal investigation which is carried on in the requesting State concerning the commitment of tax fraud."

Paragraph 23 was previously replaced on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 29 April 2000 and until 15 July 2005, paragraph 23 read as follows:

"23. *Germany* reserves the right to propose in bilateral negotiations additional specific provisions on data protection."

Paragraph 23 was previously replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 23 read as follows:

"23. *Portugal* reserves the right to apply Article 26 of the 1963 version of the Draft Convention."

Paragraph 23 as it read after 23 July 1992 corresponded to paragraph 22 of the 1977 Model Convention. Paragraph 23 of the 1977 Model Convention was renumbered as paragraph 24 (see history of paragraph 24) and paragraph 22 was renumbered as paragraph 23 by the report entitled "The 1977 Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 22 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, the heading preceding paragraph 14 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963, was moved immediately before paragraph 22.

Paragraph 24: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 24 read as follows:

"24. *Switzerland* reserves its position on paragraphs 1 and 5. It will propose to limit the scope of this Article to information necessary for carrying out the provisions of the Convention. This reservation shall not apply in cases involving acts of fraud subject to imprisonment according to the laws of both Contracting States."

Paragraph 24 was amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 23 October 1997 and until 15 July 2005, paragraph 24 read as follows:

"24. *Switzerland* reserves its position on this Article. It will propose to limit the scope of this Article to information necessary for carrying out the provisions of the Convention."

Paragraph 24 was previously amended on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 31 March 1994 and until 23 October 1997, paragraph 24 read as follows:

"24. *Switzerland* reserves its position on this Article. When negotiating with other member countries, Switzerland will propose to limit the scope of this Article to information necessary for carrying out the provisions of the Convention."

Paragraph 24 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 24 read as follows:

"24. Under the *Swiss* concept a double taxation convention aims at avoiding international double taxation; the information necessary for the correct application and for the prevention of an abuse of such a convention can be exchanged already within the existing framework of its provisions on the mutual agreement procedure, the reduction of taxes withheld at the source, etc. Switzerland considers a particular provision on the exchange of information as unnecessary since even such an express clause could not, according to the purpose

of the Convention, provide for more than for an exchange of information necessary for the correct application and prevention of an abuse of the Convention. Accordingly Switzerland has an express reservation on the Article on the exchange of information."

Paragraph 24 as it read after 23 July 1992 corresponded to paragraph 23 of the 1977 Model Convention. Paragraph 24 was renumbered as paragraph 25 (see history of paragraph 25) and paragraph 23 was renumbered as paragraph 24 by the report entitled "The 1977 Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 23 of the 1977 Model Convention corresponded to paragraph 14 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 14 was renumbered as paragraph 23 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 25: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 25 read as follows:

"25. *Luxembourg* reserves the right not to include paragraph 5 in its conventions."

Paragraph 25 was amended on 17 July 2008, by deleting Belgium from the list of countries making reservation, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 25 read as follows:

"25. *Belgium* and *Luxembourg* reserve the right not to include paragraph 5 in their conventions."

Paragraph 25 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 25 was deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 21 September 1995 and until 29 April 2000, paragraph 25 read as follows:

"25. *Mexico* and the *United States* reserve the right to extend the application of this Article to all taxes imposed by a Contracting State, not just taxes covered by the Convention pursuant to Article 2."

Paragraph 25 was amended on 21 September 1995, by adding Mexico to the list of countries making the Reservation, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 31 March 1994 and until 21 September 1995, paragraph 25 read as follows:

"25. The *United States* reserves the right to extend the application of this Article to all taxes imposed by a Contracting State, not just taxes covered by the Convention pursuant to Article 2."

Paragraph 25 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 25 read as follows:

"25. The *United States* believes that this Article should apply to all taxes imposed by a Contracting State, not just taxes covered by the Convention."

Paragraph 25, as it read after 23 July 1992, corresponded to paragraph 24 of the 1977 Model Convention. Paragraph 24 was renumbered as paragraph 25 by the report entitled "The 1977 Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 24 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 26: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 26 read as follows:

> "26. *Belgium* reserves the right not to include paragraph 5 in its conventions. Where paragraph 5 is included in one of its conventions, the exchange of information held by a bank or other financial institution is restricted to the exchange on request of information concerning both a specific taxpayer and a specific financial institution."

Paragraph 26 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

COMMENTARY ON ARTICLE 27 CONCERNING THE ASSISTANCE IN THE COLLECTION OF TAXES

1. This Article provides the rules under which Contracting States[1] may agree to provide each other assistance in the collection of taxes. In some States, national law or policy may prevent this form of assistance or set limitations to it. Also, in some cases, administrative considerations may not justify providing assistance in the collection of taxes to another State or may similarly limit it. During the negotiations, each Contracting State will therefore need to decide whether and to what extent assistance should be given to the other State based on various factors, including

- — the stance taken in national law to providing assistance in the collection of other States' taxes;
- — whether and to what extent the tax systems, tax administrations and legal standards of the two States are similar, particularly as concerns the protection of fundamental taxpayers' rights (*e.g.* timely and adequate notice of claims against the taxpayer, the right to confidentiality of taxpayer information, the right to appeal, the right to be heard and present argument and evidence, the right to be assisted by a counsel of the taxpayer's choice, the right to a fair trial, etc.);
- — whether assistance in the collection of taxes will provide balanced and reciprocal benefits to both States;
- — whether each State's tax administration will be able to effectively provide such assistance;
- — whether trade and investment flows between the two States are sufficient to justify this form of assistance;
- — whether for constitutional or other reasons the taxes to which the Article applies should be limited.

The Article should only be included in the Convention where each State concludes that, based on these factors, they can agree to provide assistance in the collection of taxes levied by the other State.

(Replaced on 28 January 2003; see HISTORY)

2. The Article provides for comprehensive collection assistance. Some States may prefer to provide a more limited type of collection assistance. This may be the only form of collection assistance that they are generally able to

1 Throughout this Commentary on Article 27, the State making a request for assistance is referred to as the "requesting State" whilst the State from which assistance is requested is referred to as the "requested State".

provide or that they may agree to in a particular convention. For instance, a State may want to limit assistance to cases where the benefits of the Convention (*e.g.* a reduction of taxes in the State where income such as interest arises) have been claimed by persons not entitled to them. States wishing to provide such limited collection assistance are free to adopt bilaterally an alternative Article drafted along the following lines:

Article 27

Assistance in the collection of taxes

> 1. The Contracting States shall lend assistance to each other in the collection of tax to the extent needed to ensure that any exemption or reduced rate of tax granted under this Convention shall not be enjoyed by persons not entitled to such benefits. The competent authorities of the Contracting States may by mutual agreement settle the mode of application of this Article.
>
> 2. In no case shall the provisions of this Article be construed so as to impose on a Contracting State the obligation:
>
> *a)* to carry out administrative measures at variance with the laws and administrative practice of that or of the other Contracting State;
>
> *b)* to carry out measures which would be contrary to public policy (*ordre public*).

(Replaced on 28 January 2003; see HISTORY)

Paragraph 1

3. This paragraph contains the principle that a Contracting State is obliged to assist the other State in the collection of taxes owed to it, provided that the conditions of the Article are met. paragraph 3 and 4 provide the two forms that this assistance will take.

(Replaced on 28 January 2003; see HISTORY)

4. The paragraph also provides that assistance under the Article is not restricted by Article 1 and 2. Assistance must therefore be provided as regards a revenue claim owed to a Contracting State by any person, whether or not a resident of a Contracting State. Some Contracting States may, however, wish to limit assistance to taxes owed by residents of either Contracting State. Such States are free to restrict the scope of the Article by omitting the reference to Article 1 from the paragraph.

(Replaced on 28 January 2003; see HISTORY)

5. Article 26 applies to the exchange of information for purposes of the provisions of this Article. The confidentiality of information exchanged for purposes of assistance in collection is thus ensured.

(Replaced on 28 January 2003; see HISTORY)

6. The paragraph finally provides that the competent authorities of the Contracting States may, by mutual agreement, decide the details of the practical application of the provisions of the Article.

(Replaced on 28 January 2003; see HISTORY)

7. Such agreement should, in particular, deal with the documentation that should accompany a request made pursuant to paragraph 3 or 4. It is common practice to agree that a request for assistance will be accompanied by such documentation as is required by the law of the requested State, or has been agreed to by the competent authorities of the Contracting States, and that is necessary to undertake, as the case may be, collection of the revenue claim or measures of conservancy. Such documentation may include, for example, a declaration that the revenue claim is enforceable and is owed by a person who cannot, under the law of the requesting State, prevent its collection or an official copy of the instrument permitting enforcement in the requesting State. An official translation of the documentation in the language of the requested State should also be provided. It could also be agreed, where appropriate, that the instrument permitting enforcement in the requesting State shall, where appropriate and in accordance with the provisions in force in the requested State, be accepted, recognised, supplemented or replaced, as soon as possible after the date of the receipt of the request for assistance, by an instrument permitting enforcement in the latter State.

(Added on 28 January 2003; see HISTORY)

8. The agreement should also deal with the issue of the costs that will be incurred by the requested State in satisfying a request made under paragraph 3 or 4. In general, the costs of collecting a revenue claim are charged to the debtor but it is necessary to determine which State will bear costs that cannot be recovered from that person. The usual practice, in this respect, is to provide that in the absence of an agreement specific to a particular case, ordinary costs incurred by a State in providing assistance to the other State will not be reimbursed by that other State. Ordinary costs are those directly and normally related to the collection, *i.e.* those expected in normal domestic collection proceedings. In the case of extraordinary costs, however, the practice is to provide that these will be borne by the requesting State, unless otherwise agreed bilaterally. Such costs would cover, for instance, costs incurred when a particular type of procedure has been used at the request of the other State, or supplementary costs of experts, interpreters, or translators.

Most States also consider as extraordinary costs the costs of judicial and bankruptcy proceedings. The agreement should provide a definition of extraordinary costs and consultation between the Contracting States should take place in any particular case where extraordinary costs are likely to be involved. It should also be agreed that, as soon as a Contracting State anticipates that extraordinary costs may be incurred, it will inform the other Contracting State and indicate the estimated amount of such costs so that the other State may decide whether such costs should be incurred. It is, of course, also possible for the Contracting States to provide that costs will be allocated on a basis different from what is described above; this may be necessary, for instance, where a request for assistance in collection is suspended or withdrawn under paragraph 7 or where the issue of costs incurred in providing assistance in collection is already dealt with in another legal instrument applicable to these States.

(Added on 28 January 2003; see HISTORY)

9. In the agreement, the competent authorities may also deal with other practical issues such as:

- whether there should be a limit of time after which a request for assistance could no longer be made as regards a particular revenue claim;
- what should be the applicable exchange rate when a revenue claim is collected in a currency that differs from the one which is used in the requesting State;
- how should any amount collected pursuant to a request under paragraph 3 be remitted to the requesting State.

(Added on 28 January 2003; see HISTORY)

Paragraph 2

10. paragraph 2 defines the term "revenue claim" for purposes of the Article. The definition applies to any amount owed in respect of all taxes that are imposed on behalf of the Contracting States, or of their political subdivisions or local authorities, but only insofar as the imposition of such taxes is not contrary to the Convention or other instrument in force between the Contracting States. It also applies to the interest, administrative penalties and costs of collection or conservancy that are related to such an amount. Assistance is therefore not restricted to taxes to which the Convention generally applies pursuant to Article 2, as is confirmed in paragraph 1.

(Added on 28 January 2003; see HISTORY)

11. Some Contracting States may prefer to limit the application of the Article to taxes that are covered by the Convention under the general rules of

Article 2. States wishing to do so should replace paragraph 1 and 2 by the following:

> 1. The Contracting States shall lend assistance to each other in the collection of revenue claims. This assistance is not restricted by Article 1. The competent authorities of the Contracting States may by mutual agreement settle the mode of application of this Article.
>
> 2. The term "revenue claim" as used in this Article means any amount owed in respect of taxes covered by the Convention together with interest, administrative penalties and costs of collection or conservancy related to such amount.

(Added on 28 January 2003; see HISTORY)

12. Similarly, some Contracting States may wish to limit the types of tax to which the provisions of the Article will apply or to clarify the scope of application of these provisions by including in the definition a detailed list of the taxes. States wishing to do so are free to adopt bilaterally the following definition:

> The term "revenue claim" as used in this Article means any amount owed in respect of the following taxes imposed by the Contracting States, together with interest, administrative penalties and costs of collection or conservancy related to such amount:
>
> *a)* (in State A): …
>
> *b)* (in State B): …

(Added on 28 January 2003; see HISTORY)

13. In order to make sure that the competent authorities can freely communicate information for purposes of the Article, Contracting States should ensure that the Article 26 is drafted in a way that allows exchanges of information with respect to any tax to which this Article applies.

(Added on 28 January 2003; see HISTORY)

14. Nothing in the Convention prevents the application of the provisions of the Article to revenue claims that arise before the Convention enters into force, as long as assistance with respect to these claims is provided after the treaty has entered into force and the provisions of the Article have become effective. Contracting States may find it useful, however, to clarify the extent to which the provisions of the Article are applicable to such revenue claims, in particular when the provisions concerning the entry into force of their convention provide that the provisions of that convention will have effect with respect to taxes arising or levied from a certain time. States wishing to restrict

the application of the Article to claims arising after the Convention enters into force are also free to do so in the course of bilateral negotiations.

(Added on 28 January 2003; see HISTORY)

Paragraph 3

15. This paragraph stipulates the conditions under which a request for assistance in collection can be made. The revenue claim has to be enforceable under the law of the requesting State and be owed by a person who, at that time, cannot, under the law of that State, prevent its collection. This will be the case where the requesting State has the right, under its internal law, to collect the revenue claim and the person owing the amount has no administrative or judicial rights to prevent such collection.

(Added on 28 January 2003; see HISTORY)

16. In many States, a revenue claim can be collected even though there is still a right to appeal to an administrative body or a court as regards the validity or the amount of the claim. If, however, the internal law of the requested State does not allow it to collect its own revenue claims when appeals are still pending, the paragraph does not authorise it to do so in the case of revenue claims of the other State in respect of which such appeal rights still exist even if this does not prevent collection in that other State. Indeed, the phrase "collected by that other State in accordance with the provisions of its laws applicable to the enforcement and collection of its own taxes as if the revenue claim were a revenue claim of that other State" has the effect of making that requested State's internal law restriction applicable to the collection of the revenue claim of the other State. Many States, however, may wish to allow collection assistance where a revenue claim may be collected in the requesting State notwithstanding the existence of appeal rights even though the requested State's own law prevents collection in that case. States wishing to do so are free to modify paragraph 3 to read as follows:

> When a revenue claim of a Contracting State is enforceable under the laws of that State and is owed by a person who, at that time, cannot, under the laws of that State, prevent its collection, that revenue claim shall, at the request of the competent authority of that State, be accepted for purposes of collection by the competent authority of the other Contracting State. That revenue claim shall be collected by that other State in accordance with the provisions of its laws applicable to the enforcement and collection of its own taxes as if the revenue claim were a revenue claim of that other State that met the conditions allowing that other State to make a request under this paragraph.

(Added on 28 January 2003; see HISTORY)

17. paragraph 3 also regulates the way in which the revenue claim of the requesting State is to be collected by the requested State. Except with respect to time limits and priority (see the Commentary on paragraph 5), the requested State is obliged to collect the revenue claim of the requesting State as though it were the requested State's own revenue claim even if, at the time, it has no need to undertake collection actions related to that taxpayer for its own purposes. As already mentioned, the phrase "in accordance with the provisions of its law applicable to the enforcement and collection of its own taxes" has the effect of limiting collection assistance to claims with respect to which no further appeal rights exist if, under the requested State's internal law, collection of that State's own revenue claims are not permitted as long as such rights still exist.

(Added on 28 January 2003; see HISTORY)

18. It is possible that the request may concern a tax that does not exist in the requested State. The requesting State shall indicate where appropriate the nature of the revenue claim, the components of the revenue claim, the date of expiry of the claim and the assets from which the revenue claim may be recovered. The requested State will then follow the procedure applicable to a claim for a tax of its own which is similar to that of the requesting State or any other appropriate procedure if no similar tax exists.

(Added on 28 January 2003; see HISTORY)

Paragraph 4

19. In order to safeguard the collection rights of a Contracting State, this paragraph enables it to request the other State to take measures of conservancy even where it cannot yet ask for assistance in collection, *e.g.* when the revenue claim is not yet enforceable or when the debtor still has the right to prevent its collection. This paragraph should only be included in conventions between States that are able to take measures of conservancy under their own laws. Also, States that consider that it is not appropriate to take measures of conservancy in respect of taxes owed to another State may decide not to include the paragraph in their conventions or to restrict its scope. In some States, measures of conservancy are referred to as "interim measures" and such States are free to add these words to the paragraph to clarify its scope in relation to their own terminology.

(Added on 28 January 2003; see HISTORY)

20. One example of measures to which the paragraph applies is the seizure or the freezing of assets before final judgement to guarantee that these assets will still be available when collection can subsequently take place. The conditions required for the taking of measures of conservancy may vary from

one State to another but in all cases the amount of the revenue claim should be determined beforehand, if only provisionally or partially. A request for measures of conservancy as regards a particular revenue claim cannot be made unless the requesting State can itself take such measures with respect to that claim (see the Commentary on paragraph 8).

(Added on 28 January 2003; see HISTORY)

21. In making a request for measures of conservancy the requesting State should indicate in each case what stage in the process of assessment or collection has been reached. The requested State will then have to consider whether in such a case its own laws and administrative practice permit it to take measures of conservancy.

(Added on 28 January 2003; see HISTORY)

Paragraph 5

22. paragraph 5 first provides that the time limits of the requested State, i.e. time limitations beyond which a revenue claim cannot be enforced or collected, shall not apply to a revenue claim in respect of which the other State has made a request under paragraph 3 or 4. Since paragraph 3 refers to revenue claims that are enforceable in the requesting State and paragraph 4 to revenue claims in respect of which the requesting State can take measures of conservancy, it follows that it is the time limits of the requesting State that are solely applicable.

(Added on 28 January 2003; see HISTORY)

23. Thus, as long as a revenue claim can still be enforced or collected (paragraph 3) or give rise to measures of conservancy (paragraph 4) in the requesting State, no objection based on the time limits provided under the laws of the requested State may be made to the application of paragraph 3 or 4 to that revenue claim. States which cannot agree to disregard their own domestic time limits should amend paragraph 5 accordingly.

(Added on 28 January 2003; see HISTORY)

24. The Contracting States may agree that after a certain period of time the obligation to assist in the collection of the revenue claim no longer exists. The period should run from the date of the original instrument permitting enforcement. Legislation in some States requires renewal of the enforcement instrument, in which case the first instrument is the one that counts for purposes of calculating the time period after which the obligation to provide assistance ends.

(Added on 28 January 2003; see HISTORY)

25. paragraph 5 also provides that the rules of both the requested (first sentence) and requesting (second sentence) States giving their own revenue claims priority over the claims of other creditors shall not apply to a revenue claim in respect of which a request has been made under paragraph 3 or 4. Such rules are often included in domestic laws to ensure that tax authorities can collect taxes to the fullest possible extent.

(Added on 28 January 2003; see HISTORY)

26. The rule according to which the priority rules of the requested State do not apply to a revenue claim of the other State in respect of which a request for assistance has been made applies even if the requested State must generally treat that claim as its own revenue claim pursuant to paragraph 3 and 4. States wishing to provide that revenue claims of the other State should have the same priority as is applicable to their own revenue claims are free to amend the paragraph by deleting the words "or accorded any priority" in the first sentence.

(Added on 28 January 2003; see HISTORY)

27. The words "by reason of their nature as such", which are found at the end of the first sentence, indicate that the time limits and priority rules of the requested State to which the paragraph applies are only those that are specific to unpaid taxes. Thus, the paragraph does not prevent the application of general rules concerning time limits or priority which would apply to all debts (*e.g.* rules giving priority to a claim by reason of that claim having arisen or having been registered before another one).

(Added on 28 January 2003; see HISTORY)

Paragraph 6

28. This paragraph ensures that any legal or administrative objection concerning the existence, validity or the amount of a revenue claim of the requesting State shall not be dealt with by the requested State's courts and administrative bodies. Thus, no legal or administrative proceedings, such as a request for judicial review, shall be undertaken in the requested State with respect to these matters. The main purpose of this rule is to prevent administrative or judicial bodies of the requested State from being asked to decide matters which concern whether an amount, or part thereof, is owed under the internal law of the other State. States in which the paragraph may raise constitutional or legal difficulties may amend or omit it in the course of bilateral negotiations.

(Added on 28 January 2003; see HISTORY)

Paragraph 7

29. This paragraph provides that if, after a request has been made under paragraph 3 or 4, the conditions that applied when such request was made cease to apply (*e.g.* a revenue claim ceases to be enforceable in the requesting State), the State that made the request must promptly notify the other State of this change of situation. Following the receipt of such a notice, the requested State has the option to ask the requesting State to either suspend or withdraw the request. If the request is suspended, the suspension should apply until such time as the State that made the request informs the other State that the conditions necessary for making a request as regards the relevant revenue claim are again satisfied or that it withdraws its request.

(Added on 28 January 2003; see HISTORY)

Paragraph 8

30. This paragraph contains certain limitations to the obligations imposed on the State which receives a request for assistance.

(Added on 28 January 2003; see HISTORY)

31. The requested State is at liberty to refuse to provide assistance in the cases referred to in the paragraph. However if it does provide assistance in these cases, it remains within the framework of the Article and it cannot be objected that this State has failed to observe the provisions of the Article.

(Added on 28 January 2003; see HISTORY)

32. In the first place, the paragraph contains the clarification that a Contracting State is not bound to go beyond its own internal laws and administrative practice or those of the other State in fulfilling its obligations under the Article. Thus, if the requesting State has no domestic power to take measures of conservancy, the requested State could decline to take such measures on behalf of the requesting State. Similarly, if the seizure of assets to satisfy a revenue claim is not permitted in the requested State, that State is not obliged to seize assets when providing assistance in collection under the provisions of the Article. However, types of administrative measures authorised for the purpose of the requested State's tax must be utilised, even though invoked solely to provide assistance in the collection of taxes owed to the requesting State.

(Added on 28 January 2003; see HISTORY)

33. paragraph 5 of the Article provides that a Contracting State's time limits will not apply to a revenue claim in respect of which the other State has requested assistance. Subparagraph a) is not intended to defeat that principle. Providing assistance with respect to a revenue claim after the requested

State's time limits have expired will not, therefore, be considered to be at variance with the laws and administrative practice of that or of the other Contracting State in cases where the time limits applicable to that claim have not expired in the requesting State.

(Added on 28 January 2003; see HISTORY)

34. Subparagraph *b)* includes a limitation to carrying out measures contrary to public policy (*ordre public*). As is the case under Article 26 (see paragraph 19 of the Commentary on Article 26), it has been felt necessary to prescribe a limitation with regard to assistance which may affect the vital interests of the State itself.

(Added on 28 January 2003; see HISTORY)

35. Under subparagraph *c)*, a Contracting State is not obliged to satisfy the request if the other State has not pursued all reasonable measures of collection or conservancy, as the case may be, available under its laws or administrative practice.

(Added on 28 January 2003; see HISTORY)

36. Finally, under subparagraph *d)*, the requested State may also reject the request for practical considerations, for instance if the costs that it would incur in collecting a revenue claim of the requesting State would exceed the amount of the revenue claim.

(Added on 28 January 2003; see HISTORY)

37. Some States may wish to add to the paragraph a further limitation, already found in the joint Council of Europe-OECD multilateral Convention on Mutual Administrative Assistance in Tax Matters, which would allow a State not to provide assistance if it considers that the taxes with respect to which assistance is requested are imposed contrary to generally accepted taxation principles.

(Added on 28 January 2003; see HISTORY)

HISTORY

Article 27 replaced a previous Article 27 on 28 January 2003. The previous Article 27 (Members of Diplomatic Missions and Consular Posts) was renumbered as Article 28 (see history of the Commentary on Article 28) and the new Article 27 (Assistance in the Collection of Taxes) was added by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. The addition of the new Article 27 also required the renumbering of Articles 28, 29 and 30 as Articles 29, 30 and 31 (see history of the Commentary on these Articles).

Paragraph 1: Replaced paragraph 1 as it read before 28 January 2003. Paragraph 1 was renumbered as paragraph 1 of the Commentary on Article 28 (see history of paragraph 1 of the Commentary on Article 28) and a new paragraph 1 was added by

the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 2: Replaced paragraph 2 as it read before 28 January 2003. Paragraph 2 was renumbered as paragraph 2 of the Commentary on Article 28 (see history of paragraph 2 of the Commentary on Article 28) and a new paragraph 2 was added by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 3: Replaced paragraph 3 as it read before 28 January 2003. Paragraph 3 was renumbered as paragraph 3 of the Commentary on Article 28 (see history of paragraph 3 of the Commentary on Article 28) and a new paragraph 3 and the heading preceding it were added by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 4: Replaced paragraph 4 as it read before 28 January 2003. Paragraph 4 was renumbered as paragraph 4 of the Commentary on Article 28 (see history of paragraph 4 of the Commentary on Article 28) and a new paragraph 4 was added by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 5: Replaced paragraph 5 as it read before 28 January 2003. Paragraph 5 was renumbered as paragraph 5 of the Commentary on Article 28 (see history of paragraph 5 of the Commentary on Article 28) and a new paragraph 2 was added by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 6: Replaced paragraph 6 as it read before 28 January 2003. Paragraph 6 was renumbered paragraph 6 of the Commentary on Article 28 (see history of paragraph 6 of the Commentary on Article 28) and a new paragraph 6 was added by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 7: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 8: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 9: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 10: Added together with the heading preceding it on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 11: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 12: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 13: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 14: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 15: Added together with the heading preceding it on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 16: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 17: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 18: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 19: Added together with the heading preceding it on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 20: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 21: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 22: Added together with the heading preceding it on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 23: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 24: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 25: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 26: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 27: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 28: Added together with the heading preceding it on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 29: Added together with the heading preceding it on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 30: Added together with the heading preceding it on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 31: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 32: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 33: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 34: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 35: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 36: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 37: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

COMMENTARY ON ARTICLE 28 CONCERNING MEMBERS OF DIPLOMATIC MISSIONS AND CONSULAR POSTS

1. The aim of the provision is to secure that members of diplomatic missions and consular posts shall, under the provisions of a double taxation convention, receive no less favourable treatment than that to which they are entitled under international law or under special international agreements.

(Renumbered on 28 January 2003; see HISTORY)

2. The simultaneous application of the provisions of a double taxation convention and of diplomatic and consular privileges conferred by virtue of the general rules of international law, or under a special international agreement may, under certain circumstances, have the result of discharging, in both Contracting States, tax that would otherwise have been due. As an illustration, it may be mentioned that *e.g.* a diplomatic agent who is accredited by State A to State B and derives royalties, or dividends from sources in State A will not, owing to international law, be subject to tax in State B in respect of this income and may also, depending upon the provisions of the bilateral convention between the two States, be entitled as a resident of State B to an exemption from, or a reduction of, the tax imposed on the income in State A. In order to avoid tax reliefs that are not intended, the Contracting States are free to adopt bilaterally an additional provision which may be drafted on the following lines:

> Insofar as, due to fiscal privileges granted to members of diplomatic missions and consular posts under the general rules of international law or under the provisions of special international agreements, income or capital are not subject to tax in the receiving State, the right to tax shall be reserved to the sending State.

(Renumbered on 28 January 2003; see HISTORY)

3. In many OECD member countries, the domestic laws contain provisions to the effect that members of diplomatic missions and consular posts whilst abroad shall for tax purposes be deemed to be residents of the sending State. In the bilateral relations between member countries in which provisions of this kind are operative internally, a further step may be taken by including in the Convention specific rules that establish, for purposes of the Convention, the sending State as the State of residence of the members of the diplomatic missions and consular posts of the Contracting States. The special provision suggested here could be drafted as follows:

> Notwithstanding the provisions of Article 4, an individual who is a member of a diplomatic mission or a consular post of a Contracting State which is

situated in the other Contracting State or in a third State shall be deemed for the purposes of the Convention to be a resident of the sending State if:

a) in accordance with international law he is not liable to tax in the receiving State in respect of income from sources outside that State or on capital situated outside that State, and

b) he is liable in the sending State to the same obligations in relation to tax on his total income or on capital as are residents of that State.

(Renumbered on 28 January 2003; see HISTORY)

4. By virtue of paragraph 1 of Article 4 the members of diplomatic missions and consular posts of a third State accredited to a Contracting State, are not deemed to be residents of the receiving State if they are only subject to a limited taxation in that State (see paragraph 8 of the Commentary on Article 4). This consideration also holds true of the international organisations established in a Contracting State and their officials as they usually benefit from certain fiscal privileges either under the convention or treaty establishing the organisation or under a treaty between the organisation and the State in which it is established. Contracting States wishing to settle expressly this question, or to prevent undesirable tax reliefs, may add the following provision to this Article:

The Convention shall not apply to international organisations, to organs or officials thereof and to persons who are members of a diplomatic mission or a consular post of a third State, being present in a Contracting State and not treated in either Contracting State as residents in respect of taxes on income or on capital.

This means that international organisations, organs or officials who are liable in a Contracting State in respect only of income from sources therein should not have the benefit of the Convention.

(Renumbered on 28 January 2003; see HISTORY)

5. Although honorary consular officers cannot derive from the provisions of the Article any privileges to which they are not entitled under the general rules of international law (there commonly exists only tax exemption for payments received as consideration for expenses honorary consuls have on behalf of the sending State), the Contracting States are free to exclude, by bilateral agreement, expressly honorary consular officers from the application of the Article.

6. *(Deleted on 28 January 2003; see HISTORY)*

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

HISTORY

Article 28 replaced a previous Article 28 on 28 January 2003 and corresponds to Article 27 as it read before that date. The previous Article 28 (Territorial Extension) was renumbered as Article 29 (see history of the Commentary on Article 29) and Article 27 was renumbered as Article 28 as a consequence of the addition of a new Article 27 (Assistance in the Collection of Taxes) by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. The addition of the new Article 27 also required the renumbering of Articles 28, 29 and 30 as Articles 29, 30 and 31 (see history of the Commentary on these Articles).

Title: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title read as follows:

> "COMMENTARY ON ARTICLE 27 CONCERNING DIPLOMATIC AND CONSULAR PRIVILEGES"

Paragraph 1: Corresponds to paragraph 1 of the Commentary on Article 27 as it read before 28 January 2003. Paragraph 1 of the Commentary on Article 28 was renumbered as paragraph 1 of the Commentary on Article 29 (see history of paragraph 1 of the Commentary on Article 29) and paragraph 1 of the Commentary on Article 27 was renumbered as paragraph 1 of the Commentary on Article 28 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 1 was amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 1 read as follows:

> "1. The aim of the provision is to secure that diplomatic agents or consular officers shall, under the provisions of a double taxation convention, receive no less favourable treatment than that to which they are entitled under international law or under special international agreements."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. The aim of the provision is to secure that members of diplomatic or consular representations shall, under the provisions of a double taxation Convention, receive no less favourable treatment than that to which they are entitled under international law or under special international treaties."

Paragraph 2: Corresponds to paragraph 2 of the Commentary on Article 27 as it read before 28 January 2003. Paragraph 2 of the Commentary on Article 28 was renumbered as paragraph 2 of the Commentary on Article 29 (see history of paragraph 2 of the Commentary on Article 29) and paragraph 2 of the Commentary on Article 27 was renumbered as paragraph 2 of the Commentary on Article 28 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 2 was amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 2 read as follows:

> "2. The simultaneous application of the provisions of a double taxation convention and of diplomatic and consular privileges conferred by virtue of the general rules of international law, or under a special international agreement may

under certain circumstances, have the result of discharging, in both Contracting States, tax that would otherwise have been due. As an illustration, it may be mentioned that *e.g.* a diplomatic agent who is accredited by State A to State B and derives royalties, or dividends from sources in State A will not, owing to international law, be subject to tax in State B in respect of this income and may also, depending upon the provisions of the bilateral convention between the two States, be entitled as a resident of State B to an exemption from, or a reduction of, the tax imposed on the income in State A. In order to avoid tax reliefs that are not intended, the Contracting States are free to adopt bilaterally an additional provision which may be drafted on the following lines:

"Insofar as, due to fiscal privileges granted to diplomatic agents or consular officers under the general rules of international law or under the provisions of special international agreements, income or capital are not subject to tax in the receiving State, the right to tax shall be reserved to the sending State.""

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. The simultaneous application of the provisions of a double taxation Convention and of diplomatic and consular privileges conferred by virtue of the general rules of international law, or under a special international treaty may under certain circumstances, have the result of discharging, in both Contracting States, tax that would otherwise have been due. As an illustration, it may be mentioned that *e.g.* a diplomatic agent who is accredited by State A to State B and derives royalties or dividends from sources in State A will not, owing to international law, be subject to tax in State B in respect of this income and may also, depending upon the provisions of the bilateral Convention between the two States, be entitled as a resident of State B to an exemption from, or a reduction of, the tax imposed on the income in State A. In order to avoid tax reliefs that are not intended, the Contracting States should be free to adopt bilaterally an additional provision which may be drafted on the following lines:

"Insofar as, due to fiscal privileges granted to diplomatic or consular officials under the general rules of international law or under the provisions of special international treaties, income or capital are not subject to tax in the receiving State, the right to tax shall be reserved to the sending State."

It should be remarked, however, that also without the inclusion of the additional clause the sending State, by the rules laid down in Article 19 on taxation of remuneration of governmental functions, always retains the right to tax the salaries and other emoluments paid to the diplomatic and consular officials in their capacity as such."

Paragraph 3: Corresponds to paragraph 3 of the Commentary on Article 27 as it read before 28 January 2003. Paragraph 3 of the Commentary on Article 27 was renumbered as paragraph 3 of the Commentary on Article 28 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 3 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 3 read as follows:

"3. In many OECD member countries, the domestic laws contain provisions to the effect that diplomatic agents and consular officers while abroad shall for tax purposes be deemed to be residents of the sending State. In the bilateral relations between member countries in which provisions of this kind are operative

internally, a further step may be taken by including in the Convention specific rules that establish, for purposes of the Convention, the sending State as the State of residence of the members of the diplomatic missions and consular posts of the Contracting States. The special provision suggested here could be drafted as follows:

"Notwithstanding the provisions of Article 4, an individual who is a member of a diplomatic mission, consular post or permanent mission of a Contracting State which is situated in the other Contracting State or in a third State shall be deemed for the purposes of the Convention to be a resident of the sending State if:

a) in accordance with international law he is not liable to tax in the receiving State in respect of income from sources outside that State or on capital situated outside that State, and

b) he is liable in the sending State to the same obligations in relation to tax on his total income or on capital as are residents of that State.""

Paragraph 3 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. In many Member countries, the internal legislation contains provisions to the effect that diplomatic and consular agents while abroad shall for tax purposes be deemed to be residents of the sending State. In the bilateral relations between Member countries in which provisions of this kind are operative internally, a further step may be taken by including in the Convention specific rules that establish, for purposes of the Convention, the sending State as the State of residence of the members of the diplomatic and consular missions of the Contracting States. The special provision suggested here could be drafted as follows:

"For the purposes of this Convention, persons who are members of a diplomatic or consular mission of a Contracting State in the other Contracting State or in a third State and who are nationals of the sending State, shall be deemed to be residents of the sending State if they are submitted therein to the same obligations in respect of taxes on income and capital as are residents of that State.""

Paragraph 4: Corresponds to paragraph 4 of the Commentary on Article 27 as it read before 28 January 2003. Paragraph 4 of the Commentary on Article 27 was renumbered as paragraph 4 of the Commentary on Article 28 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 4 was amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 4 read as follows:

"4. By virtue of paragraph 1 of Article 4 the diplomatic agents and consular officers of a third State accredited to a Contracting State, are not deemed to be residents of the receiving State if they are only subject to a limited taxation in that State (see paragraph 8 of the Commentary on Article 4). This consideration also holds true of the international organisations established in a Contracting State and their officials as they usually benefit from certain fiscal privileges either under the convention or treaty establishing the organisation or under a treaty between the organisation and the State in which it is established. Contracting States wishing to

settle expressly this question, or to prevent undesirable tax reliefs, may add the following provision to this Article:

"The Convention shall not apply to international organisations, to organs or officials thereof and to persons who are members of a diplomatic mission, consular post or permanent mission of a third State, being present in a Contracting State and not treated in either Contracting State as residents in respect of taxes on income or on capital."

This means that international organisations, organs or officials who are liable in a Contracting State in respect only of income from sources therein should not have the benefit of the Convention."

Paragraph 4 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

"4. Regarding the diplomatic and consular agents of a third State accredited to a Contracting State, it results from the rule suggested in the foregoing paragraph that they should be excluded from the benefits available under the double taxation Conventions concluded by the receiving State. Such a solution also finds strong support from the consideration that, where this category is concerned, there is normally no question of double taxation involved, since in the receiving State these officials are entitled to the fiscal privileges granted under the general rules of international law. This latter consideration also holds true of the officials of intergovernmental organisations established in a Member State, as these officials usually benefit from certain fiscal privileges either under the Convention or Treaty establishing the organisation or under a special international Treaty between the organisation and the country in which it is established.

As a safeguard against undesirable tax reliefs the following provision could be added to this Article by bilateral agreement:

"This Convention shall not apply to International Organisations, to organs or officials thereof and to persons who are members of a diplomatic or consular mission of a third State, being present in a Contracting State and not treated in either Contracting State as residents in respect of taxes on income and capital.""

Paragraph 5: Corresponds to paragraph 5 of the Commentary on Article 27 of the 1977 Model. Paragraph 5 of the Commentary on Article 27 was renumbered as paragraph 5 of the Commentary on Article 28 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 5 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

"5. Although honorary consular officers cannot derive from the provisions of the Article any privileges to which they are not entitled under the general rules of international law — there commonly exists only tax exemption for payments received as consideration for expenses honorary consuls have on behalf of the sending State — the Contracting States should be free to exclude, by bilateral agreement, expressly honorary consular officers from the application of the Article."

Paragraph 6: Corresponds to paragraph 6 of the Commentary on Article 27 as it read before 28 January 2003. Paragraph 6 of the Commentary on Article 27 was renumbered as paragraph 6 of the Commentary on Article 28 and deleted the Report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on

28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 6 of the Commentary on Article 27 read as follows:

> "6. *Belgium* and *France* are of the opinion that persons, who are not liable to comprehensive taxation (full liability to tax) or who do not bear on the taxable part of their income a tax which corresponds in percentage terms to the tax to which they would have been liable on their total income if it had not been partly exempt, should not be deemed to be residents. *France* would, after the words "sources therein" in the last sentence of paragraph 4 above, insert the phrase: ", or are not subject in a Contracting State to the same obligations with respect to taxes on income and on capital as the residents of that State,"."

Paragraph 6 was amended on 21 September 1995, by adding the last sentence and by deleting the Netherlands from the list of countries making the reservation, by the report entitled "1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 6 read as follows:

> "6. *Belgium*, *France* and the *Netherlands* are of the opinion that persons, who are not liable to comprehensive taxation (full liability to tax) or who do not bear on the taxable part of their income a tax which corresponds in percentage terms to the tax to which they would have been liable on their total income if it had not been partly exempt, should not be deemed to be residents."

Paragraph 6 was previously amended on 23 July 1992 by deleting Switzerland from the list of countries making the observation, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 6 read as follows:

> "6. *Belgium*, *France*, the *Netherlands* and *Switzerland* are of the opinion that persons, who are not liable to comprehensive taxation (full liability to tax) or who do not bear on the taxable part of their income a tax which corresponds in percentage terms to the tax to which they would have been liable on their total income if it had not been partly exempt, should not be deemed to be residents."

Paragraph 6 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

COMMENTARY ON ARTICLE 29 CONCERNING THE TERRITORIAL EXTENSION OF THE CONVENTION

1. Certain double taxation conventions state to what territories they apply. Some of them also provide that their provisions may be extended to other territories and define when and how this may be done. A clause of this kind is of particular value to States which have territories overseas or are responsible for the international relations of other States or territories, especially as it recognises that the extension may be effected by an exchange of diplomatic notes. It is also of value when the provisions of the Convention are to be extended to a part of the territory of a Contracting State which was, by special provision, excluded from the application of the Convention. The Article, which provides that the extension may also be effected in any other manner in accordance with the constitutional procedure of the States, is drafted in a form acceptable from the constitutional point of view of all OECD member countries affected by the provision in question. The only prior condition for the extension of a convention to any States or territories is that they must impose taxes substantially similar in character to those to which the convention applies.

(Renumbered on 28 January 2003; see HISTORY)

2. The Article provides that the Convention may be extended either in its entirety or with any necessary modifications, that the extension takes effect from such date and subject to such conditions as may be agreed between the Contracting States and, finally, that the termination of the Convention automatically terminates its application to any States or territories to which it has been extended, unless otherwise agreed by the Contracting States.

(Renumbered on 28 January 2003; see HISTORY)

3. *(Renumbered on 28 January 2003; see HISTORY)*

4. *(Renumbered on 28 January 2003; see HISTORY)*

5. *(Renumbered on 28 January 2003; see HISTORY)*

HISTORY

Article 29 replaced a previous Article 29 on 28 January 2003 and corresponds to Article 28 as it read before that date. The previous Article 29 (Entry into Force) was renumbered Article 30 (see history of the Commentary on Article 30) and Article 28 was renumbered Article 29 as a consequence of the addition of a new Article 27 (Assistance in the Collection of Taxes) by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003. The addition of the new Article 27 required the renumbering of Articles 28, 29 and 30 as Articles 29, 30 and 31 (see history of the Commentary on these Articles).

Paragraph 1: Corresponds to paragraph 1 of the Commentary on Article 28 of the 1977 Model as it read before 28 January 2003. Paragraph 1 of the Commentary on Articles 29 and 30 was renumbered as paragraph 1 of the Commentary on Articles 30 and 31 (see history of paragraph 1 of the Commentary on Articles 30 and 31) and paragraph 1 of the Commentary on Article 28 was renumbered as paragraph 1 of the Commentary on Article 29 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 1 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. Certain double taxation Conventions state to what territories they apply. Some of them also provide that their provisions may be extended to other territories, and define when and how this may be done. A clause of this kind is of particular value to States which have territories overseas or are responsible for the international relations of other States or territories, especially as it recognises that the extension may be effected by an exchange of diplomatic notes. It is also of value when the provisions of the Convention are to be extended to a part of the territory of a Contracting State which was, by special provision, excluded from the application of the Convention. The Article, which provides that the extension may also be effected in any other manner in accordance with the constitutional procedure of the States, is drafted in a form acceptable from the constitutional point of view of all Member countries affected by the provision in question. The only prior condition for the extension of a Convention to any States or territories is that they must impose taxes substantially similar in character to those to which the Convention applies."

Paragraph 2: Corresponds to paragraph 2 of the Commentary on Article 28 of the 1977 Model as it read before 28 January 2003. Paragraph 2 of the Commentary on Articles 29 and 30 was renumbered as paragraph 2 of the Commentary on Articles 30 and 31 (see history of paragraph 2 of the Commentary on Articles 30 and 31) and paragraph 2 of the Commentary on Article 28 was renumbered as paragraph 2 of the Commentary on Article 29 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 2 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 3: Renumbered as paragraph 3 of the Commentary on Articles 30 and 31 (see history of paragraph 3 of the Commentary on Articles 30 and 31) by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 4: Renumbered as paragraph 4 of the Commentary on Articles 30 and 31 (see history of paragraph 4 of the Commentary on Articles 30 and 31) by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 5: Renumbered as paragraph 5 of the Commentary on Articles 30 and 31 (see history of paragraph 5 of the Commentary on Articles 30 and 31) by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

COMMENTARY ON ARTICLES 30 AND 31 CONCERNING THE ENTRY INTO FORCE AND THE TERMINATION OF THE CONVENTION

1. The present provisions on the procedure for entry into force, ratification and termination are drafted for bilateral conventions and correspond to the rules usually contained in international treaties.

(Renumbered on 28 January 2003; see HISTORY)

2. Some Contracting States may need an additional provision in the paragraph 1 of Article 30 indicating the authorities which have to give their consent to the ratification. Other Contracting States may agree that the Article should indicate that the entry into force takes place after an exchange of notes confirming that each State has completed the procedures required for such entry into force.

(Renumbered and amended on 28 January 2003; see HISTORY)

3. It is open to Contracting States to agree that the Convention shall enter into force when a specified period has elapsed after the exchange of the instruments of ratification or after the confirmation that each State has completed the procedures required for such entry into force.

(Renumbered on 28 January 2003; see HISTORY)

4. No provisions have been drafted as to the date on which the Convention shall have effect or cease to have effect, since such provisions would largely depend on the domestic laws of the Contracting States concerned. Some of the States assess tax on the income received during the current year, others on the income received during the previous year, others again have a fiscal year which differs from the calendar year. Furthermore, some conventions provide, as regards taxes levied by deduction at the source, a date for the application or termination which differs from the date applying to taxes levied by assessment.

(Renumbered on 28 January 2003; see HISTORY)

5. As it is of advantage that the Convention should remain in force at least for a certain period, the Article on termination provides that notice of termination can only be given after a certain year, to be fixed by bilateral agreement. It is open to the Contracting States to decide upon the earliest year during which such notice can be given or even to agree not to fix any such year, if they so desire.

(Renumbered on 28 January 2003; see HISTORY)

HISTORY

Articles 30 and 31 correspond to Article 29 and 30 as they read before 28 January 2003. These Articles were renumbered as a consequence of the addition of a new Article 27 (Assistance in the Collection of Taxes) by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. The addition of the new Article 27 required the renumbering of Articles 28, 29 and 30 as Articles 29, 30 and 31 (see history of the Commentary on these Articles).

Paragraph 1: Corresponds to paragraph 1 of the Commentary on Articles 29 and 30 of the 1977 Model as it read before 28 January 2003. Paragraph 1 of the Commentary on Articles 29 and 30 was renumbered as paragraph 1 of the Commentary on Articles 30 and 31 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 1 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. The present provisions on the procedure for entry into force, ratification, denunciation and termination are drafted for bilateral Conventions and correspond to the rules usually contained in international treaties."

Paragraph 2: Corresponds to paragraph 2 of the Commentary on Articles 29 and 30 of the 1977 Model as it read before 28 January 2003. Paragraph 2 of the Commentary on Articles 29 and 30 was renumbered as paragraph 2 of the Commentary on Articles 30 and 31, and was amended by replacing a reference to article 29, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 2 read as follows:

> "2. Some Contracting States may need an additional provision in the first paragraph of Article 29 indicating the authorities which have to give their consent to the ratification. Other Contracting States may agree that the Article should indicate that the entry into force takes place after an exchange of notes confirming that each State has completed the procedures required for such entry into force."

Paragraph 2 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. In the case of some Contracting States, constitutional requirements may necessitate an additional provision in the first paragraph of the Article on entry into force indicating the authorities which have to give their consent to the ratification."

Paragraph 3: Corresponds to paragraph 3 of the Commentary on Articles 29 and 30 of the 1977 Model as it read before 28 January 2003. Paragraph 3 of the Commentary on Articles 29 and 30 was renumbered as paragraph 3 of the Commentary on Articles 30 and 31 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 3 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 3 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 4 (see history of paragraph 4) and a new paragraph 3 was added when the 1977 Model Convention was adopted.

Paragraph 4: Corresponds to paragraph 4 of the Commentary on Articles 29 and 30 of the 1977 Model as it read before 28 January 2003. Paragraph 4 of the Commentary on Articles 29 and 30 was renumbered as paragraph 4 of the Commentary on Articles 30 and 31 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 4 of the 1977 Model Convention corresponded to paragraph 3 of the 1963 Draft Convention. Paragraph 4 of the 1963 Draft Convention was amended and renumbered as paragraph 5 (see history of paragraph 5) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 3 of the 1963 Draft Convention was amended and renumbered as paragraph 4 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

> "3. No provisions have been drafted as to the date on which the Convention shall have effect or cease to have effect, since such provisions would largely depend on the national laws of the Contracting States concerned, Some of the States assess tax on the income received during the current year, others on the income received during the previous year, others again have a fiscal year which differs from the calendar year. Furthermore, some Conventions provide, as regards taxes levied by deduction at the source, a date for the application or termination of the Convention which differs from the date applying to taxes levied by assessment."

Paragraph 5: Corresponds to paragraph 5 of the Commentary on Articles 29 and 30 of the 1977 Model as it read before 28 January 2003. Paragraph 5 of the Commentary on Articles 29 and 30 was renumbered as paragraph 5 of the Commentary on Articles 30 and 31 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 5 of the 1977 Model Convention corresponded to paragraph 4 of the 1963 Draft Convention. Paragraph 4 of the 1963 Draft Convention was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

> "4. As it is of advantage that the Convention should remain in force at least for a certain period, the Article on denunciation provides that notice of termination can only be given after a certain year — to be fixed by bilateral agreement. It is open to the Contracting States to decide upon the earliest year during which such notice can be given or even to agree not to fix any such year, if they so desire."

NON-OECD ECONOMIES' POSITIONS ON THE OECD MODEL TAX CONVENTION

INTRODUCTION

1. When, in 1991, the Committee on Fiscal Affairs adopted the concept of an ambulatory Model Tax Convention, it also decided that because the influence of the Model Tax Convention had extended far beyond the OECD member countries, the ongoing process through which the Model Tax Convention would be updated should be opened up to benefit from the input of non-OECD economies.

2. Pursuant to that decision, the Committee on Fiscal Affairs decided, in 1996, to organise annual meetings that would allow experts of member countries and some non-OECD economies to discuss issues related to the negotiation, application and interpretation of tax conventions. Recognising that non-OECD economies could only be expected to associate themselves to the development of the Model Tax Convention if they could retain their freedom to disagree with its contents, the Committee also decided that these countries should, like member countries, have the possibility to identify the areas where they are unable to agree with the text of an Article or with an interpretation given in the Commentary.

3. This has led to the inclusion in the Model Tax Convention of this section, which sets out the positions of a number of non-OECD economies on the Articles of the Model and the Commentary thereon. It is intended that this document will be periodically updated, like the rest of the Model Tax Convention, to reflect changes in the views of participating economies.

4. This section reflects the following non-OECD economies' positions on the Model Tax Convention:

Albania	Argentina	Armenia
Belarus	Brazil	Bulgaria
Croatia	Democratic Republic of the Congo	Estonia
Gabon	Hong Kong, China	India
Indonesia	Israel	Ivory Coast
Kazakhstan	Latvia	Lithuania
Malaysia	Morocco	People's Republic of China
Philippines	Romania	Russia
Serbia	South Africa	Thailand
Tunisia	Ukraine	United Arab Emirates
Vietnam		

5. Whilst these economies generally agree with the text of the Articles of the Model Tax Convention and with the interpretations put forward in the Commentary, there are for each economy some areas of disagreement. For each Article of the Model Tax Convention, the positions that are presented in this section indicate where a country disagrees with the text of the Article and where it disagrees with an interpretation given in the Commentary in relation to the Article.[1] As is the case with the observations and reservations of member countries, no reference is made to cases where an economy would like to supplement the text of an Article with provisions that do not conflict with the Article, especially if these provisions are offered as alternatives in the Commentary, or would like to put forward an interpretation that does not conflict with the Commentary.

1 Indonesia and the People's Republic of China wish to clarify expressly that in the course of negotiations with other countries, it will not be bound by their stated positions included in this section.

POSITIONS ON ARTICLE 1
(PERSONS COVERED)
AND ITS COMMENTARY

Positions on the Article

1. The *Philippines* reserves the right to tax its citizens in accordance with its domestic law.

2. *Brazil* reserves the right to extend coverage of the Convention to partnerships since partnerships are considered to be legal entities under its legislation.

Positions on the Commentary

3. *Gabon*, *India*, *Ivory Coast*, *Morocco* and *Tunisia* do not agree with the interpretation put forward in paragraph 5 and 6 of the Commentary on Article 1 (and in the case of India, the corresponding interpretation in paragraph 8.8 of the Commentary on Article 4) according to which if a partnership is denied the benefits of a tax convention, its members are entitled to the benefits of the tax conventions entered into by their State of residence. They believe that this result is only possible, to a certain extent, if provisions to that effect are included in the convention entered into with the State where the partnership is situated.

(Amended on 17 July 2008; see HISTORY)

4. *(Deleted on 22 July 2010; see HISTORY)*

HISTORY

Paragraph 1: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Amended on 17 July 2008, by adding India to the list of countries indicating the position and extending the position in respect of India, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 3 read as follows:

> "3. *Gabon*, *Ivory Coast*, *Morocco* and *Tunisia* do not agree with the interpretation put forward in paragraphs 5 and 6 above according to which if a partnership is denied the benefits of a tax convention, its members are entitled to the benefits of the tax conventions entered into by their State of residence. They believe that this result is only possible, to a certain extent, if provisions to that effect are included in the convention entered into with the State where the partnership is situated."

Added on 28 January 2003 together with the heading preceding it, by the report entitled "The 2002 Update to the Model Tax Convention", which was adopted by the OECD Council on 28 January 2003.

Paragraph 4: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 4 read as follows:

> "4. *Chile* considers that some of the solutions put forward in the report "The Application of the OECD Model Tax Convention to Partnerships" and incorporated in the Commentary should only be applicable when especially included in tax conventions. For instance, the different treatment and legal form between States makes the solution of the treatment of partners of partnerships that are fiscally transparent very difficult to administer and should be specifically dealt with by treaty partners."

Paragraph 4 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

POSITIONS ON ARTICLE 2 (TAXES COVERED) AND ITS COMMENTARY

Positions on the Article

Paragraph 1

1. Wherever the terms "capital" and "movable property" appear in the Convention, *Belarus* reserves the right to replace these terms, which do not exist in its domestic law, by "property" and "property other than immovable property" respectively.

2. *Brazil* reserves its position on that part of paragraph 1 which states that the Convention should apply to taxes of political subdivisions or local authorities, as well as on the final part of the paragraph which reads "irrespective of the manner in which they are levied".

3. Since they have no tax on capital, *Brazil* and *Indonesia* reserve the right not to include any reference to such tax in paragraph 1.

(Amended on 22 July 2010; see HISTORY)

4. *Romania* reserves the right to include taxes imposed on behalf of administrative-territorial units.

5. *South Africa* reserves its position on that part of paragraph 1 which states that the Convention should apply to taxes of local authorities.

5.1 *(Deleted on 22 July 2010; see HISTORY)*

Paragraph 2

6. *Brazil* wishes to use, in its conventions, a definition of income tax that is in accordance with its constitutional legislation. Accordingly, it reserves the right not to include paragraph 2 in its conventions.

7. *Armenia*, *Latvia*, *Lithuania*, *Romania* and *Tunisia* hold the view that "taxes on the total amounts of wages or salaries paid by enterprises" should not be regarded as taxes on income and therefore reserve the right not to include these words in paragraph 2.

(Amended on 17 July 2008; see HISTORY)

8. *Ukraine* reserves its position on that part of paragraph 2 which states that the Convention shall apply to taxes on capital appreciation.

9. *(Deleted on 29 April 2000; see HISTORY)*

HISTORY

Paragraph 1: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Amended on 22 July 2010, by adding Indonesia as a country indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 3 read as follows:

> "3. Since it has no tax on capital, *Brazil* reserves its right not to include any reference to such tax in paragraph 1."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5.1: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 5.1 read as follows:

> "5.1 *Chile* reserves its position on that part of paragraph 1 which states that the Convention should apply to taxes of political subdivisions or local authorities."

Paragraph 5.1 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 6: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7: Amended on 17 July 2008, by changing the list of countries indicating the position by adding Armenia and deleting Estonia and Russia from the list, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 7 read as follows:

> "7. *Estonia*, *Latvia*, *Lithuania*, *Romania*, *Russia* and *Tunisia* hold the view that "taxes on the total amounts of wages or salaries paid by enterprises" should not be regarded as taxes on income and therefore reserve the right not to include these words in paragraph 2."

Paragraph 7 was previously amended, by adding Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003 paragraph 7 read as follows:

> "7. *Estonia*, *Latvia*, *Lithuania*, *Romania* and *Russia* hold the view that "taxes on the total amounts of wages or salaries paid by enterprises" should not be regarded as taxes on income and therefore reserve the right not to include these words in paragraph 2.Paragraph 7 was included when this section was added in 1997 by the

report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997."

Paragraph 8: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23October 1997.

Paragraph 9: Deleted, along with the heading that preceded it, on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Council on 29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 9 and the heading that preceded it read as follows:

"Paragraph 4

9. *Argentina*, *China*, *Estonia*, *Latvia*, *Lithuania*, *Romania*, *Russia*, *South Africa*, *Thailand* and *Vietnam* wish to confine the obligation to exchange information to significant or important changes in tax laws as they occur from time to time.

Paragraph 9 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the Council of the OECD on 23 October 1997."

POSITIONS ON ARTICLE 3 (GENERAL DEFINITIONS) AND ITS COMMENTARY

Positions on the Article

1. With respect to the definition of “company”, *Albania* and *Belarus* reserve the right to replace the concept of “body corporate”, which does not exist in their domestic law, by “any legal person or any entity which is treated as a separate entity for tax purposes”.

(Amended on 28 January 2003; see HISTORY)

2. *Israel* reserves the right to include a trust within the definition of a “person”.

(Added on 22 July 2010; see HISTORY)

3. With respect to the definition of “national”, *Albania*, *Romania* and *Russia* reserve the right to replace the term “nationality” by “citizenship” as the term “nationality” does not mean “citizenship” under their law.

(Amended on 28 January 2003; see HISTORY)

4. *Bulgaria* reserves the right to propose in bilateral negotiations to include a definition of the term “business profits”, which covers both profits of a company and income of an individual, derived from carrying on of a business through a permanent establishment. This inclusion is a consequence of the deletion of Article 14 and results in the possibility of applying Article 7 in conformity with Bulgarian internal legislation as regards income, derived by individuals.

(Added on 28 January 2003; see HISTORY)

4.1 *Brazil* reserves the right not to include the definitions of “enterprise” and “business” in paragraph 1 of Article 3 because it reserves the right to include an article concerning the taxation of independent personal services.

(Added on 22 July 2010; see HISTORY)

5. With respect to the definition of “international traffic”, *Bulgaria* and *Croatia* reserve the right to extend the scope of the definition to cover road and railway transportation in bilateral conventions.

(Added on 28 January 2003; see HISTORY)

6. *Serbia* reserves the right to extend the scope of the definition of “international traffic” to cover road transportation in bilateral conventions.

(Amended on 17 July 2008; see HISTORY)

7. *Thailand* reserves the right to include in the definition of "person" any entity treated as a taxable unit under the taxation laws in force in either Contracting State.

(Added on 22 July 2010; see HISTORY)

8. *India* reserves the right to include in the definition of "person" only those entities which are treated as taxable unit under the taxation laws in force in the respective Contracting States.

(Added on 17 July 2008; see HISTORY)

9. *India* reserves the right to include definitions of "tax" and "fiscal year".

(Added on 17 July 2008; see HISTORY)

10. *Hong Kong, China* reserves the right to omit the phrase "operated by an enterprise that has its place of effective management in a Contracting State" from the definition of "international traffic" in subparagraph *e)* of paragraph 1.

(Amended on 22 July 2010; see HISTORY)

11. *Hong Kong, China* reserves its position with respect to the definition of "national" in subparagraph *g)* of paragraph 1, because Hong Kong, China is not a sovereign state. Where the term "national" appears in Article 4, 19, 24 and 25, Hong Kong, China reserves the right to use alternative provisions based on the concepts of "right of abode" and "incorporated or constituted in".

(Replaced on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Amended on 28 January 2003, by adding Albania as a country indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003 paragraph 1 read as follows:

> "1. With respect to the definition of "company", *Belarus* reserves the right to replace the concept of "body corporate", which does not exist in its domestic law, by "any legal person or any entity which is treated as a separate entity for tax purposes"."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 2 was previously deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 2 read as follows:

> "2. With respect to the definition of "national", *Lithuania* reserves the right to include in that definition the words "or other entity" to cover all entities deriving their status from the laws in force in Lithuania."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Amended on 28 January 2003, by adding Albania to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003 paragraph 1 read as follows:

> "3. With respect to the definition of "national", *Romania* and *Russia* reserve the right to replace the term "nationality" by "citizenship" as the term "nationality" does not mean "citizenship" under their law."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 4.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 4.1 was deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 4.1 read as follows:

> "4.1 *Serbia and Montenegro* reserves the right not to include the definitions in subparagraph 1 *c)* and *h)* ("enterprise" and "business") because it reserves the right to include an article concerning the taxation of independent personal services."

Paragraph 4.1 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 5: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 6: Amended on 17 July 2008 by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 6 read as follows:

> "6. *Serbia and Montenegro* reserves the right to extend the scope of the definition of "international traffic" to cover road transportation in bilateral conventions."

Paragraph 6 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 7 was deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 7 read as follows:

> "7. *Serbia and Montenegro* reserves the right to propose in bilateral negotiations to include a definition of the term "political subdivisions", which in the state community Serbia and Montenegro, means Member States."

Paragraph 7 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 8: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 9: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 10: Amended on 22 July 2010, by changing the countries indicating the position by adding Hong Kong, China and deleting Chile, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008, and until 22 July 2010 paragraph 10 read as follows:

> "10. *Chile* reserves the right to omit the phrase "operated by an enterprise that has its place of effective management in a Contracting State" from the definition of "international traffic" in subparagraph *e)* of paragraph 1."

'Paragraph 10 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 11: Replaced and the preceding heading was deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 11 read as follows:

> "Position on the Commentary
>
> 11. With respect to paragraph 11, *Chile* is of the view that the Commentary to the OECD Model Convention is an important reference for the Chilean Tax authority when interpreting Chilean treaties with equal or similar wording to the Model. When interpreting a particular treaty, however, the view held by the Tax authority is that only that edition of the Commentary which was applicable at the time of the treaty's completion can be used as guidance. A newer Commentary that is merely clarifying what had been the correctly understood meaning should in this context be distinguished from wording that attempts to alter the previous meaning of the Commentary."

Paragraph 11 was added together with the heading preceding it, on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 4 (RESIDENT) AND ITS COMMENTARY

Positions on the Article

Paragraph 1

1. *Albania*, *Armenia*, *Belarus*, *Estonia*, *Indonesia*, *Latvia*, *Lithuania*, *Russia*, *Thailand*, *Ukraine* and *Vietnam* reserve the right to include the place of incorporation or a similar criterion (registration for Belarus and Vietnam) in paragraph 1.

(Amended on 22 July 2010; see HISTORY)

2. The *United Arab Emirates* reserves the right to adopt its own definition of residence in its bilateral conventions and not necessarily follow Article 4.

(Added on 22 July 2010; see HISTORY)

2.1 *Hong Kong, China* reserves the right to modify the definition of "resident" in its bilateral agreements because it is not a sovereign state and it taxes on a territorial basis.

(Added on 22 July 2010; see HISTORY)

3. *Brazil* reserves the right not to include the second sentence of paragraph 1 in its conventions as the position of diplomatic staff is dealt with under its domestic law.

4. *India* and *Russia* reserve the right to amend the Article in their tax conventions in order to specify that their partnerships must be considered as residents of their respective countries in view of their legal and tax characteristics.

(Amended on 17 July 2008; see HISTORY)

4.1 *Gabon*, *Ivory Coast*, *Morocco* and *Tunisia* do not agree with the general principle according to which if tax owed by a partnership is determined on the basis of the personal characteristics of the partners, these partners are entitled to the benefits of tax conventions entered into by the States of which they are residents as regards income that "flows through" that partnership. Under their domestic law, a partnership is considered to be liable to tax even though, technically, that tax is collected from the partners or in the case of Morocco from the principal partner; for that reason, Gabon, Ivory Coast, Morocco and Tunisia reserve the right to amend the Article in their tax conventions in order to specify that their partnerships must be considered as residents of their country in view of their legal and tax characteristics.

(Added on 28 January 2003; see HISTORY)

4.2 *(Deleted on 22 July 2010; see HISTORY)*

Paragraph 3

5. *Armenia*, *Bulgaria*, *Russia*, *Thailand* and *Vietnam* reserve the right to use the place of incorporation (registration for Vietnam) as the test for paragraph 3.

(Amended on 22 July 2010; see HISTORY)

6. *(Deleted on 22 July 2010; see HISTORY)*

7. *Israel* reserves the right to include a separate provision regarding a trust that is a resident of both Contracting States.

(Replaced on 22 July 2010; see HISTORY)

8. *India* and *Kazakhstan* reserve the right to include a provision that will refer to a mutual agreement procedure for determination of the country of residence in case of a dual resident person other than an individual if the State in which its effective place of management is situated cannot be determined.

(Replaced on 17 July 2008; see HISTORY)

8.1 *Bulgaria* reserves the right to include a provision that will refer to the State of derivation of the legal status and, in case this State could not be determined, to the mutual agreement procedure, for the determination of the country of residence in the case of a dual resident person other than an individual and a company and, in the absence of such an agreement, it will deny benefits under the Convention to this person.

(Added on 28 January 2003; see HISTORY)

8.2 *(Deleted on 17 July 2008; see HISTORY)*

Positions on the Commentary

Paragraph 2

9. In the opinion of *Vietnam* the personal relations and economic relations mentioned in paragraph 14 and 15 of the Commentary should be separated and one given priority over the other. For Vietnam, economic relations, particularly the criterion of the country where employment is exercised, is more important to determine the country of residence for treaty purposes in the case of a dual resident individual.

9.1 In the case of *Gabon*, since the phrase “and economic relations” used in paragraph 13, 14 and 15 of the Commentary is ambiguous, these two types of relations should be distinguished and one type may have priority over the other. The State in which employment is exercised should therefore prevail

over the personal relations for purposes of determining the State of residence of an individual.

(Added on 28 January 2003; see HISTORY)

9.2 *Kazakhstan* reserves the right to replace subparagraph *d*) by: "*d)* if the individual's status cannot be determined by reason of subparagraphs *a)* to *c)* of this paragraph, the competent authorities of the Contracting States shall settle the question by mutual agreement."

(Added on 17 July 2008; see HISTORY)

9.3 *Indonesia* is of the opinion that in considering the dual residence of an individual, economic relations shall have priority over personal relations.

(Added on 22 July 2010; see HISTORY)

Paragraph 3

10. The interpretation by *Argentina*, *Armenia*, *Russia*, *Ukraine* and *Vietnam* of the term "place of effective management" is practical day to day management, irrespective of where the overriding control is exercised.

(Amended on 17 July 2008; see HISTORY)

11. *India* does not adhere to the interpretation given in paragraph 24 that the place of effective management is the place where key management and commercial decisions that are necessary for the conduct of the entity's business as a whole are in substance made. It is of the view that the place where the main and substantial activity of the entity is carried on is also to be taken into account when determining the place of effective management.

(Added on 17 July 2008; see HISTORY)

12. *Brazil* does not adhere to the interpretation given in paragraph 24 of the Commentary since it considers that such definition is an issue to be dealt with by domestic law and domestic court decisions.

(Added on 17 July 2008; see HISTORY)

HISTORY

Paragraph 1: Amended on 22 July 2010, by adding Indonesia to the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 1 read as follows:

> "1. *Armenia*, *Albania*, *Belarus*, *Estonia*, *Latvia*, *Lithuania*, *Russia*, *Thailand*, *Ukraine* and *Vietnam* reserve the right to include the place of incorporation or a similar criterion (registration for Belarus and Vietnam) in paragraph 1."

Paragraph 1 was previously amended on 17 July 2008, by adding Armenia to the list of countries indicating the position and by making other minor amendments, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD

Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 1 read as follows:

"1. *Albania*, *Belarus*, *Estonia*, *Latvia*, *Lithuania*, *Russia*, *Thailand*, *Ukraine* and *Vietnam* reserve the right to include the place of incorporation (registration for Belarus) or a similar criterion in paragraph 1."

Paragraph 1 was previously amended on 28 January 2003, by adding Albania to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 1 read as follows:

"1. *Belarus*, *Estonia*, *Latvia*, *Lithuania*, *Russia*, *Thailand*, *Ukraine* and *Vietnam* reserve the right to include the place of incorporation (registration for Belarus) or a similar criterion in paragraph 1."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 2 was previously deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 2 read as follows:

"2. As *South Africa* does not have a concept of residence for tax purposes in view of its territorial tax system, it reserves the right to use the terms "ordinarily resident" and "place of effective management" in paragraph 1 for the purposes of identifying residents of South Africa."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 3: Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Amended on 17 July 2008, by adding India to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 4 read as follows:

"4. *Russia* reserves the right to amend the Article in its tax conventions in order to specify that Russian partnerships must be considered as residents of Russia in view of their legal and tax characteristics."

Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 4.2: Deleted, together with the heading preceding it, on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 4.2 and the heading preceding it read as follows:

"*Paragraph 2*

4.2 *Israel* reserves the right to reorder the hierarchy of the residence tie-breaker tests for individuals by placing centre of vital interests before the permanent home available criteria."

Paragraph 4.2 was added together with the heading preceding it on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 5: Amended on 22 July 2010, by deleting Belarus from the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 5 read as follows:

"5. *Armenia*, *Belarus*, *Bulgaria*, *Russia*, *Thailand* and *Vietnam* reserve the right to use the place of incorporation (registration for Belarus and Vietnam) as the test for paragraph 3."

Paragraph 5 was previously amended on 17 July 2008, by adding Armenia and Russia to the list of countries indicating the position and other minor amendments, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 5 read as follows:

"5. *Belarus*, *Bulgaria*, *Thailand* and *Vietnam* reserve the right to use the place of incorporation (registration for Belarus) as the test for paragraph 3."

Paragraph 5 was previously amended on 28 January 2003, by adding Bulgaria to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 5 read as follows:

"5. *Belarus*, *Thailand* and *Vietnam* reserve the right to use the place of incorporation (registration for Belarus) as the test for paragraph 3."

Paragraph 5 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 6: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 6 read as follows:

"6. The *People's Republic of China* reserves its position on the provisions in this and other articles of the Convention which refer directly or indirectly to the place of effective management. Instead of the term "place of effective management", the People's Republic of China wishes to use in its conventions the term "head office"."

Paragraph 6 was previously amended on 17 July 2008, by replacing "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 6 read as follows:

"6. *China* reserves its position on the provisions in this and other articles of the Convention which refer directly or indirectly to the place of effective management. Instead of the term "place of effective management", China wishes to use in its conventions the term "head office"."

Paragraph 6 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until it was deleted on 22 July 2010, paragraph 7 read as follows:

> "7. *Belarus* reserves the right to replace paragraph 3 (if the other Contracting State does not agree to the use of the place of registration in this paragraph) by a provision that will refer to the mutual agreement procedure for the determination of the country of residence in the case of a dual resident person other than an individual."

Paragraph 7 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 8: Replaced on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 8 read as follows:

> "8. *Estonia*, *Latvia*, *Lithuania*, *Malaysia* and *Serbia and Montenegro* reserve the right to replace paragraph 3 by a provision that will refer to the mutual agreement procedure for the determination of the country of residence in the case of a dual resident person other than an individual and, in the absence of such an agreement, that will deny benefits under the Convention to this person."

Paragraph 8 was amended on 15 July 2005, by adding Malaysia and Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 8 read as follows:

> "8. *Estonia*, *Latvia* and *Lithuania* reserve the right to replace paragraph 3 by a provision that will refer to the mutual agreement procedure for the determination of the country of residence in the case of a dual resident person other than an individual and, in the absence of such an agreement, that will deny benefits under the Convention to this person."

Paragraph 8 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 8.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 8.2: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 8.2 read as follows:

> "8.2 *Malaysia* reserves the right to replace paragraph 3 by a provision that will refer to the mutual agreement procedure for the determination of the country of residence in the case of a dual resident person other than an individual."

Paragraph 8.2 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 9: Paragraph 9 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 9.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 9.2: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 9.3: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 10: Amended on 17 July 2008, by adding Armenia and Russia to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model

Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 10 read as follows:

> "10. The interpretation by *Argentina*, *Ukraine* and *Vietnam* of the term "place of effective management" is practical day to day management, irrespective of where the overriding control is exercised."

Paragraph 10 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 11: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 12: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 5
(PERMANENT ESTABLISHMENT)
AND ITS COMMENTARY

Positions on the Article

1. Considering the special problems in applying the provisions of the Model Convention to activities carried on offshore in a Contracting State in connection with the exploration or exploitation of the sea bed, its subsoil and their natural resources, *Latvia* and *Lithuania* reserve the right to insert in a special Article provisions relating to such activities.

Paragraph 2

2. In paragraph 2, in addition to "the extraction of" natural resources, *Argentina*, *Brazil*, *Gabon*, *Ivory Coast*, *Morocco*, the *Philippines*, *Russia*, *Thailand*, *Tunisia* and the *United Arab Emirates* reserve the right to refer to the "exploration for" such resources.

(Amended on 22 July 2010; see HISTORY)

2.1 *Indonesia* reserves the right to add to paragraph 2 the exploration and exploitation of natural resources and a drilling rig or working ship used for exploration and exploitation of natural resources.

(Added on 22 July 2010; see HISTORY)

3. *India* and *Indonesia* reserve the right to add to paragraph 2 additional subparagraphs that would cover a sales outlet and a farm, plantation or other place where agricultural, forestry, plantation or related activities are carried on.

(Amended on 22 July 2010; see HISTORY)

4. *India*, *Indonesia*, *Thailand* and *Vietnam* reserve the right to add to paragraph 2 an additional subparagraph that would cover a warehouse in relation to a person supplying storage facilities for others.

(Amended on 22 July 2010; see HISTORY)

5. *Armenia* and *Ukraine* reserve the right to add to paragraph 2 an additional subparagraph that would cover an installation, or structure for the exploration for natural resources and a warehouse or other structure used for the sale of goods.

(Amended on 17 July 2008; see HISTORY)

6. *Gabon* and *Vietnam* reserve the right to add to paragraph 2 an additional subparagraph that would cover an installation structure or equipment used for the exploration for natural resources.

(Amended on 28 January 2003; see HISTORY)

6.1 *Argentina*, *Gabon* and *Ivory Coast* reserve the right to add to paragraph 2 an additional subparagraph that would cover places where fishing activities take place.

(Added on 28 January 2003; see HISTORY)

6.2 *Kazakhstan* reserves the right to add to paragraph 2 an additional subparagraph that would cover a pit, an installation and a structure for the exploration for natural resources.

(Added on 17 July 2008; see HISTORY)

Paragraph 3

7. *Argentina* reserves its position on paragraph 3 and considers that any building site or construction, assembly, or installation project that lasts more than three months should be regarded as a permanent establishment.

8. *Armenia*, *Brazil*, *Thailand* and *Vietnam* reserve their position on paragraph 3 as they consider that any building site or construction, assembly or installation project which lasts more than six months should be regarded as a permanent establishment.

(Amended on 22 July 2010; see HISTORY)

9. *Albania*, the *Democratic Republic of the Congo*, *Lithuania* and *Hong Kong, China* reserve their position on paragraph 3 and consider that any building site, construction, assembly or installation project or a supervisory or consultancy activity connected therewith constitutes a permanent establishment if such site, project or activity lasts for a period of more than six months.

(Amended on 22 July 2010; see HISTORY)

9.1 *Serbia* reserves the right to treat any building site, construction, assembly or installation project or a supervisory or consultancy activity connected therewith as constituting a permanent establishment only if such site, project or activity lasts for a period of more than twelve months.

(Amended on 22 July 2010; see HISTORY)

10. *Bulgaria*, *Gabon*, *Ivory Coast*, *Malaysia*, *Morocco*, the *People's Republic of China*, *South Africa* and *Tunisia* reserve their right to negotiate the period of time after which a building site or construction, assembly, or installation

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

project should be regarded as a permanent establishment under paragraph 3.

(Amended on 17 July 2008; see HISTORY)

11. *Argentina*, *Malaysia*, the *People's Republic of China*, *South Africa*, *Thailand* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if the enterprise carries on supervisory activities in connection with a building site or a construction, assembly, or installation project that constitute a permanent establishment under paragraph 3 (in the case of Malaysia, the period for this permanent establishment is negotiated separately).

(Amended on 17 July 2008; see HISTORY)

11.1 *India* and *Indonesia* reserve the right to replace "construction or installation project" with "construction, installation or assembly project or supervisory activities in connection therewith" and reserve the right to negotiate the period of time for which these should last to be regarded as a permanent establishment.

(Amended on 22 July 2010; see HISTORY)

12. *Argentina* reserves the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services, through employees or other personnel engaged by the enterprise for such purpose, but only where activities of that nature continue (for the same or a connected project) within the country for a period or periods aggregating more than three months.

13. *Gabon*, *India*, *Indonesia*, *Ivory Coast*, *Morocco*, and *Tunisia* reserve the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services through employees or other personnel engaged by the enterprise for such purpose but only where such activities continue for the same project or a connected project for a period or periods aggregating more than a period to be negotiated.

(Amended on 22 July 2010; see HISTORY)

14. *Albania*, *Armenia*, *Lithuania*, *Serbia*, *South Africa*, *Thailand*, *Vietnam* and *Hong Kong, China* reserve the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services, through employees or other personnel engaged by the enterprise for such purpose, but only where activities of that nature continue (for the same or a connected project [other than in the case of Armenia]), within the country for a period or periods aggregating more than six months within any twelve month period.

(Amended on 22 July 2010; see HISTORY)

14.1 The *Democratic Republic of the Congo*, *Gabon*, *Ivory Coast*, *Latvia*, *Morocco*, *South Africa* and *Tunisia* reserve the right to deem any person performing professional services or other activities of an independent character to have a permanent establishment if that person is present in the State for a period or periods exceeding in the aggregate 183 days in any twelve month period.

(Amended on 22 July 2010; see HISTORY)

14.2 *Bulgaria* and *Estonia* reserve the right to deem an individual performing professional services or other services of an independent character to have a permanent establishment for the purposes of the Convention if they are present in the other State for a period or periods exceeding in the aggregate 183 days in any twelve month period.

(Amended on 28 January 2003; see HISTORY)

14.3 *Bulgaria* reserves the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services, through employees or other personnel engaged by the enterprise for such purpose, where activities of that nature continue (for the same or a connected project) within the country for a period or periods aggregating more than six months within any twelve month period.

(Added on 28 January 2003; see HISTORY)

14.4 *Bulgaria* and *Indonesia* reserve the right to insert a provision that deems a permanent establishment to exist if, for more than a negotiated period, an installation, drilling rig or ship is used for the exploration of natural resources.

(Amended on 22 July 2010; see HISTORY)

14.5 *Indonesia*, the *United Arab Emirates* and *Vietnam* reserve the right to tax income derived from activities relating to exploration and exploitation of natural resources.

(Amended on 22 July 2010; see HISTORY)

14.6 *South Africa* reserves the right to insert a provision that deems a permanent establishment to exist if, for more than six months, an enterprise conducts activities relating to the exploration or exploitation of natural resources.

(Added on 17 July 2008; see HISTORY)

14.7 *Israel* reserves the right to insert a provision according to which an installation, drilling rig or ship used for activities connected with the exploration of natural resources shall be treated as constituting a permanent establishment in a Contracting State if those activities last in aggregate more than 365 days in that State in any two year period.

(Replaced on 22 July 2010; see HISTORY)

Paragraph 4

15. *Albania*, *Argentina*, *Armenia*, *Gabon*, *India*, *Indonesia*, *Ivory Coast*, *Malaysia*, *Morocco*, *Russia*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve their position on paragraph 4 as they consider that the term "delivery" should be deleted from subparagraphs *a)* and *b)*.

(Amended on 22 July 2010; see HISTORY)

16. *Albania*, *Argentina* and *Thailand* reserve their position on subparagraph 4 *f)*.

(Amended on 17 July 2008; see HISTORY)

16.1 *(Deleted on 22 July 2010; see HISTORY)*

16.2 The *Democratic Republic of the Congo* reserves its position on paragraph 4 *d)*, *e)* and *f)*.

(Added on 17 July 2008; see HISTORY)

Paragraph 5

17. *Albania*, *Armenia*, *Gabon*, *India*, *Indonesia*, *Ivory Coast*, *Morocco*, *Russia*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if a person acting on behalf of the enterprise habitually maintains a stock of goods or merchandise in a Contracting State from which the person regularly delivers goods or merchandise on behalf of the enterprise.

(Amended on 22 July 2010; see HISTORY)

17.1 *India*, *Malaysia* and *Thailand* reserve the right to treat an enterprise of a Contracting State as having a permanent establishment in the other Contracting State if a person habitually secures orders in the other Contracting State wholly or almost wholly for the enterprise.

(Amended on 22 July 2010; see HISTORY)

17.2 *Indonesia* reserves the right to treat an enterprise as having a permanent establishment if a person acting on behalf of the enterprise, other than an independent agent, manufactures or processes for the enterprise goods or merchandise belonging to the enterprise.

(Added on 22 July 2010; see HISTORY)

Paragraph 6

18. *Albania*, *Gabon*, *Estonia*, *Ivory Coast*, *Lithuania*, *Morocco*, *Serbia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to make clear that an agent whose

activities are conducted wholly or almost wholly on behalf of a single enterprise will not be considered an agent of an independent status.

(Amended on 22 July 2010; see HISTORY)

18.1 *(Deleted on 22 July 2010; see HISTORY)*

19. *Gabon*, *India*, *Indonesia*, *Ivory Coast*, *Morocco*, *Russia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to provide that an insurance enterprise of a Contracting State shall, except with respect to re-insurance (other than in the case of India), be deemed to have a permanent establishment in the other Contracting State if it collects premiums in the territory of that other state or insures risks situated therein through a person other than an agent of an independent status to whom paragraph 6 applies.

(Amended on 22 July 2010; see HISTORY)

19.1 *India* reserves the right to make it clear that an agent whose activities are conducted wholly or almost wholly on behalf of a single enterprise will not be considered an agent of an independent status.

(Added on 17 July 2008; see HISTORY)

Positions on the Commentary

20. *India*, *Morocco* and *Vietnam* do not agree with the words "The twelve month test applies to each individual site or project" found in paragraph 18 of the Commentary. They consider that a series of consecutive short term sites or projects operated by a contractor would give rise to the existence of a permanent establishment in the country concerned.

(Amended on 17 July 2008; see HISTORY)

21. *Bulgaria* and *Serbia* would add to paragraph 33 of the Commentary on Article 5 their views that a person, who is authorised to negotiate the essential elements of the contract, and not necessarily all the elements and details of the contract, on behalf of a foreign resident, can be said to exercise the authority to conclude contracts.

(Amended on 17 July 2008; see HISTORY)

22. *Bulgaria* does not adhere to the interpretation, given in paragraph 17 of the Commentary on Article 5, and is of the opinion that on-site planning and supervision of the erection of a building, where carried on by another person, are not covered by paragraph 3 of the Article, if not expressly provided for.

(Added on 28 January 2003; see HISTORY)

23. *Brazil* does not agree with the interpretation provided in paragraph 42.1 to 42.10 on electronic commerce, especially in view of the principle of taxation at the source of payments in its legislation.

(Added on 28 January 2003; see HISTORY)

23.1 *(Deleted on 22 July 2010; see HISTORY)*

24. *India* deems as essential to take into consideration that irrespective of the meaning given to the third sentence of paragraph 1.1 — as far as the method for computing taxes is concerned, national systems are not affected by the new wording of the model *i.e.* by the elimination of Article 14.

(Added on 17 July 2008; see HISTORY)

25. *India* and *Malaysia* do not agree with the interpretation given in paragraph 5.3 (first part of the paragraph) and 5.4 (first part of the paragraph); they are of the view that these examples could also be regarded as constituting permanent establishments.

(Amended on 22 July 2010; see HISTORY)

26. *India* does not agree with the interpretation given in paragraph 8; it is of the view that tangible or intangible properties by themselves may constitute a permanent establishment of the lessor in certain circumstances.

(Added on 17 July 2008; see HISTORY)

27. *India* does not agree with the interpretation given in paragraph 10; it is of the view that ICS equipment may constitute a permanent establishment of the lessor in certain circumstances.

(Added on 17 July 2008; see HISTORY)

28. *India* does not adhere to the interpretation given in paragraph 12 and 42.25 concerning the list of examples of paragraph 2 of the Article; it is of the view that the examples can always be regarded as constituting *a priori* permanent establishments.

(Added on 17 July 2008; see HISTORY)

29. *India* does not agree with the interpretation given in paragraph 23; it would not include scientific research in the list of examples of activities indicative of preparatory or auxiliary nature.

(Added on 17 July 2008; see HISTORY)

30. *India* does not agree with the interpretation given in paragraph 25; it is of the view that when an enterprise has established an office (such as a commercial representation office) in a country, and the employees working at that office are substantially involved in the negotiation of contracts for the import of products or services into that country, the office will in most cases

not fall within paragraph 4 of Article 5. Substantial involvement in the negotiations exists when the essential parts of the contract — the type, quality, and amount of goods, for example, and the time and terms of delivery are determined by the office. These activities form a separate and indispensable part of the business activities of the foreign enterprise, and are not simply activities of an auxiliary or preparatory character.

(Added on 17 July 2008; see HISTORY)

31. *India* does not agree with the interpretation given in paragraph 33; it is of the view that the mere fact that a person has attended or participated in negotiations in a State between an enterprise and a client, can in certain circumstances, be sufficient, by itself, to conclude that the person has exercised in that State an authority to conclude contracts in the name of the enterprise. India is also of the view that a person, who is authorised to negotiate the essential elements of the contract, and not necessarily all the elements and details of the contract, on behalf of a foreign resident, can be said to exercise the authority to conclude contracts.

(Added on 17 July 2008; see HISTORY)

32. *India* does not agree with the interpretation given in paragraph 42; it is of the view that where a company (enterprise) resident of a State is a member of a multinational group and is engaged in manufacture or providing services for and on behalf of another company (enterprise) of the same group which is resident of the other State, then the first company may constitute a permanent establishment of the latter if other requirements of Article 5 are satisfied.

(Added on 17 July 2008; see HISTORY)

33. *India* does not agree with the interpretation given in paragraph 42.2; it is of the view that website may constitute a permanent establishment in certain circumstances.

(Added on 17 July 2008; see HISTORY)

34. *India* does not agree with the interpretation given in paragraph 42.3; it is of the view that, depending on the facts, an enterprise can be considered to have acquired a place of business by virtue of hosting its website on a particular server at a particular location.

(Added on 17 July 2008; see HISTORY)

35. *India* does not agree with the interpretation given in paragraph 42.14 and 42.15 that a service permanent establishment will be created only if services

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

are performed in the source State. It is of the view that furnishing of services is sufficient for creation of a service permanent establishment.

(Added on 17 July 2008; see HISTORY)

36. *India* does not agree with the interpretation given in paragraph 42.18 and 42.46, it is of the view that taxation rights may exist in a state even when services are furnished by the non-residents from outside that State. It is also of the view that the taxation principle applicable to the profits from sale of goods may not apply to the income from furnishing of services.

(Added on 17 July 2008; see HISTORY)

37. *India* does not agree with the interpretation given in paragraph 42.19 that only the profits derived from services should be taxed and the provisions that are included in bilateral Conventions which allow a State to tax the gross amount of the fees paid for certain services is not an appropriate way of taxing services.

(Added on 17 July 2008; see HISTORY)

38. *India* does not agree with the conclusions given in paragraph 42.22 that taxation should not extend to services performed outside the territory of a State; that taxation should apply only to the profits from these services rather than to the payments for them, and that there should be a minimum level of presence in a State before such taxation is allowed.

(Added on 17 July 2008; see HISTORY)

39. *India* does not agree with the interpretation given in paragraph 42.31; it is of the view that for furnishing services in a State, physical presence of an individual is not essential.

(Added on 17 July 2008; see HISTORY)

40. *India* does not agree with the interpretation given in paragraph 42.40 and 42.43

(Added on 17 July 2008; see HISTORY)

41. *India* does not agree with the interpretation given in example 3 of paragraph 42.44 concerning the taxability of ZCO.

(Added on 17 July 2008; see HISTORY)

42. *Brazil* does not agree with the interpretation provided for in paragraph 42.11 to 42.48 of the Commentary on the taxation of services, especially in view of the principle of taxation at source of payments in its legislation.

(Added on 17 July 2008; see HISTORY)

43. *India* does not agree with the interpretation in paragraph 5.5 of the Commentary on Article 5 according to which a satellite's footprint in the space of a source country cannot be treated as a permanent establishment. India is of the view that in such a case, the source state not only contributes its customer base but also provides infrastructure for reception of the satellite telecast or telecommunication process. India is also of the view that a satellite's footprint falls both in the international and national space. The footprint has a fixed location, has a value and can be used for commercial purposes. Accordingly, it can be treated as a fixed place of business in the space in the jurisdiction of a source country.

(Added on 22 July 2010; see HISTORY)

44. *India* does not agree with the interpretation in paragraph 9.1 of the Commentary on Article 5 as it considers that a roaming call is a composite process which requires a composite use of various pieces of equipment located in the source and residence countries and the distinction proposed in paragraph 9.1 was neither intended by the wording of Article 5 nor logical.

(Added on 22 July 2010; see HISTORY)

45. *India* does not agree with the interpretation in the last two sentences of paragraph 26.1 of the Commentary on Article 5 according to which even undersea cables and pipelines lying in the territorial jurisdiction of a source country cannot be considered as permanent establishment of an enterprise.

(Added on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Amended on 22 July 2010, by changing the list of countries indicating the position by adding the United Arab Emirates and deleting Chile, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 2 read as follows:

> "2. In paragraph 2, in addition to "the extraction of" natural resources, *Argentina*, *Brazil*, *Chile*, *Gabon*, *Ivory Coast*, *Morocco*, the *Philippines*, *Russia*, *Thailand* and *Tunisia* reserve the right to refer to the "exploration for" such resources."

Paragraph 2 was previously amended on 17 July 2008, by adding Brazil and Chile to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 2 read as follows:

> "2. In paragraph 2, in addition to "the extraction of" natural resources, *Argentina*, *Gabon*, *Ivory Coast*, *Morocco*, the *Philippines*, *Russia*, *Thailand* and *Tunisia* reserve the right to refer to the "exploration for" such resources."

Paragraph 2 was previously amended on 28 January 2003, by adding Gabon, Ivory Coast, Morocco and Tunisia to the list of countries indicating the position and by

moving the last sentence into a new paragraph 6.1, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 2 read as follows:

> "2. In paragraph 2, in addition to "the extraction of" natural resources, *Argentina*, the *Philippines*, *Russia* and *Thailand* reserve the right to refer to the "exploration for" such resources. *Argentina* also reserves the right to include in the paragraph places where fishing activities take place."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 3: Amended on 22 July 2010, by adding Indonesia to the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 3 read as follows:

> "3. *India* reserves the right to add to paragraph 2 additional subparagraphs that would cover a sales outlet and a farm, plantation or other place where agricultural, forestry, plantation or related activities are carried on."

Paragraph was 3 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 3 was previously deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 3 read as follows:

> "3. *Malaysia* reserves the right to add to paragraph 2 an additional subparagraph that would cover a farm or plantation."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Amended on 22 July 2010, by adding Indonesia as a country indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 4 read as follows:

> "4. *India*, *Thailand* and *Vietnam* reserve the right to add to paragraph 2 an additional subparagraph that would cover a warehouse in relation to a person supplying storage facilities for others."

Paragraph 4 was previously amended on 17 July 2008, by adding India to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 4 read as follows:

> "4. *Thailand* and *Vietnam* reserve the right to add to paragraph 2 an additional subparagraph that would cover a warehouse in relation to a person supplying storage facilities for others."

Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5: Amended on 17 July 2008, by adding Armenia to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax

Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 5 read as follows:

> "5. *Ukraine* reserves the right to add to paragraph 2 an additional subparagraph that would cover an installation, or structure for the exploration for natural resources and a warehouse or other structure used for the sale of goods."

Paragraph 5 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 6: Amended on 28 January 2003, by adding Gabon as a country indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 6 read as follows:

> "6. *Vietnam* reserves the right to add to paragraph 2 an additional subparagraph that would cover an installation structure or equipment used for the exploration for natural resources."

Paragraph 6 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 6.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. Paragraph 6.1 corresponds to the last sentence of paragraph 2 as it read before 28 January 2003 (see history paragraph 2).

Paragraph 6.2: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 7: Paragraph 7 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 8: Amended on 22 July 2010, by deleting Chile from the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 8 read as follows:

> "8. *Armenia*, *Brazil*, *Chile*, *Thailand* and *Vietnam* reserve their position on paragraph 3 as they consider that any building site or construction, assembly or installation project which lasts more than six months should be regarded as a permanent establishment."

Paragraph 8 was previously amended on 17 July 2008, by adding Armenia and Chile to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 8 read as follows:

> "8. *Brazil*, *Thailand* and *Vietnam* reserve their position on paragraph 3 as they consider that any building site or construction, assembly or installation project which lasts more than six months should be regarded as a permanent establishment."

Paragraph 8 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 9: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Hong Kong, China and deleting Latvia, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 9 read as follows:

"9. *Albania*, the *Democratic Republic of the Congo*, *Latvia* and *Lithuania* reserve their position on paragraph 3 and consider that any building site, construction, assembly or installation project or a supervisory or consultancy activity connected therewith constitutes a permanent establishment if such site, project or activity lasts for a period of more than six months."

Paragraph 9 was previously amended on 17 July 2008, by adding the Democratic Republic of the Congo to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 9 read as follows:

"9. *Albania*, *Latvia* and *Lithuania* reserve their position on paragraph 3 and consider that any building site, construction, assembly or installation project or a supervisory or consultancy activity connected therewith constitutes a permanent establishment if such site, project or activity lasts for a period of more than six months."

Paragraph 9 was previously amended on 15 July 2005, by deleting Estonia from the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 9 read as follows:

"9. *Albania*, *Estonia*, *Latvia* and *Lithuania* reserve their position on paragraph 3 and consider that any building site, construction, assembly or installation project or a supervisory or consultancy activity connected therewith constitutes a permanent establishment if such site, project or activity lasts for a period of more than six months."

Paragraph 9 was previously amended on 28 January 2003, by adding Albania to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 9 read as follows:

"9. *Estonia*, *Latvia* and *Lithuania* reserve their position on paragraph 3 and consider that any building site, construction, assembly or installation project or a supervisory or consultancy activity connected therewith constitutes a permanent establishment if such site, project or activity lasts for a period of more than six months."

Paragraph 9 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 9.1: Amended on 22 July 2010, by deleting Slovenia from the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 9.1 read as follows:

"9.1 *Serbia* and *Slovenia* reserve the right to treat any building site, construction, assembly or installation project or a supervisory or consultancy activity connected therewith as constituting a permanent establishment only if such site, project or activity lasts for a period of more than twelve months."

Paragraph 9.1 was previously amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 9.1 read as follows:

"9.1 *Serbia and Montenegro* and *Slovenia* reserve the right to treat any building site, construction, assembly or installation project or a supervisory or consultancy

activity connected therewith as constituting a permanent establishment only if such site, project or activity lasts for a period of more than twelve months."

Paragraph 9.1 was previously amended on 15 July 2005, by adding Serbia and Montenegro as a country indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 9.1 read as follows:

"9.1 *Slovenia* reserves the right to treat any building site, construction, assembly or installation project or a supervisory or consultancy activity connected therewith as constituting a permanent establishment only if such site, project or activity lasts for a period of more than twelve months."

Paragraph 9.1 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 10: Amended on 17 July 2008, by replacing "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 10 read as follows:

"10. *Bulgaria*, *China*, *Gabon*, *Ivory Coast*, *Malaysia*, *Morocco*, *South Africa* and *Tunisia* reserve their right to negotiate the period of time after which a building site or construction, assembly, or installation project should be regarded as a permanent establishment under paragraph 3."

Paragraph 10 was previously amended on 15 July 2005, by adding Malaysia to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 10 read as follows:

"10. *Bulgaria*, *China*, *Gabon*, *Ivory Coast*, *Morocco*, *South Africa and Tunisia* reserve their right to negotiate the period of time after which a building site or construction, assembly, or installation project should be regarded as a permanent establishment under paragraph 3."

Paragraph 10 was previously amended on 28 January 2003, by adding Bulgaria, Gabon, Ivory Coast, Morocco and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 10 read as follows:

"10. *China*, and *South Africa* reserve their right to negotiate the period of time after which a building site or construction, assembly, or installation project should be regarded as a permanent establishment under paragraph 3."

Paragraph 10 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 11: Amended on 17 July 2008, by replacing "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 11 read as follows:

"11. *Argentina*, *China*, *Malaysia*, *South Africa*, *Thailand* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if the enterprise carries on supervisory activities in connection with a building site or a construction, assembly, or installation project that constitute a permanent establishment under paragraph 3 (in the case of Malaysia, the period for this PE is negotiated separately)."

Paragraph 11 was previously amended on 15 July 2005, by changing the list of countries indicating the position by adding Malaysia and deleting Romania, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 11 read as follows:

> "11. *Argentina*, *China*, *Romania*, *South Africa*, *Thailand* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if the enterprise carries on supervisory activities in connection with a building site or a construction, assembly, or installation project that constitute a permanent establishment under paragraph 3."

Paragraph 11 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 11.1: Amended on 22 July 2010, by adding Indonesia as a country indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 11.1 read as follows:

> "11.1 *India* reserves the right to replace "construction or installation project" with "construction, installation or assembly project or supervisory activities in connection therewith" and reserves its right to negotiate the period of time for which they should last to be regarded as a permanent establishment."

Paragraph 11.1 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 12: Paragraph 12 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 13: Amended on 22 July 2010, by adding Indonesia to the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 13 read as follows:

> "13. *Gabon*, *India*, *Ivory Coast*, *Morocco*, and *Tunisia* reserve the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services through employees or other personnel engaged by the enterprise for such purpose but only where such activities continue for the same project or a connected project for a period or periods aggregating more than a period to be negotiated."

Paragraph 13 was previously amended on 17 July 2008, by adding India to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 13 read as follows:

> "13. *Gabon*, *Ivory Coast*, *Morocco*, and *Tunisia* reserve the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services through employees or other personnel engaged by the enterprise for such purpose but only where such activities continue for the same project or a connected project for a period or periods aggregating more than a period to be negotiated."

Paragraph 13 was previously amended on 15 July 2005 by deleting Romania from the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 13 read as follows:

"13. *Gabon*, *Ivory Coast*, *Morocco*, *Romania* and *Tunisia* reserve the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services through employees or other personnel engaged by the enterprise for such purpose but only where such activities continue for the same project or a connected project for a period or periods aggregating more than a period to be negotiated."

Paragraph 13 was previously amended on 28 January 2003, by adding Gabon, Ivory Coast, Morocco and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 13 read as follows:

"13. *Romania* reserves the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services through employees or other personnel engaged by the enterprise for such purpose but only where such activities continue for the same project or a connected project for a period or periods aggregating more than a period to be negotiated."

Paragraph 13 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 14: Amended on 22 July 2010, by adding Hong Kong, China to the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 14 read as follows:

"14. *Albania*, *Armenia*, *Lithuania*, *Serbia*, *South Africa*, *Thailand* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services, through employees or other personnel engaged by the enterprise for such purpose, but only where activities of that nature continue (for the same or a connected project (other than in the case of Armenia)), within the country for a period or periods aggregating more than six months within any 12-month period."

Paragraph 14 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding Armenia and Lithuania, deleting Slovenia and replacing Serbia and Montenegro with Serbia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 14 read as follows:

"14. *Albania*, *Serbia and Montenegro*, *Slovenia*, *South Africa*, *Thailand* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services, through employees or other personnel engaged by the enterprise for such purpose, but only where activities of that nature continue (for the same or a connected project) within the country for a period or periods aggregating more than six months within any 12-month period."

Paragraph 14 was previously amended on 15 July 2005, by adding Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 14 read as follows:

"14. *Albania*, *Slovenia*, *South Africa*, *Thailand* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services, through employees or other personnel engaged by the enterprise for such purpose, but only where activities of that nature

continue (for the same or a connected project) within the country for a period or periods aggregating more than six months within any 12-month period."

Paragraph 14 was previously amended on 28 January 2003, by changing the list of countries indicating the position by adding Albania and Slovenia and deleting Slovakia, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 14 read as follows:

"14. *Slovakia*, *South Africa*, *Thailand* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services, through employees or other personnel engaged by the enterprise for such purpose, but only where activities of that nature continue (for the same or a connected project) within the country for a period or periods aggregating more than six months within any 12-month period."

Paragraph 14 was previously amended on 29 April 2000, by adding Slovakia to the list of countries indicating the position, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Council on 29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 14 read as follows:

"14. *South Africa*, *Thailand* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if the enterprise furnishes services, including consultancy services, through employees or other personnel engaged by the enterprise for such purpose, but only where activities of that nature continue (for the same or a connected project) within the country for a period or periods aggregating more than six months within any 12-month period."

Paragraph 14 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 14.1: Amended on 22 July 2010, by deleting Chile from the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 14.1 read as follows:

"14.1 *Chile*, the *Democratic Republic of the Congo*, *Gabon*, *Ivory Coast*, *Latvia*, *Morocco*, *South Africa* and *Tunisia* reserve the right to deem any person performing professional services or other activities of an independent character to have a permanent establishment if that person is present in the State for a period or periods exceeding in the aggregate 183 days in any twelve month period."

Paragraph 14.1 was previously amended on 17 July 2008, by adding Chile and the Democratic Republic of the Congo to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 14.1 read as follows:

"14.1 *Gabon*, *Ivory Coast*, *Latvia*, *Morocco*, *South Africa* and *Tunisia* reserve the right to deem any person performing professional services or other activities of an independent character to have a permanent establishment if that person is present in the State for a period or periods exceeding in the aggregate 183 days in any twelve month period."

Paragraph 14.1 was previously amended on 28 January 2003, by adding Gabon, Ivory Coast, Morocco and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 14.1 read as follows:

"14.1 *Latvia* and *South Africa* reserve the right to deem any person performing professional services or other activities of an independent character to have a permanent establishment if that person is present in the State for a period or periods exceeding in the aggregate 183 days in any twelve month period."

Paragraph 14.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention" adopted by the OECD Council on 29 April 2000.

Paragraph 14.2: Amended on 28 January 2003, by adding Bulgaria as a country indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 14.2 read as follows:

"14.2 *Estonia* reserves the right to deem an individual performing professional services or other services of an independent character to have a permanent establishment for the purposes of the Convention if they are present in the other State for a period or periods exceeding in the aggregate 183 days in any twelve month period."

Paragraph 14.2 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention" adopted by the OECD Council on 29 April 2000.

Paragraph 14.3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 14.4: Amended on 22 July 2010, by adding Indonesia as a country indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 14.4 read as follows:

"14.4 *Bulgaria* reserves the right to insert a provision that deems a permanent establishment to exist if, for more than a negotiated period, an installation, drilling rig or ship is used for the exploration of natural resources."

Paragraph 14.4 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 14.5: Amended on 22 July 2010, by adding Indonesia and the United Arab Emirates as countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 14.5 read as follows:

"14.5 *Vietnam* reserves the right to tax income derived from activities relating to exploration and exploitation of natural resources."

Paragraph 14.5 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 14.6: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 14.7: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 14.7 read as follows:

"14.7 *Chile* reserves the right to treat a person as having a permanent establishment if the person performs professional services and other activities of independent character, including planning, supervisory or consultancy activities, with a certain degree of continuity."

Paragraph 14.7 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 15: Amended on 22 July 2010, by adding Indonesia to the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax

Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 15 read as follows:

> "15. *Albania*, *Argentina*, *Armenia*, *Gabon*, *India*, *Ivory Coast*, *Malaysia*, *Morocco*, *Russia*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve their position on paragraph 4 as they consider that the term "delivery" should be deleted from subparagraphs *a)* and *b)*."

Paragraph 15 was previously amended on 17 July 2008, by adding Armenia, India and Malaysia to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 15 read as follows:

> "15. *Albania*, *Argentina*, *Gabon*, *Ivory Coast*, *Morocco*, *Russia*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve their position on paragraph 4 as they consider that the term "delivery" should be deleted from subparagraphs *a)* and *b)*."

Paragraph 15 was previously amended on 28 January 2003, by adding Albania, Gabon, Ivory Coast, Morocco and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 15 read as follows:

> "15. *Argentina*, *Russia*, *Thailand*, *Ukraine* and *Vietnam* reserve their position on paragraph 4 as they consider that the term "delivery" should be deleted from subparagraphs *a)* and *b)*."

Paragraph 15 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 16: Amended on 17 July 2008, by deleting Russia from the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 16 read as follows:

> "16. *Albania*, *Argentina*, *Russia* and *Thailand* reserve their position on subparagraph 4 *f)*."

Paragraph 16 was previously amended on 15 July 2005, by deleting Brazil from the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 16 read as follows:

> "16. *Albania*, *Argentina*, *Brazil*, *Russia* and *Thailand* reserve their position on subparagraph 4 *f)*."

Paragraph 16 was previously amended on 28 January 2003, by adding Albania to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 16 read as follows:

> "16. *Albania*, *Argentina*, *Brazil*, *Russia* and *Thailand* reserve their position on subparagraph 4 *f)*."

Paragraph 16 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 16.1: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 16.1 read as follows:

> "16.1 *Chile* reserves the right to amend paragraph 4 by eliminating subparagraph *f)* and replacing subparagraph *e)* with the corresponding text of the 1963 Draft Model Tax Convention."

Paragraph 16.1 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 16.2: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Indonesia and deleting Malaysia, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 17 read as follows:

> "17. *Albania*, *Armenia*, *Gabon*, *India*, *Ivory Coast*, *Malaysia*, *Morocco*, *Russia*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if a person acting on behalf of the enterprise habitually maintains a stock of goods or merchandise in a Contracting State from which the person regularly delivers goods or merchandise (in the case of Malaysia fills orders) on behalf of the enterprise."

Paragraph 17 was previously amended on 17 July 2008, by adding Armenia and India to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 17 read as follows:

> "17. *Albania*, *Gabon*, *Ivory Coast*, *Malaysia*, *Morocco*, *Russia*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if a person acting on behalf of the enterprise habitually maintains a stock of goods or merchandise in a Contracting State from which the person regularly delivers goods or merchandise (in the case of Malaysia fills orders) on behalf of the enterprise."

Paragraph 17 was previously amended on 15 July 2005, by adding Malaysia to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 17 read as follows:

> "17. *Albania*, *Gabon*, *Ivory Coast*, *Morocco*, *Russia*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if a person acting on behalf of the enterprise habitually maintains a stock of goods or merchandise in a Contracting State from which the person regularly delivers goods or merchandise on behalf of the enterprise."

Paragraph 17 was previously amended on 28 January 2003, by adding Albania, Gabon, Ivory Coast, Morocco and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 17 read as follows:

> "17. *Russia*, *Thailand*, *Ukraine* and *Vietnam* reserve the right to treat an enterprise as having a permanent establishment if a person acting on behalf of the enterprise habitually maintains a stock of goods or merchandise in a Contracting State from which the person regularly delivers goods or merchandise on behalf of the enterprise."

Paragraph 17 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 17.1: Amended on 22 July 2010, by adding *Malaysia* and *Thailand* as countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 17.1 read as follows:

> "17.1 *India* reserves the right to treat an enterprise of a Contracting State as having a permanent establishment in the other Contracting State if a person habitually secures orders in the other Contracting State wholly or almost wholly for the enterprise."

Paragraph 17.1 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 18: Amended on 22 July 2010, by deleting Slovenia from the list of countries indicating the position by deleting Latvia and replacing Serbia and Montenegro with Serbia, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 18 read as follows:

> "18. *Albania*, *Gabon*, *Estonia*, *Ivory Coast*, *Lithuania*, *Morocco*, *Serbia*, *Slovenia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to make clear that an agent whose activities are conducted wholly or almost wholly on behalf of a single enterprise will not be considered an agent of an independent status."

Paragraph 18 was previously amended on 17 July 2008, by changing the list of countries indicating the position by deleting Latvia and replacing Serbia and Montenegro with Serbia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 18 read as follows:

> "18. *Albania*, *Gabon*, *Estonia*, *Ivory Coast*, *Latvia*, *Lithuania*, *Morocco*, *Serbia and Montenegro*, *Slovenia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to make clear that an agent whose activities are conducted wholly or almost wholly on behalf of a single enterprise will not be considered an agent of an independent status."

Paragraph 18 was previously amended on 15 July 2005, by adding Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 18 read as follows:

> "18. *Albania*, *Gabon*, *Estonia*, *Ivory Coast*, *Latvia*, *Lithuania*, *Morocco*, *Slovenia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to make clear that an agent whose activities are conducted wholly or almost wholly on behalf of a single enterprise will not be considered an agent of an independent status."

Paragraph 18 was previously amended on 28 January 2003, by adding Albania, Gabon, Ivory Coast, Morocco, Slovenia and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 18 read as follows:

> "18. *Estonia*, *Latvia*, *Lithuania*, *Thailand* and *Vietnam* reserve the right to make clear that an agent whose activities are conducted wholly or almost wholly on behalf of a single enterprise will not be considered an agent of an independent status."

Paragraph 18 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 18.1: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 18.1 read as follows:

> "18.1 *Chile* believes that the arm's length principle should also be considered in determining whether or not an agent is of an independent status for purposes of paragraph 6 of the Article and wishes to add such wording to its conventions to clarify that this is how the paragraph should be interpreted."

Paragraph 18.1 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 19: Amended on 22 July 2010, by adding Indonesia to the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 19 read as follows:

> "19. *Gabon*, *India*, *Ivory Coast*, *Morocco*, *Russia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to provide that an insurance enterprise of a Contracting State shall, except with respect to re-insurance (other than in the case of India), be deemed to have a permanent establishment in the other Contracting State if it collects premiums in the territory of that other state or insures risks situated therein through a person other than an agent of an independent status to whom paragraph 6 applies."

Paragraph 19 was previously amended on 17 July 2008, by adding India and Russia to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 19 read as follows:

> "19. *Gabon*, *Ivory Coast*, *Morocco*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to provide that an insurance enterprise of a Contracting State shall, except with respect to re-insurance, be deemed to have a permanent establishment in the other Contracting State if it collects premiums in the territory of that other state or insures risks situated therein through a person other than an agent of an independent status to whom paragraph 6 applies."

Paragraph 19 was previously amended on 15 July 2005, by deleting Romania from the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 19 read as follows:

> "19. *Gabon*, *Ivory Coast*, *Morocco*, *Romania*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to provide that an insurance enterprise of a Contracting State shall, except with respect to re-insurance, be deemed to have a permanent establishment in the other Contracting State if it collects premiums in the territory of that other state or insures risks situated therein through a person other than an agent of an independent status to whom paragraph 6 applies."

Paragraph 19 was previously amended on 28 January 2003, by adding Gabon, Ivory Coast, Morocco and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 19 read as follows:

> "19. *Romania*, *Thailand* and *Vietnam* reserve the right to provide that an insurance enterprise of a Contracting State shall, except with respect to re-insurance, be deemed to have a permanent establishment in the other Contracting State if it collects premiums in the territory of that other state or insures risks situated therein through a person other than an agent of an independent status to whom paragraph 6 applies."

Paragraph 19 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 19.1: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 20: Amended on 17 July 2008, by adding India to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 20 read as follows:

> "20. *Morocco* and *Vietnam* do not agree with the words "The twelve month test applies to each individual site or project" found in paragraph 18 of the Commentary. Morocco and Vietnam consider that a series of consecutive short term sites or projects operated by a contractor would give rise to the existence of a permanent establishment in the country concerned."

Paragraph 20 was previously amended on 28 January 2003, by adding Morocco as a country indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 20 read as follows:

> "20. *Vietnam* does not agree with the words "The twelve month test applies to each individual site or project" found in paragraph 18 of the Commentary. Vietnam considers that a series of consecutive short term sites or projects operated by a contractor would give rise to the existence of a permanent establishment in the country concerned."

Paragraph 20 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 21: Amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 21 read as follows:

> "21. *Bulgaria* and *Serbia and Montenegro* would add to paragraph 33 of the Commentary on Article 5 their views that a person, who is authorised to negotiate the essential elements of the contract, and not necessarily all the elements and details of the contract, on behalf of a foreign resident, can be said to exercise the authority to conclude contracts."

Paragraph 21 was previously amended on 15 July 2005, by adding Serbia and Montenegro as a country indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 21 read as follows:

> "21. *Bulgaria* would add to paragraph 33 of the Commentary on Article 5 its view that a person, who is authorised to negotiate the essential elements of the contract, and not necessarily all the elements and details of the contract, on behalf of a foreign resident, can be said to exercise the authority to conclude contracts."

Paragraph 21 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 22: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 23: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 23.1: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 23.1 read as follows:

> "23.1 *Chile* will not necessarily take into consideration paragraphs 42.1 to 42.10 until further study of e-commerce taxation has taken place."

Paragraph 23.1 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 24: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 25: Amended on 22 July 2010, by adding Malaysia as a country indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 25 read as follows:

> "25. *India* does not agree with the interpretation given in paragraph 5.3 (first part of the paragraph) and 5.4 (first part of the paragraph); it is of the view that these examples could also be regarded as constituting permanent establishments."

Paragraph 25 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 26: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 27: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 28: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 29: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 30: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 31: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 32: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 33: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 34: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 35: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 36: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 37: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 38: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 39: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 40: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 41: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 43: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 44: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 45: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

POSITIONS ON ARTICLE 6
(INCOME FROM IMMOVABLE PROPERTY)
AND ITS COMMENTARY

Positions on the Article

Paragraph 1

1. *India* and *Indonesia* wish to address the issue of the inclusion of the words "including income from agriculture or forestry" through bilateral negotiations.

(Replaced on 22 July 2010; see HISTORY)

Paragraph 2

2. Given the meaning of the term "immovable property" under its domestic law, *Belarus* reserves the right to omit the second sentence of this paragraph.

(Renumbered on 17 July 2008; see HISTORY)

2.1 *Latvia* and *Lithuania* reserve the right to include in the definition of the term "immovable property" any option or similar right to acquire immovable property.

(Renumbered and amended on 17 July 2008; see HISTORY)

2.2 *Estonia* reserves the right to include in the definition of the term "immovable property" any right of claim in respect of immovable property because such right of claim may not be included in its domestic law's meaning of the term.

(Amended on 22 July 2010; see HISTORY)

3. *Lithuania* reserves the right to modify the second sentence of the definition of the term "immovable property" to make clear that the sentence does not apply for domestic law purposes.

3.1 *Morocco* wishes to retain the possibility of applying the provisions in its domestic laws relative to the taxation of income from shares or rights, which are treated therein as income from immovable property.

(Added on 28 January 2003; see HISTORY)

Paragraph 3

4. *Latvia* and *Lithuania* reserve the right to include in paragraph 3 a reference to income from the alienation of immovable property.

(Amended on 22 July 2010; see HISTORY)

5. *Latvia* and *Lithuania* also reserve the right to tax income of shareholders in resident companies from the direct use, letting, or use in any other form of

the right to enjoyment of immovable property situated in their country and held by the company, where such right is based on the ownership of shares or other corporate rights in the company.

(Amended on 15 July 2005; see HISTORY)

HISTORY

Paragraph 1: Amended on 22 July 2010, by adding Indonesia as a country indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 1 read as follows:

> "1. *India* wishes to address the issue of inclusion of the words "including income from agriculture or forestry" through bilateral negotiations."

Paragraph 1 was replaced on 17 July 2008. Paragraph 1, as it read before 17 July 2008 was renumbered as paragraph 2 (see history of paragraph 2) and a new paragraph 1 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 2: Corresponds to paragraph 1 as it read before 17 July 2008. On 17 July 2008 paragraph 2 was renumbered as paragraph 2.1 (see history of paragraph 2.1), paragraph 1 was renumbered as paragraph 2 and the heading preceding paragraph 1 was moved with it, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 1, as it read before 17 July 2008, was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2.1: Corresponds to paragraph 2 as it read before 17 July 2008. On 17 July 2008 paragraph 2 was amended by deleting Estonia from the list of countries indicating the position, and renumbered as paragraph 2.1 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 2 read as follows:

> "2. *Estonia*, *Latvia* and *Lithuania* reserve the right to include in the definition of the term "immovable property" any option or similar right to acquire immovable property."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2.2: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 2.2 read as follows:

> "2.2 *Estonia* reserves the right to include in the definition of the term "immovable property" any right of claim in respect of immovable property."

Paragraph 2.2 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 3: Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 4: Amended on 22 July 2010, by deleting Estonia from the list of countries indicating the position, by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 4 read as follows:

> “4. *Estonia*, *Latvia* and *Lithuania* reserve the right to include in paragraph 3 a reference to income from the alienation of immovable property.”

Paragraph 4 was included when this section was added in 1997 by the report entitled “The 1997 Update to the Model Tax Convention”, adopted by the OECD Council on 23 October 1997.

Paragraph 5: Amended on 15 July 2005 by deleting Estonia from the list of countries indicating the position, by the report entitled “The 2005 Update to the Model Tax Convention”, adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 5 read as follows:

> “5. *Estonia*, *Latvia* and *Lithuania* also reserve the right to tax income of shareholders in resident companies from the direct use, letting, or use in any other form of the right to enjoyment of immovable property situated in their country and held by the company, where such right is based on the ownership of shares or other corporate rights in the company.”

Paragraph 5 was included when this section was added in 1997 by the report entitled “The 1997 Update to the Model Tax Convention”, adopted by the OECD Council on 23 October 1997.

POSITIONS ON ARTICLE 7
(BUSINESS PROFITS)
AND ITS COMMENTARY

Positions on the Article

1. *Argentina*, *Brazil*, *Indonesia*, *Latvia*, *Malaysia*, *Romania*, *Serbia*, *South Africa*, *Thailand* and *Hong Kong, China* reserve the right to use the previous version of Article 7, *i.e.* the version that was included in the Model Tax Convention immediately before the 2010 Update, subject to their positions on that previous version (see annex below).

(Replaced on 22 July 2010; see HISTORY)

1.1 *India* reserves the right to use the previous version of Article 7, *i.e.* the version that was included in the Model Tax Convention immediately before the 2010 update, subject to its positions on that previous version (see annex below). It does not agree with the approach to the attribution of profits to permanent establishments in general that is reflected in the revised Article, in its Commentary and in the consequential changes to the Commentary on other Articles (*i.e.* paragraph 21 of the Commentary on Article 8, paragraph 32.1 and 32.2 of the Commentary on Article 10, paragraph 25.1 and 25.2 of the Commentary on Article 11, paragraph 21.1 and 21.2 of the Commentary on Article 12, paragraph 27.1 and 27.2 of the Commentary on Article 13, paragraph 7.2 of the Commentary on Article 15, paragraph 5.1and 5.2 of the Commentary on Article 21, paragraph 3.1 and 3.2 of the Commentary on Article 22 and subparagraph 40 *a*) of the Commentary on Article 24).

(Added on 22 July 2010; see HISTORY)

1.2 *Argentina* and *Indonesia* reserve the right to include a special provision in the Convention that will permit them to apply their domestic law in relation to the taxation of the profits of an insurance and re-insurance enterprise.

(Renumbered and amended on 22 July 2010; see HISTORY)

1.3 Whilst the *People's Republic of China* understands and respects the separate and independent enterprise principle underlying the new version of Article 7, due to its tax administration capacity it reserves the right to adopt the previous version of the Article and, in some cases, to resort to simpler methods for calculating the profits attributable to a permanent establishment.

(Added on 28 January 2003; see HISTORY)

2. *Malaysia*, *Thailand* and *Ukraine* reserve the right to add a provision to the effect that, if the information available to the competent authority of a Contracting State is inadequate to determine the profits to be attributed to the permanent establishment of an enterprise, the competent authority may

apply to that enterprise the provisions of the taxation law of that State, subject to the qualification that such law will be applied, so far as the information available to the competent authority permits, in accordance with the principles of this Article.

(Amended on 17 July 2008; see HISTORY)

2.1 *Albania*, *Argentina*, *Brazil*, *Croatia*, *Gabon*, *Indonesia*, *Ivory Coast*, *Malaysia*, *Morocco*, the *People's Republic of China*, *Russia*, *Serbia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to maintain in their conventions a specific article dealing with the taxation of "independent personal services". Accordingly, reservation is also made with respect to all the corresponding modifications in the Articles and the Commentaries, which have been modified as a result of the elimination of Article 14.

(Amended on 22 July 2010; see HISTORY)

2.2 *Bulgaria* reserves the right to propose in bilateral negotiations the replacement, in this Article, of the term "profits" with the term "business profits", provided that it is defined in Article 3.

(Added on 28 January 2003; see HISTORY)

2.3 *Tunisia* reserves the right to propose in bilateral negotiations to add a criterion for the taxation in the Source State of the independent personal services, under the former Article 14, based on the amount (to be established through bilateral negotiations) of the remuneration paid.

(Added on 28 January 2003; see HISTORY)

3. *Argentina*, *Morocco* and *Thailand* reserve the right to tax in the State where the permanent establishment is situated business profits derived from the sale of goods or merchandise which are the same as or of a similar kind to the ones sold through a permanent establishment situated in that State or from other business activities carried on in that State of the same or similar kind as those effected through that permanent establishment. They will apply this rule only as a safeguard against abuse and not as a general "force of attraction principle". Thus, the rule will not apply when the enterprise proves that the sales or activities have been carried out for reasons other than obtaining a benefit under the Convention.

(Amended on 28 January 2003; see HISTORY)

3.1 *Indonesia* reserves the right to tax, in the State where the permanent establishment is situated, business profits derived from the sale of goods or merchandise which are the same as or of a similar kind to the ones sold through that permanent establishment or from other business activities

carried on in that State of the same or similar kind as those carried on through that permanent establishment.

(Added on 22 July 2010; see HISTORY)

4. *Albania* and *Vietnam* reserve the right to tax in the State where the permanent establishment is situated business profits derived from the sale of goods or merchandise which are the same as or of a similar kind to the ones sold through a permanent establishment situated in that State or from other business activities carried on in that State of the same or similar kind as those effected through that permanent establishment.

(Amended on 17 July 2008; see HISTORY)

4.1 *Morocco* and the *Philippines* reserve the right to adopt a length of stay and fixed base criteria in determining whether an individual rendering personal services is taxable.

(Amended on 28 January 2003; see HISTORY)

4.2 The *United Arab Emirates* reserves the right to include a special provision in its conventions that will permit its domestic law to apply to all activities that are related to the exploration, extraction or exploitation of natural resources, including petroleum activities as well as rendering services in connection with these activities, when these activities are carried out on its territory.

(Replaced on 22 July 2010; see HISTORY)

5. *Argentina* reserves the right to provide that a Contracting State shall not be obliged to allow the deduction of expenses incurred abroad which are not reasonably attributable to the activity carried on by the permanent establishment, taking into account the general principles contained in its domestic legislation concerning executive and administrative expenses for assistance services.

(Amended on 22 July 2010; see HISTORY)

6. *(Deleted on 22 July 2010; see HISTORY)*

7. *Armenia*, *Lithuania* and *Serbia* reserve the right to add to paragraph 2 a clarification that expenses to be allowed as deductions by a Contracting State shall include only expenses that are deductible under the domestic laws of that State.

(Amended on 22 July 2010; see HISTORY)

7.1 *(Deleted on 22 July 2010; see HISTORY)*

8. *Serbia* reserves the right to specify that a potential adjustment will be made only if it is considered justified.

(Replaced on 22 July 2010; see HISTORY)

9. *(Deleted on 22 July 2010; see HISTORY)*

10. *(Deleted on 22 July 2010; see HISTORY)*

11. *(Deleted on 22 July 2010; see HISTORY)*

Position on the Commentary

12. *Argentina*, *Brazil*, *Indonesia*, *Latvia*, *Malaysia*, *Romania*, *Serbia*, *South Africa*, *Thailand* and *Hong Kong, China* will interpret Article 7 as it read before the 2010 Update in line with the relevant Commentary as it stood prior to that update.

(Replaced on 22 July 2010; see HISTORY)

13. *(Deleted on 22 July 2010; see HISTORY)*

ANNEX

POSITIONS ON THE PREVIOUS VERSION OF ARTICLE 7 AND ITS COMMENTARY

The following is the text of the non-OECD economies' positions on Article 7 and its Commentary as it read before 22 July 2010. That previous version of the positions on Article 7 and its Commentary is provided for historical reference as it will continue to be relevant for the application and interpretation of bilateral tax conventions that use the previous version of the Article.

Positions on the Article

1. *Argentina* and *Chile* reserve the right to include a special provision in the Convention that will permit them to apply their domestic law in relation to the taxation of the profits of an insurance and re-insurance enterprise.

2. *Malaysia*, *Thailand* and *Ukraine* reserve the right to add a provision to the effect that, if the information available to the competent authority of a Contracting State is inadequate to determine the profits to be attributed to the permanent establishment of an enterprise, the competent authority may apply to that enterprise the provisions of the taxation law of that State, subject to the qualification that such law will be applied, so far as the information available to the competent authority permits, in accordance with the principles of this Article.

2.1 *Albania*, *Argentina*, *Brazil*, *Chile*, *Croatia*, *Gabon*, *India*, *Ivory Coast*, *Malaysia*, *Morocco*, the *People's Republic of China*, *Russia*, *Serbia*, *Tunisia* and *Vietnam* reserve the right to maintain in their conventions a specific article dealing with the taxation of

"independent personal services". Accordingly, reservation is also made with respect to all the corresponding modifications in the Articles and the Commentaries, which have been modified as a result of the elimination of Article 14.

2.2 *Bulgaria* reserves the right to propose in bilateral negotiations the replacement, in this Article, of the term "profits" with the term "business profits", provided that it is defined in Article 3.

2.3 *Tunisia* reserves the right to propose in bilateral negotiations to add a criterion for the taxation in the Source State of the independent personal services, under the former Article 14, based on the amount (to be established through bilateral negotiations) of the remuneration paid.

Paragraphs 1 and 2

3. *Argentina*, *Morocco* and *Thailand* reserve the right to tax in the State where the permanent establishment is situated business profits derived from the sale of goods or merchandise which are the same as or of a similar kind to the ones sold through a permanent establishment situated in that State or from other business activities carried on in that State of the same or similar kind as those effected through that permanent establishment. They will apply this rule only as a safeguard against abuse and not as a general "force of attraction principle". Thus, the rule will not apply when the enterprise proves that the sales or activities have been carried out for reasons other than obtaining a benefit under the Convention.

4. *Albania* and *Vietnam* reserve the right to tax in the State where the permanent establishment is situated business profits derived from the sale of goods or merchandise which are the same as or of a similar kind to the ones sold through a permanent establishment situated in that State or from other business activities carried on in that State of the same or similar kind as those effected through that permanent establishment.

4.1 *Morocco* and the *Philippines* reserve the right to adopt a length of stay and fixed base criteria in determining whether an individual rendering personal services is taxable.

4.2. *Chile* and *India* reserve the right to amend Article 7 to provide that, in applying paragraphs 1 and 2 of the Article, any income or gain attributable to a permanent establishment during its existence may be taxable by the Contracting State in which the permanent establishment exists even if the payments are deferred until after the permanent establishment has ceased to exist. Furthermore, India also reserves the right to apply such a rule under Articles 11, 12, 13 and 21.

Paragraph 3

5. With respect to paragraph 3, *Argentina* reserves the right to provide that a Contracting State shall not be obliged to allow the deduction of expenses incurred abroad which are not reasonably attributable to the activity carried on by the permanent establishment, taking into account the general principles contained in domestic legislation concerning executive and administrative expenses for assistance services.

6. *Brazil* reserves its position on the words "whether in the State in which the permanent establishment is situated or elsewhere" found in paragraph 3.

P (7)

7. *Armenia*, *India*, *Lithuania* and *Slovenia* reserve the right to add to paragraph 3 a clarification that expenses to be allowed as deductions by a Contracting State shall include only expenses that are deductible under the domestic laws of that State.

7.1 *Estonia* and *Latvia* reserve the right to add to paragraph 3 a clarification that expenses to be allowed as deductions by a Contracting State shall include only expenses that would be deductible if the permanent establishment were a separate enterprise of that Contracting State.

8. *Ukraine* and *Vietnam* reserve the right to add to paragraph 3 a clarification to the effect that the paragraph refers to actual expenses incurred by the enterprise (other than interest in the case of a banking enterprise).

Paragraph 4

9. *Brazil* reserves the right not to adopt paragraph 4.

Paragraph 5

10. *Vietnam* reserves the right not to adopt paragraph 5.

Paragraph 6

11. *Brazil* reserves the right not to adopt paragraph 6.

Positions on the Commentary

12. *India* does not agree with the interpretation given in paragraph 25.

13. As regards paragraphs 41-50 of the Commentary on Article 7, *Chile* does not adhere to the specific methods provided as the rules on the amount of profit attributable to a permanent establishment; these must be established in and follow domestic law (including foreign exchange legislation).

HISTORY

Paragraph 1: Replaced paragraph 1 as it read before 22 July 2010. On 22 July 2010 paragraph 1 was renumbered as paragraph 1.2 (see history of paragraph 1.2) and a new paragraph 1 was added by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 1.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 1.2: Corresponds to paragraph 1 as it read before 22 July 2010. On 22 July 2010 paragraph 1 was amended, by changing the list of countries indicating the position by adding Indonesia and deleting Chile, and renumbered as paragraph 1.2 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 1 read as follows:

> "1. *Argentina* and *Chile* reserve the right to include a special provision in the Convention that will permit them to apply their domestic law in relation to the taxation of the profits of an insurance and re-insurance enterprise."

Paragraph 1 was previously amended on 17 July 2008, by adding Chile as country indicating the position and by making other minor amendments, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD

Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 1 read as follows:

> "1. *Argentina* reserves the right to include a special provision in the Protocol to the Convention that will permit it to apply its domestic law in relation to the taxation of the profits of an insurance and re-insurance enterprise."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 1.3: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 2: Amended on 17 July 2008, by deleting Vietnam from the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 2 read as follows:

> "2. *Malaysia*, *Thailand*, *Ukraine* and *Vietnam* reserve the right to add a provision to the effect that, if the information available to the competent authority of a Contracting State is inadequate to determine the profits to be attributed to the permanent establishment of an enterprise, the competent authority may apply to that enterprise the provisions of the taxation law of that State, subject to the qualification that such law will be applied, so far as the information available to the competent authority permits, in accordance with the principles of this Article."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2.1: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Indonesia and Thailand and deleting Chile and India, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 2.1 read as follows:

> "2.1 *Albania*, *Argentina*, *Brazil*, *Chile*, the *People's Republic of China*, *Croatia*, *Gabon*, *India*, *Ivory Coast*, *Malaysia*, *Morocco*, *Russia*, *Serbia*, *Tunisia* and *Vietnam* reserve the right to maintain in their conventions a specific article dealing with the taxation of "independent personal services". Accordingly, reservation is also made with respect to all the corresponding modifications in the Articles and the Commentaries, which have been modified as a result of the elimination of Article 14."

Paragraph 2.1 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding Chile, India, Russia and Vietnam, replacing "China" with "the People's Republic of China", and by replacing Serbia and Montenegro with Serbia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 2.1 read as follows:

> "2.1 *Albania*, *Argentina*, *Brazil*, *Croatia*, *Gabon*, *Ivory Coast*, *Malaysia*, *Morocco*, *Serbia and Montenegro*, and *Tunisia* reserve the right to maintain in their conventions a specific article dealing with the taxation of "independent personal services". Accordingly, reservation is also made with respect to all the corresponding modifications in the Articles and the Commentaries, which have been modified as a result of the elimination of Article 14."

Paragraph 2.1 was previously amended on 15 July 2005, by adding Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The

2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 2.1 read as follows:

> "2.1 *Albania*, *Argentina*, *Brazil*, *Croatia*, *Gabon*, *Ivory Coast*, *Malaysia*, *Morocco* and *Tunisia* reserve the right to maintain in their conventions a specific article dealing with the taxation of "independent personal services". Accordingly, reservation is also made with respect to all the corresponding modifications in the Articles and the Commentaries, which have been modified as a result of the elimination of Article 14."

Paragraph 2.1 was amended, by changing the list of countries indicating the position by adding Albania, Croatia, Gabon, Ivory Coast, Morocco and Tunisia and deleting Lithuania, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

After 29 April 2000 and until 28 January 2003, paragraph 2.1 read as follows:

> "2.1 *Argentina*, *Brazil*, *Lithuania* and *Malaysia*, reserve the right to maintain in their conventions a specific article dealing with the taxation of "independent personal services". Accordingly, reservation is also made with respect to all the corresponding modifications in the Articles and the Commentaries, which have been modified as a result of the elimination of Article 14."

Paragraph 2.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Council on 29 April 2000.

Paragraph 2.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 2.3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 3: The heading preceding paragraph 3 was deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, the heading preceding paragraph 3 read as follows:

> *"Paragraphs 1 and 2"*

The heading preceding paragraph 3 was amended on 17 July 2008, by replacing "Paragraph 1" with "Paragraphs 1 and 2", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. In 1997, when this section was added and until 17 July 2008, the heading preceding paragraph 3 read as follows:

> *"Paragraph 1"*

Paragraph 3 was previously amended on 28 January 2003, by adding Morocco to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 3 read as follows:

> "3. *Argentina* and *Thailand* reserve the right to tax in the State where the permanent establishment is situated business profits derived from the sale of goods or merchandise which are the same as or of a similar kind to the ones sold through a permanent establishment situated in that State or from other business activities carried on in that State of the same or similar kind as those effected through that permanent establishment. They will apply this rule only as a safeguard against abuse and not as a general "force of attraction principle". Thus, the rule will not apply when the enterprise proves that the sales or activities have been carried out for reasons other than obtaining a benefit under the Convention."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 4: Amended on 17 July 2008, by changing the list of countries indicating the position by adding Vietnam and deleting Estonia, Latvia and Lithuania, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 4 read as follows:

> "4. *Albania*, *Estonia*, *Latvia* and *Lithuania* reserve the right to tax in the State where the permanent establishment is situated business profits derived from the sale of goods or merchandise which are the same as or of a similar kind to the ones sold through a permanent establishment situated in that State or from other business activities carried on in that State of the same or similar kind as those effected through that permanent establishment."

Paragraph 4 was previously amended on 28 January 2003, by adding Albania to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 4 read as follows:

> "4. *Estonia*, *Latvia* and *Lithuania* reserve the right to tax in the State where the permanent establishment is situated business profits derived from the sale of goods or merchandise which are the same as or of a similar kind to the ones sold through a permanent establishment situated in that State or from other business activities carried on in that State of the same or similar kind as those effected through that permanent establishment."

Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4.1: Amended on 28 January 2003, by adding Morocco as a country indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 4.1 read as follows:

> "4.1 The *Philippines* reserves the right to adopt a length of stay and fixed base criteria in determining whether an individual rendering personal services is taxable."

Paragraph 4.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Council on 29 April 2000

Paragraph 4.2: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 4.2 read as follows:

> "4.2 *Chile* and *India* reserve the right to amend Article 7 to provide that, in applying paragraphs 1 and 2 of the Article, any income or gain attributable to a permanent establishment during its existence may be taxable by the Contracting State in which the permanent establishment exists even if the payments are deferred until after the permanent establishment has ceased to exist. Furthermore, India also reserves the right to apply such a rule under Articles 11, 12, 13 and 21."

Paragraph 4.2 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 5: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. At the same time the heading preceding paragraph was deleted. After 23 October 1997 and until 22 July 2010, paragraph 5 and the preceding heading read as follows:

> "*Paragraph 3*
>
> 5. With respect to paragraph 3, *Argentina* reserves the right to provide that a Contracting State shall not be obliged to allow the deduction of expenses incurred abroad which are not reasonably attributable to the activity carried on by the permanent establishment, taking into account the general principles contained in domestic legislation concerning executive and administrative expenses for assistance services."

Paragraph 5 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 6: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 6 read as follows:

> "6. *Brazil* reserves its position on the words "whether in the State in which the permanent establishment is situated or elsewhere" found in paragraph 3."

Paragraph 6 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Serbia and deleting India and Slovakia, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 7 read as follows:

> "7. *Armenia*, *India*, *Lithuania* and *Slovenia* reserve the right to add to paragraph 3 a clarification that expenses to be allowed as deductions by a Contracting State shall include only expenses that are deductible under the domestic laws of that State."

Paragraph 7 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding Armenia and India and deleting Estonia and Latvia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 7 read as follows:

> "7. *Estonia*, *Latvia*, *Lithuania* and *Slovenia* reserve the right to add to paragraph 3 a clarification that expenses to be allowed as deductions by a Contracting State shall include only expenses that are deductible under the domestic laws of that State."

Paragraph 7 was previously amended on 15 July 2005, by deleting Romania from the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 7 read as follows:

> "7. *Estonia*, *Latvia*, *Lithuania*, *Romania* and *Slovenia* reserve the right to add to paragraph 3 a clarification that expenses to be allowed as deductions by a Contracting State shall include only expenses that are deductible under the domestic laws of that State."

Paragraph 7 was previously amended on 28 January 2003, by adding Slovenia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 7 read as follows:

> "7. *Estonia*, *Latvia*, *Lithuania* and *Romania* reserve the right to add to paragraph 3 a clarification that expenses to be allowed as deductions by a Contracting State shall include only expenses that are deductible under the domestic laws of that State."

Paragraph 7 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7.1: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 7.1 read as follows:

> "7.1 *Latvia* and *Estonia* reserve the right to add to paragraph 3 a clarification that expenses to be allowed as deductions by a Contracting State shall include only expenses that would be deductible if the permanent establishment were a separate enterprise of that Contracting State."

Paragraph 7.1 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 8 read as follows:

> "8. *Ukraine* and *Vietnam* reserve the right to add to paragraph 3 a clarification to the effect that the paragraph refers to actual expenses incurred by the enterprise (other than interest in the case of a banking enterprise)."

Paragraph 8 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 9: Deleted together with the preceding heading on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 9 and the preceding heading read as follows:

> "*Paragraph 4*
>
> 9. *Brazil* reserves the right not to adopt paragraph 4."

Paragraph 9 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 10: Deleted together with the preceding heading on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 10 and the preceding heading read as follows:

> "*Paragraph 5*
>
> 10. *Vietnam* reserves the right not to adopt paragraph 5."

Paragraph 10 was added together with the preceding heading on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 10 was previously deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Council on 29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 10 read as follows:

> "10. *Estonia* reserves the right to include a provision that will permit resort to domestic law in relation to the taxation of an insurance enterprise."

Paragraph 10 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 11: Deleted together with the preceding heading on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 11 and the preceding heading read as follows:

> "*Paragraph 6*
>
> 11. *Brazil* reserves the right not to adopt paragraph 6."

Paragraph 11 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 12: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 but 22 July 2010, paragraph 12 read as follows:

> "12. *India* does not agree with the interpretation given in paragraph 25."

Paragraph 12 was added together with the heading preceding it on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 13: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 13 read as follows:

> "13. As regards paragraphs 41-50 of the Commentary on Article 7, *Chile* does not adhere to the specific methods provided as the rules on the amount of profit attributable to a permanent establishment; these must be established in and follow domestic law (including foreign exchange legislation)."

Paragraph 13 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 8 (SHIPPING, INLAND WATERWAYS TRANSPORT AND AIR TRANSPORT) AND ITS COMMENTARY

Positions on the Article

1. *Armenia*, *Latvia* and *Lithuania* reserve the right in exceptional cases to apply the permanent establishment rule in relation to profits derived from the operation of ships in international traffic.

(Amended on 17 July 2008; see HISTORY)

Paragraph 1

2. The *Philippines* reserves the right to provide for taxation of the profits from shipping and air transport in accordance with domestic law.

2.1 *Indonesia* reserves the right to allow the State of source to tax profits from the operation of ships in international traffic provided that the shipping activities arising from such operation in that State are more than casual and subject to certain limits.

(Added on 22 July 2010; see HISTORY)

3. *Albania* and *Bulgaria* reserve the right to tax profits from the carriage of passengers or cargo taken on board at one place in a respective country for discharge at another place in the same country.

(Replaced on 28 January 2003; see HISTORY)

4. *South Africa* reserves the right to include in paragraph 1 profits from the leasing of containers.

5. *Thailand* reserves the right to provide for taxation of the profits from shipping in accordance with domestic law.

5.1 *India* reserves the right to apply Article 12 and not Article 8 to profits from leasing ships or aircraft on a bare charter basis.

(Added on 17 July 2008; see HISTORY)

6. *Bulgaria*, *Latvia*, *South Africa* and *Ukraine* reserve the right to include a provision that will ensure that profits from the leasing of ships or aircraft on a bare boat basis and, in the case of Bulgaria, Latvia and Ukraine, from the leasing of containers, will be treated in the same way as income covered by paragraph 1 when such profits are incidental to international transportation.

(Amended on 22 July 2010; see HISTORY)

6.1 *Bulgaria*, *Croatia*, *Russia* and *South Africa* reserve the right to extend the scope of the Article to cover international road and railway transportation in bilateral conventions.

(Amended on 17 July 2008; see HISTORY)

6.2 *Morocco* reserves the right to provide for taxation of profits derived by an enterprise engaged in international transport from the lease of containers which is supplementary or incidental to its international operation of ships or aircraft fall within the scope of this Article.

(Added on 28 January 2003; see HISTORY)

6.3 *Serbia* reserves the right, in the course of negotiations, to propose that the leasing of containers, even if directly connected or ancillary, be regarded as an activity separate from international shipping or aircraft operations, and consequently be excluded from the scope of the Article.

(Amended on 17 July 2008; see HISTORY)

6.4 *Serbia* reserves the right to extend the scope of the Article to cover international road transportation in bilateral conventions.

(Amended on 17 July 2008; see HISTORY)

6.5 *Vietnam* reserves the right to provide that the taxing right with respect to income derived from international transportation shall be shared 50/50.

(Added on 17 July 2008; see HISTORY)

6.6 The *United Arab Emirates* reserves the right to include in its bilateral conventions a provision to confirm that income from selling tickets on behalf of other enterprises, income derived from selling technical services to third parties, income from bank deposits and other investments, such as bonds, shares and other debentures, are covered by Article 8 provided that this income is incidental to the operation of air transport enterprises operating in international traffic.

(Added on 22 July 2010; see HISTORY)

Paragraph 2

7. *Albania*, *Argentina*, *Brazil*, *Estonia*, *Gabon*, *India*, *Latvia*, *Malaysia*, *Morocco*, the *People's Republic of China*, *South Africa* and *Hong Kong, China* reserve the right not to extend the scope of the Article to cover inland waterways transportation in bilateral conventions and are free to make corresponding modifications to paragraph 3 of Articles 13, 15 and 22.

(Amended on 22 July 2010; see HISTORY)

Positions on the Commentary

8. *Vietnam* disagrees with the interpretation presented in paragraph 5 of the Commentary.

9. *Vietnam* disagrees with the interpretation presented in paragraph 10 of the Commentary in relation to the incidental leasing of containers.

10. *Brazil*, *India* and *Malaysia* reserve their position on the application of this Article to income from ancillary activities (see paragraph 4 to 10.1).

(Amended on 17 July 2008; see HISTORY)

HISTORY

Paragraph 1: Amended on 17 July 2008, by changing the list of countries making the position to add Armenia and delete Estonia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 1 read as follows:

> "1. *Estonia*, *Latvia* and *Lithuania* reserve the right in exceptional cases to apply the permanent establishment rule in relation to profits derived from the operation of ships in international traffic."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 3: Replaced on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 3 read as follows:

> "3. *Slovakia* reserves the right to tax under Article 12 profits from the leasing of ships, aircraft and containers."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5: Paragraph 5 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5.1: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 6: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 6 read as follows:

"6. *Bulgaria*, *Latvia*, *South Africa* and *Ukraine* reserve the right to include a provision that will ensure that profits from the leasing of ships or aircraft on a bare boat basis and, in the case of Bulgaria and Ukraine, from the leasing of containers, will be treated in the same way as income covered by paragraph 1 when such profits are incidental to international transportation."

Paragraph 6 was previously amended on 17 July 2008, by adding Latvia to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 6 read as follows:

"6. *Bulgaria*, *South Africa* and *Ukraine* reserve the right to include a provision that will ensure that profits from the leasing of ships or aircraft on a bare boat basis and, in the case of Bulgaria and Ukraine, from the leasing of containers, will be treated in the same way as income covered by paragraph 1 when such profits are incidental to international transportation."

Paragraph 6 was previously amended on 28 January 2003, by adding Bulgaria to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 6 read as follows:

"6. *South Africa* and *Ukraine* reserve the right to include a provision that will ensure that profits from the leasing of ships or aircraft on a bare boat basis and, in the case of Ukraine, from the leasing of containers, will be treated in the same way as income covered by paragraph 1 when such profits are incidental to international transportation."

Paragraph 6 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 6.1: Amended on 17 July 2008, by adding Russia to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 6.1 read as follows:

"6.1 *Bulgaria*, *Croatia* and *South Africa* reserve the right to extend the scope of the Article to cover international road and railway transportation in bilateral conventions."

Paragraph 6.1 was previously amended on 15 July 2005, by adding South Africa to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 6.1 read as follows:

"6.1 *Bulgaria* and *Croatia* and reserve the right to extend the scope of the Article to cover international road and railway transportation in bilateral conventions."

Paragraph 6.1 was added on 28 January 2003, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 6.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 6.3: Amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 6.3 read as follows:

"6.3 *Serbia and Montenegro* reserves the right, in the course of negotiations, to propose that the leasing of containers, even if directly connected or ancillary, be

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

regarded as an activity separate from international shipping or aircraft operations, and consequently be excluded from the scope of the Article."

Paragraph 6.3 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 6.4: Amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 6.4 read as follows:

"6.4 *Serbia and Montenegro* reserves the right to extend the scope of the Article to cover international road transportation in bilateral conventions."

Paragraph 6.4 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 6.5: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 6.6: Added on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 7: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Hong Kong, China and deleting Chile and Slovenia, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 7 read as follows:

"7. *Albania*, *Argentina*, *Brazil*, *Chile*, *Estonia*, *Gabon*, *India*, *Latvia*, *Malaysia*, *Morocco*, the *People's Republic of China*, *Slovenia* and *South Africa* reserve the right not to extend the scope of the Article to cover inland waterways transportation in bilateral conventions and are free to make corresponding modifications to paragraph 3 of Articles 13, 15 and 22."

Paragraph 7 was previously amended on 17 July 2008, by clarifying the position in respect of corresponding modifications to paragraph 3 of Articles 13, 15 and 22 and by changing the list of countries making the position to add Chile, India and Latvia, delete Vietnam and replace "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 7 read as follows:

"7. *Albania*, *Argentina*, *Brazil*, *China*, *Estonia*, *Gabon*, *Malaysia*, *Morocco*, *Slovenia*, *South Africa* and *Vietnam* reserve the right not to extend the scope of the Article to cover inland waterways transportation in bilateral conventions."

Paragraph 7 was previously amended on 28 January 2003, by adding Albania, Gabon, Morocco and Slovenia to the list of countries indicating the position and by adding the word "waterways", by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 7 read as follows:

"7. *Argentina*, *Brazil*, *China*, *Estonia*, *Malaysia*, *South Africa* and *Vietnam* reserve the right not to extend the scope of the Article to cover inland transportation in bilateral conventions."

Paragraph 7 was previously amended on 29 April 2000, by adding Argentina and Estonia to the list of countries indicating the position, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Council on 29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 7 read as follows:

> "7. Brazil, China, Malaysia, South Africa and Vietnam reserve the right not to extend the scope of the Article to cover inland transportation in bilateral conventions."

Paragraph 7 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 8: Paragraph 8 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 9: Paragraph 9 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 10: Amended on 17 July 2008, by adding India to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 10 read as follows:

> "10. *Brazil* and *Malaysia* reserve their position on the application of this Article to income from ancillary activities (cf. paragraphs 4 to 10.1)."

Paragraph 10 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

POSITIONS ON ARTICLE 9
(ASSOCIATED ENTERPRISES)
AND ITS COMMENTARY

Positions on the Article

1. *Brazil*, *Russia*, *Thailand* and *Vietnam* reserve the right not to insert paragraph 2 in their conventions.

(Amended on 15 July 2005; see HISTORY)

2. *Bulgaria*, *Lithuania*, *Russia* and *South Africa* reserve the right to replace "shall" by "may" in the first sentence of paragraph 2 in their conventions.

(Amended on 17 July 2008; see HISTORY)

3. *Malaysia* and *Serbia* reserve the right to specify in paragraph 2 that a correlative adjustment will be made if the adjustment is considered to be justified.

(Amended on 22 July 2010; see HISTORY)

4. *Ivory Coast*, *Morocco* and *Tunisia* reserve the right not to insert paragraph 2 in their conventions unless the commitment to make an adjustment does not apply in the case of fraud, wilful default or neglect. In such a case Tunisia reserves the right to limit the adjustment to periods not covered by its internal statute of limitation.

(Added on 28 January 2003; see HISTORY)

5. *Israel* reserves its right to insert a provision according to which any appropriate adjustment to the amount of the tax charged therein on those profits shall be implemented notwithstanding any time limits or other procedural limitations in the domestic law of the Contracting States, except such limitations as apply to claims made in pursuance of such an agreement.

(Added on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Amended on 15 July 2005, by deleting Malaysia from the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005 paragraph 1 read as follows:

> "1. *Brazil*, *Malaysia*, *Russia*, *Thailand* and *Vietnam* reserve the right not to insert paragraph 2 in their conventions."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Amended on 17 July 2008, by adding Lithuania and Russia to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model

Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 2 read as follows:

> "2. *Bulgaria* and *South Africa* reserve the right to replace "shall" by "may" in the first sentence of paragraph 2 in their conventions."

Paragraph 2 was previously amended on 28 January 2003, by adding Bulgaria as a country indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003 paragraph 2 read as follows:

> "2. *South Africa* reserves the right to replace "shall" by "may" in the first sentence of paragraph 2 in their conventions."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Amended on 22 July 2010, by deleteing Slovenia as a country indicating the position, the Report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 3 read as follows:

> "3. *Malaysia*, *Serbia* and *Slovenia* reserve the right to specify in paragraph 2 that a correlative adjustment will be made if the adjustment is considered to be justified."

Paragraph 3 was previously amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, the Report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 3 read as follows:

> "3. *Malaysia*, *Serbia and Montenegro* and *Slovenia* reserve the right to specify in paragraph 2 that a correlative adjustment will be made if the adjustment is considered to be justified."

Paragraph 3 was previously amended on 15 July 2005, by adding Malaysia and Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 3 read as follows:

> "3. *Slovenia* reserves the right to specify in paragraph 2 that a correlative adjustment will be made if the adjustment is considered to be justified."

Paragraph 3 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 4: Paragraph 4 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 5: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

POSITIONS ON ARTICLE 10 (DIVIDENDS) AND ITS COMMENTARY

Positions on the Article

1. *Argentina* and *Thailand* reserve the right to apply a 10 per cent rate of tax at source in the case referred to in subparagraph *a)*.

2. *(Deleted on 22 July 2010; see HISTORY)*

3. *Bulgaria*, *Estonia*, *India*, *Latvia*, *Lithuania*, *Russia* and *Serbia* reserve the right not to include the requirement for the competent authorities to settle by mutual agreement the mode of application of paragraph 2.

(Amended on 17 July 2008; see HISTORY)

4. *Israel* reserves its position on the rates provided for in paragraph 2.

(Amended on 22 July 2010; see HISTORY)

5. *Romania* reserves the right to tax at a uniform rate to be negotiated all dividends referred to in this paragraph.

6. *Gabon*, *Ivory Coast*, *Morocco*, *Russia*, *South Africa* and *Tunisia* reserve their position on the rates of tax in paragraph 2 and the minimum percentage for the holding in subparagraph *a)*.

(Amended on 28 January 2003; see HISTORY)

7. *Serbia* and *Vietnam* reserve the right to tax, at a uniform rate of not less than 10 per cent, all dividends referred to in paragraph 2.

(Amended on 15 July 2005; see HISTORY)

7.1 *Latvia* reserves the right to reduce to 10 per cent the minimum percentage for the holding in subparagraph *a)* and to apply a 10 per cent rate of tax at source in the case referred to in subparagraph *b)*.

(Amended on 17 July 2008; see HISTORY)

7.2 *India* reserves the right to settle the rate of tax in bilateral negotiations.

(Added on 17 July 2008; see HISTORY)

Paragraph 3

8. *Argentina*, *Russia* and *Tunisia* reserve the right to include a provision that will allow them to apply the thin capitalisation measures of their domestic law notwithstanding any other provisions of the Convention.

(Amended on 17 July 2008; see HISTORY)

9. As their legislation does not provide for such concepts as “jouissance” shares, “jouissance” rights, mining shares and founders’ shares, *Albania*, *Armenia*, *Bulgaria*, *Belarus* and *Serbia* reserve the right to omit them from paragraph 3.

(Amended on 17 July 2008; see HISTORY)

9.1 *(Deleted on 22 July 2010; see HISTORY)*

10. *Bulgaria*, *Estonia*, *Latvia* and *Lithuania* reserve the right to replace, in paragraph 3, the words “income from other corporate rights” by “income from other rights”.

(Amended on 28 January 2003; see HISTORY)

10.1 *Morocco* reserves the right to amplify the definition of dividends in paragraph 3 by adding the words “and other assimilated income” after the words “as well as income from other corporate rights” and until the words “which is subjected to the same taxation treatment…”.

(Added on 28 January 2003; see HISTORY)

10.2 *India* reserves the right to modify the definition of the term “dividends”.

(Added on 17 July 2008; see HISTORY)

10.3 *Israel* reserves the right to exclude payments made by a Real Estate Investment Trust which is a resident of Israel from the definition of dividends in paragraph 3 and to tax those payments according to its domestic law.

(Replaced on 22 July 2010; see HISTORY)

Paragraph 5

11. *Argentina*, *Kazakhstan*, *Morocco*, *Russia* and *Tunisia* reserve the right to apply a branch profits tax.

(Amended on 17 July 2008; see HISTORY)

12. *Brazil* reserves the right to levy withholding tax on profits of a permanent establishment at the same rate of tax as is provided in paragraph 2, as is the traditional rule in the Brazilian income tax system.

13. *Thailand* reserves the right to levy a profit remittance tax on a permanent establishment at the same rate as is provided for in subparagraph 2 *a*).

(Amended on 22 July 2010; see HISTORY)

14. *Indonesia* reserves the right to apply a branch profits tax, but that branch profits tax shall not affect the provisions contained in any production sharing contracts relating to oil and gas and contracts of works for other mining sectors.

(Replaced on 22 July 2010; see HISTORY)

Position on the Commentary

15. *India* does not adhere to the interpretation set out in paragraph 24. Under the domestic law certain payments are treated as distributions and are therefore included in the definition of dividends.

(Added on 17 July 2008; see HISTORY)

HISTORY

Paragraph 1: Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 2 read as follows:

> "2. In view of its particular taxation system, *Chile* retains its freedom of action with regard to the provisions in the Convention relating to the rate and form of distribution of profits by companies."

Paragraph 2 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 2 was previously deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 2 read as follows:

> "2. *Brazil* reserves the right to tax all dividends referred to in paragraph 2 at a uniform rate to be negotiated."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Amended on 17 July 2008, by changing the list of countries indicating the position by adding India and Russia and by replacing Serbia and Montenegro with Serbia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 3 read as follows:

> "3. *Bulgaria*, *Estonia*, *Latvia*, *Lithuania* and *Serbia and Montenegro* reserve the right not to include the requirement for the competent authorities to settle by mutual agreement the mode of application of paragraph 2."

Paragraph 3 was previously amended on 15 July 2005, by changing the list of countries making the position to add Serbia and Montenegro and delete Romania, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 3 read as follows:

> "3. *Bulgaria*, *Estonia*, *Latvia*, *Lithuania* and *Romania* reserve the right not to include the requirement for the competent authorities to settle by mutual agreement the mode of application of paragraph 2."

Paragraph 3 was previously amended on 28 January 2003, by adding Bulgaria to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 3 read as follows:

"3. *Estonia*, *Latvia*, *Lithuania* and *Romania* reserve the right not to include the requirement for the competent authorities to settle by mutual agreement the mode of application of paragraph 2."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 4 read as follows:

"4. *Israel* reserves its position on the rates provided for in paragraph 2, especially with respect to dividends which are distributed out of the profits of an "approved enterprise" according to its law for the encouragement of investment."

Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5: Paragraph 5 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 6: Amended on 28 January 2003, by adding Gabon, Ivory Coast, Morocco and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 6 read as follows:

"6. *Russia* and *South Africa* reserve their position on the rates of tax in paragraph 2 and the minimum percentage for the holding in subparagraph *a)*."

Paragraph 6 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7: Amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 7 read as follows:

"7. *Vietnam* and *Serbia and Montenegro* reserve the right to tax, at a uniform rate of not less than 10 per cent, all dividends referred to in paragraph 2."

Paragraph 7 was previously amended on 15 July 2005, by adding Serbia and Montenegro as a country indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 7 read as follows:

"7. *Vietnam* reserves the right to tax, at a uniform rate of not less than 10 per cent, all dividends referred to in paragraph 2."

Paragraph 7 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7.1: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 7.1 read as follows:

"7.1 *Latvia* reserves the right to apply a 10 per cent rate of tax at source in the case referred to in subparagraph *b)*."

Paragraph 7.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Council on 29 April 2000.

Paragraph 7.2: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8: Amended on 17 July 2008, by adding Russia to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 8 read as follows:

> "8. *Argentina* and *Tunisia* reserve the right to include a provision that will allow them to apply the thin capitalisation measures of their domestic law notwithstanding any other provisions of the Convention."

P (10)

Paragraph 8 was previously amended on 28 January 2003, by adding Tunisia as a country indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 8 read as follows:

> "8. *Argentina* reserves the right to include a provision that will allow it to apply the thin capitalization measures of its domestic law notwithstanding any other provisions of the Convention."

Paragraph 8 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 9: Amended on 17 July 2008, by changing the list of countries indicating the position by adding Armenia and replacing Serbia and Montenegro with Serbia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 9 read as follows:

> "9. As their legislation does not provide for such concepts as "jouissance" shares, "jouissance" rights, mining shares and founders' shares, *Albania*, *Bulgaria*, *Belarus*, *Serbia and Montenegro* and *Vietnam* reserve the right to omit them from paragraph 3."

Paragraph 9 was previously amended on 28 January 2003, by adding Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 9 read as follows:

> "9. As their legislation does not provide for such concepts as "jouissance" shares, "jouissance" rights, mining shares and founders' shares, *Albania*, *Bulgaria*, *Belarus* and *Vietnam* reserve the right to omit them from paragraph 3."

Paragraph 9 was previously amended on 28 January 2003, by adding Albania and Bulgaria to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 9 read as follows:

> "9. As their legislation does not provide for such concepts as "jouissance" shares, "jouissance" rights, mining shares and founders' shares, *Belarus* and *Vietnam* reserve the right to omit them from paragraph 3."

Paragraph 9 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 9.1: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 9.1 read as follows:

> "9.1 *Slovenia* reserves the right to omit "jouissance" shares, "jouissance" rights, and mining shares as its their legislation does not provide for such concepts."

Paragraph 9.1 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 10: Amended on 28 January 2003, by adding Bulgaria to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 10 read as follows:

> "10. *Estonia*, *Latvia* and *Lithuania* reserve the right to replace, in paragraph 3, the words "income from other corporate rights" by "income from other rights"."

Paragraph 10 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 10.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 10.2: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 10.3: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 10.3 read as follows:

> "10.3 *Chile* reserves the right to amplify the definition of dividends in paragraph 3 so as to cover all income subjected to the taxation treatment of distributions."

Paragraph 10.3 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 11: Amended on 17 July 2008, by adding Kazakhstan to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 11 read as follows:

> "11. *Argentina*, *Morocco*, *Russia* and *Tunisia* reserve the right to apply a branch profits tax."

Paragraph 11 was previously amended on 15 July 2005, by removing Romania from the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 11 read as follows:

> "11. *Argentina*, *Morocco*, *Romania*, *Russia* and *Tunisia* reserve the right to apply a branch profits tax."

Paragraph 11 was previously amended on 28 January 2003, by adding Morocco and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 11 read as follows:

> "11. *Argentina*, *Romania* and *Russia* reserve the right to apply a branch profits tax."

Paragraph 11 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 12: Paragraph 12 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 13: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 13 read as follows:

> "13. *Thailand* reserves the right to levy tax on distributions by non-resident companies of profits arising within its territory."

Paragraph 13 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 14: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 14 read as follows:

> "14. In view of its particular taxation system, *Chile* retains its freedom of action with regard to the provisions in the Convention relating to the rate and form of distribution of profits by permanent establishments."

Paragraph 14 was previously replaced on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 14 read as follows:

> "14. *Vietnam* reserves the right to levy its profit remittance tax at rates not exceeding 10 per cent."

Paragraph 14 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 15: Added on 17 July 2008 together with the heading preceding it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 11
(INTEREST)
AND ITS COMMENTARY

Positions on the Article

1. *Bulgaria* and *Ukraine* reserve the right to exclude from the scope of the Article interest on a debt-claim where the main purpose or one of the main purposes of any person concerned with the creation or assignment of the debt-claim in respect of which the interest is paid is to take advantage of this Article and not for *bona fide* commercial reasons.

(Amended on 28 January 2003; see HISTORY)

Paragraph 2

2. *Argentina*, *Brazil*, *India*, *Israel, Ivory Coast*, the *Philippines*, *Romania*, *Thailand* and *Ukraine* reserve their positions on the rate provided for in paragraph 2.

(Amended on 22 July 2010; see HISTORY)

3. *Brazil* reserves the right to add to its conventions a paragraph dealing with interest paid to a government of a Contracting State or one of its political subdivisions or a local authority thereof or any agency (including a financial institution) wholly owned by the said government and stating that such interest is taxable only in the State of residence of the creditor. However, if interest is paid by a government of a Contracting State or one of its political subdivisions or a local authority thereof or any agency (including a financial institution) wholly owned by the said government, such interest shall be taxable only in that Contracting State (*i.e.* in the State of source).

3.1 *(Deleted on 15 July 2005; see HISTORY)*

3.2 *(Deleted on 15 July 2005; see HISTORY)*

4. *Bulgaria*, *Estonia*, *India*, *Latvia*, *Lithuania*, *Russia* and *Serbia* reserve the right not to include the requirement for the competent authorities to settle by mutual agreement the mode of application of paragraph 2.

(Amended on 17 July 2008; see HISTORY)

Paragraph 3

5. *Brazil*, *Thailand* and *Ukraine* reserve the right to regard penalty charges for late payment as interest for the purposes of this Article, in accordance with their domestic law.

6. *Malaysia* reserves the right to exclude premiums or prizes from the definition of interest, in accordance with the treatment of such payments under its domestic law.

7. *Brazil* and *Thailand* reserve the right to consider as interest any other income assimilated to income from money lent by the tax law of the Contracting State in which the income arises.

(Amended on 22 July 2010; see HISTORY)

7.1 *Estonia*, *Latvia*, *Lithuania*, *Morocco* and *Tunisia* reserve the right to amend the definition of interest to clarify that interest payments treated as distributions under its domestic law fall within Article 10.

(Amended on 28 January 2003; see HISTORY)

7.2 *(Deleted on 22 July 2010; see HISTORY)*

Paragraph 4

8. *Brazil* reserves the right to provide that where interest is paid to a permanent establishment of a resident of the other Contracting State situated in a third State, the limit on the rate of taxation of interest in paragraph 2 shall not apply.

8.1 *Morocco* reserves the right to include in paragraph 4 a reference to other business activities carried on in the other State of the same and similar kind as those effected through a permanent establishment.

(Added on 28 January 2003; see HISTORY)

Paragraph 5

8.2 *Israel* reserves the right to include a provision that would allow interest income to be taxed under Article 7 if the taxpayer so elects.

(Added on 15 July 2005; see HISTORY)

Positions on the Commentary

9. *Malaysia* does not agree with paragraph 20 of the Commentary as under Malaysian domestic legislation, premiums or prizes are not taxable.

10. *India* reserves its right to treat the interest element of sales on credit (described in paragraph 7.8 and 7.9) as interest.

(Added on 17 July 2008; see HISTORY)

11. *India* does not adhere to the interpretation set out in paragraph 20, it reserves the right to treat the difference between redemption value and issue price in accordance with its domestic law.

(Added on 17 July 2008; see HISTORY)

HISTORY

Paragraph 1: Amended, by adding Bulgaria as a country indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 1 read as follows:

> "1. *Ukraine* reserves the right to exclude from the scope of the Article interest on a debt claim where the main purpose or one of the main purposes of any person concerned with the creation or assignment of the debt-claim in respect of which the interest is paid is to take advantage of this Article and not for *bona fide* commercial reasons."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

P (11)

Paragraph 2: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Israel and deleting Chile, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 2 read as follows:

> "2. *Argentina*, *Brazil*, *Chile*, *India*, *Ivory Coast*, the *Philippines*, *Romania*, *Thailand* and *Ukraine* reserve their positions on the rate provided for in paragraph 2"

Paragraph 2 was previously amended on 17 July 2008, by adding Chile and India to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 2 read as follows:

> "2. *Argentina*, *Brazil*, *Ivory Coast*, the *Philippines*, *Romania*, *Thailand* and *Ukraine* reserve their positions on the rate provided for in paragraph 2."

Paragraph 2 was previously amended on 28 January 2003, by changing the list of countries indicating the position by adding Bulgaria and deleting Slovakia, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 2 read as follows:

> "2. *Argentina*, *Brazil*, the *Philippines*, *Romania*, *Slovakia*, *Thailand* and *Ukraine* reserve their positions on the rate provided for in paragraph 2."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3.1: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 3.1 read as follows:

> "3.1 *Estonia* reserves the right to add a paragraph according to which interest arising in a Contracting State, derived and beneficially owned by the Government of the other Contracting State, including its local authorities, the Central Bank or any financial institution wholly owned by that Government shall be exempt from tax in the first-mentioned State (*i.e.*, in the State of source)."

Paragraph 3.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Council on 29 April 2000.

Paragraph 3.2: Deleted on 15 July 2005 by the report entitled “The 2005 Update to the Model Tax Convention”, adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 3.2 read as follows:

> “3.2 *Bulgaria* reserves the right to add a paragraph according to which interest arising in a Contracting State, derived and beneficially owned by the Government of the other Contracting State, including its local authorities or the Central Bank shall be exempt from tax in the first-mentioned State (*i.e.*, in the State of source).”

Paragraph 3.2 was added on 28 January 2003 by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003.

Paragraph 4: Amended on 17 July 2008, by changing the list of countries indicating the position by adding India and Russia and replacing Serbia and Montenegro with Serbia, by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 4 read as follows:

> “4. *Bulgaria*, *Estonia*, *Latvia*, *Lithuania* and *Serbia and Montenegro* reserve the right not to include the requirement for the competent authorities to settle by mutual agreement the mode of application of paragraph 2.”

Paragraph 4 was previously amended on 15 July 2005, by changing the list of countries indicating the position by adding Serbia and Montenegro and deleting Romania, by the report entitled “The 2005 Update to the Model Tax Convention”, adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 4 read as follows:

> “4. *Bulgaria*, *Estonia*, *Latvia*, *Lithuania* and *Romania* reserve the right not to include the requirement for the competent authorities to settle by mutual agreement the mode of application of paragraph 2.”

Paragraph 4 was previously amended on 28 January 2003, by adding Bulgaria to the list of countries indicating the position, by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 4 read as follows:

> “4. *Estonia*, *Latvia*, *Lithuania* and *Romania* reserve the right not to include the requirement for the competent authorities to settle by mutual agreement the mode of application of paragraph 2.”

Paragraph 4 was included when this section was added in 1997 by the report entitled “The 1997 Update to the Model Tax Convention”, adopted by the OECD Council on 23 October 1997.

Paragraph 5: Paragraph 5 was included when this section was added in 1997 by the report entitled “The 1997 Update to the Model Tax Convention”, adopted by the OECD Council on 23 October 1997.

Paragraph 6: Paragraph 6 was included when this section was added in 1997 by the report entitled “The 1997 Update to the Model Tax Convention”, adopted by the OECD Council on 23 October 1997.

Paragraph 7: Amended on 22 July 2010, by adding Thailand as a country indicating the position, by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 7 read as follows:

> “7. *Brazil* reserves the right to consider as interest any other income assimilated to income from money lent by the tax law of the Contracting State in which the income arises”

Paragraph 7 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7.1: Amended on 28 January 2003, by adding Morocco and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 7.1 read as follows:

> "7.1 *Estonia*, *Latvia* and *Lithuania* reserve the right to amend the definition of interest to clarify that interest payments treated as distributions under its domestic law fall within Article 10."

Paragraph 7.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Council on 29 April 2000.

Paragraph 7.2: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 7.2 read as follows:

> "7.2 *Chile* reserves the right to delete the reference to debt-claims carrying the right to participate in the debtor's profits."

Paragraph 7.2 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8: Paragraph 8 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 8.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 8.2: Added together with the heading preceding it on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 9: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 10: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 11: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 12
(ROYALTIES)
AND ITS COMMENTARY

Positions on the Article

1. *Bulgaria* and *Ukraine* reserve the right to exclude from the scope of this Article royalties arising from property or rights created or assigned mainly for the purpose of taking advantage of this Article and not for *bona fide* commercial reasons.

(Amended on 28 January 2003; see HISTORY)

2. *(Deleted on 22 July 2010; see HISTORY)*

Paragraph 1

3. *Albania*, *Argentina*, *Armenia*, *Belarus*, *Brazil*, *Bulgaria*, *Croatia*, the *Democratic Republic of the Congo*, *Gabon*, *Indonesia*, *Ivory Coast*, *Kazakhstan*, *Latvia*, *Lithuania*, *Malaysia*, *Morocco*, the *People's Republic of China*, the *Philippines*, *Romania*, *Russia*, *Serbia*, *South Africa*, *Thailand*, *Tunisia*, *Ukraine*, *Vietnam* and *Hong Kong, China* reserve the right to tax royalties at source.

(Amended on 22 July 2010; see HISTORY)

4. *Armenia* reserves the right to tax copyright royalties for literary, scientific and artistic work at a reduced tax rate.

(Added on 17 July 2008; see HISTORY)

4.1 *India* reserves the right to: tax royalties and fees for technical services at source; define these, particularly by reference to its domestic law; define the source of such payments, which may extend beyond the source defined in paragraph 5 of Article 11, and modify paragraph 3 and paragraph 4 accordingly.

(Added on 17 July 2008; see HISTORY)

Paragraph 2

5. *Argentina*, *Brazil*, *Gabon*, *Ivory Coast*, *Morocco*, *Russia*, *Thailand* and *Tunisia* reserve the right to continue to include in the definition of royalties income derived from the leasing of industrial, commercial or scientific equipment and of containers, as provided for in paragraph 2 of Article 12 of the 1977 Model Double Taxation Convention.

(Amended on 28 January 2003; see HISTORY)

6. *Argentina*, the *Philippines*, *Thailand* and *Vietnam* reserve the right to include fees for technical services in the definition of royalties.

(Amended on 17 July 2008; see HISTORY)

7. *Brazil*, *Gabon*, *Ivory Coast* and *Tunisia* reserve the right to include fees for technical assistance and technical services in the definition of "royalties".

(Amended on 28 January 2003; see HISTORY)

7.1 *Morocco* reserves the right to include in the definition of the royalties, payments for services, technical assistance, technical and economic studies and all kind of services fees.

(Added on 28 January 2003; see HISTORY)

8. *Albania*, *Armenia*, *Belarus*, *Brazil*, *Bulgaria*, *India*, *Indonesia*, *Kazakhstan*, *Latvia*, *Lithuania*, *Malaysia*, the *People's Republic of China*, the *Philippines*, *Romania*, *Russia*, *Serbia*, *Thailand* and *Vietnam* reserve the right to include in the definition of royalties payments for the use of, or the right to use, industrial, commercial or scientific equipment. Bulgaria intends to propose in bilateral negotiations the source taxation of royalties on industrial, commercial or scientific equipment at a lower rate than the rate applied to the rest of the royalty payments.

(Amended on 22 July 2010; see HISTORY)

8.1 *Serbia* reserves the right to include in the definition of royalties income derived from the leasing of ships or aircraft on a bare boat charter basis and containers.

(Amended on 17 July 2008; see HISTORY)

8.2 *Malaysia* reserves the right to include in the definition of royalties income derived from the leasing of containers and ships or aircraft, including on a slot hire, time charter, voyage charter, or a bare boat charter basis, whether or not such charters are crewed, equipped or provisioned.

(Added on 15 July 2005; see HISTORY)

8.3 *(Renumbered on 22 July 2010; see HISTORY)*

9. *Belarus* reserves the right to include a reference to transport vehicles in the definition of royalties.

10. *Brazil*, *Bulgaria*, *Morocco* and *Romania* reserve the right to include in the definition of the royalties payments for transmissions by satellite, cable, optic fibre or similar technology.

(Amended on 17 July 2008; see HISTORY)

10.1 *Vietnam* reserves the right to include in the definition of royalties, payments for the use of or the right to use of "films, tapes or digital media used for radio or television broadcasting".

(Added on 17 July 2008; see HISTORY)

11. *Albania*, *Malaysia*, *Serbia* and *Vietnam* reserve the right to deal with fees for technical services in a separate Article similar to Article 12.

(Amended on 22 July 2010; see HISTORY)

12. *Albania*, *Argentina*, *Armenia*, *Belarus*, *Brazil*, *Bulgaria*, *Croatia*, *Estonia*, *Gabon*, *Indonesia*, *Ivory Coast*, *Kazakhstan*, *Latvia*, *Lithuania*, *Malaysia*, *Morocco*, the *People's Republic of China*, *the Philippines*, *Romania*, *Serbia*, *South Africa*, *Thailand*, *Tunisia*, *Ukraine*, *Vietnam* and *Hong Kong, China* reserve the right, in order to fill what they consider as a gap in the Article, to add a provision defining the source of royalties by analogy with the provisions of paragraph 5 of Article 11, which deals with the same issue in the case of interest.

(Amended on 22 July 2010; see HISTORY)

12.1 *Morocco* reserves the right to include in the paragraph a reference to other business activities carried on in the other State of the same and similar kind as those effected through a permanent establishment.

(Added on 28 January 2003; see HISTORY)

12.2 The *Democratic Republic of the Congo* and *Malaysia* reserve their position on the treatment of software.

(Amended on 22 July 2010; see HISTORY)

12.3 *Kazakhstan* reserves the right to include in the definition of royalties payments for the use of, or the right to use, software.

(Added on 17 July 2008; see HISTORY)

Positions on the Commentary

13. *Argentina*, *Morocco*, *Serbia* and *Tunisia* do not adhere to the interpretation in paragraph 14 and 15 of the Commentary. They hold the view that payments relating to software fall within the scope of the Article where less than the full rights to software are transferred, either if the payments are in consideration for the right to use a copyright on software for commercial exploitation or if they relate to software acquired for the personal or business use of the purchaser.

(Amended on 17 July 2008; see HISTORY)

14. *Vietnam* does not agree with paragraph 9 of the Commentary. Even if the phrase "for the use of, or the right to use, industrial, commercial or scientific

equipment" is not included in paragraph 2 and income from the leasing of equipment falls under Article 7, the fact that an enterprise of a Contracting State leases heavy equipment to a person resident in Vietnam will constitute a permanent establishment of that enterprise in Vietnam.

15. *Brazil* does not agree with the interpretation provided in paragraph 17.1 to 17.4, especially in view of the principle of taxation at the source of payments in its legislation.

(Added on 28 January 2003; see HISTORY)

16. *Malaysia* cannot adhere to the new additional sentence in paragraph 11.2, *i.e.* "Payments made under the latter contracts generally fall under Article 7". Malaysia treats payments for the provision of services as special classes of income under her domestic law and not as business income.

(Added on 28 January 2003; see HISTORY)

17. *India* reserves its position on the interpretations provided in paragraphs 8.2, 10.1, 10.2, 14, 14.1, 14.2, 14.4, 15, 16 and 17.3; it is of the view that some of the payments referred to may constitute royalties.

(Added on 17 July 2008; see HISTORY)

18. *India* does not agree with the interpretation that information concerning industrial, commercial or scientific experience is confined to only previous experience.

(Added on 17 July 2008; see HISTORY)

19. *Malaysia* does not adhere to the interpretation in paragraph 14.2 because Malaysia is of the view that licence fees for rights to distribute software constitute royalties.

(Added on 17 July 2008; see HISTORY)

20. *India* does not agree with the interpretation in paragraph 9.1 of the Commentary on Article 12 according to which a payment for transponder leasing will not constitute royalty. This notion is contrary to the Indian position that income from transponder leasing constitutes an equipment royalty taxable both under India's domestic law and its treaties with many countries. It is also contrary to India's position that a payment for the use of a transponder is a payment for the use of a process resulting in a royalty under Article 12. India also does not agree with the conclusion included in the paragraph concerning undersea cables and pipelines as it considers that undersea cables and pipelines are industrial, commercial or scientific equipment and that payments made for their use constitute equipment royalties.

(Added on 22 July 2010; see HISTORY)

21. *India* does not agree with the interpretation in paragraph 9.2 of the Commentary on Article 12. It considers that a roaming call constitutes the use of a process. Accordingly, the payment made for the use of that process constitutes a royalty for the purposes of Article 12. It is also the position of India that a payment for a roaming call constitutes a royalty since it is a payment for the use of industrial, commercial or scientific equipment.

(Added on 22 July 2010; see HISTORY)

22. *India* does not agree with the interpretation in paragraph 9.3 of the Commentary on Article 12. It considers that a payment for spectrum license constitutes a royalty taxable both under India's domestic law and its treaties with many countries.

(Added on 22 July 2010; see HISTORY)

23. The *People's Republic of China* does not adhere to the interpretation in paragraph 10.1 because it takes the view that some payments for the exclusive distribution rights of a product or a service in a given territory may be treated as royalties.

(Renumbered on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Amended on 28 January 2003, by adding Bulgaria as a country indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 1 read as follows:

> "1. *Ukraine* reserves the right to exclude from the scope of this Article royalties arising from property or rights created or assigned mainly for the purpose of taking advantage of this Article and not for *bona fide* commercial reasons."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 2 read as follows:

> "2. *Romania* reserves the right to include an additional article dealing with commissions. This article has the same structure as Article 11 on interest."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Indonesia and Hong Kong, China and deleting Chile, Israel and Slovenia, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 3 read as follows:

> "3. *Albania*, *Argentina*, *Armenia*, *Belarus*, *Brazil*, *Bulgaria*, *Chile*, *Croatia*, the *Democratic Republic of the Congo*, *Gabon*, *Israel*, *Ivory Coast*, *Kazakhstan*, *Latvia*,

Lithuania, *Malaysia*, *Morocco*, the *People's Republic of China*, the *Philippines*, *Romania*, *Russia*, *Serbia*, *Slovenia*, *South Africa*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve the right to tax royalties at source."

Paragraph 3 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding Armenia, Chile, the Democratic Republic of the Congo and Kazakhstan, deleting Estonia and replacing Serbia and Montenegro with Serbia and the reference to "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 3 read as follows:

"3. *Albania*, *Argentina*, *Belarus*, *Brazil*, *Bulgaria*, *China*, *Croatia*, *Estonia*, *Gabon*, *Israel*, *Ivory Coast*, *Latvia*, *Lithuania*, *Malaysia*, *Morocco*, the *Philippines*, *Romania*, *Russia*, *Serbia and Montenegro*, *Slovenia*, *South Africa*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve the right to tax royalties at source."

Paragraph 3 was previously amended on 15 July 2005, by adding Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 3 read as follows:

"3. *Albania*, *Argentina*, *Belarus*, *Brazil*, *Bulgaria*, *China*, *Croatia*, *Estonia*, *Gabon*, *Israel*, *Ivory Coast*, *Latvia*, *Lithuania*, *Malaysia*, *Morocco*, the *Philippines*, *Romania*, *Russia*, *Slovenia*, *South Africa*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve the right to tax royalties at source."

Paragraph 3 was previously amended on 28 January 2003, by adding Albania, Bulgaria, Croatia, Gabon, Ivory Coast, Morocco, Slovenia and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 3 read as follows:

"3. *Argentina*, *Belarus*, *Brazil*, *China*, *Estonia*, *Israel*, *Latvia*, *Lithuania*, *Malaysia*, the *Philippines*, *Romania*, *Russia*, *South Africa*, *Thailand*, *Ukraine* and *Vietnam* reserve the right to tax royalties at source."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Added on 17 July 2008, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 4 was deleted on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 4 read as follows:

"4. *Slovakia* reserves the right to tax royalties at source but is prepared to exempt from tax copyright royalties in respect of a cultural, dramatic, musical or artistic work, but not including royalties in respect of motion picture films and works on film or videotape or other means of reproduction for use in connection with television."

Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4.1: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 5: Amended on 28 January 2003, by adding Gabon, Ivory Coast, Morocco, and Tunisia to the list of countries indicating the position, by the report entitled "The

2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 5 read as follows:

"5. *Argentina*, *Brazil*, *Russia* and *Thailand* reserve the right to continue to include in the definition of royalties income derived from the leasing of industrial, commercial or scientific equipment and of containers, as provided for in paragraph 2 of Article 12 of the 1977 Model Double Taxation Convention."

Paragraph 5 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 6: Amended on 17 July 2008, by adding Vietnam to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 6 read as follows:

"6. *Argentina*, the *Philippines* and *Thailand* reserve the right to include fees for technical services in the definition of royalties."

Paragraph 6 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7: Amended on 28 January 2003, by adding Gabon, Ivory Coast and Tunisia as countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 7 read as follows:

"7. *Brazil*, reserves the right to include fees for technical assistance and technical services in the definition of "royalties"."

Paragraph 7 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 8: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Indonesia and Thailand and deleting Chile, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 8 read as follows:

"8. *Albania*, *Armenia*, *Belarus*, *Brazil*, *Bulgaria*, *Chile*, *India*, *Kazakhstan*, *Latvia*, *Lithuania*, *Malaysia*, the *People's Republic of China*, the *Philippines*, *Romania*, *Russia*, *Serbia* and *Vietnam* reserve the right to include in the definition of royalties payments for the use of, or the right to use, industrial, commercial or scientific equipment. Bulgaria intends to propose in bilateral negotiations source taxation of royalties on industrial, commercial or scientific equipment at a lower rate than the rate applied to the rest of the royalty payments."

Paragraph 8 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding Armenia, Brazil, Chile, India, Kazakhstan, Russia and Vietnam and replacing Serbia and Montenegro with Serbia and the reference to "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 8 read as follows:

"8. *Albania*, *Belarus*, *Bulgaria*, *China*, *Latvia*, *Lithuania*, *Malaysia*, the *Philippines*, *Romania* and *Serbia and Montenegro* reserve the right to include in the definition of royalties payments for the use of, or the right to use, industrial, commercial or

scientific equipment. Bulgaria intends to propose in bilateral negotiations source taxation of royalties on industrial, commercial or scientific equipment at a lower rate than the rate applied to the rest of the royalty payments."

Paragraph 8 was previously amended on 15 July 2005, by changing the list of countries indicating the position by adding Malaysia and Serbia and Montenegro and deleting Estonia, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 8 read as follows:

"8. *Albania*, *Belarus*, *Bulgaria*, *China*, *Estonia*, *Latvia*, *Lithuania*, the *Philippines*, and *Romania* reserve the right to include in the definition of royalties payments for the use of, or the right to use, industrial, commercial or scientific equipment. Bulgaria intends to propose in bilateral negotiations source taxation of royalties on industrial, commercial or scientific equipment at a lower rate than the rate applied to the rest of the royalty payments."

Paragraph 8 was previously amended on 28 January 2003, by changing the list of countries indicating the position by adding Albania and Bulgaria and deleting Slovakia, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 8 read as follows:

"8. *Belarus*, *China*, *Estonia*, *Latvia*, *Lithuania*, the *Philippines*, *Romania* and *Slovakia* reserve the right to include in the definition of royalties payments for the use of, or the right to use, industrial, commercial or scientific equipment."

Paragraph 8 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 8.1: Amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 8.1 read as follows:

"8.1 *Serbia and Montenegro* reserves the right to include in the definition of royalties income derived from the leasing of ships or aircraft on a bare boat charter basis and containers."

Paragraph 8.1 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 8.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 8.3: Renumbered as paragraph 23 (see history of paragraph 23) on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 9: Paragraph 9 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 10: Amended on 17 July 2008, deleting Estonia, Latvia and Lithuania from the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 10 read as follows:

"10. *Brazil*, *Bulgaria*, *Estonia*, *Latvia*, *Lithuania*, *Morocco* and *Romania* reserve the right to include in the definition of the royalties payments for transmissions by satellite, cable, optic fibre or similar technology."

Paragraph 10 was previously amended on 28 January 2003, by adding Bulgaria and Morocco to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 10 read as follows:

> "10. *Brazil*, *Estonia*, *Latvia*, *Lithuania* and *Romania* reserve the right to include in the definition of the royalties payments for transmissions by satellite, cable, optic fibre or similar technology."

Paragraph 10 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 10.1: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 11: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Serbia and deleting Russia, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 11 read as follows:

P (12)

> "11. *Albania*, *Malaysia*, *Russia* and *Vietnam* reserve the right to deal with fees for technical services in a separate Article similar to Article 12."

Paragraph 11 was previously amended on 28 January 2003, by adding Albania to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 11 read as follows:

> "11. *Malaysia*, *Russia* and *Vietnam* reserve the right to deal with fees for technical services in a separate Article similar to Article 12."

Paragraph 11 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 12: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Indonesia and Hong Kong, China and deleting Chile and Slovenia, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 12 read as follows:

> "12. *Albania*, *Argentina*, *Armenia*, *Belarus*, *Brazil*, *Bulgaria*, *Chile*, *Croatia*, *Estonia*, *Gabon*, *Ivory Coast*, *Kazakhstan*, *Latvia*, *Lithuania*, *Malaysia*, *Morocco*, the *People's Republic of China*, *the Philippines*, *Romania*, *Serbia*, *Slovenia*, *South Africa*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve the right, in order to fill what they consider as a gap in the Article, to add a provision defining the source of royalties by analogy with the provisions of paragraph 5 of Article 11, which deals with the same issue in the case of interest"

Paragraph 12 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding Armenia, Chile and Kazakhstan and replacing Serbia and Montenegro with Serbia and the reference to "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 12 read as follows:

> "12. *Albania*, *Argentina*, *Belarus*, *Brazil*, *Bulgaria*, *China*, *Croatia*, *Estonia*, *Gabon*, *Ivory Coast*, *Latvia*, *Lithuania*, *Malaysia*, *Morocco*, *the Philippines*, *Romania*, *Serbia and Montenegro*, *Slovenia*, *South Africa*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve the right, in order to fill what they consider as a gap in the Article, to add a provision

defining the source of royalties by analogy with the provisions of paragraph 5 of Article 11, which deals with the same issue in the case of interest."

Paragraph 12 was previously amended on 15 July 2005, by adding Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 12 read as follows:

"12. *Albania*, *Argentina*, *Belarus*, *Brazil*, *Bulgaria*, *China*, *Croatia*, *Estonia*, *Gabon*, *Ivory Coast*, *Latvia*, *Lithuania*, *Malaysia*, *Morocco*, *the Philippines*, *Romania*, *Slovenia*, *South Africa*, *Thailand*, *Tunisia*, *Ukraine* and *Vietnam* reserve the right, in order to fill what they consider as a gap in the Article, to add a provision defining the source of royalties by analogy with the provisions of paragraph 5 of Article 11, which deals with the same issue in the case of interest."

Paragraph 12 was previously amended on 28 January 2003, by adding Albania, Bulgaria, Croatia, Gabon, Ivory Coast, Morocco, Slovenia and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 12 read as follows:

"12. *Argentina*, *Belarus*, *Brazil*, *China*, *Estonia*, *Latvia*, *Lithuania*, *Malaysia*, *the Philippines*, *Romania*, *South Africa*, *Thailand*, *Ukraine* and *Vietnam* reserve the right, in order to fill what they consider as a gap in the Article, to add a provision defining the source of royalties by analogy with the provisions of paragraph 5 of Article 11, which deals with the same issue in the case of interest."

Paragraph 12 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 12.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 12.2: Amended on 22 July 2010, by adding Malaysia as a country indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 12.2 read as follows:

"12.2 The *Democratic Republic of the Congo* reserves its position on the treatment of software."

Paragraph 12.2 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 12.3: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 13: Amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 13 read as follows:

"13. *Argentina*, *Morocco*, *Serbia and Montenegro* and *Tunisia* do not adhere to the interpretation in paragraphs 14 and 15 of the Commentary. They hold the view that payments relating to software fall within the scope of the Article where less than the full rights to software are transferred, either if the payments are in consideration for the right to use a copyright on software for commercial exploitation or if they relate to software acquired for the personal or business use of the purchaser."

Paragraph 13 was previously amended on 15 July 2005, by adding Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The

2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 13 read as follows:

> "13. *Argentina*, *Morocco* and *Tunisia* do not adhere to the interpretation in paragraphs 14 and 15 of the Commentary. They hold the view that payments relating to software fall within the scope of the Article where less than the full rights to software are transferred, either if the payments are in consideration for the right to use a copyright on software for commercial exploitation or if they relate to software acquired for the personal or business use of the purchaser."

Paragraph 13 was previously amended on 28 January 2003, by changing the list of countries indicating the position by adding Morocco and Tunisia and deleting Slovakia, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 13 read as follows:

> "13. *Argentina* and *Slovakia* do not adhere to the interpretation in paragraphs 14 and 15 of the Commentary. They hold the view that payments relating to software fall within the scope of the Article where less than the full rights to software are transferred, either if the payments are in consideration for the right to use a copyright on software for commercial exploitation or if they relate to software acquired for the personal or business use of the purchaser."

Paragraph 13 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 14: Paragraph 14 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 15: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 16: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 17: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 18: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 19: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 20: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 21: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 22: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 23: Corresponds to paragraph 8.3 as it read before 22 July 2010. Paragraph 8.3 was renumbered as paragraph 23 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 8.3 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 13
(CAPITAL GAINS)
AND ITS COMMENTARY

Positions on the Article

1. *Argentina* and *Brazil* reserve the right to tax at source gains from the alienation of property situated in a Contracting State other than property mentioned in paragraph 1, , 3 and 4.

2. The *People's Republic of China*, *Serbia* and *Thailand* reserve the right to tax gains from the alienation of shares or rights that are part of a substantial participation in a resident company.

(Amended on 17 July 2008; see HISTORY)

3. *Latvia* and *Lithuania* reserve the right to insert in a special Article provisions regarding capital gains relating to activities carried on offshore in a Contracting State in connection with the exploration or exploitation of the sea bed, its subsoil and their natural resources.

4. *Estonia* and *Lithuania* reserve the right to limit the application of paragraph 3 to enterprises operating ships and aircraft in international traffic.

(Amended on 22 July 2010; see HISTORY)

5. *India* and *Vietnam* reserve the right to tax gains from the alienation of shares or rights in a company that is a resident of their respective country.

(Amended on 22 July 2010; see HISTORY)

6. *Bulgaria* reserves the right to tax gains from the alienation of shares or rights in a company that is a resident of Bulgaria other than shares quoted on a regulated stock exchange.

(Replaced on 28 January 2003; see HISTORY)

7. *Bulgaria* reserves the right to extend the scope of the provision to cover gains from the alienation of railway and road transport vehicles.

(Added on 28 January 2003; see HISTORY)

8. *Vietnam* reserves the right to modify paragraph 4 so that the immovable property in question need only be 30 per cent of all assets owned by the company.

(Replaced on 17 July 2008; see HISTORY)

9. *Serbia* reserves the right to extend the scope of the provision to cover gains from the alienation of road transport vehicles operated in international traffic.

(Amended on 17 July 2008; see HISTORY)

10. *India* reserves its position on paragraph 4.

(Added on 17 July 2008; see HISTORY)

11. *Israel* reserves its right to insert a provision according to which where a person, who was a resident of a Contracting State, has become a resident of the other Contracting State, this Article shall not prevent the first-mentioned State from taxing under its domestic law the capital gains on the property of that person at the time of change of residence. In the case of the alienation of property dealt with in paragraphs 1, 2, 3 and 4 made after the change of residence, double taxation will be eliminated by the first-mentioned Contracting State. In the case of the alienation of property dealt with in paragraph 5 made after the change of residence, double taxation will be eliminated by the other Contracting State.

(Added on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Amended on 17 July 2008, by changing the list of countries indicating the position by adding Serbia and replacing "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 2 read as follows:

> "2. *Thailand* reserves the right to tax gains from the alienation of shares or rights that are part of a substantial participation in a resident company."

Paragraph 2 was previously amended on 15 July 2005, by removing Israel from the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 2 read as follows:

> "2. *Israel* and *Thailand* reserve the right to tax gains from the alienation of shares or rights that are part of a substantial participation in a resident company."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Amended on 22 July 2010, by deleting Latvia from the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 4 read as follows:

> "4. *Estonia*, *Latvia* and *Lithuania* reserve the right to limit the application of paragraph 3 to enterprises operating ships and aircraft in international traffic."

Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5: Amended on 22 July 2010, by deleting Chile from the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 5 read as follows:

> "5. *Chile*, *India* and *Vietnam* reserve the right to tax gains from the alienation of shares or rights in a company that is a resident of their respective country."

Paragraph 5 was previously amended on 17 July 2008, by adding Chile and India to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 5 read as follows:

> "5. *Vietnam* reserves the right to tax gains from the alienation of shares or rights in a company that is a resident of Vietnam."

Paragraph 5 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 6: Replaced on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 6 read as follows:

> "6. *Estonia*, *Israel*, *Latvia*, *Lithuania*, *Romania*, *Thailand*, *Ukraine* and *Vietnam* reserve the right to tax gains from the alienation of shares or rights of a company the assets of which consist mainly of immovable property situated in the State. *Ukraine* also reserves the right to tax gains from the alienation of contributions (rights) related to shares mentioned in the preceding sentence."

Paragraph 6 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 8: Replaced on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 8 read as follows:

> "8. *Morocco* reserves the right to tax gains derived by non residents from the alienation of shares or rights in a company, the assets of which consist mainly of immovable property situated in that State, in accordance with its domestic legislation."

Paragraph 8 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 9: Amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 9 read as follows:

> "9. *Serbia and Montenegro* reserves the right to extend the scope of the provision to cover gains from the alienation of road transport vehicles operated in international traffic."

Paragraph 9 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 10: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008.

Paragraph 11: Added on 22 July 2010 by the report entitled the “2010 Update to the Model Tax Convention” adopted by the OECD Council on 22 July 2010.

POSITIONS ON ARTICLE 14
(INDEPENDENT PERSONAL SERVICES)
AND ITS COMMENTARY

Positions on the Article

[All the positions on Article 14 were deleted when, on 29 April 2000, Article 14 itself was deleted from the Model Tax Convention pursuant to the report entitled "Issues Related to Article 14 of the OECD Model Tax Convention", which had been adopted by the OECD Committee on Fiscal Affairs on 27 January 2000.]

HISTORY

Title: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. The title previously read as follows:

> "POSITIONS ON ARTICLE 14 (INDEPENDENT PERSONAL SERVICES) AND ITS COMMENTARY"

Paragraph 1: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 1, which was included in 1997, previously read as follows:

> "1. *Argentina* reserves the right to levy tax in an amount not exceeding 10 per cent of the gross income in respect of professional services or other activities of an independent character performed in Argentina where there is no fixed base and to apply its domestic law where there is a fixed base."

Paragraph 2: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 2, which was included in 1997, previously read as follows:

> "2. *Belarus* reserves the right to include in the Article a definition of fixed base that would provide that this term means a fixed place, such as an office or room, through which the activity of an individual performing independent personal services is wholly or partly carried on."

Paragraph 3: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 3, which was included in 1997, previously read as follows:

> "3. *Brazil* and *Malaysia* do not use the concept of fixed base in their conventions and modify accordingly the Article and other Articles that refer to that concept."

Paragraph 4: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 4, which was included in 1997, previously read as follows:

> "4. *Brazil* reserves its position on the Article. When negotiating conventions, Brazil reserves the right to tax at source all payments made by its residents to non-residents."

Paragraph 5: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 5, which was included in 1997, previously read as follows:

"5. *China*, *Romania* and *Slovakia* reserve the right to tax individuals performing professional services or other activities of an independent character if they are present on their territory for a period or periods exceeding in the aggregate 183 days in any twelve month period, even if they do not have a fixed base available to them for the purpose of performing such services or activities."

Paragraph 6: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 6, which was included in 1997, previously read as follows:

"6. *Estonia*, *Latvia* and *Lithuania* reserve the right to restrict the Article to individuals."

Paragraph 7: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 7, which was included in 1997, previously read as follows:

"7. *Estonia*, *Latvia*, *Lithuania* and *South Africa* reserve the right to tax individuals performing professional services or other activities of an independent character if they are present on their territory for a period or periods exceeding in the aggregate 183 days in any twelve month period and deem such an individual to have a fixed base therein for the purposes of the Convention."

Paragraph 8: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 8, which was included in 1997, previously read as follows:

"8. *Latvia* and *Lithuania* reserve the right to insert in a special Article provisions regarding income from independent personal services relating to activities carried on offshore in a Contracting State in connection with the exploration or exploitation of the sea bed, its subsoil and their natural resources."

Paragraph 9: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 9, which was included in 1997, previously read as follows:

"9. *Malaysia* and *Vietnam* reserve the right to tax individuals performing professional services or other activities of an independent character if they are present on their territory for a period or periods exceeding in the aggregate 183 days in the calendar year."

Paragraph 10: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 10, which was included in 1997, previously read as follows:

"10. *Malaysia* reserves the right to tax income in respect of an individual's professional services or other activities of an independent character if the income exceeds an amount to be negotiated."

Paragraph 11: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 11, which was included in 1997, previously read as follows:

"11. The *Philippines* reserves the right to tax individuals performing professional services or other activities of an independent character if they are present on its territory for a period or periods exceeding in the aggregate 120 days in any twelve month period."

Paragraph 12: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 12, which was included in 1997, previously read as follows:

"12. *Thailand* reserves the right to tax individuals performing professional services or other activities of an independent character if they are present on its

territory for a period or periods exceeding a certain number of days, to be negotiated, in any twelve month period."

Paragraph 13: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 13, which was included in 1997, previously read as follows:

"13. *Estonia*, *Latvia* and *Lithuania* do not agree with the interpretation presented in paragraph 3 of the Commentary and interpret the provisions of Article 14, which was included in 1997, according to the provisions of their domestic laws."

Paragraph 14: Deleted by the report entitled "The 2000 Update to the Model Tax Convention", which was adopted by the OECD Council on 29 April 2000. Paragraph 14, which was included in 1997, previously read as follows:

"14. *Vietnam* does not agree with the interpretation presented in paragraph 3 of the Commentary. Vietnam believes that it has the right to tax income covered by the Article according to the provisions of its domestic law, not following the provisions of Article 7 and the Commentary thereon as guidance, particularly for the allowance of deductible expenses."

POSITIONS ON ARTICLE 15 (INCOME FROM EMPLOYMENT) AND ITS COMMENTARY

Positions on the Article

1. *Argentina* reserves its position on subparagraph *a)* of paragraph 2 and wishes to insert in its conventions the words "in the fiscal year concerned" instead of the words "in any twelve month period commencing or ending in the fiscal year concerned".

2. *Latvia* and *Lithuania* reserve the right to insert in a special Article provisions regarding income derived from dependent personal services relating to activities carried on offshore in a Contracting State in connection with the exploration or exploitation of the sea bed, its subsoil and their natural resources.

3. *Argentina* reserves the right to insert in a special article provisions regarding income derived from dependent personal services relating to offshore hydrocarbon exploration and exploitation and related activities.

4. *Serbia* reserves the right to propose a separate paragraph which provides that remuneration derived by a resident of a Contracting State shall be taxable only in that State if the remuneration is paid in respect of an employment exercised in the other Contracting State in connection with a building site, a construction or installation project, for an agreed period during which the site or project does not constitute a permanent establishment in that other State.

(Amended on 17 July 2008; see HISTORY)

5. *India* reserves the right to decide the period of stay referred in this paragraph through bilateral negotiations.

(Added on 17 July 2008; see HISTORY)

5.1 The *United Arab Emirates* reserves the right to modify paragraph 3 to provide that remuneration derived in respect of an employment exercised in connection with an aircraft operated in international traffic (including the crew of the aircraft and ground staff) shall be taxed exclusively in the country of residence of the operator of that aircraft.

(Added on 22 July 2010; see HISTORY)

Position on the Commentary

6. *India* does not adhere to the interpretation set out in paragraph 6.2, because it does not recognise the concept of a partner being treated as an employer in the case of a fiscally transparent partnership.

(Added on 17 July 2008; see HISTORY)

HISTORY

Paragraph 1: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 4 read as follows:

> "4. *Serbia and Montenegro* reserves the right to propose a separate paragraph which provides that remuneration derived by a resident of a Contracting State shall be taxable only in that State if the remuneration is paid in respect of an employment exercised in the other Contracting State in connection with a building site, a construction or installation project, for an agreed period during which the site or project does not constitute a permanent establishment in that other State."

Paragraph 4 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 5: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 5.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 6: Added together with the heading preceding it on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 16
(DIRECTORS' FEES)
AND ITS COMMENTARY

Positions on the Article

1. *Albania*, *Bulgaria*, the *Democratic Republic of the Congo*, *Estonia*, *Indonesia*, *Latvia*, *Lithuania* and *Serbia* reserve the right to tax under this Article any remuneration of a member of a board of directors or any other similar organ of a resident company.

(Amended on 22 July 2010; see HISTORY)

2. *(Deleted on 22 July 2010; see HISTORY)*

3. *Morocco* reserves the right to tax under this Article any remuneration of a member of a board of directors or any other similar organ of a resident company. Morocco also reserves the right to extend the Article to cover the remuneration of senior employees.

(Added on 28 January 2003; see HISTORY)

4. *Indonesia*, *Malaysia* and *Vietnam* reserve the right to extend the Article to cover the remuneration of top-level managerial officials.

(Amended on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Indonesia and deleting Slovenia, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 1 read as follows:

> "1. *Albania*, *Bulgaria*, the *Democratic Republic of the Congo*, *Estonia*, *Latvia*, *Lithuania*, *Serbia* and *Slovenia* reserve the right to tax under this Article any remuneration of a member of a board of directors or any other similar organ of a resident company."

Paragraph 1 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding the Democratic Republic of the Congo and replacing Serbia and Montenegro with Serbia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 1 read as follows:

> "1. *Albania*, *Bulgaria*, *Estonia*, *Latvia*, *Lithuania*, *Serbia and Montenegro* and *Slovenia* reserve the right to tax under this Article any remuneration of a member of a board of directors or any other similar organ of a resident company."

Paragraph 1 was previously amended on 15 July 2005, by adding Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 1 read as follows:

> "1. *Albania*, *Bulgaria*, *Estonia*, *Latvia*, *Lithuania* and *Slovenia* reserve the right to tax under this Article any remuneration of a member of a board of directors or any other similar organ of a resident company."

Paragraph 1 was previously amended on 28 January 2003, by adding Albania, Bulgaria and Slovenia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 1 read as follows:

> "1. *Estonia*, *Latvia* and *Lithuania* reserve the right to tax under this Article any remuneration of a member of a board of directors or any other similar organ of a resident company."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 2 read as follows:

> "2. *Thailand* reserves the right to extend the Article to cover the remuneration of senior employees."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 4: Amended on 22 July 2010, by adding Indonesia to the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 4 read as follows:

> "4. *Malaysia* and *Vietnam* reserve the right to extend the Article to cover the remuneration of top-level managerial officials."

Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 17
(ARTISTES AND SPORTSMEN)
AND ITS COMMENTARY

Positions on the Article

1. The *Philippines* and *Russia* reserve the right to exclude from the application of paragraph 1 artistes and sportsmen employed in organisations which are subsidised out of public funds.

(Amended on 17 July 2008; see HISTORY)

2. *India* and *Thailand* reserve the right to exclude from the application ofparagraph 1 and paragraph 2 the income from activities performed in a Contracting State by entertainers or sportspersons if the activities are substantially supported by public funds and to provide for residence based taxation of such income.

(Amended on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Amended on 17 July 2008, by changing the list of countries indicating the position by adding Russia and deleting Vietnam, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 1 read as follows:

> "1. The *Philippines* and *Vietnam* reserve the right to exclude from the application of paragraph 1 artistes and sportsmen employed in organisations which are subsidised out of public funds."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Amended on 22 July 2010, by adding Thailand as a country indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 2 read as follows:

> "2. *India* reserves the right to exclude from the application of paragraphs 1 and 2 the income from activities performed in a Contracting State by entertainers or sportspersons if the activities are substantially supported by public funds and to provide for residence based taxation of such income."

Paragraph 2 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 18
(PENSIONS)
AND ITS COMMENTARY

Positions on the Article

1. *(Deleted on 15 July 2005; see HISTORY)*

1.1 *(Deleted on 15 July 2005; see HISTORY)*

2. *Brazil*, *Bulgaria*, *Ivory Coast*, *South Africa* and *Ukraine* reserve the right to include in paragraph an explicit reference to annuities.

(Amended on 17 July 2008; see HISTORY)

3. *(Deleted on 17 July 2008; see HISTORY)*

4. *(Deleted on 15 July 2005; see HISTORY)*

5. *(Deleted on 17 July 2008; see HISTORY)*

HISTORY

Paragraph 1: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 1 read as follows:

> "1. *Brazil*, *Gabon*, *South Africa* and *Thailand* reserve the right to provide that the Contracting State in which pensions and other similar remuneration and annuities arise has a right to tax, albeit not the exclusive right."

Paragraph was previously amended on 28 January 2003, by adding Gabon to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 1 read as follows:

> "1. *Brazil*, *South Africa* and *Thailand* reserve the right to provide that the Contracting State in which pensions and other similar remuneration and annuities arise has a right to tax, albeit not the exclusive right."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 1.1: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 1.1 read as follows:

> "1.1 *Tunisia* reserves the right to propose that all pensions be taxable only in the country of residence of the recipient."

Paragraph 1.1 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 2: Amended on 17 July 2008, by changing the list of countries indicating the position by adding Brazil and deleting Malaysia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 2 read as follows:

> "2. *Bulgaria*, *Ivory Coast*, *Malaysia*, *South Africa* and *Ukraine* reserve the right to include in paragraph 1 an explicit reference to annuities."

Paragraph 2 was previously amended on 15 July 2005, by changing the list of countries indicating the position by adding Malaysia and deleting Brazil and Romania, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 2 read as follows:

> "2. *Brazil*, *Bulgaria*, *Ivory Coast*, *Romania*, *South Africa* and *Ukraine* reserve the right to include in paragraph 1 an explicit reference to annuities."

Paragraph 2 was previously amended on 28 January 2003, by adding Bulgaria and Ivory Coast to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 2 read as follows:

> "2. *Brazil*, *Bulgaria*, *Ivory Coast*, *Romania*, *South Africa* and *Ukraine* reserve the right to include in paragraph 1 an explicit reference to annuities."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 3 read as follows:

> "3. *Russia* and *Ukraine* reserve their position on this Article. When negotiating conventions, the Ukrainian and Russian authorities will request that the Contracting State in which the pensions arise be given the exclusive right to tax. *Ukraine* will insist, at a minimum, on a provision according to which pensions paid under the social security legislation of a Contracting State shall be taxable only in that State."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 4 read as follows:

> "4. *Bulgaria* reserves the right to include a provision according to which pensions paid and similar payments made under a public scheme which is part of the social security system of a Contracting State shall be taxable only in that State."

Paragraph 4 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 5: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 5 read as follows:

> "5. *Morocco* reserves the right to include a provision according to which pensions, other than private pensions, like public pensions, social security pensions and benefits, benefits on account of industrial injury, employment benefits, alimonies and other annuities, may be taxable in the Source State."

Paragraph 5 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

POSITIONS ON ARTICLE 19 (GOVERNMENT SERVICE) AND ITS COMMENTARY

Positions on the Commentary

1. *India* does not agree that public bodies like State Railways and Post Offices are performing business activities.

(Added on 17 July 2008; see HISTORY)

2. *(Deleted on 17 July 2008; see HISTORY)*

HISTORY

Paragraph 1: Added on 17 July 2008, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 1 was previously deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 1 read as follows:

> "1. *Malaysia* reserves the right not to include subparagraph 2 *b)*."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Deleted by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 2 read as follows:

> "2. *Russia* reserves the right to extend the application of Article 18 to pensions referred to in Article 19 in order to achieve uniformity of treatment."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

POSITIONS ON ARTICLE 20
(STUDENTS)
AND ITS COMMENTARY

Positions on the Article

1. *Albania*, *Brazil* and *Serbia* reserve the right to add a second paragraph providing for the granting to visiting students of the same tax exemptions, reliefs or reductions as are granted to residents in respect of any subsidies, grants and payments for dependent personal services.

(Amended on 17 July 2008; see HISTORY)

2. *Estonia*, *Latvia*, *Lithuania* and *Morocco* reserve the right to refer to any apprentice and to a trainee in this Article.

(Amended on 28 January 2003; see HISTORY)

3. *(Deleted on 22 July 2010; see HISTORY)*

4. *Vietnam* reserves the right to provide that remuneration for services rendered by a student or business apprentice in a Contracting State shall not be taxed in that State, provided that such services are in connection with his studies or training.

(Amended on 15 July 2005; see HISTORY)

5. *Thailand* reserves the right to provide that remuneration for services rendered by a student or business apprentice in a Contracting State shall not be taxed in that State if such remuneration does not exceed a certain amount to be negotiated, provided that such services are in connection with his studies or training.

(Amended on 15 July 2005; see HISTORY)

6. *Brazil*, *Bulgaria*, *India*, *Ivory Coast*, *Morocco*, the *People's Republic of China*, the *Philippines*, *Serbia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to add an article which addresses the situation of teachers, professors and researchers, subject to various conditions and are free to make a corresponding modification to paragraph 1 of Article 15.

(Amended on 22 July 2010; see HISTORY)

7. *Gabon*, *Ivory Coast* and *Tunisia* reserve the right to provide that remuneration for services rendered by a student or business apprentice in the visiting State shall not be taxed in that State, provided that such remuneration was received for the purpose of his maintenance, studies or training.

(Amended on 17 July 2008; see HISTORY)

8. *Morocco* reserves the right to add a second paragraph providing that the remuneration from employment derived from the visiting State shall not be taxed in that State, or, in case of taxation, the granting to visiting students of the same tax exemptions, reliefs or reductions as are granted to residents.

(Added on 28 January 2003; see HISTORY)

9. *India* and *Hong Kong, China* reserve the right to exclude "business apprentice" from this Article.

(Amended on 22 July 2010; see HISTORY)

10. *India* reserves the right to provide that remuneration for services rendered by a student in a Contracting State shall not be taxed in that State provided that such services are directly related to his studies and is free to make a corresponding modification to paragraph 1 of Article 15.

(Added on 17 July 2008; see HISTORY)

11. *India* reserves the right to limit the exemption provided for in the Article to a period of six years.

(Added on 17 July 2008; see HISTORY)

HISTORY

Paragraph 1: Amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 1 read as follows:

> "1. *Albania*, *Brazil* and *Serbia and Montenegro* reserve the right to add a second paragraph providing for the granting to visiting students of the same tax exemptions, reliefs or reductions as are granted to residents in respect of any subsidies, grants and payments for dependent personal services."

Paragraph 1 was previously amended on 15 July 2005, by adding Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 1 read as follows:

> "1. *Albania* and *Brazil* reserve the right to add a second paragraph providing for the granting to visiting students of the same tax exemptions, reliefs or reductions as are granted to residents in respect of any subsidies, grants and payments for dependent personal services."

Paragraph 1 was previously amended on 28 January 2003, by adding Albania as a country indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 1 read as follows:

> "1. *Brazil* reserves the right to add a second paragraph providing for the granting to visiting students of the same tax exemptions, reliefs or reductions as are granted to residents in respect of any subsidies, grants and payments for dependent personal services."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Amended on 28 January 2003, by adding Morocco to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 2 read as follows:

> "2. *Estonia*, *Latvia* and *Lithuania* reserve the right to refer to any apprentice and to a trainee in this Article."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 3 read as follows:

> "3. *Romania* reserves the right to limit to a period of 7 years (the maximum period of studies in Romania) the exemption provided for in the Article."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Amended on 15 July 2005 by deleting Romania from the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 4 read as follows:

> "4. *Romania* and *Vietnam* reserve the right to provide that remuneration for services rendered by a student or business apprentice in a Contracting State shall not be taxed in that State, provided that such services are in connection with his studies or training."

Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5: Amended on 15 July 2005 by deleting Malaysia from the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 5 read as follows:

> "5. *Malaysia* and *Thailand* reserve the right to provide that remuneration for services rendered by a student or business apprentice in a Contracting State shall not be taxed in that State if such remuneration does not exceed a certain amount to be negotiated, provided that such services are in connection with his studies or training."

Paragraph 5 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 6: Amended on 22 July 2010, by deleting Romania and Slovenia from the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 6 read as follows:

> "6. *Brazil*, *Bulgaria*, *India*, *Ivory Coast*, *Morocco*, the *People's Republic of China*, the *Philippines*, *Romania*, *Serbia*, *Slovenia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to add an article which addresses the situation of teachers, professors and

researchers, subject to various conditions and are free to make a corresponding modification to paragraph 1 of Article 15."

Paragraph 6 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding India and replacing Serbia and Montenegro with Serbia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 6 read as follows:

"6. *Brazil*, *Bulgaria*, *China*, *Ivory Coast*, *Morocco*, the *Philippines*, *Romania*, *Serbia and Montenegro*, *Slovenia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to add an article which addresses the situation of teachers, professors and researchers, subject to various conditions."

Paragraph 6 was previously amended on 15 July 2005, by changing the list of countries indicating the position by adding Serbia and Montenegro and deleting Malaysia, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 6 read as follows:

"6. *Brazil*, *Bulgaria*, *China*, *Ivory Coast*, *Malaysia*, *Morocco*, the *Philippines*, *Romania*, *Slovenia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to add an article which addresses the situation of teachers, professors and researchers, subject to various conditions."

Paragraph 6 was previously amended on 28 January 2003, by adding Bulgaria, Ivory Coast, Morocco, Slovenia and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 6 read as follows:

"6. *Brazil*, *China*, *Malaysia*, the *Philippines*, *Romania*, *Thailand* and *Vietnam* reserve the right to add an article which addresses the situation of teachers, professors and researchers, subject to various conditions."

Paragraph 6 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7: Amended on 17 July 2008 to correct a minor drafting error, by replacing "services are" with "remuneration was" and adding a comma after the word "maintenance". After 28 January 2003 and until 17 July 2008, paragraph 7 read as follows:

"7. *Gabon*, *Ivory Coast* and *Tunisia* reserve the right to provide that remuneration for services rendered by a student or business apprentice in the visiting State shall not be taxed in that State, provided that such services are received for the purpose of his maintenance studies or training."

Added on 28 January 2003, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 8: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 9: Amended on 22 July 2010, by adding Hong Kong, China as a country indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 9 read as follows:

"9. *India* reserves the right to exclude "business apprentice" from this Article."

Paragraph 9 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 10: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 11: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 21
(OTHER INCOME)
AND ITS COMMENTARY

Positions on the Article

1. *Albania*, *Argentina*, *Belarus*, *Brazil*, *Bulgaria*, *Gabon*, *India*, *Indonesia*, *Ivory Coast*, *Malaysia*, *Morocco*, *Russia*, *Serbia*, *South Africa*, *Thailand* and *Vietnam* reserve their positions on this Article as they wish to maintain the right to tax income arising from sources in their own country.

(Amended on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Amended on 22 July 2010, by changing the list of countries indicating the position by adding Indonesia and deleting Chile and Slovenia, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 1 read as follows:

> "1. *Albania*, *Argentina*, *Belarus*, *Brazil*, *Bulgaria*, *Chile*, *Gabon*, *India*, *Ivory Coast*, *Malaysia*, *Morocco*, *Russia*, *Serbia*, *Slovenia*, *South Africa*, *Thailand* and *Vietnam* reserve their positions on this Article as they wish to maintain the right to tax income arising from sources in their own country."

Paragraph 1 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding Chile and India, deleting Latvia and Lithuania and replacing Serbia and Montenegro with Serbia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 1 read as follows:

> "1. *Albania*, *Argentina*, *Belarus*, *Brazil*, *Bulgaria*, *Gabon*, *Ivory Coast*, *Latvia*, *Lithuania*, *Malaysia*, *Morocco*, *Russia*, *Serbia and Montenegro*, *Slovenia*, *South Africa*, *Thailand* and *Vietnam* reserve their positions on this Article as they wish to maintain the right to tax income arising from sources in their own country."

Paragraph 1 was previously amended on 15 July 2005, by changing the list of countries indicating the position by adding Serbia and Montenegro and deleting Estonia and Romania, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 1 read as follows:

> "1. *Albania*, *Argentina*, *Belarus*, *Brazil*, *Bulgaria*, *Estonia*, *Gabon*, *Ivory Coast*, *Latvia*, *Lithuania*, *Malaysia*, *Morocco*, *Romania*, *Russia*, *Slovenia*, *South Africa*, *Thailand* and *Vietnam* reserve their positions on this Article as they wish to maintain the right to tax income arising from sources in their own country."

Paragraph 1 was previously amended on 28 January 2003, by adding Albania, Bulgaria, Gabon, Ivory Coast, Morocco and Slovenia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 1 read as follows:

> "1. *Argentina*, *Belarus*, *Brazil*, *Estonia*, *Latvia*, *Lithuania*, *Malaysia*, *Romania*, *Russia*, *South Africa*, *Thailand* and *Vietnam* reserve their positions on this Article as they wish to maintain the right to tax income arising from sources in their own country."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

POSITIONS ON ARTICLE 22
(CAPITAL)
AND ITS COMMENTARY

Positions on the Article

1. *Argentina* reserves the right to tax capital, other than property mentioned in paragraph 3, that is situated on its territory.

2. *Brazil*, *Bulgaria*, *Indonesia*, *Malaysia*, the *People's Republic of China*, *Thailand* and *Vietnam* reserve their positions on the Article if and when they impose taxes on capital.

(Amended on 22 July 2010; see HISTORY)

3. *India* reserves the right to tax capital as per domestic law.

(Added on 17 July 2008; see HISTORY)

HISTORY

Paragraph 1: Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Amended on 22 July 2010, by adding Indonesia to the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 2 read as follows:

> "2. *Brazil*, *Bulgaria*, *Malaysia*, the *People's Republic of China*, *Thailand* and *Vietnam* reserve their positions on the Article if and when they impose taxes on capital."

Paragraph 2 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding Brazil and replacing "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 2 read as follows:

> "2. *Bulgaria*, *China*, *Malaysia*, *Thailand* and *Vietnam* reserve their positions on the Article if and when they impose taxes on capital."

Paragraph 2 was previously amended on 28 January 2003, by adding Bulgaria to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003 paragraph 2 read as follows:

> "2. *China*, *Malaysia*, *Thailand* and *Vietnam* reserve their positions on the Article if and when they impose taxes on capital."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLES 23 A AND 23 B (EXEMPTION METHOD AND CREDIT METHOD) AND ITS COMMENTARY

Positions on the Article

1. *Albania*, *Argentina*, *Brazil*, *India*, *Ivory Coast*, *Malaysia*, *Morocco*, the *People's Republic of China*, *Serbia*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to add tax sparing provisions in relation to the tax incentives that are provided for under their respective national laws.

(Amended on 17 July 2008; see HISTORY)

2. Argentina and Vietnam reserve the right to add a matching credit for some or all of the income covered under Article 10, 11 and 12 with the result that tax shall be deemed to have been paid, for purposes of the Article on elimination of double taxation, at a certain rate, to be negotiated, of the gross income.

3. *Brazil* reserves the right to add a matching credit for some or all of the income covered under Article 11 and 12 with the result that tax shall be deemed to have been paid, for purposes of the Article on elimination of double taxation, at a certain rate, to be negotiated, of the gross income.

4. *Brazil* and *Tunisia* reserve the right to provide that income covered under Article 10 shall be exempt or entitled to a matching credit in the other Contracting State.

(Amended on 28 January 2003; see HISTORY)

5. *Argentina* and *Brazil* reserve their position on paragraph 4 of Article 23 A.

(Added on 29 April 2000; see HISTORY)

HISTORY

Paragraph 1: Amended on 17 July 2008, by changing the list of countries indicating the position by adding India, replacing Serbia and Montenegro with Serbia and replacing "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 1 read as follows:

> "1. *Albania*, *Argentina*, *Brazil*, *China*, *Ivory Coast*, *Malaysia*, *Morocco*, *Serbia and Montenegro*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to add tax sparing provisions in relation to the tax incentives that are provided for under their respective national laws."

Paragraph 1 was previously amended on 15 July 2005, by changing the list of countries indicating the position by adding Serbia and Montenegro and deleting South Africa, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 1 read as follows:

P (23)

> "1. *Albania*, *Argentina*, *Brazil*, *China*, *Ivory Coast*, *Malaysia*, *Morocco*, *South Africa*, *Thailand*, *Tunisia* and *Vietnam* reserve the right to add tax sparing provisions in relation to the tax incentives that are provided for under their respective national laws."

Paragraph 1 was previously amended on 28 January 2003, by adding Albania, Ivory Coast, Morocco and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 1 read as follows:

> "1. *Argentina*, *Brazil*, *China*, *Malaysia*, *South Africa*, *Thailand* and *Vietnam* reserve the right to add tax sparing provisions in relation to the tax incentives that are provided for under their respective national laws."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Amended on 28 January 2003, by adding Tunisia as a country indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 4 read as follows:

> "4. *Brazil* reserves the right to provide that income covered under Article 10 shall be exempt or entitled to a matching credit in the other Contracting State."

Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Council on 29 April 2000.

POSITIONS ON ARTICLE 24 (NON-DISCRIMINATION) AND ITS COMMENTARY

Positions on the Article

Paragraph 1

1. *(Deleted on 15 July 2005; see HISTORY)*

2. *Brazil*, *Romania*, *Russia*, *Thailand* and *Vietnam* reserve their position on the second sentence of paragraph 1.

(Amended on 22 July 2010; see HISTORY)

2.1 *Bulgaria* reserves the right to omit the words "other or" in the first sentence of paragraph 1.

(Added on 28 January 2003; see HISTORY)

2.2 *Indonesia*, *Malaysia* and *Tunisia* reserve the right to restrict the scope of the Article to residents of the Contracting States.

(Amended on 22 July 2010; see HISTORY)

Paragraph 2

3. *(Deleted on 17 July 2008; see HISTORY)*

4. *Albania*, *Bulgaria*, *Estonia*, *India*, *Malaysia*, the *Philippines*, *Russia*, *Serbia* and *Vietnam* reserve the right not to insert paragraph 2 in their conventions.

(Amended on 22 July 2010; see HISTORY)

Paragraph 3

5. *Argentina* reserves the right to apply a branch profits tax.

6. *Brazil* reserves its position on paragraph 3 since royalties paid by a permanent establishment situated in Brazil to its head office abroad are not deductible under its law.

7. *Thailand* reserves the right to apply a profit remittance tax and a special taxation regime in respect of agricultural production activities.

(Amended on 17 July 2008; see HISTORY)

7.1 *Morocco* reserves the right to add a paragraph stating that nothing in this article can be interpreted as prohibiting Morocco to apply its branch tax, its domestic thin-capitalisation and transfer-pricing legislation.

(Added on 28 January 2003; see HISTORY)

7.2 *South Africa* reserves the right to add a paragraph stating that nothing in the Article will prevent South Africa from imposing on the profits attributable to a permanent establishment in South Africa of a company that is not a resident, a tax at a rate that does not exceed the rate of normal tax on companies by more than five percentage points.

(Added on 15 July 2005; see HISTORY)

Paragraph 4

8. *Vietnam* reserves its position on this paragraph in the case of interest paid to non-residents that is not subject to a withholding tax.

8.1 *Malaysia* reserves its position on this paragraph in the case of interest, royalties, or fees for technical services paid to non-residents where withholding tax has not been deducted.

(Added on 15 July 2005; see HISTORY)

Paragraph 5

9. *Brazil* reserves the right to include, after the words "other similar enterprises of the first-mentioned State", the words "whose capital is totally or partially, directly or indirectly, held or controlled by one or several residents of a third State".

Paragraph 6

10. *Albania*, *Brazil*, *Bulgaria*, *Malaysia*, the *Philippines*, *Romania*, *Serbia*, *Thailand*, *Tunisia*, *Vietnam* and *Ukraine* reserve the right to restrict the scope of the Article to the taxes covered by the Convention.

(Amended on 22 July 2010; see HISTORY)

Positions on the Commentary

11. *India* and *Malaysia* reserve their position on the interpretation set out in paragraph 44.

(Added on 22 July 2010; see HISTORY)

12. *India* reserves the right to add a paragraph to clarify that this provision can neither be construed as preventing a Contracting State from charging the profits of a permanent establishment which a company of the other Contracting State has in the first-mentioned State at a rate of tax which is higher than that imposed on the profits of a similar company of the first-mentioned Contracting State, nor as being in conflict with the provisions of paragraph 3 of Article 7 (as it read before the 2010 update to the Model Tax Convention).

(Amended on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 1 read as follows:

> "1. *Brazil* reserves the right to omit the words "in particular with respect to residence" in paragraph 1."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Amended on 22 July 2010, by deleting Chile from the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 2 read as follows:

> "2. *Brazil*, *Chile*, *Romania*, *Russia*, *Thailand* and *Vietnam* reserve their position on the second sentence of paragraph 1."

Paragraph 2 was previously amended on 17 July 2008, by adding Brazil and Chile to the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 2 read as follows:

> "2. *Romania*, *Russia*, *Thailand* and *Vietnam* reserve their position on the second sentence of paragraph 1."

Paragraph 2 was previously amended on 15 July 2005 by deleting Brazil from the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 2 read as follows:

> "2. *Brazil*, *Romania*, *Russia*, *Thailand* and *Vietnam* reserve their position on the second sentence of paragraph 1."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 2.2: Amended on 22 July 2010, by adding Indonesia to the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 2.2 read as follows:

> "2.2 *Malaysia* and *Tunisia* reserve the right to restrict the scope of the Article to residents of the Contracting States."

Paragraph 2.2 was previously amended on 15 July 2005, by adding Malaysia as a country indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 2.2 read as follows:

> "2.2 *Tunisia* reserves the right to restrict the scope of the Article to residents of the Contracting States."

Paragraph 2.2 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 3: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 3 read as follows:

"3. *Brazil* reserves the right to omit the words "in particular with respect to residence" in paragraph 2."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Amended on 22 July 2010, by deleting Chile from the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 4 read as follows:

"4. *Albania*, *Bulgaria*, *Chile*, *Estonia*, *India*, *Malaysia*, the *Philippines*, *Russia*, *Serbia* and *Vietnam* reserve the right not to insert paragraph 2 in their conventions."

Paragraph 4 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding Chile and India and replacing Serbia and Montenegro with Serbia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 4 read as follows:

"4. *Albania*, *Bulgaria*, *Estonia*, *Malaysia*, the *Philippines*, *Russia*, *Serbia and Montenegro* and *Vietnam* reserve the right not to insert paragraph 2 in their conventions."

Paragraph 4 was previously amended on 15 July 2005, by adding Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 4 read as follows:

"4. *Albania*, *Bulgaria*, *Estonia*, *Malaysia*, the *Philippines*, *Russia* and *Vietnam* reserve the right not to insert paragraph 2 in their conventions."

Paragraph 4 was previously amended on 28 January 2003, by adding Albania and Bulgaria to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 4 read as follows:

"4. *Estonia*, *Malaysia*, the *Philippines*, *Russia* and *Vietnam* reserve the right not to insert paragraph 2 in their conventions."

Paragraph 4 was previously amended on 29 April 2000, by adding Estonia to the list of countries indicating the position, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Council on 29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 4 read as follows:

"4. *Malaysia*, the *Philippines*, *Russia* and *Vietnam* reserve the right not to insert paragraph 2 in their conventions."

Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 6: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7: Amended on 17 July 2008, by deleting Vietnam from the list of countries indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 7 read as follows:

"7. *Thailand* and *Vietnam* reserve the right to apply a profit remittance tax and a special taxation regime in respect of agricultural production activities."

Paragraph 7 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 7.1: Added on 28 January 2003, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 7.2: Added on 15 July 2005, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 8: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 8.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 9: Included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 10: Amended on 22 July 2010, by deleting Chile from the list of countries indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 10 read as follows:

"10. *Albania*, *Brazil*, *Bulgaria*, *Chile*, *Malaysia*, the *Philippines*, *Romania*, *Serbia*, *Thailand*, *Tunisia*, *Vietnam* and *Ukraine* reserve the right to restrict the scope of the Article to the taxes covered by the Convention."

Paragraph 10 was previously amended on 17 July 2008, by changing the list of countries indicating the position by adding Chile, deleting Russia and replacing Serbia and Montenegro with Serbia, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 10 read as follows:

"10. *Albania*, *Brazil*, *Bulgaria*, *Malaysia*, the *Philippines*, *Romania*, *Russia*, *Serbia and Montenegro*, *Thailand*, *Tunisia*, *Vietnam* and *Ukraine* reserve the right to restrict the scope of the Article to the taxes covered by the Convention."

Paragraph 10 was previously amended on 15 July 2005, by adding Serbia and Montenegro to the list of countries indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 10 read as follows:

"10. *Albania*, *Brazil*, *Bulgaria*, *Malaysia*, the *Philippines*, *Romania*, *Russia*, *Thailand*, *Tunisia*, *Vietnam* and *Ukraine* reserve the right to restrict the scope of the Article to the taxes covered by the Convention."

Paragraph 10 was previously amended on 28 January 2003, by adding Albania, Bulgaria and Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on

28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 10 read as follows:

> "10. *Brazil*, *Malaysia*, the *Philippines*, *Romania*, *Russia*, *Thailand*, *Vietnam* and *Ukraine* reserve the right to restrict the scope of the Article to the taxes covered by the Convention."

Paragraph 10 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 11: Amended on 22 July 2010, by adding Malaysia as a country indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 11 read as follows:

> "11. *India* reserves its position on the interpretation set out in paragraph 44."

Paragraph 11 was added together with the heading preceding it on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 12: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 12 read as follows:

> "12. *India* reserves the right to add a paragraph to clarify that this provision can neither be construed as preventing a Contracting State from charging the profits of a permanent establishment which a company of the other Contracting State has in the first mentioned State at a rate of tax which is higher than that imposed on the profits of a similar company of the first mentioned Contracting State, nor as being in conflict with the provisions of paragraph 3 of Article 7."

Paragraph 12 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 25
(MUTUAL AGREEMENT PROCEDURE)
AND ITS COMMENTARY

Positions on the Article

Paragraph 1

1. *Brazil*, the *Philippines* and *Thailand* reserve their positions on the last sentence of paragraph 1.

(Amended on 17 July 2008; see HISTORY)

1.1 *Kazakhstan* reserves its position on the second sentence of paragraph 1 and reserves its right to supplement the paragraph with the following sentence: "In the case of judicial proceedings, a court decision cannot be reconsidered by the competent authority of Kazakhstan."

(Added on 17 July 2008; see HISTORY)

Paragraph 2

2. *Brazil*, the *Philippines* and *Thailand* reserve their positions on the second sentence of paragraph 2. These countries consider that the implementation of reliefs and refunds following a mutual agreement ought to remain linked to time limits prescribed by their domestic laws.

(Amended on 22 July 2010; see HISTORY)

Paragraph 3

3. *Brazil*, *Thailand*, *Tunisia* and *Ukraine* reserve their position on the second sentence of paragraph 3 on the grounds that they have no authority under their respective laws to eliminate double taxation in cases not provided for in the Convention.

(Amended on 28 January 2003; see HISTORY)

Paragraph 4

4. *Brazil*, *Malaysia*, the *People's Republic of China*, the *Philippines*, *Thailand* and *Ukraine* reserve the right to omit the words "including through a joint commission consisting of themselves or their representatives".

Positions on the Commentary

5. *Brazil* and *India* do not agree with the interpretation given in paragraphs 11 and 12; they are of the view that in the absence of paragraph 2 in Article 9, economic double taxation arising from transfer pricing

adjustments does not fall within the scope of mutual agreement procedure set up in Article 25.

(Added on 17 July 2008; see HISTORY)

6. Concerning paragraph 14, *Argentina* reserves its right not to commence or accept a mutual agreement procedure case if taxation not in accordance with the Convention has not been charged or notified to the taxpayer.

(Added on 17 July 2008; see HISTORY)

7. In relation to paragraph 25, *India* is of the view that the competent authorities can reach an agreement under Article 25 during pendency of domestic law action. However, the taxpayer has an option to either accept or reject the resolution order. If the taxpayer accepts the resolution order, he has to withdraw domestic law action.

(Added on 17 July 2008; see HISTORY)

8. *India* does not agree with the view expressed in paragraph 42 that a taxpayer may be permitted to defer acceptance of the solution agreed upon as a result of the mutual agreement procedure until the court had delivered its judgement in that suit.

(Added on 17 July 2008; see HISTORY)

HISTORY

Paragraph 1: Amended on 17 July 2008, by deleting Russia from the list of countries indicating the position, by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 1 read as follows:

> “1. *Brazil*, the *Philippines*, *Russia*, and *Thailand* reserve their positions on the last sentence of paragraph 1.”

Paragraph 1 was included when this section was added in 1997 by the report entitled “The 1997 Update to the Model Tax Convention”, adopted by the OECD Council on 23 October 1997.

Paragraph 1.1: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008.

Paragraph 2: Amended on 22 July 2010, by deleting Chile from the list of countries indicating the position, by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 2 read as follows:

> “2. *Brazil*, *Chile*, the *Philippines* and *Thailand* reserve their positions on the second sentence of paragraph 2. These countries consider that the implementation of relieves and refunds following a mutual agreement ought to remain linked to time-limits prescribed by their domestic laws.”

Paragraph 2 was previously amended on 17 July 2008, by adding Chile to the list of countries indicating the position, by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 2 read as follows:

> "2. *Brazil*, the *Philippines* and *Thailand* reserve their positions on the second sentence of paragraph 2. These countries consider that the implementation of relieves and refunds following a mutual agreement ought to remain linked to time-limits prescribed by their domestic laws."

Paragraph 2 was previously amended on 28 January 2003, by deleting Slovakia from the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 2 read as follows:

> "2. *Brazil*, the *Philippines*, *Slovakia* and *Thailand* reserve their positions on the second sentence of paragraph 2. These countries consider that the implementation of relieves and refunds following a mutual agreement ought to remain linked to time-limits prescribed by their domestic laws."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 3: Amended on 28 January 2003, by adding Tunisia to the list of countries indicating the position, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 3 read as follows:

> "3. *Brazil*, *Thailand* and *Ukraine* reserve their position on the second sentence of paragraph 3 on the grounds that they have no authority under their respective laws to eliminate double taxation in cases not provided for in the Convention."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Amended on 17 July 2008, by replacing "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 4 read as follows:

> "4. *Brazil*, *China*, *Malaysia*, the *Philippines*, *Thailand* and *Ukraine* reserve the right to omit the words "including through a joint commission consisting of themselves or their representatives"."

Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5: Added together with the heading preceding it on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 6: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 7: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

POSITIONS ON ARTICLE 26 (EXCHANGE OF INFORMATION) AND ITS COMMENTARY

Positions on the Article

1. *(Deleted on 22 July 2010; see HISTORY)*

2. *India* reserves the right to include documents or certified copies of the documents within the scope of this Article.

(Added on 17 July 2008; see HISTORY)

2.1 *Morocco* and *Thailand* reserve the right not to include the words "The exchange of information is not restricted by Article 1 and 2" in paragraph 1.

(Added on 15 July 2005; see HISTORY)

2.2 *(Deleted on 22 July 2010; see HISTORY)*

2.3 *(Deleted on 22 July 2010; see HISTORY)*

2.4 *(Deleted on 22 July 2010; see HISTORY)*

Position on the Commentary

3. As regards paragraph 10.3 of the Commentary, *Hong Kong, China* wishes to clarify its position on the exchange of information that existed prior to the entry into force of the bilateral agreement. In view of its domestic law requirements, Hong Kong, China will only exchange information relating to taxable periods after the agreement came into operation.

(Added on 22 July 2010; see HISTORY)

4. *(Deleted on 22 July 2010; see HISTORY)*

5. *(Deleted on 15 July 2005; see HISTORY)*

6. *(Deleted on 15 July 2005; see HISTORY)*

HISTORY

Paragraph 1: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 1 read as follows:

> "1. *Brazil* reserves the right not to include the word "public" in the last sentence of paragraph 2 in its conventions."

Paragraph 1 was previously amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 1 read as follows:

> "1. *Brazil* reserves the right not to include the last sentence of paragraph 1 in its conventions."

Paragraph 1 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 2 was previously deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 2 read as follows:

> "2. *Brazil*, *Malaysia* and *Thailand* reserve the right not to include the words "The exchange of information is not restricted by Article 1" in paragraph 1."

Paragraph 2 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 2.1: Amended on 15 July 2005, by adding Thailand as a country indicating the position, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 2.1 read as follows:

> "2.1 *Morocco* reserves the right not to include the words "The exchange of information is not restricted by Articles 1 and 2" in paragraph 1."

Paragraph 2.1 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 2.2: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 2.2 read as follows:

> "2.2 *Malaysia* and *Thailand* reserve the right not to include paragraph 4 in their conventions."

Paragraph 2.2 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 2.3: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 2.3 read as follows:

> "2.3 *Brazil*, *Malaysia*, *Romania*, *Serbia* and *Thailand* reserve the right not to include paragraph 5 in their conventions."

Paragraph 2.3 was previously amended on 17 July 2008, by replacing Serbia and Montenegro with Serbia as a country indicating the position, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 2.3 read as follows:

> "2.3 *Brazil*, *Malaysia*, *Romania*, *Serbia and Montenegro* and *Thailand* reserve the right not to include paragraph 5 in their conventions."

Paragraph 2.3 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 2.4: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 2.4 read as follows:

> "2.4 *Chile* can generally supply information held by banks and other financial institutions but reserves the right not to supply certain information for civil tax purposes, such as information regarding transfer of funds, transactions carried out on checking accounts and account balances, which are confidential under Chilean law."

Paragraph 2.4 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 3: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 3 was previously deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 3 read as follows:

> "3. *Brazil* wishes to indicate that with respect to paragraph 11 of the Commentary, it would be difficult for it, in view of its strict domestic laws and administrative practice as to the procedure to make public the information obtained under the domestic laws, to provide information requested unless a requesting State has comparable domestic laws and administrative practice as to this procedure."

Paragraph 3 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 4: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 October 1997 and until 22 July 2010, paragraph 4 read as follows:

> "4. *Malaysia* wishes to indicate that with respect to paragraph 11 of the Commentary, it would be difficult for it, in view of its strict domestic laws and administrative practice as to the procedure to make public certain information obtained under the domestic laws, to provide information requested."

Paragraph 4 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 5: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 5 read as follows:

> "5. Contrary to the interpretation put forward in paragraphs 14 to 16 of the Commentary, *Brazil* takes the view that the Article imposes no obligation on it to carry out enquiries on behalf of a Contracting State in cases where no liability to its own tax is at issue, since to carry out such enquiries would be contrary to its laws and administrative practice."

Paragraph 5 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 6: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 6 read as follows:

> "6. Contrary to the interpretation put forward in paragraphs 14 to 16 of the Commentary, *Malaysia* takes the view that the Article imposes no obligation on it to carry out enquiries on behalf of a Contracting State in cases where no liability to its own tax is at issue."

Paragraph 6 was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

POSITIONS ON ARTICLE 28
(MEMBERS OF DIPLOMATIC MISSIONS
AND CONSULAR POSTS)
AND ITS COMMENTARY

Position on the Article

1. Considering that *Hong Kong, China* is not a sovereign state but a special administrative region of the People's Republic of China, Hong Kong, China reserves the right to replace "diplomatic missions" by "government missions" in this Article.

(Added on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

POSITIONS ON ARTICLE 29
(TERRITORIAL EXTENSION)
AND ITS COMMENTARY

Position on the Article

1. *Indonesia*, the *People's Republic of China* and *Thailand* reserve their position on this Article.

(Amended on 22 July 2010; see HISTORY)

HISTORY

Title: Redesignated by the report entitled "The 2002 Update to the Model Tax Convention", which was adopted by the OECD Council on 28 January 2003. The title, which was included in this section when it was added in 1997, previously read as follows:

"POSITIONS ON ARTICLE 28 (TERRITORIAL EXTENSION) AND ITS COMMENTARY"

Paragraph 1: Amended on 22 July 2010, by adding Indonesia as a country indicating the position, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 1 read as follows:

"1. The *People's Republic of China* and *Thailand* reserve their position on this Article."

Paragraph 1 was previously amended on 17 July 2008, by replacing "China" with "the People's Republic of China", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 1 read as follows:

"1. *China* and *Thailand* reserve their position on this Article."

Paragraph 1 as it read after 28 January 2003 corresponded to the position on paragraph 28. Paragraph 1 of the positions on Article 28 was redesignated paragraph 1 of the positions on Article 29 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 1 of the positions on Article 28, as it read before 28 January 2003, was included when this section was added in 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

PREVIOUS REPORTS RELATED TO THE MODEL TAX CONVENTION

This section reproduces a number of reports that were adopted after the publication of the 1977 Model Double Taxation Convention on Income and on Capital and that have resulted in changes to the text of the Articles of the Model Tax Convention or the Commentary thereon.

Whilst these reports provide a useful background to the Articles and the Commentary, it should be noted that, unlike these, they are not periodically updated and may therefore no longer reflect the views of the Committee on Fiscal Affairs.

INTRODUCTION

1. The topic briefly referred to as “corresponding adjustments” covers a broad area of problems which arise if the transfer prices or allocations of profit adopted by an enterprise in its dealing with an associated enterprise in another country are not accepted by the tax authorities of one or other of the countries concerned. If, in consequence, the prices or allocations are adjusted or are proposed to be adjusted for tax purposes in one of the countries, the question arises of whether or not a “corresponding adjustment” should be made in the other or whether the initial adjustment itself should be modified, with or without an appropriate corresponding adjustment in the second country. A further question arises as to what should happen if the two tax authorities cannot agree on this matter.

2. When drafting the 1979 Report on Transfer Pricing and Multinational Enterprises,[1] the Committee on Fiscal Affairs, while recognising that the subject of corresponding adjustments was relevant to the subject of transfer pricing and created general problems for multinational enterprises, decided that it should not be taken up in the report at that stage (see paragraph 8 of the report). The Committee then took the view that the subject fell outside the boundaries of their task at the time. Moreover, it seemed possible that any discussion of the subject might call for a detailed consideration of the wording of existing provisions in the OECD Model Double Taxation Convention, not only those relating to corresponding adjustments but also those concerned with the mutual agreement procedures (Articles 9 and 25 of the 1977 OECD Model Convention, see Annex) and that this would call for separate study. In its Response to the 1979 Report, BIAC (the Business and Industry Advisory Committee to the OECD), which is generally responsible for representing the views of the private sector to OECD, felt, however, that this was too restrictive an approach and urged “that consideration of this subject be undertaken and concluded as rapidly as possible”.

3. In preparing the present report the Committee considered it necessary to review the experience gained to date in this field, both by tax administrations and by multinational enterprises (MNEs), in relation to the making of corresponding adjustments (or obviating the need for them) as well as to consider what possible changes in, or from, the existing arrangements might be called for. They were greatly assisted by the evidence provided both orally and in writing by MNEs represented by BIAC and reference to this evidence is made in various parts of the report. Such references should not, however, be taken necessarily as an endorsement of their views.

4. The report is organised in the following way. After a brief summary of the situations in which the need for corresponding adjustments may possibly

arise (Chapter I), the report reviews (in Chapter II) the experience of tax authorities in OECD member countries in operating the provisions and procedures already available to them for the resolution of disagreements between them in transfer pricing and other matters arising under their double taxation agreements, and reviews also the problems arising for taxpayers in this context. In Chapter III the report deals with the particular suggestion that arrangements should be made for mandatory corresponding adjustments subject to an arbitration procedure, and in Chapter IV the report discusses a number of ways in which a more satisfactory use of the existing procedures might be made possible. In Chapter V the report summarises the main conclusions reached by the Committee in the course of its consideration of these matters.

I. THE PROBLEM OUTLINED

5. Where a transaction takes place across international borders between two associated enterprises, and an adjustment is made to the transfer price for tax purposes by one of the States concerned, the adjustment, if it increases the profits taxable in that State, may result in some economic double taxation. That is to say it may result in the taxation by the two States of the same profits or income in the hands of two separate but associated persons.[2] More generally the same kind of result may occur where income which arises to an MNE and which is allocated by one State for tax purposes to a constituent part of that enterprise situated in that State is also allocated by another State to another constituent part situated in that second State. It is convenient to refer in this report simply, in most instances, to transfer pricing adjustments (or their "corresponding adjustments") but the phrase should be read, where appropriate, as encompassing also such allocations of profits (or their re-allocation).

6. However, economic double taxation will not necessarily be a consequence of these situations. It will perhaps not result if, for example, an adjustment is made to a transfer price in respect of a transaction which has passed through a third associated person in a country with no tax on income or profits (a tax haven). In this case the adjustment may merely bring more profits into liability in the State making the adjustment. Another situation in which economic double taxation will not occur is where profits, although taxable in principle in both States, do not actually bear tax in one of them because of an exemption or relief provided by the law of that State. Thus, it may be mitigated or eliminated if the State of the parent company credits against its own tax on a dividend received from a subsidiary, not only any withholding tax charged on the dividend, but also the tax charged on the subsidiary's profits which underlie that dividend. Nor, of course, will double

taxation result if the State imposing tax on the profits or income of the other associated enterprise makes an adequate corresponding adjustment downwards, either to the taxable profits of that enterprise or to the tax chargeable on it.

7. The need for tax authorities to make transfer pricing adjustments and corresponding adjustments is in principle avoided if MNEs consistently adopt, for tax purposes, a transfer pricing policy based on the arm's-length principle and it is certainly not to be supposed that they never do this. It may be objected, however, that the admitted difficulties for tax authorities in the way of ascertaining the arm's-length price in a variety of circumstances may also be experienced by the MNEs themselves and that the genuine efforts of an MNE to follow the arm's-length principle may therefore not necessarily satisfy the tax authorities in all cases. Nevertheless, it seems clear that such efforts should at least limit very considerably the number of occasions on which adjustments by tax authorities are felt to be necessary.

8. So far as the tax authorities themselves are concerned, they too may hope to avoid the necessity of dealing with differences of opinion with other countries' tax authorities about transfer prices if they consistently follow the arm's-length principles set out in the 1977 Model Convention and the 1979 Report. In this context paragraph 15 of that Report may be of particular relevance. Here the point is made that "Since the assessment of an arm's-length price depends very often on careful judgement and the resolution of many, perhaps conflicting, considerations by negotiation between the tax authorities and the enterprise concerned, it follows that if the prices actually paid can be substantiated by acceptable evidence as being arm's-length prices there would be no justification for seeking to make merely minor or marginal adjustments to them for tax purposes. Similarly a tax authority should hesitate to disturb without good reason a pricing arrangement reasonably and consistently operated between associated enterprises if it is also reasonably and consistently operated in comparable dealings with independent parties."

9. However, if, for whatever reason, there is a difference of opinion between tax authorities about the need for a transfer pricing adjustment or its amount, then the questions whether the adjustment should be made, and if so, whether a corresponding adjustment should be made and what the amounts of the adjustment or corresponding adjustment should be, may well depend on the achievement of an explicit consensus between the two tax authorities. The achievement of this consensus may in many cases present no significant problems. But there is a variety of circumstances in which it may be difficult.

10. Thus, where there are no comparable prices for the same or similar transactions between unrelated persons, and the other evidence, if any, does not provide an obvious indication of the arm's-length price, then differences

of opinion as to the proper arm's-length price are potential sources of difficulty. Divergences between the national laws of the relevant States, or even differences in their procedures may also give rise to difficulty.[3]

11. As a simple illustration one may take a royalty charged by a parent company in State B to its subsidiary company in State A which the tax authorities of State A decide is too high in relation to the royalty which would be fixed between enterprises dealing at arm's length. In that case the deduction of the royalty payment in arriving at the subsidiary's taxable profits in State A will be reduced (this may be defined as a "primary adjustment"). If State B, in spite of the fact that State A has made this adjustment, still treats the whole payment as an arm's-length royalty the whole amount will be taxed in State B as royalty income of the parent company and in effect therefore some part of the royalty may be taxed in both countries.

12. More complicated possibilities may, however, arise under the laws of some countries. State B, for example, may accept the correctness of the adjustment made by State A and regard only so much of the payment as a royalty as corresponds with the amount allowed as a deduction by State A, but may nevertheless treat the excess part of the royalty as a constructive dividend. If State A had the same approach then this might have the result that the excess over the arm's-length amount, instead of being payable without deduction of tax as a royalty, would as a dividend be treated as a payment from which withholding tax should have been deducted and State A might require payment from the subsidiary of the appropriate withholding tax. On the other hand State B might not be able to apply to the element of the payment treated by State A as a dividend any more advantageous rules applicable to dividends in State B or might be unable to give credit relief for the withholding tax levied by State A. In such circumstances, in order to recognise the fact that the excess of the actual royalty payment over the arm's-length royalty is nevertheless in the hands of the parent and not those of the subsidiary, appropriate "secondary" adjustments may be necessary if double taxation is to be completely relieved.[4]

13. Similar problems may arise with other types of transaction. Thus, to take a simple case, if a parent company has made a loan to a subsidiary abroad, the tax authorities in the subsidiary's country may adjust the interest rate if they consider that it is not an arm's-length rate. The tax authorities in the country of the lending parent company may perhaps not accept that the adjusted rate is an arm's-length rate – the two countries perhaps may have different views as to the particular financial market in which they should look for evidence of arm's-length interest charges. A more complicated situation may arise if the country of the subsidiary takes the view that the loan is in reality a contribution to the subsidiary's equity capital and not an addition to its debt.

14. Payments of fees for services may also be viewed differently by the tax authorities of the country of the payer and those of the country of the receiver. Thus service fees from a subsidiary may be included in the taxable receipts of the parent company in full, while the tax authorities of the country of the subsidiary restrict the deduction allowable for the payment in arriving at the subsidiary's taxable profits on the grounds that it exceeds the arm's-length price, or possibly even refuse a deduction for the payment altogether on the basis that no real benefit has been conferred upon the payer.

15. Although the examples quoted above are mainly concerned with adjustments made to the tax liability of subsidiaries and the consequences of these adjustments for parent companies, the same sort of problems may, in general, also arise for subsidiaries as the result of adjustments made to the liability of parent companies or to the liability of other associated enterprises.

16. On the other hand, one type of problem may arise only in connection with companies which hold shares in other associated enterprises and receive dividends therefrom. If the country taxing the shareholder company gives a credit against its tax for the tax on the profits out of which the dividend is paid, then this obligation to give credit may be made more burdensome if the tax authorities charging the dividend-paying company do so on the basis of attributing more profits to it in relation to transactions with the shareholder company than do the tax authorities charging the latter – which they might of course do if they took a different view of the arm's-length price for those transactions.

17. Problems of double taxation resulting from the adjustment of transfer prices may also arise for MNEs because of their organisation and the arrangements which they make, in consequence, for intra-group transfers of goods and services, etc. and the payments for them. For example, if a cost contribution arrangement has been concluded within a group for research and development expenditure and if the tax authorities in the country of the parent company consider that the terms and conditions of the arrangement are not in line with the arm's-length principle, this could affect associated enterprises in several countries. Similar problems may arise in relation to costs incurred for the control, co-ordination and supervision of a group, for the provision of services "on call", or for central advertising activities. There could be particular scope for such problems in the situation of highly-integrated multinational groups where different functions, for example, different stages of manufacturing or the R&D functions or the activities of distribution, marketing, selling, transportation, etc., are carried out by different entities in different countries. If, for example, the prices for particular semi-finished products are not recognised in one country, this may have consequences for the transfer pricing system practised in the group as a whole which may in consequence have to be completely reconsidered. In addition, matters may be

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

complicated by the package-deals and set off arrangements, which are sometimes encountered in dealings between entities within MNEs.

18. However, although it is clear that differences of opinion about transfer prices or the allocation of profits or income may arise in a variety of circumstances, it should not be assumed that serious disagreements between tax authorities are an inevitable consequence of transfer pricing adjustments or the re-allocation of profits or income, or indeed that in practice the inability of tax authorities to arrive at acceptable agreed solutions to their differences of opinion is a common cause of substantial complaint. Nevertheless because such differences of opinion are possible, this report, in the paragraphs which follow, seeks to consider how they may be dealt with or prevented.

19. Similar problems may obviously arise in dealing with the attribution of profits on an arm's-length basis to a permanent establishment in one State of an enterprise of another State. The 1979 Report did not deal specifically with this situation but in general what is said in the Report in relation to associated enterprises is also relevant, *mutatis mutandis,* to the situation of an enterprise and its permanent establishments.[5]

II. EXPERIENCE WITH PROCEDURES CURRENTLY AVAILABLE FOR AVOIDING OR RELIEVING DOUBLE TAXATION

20. In practice it can be expected that in many cases any double taxation which might arise from transfer pricing adjustments made by one country will be readily alleviated in the other country without involving the tax authorities of the first country, either under domestic law or under provisions of a bilateral treaty corresponding to Article 9(2) of the OECD Model (which provides for relief in cases of economic double taxation) or in some other way.

21. However, it is undoubtedly necessary in a number of cases for there to be some discussion between the tax authorities of the two States concerned and, increasingly therefore, tax authorities are coming together for this purpose. Their discussions may be facilitated by provisions in their bilateral double taxation agreements on the lines of Article 25 of the Model Double Taxation Convention which provides a "mutual agreement procedure" which may be used by tax authorities as a means of seeking solutions to these and other kinds of problem within the scope of bilateral tax treaties. (This is sometimes known also as the "competent authority procedure" because the agreement which is to be sought under it is the agreement of the relevant "competent authorities" as defined in the relevant double taxation relief treaties.)

22. It may be helpful therefore to review here the application of Articles 9 and 25 in the light of the experience of tax authorities and taxpayers.

A. *Corresponding adjustments*

23. Article 9(1) provides the arm's-length rule for the tax treatment of transactions between associated enterprises. Article 9(2) provides that where one State taxes profits of an enterprise which feature also in the taxable profits of an associated enterprise in the other State and these doubly taxed profits are profits which would have accrued to the enterprise of the first State if the conditions which have been made between the two enterprises had been those which would have been made between independent enterprises, then the second State should make an appropriate adjustment to the amount of tax charged therein on those profits. This may be done either by recalculating the profits using the relevant revised price or by leaving the calculation to stand and giving the taxpayer relief against his own tax for the additional tax charged by the adjusting State.

24. In theory the adjustment to the arm's-length price under Article 9(1) should create no problems in arriving at the amount of relief due under Article 9(2), but as has been indicated above there are potential difficulties in practice. Moreover there are certain limitations to the scope of Article 9(2). In the first place, because of the requirement that the relief provided by Article 9(2) is to apply only where the doubly taxed profits are those which would have accrued to the first enterprise if it had been at arm's length from its associate, it must follow that, as stated in the Commentary (Paragraph 3), a corresponding adjustment is mandatory only if, and to the extent that, the relevant tax authorities agree with the adjustment of the price made by the tax authorities in the first State. The relief available under Article 9(2) may therefore not be complete if the two authorities have different views on what is the appropriate arm's-length price for a particular transaction. In addition, Article 9(2) makes no provision concerning secondary adjustments although the Commentary notes that nothing in the Article prevents such secondary adjustments from being made where they are permitted under domestic laws. Nor does Article 9(2) deal with the question whether there should be any obligation to make a corresponding adjustment within a specific period of time. Quite apart from this a number of member States have made reservations concerning Article 9(2). This provision as it stands therefore does not provide, in practice, a complete answer to the problems with which this report is concerned.

25. In their comments on the 1979 Report, MNEs expressed the view that no topic was more directly concerned with the entire area of transfer pricing than the topic of corresponding adjustments and urged the OECD to set forth and endorse a mandatory system of corresponding adjustments binding on all member countries. In their view, it was unsatisfactory to leave the matter as it stood. They feared that, as things are, taxpayers might be exposed to heavy

burdens of tax and vulnerable to arbitrary and capricious pricing adjustments by examining revenue agents. They feared also that "the failure to deal adequately with the question of corresponding adjustments may raise the spectre of increasing cases of double taxation in non-OECD countries opting to follow the principles of the 1979 Report".

26. It is fair to point out nevertheless that a number of OECD member countries have demonstrated in their bilateral agreements, by articles on the lines of Article 9(2) of the Model Convention and in other ways, acceptance of the obligation to make corresponding adjustments, in the normal case, to relieve economic double taxation where they are satisfied that the original adjustment adequately reflects the arm's-length price.

27. It also seems fair to comment that the taxpayer must look primarily to the domestic tax appeal system of the relevant State or to the domestic law courts or other relevant domestic institutions for protection against arbitrary or capricious transfer pricing adjustments. Imposing a simple mandatory requirement on tax authorities to conform automatically to a transfer pricing adjustment made by the tax authorities of another country would not protect MNEs against arbitrary or capricious adjustment, although it might to some extent mitigate their total impact on an affected enterprise. But providing in this way that tax authorities must conform to the action of other tax authorities over whom they have no control would leave the conforming tax authorities themselves with no protection against any arbitrary or capricious adjustments which might be made in the first place by the other tax authorities concerned, and a provision of this sort is therefore clearly unacceptable for tax authorities.

28. If this expedient is therefore rejected, as it seems to the Committee that it must be, then there seem to be only two other basic possible alternatives. One is to oblige the tax authority, as Article 9(2) does, to make a corresponding adjustment but only to the extent that it can agree that the result of the original adjustment is to substitute the arm's-length price for the transfer price adopted by the taxpayer (so that if the overall result is to be satisfactory to the tax authorities as well as to the taxpayers there needs to be a voluntary agreement on this matter between the two tax authorities). The second is to compel both tax authorities, if they cannot agree, to submit the matter to a supra-national arbitration, and to abide by its decision. The problems involved in a system of compulsory arbitration are discussed in Chapter III below.

B. Mutual agreement procedure

29. As has already been indicated much difficulty in this area may obviously be avoided if the two tax authorities concerned can be brought together to discuss the issues and to seek to arrive at some agreement upon them. The

Committee considers that tax authorities should therefore be encouraged to do this whenever it is appropriate and possible, and to do all they can in such circumstances to reach such agreement in order to eliminate double taxation as far as possible.

30. The amount of formality involved in instituting and pursuing discussions between tax authorities will vary from country to country. When less formal arrangements are possible, experience has shown them to be effective for preventing or relieving double taxation in many cases and the Committee does not suggest that the employment of these less formal arrangements should be discouraged.

31. The Commentary on Article 25 of the OECD Model Convention indicates, however, that "as regards adjustments to be made correlatively with the reinstatement of profits in the trading results of associated enterprises under the provisions of paragraphs 1 and 2 of Article 9, there is ground for considering that they may properly be dealt with through the mutual agreement procedure when determining their amount gives rise to difficulty". Article 25 is formally therefore in point in this context.

32. Article 25 sets out procedures for three different types of mutual agreement. The first is dealt with in paragraphs1 and 2 of the Article which apply to "taxation not in accordance with the provision of the Convention": here the taxpayer himself initiates the procedure. The other two, which do not necessarily involve the taxpayer, are dealt with in paragraph 3: the first sentence aims at resolving "difficulties and doubts arising as to the interpretation or application of the Convention"; the second sentence refers to the elimination of double taxation in cases not otherwise provided for by the Convention.[6]

33. Competent authorities may obviously wish to discuss general problems arising in connection with adjustments to transfer prices, but so far as any particular taxpayers are concerned, the most important procedures are probably those in the first category – *i.e.* discussions about problems in particular cases initiated by the taxpayers concerned.

34. An important limitation of the procedure is that the competent authorities have only a duty to negotiate; they are not required to reach an agreement, nor are they required to implement it when reached and, indeed, they may be unable to do so because of conflicting domestic law – such as that imposing time limits on the adjustment of assessments or on the making of refunds of tax. In the view of MNEs this is a serious weakness in the arrangements.

35. The Commentary to Article 25 of the OECD Model Convention recognises that competent authorities may need some outside help in reaching agreement and it suggests that they may agree to ask the opinion of an

impartial third party in a particular case or, where it is a question of the correct understanding of the provisions of the Model Convention, to ask for the views of the OECD Committee on Fiscal Affairs. It does not appear that any use has yet been made of these facilities. Thus, while they remain a potentially valuable means of resolving differences between tax authorities there is no basis in experience for estimating how far they may be useful for this purpose.

36. MNEs practical experience of the operation of the mutual agreement procedure has been, moreover, that it is normally time consuming and uncertain in its results. It may be possible to reduce the amount of time involved in operating the procedure but it is difficult to see how to avoid uncertainty. The outcome of any discussions about a disputed matter must to some degree be uncertain and this is so whether the discussions are part of the process of seeking a negotiated settlement, or of securing a favourable decision, from a tribunal or from an arbitrator. MNEs indicate however, that an additional element of uncertainty arises because, in their view, tax authorities tend to lump together all current cases and to negotiate a general settlement on a very rough and ready basis. Thus, they fear the success of one taxpayer in his specific case may jeopardise the chances of another when States try to reach a global agreement for several open issues in a “broad-brush” approach.

37. This fear is perhaps a consequence of other features of the procedure which have also been criticised, *viz*. that the taxpayer himself has no rights in the matter beyond the right to initiate the procedure, and that he has in particular no right to be informed of the progress of discussions on his case or to submit his observation upon it.

38. Overall, MNEs consider that owing to the protracted nature of this procedure and the risks involved, most enterprises look at the mutual agreement procedure only as a last resort.

39. Without necessarily accepting, or accepting in full, the strictures of enterprises or other critics of the procedure, it is possible to recognise that the mutual agreement procedure is in certain respects a less than perfect instrument for resolving the problems which may arise in the implementation of double taxation agreements. It is clear that, as the Commentary to Article 25 already points out (in paragraph 42), “the conclusion of a mutual agreement depends to a large extent on the power of compromise which the domestic law allows the competent authorities”. It is perhaps necessary to underline the point that the legislatures of many countries may well be unwilling to give the tax authorities the discretion to decide the tax liabilities of individuals or companies by way of agreement with the tax authorities of another country, and that for this reason at least it is understandable that OECD member countries have not been able to recommend more, in the Model

Article 25, than that the competent authorities should be obliged to endeavour to reach agreement in the matters raised under the Article. For the same reasons, therefore, no change in this respect is recommended in this report. The possibility that particular bilateral conventions might contain provisions requiring the competent authorities to reach agreement is already, however, raised in paragraph 25 of the Commentary on the Article (that possibility of course remains open and is further discussed in Chapter IV).

40. Notwithstanding the criticisms which have been made of the mutual agreement procedure, it has been widely recognised as an efficient and flexible instrument in the interpretation, application and development of double taxation agreements and a suitable means for the elimination of both juridical and economic double taxation.[7] Certainly the experience of tax authorities within the OECD at least, is that, within its limitations, the mutual agreement procedure can be a very useful instrument in resolving difficulties arising in transfer pricing cases and that, up to the present, acceptable compromises have in practice nearly always been found. It does not appear that the experience of taxpayers has been significantly different.

III. POSSIBILITY OF MANDATORY CORRESPONDING ADJUSTMENTS SUBJECT TO ARBITRATION

41. It is recognised that the attention of tax authorities to transfer pricing practices and their ability to challenge particular prices has been developed only in comparatively recent years, and that it is possible that the numbers of adjustments made to transfer prices for tax purposes may increase in the future and increase accordingly the incidence of unresolved disputes between tax authorities about the appropriateness of the adjustments. It seems to the Committee, however, that it would be wrong to exaggerate this possibility; many transfer pricing adjustments have in fact been made and comparatively few have resulted in such disputes. Nevertheless the Committee recognises that the fear of this possibility may be at any rate one important element in the desire of the representatives of MNEs that additional facilities should be provided or changes made in the existing arrangements for resolving inter-governmental disputes about transfer prices, and in particular has given rise to the suggestions which have been made by those representatives that there should be instituted a system of mandatory corresponding adjustments coupled with a formal arbitration procedure for this purpose.

42. From the taxpayer's point of view, it has been suggested, a binding arbitration procedure would have a number of important advantages. If recourse to arbitration was required in the absence of a settlement within a specific period, the taxpayer would be provided with the certainty of a

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

decision and the reduction of delay in bringing the problem before a deciding authority (which, quite apart from avoiding the expense associated with delay, would enable the matter to be dealt with while the relevant information was still comparatively fresh in the minds of those concerned and thus enable it to be dealt with more effectively). These perhaps are the main advantages envisaged. Other advantages which it is suggested could be expected are as follows. The arbitration proceedings themselves could be expected to be expeditious – the absence of any need for administrative or procedural rules, it is thought, would speed the decision-making process. An arbitration process – provided that it allowed the taxpayer a full right to present evidence and arguments – would give the taxpayer the opportunity to deploy all the relevant information and to correct any misunderstandings or misinterpretation of the information by the tax authorities in the course of the argument – taxpayers would thus not need to fear that the result of the process might be distorted by the lack of an opportunity to correct such errors of understanding. The problem could be put before impartial experts who would understand the commercial or industrial situation at the time when the price was fixed and would be particularly able from their experience to interpret the pricing information put before them. Because of this there would be less need for elaborate preparation of the case and the process would thus be less expensive, it has been suggested, than the preparation of a case for competent authority procedure or for litigation in the courts. In practice, the suggestion has also been made, arbitration decisions could be expected to be based less on a strict interpretation of national pricing rules and regulations than on what the arbitrator considered in the light of his experience to be a fair and equitable solution. Moreover, an arbitration system would obviate any danger that the merits of a taxpayer's case would be ignored and his claim abandoned by a tax authority as an expedient in order to achieve more successful results on behalf of other taxpayers.

43. The support expressed by enterprises for the idea of a compulsory arbitration procedure for the resolution of inter-governmental disputes in the field of transfer pricing has been echoed elsewhere. Although it appears that the idea may not be unanimously supported by MNEs in general, it seemed clear to the Committee that the idea had received sufficient support to indicate that it needed to be given serious consideration.

44. An instance of support given to the idea is provided by the favourable reception given to a Draft Directive of the European Communities by the Assembly of the Communities and by the Economic and Social Committee set up under the Treaty of Rome. This EEC Draft Directive was therefore an important constituent of the evidence before the Committee and to a certain extent guided their thinking on the matter. The Draft Directive would, in brief, provide a mutual agreement procedure between tax authorities designed to

relieve any double taxation which might persist in the absence of agreement. The procedure would be initiated by the taxpayer and would require a decision within a certain period, failing which the matter would have to be referred, again within a certain period, to a commission consisting of representatives of the competent tax authorities augmented by members of an independent panel. The taxpayers concerned would have the right to present their case to the commission and argue it before them. The Draft Directive envisages that the taxpayers and the tax authorities would then all be obliged to accept the decision of this commission. The Draft Directive remains as yet a draft however, and consequently it is not possible to draw any firm conclusions from it about how such arrangements would work in practice. It was, moreover, drafted for the particular circumstances of the member countries of the European Communities.

45. Nevertheless, a study of its details was instructive for the Committee. It indicated the problems which need to be solved in designing machinery of that sort and drew the attention of the Committee to a number of difficult questions. There can be no doubt that designing such machinery presents considerable problems.

46. There is the question for example whether it would in practice suffice to set up, as the EEC Draft Directive would do, a machinery which is merely an extension of the mutual agreement procedure – albeit an extension designed to produce a decision within a period of time. It has been argued that it is inappropriate for the tax authorities themselves to be part of the body which decides the issue, and that the taxpayer should be able to put the matter to a completely independent tribunal in which the tax authorities take no part. This approach, however, would leave the tax authorities in an odd situation – effectively a difference of opinion between two tax authorities would be litigated before an arbitrator on the initiative of a third party – admittedly a third party interested in the outcome but still, in the context, a third party and one interested, it is possible, only indirectly in the outcome. The system would need to provide adequately for the interests of both taxpayers and tax authorities and it is not easy to see how that could be achieved with this kind of arrangement.

47. Whatever system was adopted, there could also be the problem of how to deal with the taxpayer's rights of appeal to his own domestic courts. According to one view it would be inappropriate to allow the taxpayer the right to use the arbitration machinery as well as the domestic courts and thus perhaps have the opportunity of requiring the tax authorities to give him the benefit of whichever decision was most advantageous to him. As a practical matter, as well as to a certain extent one of equity, it could be strongly argued that before invoking an arbitration process the taxpayer should have exhausted or abandoned his domestic rights of appeal. As against this it may

also be strongly argued that the taxpayer should not in any circumstances be required to give up his rights under domestic law, and indeed to require him to do so might well create constitutional problems in some countries. A possible compromise might be to allow, as the EEC Draft Directive would allow, some countries to require the taxpayer to exhaust or abandon his domestic legal rights before seeking arbitration, while allowing other countries not to impose such a requirement. Even this solution, however, could leave some problems of balance between the situations of different national tax administrations engaged in an arbitration procedure.

48. Then there is the further question whether the arbitration should be final or whether there should be a further right of appeal – either by way of re-trial of the case, or by way of a consideration of whether the arbitrators carried out their task in a proper manner or whether they could reasonably have reached the conclusion which they did. For some the virtue of arbitration would be its finality, that is to say its certainty and the speed of the decision, and, for those, a further right of appeal would to some extent counteract this advantage and would certainly add to the potential expense of the procedure. But it may also be argued that arbitrators should be subject to some possibility of a check on their activities if taxpayers and tax authorities are to be adequately protected from arbitrary decisions. If a further appeal were accepted as appropriate the question would of course arise of which court should be responsible for hearing and deciding it.

49. Then there would also be the question of what should be the object of the arbitrators. Should it be to relieve double taxation? There is an important general consideration here which needs to be looked at first – if the taxpayer were to be sure of complete relief from double taxation there would be no likelihood that any manipulation of transfer prices on his part for a tax advantage could, if the tax authorities corrected it by a transfer pricing adjustment, result for him in a tax penalty. Some tax authorities would regard this as, at the least, overgenerous and provision might well have to be made to deal with this point.

50. If the relief of double taxation were to be the issue the problem would remain of how to deal with the situation where double taxation did not arise because one or other or both of the enterprises concerned were making losses. There would then be no question, at least immediately, of any double taxation. Of course, where the taxpayer concerned is able to carry taxes forward to another year, double taxation may arise in that year (just as there could be a shift backwards of double taxation if the taxes could be carried backwards). But where the base can be carried forward it is likely to be difficult to foresee precisely whether double taxation will in fact arise. These problems might be avoided if the question for the arbitrators to decide was, instead, to be the amount of the transfer price – *i.e.* in the simplest form, what was the arm's-

length price for the relevant transaction, or perhaps, in a more complicated form, what was the proper method to be adopted of arriving at the arm's-length price. But this, certainly in its simplest form, would narrow down, perhaps unsatisfactorily, the area of the arbitrators' consideration.

51. Connected with this question of what should be the object of the arbitrators is the question of the approach which they should adopt. Should they be mainly concerned to produce a pragmatic result, allowing them perhaps to do this by means of a simple compromise between the different views expressed, or would it be more satisfactory to require them to operate by analogy with a court of law, seeking to establish which of the claims put forward was the more correct or more in accord with natural justice? The adoption of the first approach might produce a result more quickly and perhaps less expensively than the second and, since the issues in such proceedings are likely to be very largely questions of fact and the relative weights to be given to different pieces of evidence, this could be seen to be a considerable advantage. However, careful consideration would need to be given to the effect which the adoption of such an approach might have on the ability of tax authorities to concede points to each other in attempts to negotiate solutions to such problems between themselves at an earlier stage. It would be most unfortunate if tax authorities feared to make such concessions because of a tendency on the part of arbitration simply to seek a middle way between the standpoints reached by the disputant tax authorities in their unsuccessful negotiations.

52. Then there are also questions concerning how the burden of costs should be borne and how the confidentiality of information produced for the purposes of the proceedings should be preserved.

53. These problems vary in difficulty and importance. They are cited not to suggest that an arbitration procedure is impossible but in order to show that the matter is one which would require much international consideration and co-operation if a satisfactory system were to be set up in which a large number of countries could participate, and that an arbitration procedure must inevitably therefore be a matter which tax administrations would have considerable hesitations about seeking to design even if it was recognised that there was an obvious and urgent need for one.

54. It is not in fact clear, however, that there is an obvious and urgent need for such an arbitration process.

55. At the same time it seems to the Committee that the setting up of such a scheme would involve an unprecedented surrender of fiscal sovereignty. Some member countries have in fact made it clear already that they would find such a scheme quite unacceptable for this reason.[8]

56. It seems to the Committee that these are conclusive arguments against recommending such a scheme. Nevertheless, the case for an arbitration procedure has been pressed so strongly in some quarters that it seems necessary to expand the comment that the need for it has not been established. It is not in fact apparent that existing arrangements are working so unsatisfactorily that a new form of machinery is imperative. Indeed it seems at present that where there are double taxation agreements very few cases of transfer pricing adjustments lead to adjustments which give rise to unresolved disputes between the relevant tax administrations or leave the taxpayers suffering significant inequity. It has of course been argued that, up to the present, tax administrations have not in practice made a large number of transfer pricing adjustments but that the growing interest of tax authorities in the transfer pricing of MNEs increases the potential area for disputes of this kind. However, it does not follow that an increased interest by tax authorities will inevitably increase the number of disputes between tax administrations which cannot be resolved. This increase in interest in transfer pricing is paralleled by an increase in the interest of tax authorities in consultation and co-operation between each other which it may be hoped will enable them the more easily to resolve such difficulties as arise in this field. It may be hoped too that the 1979 Report will also help to engender a common approach by tax authorities to these problems, which in itself will reduce the occasion for disagreement between tax authorities.

57. It has also been argued that some problems do in fact arise where the tax authorities of one country take a different view of a transfer pricing matter from that of the tax authorities of the other relevant country, but the problems are not brought to the surface. The argument is that double taxation is accepted by the taxpayer, though unwillingly, in such cases because the existing competent authority or mutual agreement procedures are seen as cumbersome or longwinded or unlikely, for one reason or another, to produce a useful result in a reasonable time. The comparatively small number of problems which in fact come to the surface by way of the mutual agreement procedure, it is argued, is therefore not a true guide to the seriousness of the problem. Factual evidence to support this view is obviously, however, difficult to identify, let alone quantify. It is certainly possible that some potential subjects for discussion under the mutual agreement procedure are not pressed by taxpayers because to do so would raise queries about other aspects of their international activities or would put in question the settlement of other aspects of their tax liability. But if such is the case it must be assumed that the overall result is satisfactory to the taxpayer. Possibly also in some cases the tax reliefs given to a parent company by its own domestic tax law in respect of foreign tax on dividends received from an affiliate or on the profits underlying those dividends, may mitigate the effect of a disagreement

between the country of the parent and that of the affiliate about the allocation of profits from transactions between them and, as a result, persuade the parent company that it should not press as hard as it might otherwise press to get the disagreement resolved.

58. The suggestion has been made that if, in the last resort, problems which the mutual agreement system had failed within a certain time to solve could be put to a compulsory arbitration, more use might be made of the mutual agreement procedure and that in those circumstances either a different picture would be revealed of the extent of the problem, or the tax authorities would simply, because of the possibility of arbitration, be prompted to come to an agreed decision in more cases and to do so more quickly.

59. Notwithstanding these arguments, however, the fact remains that little evidence has been produced to show that in the absence of an arbitration system taxpayers are left in any significant number of cases to suffer inequity.

60. Thus the immediate or compelling need for an arbitration system remains, in the view of OECD member countries' tax authorities, still to be demonstrated.

61. Moreover, the advantages claimed for an arbitration system are not unqualified. Thus, if it were an essential requirement that cases must be considered speedily, this might have to be achieved at the expense of a full and proper consideration of all the issues. The absence of administrative or procedural rules, if this were in fact to be a feature of an arbitration process, and a reliance on the arbitrator's broad general view of what seemed fair, though possibly an advantage in some cases, could in other cases give one or other of the parties the impression that a full opportunity to argue the case had not been allowed or that for some other reason justice had not been done. The opportunity to put matters before independent and impartial experts with experience in the particular field could certainly be useful in some cases, but in the most difficult transfer pricing issues it may well be the case that the difficulties arise because of the special situation of the taxpayer concerned (how, for example, to determine the value of a particular patent which is not readily comparable with any other) and it may not be easy to find an expert in the particular matter who is not also connected in some way with the relevant enterprise.

62. This is not to say that the advantages claimed could not be achieved to some extent but they might only by achieved by accepting some corresponding disadvantages.

63. Bearing in mind the considerations set out above, the Committee does not therefore, for the time being, recommend a compulsory arbitration process for the resolution of disputes between tax authorities about transfer

prices or the allocation of profits for tax purposes between the different components of an MNE.

IV. POSSIBLE IMPROVEMENTS TO MORE SATISFACTORY USE OF EXISTING ARRANGEMENTS FOR AVOIDING DOUBLE TAXATION

64. It is, in consequence, a matter of some importance in this situation to look carefully at the criticisms which have been levelled at the existing arrangements provided in bilateral tax treaties for dealing with transfer pricing adjustments made by the tax authorities of a treaty partner country, and to consider how, if possible, these criticisms may be met and the system made more satisfactory.

65. In fact, although the Committee offers some comment and suggestions in this context in the paragraphs below, and makes a number of recommendations which ought, in its view, to improve the operation of the existing arrangements, it does not put forward any radical recommendations for change. The matter is, however, one in which practice is developing and it seems to the Committee that it might be kept under periodic review in the future.

66. Some of the criticisms which have been levelled at the existing arrangements for relieving or avoiding economic double taxation have been discussed already to a certain extent in Chapter II. The object of the following paragraphs is to go, in rather more detail, into the problems which would be raised in dealing with these and other criticisms, as well as to touch on a number of related items which have not already been mentioned.

67. But this discussion should be seen in its proper context. As has already been pointed out, there are a variety of ways in which tax authorities may without undue difficulty avoid or relieve the imposition of economic double taxation as a consequence of transfer pricing adjustments. There may, for example, be no difficulty in the one State about accepting a transfer pricing adjustment made by the other in a particular case and consequently no difficulty about using the adjusted price as the basis for the computation of tax liability under its own laws. If there is difficulty, the tax authorities may be able to come to an arrangement, under which the adjustment is modified by the State making it, so as to be acceptable to the other. In many cases the tax authorities will thus come to a mutually satisfactory agreement by employment of the existing arrangements. Moreover, tax authorities will be governed in the making of adjustments or corresponding adjustments by the need to be able to defend their decisions before their own domestic courts or

other appeal bodies, and this too should reduce the occasions for disputes with the taxpayer.

68. There are, nevertheless, two aspects of the existing arrangements which need to be considered. One is whether the existing provisions in the OECD Model Convention (Articles 9 and 25) and their bilateral equivalents are adequate or should be changed or expanded. The other is whether the procedures and operation of the Mutual Agreement Procedure as provided by Articles on the lines of Article 25 in bilateral agreements could be improved.

A. *Corresponding adjustments*

69. As noted earlier, it has been pointed out as a matter for regret by some critics that "secondary adjustments" are not provided for under Article 9. If double taxation is to be fully relieved it is clearly desirable in theory that where a transfer pricing adjustment is made in one State the relief provision should so far as possible take account of both the primary and the secondary consequences of the adjustment. The current absence, however, of any general consensus as to what secondary adjustments are permissible or how relief should be given to take account of them makes it difficult to suggest how this may be done and, in the absence of any indication that many serious problems arise in this area which in practice are not satisfactorily resolved, no change is recommended here. The Committee considers, however, that it would be useful to return to this subject at some time in the future when practice in such matters has developed further.

70. It is necessary to consider also the question whether Article 9 of the Model goes far enough in the obligation which it imposes on treaty partners to make a primary corresponding adjustment. As paragraph 3 of the Commentary on Article 9 points out "an adjustment is not automatically to be made in State B simply because the profits in State A have been increased: the adjustment is due only if State B considers that the figure of adjusted profits correctly reflects what the profits would have been if the transactions had been at arm's length. In other words, the paragraph does not seek to avoid a double charge to tax which arises where the profits of one associated enterprise are increased to a level which exceeds what they would have been if they had been correctly computed on an arm's-length basis. State B is therefore committed to make an adjustment of the profits of the affiliated company only if it considers that the adjustment made in State A is justified both in principle and as regards the amount". Clearly it would be unacceptable to commit State B to provide an automatic corresponding adjustment, whether or not it considered that the adjustment made in State A was justified in principle and amount, since this would be tantamount to requiring State B to give State A a blank cheque. (The Committee took the view moreover, that Article 9(2) did not in fact impose any obligation to match a

corresponding adjustment where the original adjustment was made to correct the deliberate manipulation of a transfer price by the enterprise for the purpose of gaining a tax advantage.) Some possible protection for State B might be provided if the Contracting States were able to agree in some detail in their bilateral arrangements on rules about the way in which to ascertain arm's-length prices in particular cases – by for example agreeing on safe haven rules in specific kinds of case. In this way they might be reasonably assured that the result of accepting the other State's adjustments would be broadly equitable. Arrangements of this sort would be bound, however, to be a compromise and it would be difficult to devise them in such a manner that they did not conflict with the arm's-length principle itself. The Committee does not, therefore, recommend any change in Article 9(2) of the Model or in the Commentary on that Article.

B. Mutual agreement procedure

71. A second aspect of this enquiry must clearly be to what extent the mutual agreement procedure can be improved. Some of the criticisms, it will be obvious in the light of preceding paragraphs, cannot be met. There is no way of forcing the competent authorities to come to an agreed decision short of requiring them to submit to the decision of a supra-national authority and for the reasons already expressed this is not regarded as recommendable. Similarly they cannot otherwise be compelled to reach a decision by a certain time. But there may nevertheless be some scope for facilitating the reaching of agreement and for speeding up the process.

72. The aspects of the mutual agreement procedure discussed below concern in the first instance the resolution of specific transfer pricing cases. The extent and operation of Article 9(2) of the OECD Model Convention may be in point. But so may the extent and operation of Article 25. This is an area where some tax authorities feel that clarification may be desirable to enable taxpayers and tax authorities to know more certainly what may be done in this context and it has therefore been the subject of consideration by the Committee.

1. Clarification of the scope of Article 25 of the OECD Model Double Taxation Convention

73. The mutual agreement procedure provided by Article 25 is concerned with actions of the Contracting States which the taxpayer considers may or will result in taxation not in accordance with the provisions of the Convention. Thus, under a bilateral convention containing an article on these lines, the question whether a mutual agreement procedure can be undertaken depends on whether the action complained about may, or will, result in taxation not in

accordance with the provisions of the convention. The Committee has come to the following conclusions.

74. When a convention contains provisions similar to those of paragraph 2 of Article 9 of the OECD Model Convention, those provisions relieve economic double taxation of profits by requiring a State which has collected excessive tax, as a consequence of transfer prices in dealings with a company of that State, to make a corresponding adjustment to the profits of the company, insofar as they were unjustifiably high. To that extent, taxation initially imposed by that State is "not in accordance with the convention" and the taxpayer is entitled, under the provisions of Article 25, paragraphs 1 and 2, to present his case to the competent authority of the State of which he is a resident (see paragraph 9 of the Commentary on Article 25), within three years from the first notification of the most recent decision or action (see paragraph 17 of the Commentary on Article 25). The competent authority which the taxpayer applies to is under the obligation to approach the competent authority of the other State, if the objection appears to it to be justified and it is not itself able to arrive at a satisfactory solution. The mutual agreement procedure therefore provides competent authorities with an adequate legal framework for consultation when the difficulty in determining the profit is due to difficulty in reaching agreement on the appropriate transfer price. In fact, consultation is such cases is expressly provided for in the second part of the last sentence of Article 9, paragraph 2, which, by itself, allows competent authorities to consult directly. Even when paragraph 2 of Article 9 does not include the second part of the last sentence, the mutual agreement procedure, as provided for under Article 25, paragraphs 1 and 2, should apply.

75. The matter is less clear where the convention does not contain the equivalent of Article 9, paragraph 2. However, a number of countries have observed that, in substance, paragraph 1 of Article 9 does not, in itself, fulfil any necessary function, as it only formulates rules which already exist, in broadly similar language, in most domestic laws, which can be applied without conflicting with any provision of the convention, even where the convention does not contain any Article 9. Following this line of thinking, the inclusion of Article 9 (paragraph 1) in a convention would demonstrate the contracting parties' wish to cover economic double taxation in the convention. As a consequence, any economic double taxation arising from the adjustment of transfer prices would not be in accordance with – at least – the spirit of the convention, and would fall within the scope of the provisions of the mutual agreement procedure, under Article 25, paragraphs 1 and 2.

76. Some countries do not, however, share this view: according to a literal interpretation, they consider that, when Article 9 does not contain any paragraph 2, no provision in the convention imposes a requirement on the

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

State which has included in its tax base profits unduly transferred to a company which is a resident of that State to revise its assessment in order to exclude such excess profits; taxation of such profits is therefore not contrary to the convention, and paragraphs 1 and 2 of Article 25 do not apply; strictly speaking, the taxpayer is accordingly not entitled to have his case reconsidered and he may not invoke the three-year time limit provided in Article 25, paragraph 1. Usually, such States, however, have the possibility of reconsidering a taxpayer's position, in case of economic double taxation, either on the basis of domestic provisions or by the exercise of discretionary power which some tax authorities possess to relieve the most severe cases. Such procedures are more flexible and do not always give to the taxpayers a formal right to submit claims; in practice, they help to alleviate double taxation in all cases when there is no doubt about the good faith of the companies concerned.

77. On the other hand, paragraph 3 of Article 25 of the Model would allow the competent authorities to consult about the elimination of double taxation in cases not provided for in the Convention and this may be sufficient authority, for at least a few countries, to consult on particular cases of transfer pricing adjustments.

78. Some States have to some extent clarified the issue in their bilateral agreements by providing specifically, in the text of the equivalent of Article 25, that the mutual agreement procedure may be used for the resolution of problems of interpretation or application of the Convention related to transfer pricing. However, this is usually done in bilateral conventions containing provisions similar to Article 9(2) of the Model.

79. In order to avoid any doubt in cases where a convention does not contain provisions similar to those of paragraph 2 of Article 9, an additional paragraph should be inserted after paragraph 9 of the Commentary on Article 25 when the OECD Model Convention is next revised. The paragraph might read as follows:

> When the convention between two Contracting States does not contain rules similar to those of Article 9, paragraph 2 (as is usually the case for conventions signed before 1977) the mere fact that contracting parties inserted in the convention the text of Article 9, as limited to the text of paragraph 1 – which usually only confirms broadly similar rules existing in domestic laws – indicates that the intention was to have economic double taxation covered by the convention. As a result, most members of the Committee on Fiscal Affairs consider that economic double taxation resulting from adjustments made to profits by reasons of transfer pricing is not in accordance with – at least – the spirit of the convention and falls within the scope of the mutual agreement procedure set up under

Article 25. States which do not share this view do, however, in practice, find the means of remedying economic double taxation in most cases involving *bona fide* companies by making use of provisions in their domestic laws.

2. *Procedural aspects*

a) Time limits and the time factor

i) Time limits

80. An important difficulty in practice with the mutual agreement procedure seems to arise from time limits and the amount of time taken generally before agreement is reached.

81. It may be convenient to take first the question of time limits. The date beyond which no alteration can be made to a taxpayer's liability for a particular period may be reached in one country before the taxpayer can establish the need for an adjustment corresponding to that made to an associate's liability in another country. However, there must obviously be some limit to the period during which claims to relief may be made. Tax liability must become final at some stage or there would be no certainty for the tax authorities or indeed for taxpayers. But the existence of such time limits and the fact that they vary from country to country does mean that in order to minimise the likelihood of unrelievable double taxation their potential impact needs to be borne in mind. Thus, if it is possible for a tax authority in one country to adjust a transfer price ten years after the end of the year in which the transaction took place and the tax authorities of the country of residence of the relevant associated enterprise have long ago finalised the computation of that enterprise's taxable profits, they may well be legally unable to make a corresponding adjustment.

82. The solution which is suggested in Article 25 of the Model Convention is that an agreement reached by the mutual agreement procedure should be implemented regardless of any time limits in the domestic law of the Contracting States. Thus if the mutual agreement procedure is invoked and results in agreement to make a corresponding adjustment it would be possible to do this regardless of any time limits in the relevant Contracting State, and the invocation of the mutual agreement procedure could overcome any difficulty arising in this way from the domestic time limits. If all countries could accept this, as some in fact do, then time limits would present less of a problem in this context. But a number of countries have reservations about overriding their domestic time limits in such a way.

83. Where a provision on these lines is not included in a bilateral treaty it would be necessary, in order to minimise the obstacles provided by time

limits, for the discussions between the tax authorities to begin before any relevant time limits have run out and for those time limits to be effectively suspended until the discussions have been concluded. This in its turn indicates the need, in the circumstances, for tax authorities to consider the making of any transfer pricing adjustment at the earliest possible stage.

84. The suggestion has indeed been made that problems arising from time limits and the time lag between transactions and the adjustment of the relevant transfer prices might be avoided or at least reduced by the introduction of provisions into bilateral agreements which would prohibit the making of such adjustments after the expiry of an agreed period. This would be unacceptable to many countries. Tax authorities may need a long time to make the necessary investigations to establish the necessity and extent of an adjustment, and the indications even that an adjustment is necessary may only be brought to their notice late in the day. It would be difficult for many tax authorities to close their eyes to the need for an adjustment, however late in the day this need became apparent, provided that they were not prevented by their domestic time limits from making it. Nevertheless, where there was sufficient compatibility between the relevant time limits and other relevant elements (such as the procedure for imposing liability and the appeals system) in the tax structures of two Contracting States to ensure that this arrangement did not impose unequal sacrifices on one or other of the two States, it might prove to be a useful and acceptable expedient and some countries have apparently found it so. However, it does not seem to the Committee to be a suitable matter for a general recommendation.

85. Leaving these particular questions aside, the Committee does, however, recognise that it is desirable in principle to operate the system so as to minimise as far as possible the obstacles to the relief of double taxation which may result from the impact of time limits.

86. Article 25 of the Model Convention requires the taxpayer to invoke the mutual agreement procedure within three years from the first notification of the action complained of. This time limit does not itself create a great deal of difficulty (although some States consider that it provides too short a period for invoking the procedure while others have entered reservations against Article 25 because they regard it as allowing too long a period). The main difficulty in this context is in deciding what is the date of notification. As stated in the Commentary (paragraph 17), the time limit runs from the first notification of the most recent decision or action. It is desirable that tax authorities should take early steps to give the taxpayer clear formal notification of a proposal to make an adjustment if it seems that it is likely to provoke a request to another country for a corresponding adjustment.

87. The consideration of problems arising from time limits suggests in fact that, in order to minimise the possibility that time limits may prevent the mutual agreement procedure from effectively ensuring the relief or avoidance of double taxation, the procedure should be invoked at the earliest possible stage, that is to say as soon as an adjustment is seriously, even if only tentatively, proposed. If this were done, the process of consultation could be begun before any irrevocable steps were taken by either tax authority, with the prospect, therefore, that there would be as few procedural obstacles as possible in the way of achieving a mutually acceptable conclusion to the discussions.

88. Not all competent authorities would, even so, wish to be involved at so early a stage in practice. A proposed adjustment may not result in final action and even a concluded adjustment may not trigger a claim for a corresponding adjustment. Consequently too early an invocation of the mutual agreement process may create unnecessary work.

89. Nevertheless, on balance the Committee recommends that competent authorities should be prepared to enter into discussions under the mutual agreement procedure at as early a stage as is compatible with the economical use of their resources.

ii) The time factor generally

90. On the more general point that the mutual agreement procedure may turn out to be an unsatisfactorily lengthy one, the Committee recognised that international consultations in these sometimes very complex matters could very often take a long time. The occasion for the relevant officials to meet must inevitably be restricted by the long distances which may have to be travelled, correspondence is often an unsatisfactory substitute for face to face discussions, there are language difficulties, differences in procedures and legal and accounting systems to be understood and taken into account and so on. The problem may also be complicated in itself and delays provoked because the taxpayer is slow to provide necessary information – obviously if he has invoked the mutual agreement procedure he will usually be ready to provide information bearing directly upon the point, but for a full understanding of the transfer pricing situation of an enterprise, and thus for a fully satisfactory solution of the problem, the tax authorities may need more than this, and MNEs are often slow to provide information of this wider kind. It would, on the other hand, be wrong to assume that delays were always a feature of the procedure. In practice the consultations often result in a settlement of the problem in a relatively short time and it may be hoped that developing experience in such consultations may itself speed matters for the future.

91. Nevertheless, the Committee agreed that every effort should be made by tax administrations to seek to avoid delays in these matters, and to improve their practice insofar as their resources permit.

92. One way of doing this would be to encourage face to face or telephone discussion between competent authorities, to supplement the written procedures, which may inevitably be rather lengthy. Such personal contacts can often more quickly establish whether an adjustment by one country is likely to give rise to difficulty for another and can often more quickly resolve any such difficulties, and, although in themselves they may obviously be expensive, they may, if used judiciously, settle complicated matters more quickly and thus less expensively in the long run. The Committee thus recommends the development of these forms of co-operation.

93. The OECD's work on exchange of information for the purposes of preventing avoidance and evasion should be useful for improving the co-operation of tax authorities for this purpose as well, both on a bilateral and possibly in suitable cases on a multilateral basis. It seems likely that an increased willingness on the part of tax authorities to solve transfer pricing problems (and others) in oral discussion with each other and to adopt as flexible an approach as possible to the search for compromise would remove much of the delay and difficulty of which the MNEs have complained. In this context the technique of "simultaneous examination" which is currently being developed by some countries may help in suitable cases. This is a process by which the tax authorities of two countries engaged in the examination of the tax affairs of associated enterprises separately within their own jurisdictions can co-ordinate their examinations, using the exchange of information provisions in the relevant double taxation agreement so as to establish more effectively and economically the facts about such matters as the transfer pricing of transactions between the enterprises. In the process, differences in approach which might lead to double taxation can be identified and discussed at an early stage and, it may be hoped, be more readily reconciled. Moreover, such arrangements will obviate the problems caused by one country examining the affairs of a taxpayer long after the treaty partner country has finally settled the tax liability of the relevant associated enterprise. (The question whether the technique is suitable for adoption in any particular case would need, however, to be carefully considered before embarking upon it.)

b) Delegation of powers and joint consultation

94. The mutual agreement procedure has generally been regarded as a matter of consultation between high level officials of the relevant tax authorities. The reasons for this are sound; the fewer officials that are

involved, the greater the likelihood of ensuring a consistent approach and the confidentiality of taxpayer information. Indeed, without the supervisory control of experts in a central position there would be some real danger of inconsistent decisions and, in consequence, of failure to achieve equitable results. Notwithstanding this need for central control there remains, however, the possibility of speeding up procedures by some delegation of the discussions to officials at a lower level (if the detailed examination of the taxpayers' transfer pricing is in fact in their hands) provided that the relevant exchanges of information are adequately controlled by the responsible competent authorities.

95. The experience of a number of countries shows that this can be a useful expedient once a mutual agreement procedure has been initiated between the competent authorities. For example, the following procedure has been practised successfully between some countries. The competent authorities in these cases have asked their case officers in the field to prepare a joint report on the case under investigation on, *inter alia*, the following lines: they are required to establish the facts and co-ordinate their findings so that both countries will base their decisions on the same facts and circumstances; they are then required to specify those questions of law (if any) on which the reporting authorities disagree, and, where problems of evaluation are involved, set up agreed lower and upper limits for the appropriate price, thus providing a range within which the competent authorities can reach a decision. In this way both delegation to lower levels and supervisory control by the central competent authorities have been satisfactorily achieved. This kind of procedure may not be appropriate in all cases but the Committee sees it as a useful technique which in the right situation may help to bring the competent authorities to a speedier decision. The Committee therefore recommends that in appropriate circumstances and under suitable controls competent authorities should be prepared to delegate some part of competent authority discussions on transfer pricing matters to the case officers concerned.

c) Taxpayer participation

96. It has been suggested that taxpayers should have the right to submit a request for the mutual agreement procedure to be instituted and that the request should not be unreasonably denied. Paragraph 21 of the Commentary on Article 25 of the OECD Model Double Taxation Convention makes it clear that this follows from the inclusion of an article on the line of Article 25 in a bilateral tax agreement. The Committee fully endorses this interpretation.[9] The Committee was, however, presented with no evidence to suggest that such requests were in practice being unreasonably denied.

97. It has been argued that the taxpayer should have a right to take part in the mutual agreement procedure, and that he should have the right at least to present his case to both competent authorities, and to be informed of the progress of the discussions, and, some representatives of industry have suggested, he should also have a right to be present at face to face discussions between the competent authorities. The object would be to ensure that there was no misunderstanding by the competent authorities of the facts and arguments which are relevant to his case. The suggestion is based on the view that the mutual agreement procedure is a process resembling litigation and that in litigation affecting his interests the taxpayer would have a right to be heard.

98. The mutual agreement procedure envisaged in Article 25 and adopted in many bilateral agreements on the OECD pattern is not, however, a process of litigation between the taxpayer and the competent authorities: for such disputes the domestic courts are the appropriate forum. The mutual agreement procedure is (unless there is specific provision to the contrary in the relevant law of the countries concerned) simply a process of discussion between the competent authorities in which they seek to explore the possibility of a solution to the relevant problem which can be accepted by all concerned. If it is only possible to find a solution which is acceptable to the tax authorities the taxpayer may still have the opportunity to achieve a solution more satisfactory from his point of view by invoking the domestic appeal systems of one or other of the States concerned. The taxpayer will not, however, necessarily have an interest in every case. It might well be, for example, that the essential issue in the discussions is simply one of which country should tax and which should give relief for the tax, with the result being effectively the same whatever happens for the taxpayer or, in the case of an MNE, for the taxpaying group. Formal rights for the taxpayer to appear and be heard in the discussion between the competent authorities would therefore, in the view of the Committee, be out of place.

99. On the other hand if the procedure is to be useful and effective it would be sensible for the taxpayer to give the competent authorities all the information which is relevant to the issue and for the tax authorities to allow him every reasonable opportunity to present the relevant facts and arguments to them and to ensure as far as possible that the matter is not subject to misunderstanding.

100. In practice, it appears, taxpayers normally are given such opportunities, are kept informed of the progress of the discussions and are often indeed asked during the course of the discussions whether they can accept the settlements envisaged. The Committee recommends that these practices should be adopted as widely as possible. They would see no objection in principle moreover, in any case where this was convenient and appropriate

and agreeable to both competent authorities, to allowing the taxpayer to present his case to them together at a joint meeting.

101. It has been pointed out that in many cases an MNE faced by the problems created by an adjustment of its profits in one State which has an effect on the tax liability of another part of the MNE in another State, has been able to resolve these problems by its own efforts. In fact, it seems likely that an MNE, when faced with an adjustment in State A which might require a counter-adjustment in State B, would thereupon examine the question of such a counter-adjustment under the laws of country B, make appropriate arrangements and seek to settle the case eventually by negotiations with the tax authorities of that State. There are obvious advantages in this procedure and member country tax administrations would generally wish to encourage MNE's to seek to resolve their problems in this way before pressing for a formal mutual agreement procedures.[10]

102. They would no doubt be so encouraged if each tax administration were prepared to notify a resident affiliate of an MNE, at an early stage, of the intention to adjust its profits, and to discuss with the domestic entity of an enterprise which has received such a notification in another country the problems connected therewith, including the possibilities of a counter-adjustment. In this way a taxpayer which was part of an MNE would have time to inform the relevant affiliate in the group, or the headquarters of the group, which could then take steps to settle the case before irrevocable decisions were made in the adjusting country. The adjusting administration would then have less reason to fear that it would have to face a future demand for a mutual agreement procedure. This would facilitate procedures. both for the MNE and the administrations concerned.

103. The obverse of this problem, however, is that a failure on the part of an MNE in one country to advise its affiliate in another country that it proposes to accept an adjustment proposed by the tax authorities of the first country may leave the tax authorities of the second country in difficulty if they come somewhat later to the issue and disagree with the adjustments. They may have to consider refusing relief for any additional tax involved or asking the tax authorities of the first country to upset a settlement which they have made with their own taxpayer. It would help to avoid this situation if those tax authorities contemplating the making of a significant transfer pricing adjustment which might have this kind of consequence were to alert their partner tax authority in adequate time. But if the taxpayer wishes to avoid double taxation it must be his responsibility to take the necessary steps.

104. It should be clearly understood, however, that a taxpayer, in negotiation with the tax authorities of one country, cannot speak for tax authorities of another (unless he is specifically empowered to do so). It is not intended in

these paragraphs to suggest that the taxpayer should in any way be empowered to act for a tax authority.

d) Package deals

105. The Committee has seen no evidence that taxpayers have in practice suffered injury as a result of "package deals" between tax authorities in the course of which complaints put through the competent authority procedure are settled, not on the merits of each individual case, but on the basis of a balance of interest between the competent authorities themselves. Nevertheless, since it is clear that this result is feared by taxpayers, the Committee records the view that competent authority cases should each be settled on their own individual merits and not by reference to any balance of the results in other cases.

e) Unilateral information procedures

106. It has been suggested that it would be helpful to taxpayers, enabling them to make more satisfactory use of the competent authority procedures, if competent authorities were to develop and publicise their own domestic rules or procedures in this field, so that taxpayers may more readily understand what they can do and how to go about it. This could also be helpful to tax authorities especially if they are faced with the possibility of a large or growing number of cases in which mutual agreement with other tax authorities may be necessary or desirable, possibly saving them the need to answer a variety of enquiries or work out procedures afresh in every case.

107. In publicising such rules and procedures it could, for example, be made clear how the taxpayer may bring a problem to the attention of the competent authority in order to start off a discussion with the other country's competent authorities. The publication could indicate the official address to which the problem should be referred, the stage at which the competent authority would be prepared to take the matter up, the nature of the information necessary or helpful to the competent authority in handling the case, and so on. It could be helpful also to give some indication of the way in which the competent authorities would normally approach the question of transfer pricing adjustment and corresponding adjustments and how they would normally handle such cases. The Committee recommends that this possibility should be explored unilaterally by competent authorities, and that, where appropriate, descriptions of their rules and procedures should be given suitable domestic publicity.

108. Unilateral rules or guidelines governing the operation of the procedure by one competent authority would not require agreement by the other competent authority, since they would be limited in effect to the competent

authority's domestic relationship with its own taxpayers. However, it would seem appropriate to communicate such unilateral rules or guidelines to the competent authorities of the other countries with which mutual agreement procedures are usually entered into.

3. *Other suggestions*

109. A number of other suggestions which have been made for the improvement of the mutual agreement procedure under double taxation agreements should also be referred to in this report.

110. One is that the procedure should not be used to review other tax matters not directly connected with the subject of the procedure. The Committee could not accept this as a general rule. Obviously it is easier for the mutual agreement procedure to be operated, both by taxpayers and by tax authorities, if the issues involved are narrowed down as far as possible. But it would be absurd if a request to a tax authority to initiate the mutual agreement procedure on one particular aspect of the taxpayer's affairs were to prevent the tax authorities from examining or exchanging information about other aspects of the taxpayer's affairs.

111. Another suggestion is that, if double taxation has occurred as the result of a court decision, this should not prevent the mutual agreement procedure from being operated or agreements which might be reached under it from being implemented. Again no evidence was produced to the Committee to indicate that this was a widespread problem demanding an urgent solution. The problem here is similar to that arising where time limits prevent the effective operation of the procedure, that is to say the objection in many countries to the substitution of the decision of officials for the domestic law as laid down in the statutes or as decided by the courts. If it is possible for agreements reached under the mutual agreement procedure to override the domestic law then clearly this will facilitate the operation of the mutual agreement procedure in some cases. But the Committee makes no recommendation on the point. The problem can, however, as with the time limit problem, be minimised perhaps if, supposing that the taxpayer concerned is not himself in a position to invoke the mutual agreement procedure, he can alert his associates in the other country, in adequate time, to the possibility that a court decision will affect a potential transfer pricing issue so that they can invoke the procedure at their end. Tax authorities may also consider it to be useful to alert the relevant treaty partner tax authorities if there is a significant chance that a court decision will provoke as a consequence a request for a mutual agreement procedure.

112. A connected suggestion which has also been made is that a taxpayer should not be obliged, as a condition of instituting the competent authority

procedure, either to invoke the domestic remedies which are available to him or to have exhausted them. The Committee would not suggest that the legal remedies available to a taxpayer should be exhausted before his case was taken up for discussion under the mutual agreement procedure. Clearly this requirement would mean that in many cases there would be a possibility of conflict between the outcome of the mutual agreement procedure and the outcome of the domestic appeal proceedings with the result that the agreement reached by the competent authorities could not be implemented. So long as the domestic appeal proceedings are not finalised and can be abandoned or concluded by a compromise settlement there should be no difficulty about allowing them to continue parallel with discussions under the mutual agreement procedure. If no agreement results then in each country tax authority and taxpayer each have an equal chance before the domestic courts. (The situation where binding arbitration proceedings were in point would be different: here there would be a question of two different bodies both considering the same issue, and both having power to make a decision binding on the tax authorities but possibly leaving the taxpayer free to choose the one most favourable to him.)

113. The suggestion that taxpayers should not be required to invoke their domestic remedies as a condition of invoking the mutual agreement procedure is not one which permits easy acceptance. In some countries it would be necessary for the domestic appeal provisions to have been invoked, and for the appeal to be kept open, in order that the mutual agreement procedures could usefully operate at all. The Committee agrees nevertheless that it is desirable to keep to a minimum the formalities involved in the operation of the mutual agreement procedure and to eliminate any that are really unnecessary.

114. It has been suggested also that the result of consultations under the mutual agreement procedure and the general rules applied in specific taxpayers' cases should be published provided that the confidentiality of the relevant taxpayers' affairs was safeguarded. This is a possibility which may be worth further consideration at some time in the future. At present it seems that most cases have to be decided so much by reference to their own facts that it would be difficult to publish the details without breach of confidentiality and that little useful guidance would be provided by their publication in any event. However, as experience is gained by tax authorities in these matters it might well be useful for competent authorities to include, in any material publicising their domestic rules, procedures and guidelines in this field, not only some indication of the broad principles adopted by the competent authorities in the actual cases which have come before them, but possibly some indication of the limits within which it is necessary for them to work because, for example, of the incidence of other countries' tax laws

(including time limits) or because of the availability or otherwise of evidence of prices and perhaps some indication of the relative usefulness of the methods which have had to be adopted in arriving at arm's-length prices, etc. The Committee recommends that this possibility should be borne in mind.

V. CONCLUSIONS

A. *General conclusions*

115. *a) General comments on corresponding adjustments*

i) The responsibility for minimising as far as possible the likelihood of double taxation arising from transfer pricing adjustments is in the first place that of the MNE itself, which should, at any rate for tax purposes, arrange its transfer prices to conform with the arm's-length principle;

ii) Nevertheless, the Committee recognises the desirability in *bona fide* casesof ensuring as fully as possible the relief of any double taxation, whether juridical or economic, which would follow from adjustments to transfer prices made to bring them into conformity, for tax purposes, with the arm's-length standard;

iii) It fully endorses, however, the view expressed in paragraph 3 of the Commentary on Article 9 of the OECD Model Double Taxation Convention that a State should not be committed to make an adjustment to conform to that made by another State except when it can agree that the original adjustment was correctly computed on an arm's-length basis;[11]

iv) On the other hand, the Committee recommends that tax authorities should do all they can to reach an agreement on disputed transfer pricing adjustments or corresponding adjustments in order that double taxation should not persist where it could, by agreement, be eliminated.

b) The mutual agreement procedure

i) The Committee regards the existing mutual agreement procedure provided by Article 25 of the 1977 OECD Model Convention as being a useful and, in general, very effective machinery for resolving disputes between tax authorities in this field as in others, notwithstanding the criticisms which have been levelled at it;

ii) The Committee recommends, however, for the avoidance of doubt, that it should be made clear, by an addition to the Commentary on Article 25 of the Model Convention, that this Article provides

machinery to enable competent authorities to consult with each other with a view to resolving, in the context of transfer pricing problems, not only problems of juridical double taxation but also those of economic double taxation.

c) Compulsory arbitration

The Committee does not, for the time being, recommend the adoption of a compulsory arbitration procedure to supersede or supplement the mutual agreement procedure. In its view the need for such compulsory arbitration has not been demonstrated by the evidence available and the adoption of such a procedure would represent an unacceptable surrender of fiscal sovereignty.

B. *Possible practical improvements to the mutual agreement procedure*

116. The following summarises the proposals made by the Committee:

i) The Committee regards it as important that the duty imposed on tax authorities, by an Article on the lines of Article 25, to set in motion the mutual agreement procedure if it appears to the competent authority that the taxation complained of is due wholly or in part to a measure taken in the other State[12] should be implemented as quickly as possible once the obligation is made clear, and that an application to set the mutual agreement procedure in motion should not be rejected without good reason;

ii) The Committee endorses the view that the adoption, in bilateral agreements, of the last sentence of paragraph 2 of Article 25 of the Model Double Taxation Convention – *viz.* "Any agreement reached shall be implemented notwithstanding any time limits in the domestic law of the Contracting States" – would eliminate a wide range of problems. It recognises, however, as does the Commentary on Article 25, that some States are not, on constitutional and other legal grounds, able to override the time limits in their domestic law. In general therefore the Committee recommends that every effort should be made by tax administrations to ensure that as far as possible the mutual agreement procedure is not in any case frustrated by operational delays or, where time limits would be in point, by the combined effects of time limits and operational delays;

iii) The Committee in particular draws attention to the value, in transfer pricing matters, of ensuring as early and as full communication as possible on all relevant matters between tax authorities and taxpayers within their domestic jurisdiction and,

across international frontiers, between the relevant associated enterprises themselves and the tax authorities concerned. Thus the Committee recommends that tax administrations should be prepared at as early a stage as possible to notify taxpayers of the intention to make a transfer pricing adjustment (and, where the date of any such notification may be important, to ensure that a clear formal notification is given as soon as possible);

iv) The Committee recommends that competent authorities should communicate with each other in these matters in as flexible a manner as possible, whether in writing, by telephone, by face to face or round the table discussion, whichever is most suitable, and should seek to develop the most effective ways of solving relevant problems by the use, where appropriate, of simultaneous examination procedures, the controlled delegation of functions to case officers, and such other techniques as are suitable for the purpose;

v) The Committee recommends that in the course of mutual agreement proceedings on transfer pricing matters, the taxpayers concerned should be given every reasonable opportunity to present the relevant facts and arguments to the competent authorities both in writing and orally, and, where this is convenient and appropriate and agreeable to both competent authorities, to do this in the course of a joint meeting of the competent authorities;

vi) The Committee recommends that the formalities involved in instituting and operating the mutual agreement procedure should be kept to a minimum and any unnecessary formalities eliminated;

vii) The Committee emphasises the view that mutual agreement cases should each be settled on their individual merits and not by reference to any balance of the results in other cases;

viii) The Committee recommends that competent authorities should, where appropriate, develop and publicise domestic rules, guidelines and procedures relating to the use of the mutual agreement (or competent authority) procedure.

C. *Final remarks*

117. The Committee proposes to keep under periodic review the question of how the effectiveness of the arrangements for corresponding adjustments and the use in this context of the mutual agreement procedure may be adapted to meet the needs of changing times or otherwise improved, and to return in the light of developing experience to the consideration of how secondary adjustments should be dealt with.

Notes and References

1. Transfer Pricing and Multinational Enterprises: report of the OECD Committee on Fiscal Affairs, 1979, hereinafter referred to as *the 1979 Report* or *the Report*.
2. The term "economic" double taxation is thus contrasted with "juridical" double taxation which is the taxation by two States of the same income or profits in the hands of the same juridical person.
3. This was recognised in the Commentary on the 1963 OECD Model Double Taxation Convention (paragraph 4 of the Commentary on Article 25, last sentence). The point was not repeated in the Commentary on the 1977 Model Convention but it remains valid.
4. See paragraphs 5 and 6 of the Commentary on Article 9 of the 1977 OECD Model Convention where an example is given and it is noted that the making of secondary adjustments would depend on the facts of the individual case.
5. In this context, however, it is also relevant to say as in footnote to paragraph 7 of the 1979 Report, that whereas the principle of arm's-length pricing is valid also for the taxation of permanent establishments, the considerations in this report need to be applied with care to the taxation of permanent establishments because of the special factors involved (for example, because of the limitations normally recognised on the acceptability for tax purposes of loan or royalty contracts between permanent establishments and the remainder of the enterprise of which they form part – see Commentary on Article 7 of the 1977 OECD Model Double Taxation Convention, and the report on the taxation of multinational banking enterprises contained in this publication).
6. These three provisions are sometimes described as the "specific case provision", the "interpretative provision" and the "legislative provision" respectively (see: "The legal nature of the mutual agreement procedure under the OECD Model Convention", *British Tax Review,* 1979, page 333, *et seq* and 1980 page 13 *et seq*).
7. For example, Resolution of the International Fiscal Association, September 1981.
8. It has been pointed out that tax authorities, by entering into treaties for the relief of double taxation, have already to some extent surrendered their taxing rights over taxpayers affected by the treaties. But the OECD Model Double Taxation Convention does not provide for decisions on matters of the tax liability of particular taxpayers arising out of the treaty to be imposed upon the tax administrations of the partner countries by a supra-national body.
9. Paragraph 21 of the Commentary on Article 25 reads as follows:

   If, however, it appears to that competent authority that the taxation complained of is due wholly or in part to a measure taken in the other State, it will be incumbent on it, indeed it will be its duty – as clearly appears by the terms of paragraph 2 – to set in motion the mutual agreement procedure proper.
10. Suggestions to this effect have in fact been incorporated in the guidelines of Germany and the United States.
11. The relevant passage reads as follows:

    3. It should be noted, however, that an adjustment is not automatically to be made in State B simply because the profits in State A have been increased; the adjustment is due only if State B considers that the figure of adjusted profits correctly reflects what the profits would have been if the transactions had been at arm's length. In other words the paragraph does not seek to avoid a double charge

to tax which arises where the profits of one associated enterprise are increased to a level which exceeds what they would have been if they had been correctly computed on an arm's-length basis. State B is therefore committed to make an adjustment of the profits of the affiliated company only if it considers that the adjustment made in State A is justified both in principle and as regards the amount.

12. Paragraph 21 of the Commentary on Article 25 of the 1977 Model Convention.

ANNEX

EXTRACTS FROM THE 1977 OECD MODEL DOUBLE TAXATION CONVENTION ON INCOME AND CAPITAL

Article 9

ASSOCIATED ENTERPRISES

1. Where:

a) An enterprise of a Contracting State participates directly or indirectly in the management, control or capital of an enterprise of the other Contracting State, or;

b) The same persons participate directly or indirectly in the management, control or capital of an enterprise of a Contracting State and an enterprise of the other Contracting State;

and in either case conditions are made or imposed between the two enterprises in their commercial or financial relations which differ from those which would be made between independent enterprises, then any profits which would, but for those conditions, have accrued to one of the enterprises, but, by reason of those conditions, have not so accrued, may be included in the profits of that enterprise and taxed accordingly.

2. Where a Contracting State includes in the profits of an enterprise of that State — and taxes accordingly — profits on which an enterprise of the other Contracting State has been charged to tax in that other State and the profits so included are profits which would have accrued to the enterprise of the first-mentioned State if the conditions made between the two enterprises had been those which would have been made between independent enterprises, then that other State shall make an appropriate adjustment to the amount of the tax charged therein on those profits. In determining such adjustment, due regard shall be had to the other provisions of this Convention and the competent authorities of the Contracting States shall if necessary consult each other.

Article 25

MUTUAL AGREEMENT PROCEDURE

1. Where a person considers that the actions of one or both of the Contracting States result or will result for him in taxation not in accordance with the provisions of this Convention, he may, irrespective of the remedies provided by the domestic law of those States, present his case to the competent authority of the Contracting State of which be is a resident or, if his case comes under paragraph 1 of Article 24, to that of the Contracting State of which he is a national. The case must be presented within three years from

the first notification of the action resulting in taxation not in accordance with the provisions of the Convention.

2. The competent authority shall endeavour, if the objection appears to it to be justified and if it is not itself able to arrive at a satisfactory solution, to resolve the case by mutual agreement with the competent authority of the other Contracting State, with a view to the avoidance of taxation which is not in accordance with the Convention. Any agreement reached shall be implemented notwithstanding any time limits in the domestic law of the Contracting States.

3. The competent authorities or the Contracting States shall endeavour to resolve by mutual agreement any difficulties or doubts arising as to the interpretation or application of the Convention. They may also consult together for the elimination of double taxation in cases not provided for in the Convention.

4. The competent authorities of the Contracting States may communicate with each other directly for the purpose of reaching an agreement in the sense of the preceding paragraphs. When it seems advisable in order to reach agreement to have an oral exchange of opinions, such exchange may take place through a Commission consisting of representatives of the competent authorities of the Contracting States.

I. INTRODUCTION

1. When adopting, on 11th April 1977, a Recommendation concerning the avoidance of double taxation, the Council recommended the Governments of member countries to conform to the 1977 OECD Model Convention for the avoidance of double taxation with respect to taxes on income and capital, and instructed the Committee on Fiscal Affairs “to proceed to periodic reviews of situations where double taxation may occur, in the light of experience gained by member countries, and to make appropriate proposals for its removal”.

2. This report has been prepared by the Committee in that context, with a view to elucidating some of the issues related to the taxation of income derived from the leasing of industrial, commercial or scientific equipment (ICSE) under the Model Convention and under bilateral treaties and to suggest lines for possible future action by member countries in this field.

II. GENERAL BACKGROUND

1. Economic aspects

3. While the leasing of industrial, commercial and scientific equipment (ICSE) was formerly of minor importance, it has, during the last two decades, become an important form of national and international business, fulfilling quite different economic functions in a great number of often complex contexts. It has developed in most industrialised nations into a recognised, self-contained industry in its own right and combines at the same time the professional techniques of accountants, bankers, lawyers, insurance underwriters and other specialists. The following paragraphs give a rough description of typical economic situations.

4. In many cases enterprises need ICSE only for short-term purposes. Such demand may be met casually by another enterprise, which holds such equipment permanently for its own purposes but may dispose of it for a limited period of time. Where such short-term demands by lessees occur with a certain regularity it may become the basis for an enterprise’s activities as a regular lessor of ICSE.

5. The lease may become a specific form taken by the marketing of goods or merchandise or the rendering of commercial services. Thus the producers of advanced technical equipment or their customers often prefer to lease rather than to sell or buy such products. Likewise, in the field of transport, an enterprise may prefer leasing a container, a truck or a ship rather than asking the services of a transportation enterprise.

6. The leasing of ICSE may have a financial purpose. Thus, an enterprise which has a long-term need for ICSE may find financial advantages in leasing

instead of purchasing such equipment, because in doing so it does not incur itself the burden of financing the purchase and may incur only a limited risk.

7. There are even less-well defined cases. Leasing may be used as a means to transfer assets from one enterprise of a group to another enterprise from the same group. It may even be a vehicle to shift income for tax purposes from one country to another.

8. In all these cases, the context, the motivation and the conditions of the lease may differ strongly.

2. Legal aspects

9. Lease contracts are based on the separation of the ownership of an asset and its usage. The contract legally establishes that the owner of the asset in question is the lessor (leasing company), and the user is the lessee. The lessor buys the goods and the lessee rents them. The length the lease will run (the term) is established, together with the amount of the rental payments, and the frequency of the payments. A large variety of payment methods may be used.

10. Furthermore, the contract normally states what happens to the equipment at the end of the term – whether it can be acquired by the lessee, or simply returned to the lessor. The terms and conditions of the lease may vary widely. Economic significance and legal aspects of leasing may, consequently, vary too. Basically two types of leasing can be distinguished:

a) *Operating leases* are typically leases of equipment which can easily be moved from one lessee to another. The major categories involved are office equipment, motor cars, containers, computers and plant. The operating lessor's main business is usually in lease terms which do not cover overall amortisation and profits on the asset leased. His shorter terms entitle him to higher rates, and amortisation and the profits are spread over more than one lease;

b) *Finance leases* are leases where the leasing company is used as a financing institution: the user-lessee selects and specifies his equipment, the lessor pays for the whole and the capital is amortised during the course of the lease term. The lessor also takes his profit during this "primary term". Any subsequent lease term would be known as the secondary term. Frequently, even usually, the rentals in the secondary term are nominal and the lessee will often eventually acquire the leased asset.

11. One of the main advantages of operating leasing is that the lessor actually knows his equipment, and will provide maintenance and repair facilities, as well as replacements. He is directly interested in the asset, whereas the finance lessor is more concerned with the funding. Frequently, indeed usually, an operating lessor will have the assets funded by a finance

lessor, a bank or a finance house. The lender may rely on the residual value of the asset at all times, and also in his faith in the operating lessor. Where the individual asset costs are larger, guarantees are usually required from lessees in favour of finance lessors.

3. Aspects of national and international tax law

12. During the last two decades, leasing in general has proved to involve difficult tax problems in many countries, and has been the subject of specific legislation or regulations in some of them. Problems include the following:

a) Operating leases are generally subject to classical tax rules, which were modeled on the situation of renting cars and similar equipment [see paragraph 10 *a)* above]. These rules often appear not to meet the situation in the case of financial leasing because here the lessee, rather than the lessor, may, from an economic point of view, be in an owner's position. This leads sometimes to specific regulations (*e.g.* treating the lessee as owner for tax purposes);

b) Once a specific regime is adopted in tax legislation for leases of the financial type, there arise a number of difficult problems regarding, *inter alia*, the structure of such solutions, their technical details and the differentiation between the two types of leasing;

c) Leasing may give rise to problems regarding transfer prices in cases when it takes place between associated enterprises;

d) Specific cases of leasing have given rise to problems, in some countries, under domestic tax legislation designed to counteract tax avoidance. It has also been reported that leasing is often being used for the purposes of so-called "tax-shelters";

e) Leasing originated in national economies but seems also to be used internationally today. It is to be expected that the special regulations adopted in many countries will also raise specific problems in international tax law. Likewise, the question of improper use of conventions may be raised in this context.

13. This report is limited to problems arising from the inclusion of income from leasing of ICSE in Article 12 of the 1977 OECD Model Double Taxation Convention. It refers to operating leasing and does not discuss the specific problems outlined above. It takes into account only leasing between independent persons and deals only with *bona fide* transactions.

III. THE TAXATION OF INCOME DERIVED FROM THE LEASING OF ICSE UNDER THE OECD MODEL CONVENTION AND BILATERAL TREATIES

1. *Effects of existing rules*

14. Income derived from the leasing of ICSE, falls in the first instance under Article 12 (Royalties) and, where it is received by an enterprise, falls also within the scope of Articles 7 (Business profits), and 5 (Permanent establishment). Article 12 contains a specific rule which provides for no taxation in the State of source except where royalties are attributable to a permanent establishment in that State. As a consequence, enterprises engaged in the leasing ICSE are, generally speaking, taxable in the State of residence.

2. *Problems arising under Articles 5 and 7*

15. Problems arising under Articles 5 and 7 with respect to equipment leasing – as well as possible answers to them – are provided in the table in the Annex. The Committee considers that although substantial in some cases these problems can be solved.

3. *Problems related to non-zero rates of tax at source on royalties*

a) The problem described

16. The Committee noted that many bilateral treaties within the OECD maintain a limited rate of tax at source on royalties. In fact, no fewer than 12 OECD member countries have entered a reservation against the zero rate provided in Article 12 of the 1977 OECD Model.

17. Bilateral treaties providing for a non-zero rate of tax at source on royalties generally adopt the full definition of royalties in paragraph 2 of Article 12 of the 1977 OECD Model. Thus, the taxation at source provided in such treaties is generally applicable to income from the leasing of ICSE.

b) The Committee's considerations

18. The Committee has examined whether it seemed appropriate to subject income from the leasing of ICSE to taxation at source because a bilateral treaty provides for it in the case of royalties for copyrights, patents, know-how, etc. (royalties proper). In this connection a strong majority of the Committee noted that:

i) Income derived from the leasing of ICSE is usually of a different nature than royalties proper for which Article 12 of the 1977 OECD

Model has been primarily designed, *i.e.* income from intangibles with a substantial intellectual content (see, however, paragraph 21 below);

ii) Article 12 of the OECD Model has, in the same manner as for royalties, recommended a zero-rate of tax at source in the case of income from the leasing of ICSE, in order to give to such income additional protection from taxation in the country of source. The intention was not to recommend, for income from the leasing of ICSE, the levying of any tax in the country of source, even where double taxation treaties provide for such a tax on royalties generally;

iii) When extending taxation at source of royalties proper to income from leasing of ICSE, such income would be subject to taxation on a *gross* basis; this might easily result in an excessive tax, as expenses of the lessor (including depreciation or costs of financing the acquisition of the assets leased) are disregarded, and the tax at source may not be fully credited in the country of residence, where income is taxed on a *net* basis. Although relevant to royalties of any kind, these considerations are especially important in the case of the leasing of industrial equipment;

iv) Taxation on a gross basis would occur only in the absence of a permanent establishment: in the case of a permanent establishment, Article 7, in connection with paragraph 5 of Article 12, would lead to taxation on a net basis; thus, paradoxically, taxation where a permanent establishment does not exist might be far more burdensome than if one did;

v) Taxation would occur in those States which consider the residence of the payor as the source of the royalty even if the equipment is not situated in that State.

19. The large majority of the Committee agreed that the extension of taxation at source of royalties proper to income derived from the leasing of ICSE seemed inappropriate. In addition, this view is shared by a number of those countries who had entered a reservation on the zero rate on royalties provided by Article 12 of the OECD Model Convention.

20. The Committee therefore recommends that income from ICSE should not, in bilateral conventions, be included under an Article on royalties.

c) Specific cases

21. Two groups of specific cases should be noted.

i) In some cases the rent for ICSE may include an element of royalty proper. A case in point would be the lease of a machine used to manufacture products protected by a patent, where the rent covers

both a consideration for the lease of the machine as such, and a royalty for the use of the patent. It is clear that in such cases, when the view described in paragraphs 16 to 18 above is accepted, the rent would be treated as a royalty proper to the extent it could be attributed to the use of the patent. Cases of this kind are probably rare and should be decided upon on a case by case basis;

ii) It was pointed out that not all leases of tangibles might be covered by the wording of paragraph 2 of Article 12. In fact, a minority of the Committee argued that, for instance, in the leasing of containers, the service element is economically more important than the mere putting at disposal of the tangible asset and, therefore, that Article 12 of the OECD Model would not apply to it.

22. The Committee acknowledged that these were borderline cases which should be settled bilaterally by mutual agreement. The example of leasing of containers shows that reaching a multilateral agreement is difficult even among OECD countries. It is a further advantage of the proposal set out in the foregoing section that it avoids all such difficulties.

IV. SUGGESTIONS FOR A REVISION OF THE 1977 OECD MODEL

23. The above observations of the Committee suggest that the inclusion of income from the leasing of ICSE in the royalty definition would not be advisable, could lead to misinterpretation of the objectives of the OECD Model and may even create difficulties in the negotiation of bilateral tax treaties. The Committee therefore recommends that Article 12 and/or its Commentary should be amended when the OECD Model is next revised. There seem to be at least three possible alternatives:

a) To delete the words “or for the use of, or the right to use, industrial, commercial or scientific equipment” in paragraph 2 of Article 12 of the OECD Model;

b) To propose a special clause to be inserted, *e.g.* in the texts of additional protocols, making clear that Article 7, not Article 12, applies;

c) To explain the situation and the view of the Committee on Fiscal Affairs in the Commentary on the OECD Model.

The Committee’s preliminary view is that the first alternative would be preferable.

24. The Committee also noted that a few countries could not share the conclusions of the present report and would like to remain free to subject income from the leasing of industrial, commercial and scientific equipment to

a withholding at source in all cases. It would then be appropriate to deal separately with such income, and to provide for taxation at source at a lower rate than that applicable to royalties generally.

V. CONCLUSIONS

25. Taking the foregoing into account, the Committee suggests that the Council may wish to take note of the present report and:

a) Recommend member countries, when applying existing bilateral conventions providing for taxation at source of income from leasing of industrial commercial or scientific equipment, to take account of the considerations set out in Part III of the present report as a guideline:

i) for interpreting Articles 5, 7 and 12 in borderline cases, or

ii) for granting relief where possible, either under Article 25 of the OECD Model Convention or under their domestic laws, in order to avoid double taxation or other harmful effects caused by the taxation at source of such income;

b) Recommend member countries, when concluding new conventions or revising existing ones, not to subject such income to provisions under which royalties may be subject to taxation at source.

26. The Committee suggests that the Council may wish to instruct it to take into account suggestions made in this report with respect to the scope of Article 12 when the OECD Model Convention is next revised.

27. The Committee also suggests that the present report be published and given appropriate publicity by the OECD Secretariat.

VI. RESERVATIONS

28. *Australia* reserves the right to tax income derived from the leasing of industrial, commercial or scientific equipment as royalties under its double taxation agreements, where such income, under Australian law, has a source in Australia.

29. *Canada* reserves the right to subject income derived from the leasing of industrial, commercial or scientific equipment to a withholding tax at source at a rate equal to that on royalties.

30. *Italy* reserves the right to continue to include income derived from the leasing of industrial, commercial or scientific equipment in the definition of royalty as provided for in paragraph 2 of Article 12 of the 1977 Model Convention.

31. *Japan, New Zealand, Portugal, Spain and Turkey* reserve the right to tax at source income from the leasing of industrial, commercial or scientific equipment.

ANNEX

PROBLEMS ARISING UNDER ARTICLES 5 AND 7 OF THE OECD MODEL WITH RESPECT TO EQUIPMENT LEASING

Activities in State S	Comments	
	Does P.E. exist?	Attribution of profits
A. Leased equipment operated, serviced, inspected and maintained by lessor's own personnel stationed permanently in State S	Yes, at least if these activities are carried out under the direction, responsibility and control of lessor	Attribution of the full profit of leasing deducting expenses of the head office
B. Leased equipment operated, serviced, inspected and maintained wholly by lessee	Generally no	None
C. Leased equipment operated, serviced, inspected and maintained by lessor by: *a)* own personnel stationed permanently in State R *b)* independent enterprises hired by lessor	No, if carried out under the direction, responsibility and control of lessee; otherwise disputable	If P.E. exists should profits be attributed for the leasing as such or only with respect to operation, service inspection and maintenance?
D. Leased equipment: – operated and serviced by lessee – inspected and maintained by lessor	Disputable, if inspection and maintenance are not under the direction, responsibility and control of lessee	If P.E. exists should profits be attributed to it only with respect to inspection and maintenance?
E. Maintenance of an office in State S to be in contact with the market, conclude contracts, deliver the equipment, etc. but not participating in operation, servicing, inspection and maintenance of leased equipment	According to the principle of Article 5	Attribution of profits only for the services actually performed by the office *or* for the whole profit of leasing equipment in State S

State R = State of residence

State S = State of source

The Taxation of Income Derived from the Leasing of Containers

I. INTRODUCTION

1. When adopting, on 11th April 1977, a Recommendation concerning the avoidance of double taxation, the Council recommended the Governments of member countries to conform to the 1977 OECD Model Convention for the avoidance of double taxation with respect to taxes on income and capital, and instructed the Committee on Fiscal Affairs "to proceed to periodic reviews of situations where double taxation may occur, in the light of experience gained by member countries, and to make appropriate proposals for its removal".

2. This report has been prepared by the Committee in that context, with a view to elucidating some of the issues related to the taxation of income derived from the leasing of containers[1] – whatever is the type of transportation of such containers – under the Model Convention or under bilateral treaties. The report also suggests lines for possible future action by member countries in this field.

II. ECONOMIC BACKGROUND

1. General

3. The leasing of containers became an important activity during the 1970s. This was dependent on the "containerisation" of important parts of the world transportation system which took place in the previous decade. While in the first phase of this development, containers were generally owned by a carrier or ship-owner, in the second phase more and more containers were owned by separate enterprises and operated on a leasing basis. Today, container leasing enterprises (CLE) appear to own more than 50 per cent of the world container population.[2]

4. This development took place because CLEs fulfil various functions in the complex environments of the world transportation system. Three functions can be clearly identified:

a) CLEs provide carriers and other participants with containers, thereby providing an essential asset for the transportation business;

b) CLEs perform a clearing function where containers are in surplus at one point and scarce at others; the enterprises thus perform an important service for the world transportation system;

c) Leasing enterprises may participate in specific financial arrangements, *e.g.* in the case of fixed price buying options or full pay-out leases. They thus perform financial functions which are not necessarily essential to the world transportation system.

5. While all these functions are of relevance when considering a CLE, tax administrations are often concerned with some of these functions only, *e.g.* those performed by a specific establishment only having limited functions.

2. Business performances

6. The leasing of containers is a complex and world-wide activity. A single CLE normally handles tens of thousands of containers and may have to maintain more than 100 "depots" where its customers may pick up or re-deliver the containers.

7. The operation of such a vast "pool" of containers, their world-wide movements, the cash flows and other commercial operations involved is almost totally dependent upon electronic data processing. The computer systems – normally situated at the headquarters of the CLE – are therefore an essential element in operating, controlling and assessing its world-wide business.

8. Accordingly, the daily activities are for the most part highly centralised, though a vast network of "depots" exists. The contracts with customers are negotiated and concluded either by the leasing company or by a local agent or, in some cases, by the operator of the depot (the operator of such a depot may also conclude contracts with customers). A major problem confronting the industry is the unbalanced flow of containers which results in their accumulating in one place while there are shortages in others. Once more, this can only be solved by centralisation and computerisation.

9. For the purposes of analysis, three countries or groups of countries have to be distinguished:

- The container leasing enterprise's *country of residence,* where this enterprise has the centre of its activities;
- *The countries of the various depots* between which containers move, being transported in an irregular way between different locations by a greater or lesser number of shipowners. The leasing enterprise may have specific installations in these countries, but it is more common for it to rely on wholly independent enterprises resident there;
- The *lessee's country* where a specific lessee has his residence or its head office; the leasing enterprise may or may not have a permanent establishment in this country for the conclusion of contracts or for the handling of containers reaching that country or for both.

3. *Activities*

10. The leasing of containers may assume various forms. The following seems a fair description and uses a terminology generally accepted in the industry:

i) Trip leases for one or more trips, including:

- Single-trip leases: leases from one depot to another,
- Round-trip leases: leases from one depot for a round-trip back to the same depot or another depot in the same country,
- Possible "mixed" leases, *e.g.* single-trip leases with a round-trip option;

ii) Short-term leases, for terms of less than one year, including:

- Fixed minimum leasing time with open termination (*e.g.* minimum time 20 days, 3 months, 6 months, 9 months),
- Minimum leasing time with renewal option (*e.g.* for 6 months, 12 months, 2 years, 3 years, etc.),
- Fixed leasing time (*e.g.* 30 days, 3 months, 9 months);

iii) Long-term leases for leasing terms of one year or more, including contracts with:

- Minimum leasing time with open termination,
- Minimum leasing time with renewal option,
- Minimum leasing time with premature cancellation option after 4, 3, 2, 1 years,
- Fixed-price buying option or full pay-out leases (at the end of the leasing time the container automatically becomes the property of the leasing customer).

11. Leasing enterprises may also negotiate special agreements with their customers for leasing containers in certain operating areas, from and to certain depots, in certain quantities and at certain rates which are fixed for a specific period.

12. Generally speaking, rules of taxation are the same for all these activities. Problems may however arise where containers are leased in the context of specific financial arrangements or where special container equipment is being leased for exceptional purposes (*e.g.* atomic fuels transport). These cases are not dealt with in this report, but reference is made to the Committee's report on "The taxation of income derived from the leasing of industrial, commercial or scientific equipment".

III. RULES FOR THE TAXATION OF INCOME DERIVED FROM THE LEASING OF CONTAINERS UNDER THE OECD MODEL CONVENTION

1. *Effects of existing rules*

13. Income derived from the leasing of containers, being income from the leasing of industrial equipment, falls in the first instance under Article 12 (Royalties) and, where it is received by an enterprise, falls also within the scope of Articles 7 (Business profits), and 5 (Permanent establishment). Article 12 contains a specific rule which provides for no taxation in the State of source except where royalties are attributable to a permanent establishment in that State. As a consequence, enterprises leasing containers are, generally speaking, taxable in the State of residence. A number of countries have, however, entered a reservation on the exemption at source provided for under Article 12.

2. *Options for a future revision of the Model Convention*

14. The Committee has studied three different possibilities. A first possibility would be for the profits from the leasing of containers to be subjected to a limited tax at source where a bilateral treaty provides for such a tax on royalties in general. The Committee, in its large majority, found that this alternative would create major difficulties for the leasing of containers and for the international transportation system generally. It therefore rejected this solution. In connection with this, reference is made to the report on the leasing of industrial, commercial or scientific equipment, which recommends the general exclusion of income from leasing of these assets from the scope of Article 12 of the OECD Model Convention.

15. Another possibility would be for profits from the leasing of containers to be, in the future, only subject to Articles 7 and 5 of the OECD Model. In order to avoid certain difficulties which have arisen from the fact that some countries have entered reservations on Article 12 and levy taxes at source on royalties under bilateral conventions, (*cf*. Part V below), income from container leasing should be clearly excluded from the scope of Article 12. This would be in line with the OECD Model as such income is derived from a business activity. It seemed adequate to subject enterprises leasing containers to taxation in States where they have permanent establishments, and to avoid double taxation in the State of residence by using the methods set out in Articles 23 A and 23 B of the Model. Any practical difficulties or doubts for applying Articles 7 and 5 of the Model Convention might be sorted out by an adequate interpretation of these Articles and by having recourse to the mutual agreement procedure (Article 25). The principles developed in Part IV of this

report would in fact form the basis for this approach. Such a solution met with a large support in the Committee.

16. Finally, the profits from the leasing of containers might be treated on a similar basis as profits from the operation of ships in international traffic and be taxed in accordance with Article 8 of the OECD Model, *i.e.* only in the State in which the place of effective management of the enterprise is situated (*cf.* paragraph 10 of the Commentary on Article 8). Such a solution is premised on the view that, in the absence of such a rule, the requisite allocation of rental income among various source States is inherently subject to the application of inconsistent allocation rules in those States and to arbitrary approximations, which can lead to the imposition of a prohibitive multiple tax burden. Exemption at source ensures that a tax will be imposed only where the overall leasing operations of an enterprise are profitable. Granting the tax right to one State eliminates the need to develop complex rules for defining the profits to be taxed by each State, and the State in which the lessor is resident stands in the best position to account for the income and expense of a container leasing enterprise.

17. However, the Committee observed that, from the standpoint of principle, the problems raised by the taxation of income from container leasing differed little from the familiar problems that arose for implementing the principles of the OECD Model. A substantial majority of countries considered that container leasing was basically no different from the leasing of other industrial or scientific equipment, even if the containers were not used in the country of the first lessee. It would thus be unfortunate to create a precedent here that was contrary to the customary rules for taxation of this type of income. The Committee therefore does not recommend submitting container leasing income to the rules of Article 8, which might, however, be examined in the light of new experience when the OECD Model is fully revised. Pending this revision, countries which favour submitting income from container leasing to the rules of Article 8 are free to suggest this solution when entering into bilateral negotiations.

IV. APPLICATION OF THE OECD MODEL CONVENTION

1. *General*

18. While the OECD Model is in itself clear, it raises a number of practical problems.

a) A first problem relates to the question of whether the leasing enterprise has permanent establishments within the meaning of Article 5 of the OECD Model. This may be unclear, *e.g.* in States where depots are situated, when the activities of the enterprise are often so

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

limited that it is difficult to establish whether or not these activities, taken in themselves, would qualify for exemption under paragraph 4 of Article 5 of the OECD Model. Likewise it may be doubtful whether there is or is not a permanent establishment in the State of a customer (*e.g.* carrier or other user of the containers) by the mere fact of the presence of containers there;

b) Determining which profits of an enterprise leasing containers are attributable to a permanent establishment qualifying as such under Article 5 of the OECD Model may be even more difficult.

2. Guidelines for the application of Article 5 of the OECD Model (existence of a permanent establishment)

19. The Committee decided to approach this problem by examining some basic cases often encountered in the operation of CLEs. The solutions proposed could constitute guidelines for policy-making and mutual agreement procedures regarding the application of bilateral treaties. This does not mean, of course, that the specific circumstances of each case should not be taken into account.

Case A: Simple depots

i) Case description

20. The leasing enterprise rents containers all over the world. The lessee may surrender his container to any one of more than 100 depots in 40 countries. Most depots are owned and operated by independent enterprises taking over the containers and delivering them to their new customers. The depot operator generally receives a lump sum plus a special fee depending on the actual use of the depot and the services actually performed. The operation of the depot will normally require the following activities:

- Being notified of the arrival of containers which will be put at the disposal of the leasing enterprise;
- Notification of demands for containers;
- Managing a deposit for containers which have to be kept at the port under the disposition of the leasing enterprise;
- Handling of containers, namely receiving them from shipping enterprises or delivering to them on demand;
- Control of containers returned to the enterprise or delivered by it;
- Technical inspection establishing whether there is damage, informing the CLE in case of damage and auxiliary services to provide for repair through third parties.

The depot is normally used by several enterprises including container leasers, auto transporters, ocean carriers.

ii) Guidelines

21. The Committee suggests that a simple depot, as described above, does not normally give rise to a permanent establishment if operated by an independent enterprise. In cases where the operator serves as a depot for only one enterprise it might, however, be necessary to examine whether an operating depot as described in Case D below does not in fact exist.

22. A simple depot might, however, be deemed a permanent establishment in the meaning of Article 5, paragraph 1 of the OECD Model if owned and operated by the CLE itself. A strong majority of the Committee holds, however, that in these circumstances the establishment should not generally be deemed to be a permanent establishment under Article 5, paragraph 4 of the OECD Model. This appears to be justified because:

- Many activities of such establishments come under the wording of subparagraphs *a)* and *b)* of Article 5, paragraph 4;
- The remaining activities are generally so limited as to be regarded as being of an auxiliary character within the meaning of subparagraph *e*) of paragraph 4;
- The activity of a depot constitutes only a small part of that of the enterprise as a whole and it would hardly be possible to individuate more than an insubstantial amount of profits attributable to it;
- Consequently, the overall activity resulting from the combination of activities falling under subparagraphs *a), b)* and *e)* is of an auxiliary character within the meaning of subparagraph *f)* of paragraph 4.

23. The Committee therefore recommends applying the rules for exceptions provided in Article 5, paragraph 4 of the OECD Model in the cases mentioned above.

Case B: Depot-Agence

i) Case description

24. The lessor maintains agencies which rent the containers to customers approaching them. The contracts are normally signed by the agent who will closely observe general guidelines, special instructions or specific orders of the lessor, as the case may be. The agent may be fully independent of the lessor and serve more than one enterprise leasing containers. There may, however, also be closer relationships with the lessor.

ii) Guidelines

25. Where a depot-agence is owned and operated by a third party having an independent status and acting in the ordinary course of its business, it is not to be deemed a permanent establishment under Article 5, paragraph 6 of the OECD Model. Otherwise, it should be deemed a permanent establishment under Article 5, paragraph 5 of the OECD Model.

26. After careful consideration the Committee, in its vast majority, recommends granting the status of an independent agent if the operator is dealing with more than one enterprise, since the criteria described in paragraph 35 of the Commentary are met in such circumstances. Other cases should be examined on a case by case basis in the light of paragraphs 36 and 37 of the Commentary on Article 5.

27. Where the depot-agence is owned and operated by the CLE itself, the Committee considers that a permanent establishment clearly exists.

Case C: Inspection and repair

i) Case description

28. Containers deposited in a depot are inspected and, in the event of unacceptable damage, repaired on request of the lessor. Normally, this will be done by independent inspectors and/or repair shops (normal technical inspection stating whether there is any damage at all will normally be carried out by the depot operator). In some cases the lessor may own a repair shop in ports of special importance.

ii) Guidelines

29. The Committee is of the opinion that inspection and repair through independent enterprises does not constitute a permanent establishment. Even in the special cases where this might be regarded as a fixed place of business, paragraph 4 *e)* and *f)* should lead to the conclusion that there is no permanent establishment.

Case D: Operational branches

i) Case description

30. The lessor maintains an office in a port to take care of all its operations in the region; this would include notification of arrival and demands, operating the depot for containers, handling them and carrying on inspection and repair. It would likewise include, under the supervision of the head office, the lessor's marketing and the acquisition of contracts. Such operational

branches appear to be set up principally in order to co-ordinate the CLE's activity on a regional basis.

ii) Guidelines

31. In these cases, the application of Article 5 of the OECD Model will usually lead to the existence of a permanent establishment.

Case E: Mere presence of containers

i) Case description

32. Containers of the lessor are used in the country by, or on behalf of, the lessee or a third person.

ii) Guidelines

33. It is clear that in such a case the mere presence of the containers does not constitute a permanent establishment as there is no fixed place of business nor any activity performed by the lessor.

3. Guidelines for the application of Article 7 of the OECD Model (profit allocation)

34. The guidelines for the application of Article 5 of the OECD Model as set out above will prevent the CLE's profits from being split up excessively. The Committee agreed therefore that relatively general guidelines would meet the situation from a practical point of view.

35. Only in exceptional cases would a simple depot and a depot-agence [Cases A and B] be regarded as permanent establishments. Allocation of profits should be based on the fact that the permanent establishment in these cases is not active in the business of leasing containers, but rather rendering limited services. Its profits, therefore, should be determined by:

a) The amount a distinct and separate enterprise would receive under similar conditions as a consideration for holding a depot (*e.g.* a lump-sum payment and/or a special fee dependent on the actual use of the depot);

b) Less: expenses incurred for the purposes of the depot;

c) Less: an appropriate share of the headquarters' expenses including executive and general administrative expenses (if not otherwise taken into account).

36. Problems may be different in the case of an operational establishment [Case D]. In calculating the profits attributable to it, functions between such a permanent establishment and the headquarters of the lessor should be

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

carefully weighted. Expenses including executive and general administrative expenses incurred at the headquarters should be deducted. This would cover, *inter alia,* expenditure for financing containers, depreciation and management.

37. In Cases A and B, the profits to be allocated to the permanent establishment would normally be small. This can only be ascertained at the headquarters. States taxing such profits might, under a mutual agreement procedure, rely on the amounts determined in the headquarters' books and the country in which the headquarters is located might, in such a case, undertake to examine these amounts when auditing the CLE and to advise the other State in the case of some serious deficiency being ascertained.

V. PROBLEMS REGARDING ARTICLES ON ROYALTIES IN BILATERAL CONVENTIONS

38. The application of articles on royalties in bilateral conventions does not give rise to difficulties as long as they provide for no taxation at source on payments (rents) for container leasing. This would be in line with Article 12 of the OECD Model which exempts royalties (including rents) for scientific, industrial or commercial equipment from taxation in the State of source.

39. There are, however, bilateral conventions which provide for a limited tax at source on royalties. Reference is made in this respect to the report on the report on the taxation of income derived from the leasing of industrial, commercial or scientific equipment, the conclusions of which also cover income from the leasing of containers. In that report, the Committee takes the view that income from leasing should not be subjected to taxation at source and, therefore, be excluded from the scope of provisions corresponding to Article 12. Furthermore, it recommends making appropriate amendments to that Article or the Commentary thereto in an eventual revision of the OECD Model.

40. The question may be asked whether it is cogent to apply the provision of bilateral conventions providing for a tax at source on royalties (including rents on industrial, commercial or scientific equipment) to rents from the leasing of containers. These bilateral conventions normally use the language of Article 12, paragraph 2 of the OECD Model in defining the term "royalties". No consensus on this question could be reached in the Committee.

a) One line of argument was that the leasing of containers is presently, according to the strict wording of such treaties, always to be regarded as "leasing of ... industrial equipment". This might be supported by the fact that the Commentary on Article 12 of the OECD Model

appears to follow this line. As the wording of the Model is quite clear, only a change in the Model could alter the situation;

b) On the other hand, it has been argued that the economic reality of container leasing goes far beyond the simple lease of a tangible good. The advent of container leasing was not due to the wish of carriers to rent rather than own containers. The economic reason underlying this development was rather the wish to be able to pick up and leave a container wherever it is convenient for the carrier to do so. This is only made possible by the fact that the leasing enterprises have built up a world-wide network of installations and perform a kind of clearing function where there is a surplus of containers at one point and a scarcity at others. The enterprise thus performs a service in balancing supply and demand for containers on a world-wide scale; the lease is an instrument rather than an ultimate end in itself. As Article 12 of the OECD Model deals only with situations where the lease is the ultimate end, it is not applicable to container leasing.

41. While the majority of countries adhered to the first interpretation, a minority preferred the second alternative as a functional interpretative approach. The Committee as a whole stated that the problem was due to the fact that bilateral conventions deviate from Article 12 of the OECD Model and that a common solution could not be envisaged. However, it recommends that Contracting States make use of the mutual agreement procedure, where this is possible, in order to avoid double taxation or harmful effects caused by taxation at source on royalties.

42. In this context, difficulties in the application and in the interpretation of conventions which may arise where taxation at source may be imposed on payments for the leasing of containers have been considered by the Committee. Reference is made to paragraphs 16 to 20 of the above-mentioned report on the leasing of industrial, commercial and scientific equipment.

VI. CONCLUSIONS

43. The Committee has come to the conclusion that the approach adopted in the Model Convention does provide for satisfactory solutions and t hat there is no reason to depart from principles applicable to other enterprises. In order to facilitate the application of these principles to container leasing enterprises

and having due regard to what is said in Part V above, the Committee suggests that the Council may wish to:

a) Recommend member countries, when applying existing bilateral conventions to enterprises leasing containers:

i) To take account of the considerations set out in Parts IV and V of the present report for the interpretation of Articles 5, 7 and 12 of the OECD Model Convention,

ii) To resolve administrative difficulties of application of these Articles by way of mutual agreement,

iii) To grant relief where possible, either under Article 25 of the OECD Model Convention or under their domestic laws, in order to avoid double taxation or other harmful effects caused by the taxation at source of such income;

b) Recommend member countries, when concluding new conventions or revising existing ones, not to subject income from the leasing of containers to provisions under which such income may be subject to taxation at source.

44. The Committee suggests that the Council may wish to instruct it to take into account suggestions made in this report regarding the scope of Article 12 when the OECD Model Convention is next revised.

45. The Committee also suggests that the present report be published and given appropriate publicity by the OECD Secretariat.

VII. RESERVATIONS

46. *Australia* reserves the right to tax income derived from the leasing of containers as royalties under its double taxation agreements, where such income, under Australian law, has a source in Australia.

47. *Canada* reserves the right to retain a 10 per cent rate of tax at source on income derived from the leasing of containers. However, Canada would be prepared to agree to apply, on a reciprocal basis, the rules of Article 8 to income derived from the leasing of containers used in international traffic.

48. *Italy* reserves the right to continue to include income derived from the leasing of containers in the definition of royalty as provided for in paragraph 2 of Article 12 of the 1977 Model Convention.

49. *New Zealand, Portugal* and *Spain* reserve the right to tax at source income from the leasing of containers.

50. *Turkey* reserves the right to subject income from the leasing of containers to a withholding tax at source in all cases. In case of the application of the Articles 5 and 7 of the Model Convention to such income, Turkey would like to

apply the permanent establishment rule to the simple depot, depot-agence and operational branches cases.

Notes and References

1. Shipping, inland waterways, air freight, rail or road transportation, etc.
2. For the purpose of this report, container leasing enterprises do not include shipping companies exploiting containers as an activity of an auxiliary character, in the meaning of Article 5 (paragraph 4) of the 1977 Model Convention (*cf.* paragraph 10 of the Commentary on Article 8).

I. THE PROBLEM STATED

A. *Options in corporate financing*

1. The methods by which companies are provided with their capital affect the taxation of corporate income. This arises because the calculation of the taxable income of the company and also that of the persons providing the capital are both affected by the way in which that capital is provided. It is also the case that in countries which levy a tax on net wealth or capital, the way in which a company is financed may have a direct effect on the taxable capital of the company, since debt is usually deductible in arriving at the taxable amount. This report, however, deals only with the taxation of corporate income and profits.

2. There are broadly two ways in which a company may be financed. One is by the issue of shares in the equity of the company and the other is by borrowing. This report is mainly concerned with the taxation problems which may arise from the balance between these two methods of financing. These problems are sometimes referred to, though rather loosely, as problems of "thin capitalisation".

3. The differences between loan capital and equity capital may seem obvious but it is nevertheless pertinent to spell them out briefly. First, there are legal differences. The owner of shares is normally entitled to a proportion of the profits of the company. He is not normally entitled to recover his original investment except on the dissolution of the company and the risks he undertakes are normally limited to the amount of equity capital which he has subscribed or has undertaken to subscribe. He would usually however be able to sell his shares and thus recover the current value of his investment, which might be more or less than the amount he originally invested. The provider of loan capital, on the other hand, is normally entitled to a periodical amount of fixed interest on the amount lent, regardless of what profit, if any, is made by the company. He is normally entitled to recover his investment after a certain period. He may in some circumstances be able to make an earlier sale of his rights to another person, at which point, as with shares, he may recover either more or less than his original investment, although the factors affecting the sale value of a bond may well be different from those affecting the sale value of a share. The provider of a loan risks, as does the shareholder, the loss of his entire investment.

4. Second, there is an economic difference. The fact that loan creditors can look to a periodic fixed reward for the use of their loan capital, and to the return of that capital itself at the end of the loan period, while the subscribers of equity capital (or those who purchase their shares) can be expected to wait for their reward, within reason, until the directors of the company decide that

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

profits can be spared for distribution rather than reinvestment, means that a company which is mainly financed by equity capital can operate in a very different way from one which is mainly financed by loans. For example it may be able to wait longer for the expected profits to materialise and may have a better prospect of receiving trade credits from suppliers, etc.

5. Perhaps the most important difference from the tax point of view is the fact that equity investment is designed to produce a return for the investor in the form of a distribution of taxable profits while the return on a loan investment is, for the payer, an expense which has to be met before the profits can be established.

B. *The choice of financing and the implications for taxation*

6. In practice companies are frequently financed partly by equity contributions and partly by loans. The proportion of a company's capital which is financed by each method may well be determined by considerations which arise from economic or commercial necessity or desirability and have nothing to do with tax, and, on this basis, tax authorities have generally tended, in the absence of contrary indications, to regard the way in which a company is financed, as primarily a matter for the judgement of the parties concerned.

7. As a consequence of the fundamental difference between loan and equity capital, however, the tax treatment of a company and the contributors of its capital also necessarily differs fundamentally according to whether the capital is equity or loan capital. As already pointed out, this may obviously be the case where the company's capital is itself the subject of taxation. With respect to the taxation of its income or profits, the basic difference is that the shareholder's reward – the distribution to him of profits, usually in the form of a dividend – is not deducted in arriving at the taxable profit of the company. Indeed, this follows from the fact that what the shareholder receives is a distribution of the profits themselves. Interest on a loan, however, is usually allowed as a deductible expense in computing the taxable profits of the company paying it (being effectively if not specifically regarded as an expense of earning those profits).

8. Thus, in the national context, the rewards of equity financing are first taxed in the hands of the company as profit as well as being subsequently taxed in the hands of the shareholders as dividends, though the economic double taxation may be mitigated (most commonly by giving a credit or some other relief to the shareholder in respect of the company's tax). In the international context, the company's profits are similarly likely to be subjected to tax in the country of source while shareholders also suffer source country tax on the dividend. In both the national and the international

context, the shareholder's tax is likely to be withheld by the payer but, in the international context, the amount withheld is more likely to represent the shareholder's final tax liability to the tax of the source country on that income (though rate of the withholding tax may be limited under the equivalent in a bilateral treaty of Article 10 of the 1977 OECD Model Double Taxation Convention – hereinafter referred to as the "OECD Model", or "the Model"). In the case of loan financing on the other hand the payments of interest (except for excessive interest treated as constructive dividends) would effectively be free of corporate income tax. In both the national and the international contexts the lender is the only person likely to suffer tax on interest payments. In the international context, interest payments, like dividends, are often subjected to a withholding tax, though the rates of such taxes may, under tax treaties, be reduced (often to rates lower than those which would be charged on dividends) or the payments may be exempted from tax altogether.

9. In the international context further complications may arise, for both dividends and interest, by the tax treatment of the payments in the country of residence of the recipient, including the application of any provisions for relieving double taxation. Although some countries generally relieve double taxation by exempting income and others generally relieve it by crediting foreign tax against their own tax, this difference is not always important in the case of interest and dividends because most countries use the credit method in relation to both types of income. However, the distinction between interest and dividends is important in this context in some circumstances for two reasons: first, the rate of foreign tax creditable may differ according to whether the income is of the one or the other kind; second, a special relief is often given to a parent company which receives dividends from a subsidiary under what is sometimes described as a "parent/subsidiary regime", and this kind of relief is not given in the case of interest received by a parent company. Thus, while credit for the tax of the country of source in relation to interest is always limited to the tax charged on the interest itself, credit for source country tax in respect of dividends may sometimes extend under a "parent/subsidiary regime" to a part of the tax charged on the appropriate proportion of the underlying profits out of which the dividend was paid – credit for underlying tax, or "indirect credit". Similarly, countries which ordinarily operate the exemption method will generally, under a "parent/subsidiary regime", simply exempt a dividend rather than relieve its double taxation by way of credit. For a discussion of "parent/subsidiary regime" – see paragraph 42.

10. The broad effect of these two different tax treatments is that it may sometimes, from the tax point of view, be more advantageous to a particular combination of company and contributor to arrange the financing of the company by way of loans rather than by way of equity contributions. Less

frequently it may happen that in particular cases a tax advantage arises from transferring funds as a distribution of profits rather than as a payment of interest. However, tax authorities, for the most part, have been more concerned hitherto about the tax advantages deriving from the use of loan capital rather than equity capital and the fact that these may induce the parties concerned to provide what is essentially equity capital in the form of a loan (sometimes described as "hidden capitalisation"). Tax motives – it is worth repeating – may not be the only factor leading to the decision of a multinational enterprise to use loan capital rather than equity capital in any particular case. The motive may be to preserve the mobility of funds: it may well be easier to repay a sizeable loan than to pay an equivalent amount in dividends, and such flexibility may seem desirable even where the underlying intention is to provide long term capital; there may be a need to ensure that capital is not unnecessarily tied up in one country if for example there is a possibility that, at some not too distant period, it can be more profitably used elsewhere or may be needed to meet an urgent and unexpected demand for funds. Other factors may also be relevant. Nevertheless, the desire to benefit from tax advantages may be the sole or most important motive in this context and tax authorities must therefore consider, in any particular set of circumstances, whether or not this should influence the way they regard the use of a particular method of financing.

11. "Hidden capitalisation" (more strictly perhaps "hidden equity capitalisation") may manifest itself in different ways. One such manifestation may be in the form of what is sometimes described as "hybrid financing". It is necessary at this stage to explain briefly what is meant by this term. It derives from the fact that the broad distinction between debt financing and equity financing, which is mentioned in paragraphs 2 to 4 above, may sometimes be blurred since, for example, creditors may at some stage be able to convert their debt into a participation in the equity of the company, or the interest which they are entitled to receive may be closely dependent on the profits made by the company. In such situations it is not always easy to classify the financing as purely debt finance or purely equity finance. As a result, what is essentially equity capital may possibly be disguised as debt. But the use of a hybrid type of financing does not inevitably mean that hidden equity capital is present. Nor is hybrid financing the only form which hidden capitalisation can take.

12. A description of various indications that hidden capitalisation may be present is contained in paragraphs 75 and 76 below. One of these should be mentioned at this stage however since the way in which it is very often described – *i.e.* as "thin capitalisation" – is often loosely used to describe the whole range of forms of hidden equity capitalisation, and is indeed, for brevity, so used in the title and frequently in the remainder of the body of this report. An indication of the possible presence of hidden equity capitalisation

is a high proportion of debt to equity as a feature of the company's capital structure. In such a case the company is sometimes said to have a "high debt/equity ratio". It is not at all clear what relationship between debt and equity should be taken as the norm in deciding in any particular instance whether a company's debt is high in relation to its equity capital, but a high debt/equity ratio may be an indication of an effort to achieve tax advantages by a disproportionate use of debt. On the other hand, it may well be the consequence of decisions taken for purely commercial or economic reasons and not to obtain tax advantages. It constitutes therefore merely an indication, not proof, of hidden capitalisation.

13. Because the expression "thin capitalisation" is commonly used in its loose sense it has been so used in this report – *i.e.* to describe the whole range of hidden equity capitalisation. Where the text refers only to the specific phenomenon of a high debt/equity ratio or a high proportion of debt to equity, it uses these words and does not use the term "thin capitalisation".

14. The possibility that tax considerations have been the main factor in influencing the capital structure of a company is perhaps more obvious where the capital is provided by majority shareholders or associated companies in a Group, but there could in some circumstances also be tax advantages for unconnected parties in contributing capital by way of a loan rather than as an equity participation.

15. The mechanism of hidden equity capitalisation may be exploited in a variety of ways by a multinational group. The basic advantage is that, other things being equal, a group consisting of a parent company in one country and a subsidiary in another may pay less tax in total if the profits of the subsidiary are transferred to the parent in the form of interest which is deductible in calculating the subsidiary's taxable profits than they would if the profits were transferred as a non-deductible dividend. The insertion into the group of an intervening holding company in a tax haven may combine this advantage with the deferral, perhaps indefinite, of any liability to tax on the income in the hands of the parent company. Alternatively, the insertion into the parent/subsidiary group of one or more holding companies in a country or series of countries linked by suitable tax treaties may enable the funds available to be transferred as tax free interest to the country where, for the group's purposes, they can be most usefully employed. If it should at some stage become more advantageous for the original profits to be transferred as a dividend, the capital structure may well permit the payment of a very large dividend (notwithstanding that the basic equity capital is very small) and it may be possible for interest payments to be waived at the same time. The mechanism of hidden equity capitalisation can thus be exploited to achieve a maximum of flexibility in the movement of funds within a multinational enterprise at a minimum tax cost to the enterprise as a whole. The tax cost of the various

manoeuvres which are possible will however depend on the way in which the domestic tax and other laws of the countries concerned impinge upon them, and the presence or absence of appropriate relieving provisions in any tax treaties between them. Moreover, if for example the country of the parent exempts dividends from relevant foreign subsidiaries or gives the parent companies credit for underlying tax, it may be more advantageous for the subsidiary's profits to be transferred as a dividend.

16. The transfer of profits in the form of interest may also be achieved by the use of abnormal or excessive rates of interest on funds which have unchallengeably been provided as loans, and this may also be a problem for tax authorities. It is sometimes dealt with by domestic law and also by provisions in tax treaties.

C. *Tax policy aspects*

17. Faced with the fact that the use of loan financing rather than equity financing may have consequences for tax revenue, those concerned with tax policy may have to consider a variety of factors in deciding what, if any, action should be taken in relation to particular cases of the use of loan financing. Some of these factors are detailed briefly below. It is not however the purpose of this description to indicate what importance should be given to each factor or what action should be taken in relation to them. At present, it is clear that they will be given different weights in different countries, and that there is no generally accepted international view about their relative importance or on the approach which should be adopted to the various problems involved:

These facrors are as follows:

i) The possibility that some investors may obtain tax advantages by artificially using loan finance rather than equity finance (for example the deduction of dividends in the form of artificial interest payments in the calculation of taxable profits, or the avoidance in full or in part of economic double taxation) whilst others may not have the same opportunity to obtain such advantages may make it necessary to consider whether the relevant law is adequately equitable between taxpayers or neutral between the choices of action available to them;

ii) The possibility that fiscal advantages gained by such artificial loan financing are increased if an associated lender is subject to tax at lower than normal rates or is exempt from tax (for example, by virtue of being a charity or a superannuation fund in some countries) or is able to offset the tax by reliefs (for example because of unused tax credits) or has no taxable profits (for example, because of the carry forward of losses) may make it necessary to consider whether

the income is adequately taxed in total, taking the payer and recipient together;

iii) The possibility that foreign investors may obtain tax advantages in the country of source by artificially using loan rather than equity financing for associated enterprises may pose questions, for that country, about the adequacy of the total tax charged on the payment (taking into account any tax charged in the recipient's country of residence) and the adequacy of the share of that total tax received by the country of source. A wide variety of situations is possible, even, in the extreme case, double exemption (where for example the country of source exempts the payment from tax completely and for some reason no tax is charged in the country of residence of the recipient). Depending on whether the tax advantages in the source country derive from its domestic law or from a tax treaty, consideration may have to be given in that country to the introduction of amending legislation in the one case or the renegotiation of the treaty in the other;

iv) The possibility that tax advantages gained in the source country by a foreign investor from the artificial use of loan financing may be received through a base company situated in a tax haven may raise similar questions but in a possibly more acute form;

v) In any case where a payment is treated as interest for tax purposes instead of as a dividend as a result of an artificial use of loan finance, and this reduces the share of the total tax which is received by the country of source, that country may legitimately consider whether it is receiving an adequate share of the total tax;

vi) The possibility that the artificial use of loan finance rather than equity finance may benefit a foreign enterprise operating through a subsidiary while it does not benefit such an enterprise operating through a branch or other permanent establishment (because interest paid to another company is deductible while interest paid to the head office of the same enterprise is not deductible except in special cases such as banks) may raise the question whether the law in this context is adequately neutral between subsidiaries and branches;

vii) It is also possible to consider, from the viewpoint of neutrality, whether a foreign parent company which is unable to benefit from an imputation system because the tax credit is confined to domestic shareholders, may not try, by the artificial use of loan finance, to obtain an advantage equivalent to that provided by the operation of an imputation system to a domestic parent company;

viii) The possibility that the capacity to derive tax advantages from the artificial use of loan capital may overbalance the scales against equity capital, and may even in consequence worsen the position of trade creditors in general or undermine the stability of national or international investment, may also need to be taken into consideration by the country concerned.

18. Where foreign investment is concerned, the action, if any, which is taken in the light of these or other relevant considerations by the source country of any relevant payment, may affect the tax revenue of the country of residence of the recipient of the payment. It is appropriate therefore to consider the ways in which tax treaties may be involved.

D. Scope of the report

19. The 1979 Report on "Transfer Pricing and Multinational Enterprises" dealt briefly with thin and hidden capitalisation in paragraphs 183 to 191 inclusive but it dealt with them only briefly because they were not central to the issues with which that section of the Report was primarily concerned. In that section the main problem for consideration was how interest payments should be dealt with – *i.e.* the transfer pricing of loans. Thin or hidden capitalisation rules deal however with a preliminary question – *i.e.* whether or not the payment concerned derives from a loan. This preliminary question was left for possible detailed treatment at some later date. The purpose of this report is to clarify some of the main issues involved. It does not seek to define for international purposes acceptable proportions of debt to equity capital. Still less does it seek to harmonise the domestic laws of OECD member countries in the context of thin or hidden capitalisation. Its purpose is simply to consider the elements of these phenomena, to study the international effects of the varying national approaches to them, to note how the relevant national legislation may be affected by tax treaties (in particular those adopting the provisions of the OECD Model Convention) and to study how far unjustifiable juridical or economic double taxation may be relieved, and how bilateral treaties might be drafted so as to avoid such double taxation.

II. COUNTRY PRACTICES

20. This section examines briefly the ways in which the domestic legislation of member countries deals with the problems arising from thin or hidden capitalisation or other situations facilitating the transfer of profit under the guise of interest. Few countries, however, have a comprehensive set of rules or practices in this field.

21. As already indicated, in normal circumstances there is usually no difficulty about accepting that a payment which is ostensibly interest is in fact

what it claims to be. But in some circumstances tax authorities feel obliged to question whether the form of the payment reflects its true nature. In some countries therefore there are specific rules either to deem certain interest to be a distribution of profit or to deem the relevant capital to be an equity contribution and not a loan. These rules normally apply only or mainly in the context of enterprises making payments to foreign associated enterprises.

A. *Excessive payments of interest*

22. Where a payment between associated enterprises is unchallengeably interest but the rate of interest charged is higher than the arm's length rate, the question of thin capitalisation does not in strictness arise but the situation is one in which it may be possible to regard the excess interest as effectively a transfer of profit (see Article 9 and Article 11(6) of the Model). Some countries therefore, in addition to refusing a deduction for the excess interest in such cases, would also treat it as a dividend. But this is not a universal practice.

B. *Hybrid financing*

23. Where the nature of the financing is, on the face of it, not clearly either debt or equity, rules may be necessary to decide the issue. Such cases of "hybrid financing" may include participating loans (*i.e.* loans where the interest payable depends in whole or in part on the profits of the borrowing enterprise) or convertible loans (*i.e.* loans which can at some stage entitle the lender to exchange his right to interest for a right to a share in profits) or in some cases sleeping partnerships, or securities where either the right of ownership or the rights attaching to the securities themselves are closely connected with the ownership of shares in the same company. Country practice is not uniform. Participating loans are sometimes, but not usually, treated as equity contributions. Convertible bonds are usually treated as loan capital until they are actually converted but in some cases are automatically treated as equity. Sleeping partners may or may not be treated as shareholders.

24. Rules which have been introduced to treat interest arising from hybrid financing as a distribution of profit have, moreover, sometimes themselves been artificially exploited to give either debtor or creditor a tax advantage, creating a necessity for additional, often complex legislation.[1]

C. *Approaches to the treatment of interest as a distribution of profit*

25. Where the nature of the financing is ostensibly debt and even where the rate of interest is not excessive and the nature of the financing is not hybrid, the laws in some countries, however, treat interest paid as a distribution of profit for tax purposes, under certain conditions, as a consequence of

approaching the matter in one or other of a variety of ways. In the use of these approaches the emphasis on different factors or combinations of factors often varies from country to country.

i) *General anti-abuse approach – arm's length principle*

The basis of many of these approaches is to look at the terms and nature of the contribution and the circumstances in which it has been made and to decide, in the light of all the facts and circumstances, whether the real nature of the contribution is debt or equity. Some countries apply particular rules in this connection. Others would use more general rules if these are available, such as general anti-avoidance legislation, provisions against "abuse of law", provisions allowing the substitution of substance for form, or enabling abnormal acts of management to be disregarded. Another example of this kind of approach may be described as an arm's length approach. Under this the decision is based on the size of the loan which would have been made in the arm's length situation. The underlying thought is that if the loan exceeds what would have been lent in the arm's length situation then the lender must be taken to have an interest in the profitability of the enterprise and his loan, or at any rate the excess of it over the arm's length amount, must be taken to be effectively designed to procure a share in the profits. Some countries in fact employ this particular kind of approach. Others think that it could be used in appropriate circumstances. A high debt/equity ratio would clearly be one factor to be taken into account in using any of these approaches but would not necessarily be the deciding factor. It does not appear that such approaches have been used very extensively in practice as a basis for treating interest as a distribution for tax purposes. The main difficulty in using any of these approaches is the absence of any clear guidelines as to what are the practices adopted by independent parties, and thus the difficulty of devising any consistent practice (where the parties to a suspected artificial use of loan rather than equity capital are in fact at arm's length, then evidence as to what is normal between other parties at arm's length may carry little weight in any case);

ii) *Fixed ratio approach*

In an effort presumably to overcome these difficulties some countries have adopted what may perhaps be described as a "fixed ratio" approach. Under this, if the debtor company's total debt exceeds a certain proportion of its equity capital, then the interest on the loan or the interest on the excess of the loan over the approved proportion is automatically disallowed or treated as a dividend. A few countries

employ such a fixed ratio in relation to associated enterprises, usually in fairly restricted circumstances, as the sole determinant of the issue. Others use it as a safe haven rule, giving the taxpayer the option of showing that the relevant company's own debt/equity ratio is an arm's length ratio or is otherwise acceptable.

III. RELEVANCE OF TAX TREATIES

A. *The problems stated*

General

26. When, in seeking to counter any tax advantages which the taxpayer may derive from thin or hidden capitalisation, or to protect the revenue against tax loss from these phenomena, tax law or practice treats a *prima facie* payment of interest as a dividend, the consequence of this treatment is usually to deprive the payer of a deduction for the payment and possibly also to apply, in connection with the payment, the rules which deal with dividends instead of those which deal with interest. Where the payment is to a non-resident the question then arises of how this adjustment is affected by any relevant tax treaty. Whether any particular bilateral tax treaty affects the issue will of course depend on the terms of that treaty. In the following paragraphs this report considers the questions which arise under treaties using the provisions of the 1977 OECD Model, with occasional reference to provisions which, though not in the Model, may in fact appear in a number of bilateral treaties. A number of articles of the Model may be of relevance and each of them is considered in turn.

Article 9 of the Model – arm's length principle

27. Article 9(1), in the case of associated companies where "conditions are made or imposed between the two enterprises in their commercial or financial relations which differ from those which would be made between independent enterprises" allows "any profits which would, but for those conditions, have accrued to one of the enterprises, but by reason of those conditions have not so accrued" to be "included in the profits of that enterprise and taxed accordingly". The relevance and application of Article 9 in this context raises a number of complex issues. There are four main questions.

28. The first is whether Article 9 itself provides any rules to decide whether a payment which is *prima facie* interest should be treated as a distribution of profit, *i.e.* whether under this Article it is possible to deem the nature of the payment to be something other than interest. The Article is concerned with

the adjustment of profits which have ostensibly arisen to one person but which, in the arm's length situation, would have arisen to another. It is not in terms concerned with the adjustment of distributions of those profits, or the definition of interest and distributions. The basic question seems to be therefore whether, in the arm's length situation, the interest which is deemed to have been a distribution of profit would have been a profit of the ostensible debtor, and, if so, whether Article 9 is apt to allow it to be attributed to him. Article 9 is clearly applicable in deciding the amount of any payment which should be regarded as deductible in arriving at the profits of one or other associated person, and thus in deciding the rate of interest which should be allowed in calculating the amount of the relevant deduction for the payment in arriving at the debtor's taxable profits. The question is whether part or all of the payment can be disallowed as a deduction under Article 9 on the grounds that, in the arm's length situation, it would have been a distribution of profit and thus not a deductible expense. An extension of this question is whether the disallowed payment can then be treated in all other respects as a distribution.

29. On the assumption that Article 9(1) does apply there is a further question as to how it applies – *i.e.* does it limit any adjustment made under domestic thin capitalisation rules to the amount necessary to bring the relevant taxable profits to the "arm's length" profit. In this context it is relevant to consider whether Article 9(1) is:

a) Restrictive or limitative in its scope (in the sense that it prohibits adjustments of profits in circumstances which are not strictly in accordance with the conditions which it enumerates – *e.g.* prohibits the adjustment of profits to an amount exceeding the arm's length amount); or is

b) Illustrative or exemplary (in the sense that it tends only to provide a "conventional" or "treaty" framework for adjustment of profits, and would not prevent a country from making, in accordance with its domestic law, an adjustment to the taxable profit which would bring it to an amount exceeding that which would correspond with the arm's length profit).

30. The "illustrative" interpretation would, it has been suggested, enable a country to make adjustments to profits on the basis of its domestic legislation without having to demonstrate that the conditions of Article 9 were being complied with, provided that it was clearly understood that the country would adjust only the profits of its residents and that the adjustments would not be contrary to any other express provision of the relevant tax treaty.

31. If, in principle, a deduction can be refused under Article 9(1) on the grounds that the payment would be a distribution if in similar circumstances

it was paid to a person at arm's length, there is nevertheless a third question. This is whether, in applying Article 9, the tax authority

a) has to be governed in deciding on the nature of the payment by other definitions of dividends and interest contained in the Model, *i.e.* those in Articles 10 and 11 respectively; or

b) may, under Article 3(2) of the Model apply its own domestic rules. (Article 3(2) provides that "As regards the application of the Convention by a Contracting State, any term not defined therein shall, unless the context otherwise requires, have the meaning which it has under the law of that State concerning the taxes to which the Convention applies").

32. The fourth question in relation to Article 9 is, assuming that the Article does apply, what practical guidelines or standards are available to assist in the application of whatever interpretation of Article 9 is accepted.

Articles 10 and 11 of the Model

33. The Model defines "dividends" and "interest" in Articles 10 and 11 respectively. A basic question is therefore whether those definitions require payments which are *prima facie* interest to be treated as interest even if the domestic thin capitalisation rules of the country of source treat them as dividends.

34. These definitions are specific to the particular Articles – *i.e.* the term "dividends" is defined by Article 10 as it is used in Article 10 and the term "interest" is defined in Article 11 as it is used in Article 11. A preliminary question is therefore whether the definitions apply outside the Articles in which they appear.

35. The term "dividends" as used in Article 10 is defined by Article 10(3) as "income from shares, 'jouissance' shares or 'jouissance' rights, mining shares, founders' shares or other rights, not being debt-claims, participating in profits, as well as income from other corporate rights which is subjected to the same taxation treatment as income from shares by the laws of the State of which the company making the distribution is a resident". The phrase "not being debt-claims" has raised the question whether income from something which purports to be a debt claim is precluded by Article 10 from being treated as a dividend. If it is not, a further question arises, *viz.* whether the income arises from a "corporate right".

36. The Commentary on Article 10 envisages, however, it has been argued, that disguised distributions of profit which are treated as dividends by the State of which the paying company is a resident, may be included as dividends (see paragraph 27 of the Commentary which says explicitly that payments

which are regarded as dividends may include, *inter alia,* disguised distributions of profits). The Commentary also, it has been argued, recognises (in paragraph 15 d) – which, however, is concerned with the meaning of the term "capital" rather than with what is meant by any particular type of capital) that interest may be treated as a dividend. Paragraph 15 d) says that "when a loan or other contribution to the company does not, strictly speaking, come as capital under company law but when, on the basis of internal law or practice ('thin capitalisation' or assimilation of a loan to share capital) the income derived in respect thereof is treated as dividend under Article 10, the value of such loan or contribution is also to be taken as 'capital' within the meaning of subparagraph 2 *a*) of the Article".

37. The term "interest" as used in Article 11 is defined in Article 11(3) as "income from debt-claims of every kind, whether or not secured by mortgage and whether or not carrying a right to participate in the debtor's profits, and in particular, income from government securities and income from bonds or debentures". It has been argued that the phrase "whether or not carrying a right to participate in the debtor's profits" prevents the interest on participating bonds and other interest closely related to the company's profitability from being treated as a dividend under the Convention even though it may be treated as a dividend under the domestic thin capitalisation rules of the country of source.

38. The Commentary on Article 11 elaborates this phrase as follows: "Debt claims, and bonds and debentures in particular, which carry a right to participate in the debtor's profits are nonetheless regarded as loans if the contract by its general character clearly evidences a loan at interest. In the contrary case, where the participation in profits rests upon the provision of funds that is subject to the hazards of the enterprise's business, the operation is not in the nature of a loan and Article 11 does not apply".

39. Article 10 and Article 11 are, however, mainly concerned with the tax treatment of recipients of dividends or interest by the country of source. They do not, directly at any rate, deal with the question of deductibility [which is explicitly dealt with in Article 24(5)]. They do, nevertheless, where interest is treated as a dividend in the source country for the purpose of calculating the paying company's profits, pose two questions. One is how the payment should be treated in the source country for the purposes of that country's tax on the recipient – some countries would treat it in all respects as a dividend for this purpose; others might merely disallow it as a deduction while continuing to treat it in every other way as interest. The other is whether the recipient's country of residence is obliged to accept the treatment as a dividend and give relief accordingly, *e.g.* by way of credit for the dividend rate of withholding tax, or by way of relief under a special "parent/subsidiary regime".

40. Paragraph 6 of Article 11 provides that "Where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the interest, having regard to the debt-claim for which it is paid, exceeds the amount which would have been agreed :upon by the payer and the beneficial owner in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In such case, the excess part of the payments shall remain taxable according to the laws of each Contracting State, due regard being had to the other provisions of this Convention". This paragraph therefore raises the question of whether or to what extent it coincides or conflicts with Article 9 of the Model where interest is paid between associated persons, and especially in cases affected by rules dealing with thin capitalisation.

Article 23 of the Model (with particular reference to parent companies and other substantial shareholders)

41. It may be important in applying under a bilateral treaty the equivalent of Article 23 of the Model, to decide whether or not a payment of interest which has been disallowed as a deduction and perhaps treated in all other respects as a dividend by the source country is to be regarded as interest or as a dividend by the country of residence of the recipient. As mentioned earlier, this could be important for one of two reasons – either because the rate of source country withholding tax which is creditable may differ according to whether the payment is treated as interest or as a dividend, or because of the possibility that, as a dividend, the payment may attract relief under a "parent/subsidiary regime". Article 23 of the Model does not provide any guidance in the matter.

42. Article 23 of the Model in fact does not provide for any special relief for dividends paid by a subsidiary company to its parent company. But paragraphs 49 to 54 inclusive of the Commentary on that Article indicate that Contracting States are free to choose their own methods of providing such a relief, and many do, either unilaterally or in accordance with bilateral treaties. The relief may take the form of credit for underlying tax (indirect credit) or it may take the form of complete exemption of the dividend (where in the case of other dividends credit would be given for tax deducted from it). The first form is likely to be used by countries generally operating the credit system of relief for double taxation while the second is likely to be used by countries generally operating the exemption system for this purpose. A third form is to assimilate the treatment of a dividend from a foreign subsidiary to that of a dividend from a domestic subsidiary. In countries where dividends from domestic subsidiaries are exempted this may, in effect, be indistinguishable from the

second form. What constitutes a “parent/subsidiary relationship” for this purpose may however vary from country to country.

Article 24 of the Model (non-discrimination)

43. A further question is whether the non-discrimination Article (Article 24) may prevent the treatment of interest as a distribution of profit under thin capitalisation or hidden capitalisation rules if the treatment applies only in respect of payments to non-residents. Paragraphs 5 and 6 of Article 24 may be of relevance in answering this question.

44. Paragraph 5 of Article 24 provides that “Except where the provisions of paragraph 1 of Article 9, paragraph 6 of Article 11, or paragraph 4 of Article 12, apply, interest, royalties and other disbursements paid by an enterprise of a Contracting State to a resident of the other Contracting State shall, for the purpose of determining the taxable profits of such enterprise, be deductible under the same conditions as if they had been paid to a resident of the first-mentioned State”. If paragraph 1 of Article 9 applies to enable interest to be treated as a dividend under thin capitalisation rules, this paragraph accordingly appears not to prevent it.

45. Paragraph 6 of Article 11 allows an excessive payment of interest to be reduced for the purposes of the Article in certain circumstances to the amount which would have been paid if the parties to the transaction had been at arm’s length. (The relationship between this arm’s length provision in Article 11(6) and the main arm’s length rule in Article 9 is discussed in a later paragraph of this report). The excess amount of the interest remains taxable according to the laws of the two Contracting States “due regard being had to the other provisions of the Convention”. It has been argued that some, if not all, of an interest payment treated as a dividend under thin capitalisation rules could thus remain liable to be so treated notwithstanding paragraph 5 of Article 24. The Commentary on this paragraph does not, however, throw any further light on this aspect.

46. Paragraph 6 of Article 24 provides that “Enterprises of a Contracting State, the capital of which is wholly or partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of the first-mentioned State are or may be subjected”. On the face of it this provision might, it has been argued, prevent the operation of rules which disallow the deduction of interest paid to non-resident shareholders of companies controlled by non-residents if under similar circumstances, the interest would

be deductible for a company which was not controlled by non-residents. The Commentary on this paragraph does not deal with the point.

Article 25 of the Model (mutual agreement procedure)

47. If one country treats an interest payment as a dividend and the treaty partner country continues to regard it as interest, the question arises of whether it may be possible to arrive at a solution to any consequent problems of double taxation under Article 25 (mutual agreement between tax authorities).

B. Consideration of the effect of tax treaties

Article 9 of the Model – Impact in general

48. It was generally accepted by the Committee that Article 9 of the Model is relevant to the question of thin capitalisation. It was accepted that the Article itself did not draw a clear line in positive terms between what was interest and what was a distribution of profit. It was agreed however that the Article is relevant not only in determining whether the rate of the interest concerned is an arm's length rate but also in determining whether a *prima facie* loan can be regarded as a loan or should be regarded as some other kind of payment (depending on whether or to what extent the funds would have been contributed as a loan in the arm's length situation).

49. The basis for this view is as follows. Article 9(1) allows the tax authority of a Contracting State to adjust the taxable profit of an enterprise of that State to include profits which have not accrued to it in its accounts but which would have accrued to it in the arm's length situation. Thus, if profits have not accrued to the enterprise in its accounts because it has paid what it has described as interest to an associated enterprise and this payment has been deducted in arriving at the profits shown in the accounts but, in the arm's length situation, the payment would not have been deductible, then, in adjusting the taxable profits of the enterprise to include the payment, the tax authority would be acting in conformity with Article 9(1). Provided therefore that the re-categorisation of interest as a distribution of profit under domestic thin capitalisation rules has the effect of including in the profits of a domestic enterprise only profit which would have accrued to it in the arm's length situation there is nothing in Article 9 to prevent operation of those rules.

Article 9 – Whether restrictive or illustrative?

50. If however the effect of such re-categorisation goes beyond this and includes more than the arm's length profit in the taxable profit of the domestic enterprise, the answer to the question whether Article 9 may inhibit

the operation of the relevant thin capitalisation rules may depend on whether Article 9 is held to be "restrictive" or merely "illustrative" in its scope. There is some diversity of opinion about this. One group of countries takes the view that where a provision similar to Article 9(1) is included in the convention, it simply prohibits an adjustment of the profits of the resident company to any amount exceeding the arm's length profit. Another group of countries takes the view that while Article 9(1) permits the adjustment of profits up to the arm's length amount it does not go beyond that to prohibit the taxation of a higher amount in appropriate circumstances. A third group, while accepting that there is an absence of such a prohibition in the language used, nevertheless takes the view that the practical effect of Article 9 must often be to impose such a restraint. They point out that the other Contracting State is not obliged to accept an adjustment which is not in conformity with the arm's length principle and would be entitled to include, in its own tax charge on the profits of its own resident associated entity, the portion of the adjustment in the paying country which exceeds the arm's length profit in that country. It may do this in order to bring the profits of its own entity up to the arm's length profit in its own country, with the result that, under Article 9(2), the associated company in the other country whose profits were adjusted in the first place would be able to initiate a claim to a corresponding adjustment to reduce its profits for tax purposes to the arm's length amount. The Committee generally agreed that, in principle, the application of rules designed to deal with thin capitalisation ought not normally to increase the taxable profits of the relevant domestic enterprise to any amount greater than the arm's length profit, that this principle should be followed in applying existing tax treaties, in particular in the operation of the mutual agreement procedure under the equivalent of Article 25 of the Model, and that it should also be followed in the negotiation of bilateral treaties in the future.

Article 9 – Whether definitions in Articles 10 and 11 apply

51. If, in seeking to apply Article 9, it was thought necessary to decide whether a payment should be regarded as a dividend or as interest, the fact that Article 9 does not itself provide a definition of either term raises the question whether it would be appropriate to apply the definitions in Articles 10 and 11, with the result that, for example, a payment which was clearly interest as defined in Article 11(3) would have to be treated as interest for the purposes of Article 9, notwithstanding that domestic thin capitalisation rules treated it as a distribution of profit. The fact that these Articles specifically define "dividends" as the term is used in Article 10 and "interest" as the term is used in Article 11 may be thought to imply that the definition in each of these two Articles does not apply in relation to any other Article of the Model. However, under the legal practice of some countries this would not prevent

the definitions from being used in relation to other Articles if definitions were required for the purpose of interpreting those other Articles. Under such legal systems, indeed, the definitions in Articles 10 and 11 might well be preferred to other definitions, on the basis that Articles 10 and 11, being Articles of the treaty in question, provided definitions in the closest relevant context. It may be important in consequence to consider these definitions, in thin capitalisation cases, where Article 9 is concerned, as well as where Articles 10 or 11 themselves are concerned. The basic question in relation to Article 9 would however be not so much whether an ostensible payment of interest was a dividend as such, but whether it was a part of the arm's length profit of the paying entity.

52. Where the Contracting States would not be obliged under their domestic law to use the definitions in their equivalents of Articles 10 and 11 of the Model in the application of other provisions of their bilateral treaty, it seems that they would be under no obligation to follow such definitions in deciding whether a payment (and the amount of any deduction allowable for it) could be adjusted under Article 9. Indeed it seems likely that the Contracting States would be able to use the definitions of interest and dividends in the relevant provisions of their domestic law and thus, if appropriate, those provided by their rules about thin capitalisation (whether Article 3(2) would help them in this context is not clear: there is no use of the term "interest" in Article 9 of the Model).

53. Where the law of one or other of the Contracting States would regard the definitions in Articles 10 and 11 as valid in deciding whether or not the amount of a deduction for such a payment could be adjusted under Article 9, it may be necessary for the Contracting States to vary the wording of the equivalent of Article 11(3) in their bilateral treaty so as to protect the operation of their thin capitalisation rules, and to ensure, if appropriate, that payments of interest which are treated as dividends under those rules are treated as dividends for the purposes of those corresponding to articles 10 and 11 of the Model and are also treated as dividends for the purposes of other provisions in the treaty such as those corresponding to Articles 9 and 23. Indeed this may be the most satisfactory course for them to follow in the circumstances.

54. On the other hand, the Model does not specifically require that any payment defined as interest must *ipso facto* be deducted in arriving at the taxable profits of the payer. Although the Model does provide [in Article 24(5)] that, in certain circumstances, if interest is deductible when it is paid to a domestic resident it must also be deductible when paid to a resident of the other Contracting State, this leaves open the question whether the interest would be deductible in the first place. The answer to this question should be the same where the interest is paid to a resident as it is where the interest is paid to a non-resident. However, unless the payment is capable of being

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

regarded as an expense of earning the relevant profits there seems to be no necessary reason why it should be deducted in arriving at the taxable amount of those profits. If in fact the payment is not an expense of earning the profits but is a distribution of profit, it may be arguable therefore that it may be added back to the taxable profits of the paying entity notwithstanding that it is defined as interest and may indeed be treated in the same way as interest under Article 11. In such a case the automatic application of the definitions in Articles 10 and 11 to the remainder of the treaty may not create difficulty where the domestic thin capitalisation rules of the Contracting State are consistent with Article 9 of the Model.

Article 9 – Practical Guidelines

55. The question of what practical guidelines and standards are available to assist in the application of Article 9 is dealt with in more detail in Section IV below.

Articles 10 and 11 of the Model

56. In considering the terms of the definitions of dividends and interest in Articles 10 and 11 of the Model in this context, the following points were made. The majority opinion was that the specific exclusion of income from debt-claims from the definition of "dividends" in Article 10(3) did prohibit the treatment of interest as dividends under thin capitalisation rules, except where the relevant payments could be regarded as "income from other corporate rights which is subjected to the same taxation treatment as income from shares" by the laws of the relevant country. There seem to be two possible but divergent interpretations of this phrase. A narrow interpretation, based on the fact that interest is defined in Article 11(3) as including income from debt-claims of every kind, would exclude income arising from a debtor-creditor relationship as well as income from all other financial relationships not clearly constituting a participation in the membership of a corporate body. On this view the reference in Article 10(3) to "other corporate rights" is to rights which are not themselves debt-claims (rights which are debt-claims having already been excluded, on this view, from the scope of the definition by the reference to shares, etc. "not being debt-claims"). A broader interpretation would include income arising from any financial relationship which is treated as constituting a corporate right under national law. In fact it might be said that the reference to income from such other corporate rights would make no sense if it was limited to income from shares or other corporate rights already covered in other parts of the definition, and it seems clear also (*e.g.* from paragraph 15(d) of the Commentary on Article 10) that the Model was not designed to frustrate domestic rules for the countering of abusive

arrangements such as might be the effect of thin capitalisation. In deciding this question therefore the majority of the Committee felt that it would in certain cases be appropriate to regard as a dividend a payment which had been treated as a dividend under national rules dealing with thin or hidden capitalisation.

57. In seeking to define the circumstances in which it would be appropriate to do this, the Committee was guided by that part of the Commentary on Article 11 which indicates (see para. 37 above) that debt-claims which carry a right to participate in the debtor's profits are regarded as loans if the contract, by its general character, clearly evidences an interest-bearing loan but, where the participation in profits rests on the provision of funds that is subject to the hazards of the enterprise's business, the operation is not in the nature of a loan. The conclusion reached therefore was that Articles 10 and 11 of the Model did not prevent the treatment of interest as dividends under national rules dealing with thin or hidden capitalisation where the contributor of the loan effectively shared the risks of the company's business.

58. The fact that the contributor of the loan does share the risks of the borrowing company's business will normally have to be established by reference to all the relevant circumstances. The absence of any legal obligations to pay other debts of the company will not necessarily dispose of the matter. A strong risk that a major creditor may not be able to recover his loan may, from the economic point of view, mean in certain circumstances that, effectively, he shares just as much in the risks of the debtor's business as if he was a shareholder. An indication that the risks of the business may perhaps be regarded as effectively shared by the creditor in this way may be derived from the fact that the loan very heavily outweighs any other contribution of capital to the debtor company (or replaces a substantial proportion of other capital which has been lost) and is substantially unmatched by redeemable assets. This may not be a sufficient indication under the laws of every country – it might be necessary, for example, to show that the creditor would participate in any profits of the business or that the repayment of the loan was subordinated to claims of other creditors or to the payment of dividends, or that the level or payment of interest would depend on the profits, or that there were no fixed provisions for repayment of the loan by a definite date. However, there could well be other indications that the creditor effectively shared in the risks of the enterprise's business.

59. In the light of the inclusion of income from participating bonds in the definition of interest in Article 11(3), it was also agreed that interest on participating bonds was not normally to be regarded as a dividend, and it was further agreed that interest on convertible bonds was not normally to be regarded as a dividend until such time as the bonds were actually converted into shares.

60. It was agreed, however, that, in order to remove any danger of ambiguity or overlap between the types of income dealt with respectively by Articles 10 and 11, it should be made clear that the term "interest" as used in Article 11 did not include items of income which were dealt with under Article 10. It was also agreed that it would be desirable to remove the possible ambiguity in Article 10(3) which may support the narrow interpretation described in paragraph 56 above.

Article 9(1) and Article 11(6) of the Model

61. It was generally agreed that Article 9(1) and Article 11(6) may both apply in certain circumstances to allow a tax authority to adjust the rate of interest to that which would have been paid between independent parties and that, in this respect, both provisions had the same effect. It was also agreed, however, that Article 11(6) permits only the adjustment of the interest rates and not the reclassification of the loan in such a way as to give it the character of a contribution to equity capital. For such an adjustment to be possible under Article 11(6) it would be necessary to substitute other words for the phrase "having regard to the debt claim for which it is paid". (Article 11(6) excludes, from the operation of Article 11, interest which "having regard to the debt-claim for which it is paid, exceeds the amount which would have been agreed upon" in the arm's length situation. In some bilateral treaties the Contracting States have, in fact, in order to overcome this difficulty, excluded instead interest which "for whatever reason" exceeds the amount which would have been agreed upon in the arm's length situation). It was agreed, nevertheless, that Article 11(6) could affect not only the recipient but also the payer of excessive interest, and, if the laws of the source country permitted, the excess amount could be disallowed as a deduction, due regard being had to the other provisions of the Convention.

62. As Article 11(6) is drafted in the Model moreover it creates some possibility of conflict with Article 9, even if the more precise definition of interest in Article 11(3) is not regarded as conclusive for the purposes of Article 9 – the amount of interest might be adjusted under Article 9 but it might nevertheless still be argued that the unadjusted amount should be treated as interest for the purposes of withholding tax etc. under Article 11.

Article 23 of the Model (parent/subsidiary regime, etc.)

63. Since Article 23 of the Model gives no guidance as to whether interest treated as a dividend under thin capitalisation rules in the country of source should also be treated as a dividend in the country of residence of the recipient, the problem ordinarily has to be solved by reference to the particular

terms of any relevant bilateral treaty or by the domestic law of the country of receipt.

64. Where a bilateral treaty provides reliefs under an Article equivalent to Article 23 of the Model, the Committee agreed that, in the case of interest treated as a dividend under the partner country's thin capitalisation rules, the country of residence of the lender would, in certain circumstances, clearly be obliged by the treaty to give these reliefs as if the payment was in fact a dividend (*e.g.* credit for withholding tax suffered at the rate applicable to a dividend, and, where the bilateral treaty provides it, relief under a parent/subsidiary regime) if the text of the Article in question gave the reliefs in respect of "income defined as dividends in Article 10" or even as "items of income dealt with in Article 10". This obligation would arise to the extent that the relevant rules conformed to the provisions of Articles 9, 10 and 11 of the Model as interpreted in the previous paragraphs of this Report (*i.e.* if the contributor of the loan effectively shared the risks of the borrowing company's business, and the profit as adjusted in consequence did not exceed the profit which would have been made at arm's length).

65. If the text of the relevant Article simply gave the relief in respect of "dividends" without referring to Article 10, and if there was no generally applicable definition of dividends elsewhere in the relevant bilateral treaty, the meaning of "dividends" for this purpose would depend on the domestic law of the country of residence of the lender, which would not necessarily accept any extended definition of "dividends" provided by the thin capitalisation rules of the country of the paying company. Nevertheless, the Committee felt that the country of the lender ought to give the reliefs due under the relevant Article, if need be by way of the mutual agreement procedure, in three situations where adjustments had been made under thin capitalisation rules: *viz*

a) Where the interest was treated as a dividend in the country of source by the operation of Article 9 – in such a case the country of residence of the recipient would, if it agreed that the original treatment of the payment as a dividend was justified, be obliged under Article 9(2) to make a corresponding adjustment and it would be in accordance with the spirit of this obligation to accept the treatment of the payment as a dividend for the purposes of its own tax. Logically this rule should also apply to payments considered by the source country under Article 11(6) not to be interest (because excessive) and thus treated as a dividend;

b) Where the country of residence of the lender operated similar thin capitalisation rules and would treat the payment as a dividend in a

reciprocal situation, *i.e.* if the payment were made by a company in its territory to a shareholder in the partner country;

c) Where in any other case the country of residence of the lender recognised that it was proper to treat the interest as a dividend.

Article 24 of the Model (non-discrimination)

66. *a)* The Committee agreed that, if interest is treated as a dividend under thin capitalisation rules in conformity with Article 9(1) or Article 11(6), then Article 24(5) does not operate to prohibit that treatment. If, however, the treatment is not in conformity with these rules and at the same time the thin capitalisation rules apply only where the creditor is non-resident, then Article 24(5) would prevent interest being treated as a dividend under the rules;

b) So far as concerns Article 24(6), the Committee took the view that this paragraph is relevant to thin capitalisation but is worded in very general terms and aims broadly at preventing "tax protectionism" – *i.e.* the deterrence by tax measures of investment from outside the country. It had not, the Committee considered, been designed to deal with measures introduced to prevent the transfer of profits in the guise of interest. Because it is in such general terms, the Committee concluded, it must take second place to more specific provisions in the treaty. Thus Article 24(5) [referring to Article 9(1) and Article 11(6)] takes precedence over it in relation to the deduction of interest;

c) The Committee noted that, notwithstanding the provision of Article 24 of the Model, France has in this context, reserved the possibility of applying the provisions in its domestic laws relative to the deduction of interest paid by a French company to a foreign parent company.

Article 25 of the Model (mutual agreement procedure)

67. The Committee agreed that Article 25 provided an appropriate framework for the solution of problems which arose out of the application of measures dealing with thin or hidden capitalisation and which produced taxation contrary to the letter or spirit of the Convention including otherwise unrelievable double taxation, whether juridical or economic.

68. It is necessary, however, to distinguish between the three different categories of cases dealt with by Article 25. Article 25 provides, in brief, as follows:

i) Paragraphs 1 and 2 provide for the elimination, by mutual agreement between the competent tax authorities of the Contracting States, of taxation which is not in accordance with the Convention, such as

double taxation which might arise from different approaches by the two Contracting States to the interpretation of the Convention in particular cases;

ii) Paragraph 3 of the Article provides, in its first sentence, for the resolution by mutual agreement between those competent authorities of general doubts or difficulties arising as to the interpretation of application of the Convention;

iii) Paragraph 3, second sentence, authorises the competent authorities to consult together for the elimination of double taxation in cases not provided for in the Convention.

69. The Committee agreed that:

a) In relation to the first category – taxation in individual cases – the text of Article 25 enabled adjustments to be made by mutual agreement to eliminate double taxation not in accordance with the Convention in the same way where thin capitalisation rules were in point as in other types of cases, provided that the relevant adjustment was based on the application of a substantive provision of the Convention, for example, the application of Article 9, Article 11(6), Article 23, or Article 24(5) of the Model;

b) In relation to the second category – general problems of interpretation or application of the Convention – Article 25 enabled the competent authorities to endeavour to resolve by mutual agreement, for example, the general problem of whether interest which was treated as a dividend under thin capitalisation rules in a country (being the country of source) could qualify for reliefs under a parent/subsidiary regime granted by the other country (being the country of residence of the recipient) when these reliefs were provided by the relevant bilateral treaty;

c) The third category of relief providable under Article 25 (*i.e.* relief for double taxation not otherwise provided by the Convention) offered wide opportunities for the competent authorities to resolve problems arising from the operation of thin capitalisation rules only if the domestic law of the countries concerned (*i.e.* specific legislation, the rules of the constitution or the general principle of the laws) empowered them to relieve double taxation not specifically covered by tax treaties.

IV. PRACTICAL APPLICATION OF ARM'S LENGTH PRINCIPLE IN RELATION TO THIN CAPITALISATION

70. It is clear from what has been said in Section III above that in cases where thin capitalisation rules have international implications it is important that their application should accord with the arm's length principle as delineated in Article 9(1) of the Model Convention. Consideration is therefore given in the following paragraphs to the practical application of this principle in such circumstances. It is recognised however that it is difficult to provide precise guidelines for drafting national legislation on these questions. The comments in the following paragraphs may nevertheless, it is hoped, be helpful in this context.

71. The matter was considered briefly in the 1979 report on "Transfer Pricing and Multinational Enterprises" (paragraphs 183 to 191 inclusive) (referred to hereafter as "the 1979 Report"), and it is pertinent to refer now to what was said then. The 1979 report indicated that thin capitalisation could create problems for tax authorities and described the different ways in which some member countries sought to deal with these problems. It pointed out that the operation of different rules by different countries created a distinct possibility that the same financial transaction could be treated as a loan by one country and as an equity contribution by another. This, it commented, was an unsatisfactory situation which it would be desirable to improve. The report posed the question whether, in time, member countries could move in directions which would achieve such an improvement by effectively harmonising their domestic legislation in this field. But it did not provide any but the most tentative guidelines as to how this might be done. Its Recommendations are contained in paragraph 191 which it is appropriate to quote here in full. The paragraph reads:

> 191. It is generally recommended that a flexible approach should be adopted in which the special conditions of each individual case would be considered, although it is realised that such an approach would call for sufficient qualified staff to carry out a somewhat sophisticated analysis and could, if cases were numerous, thus raise problems for some tax administrations. A hard and fast debt-equity rule would, however, not be appropriate for the solution of problems raised by the determination of the nature of a financial transaction. Financing practices differ too widely from one country to another, and, within a given country, between different categories of enterprises. Most of the countries whose practices are described in the previous paragraphs, therefore, refer to a number of factors which are of significance in distinguishing a loan from an equity contribution. On the same reasoning, it is considered that a

rule based on the fact that the owner of the shares was non-resident would not be appropriate for general adoption either.

72. As has already been pointed out, the arm's length principle is relevant in deciding whether or not a *prima facie* payment of interest derives from a loan or from an equity contribution because, if more than the arm's length profit on the relevant transaction is charged to tax, economic double taxation may arise as a result. This would create a situation in which Article 9(2) or some similar provision might be invoked to secure a reduction of the tax charged in the first country to tax on the arm's length profit there. More generally, however, the Committee takes the view that, at any rate in cases where fraud or abusive avoidance arrangements are not concerned, it would be inconsistent with the spirit of Article 9 of the Model if the arm's length principle which is expressed in that Article was not followed in answering the question whether or not a *prima facie* payment of interest derives from a loan or from an equity contribution.

73. Article 9 may not however be strictly applicable. If the loan which is being treated as an equity contribution is a loan between ostensibly independent persons, and Article 9 therefore does not apply, as may possibly be the case if the thin capitalisation rules attack abusive arrangements designed to conceal the fact that the real parties to the transaction are associated enterprises, then it is very doubtful whether the tax authorities of the paying entity would be able to adjust the payment, but also very doubtful, if they did adjust it, whether they should be obliged to make any special effort to relieve double taxation arising from the operation of such measures.

74. Where Article 9 is, in terms, applicable, *i.e.* broadly, where the relevant transaction is one between associated persons, it is relevant to consider how far the various methods of deciding whether a payment should be treated for tax purposes as interest or as a dividend, are consistent with the Article. As already indicated, these methods generally follow one or other of two main approaches.

75. The first main approach depends very much on the particular facts and circumstances of each case. The authorities would seek to decide what is the real nature of the payment in the light of reason and the general observation of commercial activity. In such an examination a variety of factors would be relevant including evidence of what happens or could reasonably be expected to happen between independent parties. It could thus be relevant, *inter alia*, that the borrowing enterprise was a company which had a high debt/equity ratio either before the loan was granted or as a result of it, that the loan was designed to finance the long term needs of the borrower, that the loan was contributed proportionately to existing shareholdings or as a condition of such shareholdings, that the loan was designed to improve the financial

situation arising from heavy losses, that the interest payable was dependent on the result of the company's business, that the loan was convertible at some stage into a share of the company's equity, or that the interest exceeded a reasonable commercial return on the money lent. Another relevant factor might be that the payment of interest on the loan or the repayment of the amount lent was subordinated to the rights of other creditors, and yet another might be the absence of fixed provisions for repayment of the loan by a definite date or the presence of provisions making repayment dependent upon the level or timing of profits. The presence of any one of such factors by itself would not necessarily be conclusive evidence, though it might be an important indication, of hidden equity capitalisation, but the presence of several such factors would be more indicative and clearly the indications would be stronger the more such factors were present.

76. In considering these factors the question may be asked whether an independent person would have provided such a high proportion of the capital of the enterprise in the form of a loan. In some cases it could perhaps be shown that no independent person would be satisfied with the fixed interest return envisaged in the relevant transaction, bearing in mind the risk involved and the profit potential of the enterprise, but would require a share in the profits as a condition of providing the funds. Or it might perhaps be shown that no independent person, bearing in mind the poor economic condition of the enterprise, would make a loan to it at all. It may be necessary indeed to adopt an approach comparable to that which a banker would adopt, and to ask whether, considering the borrower's financial and economic condition, an independent bank would have provided the funds as a loan on the terms actually agreed between the parties. Too rigid a reliance on this approach may not however be wholly satisfactory since it is possible that a parent company might have a better understanding of the profit potential of its own subsidiary than would a banker looking at the matter from the outside, and it might in consequence be reasonable to accept (if such was in fact the case) that an independent person who was as fully informed as the parent company might lend where a bank would hesitate to do so. Where it is a question of the supply of additional capital by way of loan it may be appropriate to ask – again looking at the subsidiary's economic situation with a banker's eye – whether in the circumstances an independent person would perhaps lend to protect his original investment, or, on the contrary, would decide to cut his losses.

77. There is a considerable amount of evidence about the forms of financing which are in fact used in particular cases in the open market. But it may sometimes be very difficult to discern what adjustment should be made in any particular case of arrangements between associated enterprises in order to bring those arrangements into line for tax purposes with the arrangements which would be made by independent parties in the relevant circumstances.

This is because a wide range of open market forms of financing may be available and appropriate for any particular type of case, depending to a certain extent on varying market conditions. Nevertheless there may be sufficient general evidence of the ratios between equity and loan prevailing in the market place to indicate any very wide divergence from the normal in any particular case.

78. Much would obviously depend, in the operation of such an approach, on the judgement of the tax authorities in the first place and, in the last resort, on the judgement of the courts or tribunals deciding appeals against the decisions of the tax authorities. Nevertheless, methods of deciding questions which follow from such a facts and circumstances approach are clearly consistent, it seems to the Committee, with the arm's length principle to the extent that they use evidence of transactions between independent persons and apply this evidence in a reasonable manner.

79. Another approach is to deem ostensible payments of interest to be distributions of profit if the debt/equity ratio of the paying company exceeds a fixed ratio. Such a ratio is bound to be arbitrary to some degree, even though it might be fixed by reference to the kind of ratio commonly found in the open market. Where however such a ratio is employed merely as a kind of "safe haven" rule, leaving the relevant company the option of showing that the actual ratio of the company's debt to its equity capital is an arm's length ratio (perhaps, for instance, by demonstrating that it corresponds to the ratio which is characteristic of independent companies in the same kind of business in the same country) then this too could be regarded as compatible with the arm's length principle. It is relevant to point out however that the availability of such an option nevertheless imposes on some taxpayers a burden of proof which may be quite heavy. It is important therefore that any safe haven ratio which is adopted by a tax authority should allow as high as possible a proportion of debt to equity or should be otherwise so flexible as to minimise the number of taxpayers who are obliged to make use of the option. Where, on the other hand, a fixed debt/equity ratio is employed by the tax authorities without allowing such an option, then the majority of countries consider that the results would undoubtedly be inconsistent with the arm's length principle. The lower the ratio of debt to equity permitted by such a rule, and the more rigid the practice followed in applying it, the more serious may be the danger of producing a result which is both inconsistent with the arm's length principle and disadvantageous to the taxpayer. Moreover the lower the ratio the greater may be the risk of economic double taxation and the possibility that the tax authorities of the country of the lender will find it difficult to accept the result and give satisfactory relief from double taxation. Similarly the higher the ratio the greater will be the likelihood of producing a result which unduly favours the taxpayer.

80. Where abusive arrangements are relevant in this context and general anti-evasion or anti-avoidance rules (such as those against "abuse of law" or those substituting substance for form) are invoked to deem interest to be a distribution of profit, it is for consideration whether or not the tax law should require the authorities to ensure that taxation arising from the impact of such measures conforms with the arm's length principle. The Committee however makes no comment on the point.

81. The preceding paragraphs deal with questions relating to the taxation of income and profits. It seems to the Committee that where, in accordance with the arm's length principle, a loan is effectively recategorised as an equity contribution for those purposes, it might *prima facie* be similarly recategorised for the purposes of the taxation of the capital of the company.

V. CONCLUSIONS AND SUGGESTIONS

A. *General*

82. The conclusions of paragraph 191 of the 1979 report still represent the view of the Committee. While the Committee in 1979 generally recommended flexible methods of deciding the question whether a *prima facie* payment of interest should be treated for tax purposes as interest or as a distribution of profit and recommended against using hard and fast debt/equity ratios, or rules based on the fact that the shareholder receiving such interest payments was a non-resident, the 1979 report essentially left member countries to devise and implement whatever rules seemed appropriate to each individual country in these matters. In this, paragraph 191 reflected the absence of any firm international consensus on how thin capitalisation problems should be dealt with.

B. *Summary of conclusions concerning the application and interpretation of tax treaties*

83. The Committee has nevertheless now reached conclusions on a number of points concerning the relationship between tax treaties and domestic rules about thin capitalisation. These are summarised below.

84. As regards Article 9 of the Model, the Committee is of the opinion that:

a) The Article is relevant when countries are applying their domestic rules about thin capitalisation (see paragraph 48);

b) The Article is not only relevant in adjusting the rate of interest, but also, in appropriate circumstances, in determining whether what is presented as a loan should be considered as a contribution to equity capital (see also paragraph 48);

c) The Article does not prevent the application of national rules on thin capitalisation insofar (but only insofar) as their effect is to assimilate the profits of the borrower to an amount corresponding to the profits which would have accrued in an arm's length situation (see paragraph 49).

85. As regards Articles 10 and 11 of the Model, the Committee is of the following opinion:

a) Article 10 deals not only with dividends as such but also with interest on loans insofar as the lender effectively shares the risks run by the company. When interest of this kind is in point Articles 10 and 11 do not prevent the treatment of interest as dividends under the national rules on thin capitalisation of the borrower's country (see paragraph 57);

b) i) In the light of the definition of interest in Article 11(3), interest on participating bonds should not normally be regarded as a dividend,

ii) Interest on convertible bonds should not normally be regarded as a dividend until such time as the bonds are actually converted into shares,

iii) Article 11(6) enables the amount of interest to be corrected but not the recharacterisation of the relevant loan as a contribution to equity capital (see paragraph 59);

c) It is desirable to remove a possible danger of ambiguity or overlap between the types of income dealt with respectively by Articles 10 and 11 (see paragraph 60).

86. As regards Article 23 of the Model and certain additions to that Article which appear in a number of bilateral treaties, the Committee is of the opinion that:

a) When by the application of its national rules about thin capitalisation, the country of the borrower has assimilated a payment of interest to a distribution of profit, the country of the lender would in certain circumstances clearly be obliged under particular bilateral treaties, as the result of a combination of Articles corresponding generally to Articles 10 and 23 of the Model, to give relief for any juridical or economic double taxation of the interest as if the payment was in fact a dividend (such as credit for tax withheld at the source at the rate appropriate to a dividend and, possibly, application of a parent/subsidiary regime) (see paragraph 64);

b) In other cases also (see paragraph 65), the country of the lender ought to give relief for any juridical or economic double taxation of the

interest as if the payment was in fact a dividend, if need be by way of the mutual agreement procedure, in three situations, *viz:*

i) Where the interest has been treated in the country of source as a dividend or distribution of profit under rules which are in accordance with Article 9(1) or Article 11(6) and where the country of the creditor agrees that it has been properly so treated and is prepared to apply a corresponding adjustment as provided for article 9(2),

ii) Where the country of residence of the lender, also having provisions against thin capitalisation, would apply these provisions (*i.e.* would assimilate the payment to a dividend) in a reciprocal situation (*i.e.* when the payment was made in the same circumstances by a company established in its territory to a resident in the other Contracting State),

iii) In all other cases where the country of residence of the lender agrees with the adjustment made by the country of residence of the borrowing company.

87. *a)* As regards Article 24(5) of the Model the Committee came to the conclusion that it follows from the wording of Article 24(5) that the country of the borrower is not prohibited from assimilating interest to dividends under thin capitalisation rules which are consistent with Article 9(1) or Article 11(6). However, if interest is assimilated to dividends under rules which are not consistent with these Articles, and if the rules apply only to non-resident lenders (and not to resident lenders) then Article 24(5) does prohibit such an assimilation [see paragraph 66(a)];

b) As regards Article 24(6) of the Model the Committee came to the conclusion that Article 24(6), though relevant in principle, is worded in such general terms that it must take second place to more specific provisions in the treaty and that Article 24(5) would, in particular, take precedence over it in relation to the deduction of interest [see paragraph 66(b)];

c) France has entered a general reservation on the effect of Article 24 in the context of rules about thin capitalisation [see paragraph 66(c)].

88. As regards Article 25 of the Model, the Committee (see paragraph 69) concluded that:

a) Paragraphs (1) and (2) of Article 25 enable adjustments to be made by mutual agreement in individual cases, to eliminate double taxation not in accordance with the Convention, in the same way where thin capitalisation rules are in point as in other types of cases, provided

that the relevant adjustment is supported by a provision of the Convention corresponding for example to Article 9, Article 11(6), Article 23, or Article 24(5) of the Model;

b) Insofar as paragraph (3) of Article 25 offers the possibility of generally resolving difficulties and doubts encountered in the interpretation or application of the Convention, it enables the Contracting States to endeavour to resolve by mutual agreement the question of whether, and if so under what conditions, interest may be treated as dividends under thin capitalisation rules in the country of the borrower and give rise to relief for double taxation in the country of residence of the lender in the same way as for dividends (for example relief under a parent/subsidiary regime when such relief is provided by the relevant bilateral treaty);

c) In certain circumstances Article 25, which offers the competent authorities of certain countries the possibility to resolve problems of double taxation not foreseen by the convention, may also provide for the possibility to solve problems arising from the operation of thin capitalisation rules.

C. *Final remarks*

89. The Committee emphasises that the application of rules designed to deal with thin capitalisation ought not normally to increase the taxable profits of the relevant domestic enterprise to an amount greater than the profit which would have accrued in the arm's length situation, that this principle should be followed in applying existing tax treaties, in particular, for example, in the operation of the mutual agreement procedure under the equivalent of Article 25 of the Model, that it should also be followed in the negotiation of bilateral treaties in the future, and that it should be taken into account in any future revision of the Model. It should be noted, however, that Germany has certain reservations on the way in which the report uses the "arm's length principle" (see note 2).

90. The Committee urges that national thin capitalisation rules should provide sufficient flexibility to allow the relief of any consequent double taxation where such relief is appropriate, and, further, that where double taxation arises because of a conflict of view between tax authorities about the nature of a *prima facie* payment of interest, or the impact of rules about thin capitalisation, the tax authorities concerned should endeavour to resolve the conflict by mutual agreement under the relevant bilateral tax treaty.

91. The Committee also suggests that the considerations set out in the above Report should be taken into account by OECD member countries in the

application of existing bilateral tax treaties and in the negotiation of new such treaties.

Notes and References

1. Thus in the United Kingdom until recently certain companies seeking new finance found it advantageous to borrow from banks in such a way that the interest was treated, under United Kingdom law, as a distribution of profit for tax purposes. This was achieved by giving the lending bank a connected right to a small participation in the company's profits. The companies were induced to make this kind of arrangement because they were unlikely to derive any benefit from a deduction for interest for some years to come and were open to an offer of a substantially reduced rate of interest in return for providing the banks with an advantage. The companies were unlikely to make any taxable profits for some years to come because, quite apart from any possible deductions for interest paid, they were carrying forward heavy losses or massive reliefs for capital investment or large reliefs for inflationary increases in the prices of new stock. The banks could benefit from the receipt of distributions rather than interest because they could use the advance corporation tax (ACT) paid in respect of the "distributions" as a credit against the ACT which they would have to pay on making distributions to their own shareholders, and could effectively pass the distributions directly on to their own shareholders without first including them in the total of their taxable profits. The banks thus paid no tax on the remuneration which they received for making the loans and in consequence were able to make the relevant loans at a lower rate of interest than they would otherwise have felt the need to charge. For the companies the immediate benefit of a lower gross rate of interest outweighed the more or less indefinitely deferred benefit of a possible tax deduction for a larger gross amount even if this might have produced a lower net expenditure.
2. The Federal Republic of Germany welcomes the report as a highly important contribution to understanding problems of thin capitalisation but cannot accept it without a general reservation, essentially with respect to the way it makes use of the "arm's length principle". In this context the Federal Republic of Germany
   - Takes note, that the report is based rather on the notion of an "arm's length profit" rather than on the generally accepted notion of an "arm's length price";
   - Points out that the consensus regarding the actual application of the "arm's length principle" is extremely vague and precarious;
   - Regrets that the report might lead to diminishing the protection provided for under Article 25 of the OECD Model against discrimination, namely where a state's thin capitalisation rules are justified by a one sided claim to stay within the "arm's length principle".

   The Federal Republic of Germany, furthermore, reserves its attitude to the report's interpretation of the dividend definition. It is, however, ready to co-operate in the spirit of the report in order to avoid double taxation by mutual agreement.

Double Taxation Conventions and the Use of Base Companies

ANNEX I. International counteracting measures: an overview . . . . . R(5)-34

I. THE PROBLEM STATED

A. *Base companies*

1. For a number of years taxpayers have made increasing use of so-called "base companies". Such companies, which are predominantly situated in low tax countries, are used for the purposes of sheltering income there and thus reducing taxes in the home country of the taxpayer. This report examines how these tax advantages operate, the measures taken by various countries to combat such devices and safeguard the equity and neutrality of their tax systems and the international implications of these measures, especially with reference to double taxation conventions. It is clear that the problem of "base companies" should be seen against the background of the overall tax system in the country concerned. Thus, as discussed in paragraph 13 et seq. of the Introduction to this volume, the concept of neutrality may have a different meaning when applied to income in respect of which the country of residence operates a credit mechanism than when applied to income in respect of which an exemption mechanism is operated by the residence country.

2. Possibilities for international tax avoidance may be opened up by certain features of domestic tax laws. Double taxation conventions – the positive aspects of which are recognised – may, as a side effect, increase these possibilities. The same tax effects may, under certain circumstances, be the result of features in domestic laws, while, under other circumstances, they will result from tax treaties. Similarly, counteracting measures may be taken either under domestic law or under a tax treaty.

B. *Relevant considerations*

3. With regard to the frame of reference of this report three points should be kept in mind.

1. *Relationship to other issues*

4. The main issue dealt with in this report is the compatibility of domestic anti-abuse measures with, and their consequences for, the existing system of international tax relations. The OECD Model Convention which sets internationally-accepted standards in this field is used as a yard-stick. The report should also be considered in connection with the general framework of OECD activities on the improper use of tax treaties and in particular the work on "conduit" companies, which constitutes the next report in this volume. The "conduit company" concept is focused on tax advantages to be secured in the country of source of the sheltered income, whereas the "base company" is concerned with minimisation of tax in the country of residence of its controllers. Often the same corporate structure is designed to achieve both of

these results and in those cases the problems can be regarded as different sides of the same coin.

5. The subject of this report is also related to the problem of international tax avoidance and evasion through the use of tax havens, a matter dealt with separately in the previous report in this volume. The emphasis of the present report, however, is on the implications for double taxation conventions.

2. Economic aspects

6. This report does not deal with the economic merits or demerits of base companies. Although there may be in some cases valid economic reasons or personal motives for making use of base companies, in practice, they are often used primarily for the purpose of reducing taxes chargeable to the person using the device. There are even instances where the wish to facilitate or to veil criminal activities is one of the motives behind the tax-saving arrangement. Whatever the main motive, where a tax advantage is obtained by using base companies the question arises whether, and to what extent, that advantage should be eliminated to ensure equity and neutrality of taxation in a country whose taxpayers make use of such companies.

3. Territorial aspects ("tax havens")

7. As noted above, the concept of base companies is often related to so-called "tax-haven countries". Even though a territorial clustering of base companies in such countries evidently occurs, base companies may also be found in so-called high-tax countries, either because the taxation there is acceptable for the taxpayers concerned due to the respective effective rates of tax in the country of the base company and in the country of their residence, or to advantages taken of special regimes or to the unintended consequences of domestic tax laws. This point is illustrated by the use of so-called "stepping-stone strategies", where income is sheltered in a low tax country and then channelled through a high-tax country to its final destination, the real origin of the income being concealed from the tax authorities of the latter.

C. Terminology

8. Terms such as "base company", "passive income" and "low taxation" are used throughout this report and typically encountered in discussions on this topic. However, no definitions of these terms are put forward in the report because they are flexible and relative notions depending upon the facts of particular cases and the policy attitudes in the taxing jurisdiction. The schematic presentation of typical situations given in Annex I and the description of legislation in six countries and the examples in the text should

be sufficient to provide an understanding of the concepts involved. The following abbreviations are used in this report:

Country of	Referred to as:	Abbreviation
Residence of a base company's shareholder	Residence country	R
Residence of the base company itself	Base country	B
Source of the base company's income	Source country	S

II. ANALYSIS OF FUNCTIONS AND USES OF A "BASE COMPANY"

A. Sheltering of income

9. For tax purposes, the most important function of a base company is to collect income which otherwise would flow directly to the taxpayer. The taxpayer, therefore, does not normally become liable to tax on the income received by the base company, though economically he is entitled to such income and may well be able to direct its disposition. Thus, in the absence of counteracting measures, the base company would be able to shelter in a low tax jurisdiction such income from taxation in the taxpayer's residence country.

1. Primary sheltering

10. Initially, the income is sheltered from taxation in the taxpayer's country of residence by the mere fact that the base company is an entity of its own and is recognised as such in the residence country. By shifting the respective income from the taxpayer to the base company it is no longer covered by the normal taxation of world income to which the taxpayer is subject in most countries. This advantage is not offset by taxation in the country of the base company, since by carefully choosing the place of incorporation and arranging the affairs of the base company, the latter is subject to no tax or a very modest tax there. It is true that income may be taxed in the country of source (which may well be the same as the taxpayer's country of residence) under a "limited tax liability" criterion. But for a number of reasons this taxation is often non-existent or very low with respect to the type of income which is selected by taxpayers for sheltering in base companies as noted in the next report in this volume "on conduit" companies. Important net savings of taxes may accordingly result.

11. The tax advantage exists only as long as the sheltered income is not distributed. Taxpayers, therefore, often claim that this is merely a tax deferral. As the taxpayer may avoid such distributions by deferring them indefinitely

and as strategies against their taxation can often be successfully deployed (*cf.* paragraph 12 below), the tax advantage may, in practice, be frequently equivalent to a permanent one.

2. Secondary sheltering

12. When income sheltered in a base company is distributed or otherwise transferred to the taxpayer it becomes taxable, usually as a dividend. Thus, the initial tax advantage of the sheltering would normally be eliminated. However, this taxation which offsets the original tax advantage may also be avoided or reduced by "secondary sheltering". The main strategies are:

- Distribution as income of a type which is tax-exempt, the exemption being granted under tax treaties or specific domestic rules (director fees, salaries, dividends distributed by a subsidiary to its parent where an affiliation exemption applies in the latter's country);
- Reinvestment abroad of income sheltered in the base company or ploughing back as a loan to the shareholder company;
- Alienation of the capital holding in the base company, with the shareholder thereby realising a gain which is tax exempt or taxable at reduced tax rates.

Secondary sheltering is dealt with specifically in Part VI of this report.

B. Types of base companies

13. Base companies may be classified under different criteria. The following represents one possible classification.

1. Asset administration

14. This is the most common type of base company: the taxpayer transfers an income-generating assets to the company, thus sheltering from tax in the country of residence the income arising from those assets.

Example 1:

T, resident in country R, owns shares and debentures which he transfers to a base company in country B. The base company uses the sheltered income to buy other assets of the same kind.

Example 2:

T has developed a new product. It is patented in favour of a base company in country B which gives licences to third parties in countries S1, S2, S3 and shelters the income arising from them (or lends it to T against the payment of interest which is deducted from T's taxable profits).

2. *Financial pivots*

15. Some base companies are used to form financial pivots for broad international activities. This usually concerns holding companies, *e.g.* the regional centres for multinational enterprises, and companies formed to issue loans or to centralise similar activities. Companies of this kind may also centralise banking or insurance activities and it may then be doubtful whether one can still regard them as "base companies" receiving passive income.

Example 3:

A multinational enterprise based in country R holds its participation in South America through a holding company set up in country B which is also the pivot for the whole intra-group financial relationships with respect to the area. A second base company in the Bahamas issues international loans and pays interest on them free of withholding tax.

Example 4:

A multinational enterprise centralises its insurance contracts in an "off-shore" captive corporation, which insures the risks within the group and covers them by reinsurance contracts.

3. *Operational base companies*

16. Base companies of this kind are used in connection with business or professional activities some of which are carried on outside the country where they have been set up. Thus, the base company "feeds" on the profits derived from these activities exercised elsewhere, so that the income derived can at least partly be sheltered in the base company.

Example 5:

T carries on an enterprise producing cars in country R and selling them in countries S1, S2, S3. The cars are sold to wholesalers in these countries or in others via a base company set up in country B which acts as a sales company and shelters part of the income.

Example 6:

An artiste acts as an employee of a base company owned by himself ("rent-a-star"). The base company thus "feeds" on his professional income (the artiste receives only a relatively small salary) and shelters it.

Where operational base companies are used, the consequences of the avoidance devices are frequently aggravated by the manipulation of transfer prices.

4. *Other types of base companies*

17. Other types of base companies may be used for the purpose of channelling income only, for hiding activities or for other purposes (*cf.* for example the following report on the use of conduit companies).

III. COUNTERACTING MEASURES IN NATIONAL TAX LAWS

Preliminary remarks

18. There are two different approaches that national tax laws may take with respect to base companies. Adequate taxation may be sought:

- In the context of taxation of world-wide income in the State where the taxpayer is resident ("taxation from the top"), or;
- In the context of territorial taxation in the country of origin of the base company's income ("taxation from below"),

Annex I gives a schematic presentation of the situation.

19. It has often been claimed that "taxation from below" is the appropriate response to the base company problem. Experience of the major States concerned has shown, however, that while adequate "taxation from below" is indispensable, legislative measures "from the top" are also necessary. This report deals only with the "measures from the top" of the taxpayer's country of residence. The problems of "taxation from below" are dealt with in the following report on conduit companies.

A. General surveillance measures

20. Under this heading two main groups of rules may be mentioned.

a) Transfer pricing

Transfer pricing is the subject of special provisions in most domestic tax laws. It is also covered by Article 9 of the OECD Model, and thoroughly treated in the 1979 and 1984 OECD reports on the topic. Transfer pricing rules are necessary to prevent income from being shifted artificially to base companies, especially in the case of operational companies. However, the arm's-length rules may not always be sufficient to prevent income shifting, as for instance, in the case of asset administration. Furthermore, problems which are difficult to solve may arise where the activities of the base company cannot clearly be ascertained or evaluated. This may be because there is a complex and intricate relationship between that company and an enterprise of the taxpayer or because the company is allegedly carrying on a real economic activity which it cannot effectively sustain given the

limited scope of its actual activities or resources (*cf.* paragraphs 47-49 and 92-98 of the preceding report on tax havens);

b) Special procedural rules

Tax laws may impose special information requirements on taxpayers operating in foreign countries. More far-reaching requirements may be applied to taxpayers relationships with companies having the characteristics of a base company. In some States the burden of proof is shifted to the taxpayer in such cases (see paragraphs 86-91 of the preceding report on tax havens).

B. "Substance-over-form" provisions

21. Substance-over-form provisions and courts' attitudes to them are discussed in paragraphs 52-54 and 81-85 of the preceding report on tax havens. In the context of this report it is noted that they are generally – but not exclusively – applied in the context of "taxation from the top" and reflect one of the following approaches:

a) The legal personality of the base company may be disregarded;

b) The base company may be regarded as a resident in the taxpayer's country, *e.g.* because its place of effective or central management is situated there;

c) The base company may be deemed to have a permanent establishment in the taxpayer's country of residence, *e.g.* because it has a place of management there;

d) The sheltering of the income may be disregarded, *i.e.* the activity of the base company or the income derived from it may be regarded as an activity or as income of the taxpayer himself.

22. These approaches presuppose that the economic reality of the base company and its economic motives can be fully evaluated. In the view of some countries this is very difficult, especially in the absence of any exchange of information with the country where the base company is situated. Other countries, however, (e.g, the Netherlands) which have quite general legal provisions and/or case law which permit the application of substance over form, are of the opinion that they are able to effectively combat tax avoidance through base companies. Even in cases where there is no exchange of information with the base country, it may be possible for the tax authorities of the residence country to determine the reality of the base company's operations when, under the residence country's rules, the taxpayer has the burden of proving that the base company carries on real economic activities. One advantage of this approach may be that overreaction can be better

avoided by applying substance over form on a case by case basis than by introducing generally-applicable and complicated counteracting measures.

C. *Subpart-F type counteracting legislation*

1. *General*

23. As outlined in paragraphs 62-64 of the report on tax havens, several countries have adopted specific legislation against the sheltering of income in low-taxed base companies situated abroad. Such legislation provides that, under certain conditions, a resident shareholder (*e.g.* a parent company) may be taxed on the profits of a foreign-controlled company which are not distributed to the shareholder (the term "subpart-F type" defence legislation, as used in this report, refers to provisions of that type). Such legislation is not normally applicable where base companies are made use of for non-tax reasons, *i.e.* where their use is fully justified on purely economic grounds.

2. *Taxation of sheltered income in the hands of the resident taxpayer*

24. Counteracting legislation provides for the taxation of the resident shareholder on the income sheltered in the base company which he controls. The base company itself seems in no case to be subjected to tax or obligations connected therewith. The shareholder's taxation rests on the assumption that the sheltered income is deemed:

- *i)* To be distributed ("fictive dividend" approach); or
- *ii)* To have arisen in the hands of the shareholder, *i.e.* that the company's activities are to be attributed to him ("piercing the veil" approach); or
- *iii)* To have improved the ability of the shareholder to pay taxes because economically it is at his disposal, thus constituting a capital yield of a special nature.

In practice counteracting legislation seems to have proceeded in a pragmatic way rather than by following rigidly any one of these theoretical approaches.

3. *Relevant technical aspects*

25. Only a few characteristics of the extremely technical provisions can be mentioned here:

- *i)* Generally counteracting legislation aims at a level of taxation which is no more burdensome than if the sheltered income had arisen directly to the taxable shareholder;
- *ii)* Specific problems arise with respect to dividends distributed by the base company to its shareholders; in these cases counteracting

legislation prevents an internal double taxation (namely as income sheltered and as a dividend);

iii) Taxes levied on the sheltered income, whether in the country of source or in the country of the base company, are usually credited;

iv) All such legislation aims at covering base companies held indirectly (*e.g.* through a chain of base companies), though these often highly-technical provisions have to vary widely between countries;

v) Further problems concern the treatment of pure holding companies, and of companies with both active and passive income.

4. International implications

26. States with a counteracting legislation evidently regard the effects of base companies as unbalancing the equity and neutrality of their tax systems. Tax advantages obtained through such companies seem improper to them, even if they are used for valid reasons or understandable motives. Opinions about what is improper or not may differ. Counteracting measures nevertheless have to respect the general principles underlying the OECD Model Convention, as discussed further in paragraphs 47 and 48.

IV. IMPLICATIONS OF A CONVENTION BETWEEN THE STATE OF THE TAXPAYER AND THE STATE OF THE BASE COMPANY

A. Treaty implications of general surveillance measures

1. Transfer pricing

27. Article 9 of the OECD Model Convention applies to relationships between the taxpayer and the base company. Therefore, transfer prices which differ from those which would be agreed upon between unrelated parties may be adjusted under that provision.

28. The considerations to be taken into account in this examination do not differ basically from those to be taken into account in other cases, so that the principles set out in the 1979 OECD report "Transfer Pricing and Multinational Enterprises" are valid in these cases. The actual economic function of the base company has to be carefully analysed (paragraph 17 of the 1979 report). The mere fact that the base company is able to shelter its profits under a low tax systems would, in any case, not lead independent parties to concede price advantages to it. Thus, its actual activities, risks and responsibilities have to be ascertained. Where the base company has no economic functions of its own but serves exclusively to channel assets to, or income through, a low tax

area, it would normally not be able to realise profits in acting between independent parties and this would be the guideline in examining its transfer prices. No, or only a minimal, profit might thus be expected to arise to a base company in a low-tax country formally acting as a seller of merchandise produced by the taxpayer to customers outside that country, if the company actually does not carry out the delivery or other substantial commercial activities (paragraph 59 of the 1979 report). A base company with limited functions, responsibilities or risks corresponding to that of a broker, standby or subcontractor could, if acting between independent parties, obtain a profit only for its actual economic contribution and its transfer prices would normally be examined on a cost-oriented basis (*e.g.* based on a fee or on the cost-plus method). This basis would normally apply where mere marginal or auxiliary activities are exercised by the base company; where such arrangements do not correspond to normal business practice, no additional profit could be attributed to the base company by reference to what, under normal circumstances, would be the exercise of sound commercial judgement, or by reference to a specific allocation mechanism, *e.g.* the centering of cost-sharing arrangements in the base company.

2. *Special procedural rules*

29. The question arises whether special procedural rules are consistent with Article 9 (Associated enterprises) and Article 24 (Non-discrimination) of the OECD Model Convention:

a) Procedural rules and transfer pricing

30. As noted in paragraph 25 of the 1979 OECD report, transactions between related parties should be supported by relevant documentation. It is clear from the report that this applies in a specific way to arrangements aiming at minimising taxes in low tax areas. In this context it may be asked whether the reversal of the burden of proof or presumptions of any kind which are sometimes to be found in the context of national laws on base companies are contrary to the arm's-length principle. These questions are not confined to base company situations, and have to be considered in a wider context. It should be noted, however, that a number of countries interpret Article 9 in such a way that it by no means bars the adjustment of profits under national law under conditions that differ from those of that Article and that it has the function of raising the arm's-length principle at treaty level, thus enabling the Contracting States to deal with it under mutual agreement procedures and to give rise to corresponding adjustments. This is a topic dealt with in the 1984 OECD report on transfer pricing (see bibliography to this volume) and which might be reconsidered again by the Committee on Fiscal Affairs at some later date.

b) Procedural rules and non-discrimination

31. Even if the country of residence of the taxpayer imposes information requirements on him in respect of his relationship with the base company which are more stringent than the normal requirements, or even if the burden of proof is reversed in this respect, member countries, subject to one dissenting view, consider that there is no discrimination within the meaning of Article 24 of the OECD Model. First of all, the different treatment is not based on nationality (*cf.* paragraphs 1 and 3 of Article 24). Secondly, the different treatment does not depend on whether or not the taxpayer is controlled by a non-resident (*cf.* paragraphs 4 to 6 of Article 24). In addition the circumstances under which the information requirements are imposed are not "the same" within the meaning of Article 24, because it follows from the very nature of foreign relationships which cannot be explored effectively by the national tax authorities that information requirements have to be more burdensome than for the purely domestic context. However, if applied indiscriminately to all situations (including non-tax havens), these requirements could constitute an obstacle to international investment.

3. Conclusions

32. It appears then that general surveillance measures are not curtailed by a tax treaty between the country of residence of the taxpayer and the country of the base company. The internationally agreed principles of the 1979 OECD report on "Transfer Pricing and Multinational Enterprises" provide valid guidelines for an effective application of the arm's-length principle in the case of base companies. In any future revision of the OECD Model Convention this aspect might however be stressed in the Commentaries on Article 9.

33. On the other hand, general surveillance measures may lead to differences in applying the Convention. Any such difficulties should be solved in accordance with the mutual agreement procedure as set out in Article 25 of the Model Convention.

B. Treaty implications of "substance-over-form" provisions

1. The concept of person

34. Normally the base company will be regarded as a person (*cf.* Article 3 of the OECD Model) if it has been set up according to the laws of a given country. There may be specific situations in which a base company has to be treated as non-existent, *e.g.* because:

- The treaty exceptionally does not treat it as a company; or
- It has to be denied legal personality under the rules of international private law; or

- The act of setting-up the base company is invalidated in itself under the laws of the country where it is established.

Leaving aside these very special situations, the base company cannot be treated as non-existent under the Convention. The question however arises of whether or not the company is a resident of the low-tax country where it has been set up.

2. *Definition of residence*

35. For treaty purposes a company is a resident of the Contracting State in which its place of effective management is found, and this is so irrespective of where its place of incorporation is situated (*cf.* paragraphs 1 and 3 of Article 4 of the OECD Model). The country of residence of the taxpayer could therefore tax the income of the base company if the place of effective management were situated there. This will sometimes be the case in practice. On the other hand, deeming under national law that the place of effective management is situated in the taxpayer's country would not overrule the provisions of the Convention.

36. Article 4, paragraph 1, second sentence of the OECD Model, excludes from the term "resident of a Contracting State" any person who is "liable to tax in a Contracting State in respect only of income from sources in that State or capital situated therein". This exclusion relates clearly to specific privileges granted by reason of the international relations of a person and gives such a person in effect the status of a non-resident rather than that of a resident. The Commentaries on the OECD Model give as an example the case of certain diplomatic personnel. The exclusion would, nevertheless, apply according to its wording and spirit where, for example, foreign-held companies are exempted from tax on their foreign income by privileges tailored to attract base companies. There are, however, difficulties inherent in this approach which are discussed in paragraph 14 of the following report on conduit companies.

3. *Permanent establishment of the base company*

37. While the place of effective management is normally situated in the country where the base company has been set up, it could be questioned whether or not a permanent establishment of the base company is situated in the taxpayer's country of residence, thus enabling that country to tax the income attributable to the permanent establishment, for example, because it has a place of management there [*cf.* Article 5, paragraph 2 *a)* of the OECD Model]. This is a question of fact but it also involves difficult problems of interpreting these provisions. Here again, the use of a deeming provision under the national law of that country would not suffice if there is no factual

basis for recognising a permanent establishment. Even if a permanent establishment in the form of a place of management were present, it has to be kept in mind that the tax regime of a permanent establishment differs to a large extent from that of a company having its place of effective management in the country. Only profits attributable to the permanent establishment are taxed. Sometimes, there are different tax rates, taxation of distribution is differently effected, etc.

4. *Attribution of activities and/or income*

38. While recognising that the base company as a legal entity has its place of effective management in the country where it has been set up and does not have a permanent establishment in the country of residence of the taxpayer, the latter country could at least, under its national tax law, attribute to the taxpayers the activities and/or the income of the base company. This approach would clearly not be contrary to the OECD Model if the base company acted as a mere intermediary, an agent, a fiduciary or nominee of the taxpayer (*cf.* for example, the notion of beneficial owner in Articles 10 to 12 of the OECD Model). However the question arises as to whether, quite generally, domestic rules as to who is regarded as the recipient of specific income for tax purposes are compatible with treaties. This question especially arises in the case of "anti-abuse" or "substance-over-form" rules according to which it is not the base company itself but its shareholder, who is regarded as the true recipient of the income shifted to the base company.

39. The large majority of OECD member countries consider that rules of this kind are part of the basic domestic rules set by national tax law for determining which facts give rise to a tax liability. These rules are not addressed in tax treaties and are therefore not affected by them. One could invoke the spirit of the Convention, which would be violated only if a company, which is a person within the meaning of the Convention, ended up with no or almost no activity and/or income being attributed to it, and the Contracting States took divergent views on the subject, with economic double taxation resulting therefrom, the same income being taxed twice in the hands of two different taxpayers (*cf.* Article 9, paragraph 2). A dissenting view, on the other hand, holds that such rules are subject to the general provisions of tax treaties against double taxation, especially where the treaty itself contains provisions aimed at counteracting its improper use.

40. It is not easy to reconcile these divergent opinions in theory, nor in mutual agreement procedures on specific cases. The main problem seems to be whether or not general principles such as "substance-over-form" are inherent in treaty provisions, *i.e.* whether they can be applied in any case, or only to the extent they are expressly mentioned in bilateral conventions. On

the dissenting view, to give domestic rules precedence over treaty rules as to whom, for tax purposes, is regarded as the recipient would erode the protection of taxpayers against double taxation (*e.g.* where by applying these rules, base company income is taxed in the country of the shareholders even though there is no permanent establishment of the base company there). However, it is the view of the wide majority that such rules, and the underlying principles, do not have to be confirmed in the text of the convention to be applicable. The problems arising here are very similar to those arising in the case of specific counteracting measures (see paragraph 47 below).

5. *Conclusions*

41. Tax treaties set limitations to technical rules though these limits are not very well defined. Furthermore, there are certain doubts as to their implications for the "substance-over-form" provisions. This adds to the well-known practical difficulties of implementing national provisions of this type. Further clarification therefore seems to be necessary. In any case, where States feel that difficulties might arise in this area, they would try to settle them by inserting specific safeguards in their bilateral treaties.

42. A certain danger remains that technical and "substance-over-form" provisions could lead to double taxation even where a convention exists. Therefore, States applying provisions of this type should endeavour to alleviate any such double taxation in accordance with the letter and if possible with the spirit of their double taxation treaties.

C. *Treaty implications of counteracting measures*

1. *General outline of the problem*

43. Under existing counteracting measures, the country imposes a tax on residents who are shareholders in the foreign base company. The foreign company as such is not taxed; generally the income which gives rise to the taxation does not originate in the country of the base company but in the taxing country itself or in a third country. A tax treaty between the country using the counteracting legislation and the country of the base company usually protects, however, income flows only between these two countries. The first-mentioned country may therefore claim that the tax imposed under the counteracting legislation does not come under the scope of the said tax treaty.

44. This attitude has sometimes been challenged as being contrary to the general structure and the spirit of tax treaties, except where a specific saving clause acknowledges the counteracting measures. It is said that counteracting

measures implicitly disregard the company as a person, which is contrary to the treaty (*cf.* paragraph 34 above).

45. There seems to be several answers to that contention:

a) On the technical level, counteracting measures can attribute activities – and thus income – to a shareholder, which is not contrary to tax treaties (*cf.* paragraph 40 above). If the counteracting measures have the effect of taxing a deemed dividend of the base company, this is well within the taxing rights conferred on the taxpayer's country of residence under the rules of tax treaties regarding taxation of dividends (*cf.* Articles 10, 23 A and 23 B of the OECD Model);

b) On the tax policy level, counteracting measures pierce only the "umbrella effect" of the taxpayers' arrangements. This effect and the consequent possibilities for an indefinite deferral are not guaranteed by tax treaties which were never intended to prohibit national safeguards for the equity and neutrality of a country's tax law;

c) On the international level, as long as some countries regard it as a sovereign right to shape their fiscal system in a way which might negatively affect other countries, tax authorities in these other countries must safeguard their sovereign right to preserve the equity and neutrality of their tax systems. It has never been intended that tax treaties would replace national sovereign rights with international co-operation to safeguard the integrity of tax systems.

46. It is evident that these are the views of States adopting counteracting measures and a very large majority of OECD member countries have supported them. However, while counteracting measures as described above are not inconsistent with the spirit of tax treaties, there is agreement that member countries should carefully observe the specific obligations clearly evidenced in tax treaties, as long as there is no clear evidence that the treaties are being improperly used. Furthermore, it seems desirable that counteracting measures comply with the spirit of tax treaties with a view to avoiding double taxation. Where the taxpayer complies with such counteracting measures, it might furthermore be adequate to grant him the protection which the treaty network would have provided if the taxpayer had not used the base company.

47. Whilst the majority of OECD member countries thus accepts counteracting measures as a necessary means of maintaining equity and neutrality of national tax laws in an international environment characterised by very different tax burdens, it firmly adds that such measures should be used only for this purpose. It would be contrary to the general principles underlying the OECD Model Convention and to the spirit of tax treaties in general if counteracting measures were to be extended to activities such as production, normal rendering of services or trading of companies engaged in

real industrial or commercial activity, when they are clearly related to the economic environment of the country where they are resident in a situation where these activities are carried out in such a way that no tax avoidance could be suspected. Counteracting measures should not be applied to countries in which taxation is comparable to that of the country of residence of the taxpayer. It is also of relevance that a country's willingness to co-operate effectively with other tax administrations will normally be a strong deterrent to use base companies in that country.

48. However, there is no easy way of drawing clear-cut rules from these guidelines. An international consensus should be established, to which States newly introducing counteracting measures might refer. In this respect, the OECD Committee on Fiscal Affairs has played and could continue to play a role which would be helpful, *vis-à-vis* both member countries which already apply counteracting measures or are considering adopting measures of this kind, and those member countries which view such measures taken in other countries as infringing their own tax sovereignty, or going against their tax policy or being contrary to international commitments. The Committee would accordingly appear to constitute the appropriate forum for discussion of such policy issues.

2. *Paragraph 5 of Article 10 of the OECD Model*

49. It might be argued that where the taxpayer's country of residence, pursuant to its counteracting measures, seeks to tax profits which have not been distributed it is acting contrary to the provisions of paragraph 5 of Article 10. However, it should be noted that the paragraph is confined to taxation at source and, thus, has no bearing on the taxation at residence under a counteracting legislation. In addition, the paragraph concerns only the taxation of the company and not that of the shareholder.

3. *Treatment of the taxable amount*

50. The appropriate treatment of the taxable amount under a tax convention between the country of the base company and the country of the taxpayer depends on how the relevant counteracting legislation is regarded. If it attributes the activities or the income of the base company to the taxpayer, one has to look to the composition of the income; it may be composed of different items of income (business profits, interest and royalties) derived from the country of the base company or from any other country and the provisions that are relevant for these items have then to be applied. If the taxable amount is, however, a deemed dividend or a particular capital yield, it is clearly derived from the base company thus constituting income from that company's country. Even then, it is by no means clear whether the taxable

amount is to be regarded as a dividend within the meaning of Article 10 of the OECD Model or as other income within the meaning of Article 21 of the OECD Model. At least under some counteracting measures the taxable amount is treated as a dividend with the result that an exemption, provided for by a tax convention, *e.g.* an affiliation exemption, is also extended to it (for instance, in Germany). It is doubtful whether the treaty requires this to be done. If the country of residence considers that this is not the case – and consequently refuses the affiliation exemption for "deemed dividends" – it may face the allegation that it is obstructing the normal operation of the affiliation exemption, by taxing the dividend (in the form of "deemed dividend") in advance.

4. *Treatment of dividend distributions of the base company*

51. Where dividends are actually distributed by the base company the provisions of a bilateral Convention regarding dividends have to be applied in the normal way because there is dividend income within the meaning of the Convention. Thus, the country of the base company may subject the dividend to a withholding tax. The country of residence of the shareholder will apply the normal methods for the elimination of double taxation (*i.e.* tax credit or tax exemption is granted). This implies that the withholding tax on the dividend should be credited in the shareholder's country of residence, even if the distributed profit (the dividend) has been taxed years before under counteracting legislation. However, the obligation to give credit in that case remains doubtful. Generally the dividend as such is exempted from tax (as it was already taxed under the counteracting legislation and one might argue that there is no basis for a tax credit. On the other hand, the purpose of the treaty would be frustrated if the crediting of taxes could be avoided by simply anticipating the dividend taxation under a counteracting legislation. The general principle set out above would suggest that the credit should be granted, though the details may depend on the technicalities of the counteracting measures and the system for crediting foreign taxes against domestic tax, as well as on the particularities of the case (*e.g.* time lapsed since the taxation of the "deemed dividend").

V. IMPLICATIONS OF CONVENTIONS WITH THIRD STATES

52. Base companies often shelter third country income. There exists no apparent tax-relevant relationship between the country of source (S) and the home country (R) of the taxpayer as long as the latter does not take protective measures. Only when that country recoups its taxation in ways described in Chapter III, does its system have an effect on taxation in country S. By doing

so, country R may in specific situations even produce effects of tax significance for other countries (*cf.* subchapter C below). The present chapter deals with the relevance and implications of such relationships for taxation.

A. *Third country income: basic approaches*

53. In the case of third country income, the following problems may arise.

a) In the absence of a treaty between country R and country S, should country R allow a credit for the taxes which are imposed by country S?

b) Where a tax treaty exists between these two countries:

i) Should country S limit its taxation under the treaty provision?

ii) Should country R credit the taxes of country S and, if so, should it credit the full amount or only the amount due under treaty limitations?

iii) Should country R exempt income if the treaty provides for such an exemption in case of direct flows of income from country S?

54. It seems clear that the answer in each case should normally be negative as, from a legal point of view, it is assumed that two separate relationships exist between countries S and B on the one hand, and between countries B and R on the other hand, and the base company's own separate entity prevents any direct tax relationship between country S and country R. The answer would be positive only if a tax-relevant direct relationship existed between those two countries.

55. Whether a tax-relevant relationship exists between country S and country R depends on how the legislative measures in country R are legally construed. Basic situations may be illustrated, by three examples.

Example A:

Country R regards the base company as a resident because, under its domestic law, that company has a place of central management there. Country R thus treats the base company as any other resident. Consistently, the companies' dealings with country S should be treated as any other direct relationship, so that double taxation reliefs available in R domestically or under the treaty between S and R have to be granted. Treaty protection should also be given by country S since it depends (under Article 4 of the OECD Model) only on the law of country R whether the base company is a resident thereof for the purposes of the treaty and falls, consequently, under its personal scope (Article 1 of the OECD Model).

Example B:

Country R regards the base company as a foreign resident. However, it considers, under its national tax law, income sheltered in the base company to be income arising directly to its resident shareholder (*e.g.* by a substance-over-form approach). Again, viewed from country R, there is a direct relationship because one of its residents receives income from country S. Country R will, therefore, grant relief against double taxation which is available domestically or under its treaty with country S. The situation may, however, be viewed quite differently by country S which may maintain that, according to its law, the income was received by the base company and that seizure of that income by country R cannot change this. In fact, if country R allocates, under its domestic law, income to the resident shareholder, it does not, under the OECD Model, automatically follow that the income is covered by the treaty as country S may allocate the income, independently, on the basis of its own domestic law (with the exception mentioned in paragraph 58 below).

Example C:

Country R has a counteracting legislation under which the income of the base company is deemed to be distributed to the shareholder resident in country R at the time when it accrues to that company. From a legal point of view, there then exists no tax-relevant relationship between country S and country R. The base company is recognised by both countries as a resident of country B and as recipient of the income, land this bars any direct relationship between countries S and R. Neither country would, therefore, grant domestic or treaty protection against double taxation.

56. Even though the situation may be very similar in all three cases from an economic point of view, *i.e.* income sheltered in a tax haven has been recouped by country R, the relationship between country R and country S depends on the specific kind of counteracting measures in country R and varies, therefore, from one example to another. It may seem adequate to take into account in some way the taxation in country S and treaty relationships with that country. This is suggested, *inter alia*, by the fact that the tax administration of country R will frequently be dependent, for the implementation of its counteracting measures on co-operation with the tax administration of country S on the basis of the treaty between these countries. This may be a reason why even countries with legislation of the kind referred to in Example C above often on their own account grant their taxpayers the benefits of treaties with source countries, though they would not formally be obliged to do so.

B. *Third country income: conclusions and recommendations*

1. *Credit in the country of residence for foreign taxes paid at source*

57. Tax authorities – and especially, subject to one dissenting view, those of countries which apply “subpart F” type defensive provisions – concur with the view that country R should credit in all cases the taxes of country S where this is provided for generally by its domestic law or by its treaties in case of direct flows of income from country S. This is evidently based less on technical or legal considerations than on the acceptance of a general principle. As set out in paragraphs 46-48 of this report, counteracting measures should comply with the spirit of international tax law by seeking to avoid double taxation. To follow this in the relationship between country R and country S should be generally encouraged.

2. *Limitation of source taxation under double taxation treaties*

58. As a general principle, it cannot be accepted that the source country is obliged to waive or reduce its tax under a treaty with the country of residence. Such an obligation would result clearly from the OECD Model only where the base company is resident in country R by the criteria of Article 4. Whether this is the case will often be difficult to ascertain, and Contracting States will normally need a mutual agreement procedure to make the necessary findings. It would not be acceptable, for instance, that the base company itself asks for some reduction of S’s tax under the convention between S and R without showing that it is treated as a resident of country R.

59. In all other cases, the country of source will normally treat the income in question as income of the base company itself. There is, then, no basis in the treaty between country R and country S for the base company to claim a limitation of source taxation. It may, of course, happen that pursuant to country S’s domestic law it is possible to allocate income under a “substance-over-form” approach to a person other than the one formally receiving it. Country S, however, may well argue that such approaches are designed to combat the avoidance of taxes of its own country. In the present context, however, treaty application would not serve to counteract tax avoidance in the country of source but to protect country R’s revenue or the interests of its taxpayers.

3. *Amount of credit to be granted in the country of residence*

60. It has been argued above that country R should, according to its domestic law, credit the taxes of country S in the same way as it would credit taxes levied at source on direct flows of income (*cf.* paragraph 57); there are even more reasons for doing so where a treaty exists between country S and

country R. It may, however, occur that taxation at source levied by country S is relieved or reduced under such convention in the case of income arising directly to a resident of country R. Would country R then be entitled to deny its credit or limit its amount of tax to treaty levels? The answer, in principle, should be in the negative as the source country is normally not obliged to relieve or reduce its tax (*cf.* paragraph 58 above). Where, in specific cases, country R and country S agree that source taxation on the base company income should be limited under the treaty between them, this would of course affect the credit granted in country R. The tax authorities of country R may also reasonably expect the taxpayer to take advantage of any tax treaty which might exist between country B and country S. In order to find a general guideline and to simplify an already complex situation, it is suggested that residence countries, as a general rule, should give full credit for taxes effectively levied at source.

4. *Application of the exemption method by the country of residence*

61. Country R may, in its treaty with country S, have adopted the exemption method for relieving double taxation. This will not affect passive income like dividends, interest and royalties which normally give rise only to credit for tax at source. However, exemption may be applicable to income arising to the base company from immovable property or permanent establishments in State S, where the treaty between R and S would provide for exemption in the case of similar income derived directly from S by residents of R.

62. It seems clear from the text of the convention that the exemption method has to be applied in the Examples A and B (see paragraph 55 above). In Example C, no such obligation exists but some States seem to be inclined to grant the application of the exemption method for special reasons under their domestic law (*e.g.* because it simplifies matters and prevents more tax being levied in cases of tax avoidance than in other cases). The application of treaties in such cases requires international co-operation in order to prevent the income being exempted twice, but otherwise no general recommendation can be given.

5. *Holding companies*

63. A characteristic situation is the one where a base company receives income from an active subsidiary. This is often the case when base companies are used by internationally-operating enterprises as a regional centre or as a financial pivot.

64. In a situation where a participation in a company of S were held directly by a resident of R, the dividends would mostly be relieved from recurrent corporate taxation by an indirect tax credit, or by an exemption (affiliation

exemption) in country R, either under domestic law or under the treaty with country S. The question whether these reliefs should be granted where a counteracting measure applies has to be answered in principle in the same way as the question whether an exemption under a treaty between countries R and S should be applied for direct income flows originating in S (*cf.* paragraph 62).

C. *Relationships with non-source countries*

1. *Implications of tax conventions on second-tier base companies*

65. Since counteracting measures also include second-tier base companies, situations may arise where two different measures of this kind are imposed simultaneously on the same income. Thus a German parent holding a Bahamas base company (sub-subsidiary) via a Canadian base company (subsidiary) may be taxed on the undistributed income of the Bahamas base company while the same amount may be taxable under the Canadian defence legislation in the Canadian company. Though the second-tier base company (sub-subsidiary) is outside the personal scope of the convention between the country of the parent and the country of the first-tier base company (subsidiary), member countries having adopted subpart F type legislation agree that both the country of the parent and the country of the first-tier subsidiary may apply their counteracting measures in this situation, unless there is a saving clause on this in the convention between the country of the parent and that of the subsidiary.

66. From a legal point of view, situations may, once more, vary according to what kinds of measures are used by both States applying counteracting measures. It may well be that there is a direct tax relationship between them, *e.g.* if both consider the base company as resident. In this case, treaties or domestic laws generally would avoid double taxation. Where no such direct relationship exists (*e.g.* when both countries use the mechanism of Example C), fully-fledged double taxation might result, thus creating an overreaction by measures designed to counter international tax avoidance. While this may not be in conflict with the Model Convention, States in which this problem arises should endeavour, in appropriate circumstances, to solve it either by domestic law or in their treaties. Germany and Canada have resolved it in the Protocol to their tax treaty by inserting the following provision: "… in cases where the same income is subject to the special tax referred to in … and the special tax referred to in…, the contracting State of which the controlling shareholder is a resident shall give credit for the special tax of the other Contracting State."

2. *Shareholders (of base companies) with double residence*

67. Where the taxpayer who is subject to counteracting measures in country R, (of which he is a resident under that country's domestic laws), is at the same time a resident of X (under the latter's domestic laws), and his personal and economic relations are closer to country X (*cf.* paragraph 2 of Article 4 of the OECD Model), the application of the counteracting legislation may be barred on the grounds that income derived from a third country is taxable only in the country of residence within the meaning of the Convention (*i.e.* country X), unless there is a permanent establishment in the other country (R) with which the participation in the base company is effectively connected. This seems to be justified because the taxable amount, though possibly not considered as income in country X constitutes income within the meaning of the Convention (*cf.* Article 21 and Article 3, paragraph 2, of the OECD Model) and thus has to be treated accordingly. This becomes even more evident if both country R and country X impose counteracting legislation of a "subpart-F" type.

3. *Participation in a base company held in a permanent establishment*

68. Where the participation in the base company is effectively connected with a permanent establishment situated in a third country, a similar question arises if the Convention with that country provides for exemption of the permanent establishment's income (*cf.* Article 23 A of the OECD Model). There can hardly be any doubt that the country of residence has in this case to exempt the income. However, it will be rather exceptional in practice that the participation is in fact effectively connected with the permanent establishment, *i.e.* that the base company has relations exclusively with the permanent establishment and not with the enterprise as a whole.

VI. QUESTIONS OF SECONDARY SHELTERING

69. As indicated in paragraph 12 of this report, when income sheltered in a base company is distributed or otherwise transferred to the taxpayer, it becomes subject to tax, normally as a dividend. Thus, the initial tax advantage of the sheltering would normally be eliminated. However, this taxation which offsets the original tax advantage may also be avoided by "secondary sheltering", the main strategies of which have already been described. In the following paragraphs, the main issues arising in an international context are briefly discussed, with respect to countries who do not have counteracting measures as described in the foregoing chapters.

70. The cases of secondary sheltering may be summarised by saying that income is disposed of by the taxpayer in such a way that it is either:

a) Not taxable under the domestic law of his country of residence, which will be the case, for instance, when it is accumulated and reinvested in the base country or in a third country; or

b) Ploughed back in the taxpayers' enterprise in country R, as a loan giving rise to interest payments which are normally deductible from taxable profits of that enterprise; or

c) Exempted from normal taxation in country R under special rules of domestic law or of a double taxation treaty, the most frequent cases being the following:

i) Base company income is distributed to the parent company resident in country R, where an affiliation exemption applies to relieve recurrent corporate taxation either under domestic rules or under a treaty;

ii) The taxpayer (an individual) receives income from the base company as salaries or directors' fees, which are exempt in R under a treaty; or

d) Enjoying a special tax treatment in country R, *e.g.* where, at the liquidation of the base company, income accumulated there is distributed to the parent-company in country R as profits from liquidation and subject there to a lower rate of tax applicable to capital gains.

1. Reinvestment in a country other than the country of residence

71. In this case, it will be difficult for the country of residence to combat secondary sheltering. Countries wanting to counteract this type of strategy should rather have recourse to counteracting measures described in the foregoing chapters.

2. Reploughing by loans to the shareholder company

72. Though a naive and rather straightforward form of tax avoidance, reploughing by loans is not easy to counter once a tax administration has accepted the use of base companies as a *bona fide* arrangement. The authorities in the country of residence may endeavour to show that the loan operation is an artificial one. They may want to argue that, on the facts, no interest deduction is to be allowed to the taxpayer's enterprise (if any "interest" is paid) because the funds are in reality not those of the base company but belong to the taxpayer. Demonstration of this will be easier if the domestic laws of country R contains "substance-over-form" provisions.

73. However, proving that the loan is effectively a distribution under a substance-over-form standard will often be difficult if the argument is restricted to the "loan arrangement" itself (because the background arrangement has been accepted). Even in the case of a highly artificial arrangement, it will often be difficult to ascertain facts and intentions (such as, when it is part of the arrangement, the lack of intent to repay the "loan"). It may be easier if the "loan arrangement" is regarded as part of a series of interdependent stages in a scheme which, looked at as a whole, can be regarded as a single composite transaction. The loan might be disregarded if the transaction as a whole, or a single part of it, does not meet "substance-over-form" criteria. It is, however, clear that such arguments might imply that not only the "loan" and the secondary sheltering but the use of the base company and the primary sheltering are abusive.

74. United States law contains a provision which includes as income of United States shareholders of base companies certain loans by the base company to United States persons. However, when the income of the base company has already been included in the United States shareholder's income under subpart F, these rules would not operate to impute additional income to the shareholders. No other specific domestic measures are known against reploughing through loans. They would probably have to take into account the whole series of transactions rather than only the "loan". Once more efforts against secondary sheltering would require similar legislation and administrative machinery to those against primary sheltering.

3. "Repatriation" as dividends or other tax-exempt income

a) Repatriation as tax exempt dividends

75. Where the income sheltered in the base company is "repatriated" as dividends paid to the parent company, such income will frequently be exempted under an affiliation exemption. The country of residence (of the parent company) should examine closely whether the dividends received would unconditionally qualify for the affiliation exemption, if there is no, or very low, corporate taxation in the country of the base company. Clearly, the exemption creates a void in tax terms and, as it were, transfers the low tax level of the tax haven country into the tax system of the country of residence. Countries which wanted to avoid such secondary sheltering have limited their exemptions in their domestic law, or in their treaties, to cases where recurrent corporate taxation really occurs. This may be done, among other things, by:

- Providing for an "activity clause" which prevents dividends from "non-active" companies from being exempted;
- Excluding from the exemption, dividends distributed by companies subject to low taxation;

– Switching from the exemption system to a system of indirect tax credit.

A further solution may be to adopt a more severe "substance-over-form" approach.

76. The measures described above may be difficult to apply and add to the complexity of a country's tax system, as it might be necessary to draw a dividing line between active and passive income and/or to define low taxation. In order to remain flexible, a special regime countering secondary sheltering may have to combine both elements in some way. Similar technical difficulties to those which exist under more comprehensive counteracting measures (especially those of the subpart-F type) would then have to be solved. It may, therefore, be better to adopt counteracting measures described in the foregoing chapters (*i.e.* one already designed to counter primary sheltering) rather than to set up a complicated system for the sole purpose of countering secondary sheltering.

b) Other tax-exempt payments

77. Where there is a convention between the base country and the country of residence and the latter applies the exemption method to avoid double taxation, "repatriation" of sheltered income sometimes takes forms such as wages or directors' fees. In these cases, the authorities of country R may endeavour to show, as the case may be, that such income does not have the character of wages, or of directors' fees, within the meaning of the relevant articles of the convention between country B and country R, (corresponding to Articles 15 and 16 of the OECD Model) but rather constitutes "dividends" or "other income" (under Article 21) thus being fully taxable in the taxpayer's country of residence.

78. For example, if dependent services were not carried out on behalf of the base company but on behalf of the taxpayer himself or of his enterprise, exemption might be denied. Likewise, amounts paid as directors' fees would be treated as dividends insofar as they exceed the amount which would have been paid in the absence of the taxpayer's own interest in the base company. No tax exemption would be due where, according to Article 4 of the 1977 OECD Model, the base company is to be regarded as a resident in country R. The exemption should also be denied if the taxpayer has claimed tax exemption or reduction in the country of the base company by pretending that the payment had not the character of a salary of director's fees. For doing so, the tax authorities of country R may obtain information from the tax authorities of country B (*cf.* Article 26 of the Convention) in order to show that the taxpayer did not exercise in country B, an activity sufficient to justify the payment of

the income; country R may also wish to enter a mutual agreement procedure with country B.

79. There may remain artificial arrangements which cannot be solved in this way. The problem then arises as to whether the exemption can be denied in another way, *e.g.* by showing that the payment is a part of a series of interdependent transactions in a prearranged scheme which, as a whole, has no other purpose than securing a tax advantage.

80. Where it seems necessary, tax treaties should take into account situations of the kind discussed in paragraphs 75 to 79 above. This may best be done by excluding certain companies from their scope or by adopting the credit method for eliminating double taxation, either generally or for certain items of income.

4. *Extraction of income as capital gain*

81. In a number of countries capital gains are subject to lower taxation than ordinary income. There are therefore substantial tax benefits to be obtained by arranging to convert income into a capital gain through a base company. This can be done by accumulating the income, and then extracting it by either disposing of part or all of the holding in the base company or liquidating the company altogether.

82. This is a common tax avoidance route. One area in which it has been exploited is that of collective investment institutions such as offshore mutual funds (referred to in paragraph 108 of the foregoing report on tax havens). A number or countries have specific counteracting measures to ensure that a proper tax charge is levied on the investor's share of the base company's income.

83. In such cases, the country of residence will have to make use of any safeguards, provided under domestic law, for not granting the special tax regime applicable to capital gains where the circumstances in which the company has been liquidated suggest that artificial arrangements have been made for the purpose of enjoying the benefit of the special regime. If no such safeguards exist in its law, country R could introduce provisions under which capital gains from the disposal of a participation in a base company would be taxable as ordinary income.

5. *Final remarks*

84. Amending domestic laws with adequate provisions for dealing with secondary sheltering may be difficult in practice, and the efficacy of such counteracting measures cannot be guaranteed. These considerations may therefore lead the country of residence to consider introducing counteracting

measures as described in the foregoing sections which may be directed both at primary and secondary sheltering.

VII. COMBATING TAX AVOIDANCE AND TAXPAYER PROTECTION

85. When a taxpayer tries to avoid taxation by sheltering income in a base company, he enters a "tax triangle" formed by his home country, the base country (the tax haven) and the country of source. While this may give rise to considerable tax advantages, the taxpayer risks running unexpectedly into tax charges he would not otherwise have borne. Thus, the taxes in the country of source may be unexpectedly high, especially if a treaty between the base country and the country of source cannot be invoked because one or both Contracting States regard its use as improper by reason of the artificiality of the arrangement. It is possible that unexpected changes in taxation procedures and domestic laws of the base country may cause difficulties for the taxpayer. Counteracting measures deployed by the home country may definitely aggravate the situation. It is clear that the taxpayer using a base company has to bear the risks inherent in the situation which he has created.

86. Another danger is that of double taxation (especially economic double taxation). A number of such situations have been described in the foregoing chapters and still others may occur. This results from three risks inherent in the "tax triangle":

- Counteracting measures are by their nature unilateral measures of a State which finds that its tax has been avoided; those countries in the "triangle" whose tax has not been avoided (or avoided in a specific way) and which deploy no such measures, have no reason to recognise them, because to do so might even have undesirable tax effects for them;
- International tax relations are based on the assumption of *bona fide* situations and not adapted to specific measures such as counteracting measures, especially in a triangular situation;
- The tax authorities concerned may be reluctant to rectify a situation created by the taxpayer for his own advantage.

Taxpayers should therefore always be aware of such risks and realise that tax authorities cannot be expected to be as anxious to avoid the consequences of the situation as they might be in normal cases.

87. There is even doubt whether, in the base company situation, double taxation should be avoided in a systematic way. Two lines of thinking have been expressed:

- It is argued, on the one hand, that the taxpayer has to bear the full risks of an arrangement which he has voluntarily entered into with a view to obtaining a tax advantage. Tax authorities could not safeguard him in any way from the unexpected consequences that such arrangements may have. In addition, such protection may not be desirable, as the residual risk of double taxation could act as a certain deterrent against artificial arrangements;
- On the other hand, it is argued that the taxpayer may ask for fair treatment, once tax administrations have successfully deployed their counteracting measures. Letting him incur double taxation in cases where this could be avoided would clearly lead to an additional tax burden which has the character of a penalty. However, this cannot be justified, as penalties would normally be imposed by the domestic laws of the countries concerned and should be under the safeguard of their normal courts.

These diverging views cannot readily be reconciled. They are not based on well-defined legal principles but rather reflect different general attitudes towards tax avoidance. These divergences and the fact that they will often be difficult to reconcile are matters that taxpayers should be aware of.

88. The nearest one can come to a conclusion is that, while tax administrations cannot offer any guarantee against the risks inherent in base company arrangements, they should certainly try to avoid over-reacting. For this, it is advisable that:

- Residence countries should observe the general principles set out in paragraphs 46-48 when shaping and deploying their counteracting measures;
- Countries which have co-operated through an exchange of information in order to combat tax avoidance should be willing to co-operate in appropriate circumstances for the avoidance of double taxation in the same case.

89. There are, however, limits to this. Co-operation will presuppose that the taxpayer has given full information and that tax authorities are sufficiently convinced that they have under view the full scope of the taxpayer's tax avoidance strategies, so that no other income of considerable amount has been sheltered from their taxation. In practice such a presupposition may often be ill-founded. Furthermore, the taxpayer cannot justifiably expect to have the taxation imposed in the base country reduced, when he voluntarily

used this country as a means of sheltering his income from taxation in his country of residence.

90. Finally, in the context of taxpayers' protection, mention should be made of the mutual agreement procedure provided for by Article 25 of the OECD Model. As a principle, OECD States generally agree that Article 25 applies to double taxation resulting from the application of defensive measures described above. This was made explicit when the OECD Model was completed, in 1977, to cover cases of economic double taxation, with the scope of the mutual agreement procedure being extended accordingly (see paragraph 8 of the Commentary on Article 9 and paragraphs 8 and 9 of the Commentary on Article 25). In practice, and except in one State where the courts have taken an opposite view, tax authorities do consider that taxation under counteracting measures is within the scope of the mutual agreement procedure.

91. However, the mutual agreement procedure does not guarantee to the taxpayer that double taxation will be fully avoided. A taxpayer whose attempts to avoid tax have been successfully frustrated by counteracting measures cannot expect his tax authorities to be anxious to enter into a mutual agreement procedure. More generally, Article 25 lays on tax administrations a mere duty to negotiate but in no way an obligation to reach agreement, as no procedure, for arbitration or otherwise, is available to the taxpayer in cases where tax administrations still disagree on the way double taxation should be remedied.

VIII. FINAL REMARKS

92. After consideration of the problems arising from tax avoidance and evasion through the use of base companies, it does not seem possible to formulate recommendations which would be applicable in all cases and acceptable to all member countries. However, a number of tentative conclusions have emerged:

a) Counteracting measures against the use of tax havens are a relatively novel feature in both domestic laws and in international tax relations, which are sensitive to the extent that such counteracting measures deal with situations where conflicts arise between the legal form and economic realities;

b) In the view of the States which have introduced them, counteracting measures constitute an essential instrument against tax avoidance practices, which in their absence would probably have become more widespread. Subject to one dissenting view, these measures are regarded as generally consistent with the principles underlying the

OECD Model Convention and the spirit of international tax treaties. Solutions to possible difficulties should be found either in the text or by observing the spirit of the Model. However, taxpayers who have recourse to artificial arrangements are taking risks against which they cannot be fully safeguarded by tax authorities;

c) The use of base companies exploits national legal systems for the diversion of income out of the reach of national taxation. It is therefore inevitable that counteracting measures go against the general structure of legal systems in member countries, such as territoriality of taxation and the recognition of juridical persons. By doing so, counteracting measures may create uncertainties as far as legal positions and business environments are concerned. States should avoid as far as possible bringing inconveniences to *bona fide* economic activities and should not infringe upon the tax sovereignty of other States;

d) Counteracting measures should therefore focus on clearly-identified fields of abuse. They should not be extended to activities such as production, or normal rendering of services or trading, of companies engaged in real industrial or commercial activity when they are clearly related to the economic environment of the country where they are resident and these activities are carried out in such a way that no tax avoidance can be suspected. Technical aspects of such legislation also should be consistent with the spirit of tax treaties. It is desirable that States which have introduced, or will introduce, measures of that type be ready to discuss any problems created in a bilateral or, where appropriate, a multilateral context;

e) Matters dealt with in this report tend to evolve over time. The Committee on Fiscal Affairs, which is the appropriate body for discussions on such measures, will therefore be closely following developments in this area, and will be prepared to take the matter up again as required, with the possibility that amendments to the 1977 Model Convention may result.

93. In conclusion, the Committee has expressed the wish that:

a) member countries which introduce measures to counteract the use of base companies, should design such measures in accordance with both the principles of international taxation generally agreed upon among OECD member countries and the spirit of double taxation conventions and take account of the undesirable consequences that such measures might have for other countries;

b) member countries, when applying any such measures, should, to the maximum extent possible keep this application consistent with their obligations arising from their double taxation conventions;

c) Those member countries which consider that counteracting measures taken in other countries infringe their tax sovereignty, or are contrary to international commitments and their tax policy, or create other problems, should take up the matter in the Committee with a view to finding appropriate solutions.

94. The Committee also intends:

i) To continue to explore problems so raised and recommend solutions to them;

ii) To discuss new developments in this field; and

iii) To take up the topic again when next considering possible amendments to the 1977 Model Convention.

Observations by Switzerland:

95. The counteracting measures described in this report, notably in paragraphs 29 to 38 and 39 to 40, are contrary to the spirit of bilateral double taxation conventions signed between OECD member countries as they result, in effect, in an extra-territorial application of domestic tax legislation.

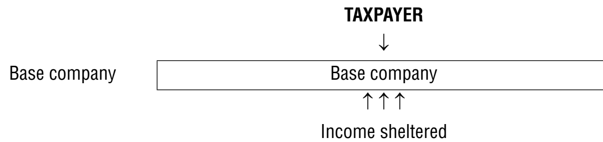
96. These measures hamper international economic relations and result in an additional administrative burden for both taxpayers and tax authorities. As divergences of view exist as to what extent some provisions (*cf.* paragraphs 30, 38 and 39 above) are contrary to the 1977 OECD Model Convention (Article 7, paragraph 1 and Article 24 especially), legal provisions of that kind should not be implemented without prior consultation of partner countries; the latter's interests should then be taken into consideration.

97. Finally, Switzerland considers that the interpretation given in paragraph 36 of the report, concerning paragraph 1 of Article 4 is not in conformity with the meaning and purpose of that provision.

ANNEX I

INTERNATIONAL COUNTERACTING MEASURES: AN OVERVIEW

Country of: Residence of shareholder	General surveillance measures – Arm’s-length rules – Procedural rules	Substance-over-form provisions	Defence legislation	Measures “from the top”



Source of income	General measures – Arm’s-length rules – Procedural rules	Specific approaches: – Look-through approach – Exclusion approach – Subject-to-tax approach – Channel approach – *Bona fide* provisions	Taxation at source (*e.g.* withholding tax)	Measures “from below”

Double Taxation Conventions and the Use of Conduit Companies

(adopted by the OECD Council on 27 November 1986)

ANNEX I. Description of "conduit" situations ..... R(6)-21

ANNEX II. Examples of bilateral clauses ..... R(6)-22

I. THE PROBLEM STATED

A. *General*

1. In its Commentary on Article 1 of the 1977 OECD Model Convention, the Committee on Fiscal Affairs expressed its concern about improper use of tax conventions (see paragraph 9) by a person (whether or not a resident of a Contracting State), acting through a legal entity created in a State with the main or sole purpose of obtaining treaty benefits which would not be available directly to such person.

2. This report deals with the most important situation of this kind, where a company situated in a treaty country is acting as a conduit for channeling income economically accruing to a person in another State who is thereby able to take advantage "improperly" of the benefits provided by a tax treaty. This situation is often referred to as "treaty shopping". The "conduit company" which is characteristic of such schemes is usually a corporation, but may also be a partnership, a trust or a similar entity. The tax advantages with which this report is primarily concerned occur to the detriment of the country of source of income. Whilst there is some brief consideration of taxation in the country of residence of the person to whom the income economically accrues, this is dealt with mainly in the foregoing report on "base companies".

3. Though not dealt with in this report, it is noted that a legal entity is sometimes created in an intermediary country for other than tax purposes (such as access to capital markets, currency regulations, political situations or the need to be present in the country of investment under the "flag" of the intermediary country), and that does, of course, have tax consequences.

B. *Conduit companies*

4. The treaty benefits referred to above may be obtained in two principle ways, either by the use of direct conduit companies or through a "stepping-stone" strategy. The essence of these manoeuvres is described below and represented diagrammatically in Annex I.

1. *Direct conduits*

   A company resident of State A receives dividends, interest or royalties from State B. Under the tax treaty between States A and B, the company claims that it is fully or partially exempted from the withholding taxes of State B. The company is wholly owned by a resident of a third State not entitled to the benefit of the treaty between States A and B. It has been created with a view to taking advantage of this treaty's benefits and for this purpose the assets and

rights giving rise to the dividends, interest or royalties were transferred to it. The income is tax-exempt in State A, *e.g.* in the case of dividends, by virtue of a parent-subsidiary regime provided for under the domestic laws of State A, or in the convention between States A and B.

2. *"Stepping stone" conduits*

   The situation is the same as in example 1. However, the company resident of State A is fully subject to tax in that country. It pays high interest, commissions, service fees and similar expenses to a second related "conduit company" set up in State D. These payments are deductible in State A and tax-exempt in State D where the company enjoys a special tax regime.

In either case the use of the "conduit company" does not give rise to substantial taxation in the conduit States. This is normally essential for the scheme, as otherwise the advantage of using the tax treaty would mostly be compensated for by taxation in that State.

C. *Examples*

5. The following are some illustrative examples:

a) Example 1

A person X, resident of a State which has not concluded any tax treaties, derives interest from bonds of a number of States, which under the laws of these States is subject to withholding taxes therein. X sets up a company in State A, which has an extended network of tax treaties; he transfers the bonds to the company. The interest flowing now to that company is subject to no, or very low, taxation in State A due to specific tax exemptions provided for companies of that kind. On the basis of State A's treaty network, the company claims exemption from or reduction of withholding taxes in the States where the interest arises. The interest received by the company which is a resident of State A is then transferred to X as a loan.

b) Example 2

A company Y resident of State 0 has developed a patent and intends to enter into license agreements with licensees in a number of countries. Y transfers the patent to a company set up in State A. As in example 1, the royalties are subject in State A to no, or very low, taxation; and exemption from, or reduction of, withholding taxes is claimed in the States of source. The royalties may then be transferred

to Y as a dividend and may often be exempted by a participation exemption in the State of residence of Y.

c) Example 3

A company Z is a parent company with wholly-owned subsidiaries in States C_1, C_2, C_3. The State of residence of Z has no treaties with C_1, C_2 or C_3. Z transfers its participations to a company in State A. The dividends received are not subject to a tax because of a participation exemption or a system of indirect credit existing in that State. Exemption from withholding taxes in the States of residence of C_1, C_2, C_3 is claimed on the basis of the treaty network of State A. The dividends are reinvested by Z in new subsidiaries.

d) Example 4 (stepping-stone)

A tax haven company plans to invest funds as a loan in a high tax State A. The funds are channelled through a company set up for this purpose in a high tax State B. This company receives interest from State A at a rate of, say, 12 per cent and pays interest to the tax haven company at a rate of 11.5 per cent. State A levies a withholding tax on interest which is reduced to nil under the convention between States A and B. State B does not levy withholding tax on interest under domestic law. In such a case the tax haven company benefits from a treaty between the high tax States A and B though it is subject to tax in the latter State only to an insignificant degree (*i.e.* paying a normal tax only on the marginal 0.5 per cent of the interest).

D. Main characteristics of "conduit configurations"

6. Through the configurations described above, the conduit company takes advantage of the treaty provisions under its own name in the State of source; economically, however, the benefit goes to persons not entitled to use that treaty. A net tax advantage results because little or no taxation occurs in the State(s) of conduit. The advantage arises in the source country. As its tax laws deal adequately with the situation (it generally taxes all non-residents including the conduit company) the problem is created exclusively by the treaty itself and therefore can only be dealt with under the treaty.

7. This situation is unsatisfactory in several ways:

a) Treaty benefits negotiated between two States are economically extended to persons resident in a third State in a way unintended by the contracting States; thus the principle of reciprocity is breached and the balance of sacrifices incurred in tax treaties by the contracting parties altered;

b) Income flowing internationally may be exempted from taxation altogether or be subject to inadequate taxation in a way unintended by the Contracting States. This situation is unacceptable because the granting by a country of treaty benefits is based, except in specific circumstances, on the fact that the respective income is taxed in the other State or at least falls under the normal tax regime of that State;

c) The State of residence of the ultimate income beneficiary has little incentive to enter into a treaty with the State of source, because the residents of the State of residence can indirectly receive treaty benefits from the State of source without the need for the State of residence to provide reciprocal benefits.

These considerations endorse the Committee on Fiscal Affairs' general view that the use of treaties is improper where a person (whether or not a resident of a Contracting State), acts through a legal entity created in a State primarily to obtain treaty benefits which would not be available directly to such person (*cf.* paragraph 1 above). They will be of relevance in deciding in which actual situations treaty benefits should be denied under existing treaties in order to cope with cases of "treaty shopping" and which new provisions should be included in bilateral treaties or in amendments to the OECD Model.

E. Other aspects of the problem

8. This report focuses on taxation in the State of source. There are also tax advantages in the State of residence of the taxpayer who economically benefits from the treaty benefits. In fact, in the examples set out in paragraph 5 above, that State cannot, or does not, tax the income, though in all cases the taxpayer has its full economic benefits (by receiving it as a loan or as a dividend or by using it for investment in other subsidiaries). However, these tax advantages raise quite different issues: they have their source in national law, and treaty aspects usually arise only as secondary problems. These issues are considered in the separate reports contained in this volume which deal with "tax havens" and "base companies". Similar considerations apply to problems arising from the issue of bonds through conduit companies set up in countries which have no withholding tax on interest.

F. Bona fide transactions

9. The configurations described above occur in many normal transactions of enterprises operating internationally. Thus a group's parent company in State X may have an operation subsidiary in State A which develops a patent in connection with its production activities and which licenses the patent to an enterprise in State B from which it receives royalties. It is clear that tax exemptions provided for such royalties in the treaty between State A and

State B should not be denied because there is no such treaty between the State of source of the royalties (B) and the State of the parent company (X). Such *bona fide* transactions do not fall within the scope of this report, for they clearly involve no improper use of tax treaties. This is, generally speaking, true in all cases in which the assets or rights giving rise to income for which treaty benefits are claimed are effectively connected to activities like producing, rendering of services or trading in the market of State A.

G. *Similar cases*

10. The foregoing discussion is based on the assumption that improper use was made by a person resident in a State which had no treaty with the State of source. Similar problems may arise where there is a treaty between the State of residence and the State of source, but:

a) This treaty offers less protection than the treaty between the State of source and the State of conduit;

b) The use of a conduit company can avoid the disclosure of information to the State of residence;

c) Both treaties offer equal protection but use is made of the conduit company in order to avoid taxation in the State of residence [*e.g.* because, by using the conduit company, income such as royalties is transformed into dividends to be exempted by a participation exemption (see example 2 of paragraph 5)].

The principles set forth in this report are applicable to such cases.

H. *Search for solutions*

11. The existence of "conduit companies" has long been perceived to be a problem in treaty negotiations. It may also become a problem in the application of existing treaties if the treaty partners were not aware of the existence of "conduit companies" when negotiating the treaty or if it only becomes a problem subsequently (*e.g.* by reason of changes in domestic laws or by the emergence of new tax avoidance schemes, as in the case of "stepping-stone strategies").

12. In seeking a response to this problem this report considers:

a) Certain provisions of existing OECD Model Convention and their implications for conduit companies (Part II);

b) Specific provisions currently found in bilateral treaties (Part III), and;

c) The problems of applying existing tax treaties (Part IV).

On the basis of these studies the report sets out suggestions for future action (Part V).

II. THE 1977 OECD MODEL CONVENTION: GENERAL APPROACH AND SPECIFIC PROVISIONS

A. *The general situation*

13. Normally under the OECD Model the conduit company is regarded as a person [Article 3, paragraph 1 *a)* and *b)*] resident in the State of conduit (Article 4). It is therefore entitled to claim the benefits of the treaty in its own name. There are of course situations where specific circumstances exclude the company from treaty benefits, but it is rarely possible to verify that such circumstances are present. This is the case, for example, where:

- The entity used as a conduit is not recognised as a juridical person (being, for example, a partnership, or a trust which may not be a "person" under the treaty provisions);
- The company is not liable to tax in the State of conduit on the basis of its domicile, place of management or other criterion of a similar nature (*e.g.* because its Board of Directors does not meet in that State);
- The assets and rights giving rise to the dividends, interest and royalties have not effectively been transferred to the company so that it acts as a mere nominee when receiving payments of such income.

In cases of doubt the conduit company should, at the request of the tax administration of the State of source, give the necessary information. It is, however, often found that these approaches are generally not sufficient to counteract the improper use of treaties in the conduit situation.

B. *Anti-avoidance provisions*

14. The OECD has incorporated in its revised 1977 Model provisions precluding in certain cases persons not entitled to a treaty from obtaining its benefits through a "conduit company".

a) Article 4, paragraph 1, second sentence excludes from the term "resident of a Contracting State" any person who is "liable to tax in a Contracting State in respect only of income from sources in that State or capital situated therein". This provision relates clearly to specific privileges granted by reason of the international relations of a person and giving such a person, in effect, the status of a non-resident rather than that of a resident. The commentaries on the 1977 OECD Model give as an example the case of certain diplomatic personnel. The provision would, however, apply according to its wording and spirit where, for example, foreign-held companies are exempted from tax on their foreign income (as viewed from their State of residence) by privileges tailored to attract conduit companies. It has, however, inherent difficulties and limitations. Thus it has to be interpreted

restrictively because it might otherwise exclude from the scope of the Convention all residents of countries adopting a territorial principle in their taxation, so that there is an element of uncertainty concerning its application against conduit companies. Furthermore, to be effective, such provisions should also apply where the conduit company is fully exempt from tax under specific privileges, even though they cannot cover the stepping stone situation (see paragraph 4 *b)* above and paragraph 36 of the previous report on base companies) or cases where the special status is not based on an exemption of income.

b) Articles 10 to 12 of the OECD Model deny the limitation of tax in the State of source on dividends, interest and royalties if the conduit company is not its "beneficial owner". Thus the limitation is not available when, economically, it would benefit a person not entitled to it who interposed the conduit company as an intermediary between himself and the payer of the income (paragraphs 12, 8 and 4 of the Commentary to Articles 10, 11 and 12 respectively). The Commentaries mention the case of a nominee or agent. The provisions would, however, apply also to other cases where a person enters into contracts or takes over obligations under which he has a similar function to those of a nominee or an agent. Thus a conduit company can normally not be regarded as the beneficial owner if, though the formal owner of certain assets, it has very narrow powers which render it a mere fiduciary or an administrator acting on account of the interested parties (most likely the shareholders of the conduit company). In practice, however, it will usually be difficult for the country of source to show that the conduit company is not the beneficial owner. The fact that its main function is to hold assets or rights is not itself sufficient to categorise it as a mere intermediary, although this may indicate that further examination is necessary. This examination will in any case be highly burdensome for the country of source and not even the country of residence of the conduit company may have the necessary information regarding the shareholders of the conduit company, the company's relationships to the shareholders or other interested parties or the decision-making process of the conduit company. So even an exchange of information between the country of source and the country of the conduit company may not solve the problem. It is apparently in view of these difficulties that the Commentaries on the 1977 OECD Model mentioned the possibility of defining more specifically during bilateral negotiations the treatment that should be applicable to such companies (*cf*. paragraph 22 of the Commentary on Article 10).

15. The new provisions of the 1977 OECD Model thus deal with the conduit situation in a rudimentary way, expressing only a general concern that improper use of treaties should be avoided. Although it is clear that all necessary information should be exchanged between the two Contracting States for the application of these clauses, this is not sufficient to preclude a person from acting through a legal entity created in a State in order to obtain treaty benefits which would not be available directly to them, and from obtaining unjustifiable tax advantages (paragraphs 8 and 9 of the Commentary on Article 1).

16. Opinions may differ as to whether the absence of an overall solution to the conduit problem was at the time a serious flaw in the 1977 OECD Model. It was understood, as pointed out in the OECD Commentaries, that member countries were free to insert adequate solutions in their bilateral treaties. However, the problem has become more acute over recent years and calls for further study. Improvements seem advisable in several respects:

a) OECD should set out policies regarding conduit companies in more detail in order to prevent improper use of tax treaties. Consequently the Commentaries should in some way (*e.g.* in a summarised form or by citing this report) take into account the conclusions reached by the Committee on Fiscal Affairs in Part III below;

b) Recently new strategies seem to have been developed for the use of conduit companies based in many countries. The OECD Model or its Commentaries should accordingly offer solutions to this problem taking into account the considerations under Part IV;

c) The provisions mentioned in paragraph 14 above and/or the Commentaries should be revised in order to solve any existing difficulties and doubts.

These problems will be considered in any revision of the OECD Model.

III. BILATERAL TREATIES: PROBLEMS FOR NEGOTIATIONS

A. General policy approaches

1. *Treaty policy* vis-à-vis *low-tax countries*

17. The conduit problem is normally generated by the fact that treaty benefits are not balanced by corresponding tax in the country where the conduit company has its residence, because under that country's system no tax (or no significant tax) arises. In such a situation, a radical solution would be not to conclude treaties with countries which are especially prone to

becoming a base for conduit companies (*e.g.* because they have no income tax or offer specific tax exemptions for such companies). Basically this policy in many cases is sound as the slight double taxation which may occur may be dealt with satisfactorily under provisions of domestic law.

2. *Specific provisions relating to low-tax countries*

18. Refraining from treaties with such countries is, however, not always feasible for other countries, for example, because important normal business relationships exist between the two countries concerned which should be protected against double taxation, or because of other overriding treaty objectives (*e.g.* improving the climate for private investment in developing countries). Furthermore, the conduit situation may even occur between countries whose taxation has no special features, especially in the case of stepping-stone strategies (see paragraph 4(2) above).

19. In such situations it would correspond to sound treaty policy to take special care that bilateral treaties form an instrument for avoiding international double taxation while counteracting improper use of its provisions. A treaty partner may, if it wishes to be protected against international tax avoidance schemes:

- Ask that the other State be prepared to co-operate by exchange of information and in any other way in order to prevent international tax avoidance;
- Take the necessary measures to be able in practice to give information [see Recommendation 833 (1978) of the Parliamentary Assembly of the Council of Europe, paragraph 11 *i)*].

Reference may also be made to that part [paragraph 11 *ii)*] of the Recommendation cited above according to which States should refrain from creating special tax laws which tend in practice to give undue tax favours to certain companies in respect to foreign-earned income.

20. Difficulties with conduit companies may occur between all OECD member countries, as specific tax avoidance schemes may use even a so-called "high tax country" as a basis for an improper use of tax treaties (*e.g.* by "stepping-stone companies" – *cf.* paragraph 4(2) above). Most OECD member countries are ready to co-operate in such situations in the way described in the foregoing paragraph. As bilateral treaties of an OECD country with other countries may be made use of by residents of other OECD countries there is a common interest among many OECD member countries that adequate policies are developed.

B. *Specific provisions relating to conduit companies*

21. An important method for finding adequate solutions to problems caused by conduit companies is the insertion of specific clauses dealing with this special situation. In this section, several specific approaches are discussed under the headings "general description", "scope and limitations" and "evaluation". These are:

1. The "look-through" approach (paragraphs 23-25);
2. The exclusion approach (paragraphs 26-28);
3. The subject-to-tax approach (paragraphs 29-36);
4. The channel approach (paragraphs 37-41);
5. *Bona fide* provisions (paragraph 42).

Examples of such provisions used in certain tax treaties between OECD members are set out in Annex II.

22. The Committee on Fiscal Affairs has refrained from drafting definitive texts, from making strict recommendations as to the circumstances in which they should be applied and from giving an exhaustive list of such possible counter-measures. The texts quoted below are merely intended as suggested benchmarks which treaty negotiators might consider when searching for a solution to specific cases. In referring to them there should be taken into account:

- The degree to which there may be actual tax advantages obtained by conduit companies;
- The legal context in both Contracting States, and;
- The scope of *bona fide* economic activities that might unintentionally be covered by such provisions.

1. *The "look-through" approach*

a) General description

23. The most radical solution to the problem of conduit companies would be to allow treaty benefits to a company only insofar as the company is owned by residents of the State of which the company is a resident. For example, such a provision might have the following wording:

> A company which is a resident of a Contracting State shall be entitled under this Convention to relief from taxation in the other Contracting State with respect to any item of income, gains or profits, only to the extent that it is not owned directly or through one or more companies, wherever resident, by persons who are not residents of the first-mentioned State.

b) Scope and limitations

24. The "look-through approach" ("piercing the veil of the company") is the most direct way of attacking the conduit problem. While it is relatively simple and straightforward, there are, however, evident disadvantages:

i) Such provisions are incompatible with the principle of the legal status of corporate bodies, as recognised in the legal systems of all OECD member countries, and except in cases of abuse, in the OECD Model;

ii) Such provisions would require extensive *bona fide* amplifications (*cf.* paragraph 4(2) below). This may lead to rules which are complicated and burdensome to administer;

iii) The provisions do not prevent "stepping-stone" strategies [*cf.* paragraphs 42 and 5 (d) above];

iv) There would have to be machinery to apply the clause in a simple and secure way. This may require the shift of the burden of proof;

v) Implementation of the provision would be very difficult in countries where companies' stock is mainly made up of bearer shares.

c) Evaluation

25. The "look-through approach" seems an adequate basis for treaties with countries which have no or very low taxation and where little substantive business activities would normally be carried on. Even in these cases it would be necessary to alter the provision or to substitute for it another one to safeguard *bona fide* business activities. What is said in paragraph 19 above would be relevant to such modifications.

2. The exclusion approach

a) General description

26. Often conduit situations can be created only by the use of tax-exempt (or nearly tax-exempt) companies which may be distinguished by special legal characteristics. The improper use of tax treaties may then be avoided by denying the tax treaty benefits to these companies. The main cases are specific types of companies enjoying tax privileges in their State of residence giving them in fact a status similar to that of a non-resident. As such privileges are granted mostly to specific types of companies as defined in the commercial law or in the tax law of a country, the most radical solution would

be to exclude such companies from the scope of the treaty. Another solution would be to insert a safeguarding clause such as the following:

> No provision of the Convention conferring an exemption from, or reduction of, tax shall apply to income received or paid by a company as defined under Section ... of the ... Act, or under any similar provision enacted by ... after signature of the Convention.

The scope of this provision, as far as income paid by the company is concerned, could be limited by referring only to specific types of income, such as dividends, interest, capital gains, directors' fees, etc.

Under such provisions companies of the type concerned would remain entitled to the protection offered under Article 24 (non-discrimination) and to the benefits of Article 25 (mutual agreement procedure) and they would be subject to the provisions of Article 26 (exchange of information),

b) Scope and limitations

27. An exclusion provision would cover companies which, under the tax law of the State of residence, have in practice the status of a non-resident, rather than that of a resident. Such a provision should, however, apply not only in cases of full exemption, but also in the case of a reduction of tax to levels lower than the expected overall treaty benefits. On the other hand, an exclusion provision would not exclude from treaty benefits charitable institutions enjoying tax exemption as a consequence of the specific purpose for which they are organised and operated. Such an exclusion provision, however, is of a very limited scope and cannot deal with more advanced techniques of improper use of tax treaties.

c) Evaluation

28. Exclusion provisions are clear and their application is simple, even though they may require administrative assistance in some instances. They are an important instrument by which a State which has created special privileges in its tax law may prevent these privileges from being used in connection with the improper use of tax treaties concluded by that State.

3. *The subject-to-tax approach*

a) General description

29. General subject-to-tax provisions provide that treaty benefits in the State of source are granted only if the respective income is subject to tax in the State of residence. This corresponds basically to the aim of tax treaties, namely to avoid double taxation. For a number of reasons, however, the OECD Model does not recommend such a general provision. While this seems

adequate with respect to normal international relationships a subject-to-tax approach might well be adopted in a typical conduit situation. A safeguarding provision of this kind could have the following wording:

> Where income arising in a Contracting State is received by a company resident of the other Contracting State and one or more persons not resident in that other Contracting State:
>
> *i)* Have directly or indirectly or through one or more companies, wherever resident, a substantial interest in such company, in the form of a participation or otherwise, and
>
> *ii)* Exercise directly or indirectly, alone or together, the management or control of such company, any provision of this Convention conferring an exemption from, or a reduction of, tax shall apply only to income which is subject to tax in the last-mentioned State under the ordinary rules of its tax law.

The concept of "substantial interest" may be further specified when drafting the Convention. Contracting States may express it, for instance, in terms of a certain percentage of the capital or of the voting rights of the company.

b) Scope and limitations

30. The subject-to-tax approach, although somewhat similar to the exclusion clauses, covers cases in which it is not possible to give a strict definition of the excluded situation. Thus, the "taxation under ordinary rules" test would exclude from treaty benefits companies enjoying:

- Specific privileges granted to "base companies", "domiciled companies", etc.;
- Waivers of tax under specific arrangements between the conduit company and the tax administration;
- Substantial reduction of tax as well as complete exemption.

31. On the other hand there are advanced techniques of improper use of tax treaties which could not be covered by the subject-to-tax approach. This is especially so with the "stepping-stone strategies", where the company incurs expenses it can offset against income in accordance with normal rules of tax laws.

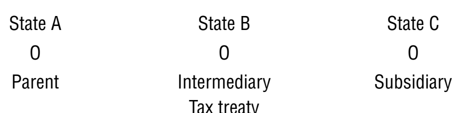
32. Moreover, the subject-to-tax approach would exclude from the benefit of tax treaties companies enjoying:

- Tax privileges granted to charitable organisations, pension funds or similar institutions;
- Tax privileges granted with a view to fostering the economic development of the country of the conduit company ("tax holidays").

In circumstances such as those derogations from such provisions may be envisaged.

c) Substantial participation

33. Special attention should be given in this context to the holding of a substantial participation in a company through an intermediary as illustrated by the following diagram:



In this case State B will grant dividends received by the intermediary from the subsidiary an exemption or an underlying tax credit tantamount to an exemption or near exemption.

34. As this exemption or credit is granted with a view to the tax borne by the subsidiary in its State of residence on the distributed profits (State C), many States will regard it as part of their normal rules for avoiding double taxation rather than a specific tax privilege. This approach would recommend that it be regarded as a tax under ordinary rules for the purposes of the foregoing paragraphs. Situations of this kind may, however, involve elements which would make it improper for the intermediary company to invoke the benefits of a tax treaty. This may, *inter alia,* be true if the intermediary company:

- Is not the beneficial owner of the dividends;
- Has to be regarded as a mere channeling company as referred to under paragraphs 37 to 41, or;
- Where such companies are used to shield off a low-taxed company against taxation in the country of the parent.

35. On the other hand, there is certainly no reason to regard the use of the treaty as improper, if the participation is effectively connected to a *bona fide* commercial activity carried on by the intermediary. Contracting States should consider cases of that kind with a view to their specific situation.

d) Evaluation

36. The subject-to-tax approach seems to have certain merits. It may be used in the case of States with a well-developed economic structure and a complex tax law. It will, however, be necessary to supplement this provision by inserting *bona fide* provisions in the treaty to provide for the necessary flexibility (*cf.* paragraph 42 below); moreover, such an approach does not offer adequate protection against advanced tax avoidance schemes such as "stepping-stone strategies".

4. *The channel approach*

a) General description

37. The approaches dealt with in the foregoing sections are in many ways unsatisfactory. They refer to the changing and complex tax laws of the Contracting States and not to the arrangements giving rise to the improper use. It has been suggested that the conduit problem be dealt with in a more straightforward way by inserting a provision which would single out cases of improper use with reference to the conduit arrangements themselves. Such a provision might have the following wording:

> "Where income arising in a Contracting State is received by a company resident of the other Contracting State and one or more persons not resident in that other Contracting State:
>
> *i)* Have directly or indirectly or through one or more companies, wherever resident, a substantial interest in such company, in the form of a participation or otherwise, and
>
> *ii)* Exercise directly or indirectly, alone or together, the management or control of such company,
>
> any provision of this Convention conferring an exemption from, or a reduction of, tax shall not apply if more than 50 per cent of such income is used to satisfy claims by such persons (including interest, royalties, development, advertising, initial and travel expenses, depreciation of any kind of business assets including those on immaterial goods, processes, etc.)."

b) Scope and limitations

38. This approach would be satisfactory in covering a broad spectrum of cases typically involving improper use of tax treaties like:

- Cases of mere administration of assets;
- The so-called "stepping-stone strategies";
- Other cases where income is merely transmitted through conduit companies with a view to minimising taxes.

39. On the other hand it could cover normal business activities or cases where the assets from which the income in question arises is effectively connected with a genuine activity like the carrying on of a trade or business or the exercise of independent personal services. Therefore, it would seem necessary to supplement such a provision by a *bona fide* clause (*cf.* paragraph 42 below).

40. Also this solution is of a very general nature, which might lead to administrative difficulties and doubts in its application such as the types of

expenses to be covered and the linkage, both in amount and in time, to be made between the income received and the expenses paid. This is evident in the case of substantial holding (*cf.* paragraph 33 above), as well as in cases where assets are held by a bank or an insurance business. The interpretation would certainly depend largely on standards the Contracting States have developed internally to counter unjustifiable tax advantages (like the principle of "substance-over-form", general anti-abuse clauses, etc.).

c) Evaluation

41. The solution proposed in paragraph 37 above appears the only one to be effective against "stepping-stone" devices. It is not found as such in bilateral treaties but its principle seems to underlie the Swiss provisions against the improper use of tax treaties by certain types of Swiss companies. Contracting States which consider including a clause of this kind in their convention should bear in mind that it may cover normal business transactions and would therefore have to be supplemented by a *bona fide* clause. Moreover, because of the administrative difficulties referred to above, it seems advisable to include it only in specific cases, where the use of "stepping-stone devices" frequently occurs or is likely to occur.

5. *Bona fide provisions*

42. The solutions described above are of a general nature. In connection with them, it will be necessary to provide specific provisions to ensure that treaty benefits will be granted in *bona fide* cases. Such provisions could have the following wording:

i) General bona fide provision

"The foregoing provisions shall not apply where the company establishes that the principal purpose of the company, the conduct of its business and the acquisition or maintenance by it of the shareholding or other property from which the income in question is derived, are motivated by sound business reasons and thus do not have as primary purpose the obtaining of any such benefits."

ii) Activity provision

"The foregoing provisions shall not apply where the company is engaged in substantive business operations in the Contracting State of which it is a resident and the relief from taxation claimed from the other Contracting State is with respect to income which is connected with such operations."

iii) Amount of tax provision

"The foregoing provisions shall not apply where the reduction of tax claimed is not greater than the tax actually imposed by the Contracting State of which the company is a resident."

iv) Stock exchange provision

"The foregoing provisions shall not apply to a company resident of a Contracting State if the principal class of its shares is registered on an approved stock exchange in a Contracting State or if such company is wholly owned – directly or through one or more companies each of which is a resident of the first-mentioned State – by a company which is a resident of the first-mentioned State and the principal class of whose shares is so registered."

v) Alternative relief provision

In cases where an anti-abuse clause refers to non-residents of a Contracting State, it could be provided that such expression "shall not be deemed to include residents of third States that have income tax conventions in force with the Contracting State from which relief from taxation is claimed and such conventions provide relief from taxation not less than the relief from taxation claimed under this Convention."

The determination of those provisions which are regarded as necessary in a specific treaty depends on the general approach taken in that treaty.

IV. APPLICATION OF EXISTING TREATIES

A. General considerations

43. Existing conventions may have clauses with safeguards against the improper use of their provisions. Where no such provisions exist, treaty benefits will have to be granted under the principle of "*pacta sunt servanda*" even if considered to be improper. The Contracting States should, however, be prepared to grant all possible help by exchange of information (*cf.* paragraph 19 above) and to remedy the situation by adequately revising the treaty (*cf.* Part III above).

B. Handling of artificial tax avoidance

44. It may be asked, however, whether artificial tax avoidance schemes could not be countered by applying certain domestic measures available to

Contracting States to fight domestic tax avoidance. Two types of situations may be identified:

a) A State may wish to protect itself against "abuse of law" by applying the general provisions in its domestic laws: it will then deny the benefits of the convention to income paid by a resident of that State to a company situated in the other State when it has reasons to suspect an improper use of the convention. The question arises as to whether the denial of treaty benefits in such cases is compatible with treaty obligations. This relates to the issue of the priority accorded to international law in relation to domestic law, a matter on which opinions differ among States, some taking the view that where the beneficiary of the income fulfils the conditions set in the convention (beneficial ownership, residence), the provisions of the convention should apply, notwithstanding the domestic provisions of the State of source (see also paragraphs 43 to 48 in the foregoing report on "base companies") others taking the contrary view.

b) A State may be led to take steps to protect its partners from the result of the interaction of special characteristics of its domestic laws with the use of conduit companies situated in its territory. Switzerland is a case in point. The question of the impact of these unilateral measures in the State of source may arise in such situations. For instance, if Switzerland, as State of residence of the conduit company, finds that the company, while fulfilling the conditions set in the convention, does not meet the requirements of its domestic laws and, accordingly, refuses to certify and transmit to the tax authorities of the State of source a request for relieving tax withheld at source, it may be questioned whether the State of source has the right to refuse relief.

45. A special difficulty increasingly encountered by tax authorities under existing conventions is the use of highly artificial arrangements called "stepping-stone" devices [*cf.* paragraphs 4(2) and 5 *d)*]. Such arrangements make sense of the fact that two high taxing countries:

- Have differing tax laws (one levies a withholding tax on interest, the other does not);
- Respect the taxation rights of the tax haven country, and;
- Regard anti-abuse clauses in their treaties as unnecessary.

Improper use of tax conventions in such cases may be counteracted by changing one of these basic conditions. It is, however, evident that this may require a change of policies which could affect *bona fide* economic activities. This might also lead to complicated rules, highly burdensome to tax administrations. It may therefore be preferable to counteract such highly complex arrangements by recourse to the principle of "substance over form".

V. FINAL REMARKS

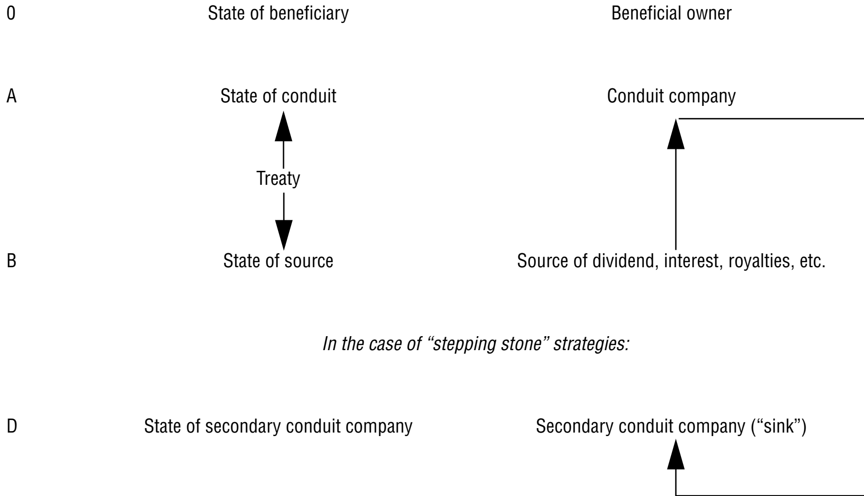
46. The Committee considers that competent authorities in charge of negotiating or revising conventions and of implementing existing ones:

i) Should pursue their efforts and foster co-operation against improper use of tax conventions through "conduit companies" and, for this purpose

ii) Take account of the considerations set out in Parts II to to IV of this report.

ANNEX I

DESCRIPTION OF "CONDUIT" SITUATIONS



ANNEX II

EXAMPLES OF BILATERAL CLAUSES

A. The "exclusion" approach

1. *Type related exclusion (Germany-Luxembourg Agreement)*

Article 1

1. The Agreement shall not apply to holding companies within the meaning of the special Luxembourg laws (currently the Acts of 31st July 1929 and 27th December 1937). Neither shall it apply to income derived from such holding companies by a person domiciled in the Federal Republic of Germany or to shares in such companies belonging to such person.

2. The Agreement shall not apply to non-recurrent taxes on fortune or on capital gains.

3. If any doubts arise with respect to the future taxes to which the Agreement shall apply, the competent authorities of the Contracting States shall come to an understanding with a view to interpreting or amending the Agreement as may be considered necessary.

2. *Tax status related exclusion (German-Canadian Agreement)*

Article 29 Miscellaneous rules

1. With respect to income taxable in a Contracting State, the provisions of this Agreement shall not be construed to restrict in any manner any exclusion, exemption, deduction credit, or other allowance accorded:

   a) By the laws of a Contracting State in the determination of the tax imposed by that State, or;

   b) By any other agreement entered into by a Contracting State.

2. It is understood that nothing in the Agreement shall be construed as preventing:

   a) Canada from imposing its tax on amounts included in the income of a resident of Canada according to Section 91 of the Canadian Income Tax Act;

   b) The Federal Republic of Germany from imposing its taxes on amounts included in the income of a resident of the Federal Republic of Germany according to Part IV of the German "*Aussensteuergesetz*".

Where such imposition of tax gives rise to a double taxation, the competent authorities shall consult for the elimination of such double taxation according to paragraph 3 of Article 25.

3. Articles 6 to 23 of this Agreement shall not apply to non-resident-owned investment corporations as defined under Section 133 of the Canadian Income Tax Act, or under any similar provision enacted by Canada after the signature of this Agreement, or to any income derived from such companies by any shareholders thereof.

B. The "subject to tax" approach

B1. (Germany-United Kingdom treaty)

Article V1

1. Dividends paid by a company resident in one of the territories to a resident of the other territory may also be taxed in the former territory. Tax shall not, however, be charged in that former territory at a rate in excess of 15 per cent on the gross amount of such dividends provided that those dividends either are subject to tax in the other territory or, being dividends paid by a company which is resident in the United Kingdom, are exempt from Federal Republic tax under the provisions of subparagraph *a)* of paragraph 2 of Article XVIII.

2. Notwithstanding the provisions of paragraph 1 of this Article Federal Republic tax on dividends paid to a company resident in the United Kingdom by a company resident in the Federal Republic at least 25 per cent of the voting shares of which are owned directly or indirectly by the former company may be charged at a rate exceeding 15 per cent but not exceeding 25 per cent if the rate of Federal Republic corporation tax on distributed profits is lower than that on undistributed profits, and the difference between those two rates is 28 per cent or more: where the difference between the two rates is 20 per cent or more but less than 28 per cent Federal Republic tax on such dividends may be charged at a rate exceeding 15 per cent but not exceeding 20 per cent.

3. Where a company which is a resident of one of the territories derives profits or income from sources within the other territory, there shall not be imposed in that other territory any form of taxation on dividends paid by the company to persons not resident in that other territory, or any tax in the nature of an undistributed profits tax on undistributed profits of the company, whether or not those profits represent, in whole or in part, profits or income so derived.

B2. (Germany-Switzerland treaty)

Article 23

2. Even though a company meets the conditions provided in paragraph 1, a company resident in Switzerland in which persons who are not residents of Switzerland have, directly or indirectly, a substantial interest in the form of a participation, may only claim the benefit of the reduction of taxes imposed by the Federal Republic of Germany on German source interest [Article 11, paragraph 1], royalties [Article 12, paragraph 1], and on capital gains [Article 13, paragraph 3], if these interests, royalties, or capital gains are subject, in the canton in which this company has its seat, to the cantonal tax on income under the same or similar provisions as are envisaged in regarding the federal defence tax.

3. A family foundation resident in Switzerland may not claim the benefit of the reductions of tax imposed by the Federal Republic of Germany on, German source dividends [Article 10, paragraph 2, through 4], interest [Article 11, paragraph 1], and royalties [Article 12, paragraph 1], and capital gains [Article 13, paragraph 3], if the founder, or the majority of the beneficiaries are non-residents of Switzerland and more than one-third of the relevant income is not, or will not benefit persons which are residents of Switzerland.

4. If the competent authority of the Contracting State, from which the items of income originate, has reasonable grounds to cast doubt on the declarations made by the recipient of the items of income in his effort to obtain a tax reduction, which are confirmed by the competent authorities of the other State, then the competent authority of the first-mentioned State shall communicate these grounds to the competent authority of the other State; this authority shall then undertake a new investigation and inform the competent authority of the first-mentioned State of the conclusions reached. In case of disagreement between the competent authorities of the two States, Article 25 shall apply.

C. The "channel" approach

German-Swiss tax treaty

Article 23

1. A company which is a resident of a Contracting State, and in which persons who are not residents of that State have, directly or indirectly, a substantial interest in the form of a participation, or otherwise, may only claim the tax reductions provided for in Articles 10 through 12 with respect to

dividends, interest, and royalties, derived from sources in the other State, as provided for in Articles 10 through 12, where:

a) The interest-bearing debts to persons who are not residents of the first-mentioned State are not higher than six times its equity capital and reserves; this restriction does not apply to banks and similar institutions;

b) The interest paid on loans agreed upon with non-resident lenders is not paid at a higher rate than the normal interest rate; the normal interest rate means:

i) With respect to the Federal Republic of Germany: the rate of the current yield of interest-bearing securities from inland issuers plus two percentage points,

ii) With respect to Switzerland: the average interest rate on debt obligations issued by the Swiss Confederation plus two percentage points;

c) Not more than 50 per cent of the relevant income derived from sources in the other Contracting State is used to satisfy claims (interest, royalties, development, advertising, initial and travel expenses, depreciation on any kind of business asset including on immaterial goods, processes, etc.) by non-residents of the first-mentioned State;

d) Expenses connected with the relevant income derived from sources in the other Contracting State are met exclusively from that income;

e) The corporation distributes at least 25 per cent of the relevant income derived from sources in the other Contracting State.

Additional measures already taken, or to be taken by one of the Contracting States, against abuse of the use of tax relief relating to withholding tax levied at source in the other Contracting State, are not prejudiced hereby.

The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities

(adopted by the OECD Council on 27 March 1987)

ANNEX. Article 17 . . . . . R(7)-30

INTRODUCTION

1. This is the second study that the Committee on Fiscal Affairs has undertaken on the problems that arise in the taxation of itinerant activities.[1] It examines the tax treatment of resident and non-resident artistes and athletes.

2. The report is based upon 19 country submissions[2] and, unless otherwise indicated, the descriptions provided refer to 1986. The replies were analysed by the Working Party on Tax Evasion and Avoidance and the tax treaty aspects of the report were prepared by the Working Party on Double Taxation of the Committee on Fiscal Affairs.

3. The purpose of the report is to describe the main problems which arise in taxing income from entertainment, artistic and sporting activities at the national and international level and to suggest ways in which these problems can be overcome.

4. The structure of the report is as follows: Part I outlines the problem; Part II examines the information needs of tax authorities; Part III looks at the assessment and collection of tax and Part IV at the influence of double taxation conventions. Some concluding comments and suggestions for improvement are provided in Part V.

5. Since the main focus of the report is on the tax treatment of "artistes and athletes", it may be as well to define these terms. For the purpose of the report, these terms are taken to cover any person engaged, either individually or as a member of a group, in public entertainment or sporting activities (see Part IV B *i)* for an elaboration of this definition). The terms "artistes and athletes" are also used in the title of Article 17 of the 1977 Model Convention on Income and Capital (hereafter referred to as the 1977 Model Convention). A number of countries, however, prefer the term "entertainer" to "artiste" and "sportsmen" to "athlete" and the text and commentary of Article 17 used the terms artiste and entertainer almost interchangeably. To simplify matters, however, this report uses the terminology "artiste and athlete", though it has been agreed that in any general revision of the 1977 Model, the term "sportsmen" will replace "athletes". Sometimes the term "performer" is used as a shorthand term for persons carrying out public entertainment, artistic or sporting activities.

I. THE PROBLEM STATED

6. The world of entertainment is characterised by: short-term activities (frequently one-off performances); an increasingly blurred distinction between dependent and independent services and business activities; sophisticated tax avoidance schemes. There are no reliable quantitative

estimates available of tax non-compliance in this area, whether in terms of the amount of income involved or revenue forgone. Nevertheless, where countries have undertaken systematic audits (*e.g.* in Canada and the Netherlands) of these activities, they have shown clear evidence of non-compliance in this area. Studies undertaken a few years age in Canada, for example, indicated a practice of not reporting income, whether consciously or unconsciously, amongst performers at the low end of the income scale whose activities are particularly transient in nature. The United Kingdom has a similar experience. Performers in the lower ranks rarely disclose casual earnings from jobs outside their profession. With the co-operation of management, club entertainers frequently understate their earnings.

7. Sophisticated tax avoidance schemes, many involving the use of tax havens, are frequently employed by top-ranking artistes and athletes. Whilst some countries do not consider such activities of major importance, given the limited number of persons involved in international activities of this sort and the relatively small amounts of revenue involved, there is general agreement that where a category of – usually well-known – taxpayers can avoid paying taxes this is harmful to the general tax climate, which therefore justifies coordinated action between countries.[3]

A. The business

8. The problems of effectively taxing artistes and athletes are rooted in the diverse forms their activities take. Success can be sudden but ephemeral. Relatively unsophisticated people – in the business sense – can be precipitated into great riches, income sources can be many and varied. Travel, entertainment and various forms of ostentation are inherent in the business and there is a tendency to be represented by adventurous but not very good accountants. These activities have evolved rapidly in recent years, taking new presentational and organisational forms. The established performer operating with an easily defined role is still common but the industry is increasingly characterised by loosely and multi-aspect groups. The best examples of this are seen in the pop-music industry which operates through complicated chains of limited companies, partnerships, joint ventures and sole trading enterprises.

9. Apart from the performers themselves, the industry covers a large entourage, including managers, various administration and publicity staff and road crews. Some members of a group receive music and/or writing royalties and fees; they all receive different types of record and broadcasting royalties. Frequently sources of income in different parts of the world are taken through different companies. Such forms of organisation have developed in response to the needs of a business which crosses international and occupational boundaries. It is likely that the inventiveness and complexity of the industry

will continue to expand, and perhaps extend into other aspects of the entertainment business.

B. *Scope of the report*

10. The diversity of situations described above makes it difficult to cover in a single report all the relevant taxation aspects. The emphasis in the present report is on issues which are specific to the industry. General domestic problems relating to any dependent or independent services which were already dealt with in an earlier report (see note 1) are therefore not dealt with here. A case in point is sportsmen employed permanently in a country (such as professional soccer players) who are normally considered as employees of their clubs.[4]

11. The distinction between professionals, semi-professionals or amateurs is often a fine one in practice, and is not elaborated upon in this report. There are obviously cases – potentially numerous – where, for instance, amateurs obtain compensation for their expenses (or more), and where professionals exercise some undeclared activities when they are not officially working. Problems related to these casual earnings are not limited to the entertainment field and are subject to the usual checks required on "black" activities.

12. Performers may receive a wide variety of types of income, whether directly or indirectly, and not all of which are related to actual performances. Artistes, for example, will frequently receive copyright royalties or other income related to the sales of records; they may benefit from free advertising, or even receive fees for advertising their own name. Sportsmen may receive remuneration from manufacturers of sports equipment on condition that they use the manufacturer's brand or publicise the products of the same brand. Payments for advertising goods not related to the entertainer's activities are not infrequent. For the most famous, the variety of contracts and types of income call for worldwide financial and tax planning with the assistance of specialised advisors. From the tax authorities' point of view, this diversity of income sources raises a number of assessment problems.

13. In a number of cases, artistes and athletes may make more money from these related activities than from their activities as performers. However, this report concentrates, in the first instance, on income related to actual performances, even though this distinction may be artificial in some cases.

C. *Main principles*

14. The main principle which underlines this report is that income from entertainment and sporting activities should be taxed in the same way as income from any other activities. Exceptions to this principle should be kept to a minimum. Problems can arise because some governments may accept

that a particular event is a "cultural exchange", and, therefore, no tax should be imposed on profits arising from it. Nevertheless, in practice, such events are generally staged for the purpose of profit and granting special treatment to some events of this kind makes it more difficult to resist similar claims from other domestic circles on the grounds of fair competition. Country experiences suggest that some tax authorities are better able to resist the "cultural exchange" pressure groups than others, or are better placed to check that the income generated is taxable in the residence country. Similar problems arise in the context of "charitable events" (where it is assumed that there is no "income" produced by the event), or tax-free performances by State-supported troupes. In all such cases, the Committee considers that tax privileges should be limited to genuine, justified cases, for instance, to events organised as part of an official "cultural exchange programme".

15. The second principle upon which this report is drafted is that artistes and athletes are, as are other taxpayers, fully liable to tax in their country of residence and, ideally, should be taxed accordingly. Whilst certain countries provide for exemption of foreign income, the amount of income earned abroad should be known when, under the general income tax, this affects the progressive rate that is applied to other income sources.

16. However, as is usually the case with itinerant activities, the country of residence has difficulty in identifying the activities of its residents abroad. It will therefore have to rely mostly on information provided by the country where the activities are exercised. For this reason, and also in order to avoid practical difficulties, it is felt that the principle on which Article 17 of the 1977 Model Convention is based should be followed. The main purpose of this report is therefore to help member countries to establish a system by which the income of artistes and athletes could effectively be taxed in the country of performance.

17. In taxing artistes and athletes, tax authorities encounter problems first in obtaining information about the performances taking place and secondly in the assessment and collection of tax which arise from the nature of the trade or the use of legal avoidance schemes.

II. THE NEED FOR INFORMATION

18. It is in the nature of the trade that entertainment, artistic and sporting activities should be advertised, so as to attract the public. However, such publicity very much depends on the importance of the event and experience shows that, in many cases, a large part of these activities do not come to the attention of the tax authorities. Furthermore, even when an activity is noticed, problems often arise in identifying the performers themselves.

A. *Country experiences*

19. The experience of countries participating in the study shows that, generally speaking, relying on the taxpayers themselves to report accurately the amount of income earned at home and abroad is even less realistic in the entertainment area than in other areas, considering how easy it is for a number of performers to conceal such income. Also it is commonly believed in the entertainment world of some countries that all sums earned abroad are free of domestic tax, and returns and accounts frequently reflect this belief. In the absence of other checks, the tax authorities will therefore not be able to impose tax on such activities.

20. Where artistes and athletes perform dependent services in most countries, they will come under PAYE or a wage-tax system and their employers (if situated in the country) will report that part of their income. Where, however, the employer is a controlled limited company, the importance of the case may often not be realised by the tax authorities. The PAYE file may contain only the entertainer's real name, not his stage name, and the name of the company may not suggest an association with the entertainment business. This problem is accentuated where, as increasingly occurs, a multiplicity of controlled limited liability companies are created to receive various streams of income. Additional problems can occur if the employer is situated abroad (*e.g.* non-compliance with PAYE regulations). In the absence of any PAYE system, information obtained through the usual reporting system for wage earners may not be useful, as a lot of time may elapse since the income was earned, and the entertainer's position (or residence) may have changed.

21. Most difficulties arise with self-employed artistes and athletes, and it is mainly for them that an elective information-gathering system is desirable. Yet, it is usually difficult to identify and locate such people, even in cases where written contracts exist, because of a number of factors: the use of pseudonyms or stage names on agency contracts; the use of false social security numbers where these are noted on entertainment contracts, the fact that payments for services are made in cash, after deductions for agents' fees; the difficulty inherent in tracing and locating people two or three years following the rendering of the service.

B. *Sources of information*

22. The difficulties set out above require early receipt of information concerning the performance itself, preferably before it takes place. Countries have reported a number of possible non tax-related sources, general sources information, such as newspaper and other advertising, specialised magazines and periodicals. Prize monies earned by major athletes sometimes also appear
