FOREWORD

This full version of the OECD Model Tax Convention contains the full text of the *Model Tax Convention on Income and on Capital* as it read on 22 July 2010, including the Articles, the Commentaries, the non-OECD economies' positions, the Recommendation of the OECD Council, the historical notes (now expanded to go back to the 1963 Draft Convention), the detailed list of conventions between OECD member countries and the full text of a number of background reports adopted after 1977.

This edition of the full version replaces the loose-leaf edition, which has been discontinued. However, the new full version has retained the volume I and II references of the loose-leaf edition within the new single book format. New editions of this book will be published regularly to reflect updates.

The Model Tax Convention of July 2010 is also available electronically and in a condensed format. The electronic version includes the text of the full version and features such as extensive internal linking, making it easy to link from an Article to its Commentary; fast searching capabilities; the ability for the user to attach notes to specific areas of text and cut and paste capabilities. The condensed version, published in September 2010, includes only the Articles, the Commentaries, the non-OECD economies' positions and the Recommendation of the OECD Council.

Volume I

INTRODUCTION

MODEL CONVENTION

COMMENTARIES

NON-OECD ECONOMIES' POSITIONS ON THE OECD MODEL TAX CONVENTION

INTRODUCTION

1. International juridical double taxation can be generally defined as the imposition of comparable taxes in two (or more) States on the same taxpayer in respect of the same subject matter and for identical periods. Its harmful effects on the exchange of goods and services and movements of capital, technology and persons are so well known that it is scarcely necessary to stress the importance of removing the obstacles that double taxation presents to the development of economic relations between countries.

2. It has long been recognised among the member countries of the Organisation for Economic Co-operation and Development that it is desirable to clarify, standardise, and confirm the fiscal situation of taxpayers who are engaged in commercial, industrial, financial, or any other activities in other countries through the application by all countries of common solutions to identical cases of double taxation.

3. This is the main purpose of the OECD *Model Tax Convention on Income and on Capital*, which provides a means of settling on a uniform basis the most common problems that arise in the field of international juridical double taxation. As recommended by the Council of the OECD,[1] member countries, when concluding or revising bilateral conventions, should conform to this Model Convention as interpreted by the Commentaries thereon and having regard to the reservations contained therein and their tax authorities should follow these Commentaries, as modified from time to time and subject to their observations thereon, when applying and interpreting the provisions of their bilateral tax conventions that are based on the Model Convention.

A. Historical background

4. Progress had already been made towards the elimination of double taxation through bilateral conventions or unilateral measures when the Council of the Organisation for European Economic Co-operation (OEEC) adopted its first Recommendation concerning double taxation on 25 February 1955. At that time, 70 bilateral general conventions had been signed between countries that are now members of the OECD. This was to a large extent due to the work commenced in 1921 by the League of Nations. This work led to the drawing up in 1928 of the first model bilateral convention and, finally, to the Model Conventions of Mexico (1943) and London (1946), the principles of which were followed with certain variants in many of the bilateral conventions concluded or revised during the following decade. Neither of these Model Conventions, however, was fully and unanimously accepted.

1 See Appendix II in Volume II.

Moreover, in respect of several essential questions, they presented considerable dissimilarities and certain gaps.

5. The increasing economic interdependence and co-operation of the member countries of the OEEC in the post-war period showed increasingly clearly the importance of measures for preventing international double taxation. The need was recognised for extending the network of bilateral tax conventions to all member countries of the OEEC, and subsequently of the OECD, several of which had so far concluded only very few conventions and some none at all. At the same time, harmonization of these conventions in accordance with uniform principles, definitions, rules, and methods, and agreement on a common interpretation, became increasingly desirable.

6. It was against this new background that the Fiscal Committee set to work in 1956 to establish a draft convention that would effectively resolve the double taxation problems existing between OECD member countries and that would be acceptable to all member countries. From 1958 to 1961, the Fiscal Committee prepared four interim Reports, before submitting in 1963 its final Report entitled *Draft Double Taxation Convention on Income and Capital*.[1] The Council of the OECD adopted, on 30 July 1963, a Recommendation concerning the avoidance of double taxation and called upon the Governments of member countries, when concluding or revising bilateral conventions between them, to conform to that Draft Convention.

7. The Fiscal Committee of the OECD had envisaged, when presenting its Report in 1963, that the Draft Convention might be revised at a later stage following further study. Such a revision was also needed to take account of the experience gained by member countries in the negotiation and practical application of bilateral conventions, of changes in the tax systems of member countries, of the increase in international fiscal relations, and of the development of new sectors of business activity and the emergence of new complex business organisations at the international level. For all these reasons, the Fiscal Committee and, after 1971, its successor the Committee on Fiscal Affairs, undertook the revision of the 1963 Draft Convention and of the commentaries thereon. This resulted in the publication in 1977 of a new Model Convention and Commentaries.[2]

8. The factors that had led to the revision of the 1963 Draft Convention continued to exert their influence and, in many ways, the pressure to update and adapt the Model Convention to changing economic conditions progressively increased. New technologies were developed and, at the same time, there were fundamental changes taking place in the ways in which cross-borders transactions were undertaken. Methods of tax avoidance and

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

evasion became more sophisticated. The globalisation and liberalisation of OECD economies also accelerated rapidly in the 1980s. Consequently, in the course of its regular work programme, the Committee on Fiscal Affairs and, in particular, its Working Party No. 1, continued after 1977 to examine various issues directly or indirectly related to the 1977 Model Convention. This work resulted in a number of reports, some of which recommended amendments to the Model Convention and its Commentaries.[1]

9. In 1991, recognizing that the revision of the Model Convention and the Commentaries had become an ongoing process, the Committee on Fiscal Affairs adopted the concept of an ambulatory Model Convention providing periodic and more timely updates and amendments without waiting for a complete revision. It was therefore decided to publish a revised updated version of the Model Convention which would take into account the work done since 1977 by integrating many of the recommendations made in the above-mentioned reports.

10. Because the influence of the Model Convention had extended far beyond the OECD member countries, the Committee also decided that the revision process should be opened up to benefit from the input of non-member countries, other international organisations and other interested parties. It was felt that such outside contributions would assist the Committee on Fiscal Affairs in its continuing task of updating the Model Convention to conform with the evolution of international tax rules and principles.

11. This led to the publication in 1992 of the Model Convention in a loose-leaf format. Unlike the 1963 Draft Convention and the 1977 Model Convention, the revised Model was not the culmination of a comprehensive revision, but rather the first step of an ongoing revision process intended to produce periodic updates and thereby ensure that the Model Convention continues to reflect accurately the views of member countries at any point in time.

11.1 Through one of these updates, produced in 1997, the positions of a number of non-member countries on the Model Convention were added in a second volume in recognition of the growing influence of the Model Convention outside the OECD countries (see below). At the same time, reprints of a number of previous reports of the Committee which had resulted in changes to the Model Convention were also added.

B. Influence of the OECD Model Convention

12. Since 1963, the OECD Model Convention has had wide repercussions on the negotiation, application, and interpretation of tax conventions.

1 A number of these reports were published and appear in Volume II.

13. First, OECD member countries have largely conformed to the Model Convention when concluding or revising bilateral conventions. The progress made towards eliminating double taxation between member countries can be measured by the increasing number of conventions concluded or revised since 1957 in accordance with the Recommendations of the Council of the OECD. But the importance of the Model Convention should be measured not only by the number of conventions concluded between member countries[1] but also by the fact that, in accordance with the Recommendations of the Council of the OECD, these conventions follow the pattern and, in most cases, the main provisions of the Model Convention. The existence of the Model Convention has facilitated bilateral negotiations between OECD member countries and made possible a desirable harmonization between their bilateral conventions for the benefit of both taxpayers and national administrations.

14. Second, the impact of the Model Convention has extended far beyond the OECD area. It has been used as a basic document of reference in negotiations between member and non-member countries and even between non-member countries, as well as in the work of other worldwide or regional international organisations in the field of double taxation and related problems. Most notably, it has been used as the basis for the original drafting and the subsequent revision of the *United Nations Model Double Taxation Convention between Developed and Developing Countries*,[2] which reproduces a significant part of the provisions and Commentaries of the OECD Model Convention. It is in recognition of this growing influence of the Model Convention in non-member countries that it was agreed, in 1997, to add to the Model Convention the positions of a number of these countries on its provisions and Commentaries.

15. Third, the worldwide recognition of the provisions of the Model Convention and their incorporation into a majority of bilateral conventions have helped make the Commentaries on the provisions of the Model Convention a widely-accepted guide to the interpretation and application of the provisions of existing bilateral conventions. This has facilitated the interpretation and the enforcement of these bilateral conventions along common lines. As the network of tax conventions continues to expand, the importance of such a generally accepted guide becomes all the greater.

1 See Appendix I in Volume II for the list of these conventions.

2 *United Nations Model Double Taxation Convention between Developed and Developing Countries*, United Nations Publications, New York, first edition 1980, second edition 2001.

C. Presentation of the Model Convention

Title of the Model Convention

16. In both the 1963 Draft Convention and the 1977 Model Convention, the title of the Model Convention included a reference to the elimination of double taxation. In recognition of the fact that the Model Convention does not deal exclusively with the elimination of double taxation but also addresses other issues, such as the prevention of tax evasion and non-discrimination, it was subsequently decided to use a shorter title which did not include this reference. This change has been made both on the cover page of this publication and in the Model Convention itself. However, it is understood that the practice of many member countries is still to include in the title a reference to either the elimination of double taxation or to both the elimination of double taxation and the prevention of fiscal evasion.

Broad lines of the Model Convention

17. The Model Convention first describes its scope (Chapter I) and defines some terms (Chapter II). The main part is made up of Chapters III to V, which settle to what extent each of the two Contracting States may tax income and capital and how international juridical double taxation is to be eliminated. Then follow the Special Provisions (Chapter VI) and the Final Provisions (entry into force and termination, Chapter VII).

Scope and definitions

18. The Convention applies to all persons who are residents of one or both of the Contracting States (Article 1). It deals with taxes on income and on capital, which are described in a general way in Article 2. In Chapter II, some terms used in more than one Article of the Convention are defined. Other terms such as "dividends", "interest", "royalties" and "immovable property" are defined in the Articles that deal with these matters.

Taxation of income and capital

19. For the purpose of eliminating double taxation, the Convention establishes two categories of rules. First, Articles 6 to 21 determine, with regard to different classes of income, the respective rights to tax of the State of source or situs and of the State of residence, and Article 22 does the same with regard to capital. In the case of a number of items of income and capital, an exclusive right to tax is conferred on one of the Contracting States. The other Contracting State is thereby prevented from taxing those items and double taxation is avoided. As a rule, this exclusive right to tax is conferred on the State of residence. In the case of other items of income and capital, the right

to tax is not an exclusive one. As regards two classes of income (dividends and interest), although both States are given the right to tax, the amount of tax that may be imposed in the State of source is limited. Second, insofar as these provisions confer on the State of source or situs a full or limited right to tax, the State of residence must allow relief so as to avoid double taxation; this is the purpose of Articles 23 A and 23 B. The Convention leaves it to the Contracting States to choose between two methods of relief, *i.e.* the exemption method and the credit method.

20. Income and capital may be classified into three classes, depending on the treatment applicable to each class in the State of source or situs:

- — income and capital that may be taxed without any limitation in the State of source or situs,
- — income that may be subjected to limited taxation in the State of source, and
- — income and capital that may not be taxed in the State of source or situs.

21. The following are the classes of income and capital that may be taxed without any limitation in the State of source or situs:

- — income from immovable property situated in that State (including income from agriculture or forestry), gains from the alienation of such property, and capital representing it (Article 6 and paragraph 1 of Articles 13 and 22);
- — profits of a permanent establishment situated in that State, gains from the alienation of such a permanent establishment, and capital representing movable property forming part of the business property of such a permanent establishment (Article 7 and paragraph 2 of Articles 13 and 22); an exception is made, however, if the permanent establishment is maintained for the purposes of international shipping, inland waterways transport, and international air transport (see paragraph 23 below);
- — income from the activities of artistes and sportsmen exercised in that State, irrespective of whether such income accrues to the artiste or sportsman himself or to another person (Article 17);
- — directors' fees paid by a company that is a resident of that State (Article 16);
- — remuneration in respect of an employment in the private sector, exercised in that State, unless the employee is present therein for a period not exceeding 183 days in any twelve month period commencing or ending in the fiscal year concerned and certain conditions are met; and remuneration in respect of an employment exercised aboard a ship or aircraft operated internationally or aboard a boat, if the place of

effective management of the enterprise is situated in that State (Article 15);

— subject to certain conditions, remuneration and pensions paid in respect of government service (Article 19).

22. The following are the classes of income that may be subjected to limited taxation in the State of source:

— dividends: provided the holding in respect of which the dividends are paid is not effectively connected with a permanent establishment in the State of source, that State must limit its tax to 5 per cent of the gross amount of the dividends, where the beneficial owner is a company that holds directly at least 25 per cent of the capital of the company paying the dividends, and to 15 per cent of their gross amount in other cases (Article 10);

— interest: subject to the same proviso as in the case of dividends, the State of source must limit its tax to 10 per cent of the gross amount of the interest, except for any interest in excess of a normal amount (Article 11).

23. Other items of income or capital may not be taxed in the State of source or situs; as a rule they are taxable only in the State of residence of the taxpayer. This applies, for example, to royalties (Article 12), gains from the alienation of shares or securities (paragraph 5 of Article 13), private sector pensions (Article 18), payments received by a student for the purposes of his education or training (Article 20), and capital represented by shares or securities (paragraph 4 of Article 22). Profits from the operation of ships or aircraft in international traffic or of boats engaged in inland waterways transport, gains from the alienation of such ships, boats, or aircraft, and capital represented by them, are taxable only in the State in which the place of effective management of the enterprise is situated (Article 8 and paragraph 3 of Articles 13 and 22). Business profits that are not attributable to a permanent establishment in the State of source are taxable only in the State of residence (paragraph 1 of Article 7).

24. Where a resident of a Contracting State receives income from sources in the other Contracting State, or owns capital situated therein, that in accordance with the Convention is taxable only in the State of residence, no problem of double taxation arises, since the State of source or situs must refrain from taxing that income or capital.

25. Where, on the contrary, income or capital may, in accordance with the Convention, be taxed with or without limitation in the State of source or situs, the State of residence has the obligation to eliminate double taxation. This can be accomplished by one of the following two methods:

— exemption method: income or capital that is taxable in the State of source or situs is exempted in the State of residence, but it may be taken into account in determining the rate of tax applicable to the taxpayer's remaining income or capital;

— credit method: income or capital that is taxable in the State of source or situs is subject to tax in the State of residence, but the tax levied in the State of source or situs is credited against the tax levied by the State of residence on such income or capital.

Special provisions

26. There are a number of special provisions in the Convention. These provisions concern:

— the elimination of tax discrimination in various circumstances (Article 24);

— the establishment of a mutual agreement procedure for eliminating double taxation and resolving conflicts of interpretation of the Convention (Article 25);

— the exchange of information between the tax authorities of the Contracting States (Article 26);

— the assistance by Contracting States in the collection of each other's taxes (Article 27);

— the tax treatment of members of diplomatic missions and consular posts in accordance with international law (Article 28);

— the territorial extension of the Convention (Article 29).

General remarks on the Model Convention

27. The Model Convention seeks, wherever possible, to specify for each situation a single rule. On certain points, however, it was thought necessary to leave in the Convention a certain degree of flexibility, compatible with the efficient implementation of the Model Convention. Member countries therefore enjoy a certain latitude, for example, with regard to fixing the rate of tax at source on dividends and interest and the choice of method for eliminating double taxation. Moreover, for some cases, alternative or additional provisions are mentioned in the Commentaries.

Commentaries on the Articles

28. For each Article in the Convention, there is a detailed Commentary that is intended to illustrate or interpret its provisions.

29. As the Commentaries have been drafted and agreed upon by the experts appointed to the Committee on Fiscal Affairs by the Governments of member countries, they are of special importance in the development of international fiscal law. Although the Commentaries are not designed to be annexed in any manner to the conventions signed by member countries, which unlike the Model are legally binding international instruments, they can nevertheless be of great assistance in the application and interpretation of the conventions and, in particular, in the settlement of any disputes.

29.1 The tax administrations of member countries routinely consult the Commentaries in their interpretation of bilateral tax treaties. The Commentaries are useful both in deciding day-to-day questions of detail and in resolving larger issues involving the policies and purposes behind various provisions. Tax officials give great weight to the guidance contained in the Commentaries.

29.2 Similarly, taxpayers make extensive use of the Commentaries in conducting their businesses and planning their business transactions and investments. The Commentaries are of particular importance in countries that do not have a procedure for obtaining an advance ruling on tax matters from the tax administration as the Commentaries may be the only available source of interpretation in that case.

29.3 Bilateral tax treaties are receiving more and more judicial attention as well. The courts are increasingly using the Commentaries in reaching their decisions. Information collected by the Committee on Fiscal Affairs shows that the Commentaries have been cited in the published decisions of the courts of the great majority of member countries. In many decisions, the Commentaries have been extensively quoted and analysed, and have frequently played a key role in the judge's deliberations. The Committee expects this trend to continue as the worldwide network of tax treaties continues to grow and as the Commentaries gain even more widespread acceptance as an important interpretative reference.

30. Observations on the Commentaries have sometimes been inserted at the request of member countries that are unable to concur in the interpretation given in the Commentary on the Article concerned. These observations thus do not express any disagreement with the text of the Convention, but usefully indicate the way in which those countries will apply the provisions of the Article in question. Since the observations are related to the interpretations of the Articles given in the Commentaries, no observation is needed to indicate a country's wish to modify the wording of an alternative or additional provision that the Commentaries allow countries to include in their bilateral conventions.

Reservations of certain member countries on some provisions of the Convention

31. Although all member countries are in agreement with the aims and the main provisions of the Model Convention, nearly all have entered reservations on some provisions, which are recorded in the Commentaries on the Articles concerned. There has been no need for countries to make reservations indicating their intent to use the alternative or additional provisions that the Commentaries allow countries to include in their bilateral conventions or to modify the wording of a provision of the Model to confirm or incorporate an interpretation of that provision put forward in the Commentary. It is understood that insofar as a member country has entered reservations, the other member countries, in negotiating bilateral conventions with the former, will retain their freedom of action in accordance with the principle of reciprocity.

32. The Committee on Fiscal Affairs considers that these reservations should be viewed against the background of the very wide areas of agreement that has been achieved in drafting this Convention.

Relation with previous versions

33. When drafting the 1977 Model Convention, the Committee on Fiscal Affairs examined the problems of conflicts of interpretation that might arise as a result of changes in the Articles and Commentaries of the 1963 Draft Convention. At that time, the Committee considered that existing conventions should, as far as possible, be interpreted in the spirit of the revised Commentaries, even though the provisions of these conventions did not yet include the more precise wording of the 1977 Model Convention. It was also indicated that member countries wishing to clarify their positions in this respect could do so by means of an exchange of letters between competent authorities in accordance with the mutual agreement procedure and that, even in the absence of such an exchange of letters, these authorities could use mutual agreement procedures to confirm this interpretation in particular cases.

34. The Committee believes that the changes to the Articles of the Model Convention and the Commentaries that have been made since 1977 should be similarly interpreted.

35. Needless to say, amendments to the Articles of the Model Convention and changes to the Commentaries that are a direct result of these amendments are not relevant to the interpretation or application of previously concluded conventions where the provisions of those conventions are different in substance from the amended Articles. However, other changes or additions to the Commentaries are normally applicable to the interpretation

and application of conventions concluded before their adoption, because they reflect the consensus of the OECD member countries as to the proper interpretation of existing provisions and their application to specific situations.

36. Whilst the Committee considers that changes to the Commentaries should be relevant in interpreting and applying conventions concluded before the adoption of these changes, it disagrees with any form of *a contrario* interpretation that would necessarily infer from a change to an Article of the Model Convention or to the Commentaries that the previous wording resulted in consequences different from those of the modified wording. Many amendments are intended to simply clarify, not change, the meaning of the Articles or the Commentaries, and such *a contrario* interpretations would clearly be wrong in those cases.

36.1 Tax authorities in member countries follow the general principles enunciated in the preceding four paragraphs. Accordingly, the Committee on Fiscal Affairs considers that taxpayers may also find it useful to consult later versions of the Commentaries in interpreting earlier treaties.

Multilateral convention

37. When preparing the 1963 Draft Convention and the 1977 Model Convention, the Committee on Fiscal Affairs considered whether the conclusion of a multilateral tax convention would be feasible and came to the conclusion that this would meet with great difficulties. It recognised, however, that it might be possible for certain groups of member countries to study the possibility of concluding such a convention among themselves on the basis of the Model Convention, subject to certain adaptations they might consider necessary to suit their particular purposes.

38. The Nordic Convention on Income and Capital entered into by Denmark, Finland, Iceland, Norway and Sweden, which was concluded in 1983 and replaced in 1987, 1989 and 1996,[1] provides a practical example of such a multilateral convention between a group of member countries and follows closely the provisions of the Model Convention.

39. Also relevant is the Convention on Mutual Administrative Assistance in Tax Matters, which was drawn up within the Council of Europe on the basis of a first draft prepared by the Committee on Fiscal Affairs. This Convention entered into force on 1 April 1995.

40. Despite these two conventions, there are no reasons to believe that the conclusion of a multilateral tax convention involving all member countries could now be considered practicable. The Committee therefore considers that

1 The Faroe Islands is also a signatory of the 1989 and 1996 Conventions.

bilateral conventions are still a more appropriate way to ensure the elimination of double taxation at the international level.

Tax avoidance and evasion; improper use of conventions

41. The Committee on Fiscal Affairs continues to examine both the improper use of tax conventions and international tax evasion. The problem is referred to in the Commentaries on several Articles. In particular, Article 26, as clarified in the Commentary, enables States to exchange information to combat these abuses.

Article 31 Termination

TITLE OF THE CONVENTION

Convention between (State A) and (State B)
with respect to taxes on income and on capital[1]

PREAMBLE TO THE CONVENTION[2]

1 States wishing to do so may follow the widespread practice of including in the title a reference to either the avoidance of double taxation or to both the avoidance of double taxation and the prevention of fiscal evasion.

2 The Preamble of the Convention shall be drafted in accordance with the constitutional procedure of both Contracting States.

Chapter I
SCOPE OF THE CONVENTION

ARTICLE 1

PERSONS COVERED

This Convention shall apply to persons who are residents of one or both of the Contracting States.

HISTORY

The title of Article 1: Changed on 21 September 1995, by replacing the title "Personal Scope" with "Persons Covered", by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until 21 September 1995, the title of Article 1 read as follows:

"PERSONAL SCOPE"

Paragraph 1: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

ARTICLE 2

TAXES COVERED

1. This Convention shall apply to taxes on income and on capital imposed on behalf of a Contracting State or of its political subdivisions or local authorities, irrespective of the manner in which they are levied.

2. There shall be regarded as taxes on income and on capital all taxes imposed on total income, on total capital, or on elements of income or of capital, including taxes on gains from the alienation of movable or immovable property, taxes on the total amounts of wages or salaries paid by enterprises, as well as taxes on capital appreciation.

3. The existing taxes to which the Convention shall apply are in particular:

a) (in State A): ....

b) (in State B): ....

4. The Convention shall apply also to any identical or substantially similar taxes that are imposed after the date of signature of the Convention in addition to, or in place of, the existing taxes. The competent authorities of the Contracting States shall notify each other of any significant changes that have been made in their taxation laws.

HISTORY

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by substituting the words "a Contracting State" for "each Contracting State". In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. This Convention shall apply to taxes on income and on capital imposed on behalf of each Contracting State or of its political subdivisions or local authorities, irrespective of the manner in which they are levied."

Paragraph 2: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 3: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by deleting the comma before "in particular" and replacing the words "In the case of (" with "(in" at the beginning of subparagraphs *a)* and *b)*. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

> "3. The existing taxes to which the Convention shall apply are, in particular:
>
> *a)* In the case of (State A): ....
>
> *b)* In the case of (State B): ...."

Paragraph 4: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. In the 1977 Convention and until 29 April 2000, paragraph 4 read as follows:

> "4. The Convention shall apply also to any identical or substantially similar taxes which are imposed after the date of signature of the Convention in addition to, or in place of, the existing taxes. At the end of each year, the competent authorities of the Contracting States shall notify each other of changes which have been made in their respective taxation laws."

Paragraph 4 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

> "4. The Convention shall also apply to any identical or substantially similar taxes which are subsequently imposed in addition to, or in place of, the existing taxes. At the end of each year, the competent authorities of the Contracting States shall notify to each other any changes which have been made in their respective taxation laws."

Chapter II
DEFINITIONS

ARTICLE 3

GENERAL DEFINITIONS

1. For the purposes of this Convention, unless the context otherwise requires:

a) the term "person" includes an individual, a company and any other body of persons;

b) the term "company" means any body corporate or any entity that is treated as a body corporate for tax purposes;

c) the term "enterprise" applies to the carrying on of any business;

d) the terms "enterprise of a Contracting State" and "enterprise of the other Contracting State" mean respectively an enterprise carried on by a resident of a Contracting State and an enterprise carried on by a resident of the other Contracting State;

e) the term "international traffic" means any transport by a ship or aircraft operated by an enterprise that has its place of effective management in a Contracting State, except when the ship or aircraft is operated solely between places in the other Contracting State;

f) the term "competent authority" means:

(i) (in State A): ....

(ii) (in State B): ....

g) the term "national", in relation to a Contracting State, means:

(i) any individual possessing the nationality or citizenship of that Contracting State; and

(ii) any legal person, partnership or association deriving its status as such from the laws in force in that Contracting State;

h) the term "business" includes the performance of professional services and of other activities of an independent character.

2. As regards the application of the Convention at any time by a Contracting State, any term not defined therein shall, unless the context otherwise requires, have the meaning that it has at that time under the law of that State for the purposes of the taxes to which the Convention applies, any meaning under the applicable tax laws of that State prevailing over a meaning given to the term under other laws of that State.

HISTORY

Paragraph 1: The preamble of paragraph 1 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by replacing the words "In this Convention" with "For the purposes of this Convention". In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the preamble of paragraph 1 read as follows:

"1. In this Convention, unless the context otherwise requires:"

Subparagraph *a)* of the 1977 Model Convention corresponds to subparagraph *b)* of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977, subparagraph *a)* of the 1963 Draft Convention was deleted and subparagraph *b)* was redesignated as subparagraph *a)* and amended, by replacing the word "comprises" with "includes". In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, Subparagraphs *a)* and *b)* of paragraph 1 read as follows:

"*a)* the terms "a Contracting State" and "the other Contracting State" mean (State A) or (State B), as the context requires;.

b) the term "person" comprises an individual, a company and any other body of persons;"

Subparagraph *b)* was amended on 21 September 1995, by replacing the words "entity which" with "entity that", by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, subparagraph *b)* of paragraph 1 read as follows:

"*b)* the term "company" means any body corporate or any entity which is treated as a body corporate for tax purposes;"

Subparagraph *b)* of the 1977 Model Convention corresponded to subparagraph *c)* of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977, subparagraph *b)* of the 1963 Draft Convention was amended and redesignated as subparagraph *a)* (see history of subparagraph *a)* above) and subparagraph *c)* of the 1963 Draft Convention was redesignated as subparagraph *b)*.

Subparagraph *c)* as it read before 29 April 2000 was replaced on 29 April 2000. Subparagraph *c)* was redesignated as subparagraph *d)* (see history of subparagraph *d)* below) and a new subparagraph *c)* was added by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000), on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention".

Subparagraph *d)* corresponds to subparagraph *c)* as it read in the 1977 Model Convention and until 29 April 2000. On 29 April 2000 subparagraph *d)* of the 1977 Model Convention was redesignated as subparagraph *e)* (see history of subparagraph *e)* below) and subparagraph *c)* of the 1977 Model Convention was redesignated as subparagraph *d)* by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Subparagraph *c)* of the 1977 Model Convention corresponded to subparagraph *d)* of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) which was redesignated as subparagraph *c) when* the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Subparagraph *e)* corresponds to subparagraph *d)* as it read before 29 April 2000. On 29 April 2000 subparagraph *e)* was redesignated as subparagraph *f)* (see history of

subparagraph *f)* below) and subparagraph *d)* was redesignated as subparagraph *e)* by the report entitled “The 2000 Update to the Model Tax Convention”, adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Subparagraph *d)* of the 1977 Model Convention was previously amended on 21 September 1995, by replacing the words “enterprise which” with the words “enterprise that”, by the report entitled “The 1995 Update to the Model Tax Convention”, adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, subparagraph *d)* read as follows:

> *“d)* the term “international traffic” means any transport by a ship or aircraft operated by an enterprise which has its place of effective management in a Contracting State, except when the ship or aircraft is operated solely between places in the other Contracting State;”

Subparagraph *d)* of the 1977 Model Convention replaced subparagraph *d)* of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977, subparagraph *d)* of the 1963 Draft Convention was redesignated subparagraph *c)* and a new subparagraph *d)* was added.

Subparagraph *f)* corresponds to subparagraph *e)* as it read after 23 July 1992 and until 29 April 2000. On 29 April 2000 subparagraph *f)* was redesignated as subparagraph *g)* (see history of subparagraph *g)* below) and subparagraph *e)* was redesignated as subparagraph *f)* by the report entitled “The 2000 Update to the Model Tax Convention”, adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Subparagraph *e)* of the 1963 Draft Convention was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, subparagraph *e)* read as follows:

> *“e)* the term “competent authority” means:
>
> *(i)* (in State A):
>
> *(ii)* (in State B):”

Subparagraph *g)* was amended on 28 January 2003 by adding the words “, in relation to a Contracting State” immediately before the word “means”, by the report entitled “The 2002 Update to the Model Tax Convention” adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003 subparagraph *g)* read as follows:

> *“g)* the term “national” means:
>
> *(i)* any individual possessing the nationality of a Contracting State;
>
> *(ii)* any legal person, partnership or association deriving its status as such from the laws in force in a Contracting State;”

Subparagraph *g)* as it read after 29 April 2000 corresponded to subparagraph *f)* as it read after 23 July 1992. Subparagraph *f)* was redesignated as subparagraph *g)* by the report entitled “The 2000 Update to the Model Tax Convention” adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Subparagraph *f)* as it read after 23 July 1992 corresponded to paragraph 2 of Article 24 of the 1977 Model Convention. On 23 July 1992 paragraph 2 of Article 24 was amended and redesignated as subparagraph *f)* of paragraph 1 of Article 3 by the report entitled “The Revision of the Model Convention” adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 2 of Article 24 read as follows

> “2. The term “nationals” means:
>
> *a)* all individuals possessing the nationality of a Contracting State;

b) all legal persons, partnerships and associations deriving their status as such from the laws in force in a Contracting State."

Paragraph 2 of Article 24 of the 1977 Model Convention was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by substituting the word "laws" for "law" in subparagraph *b)*, by the adoption of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 of Article 24 read as follows:

"2. The term "nationals" means:

a) all individuals possessing the nationality of a Contracting State;

b) all legal persons, partnerships and associations deriving their status as such from the law in force in a Contracting State."

Subparagraph *h)* was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000).

Paragraph 2: Amended by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 2 read as follows:

"2. As regards the application of the Convention by a Contracting State any term not defined therein shall, unless the context otherwise requires, have the meaning which it has under the law of that State concerning the taxes to which the Convention applies."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. As regards the application of the Convention by a Contracting State any term not otherwise defined shall, unless the context otherwise requires, have the meaning which it has under the laws of that Contracting State relating to the taxes which are the subject of the Convention."

ARTICLE 4

RESIDENT

1. For the purposes of this Convention, the term "resident of a Contracting State" means any person who, under the laws of that State, is liable to tax therein by reason of his domicile, residence, place of management or any other criterion of a similar nature, and also includes that State and any political subdivision or local authority thereof. This term, however, does not include any person who is liable to tax in that State in respect only of income from sources in that State or capital situated therein.

2. Where by reason of the provisions of paragraph 1 an individual is a resident of both Contracting States, then his status shall be determined as follows:

a) he shall be deemed to be a resident only of the State in which he has a permanent home available to him; if he has a permanent home available to him in both States, he shall be deemed to be a resident only of the State with which his personal and economic relations are closer (centre of vital interests);

b) if the State in which he has his centre of vital interests cannot be determined, or if he has not a permanent home available to him in either State, he shall be deemed to be a resident only of the State in which he has an habitual abode;

c) if he has an habitual abode in both States or in neither of them, he shall be deemed to be a resident only of the State of which he is a national;

d) if he is a national of both States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

3. Where by reason of the provisions of paragraph 1 a person other than an individual is a resident of both Contracting States, then it shall be deemed to be a resident only of the State in which its place of effective management is situated.

HISTORY

The title of Article 4: Changed when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title of Article 4 as follows:

"FISCAL DOMICILE"

Paragraph 1: Amended on 21 September 1995, by adding to the first sentence the words "and also includes that State and any political subdivision or local authority thereof" and by replacing in the second sentence the words "But this term" with "This

term, however,", by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 1 read as follows:

"1. For the purposes of this Convention, the term "resident of a Contracting State" means any person who, under the laws of that State, is liable to tax therein by reason of his domicile, residence, place of management or any other criterion of a similar nature. But this term does not include any person who is liable to tax in that State in respect only of income from sources in that State or capital situated therein."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by the addition of the second sentence. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

"1. For the purposes of this Convention, the term "resident of a Contracting State" means any person who, under the law of that State, is liable to taxation therein by reason of his domicile, residence, place of management or any other criterion of a similar nature."

Paragraph 2: Amended on 23 October 1997, by adding the word "only" after the word "resident" in the third line of subparagraph *a)* to correct an omission that was made when similar changes were made to subparagraphs *a)*, *b)* and *c)* as part of the 1995 update (see below), by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997 subparagraph a) of paragraph 2 read as follows:

"a) he shall be deemed to be a resident only of the State in which he has a permanent home available to him; if he has a permanent home available to him in both States, he shall be deemed to be a resident of the State with which his personal and economic relations are closer (centre of vital interests);"

Subparagraphs *a)*, *b)*, and *c)* were previously amended on 21 September 1995, by adding the word "only" after the word "resident" (except in the third line of subparagraph *a)*), by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 2 read as follows:

"2. Where by reason of the provisions of paragraph 1 an individual is a resident of both Contracting States, then his status shall be determined as follows:

a) he shall be deemed to be a resident of the State in which he has a permanent home available to him; if he has a permanent home available to him in both States, he shall be deemed to be a resident of the State with which his personal and economic relations are closer (centre of vital interests);

b) if the State in which he has his centre of vital interests cannot be determined, or if he has not a permanent home available to him in either State, he shall be deemed to be a resident of the State in which he has an habitual abode;

c) if he has an habitual abode in both States or in neither of them, he shall be deemed to be a resident of the State of which he is a national;

d) if he is a national of both States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the

OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. Where by reason of the provisions of paragraph 1 an individual is a resident of both Contracting States, then this case shall be determined in accordance with the following rules:

a) He shall be deemed to be a resident of the Contracting State in which he has a permanent home available to him. If he has a permanent home available to him in both Contracting States, he shall be deemed to be a resident of the Contracting State with which his personal and economic relations are closest (centre of vital interests);

b) If the Contracting State in which he has his centre of vital interests cannot be determined, or if he has not a permanent home available to him in either Contracting State, he shall be deemed to be a resident of the Contracting State in which he has an habitual abode;

c) If he has an habitual abode in both Contracting States or in neither of them, he shall be deemed to be a resident of the Contracting State of which he is a national;

d) If he is a national of both Contracting States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement."

Paragraph 3: Amended on 21 September 1995, by adding the word "only" after the words "shall be deemed to be a resident", by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 3 read as follows:

"3. Where by reason of the provisions of paragraph 1 a person other than an individual is a resident of both Contracting States, then it shall be deemed to be a resident of the State in which its place of effective management is situated."

Paragraph 3 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by replacing the words "the Contracting State in which" with "the State in which". In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. Where by reason of the provisions of paragraph 1 a person other than an individual is a resident of both Contracting States, then it shall be deemed to be a resident of the Contraction State in which its place of effective management is situated."

ARTICLE 5

PERMANENT ESTABLISHMENT

1. For the purposes of this Convention, the term "permanent establishment" means a fixed place of business through which the business of an enterprise is wholly or partly carried on.

2. The term "permanent establishment" includes especially:

a) a place of management;

b) a branch;

c) an office;

d) a factory;

e) a workshop, and

f) a mine, an oil or gas well, a quarry or any other place of extraction of natural resources.

3. A building site or construction or installation project constitutes a permanent establishment only if it lasts more than twelve months.

4. Notwithstanding the preceding provisions of this Article, the term "permanent establishment" shall be deemed not to include:

a) the use of facilities solely for the purpose of storage, display or delivery of goods or merchandise belonging to the enterprise;

b) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display or delivery;

c) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise;

d) the maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise;

e) the maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character;

f) the maintenance of a fixed place of business solely for any combination of activities mentioned in subparagraphs *a)* to *e)*, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

5. Notwithstanding the provisions of paragraphs 1 and 2, where a person — other than an agent of an independent status to whom paragraph 6 applies — is acting on behalf of an enterprise and has, and habitually exercises, in a

Contracting State an authority to conclude contracts in the name of the enterprise, that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.

6. An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.

7. The fact that a company which is a resident of a Contracting State controls or is controlled by a company which is a resident of the other Contracting State, or which carries on business in that other State (whether through a permanent establishment or otherwise), shall not of itself constitute either company a permanent establishment of the other.

HISTORY

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by replacing the words “in which the business of the enterprise” with “through which the business of an enterprise”. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> “1. For the purposes of this Convention, the term “permanent establishment” means a fixed place of business in which the business of the enterprise is wholly or partly carried on.”

Paragraph 2: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by substituting the words “includes” in the first line for “shall include”. At the same time, the word “and” was added at the end of subparagraph *e)*, subparagraph *f)* was modified and subparagraph *g)* was deleted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> “2. The term “permanent establishment” shall include especially:
>
> *a)* a place of management;
>
> *b)* a branch;
>
> *c)* an office;
>
> *d)* a factory;
>
> *e)* a workshop, and
>
> *f)* a mine, quarry or other place of extraction of natural resources;
>
> *g)* a building site or construction or assembly project which exists for more than twelve months.”

Paragraph 3: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 3 of the 1963 Draft Convention was

amended and renumbered as paragraph 4 (see history of paragraph 4) and a new paragraph 3 was added.

Paragraph 4: Corresponds to paragraph 3 of the 1963 Draft Convention. Paragraph 4 of the 1963 Draft Convention was amended and renumbered as paragraph 5 (see history of paragraph 5) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 3 was renumbered as paragraph 4 and amended, by modifying its preamble and subparagraph *e)* and adding subparagraph *f)*. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. The term "permanent establishment" shall not be deemed to include:

a) the use of facilities solely for the purpose of storage, display or delivery of goods or merchandise belonging to the enterprise;

b) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display or delivery;

c) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise;

d) the maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise, or for collecting information, for the enterprise;

e) the maintenance of a fixed place of business solely for the purpose of advertising, for the supply of information, for scientific research or for similar activities which have a preparatory or auxiliary character, for the enterprise."

Paragraph 5: Corresponds to paragraph 4 of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977, paragraph 5 of the 1963 Draft Convention was amended and renumbered as paragraph 6 (see history of paragraph 6). At the same time, paragraph 4 of the 1963 Draft Convention was renumbered as paragraph 5 and amended. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

"4. A person acting in a Contracting State on behalf of an enterprise of the other Contracting State — other than an agent of an independent status to whom paragraph 5 applies — shall be deemed to be a permanent establishment in the first-mentioned State if he has, and habitually exercises in that State, an authority to conclude contracts in the name of the enterprise, unless his activities are limited to the purchase of goods or merchandise for the enterprise."

Paragraph 6: Corresponds to paragraph 5 of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977, paragraph 6 of the 1963 Draft Convention was renumbered as paragraph 7 (see history of paragraph 7) and paragraph 5 of the 1963 Draft Convention was amended and renumbered as paragraph 6. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

"5. An enterprise of a Contracting State shall not be deemed to have a permanent establishment in the other Contracting State merely because it carries on business in that other State through a broker, general commission agent or any other agent of an independent status, where such persons are acting in the ordinary course of their business."

Paragraph 7: Corresponds to paragraph 6 of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977, paragraph 6 of the 1963 Draft Convention was renumbered as paragraph 7.

Chapter III
TAXATION OF INCOME

ARTICLE 6

INCOME FROM IMMOVABLE PROPERTY

1. Income derived by a resident of a Contracting State from immovable property (including income from agriculture or forestry) situated in the other Contracting State may be taxed in that other State.

2. The term "immovable property" shall have the meaning which it has under the law of the Contracting State in which the property in question is situated. The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships, boats and aircraft shall not be regarded as immovable property.

3. The provisions of paragraph 1 shall apply to income derived from the direct use, letting, or use in any other form of immovable property.

4. The provisions of paragraphs paragraph 1 and 3 shall also apply to the income from immovable property of an enterprise.

HISTORY

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. Income from immovable property may be taxed in the Contracting State in which such property is situated."

Paragraph 2: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by changing the first sentence. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. The term "immovable property" shall be defined in accordance with the law of the Contracting State in which the property in question is situated. The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships, boats and aircraft shall not be regarded as immovable property."

Paragraph 3: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 4: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Convention and until 29 April 2000, paragraph 4 read as follows:

> "4. The provisions of paragraphs 1 and 3 shall also apply to the income from immovable property of an enterprise and to income from immovable property used for the performance of independent personal services."

Paragraph 4 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by substituting the words "independent personal services" for "professional services". In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

> "4. The provisions of paragraphs 1 and 3 shall also apply to the income from immovable property of an enterprise and to income from immovable property used for the performance of professional services."

ARTICLE 7
BUSINESS PROFITS

1. Profits of an enterprise of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein. If the enterprise carries on business as aforesaid, the profits that are attributable to the permanent establishment in accordance with the provisions of paragraph 2 may be taxed in that other State.

2. For the purposes of this Article and Article [23 A] [23 B], the profits that are attributable in each Contracting State to the permanent establishment referred to in paragraph 1 are the profits it might be expected to make, in particular in its dealings with other parts of the enterprise, if it were a separate and independent enterprise engaged in the same or similar activities under the same or similar conditions, taking into account the functions performed, assets used and risks assumed by the enterprise through the permanent establishment and through the other parts of the enterprise.

3. Where, in accordance with paragraph 2, a Contracting State adjusts the profits that are attributable to a permanent establishment of an enterprise of one of the Contracting States and taxes accordingly profits of the enterprise that have been charged to tax in the other State, the other State shall, to the extent necessary to eliminate double taxation on these profits, make an appropriate adjustment to the amount of the tax charged on those profits. In determining such adjustment, the competent authorities of the Contracting States shall if necessary consult each other.

4. Where profits include items of income which are dealt with separately in other Articles of this Convention, then the provisions of those Articles shall not be affected by the provisions of this Article.

HISTORY

Paragraph 1: Replaced on 22 July 2010 by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted on 22 July 2010 paragraph 1 read as follows:

> “1. The profits of an enterprise of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein. If the enterprise carries on business as aforesaid, the profits of the enterprise may be taxed in the other State but only so much of them as is attributable to that permanent establishment.”

Paragraph 2: Replaced on 22 July 2010 by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010. In the 1977 Model Convention and until it was deleted on 22 July 2010 paragraph 2 read as follows:

"2. Subject to the provisions of paragraph 3, where an enterprise of a Contracting State carries on business in the other Contracting State through a permanent establishment situated therein, there shall in each Contracting State be attributed to that permanent establishment the profits which it might be expected to make if it were a distinct and separate enterprise engaged in the same or similar activities under the same or similar conditions and dealing wholly independently with the enterprise of which it is a permanent establishment."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by adding the words "Subject to the provisions of paragraph 3" at the beginning of the paragraph. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. Where an enterprise of a Contracting State carries on business in the other Contracting State through a permanent establishment situated therein, there shall in each Contracting State be attributed to that permanent establishment the profits which it might be expected to make if it were a distinct and separate enterprise engaged in the same or similar activities under the same or similar conditions and dealing wholly independently with the enterprise of which it is a permanent establishment."

Paragraph 3: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. In the 1977 Model Convention and until it was deleted on 22 July 2010 paragraph 3 read as follows:

"3. In determining the profits of a permanent establishment, there shall be allowed as deductions expenses which are incurred for the purposes of the permanent establishment, including executive and general administrative expenses so incurred, whether in the State in which the permanent establishment is situated or elsewhere."

Paragraph 3 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by substituting the words "In determining" for "In the determination of" at the beginning of the paragraph. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. In the determination of the profits of a permanent establishment, there shall be allowed as deductions expenses which are incurred for the purposes of the permanent establishment, including executive and general administrative expenses so incurred, whether in the State in which the permanent establishment is situated or elsewhere."

Paragraph 4: Corresponds to paragraph 7, as it read before 22 July 2010. Paragraph 4, was deleted and paragraph 7 was renumbered as paragraph 4 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 7, as it read before 22 July 2010 was included in the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963.

Paragraph 4 of the 1977 Model Convention and until it was deleted on 22 July 2010, read as follows:

"4. Insofar as it has been customary in a Contracting State to determine the profits to be attributed to a permanent establishment on the basis of an apportionment of the total profits of the enterprise to its various parts, nothing in paragraph 2 shall preclude that Contracting State from determining the profits to be taxed by such an apportionment as may be customary; the method of

> apportionment adopted shall, however, be such that the result shall be in accordance with the principles contained in this Article."

Paragraph 4 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by substituting the word "contained" in the last line for "laid down". In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

> "4. Insofar as it has been customary in a Contracting State to determine the profits to be attributed to a permanent establishment on the basis of an apportionment of the total profits of the enterprise to its various parts, nothing in paragraph 2 shall preclude that Contracting State from determining the profits to be taxed by such an apportionment as may be customary; the method of apportionment adopted shall, however, be such that the result shall be in accordance with the principles laid down in this Article."

Paragraph 5: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until 22 July 2010 paragraph 5 read as follows:

> "5. No profits shall be attributed to a permanent establishment by reason of the mere purchase by that permanent establishment of goods or merchandise for the enterprise."

Paragraph 6: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until 22 July 2010 paragraph 6 read as follows:

> "6. For the purposes of the preceding paragraphs, the profits to be attributed to the permanent establishment shall be determined by the same method year by year unless there is good and sufficient reason to the contrary."

Paragraph 7: Renumbered on 22 July 2010 as paragraph 4 (see history of paragraph 4) by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

ARTICLE 8

SHIPPING, INLAND WATERWAYS TRANSPORT AND AIR TRANSPORT

1. Profits from the operation of ships or aircraft in international traffic shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated.

2. Profits from the operation of boats engaged in inland waterways transport shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated.

3. If the place of effective management of a shipping enterprise or of an inland waterways transport enterprise is aboard a ship or boat, then it shall be deemed to be situated in the Contracting State in which the home harbour of the ship or boat is situated, or, if there is no such home harbour, in the Contracting State of which the operator of the ship or boat is a resident.

4. The provisions of paragraph 1 shall also apply to profits from the participation in a pool, a joint business or an international operating agency.

HISTORY

Paragraph 1: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 2: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 3: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 4: Added in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977.

ARTICLE 9

ASSOCIATED ENTERPRISES

1. Where

a) an enterprise of a Contracting State participates directly or indirectly in the management, control or capital of an enterprise of the other Contracting State, or

b) the same persons participate directly or indirectly in the management, control or capital of an enterprise of a Contracting State and an enterprise of the other Contracting State,

and in either case conditions are made or imposed between the two enterprises in their commercial or financial relations which differ from those which would be made between independent enterprises, then any profits which would, but for those conditions, have accrued to one of the enterprises, but, by reason of those conditions, have not so accrued, may be included in the profits of that enterprise and taxed accordingly.

2. Where a Contracting State includes in the profits of an enterprise of that State — and taxes accordingly — profits on which an enterprise of the other Contracting State has been charged to tax in that other State and the profits so included are profits which would have accrued to the enterprise of the first-mentioned State if the conditions made between the two enterprises had been those which would have been made between independent enterprises, then that other State shall make an appropriate adjustment to the amount of the tax charged therein on those profits. In determining such adjustment, due regard shall be had to the other provisions of this Convention and the competent authorities of the Contracting States shall if necessary consult each other.

HISTORY

Paragraph 1: Corresponds to Article 9 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963). Article 9 was designated as paragraph 1 in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977.

Paragraph 2: Added in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977.

ARTICLE 10

DIVIDENDS

1. Dividends paid by a company which is a resident of a Contracting State to a resident of the other Contracting State may be taxed in that other State.

2. However, such dividends may also be taxed in the Contracting State of which the company paying the dividends is a resident and according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other Contracting State, the tax so charged shall not exceed:

a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends;

b) 15 per cent of the gross amount of the dividends in all other cases.

The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of these limitations. This paragraph shall not affect the taxation of the company in respect of the profits out of which the dividends are paid.

3. The term "dividends" as used in this Article means income from shares, "jouissance" shares or "jouissance" rights, mining shares, founders' shares or other rights, not being debt-claims, participating in profits, as well as income from other corporate rights which is subjected to the same taxation treatment as income from shares by the laws of the State of which the company making the distribution is a resident.

4. The provisions of paragraphs 1 and 2 shall not apply if the beneficial owner of the dividends, being a resident of a Contracting State, carries on business in the other Contracting State of which the company paying the dividends is a resident through a permanent establishment situated therein and the holding in respect of which the dividends are paid is effectively connected with such permanent establishment. In such case the provisions of Article 7 shall apply.

5. Where a company which is a resident of a Contracting State derives profits or income from the other Contracting State, that other State may not impose any tax on the dividends paid by the company, except insofar as such dividends are paid to a resident of that other State or insofar as the holding in respect of which the dividends are paid is effectively connected with a permanent establishment situated in that other State, nor subject the company's undistributed profits to a tax on the company's undistributed profits, even if the dividends paid or the undistributed profits consist wholly or partly of profits or income arising in such other State.

HISTORY

Paragraph 1: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 2: Amended on 21 September 1995, by replacing the words "if the recipient is the beneficial owner of the dividends" with "if the beneficial owner of the dividends is a resident of the other Contracting State,", by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 2 read as follows:

"2. However, such dividends may also be taxed in the Contracting State of which the company paying the dividends is a resident and according to the laws of that State, but if the recipient is the beneficial owner of the dividends the tax so charged shall not exceed:

a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends;

b) 15 per cent of the gross amount of the dividends in all other cases.

The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of these limitations.This paragraph shall not affect the taxation of the company in respect of the profits out of which the dividends are paid."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. However, such dividends may be taxed in the Contracting State of which the company paying the dividends is a resident, and according to the law of that State, but the tax so charged shall not exceed:

a) 5 per cent of the gross amount of the dividends if the recipient is a company (excluding partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends;

b) in all other cases, 15 per cent of the gross amount of the dividends.

The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of this limitation.This paragraph shall not affect the taxation of the company in respect of the profits out of which the dividends are paid."

Paragraph 3: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by substituting the words "which is subjected to the same taxation treatment as income from shares by the laws of the State" for "assimilated to income from shares by the taxation law of the State". In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. The term "dividends" as used in this Article means income from shares, "jouissance" shares or "jouissance" rights, mining shares, founders' shares or other rights, not being debt-claims, participating in profits, as well as income from other corporate rights assimilated to income from shares by the taxation law of the State of which the company making the distribution is a resident."

Paragraph 4: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to

Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Convention and until 29 April 2000, paragraph 4 read as follows:

> "4. The provisions of paragraphs 1 and 2 shall not apply if the beneficial owner of the dividends, being a resident of a Contracting State, carries on business in the other Contracting State of which the company paying the dividends is a resident, through a permanent establishment situated therein, or performs in that other State independent personal services from a fixed base situated therein, and the holding in respect of which the dividends are paid is effectively connected with such permanent establishment or fixed base. In such case the provisions of Article 7 or Article 14, as the case may be, shall apply."

Paragraph 4 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

> "4. The provisions of paragraphs 1 and 2 shall not apply if the recipient of the dividends, being a resident of a Contracting State, has in the other Contracting State, of which the company paying the dividends is a resident, a permanent establishment with which the holding by virtue of which the dividends are paid is effectively connected. In such a case, the provisions of Article 7 shall apply."

Paragraph 5: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Convention and until 29 April 2000, paragraph 5 read as follows:

> "5. Where a company which is a resident of a Contracting State derives profits or income from the other Contracting State, that other State may not impose any tax on the dividends paid by the company, except insofar as such dividends are paid to a resident of that other State or insofar as the holding in respect of which the dividends are paid is effectively connected with a permanent establishment or a fixed base situated in that other State, nor subject the company's undistributed profits to a tax on the company's undistributed profits, even if the dividends paid or the undistributed profits consist wholly or partly of profits or income arising in such other State."

Paragraph 5 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

> "5. Where a company which is a resident of a Contracting State derives profits or income from the other Contracting State, that other State may not impose any tax on the dividends paid by the company to persons who are not residents of that other State, or subject the company's undistributed profits to a tax on undistributed profits, even if the dividends paid or the undistributed profits consist wholly or partly of profits or income arising in such other State."

ARTICLE 11

INTEREST

1. Interest arising in a Contracting State and paid to a resident of the other Contracting State may be taxed in that other State.

2. However, such interest may also be taxed in the Contracting State in which it arises and according to the laws of that State, but if the beneficial owner of the interest is a resident of the other Contracting State, the tax so charged shall not exceed 10 per cent of the gross amount of the interest. The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of this limitation.

3. The term "interest" as used in this Article means income from debt-claims of every kind, whether or not secured by mortgage and whether or not carrying a right to participate in the debtor's profits, and in particular, income from government securities and income from bonds or debentures, including premiums and prizes attaching to such securities, bonds or debentures. Penalty charges for late payment shall not be regarded as interest for the purpose of this Article.

4. The provisions of paragraphs 1 and 2 shall not apply if the beneficial owner of the interest, being a resident of a Contracting State, carries on business in the other Contracting State in which the interest arises through a permanent establishment situated therein and the debt-claim in respect of which the interest is paid is effectively connected with such permanent establishment. In such case the provisions of Article 7 shall apply.

5. Interest shall be deemed to arise in a Contracting State when the payer is a resident of that State. Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a Contracting State a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment, then such interest shall be deemed to arise in the State in which the permanent establishment is situated.

6. Where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the interest, having regard to the debt-claim for which it is paid, exceeds the amount which would have been agreed upon by the payer and the beneficial owner in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In such case, the excess part of the payments shall remain taxable according to the laws of each Contracting State, due regard being had to the other provisions of this Convention.

HISTORY

Paragraph 1: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 2: Amended on 21 September 1995, by replacing the words "if the recipient is the beneficial owner of the interest" with "if the beneficial owner of the interest is a resident of the other Contracting State,", by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 2 read as follows:

> "2. However, such interest may also be taxed in the Contracting State in which it arises and according to the laws of that State, but if the recipient is the beneficial owner of the interest the tax so charged shall not exceed 10 per cent of the gross amount of the interest. The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of this limitation."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. However, such interest may be taxed in the Contracting State in which it arises, and according to the law of that State, but the tax so charged shall not exceed 10 per cent of the amount of the interest. The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of this limitation."

Paragraph 3: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

> "3. The term "interest" as used in this Article means income from Government securities, bonds or debentures, whether or not secured by mortgage and whether or not carrying a right to participate in profits, and debt-claims of every kind as well as all other income assimilated to income from money lent by the taxation law of the State in which the income arises."

Paragraph 4: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Convention and until 29 April 2000, paragraph 4 read as follows:

> "4. The provisions of paragraphs 1 and 2 shall not apply if the beneficial owner of the interest, being a resident of a Contracting State, carries on business in the other Contracting State in which the interest arises, through a permanent establishment situated therein, or performs in that other State independent personal services from a fixed base situated therein, and the debt-claim in respect of which the interest is paid is effectively connected with such permanent establishment or fixed base. In such case the provisions of Article 7 or Article 14, as the case may be, shall apply."

Paragraph 4 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

"4. The provisions of paragraphs 1 and 2 shall not apply if the recipient of the interest, being a resident of a Contracting State, has in the other Contracting State in which the interest arises a permanent establishment with which the debt-claim from which the interest arises is effectively connected. In such a case, the provisions of Article 7 shall apply."

Paragraph 5: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 21 September 1995 and until 29 April 2000, paragraph 5 read as follows:

"5. Interest shall be deemed to arise in a Contracting State when the payer is a resident of that State. Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a Contracting State a permanent establishment or a fixed base in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment or fixed base, then such interest shall be deemed to arise in the State in which the permanent establishment or fixed base is situated."

Paragraph 5 was previously amended on 21 September 1995, by deleting the words "that State itself, a political subdivision, a local authority or", by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 5 read as follows:

"5. Interest shall be deemed to arise in a Contracting State when the payer is that State itself, a political subdivision, a local authority or a resident of that State. Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a Contracting State a permanent establishment or a fixed base in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment or fixed base, then such interest shall be deemed to arise in the State in which the permanent establishment or fixed base is situated."

Paragraph 5 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977, by substituting "permanent establishment or fixed base" for "permanent establishment" in the three different places where these words appeared. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

"5. Interest shall be deemed to arise in a Contracting State when the payer is that State itself, a political subdivision, a local authority or a resident of that State. Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a Contracting State a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment, then such interest shall be deemed to arise in the State in which the permanent establishment is situated."

Paragraph 6: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 6 read as follows:

"6. Where, owing to a special relationship between the payer and the recipient or between both of them and some other person, the amount of the interest paid, having regard to the debt claim for which it is paid, exceeds the amount which

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

would have been agreed upon by the payer and the recipient in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In that case, the excess part of the payments shall remain taxable according to the law of each Contracting State, due regard being had to the other provisions of this Convention."

ARTICLE 12

ROYALTIES

1. Royalties arising in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in that other State.

2. The term "royalties" as used in this Article means payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematograph films, any patent, trade mark, design or model, plan, secret formula or process, or for information concerning industrial, commercial or scientific experience.

3. The provisions of paragraph 1 shall not apply if the beneficial owner of the royalties, being a resident of a Contracting State, carries on business in the other Contracting State in which the royalties arise through a permanent establishment situated therein and the right or property in respect of which the royalties are paid is effectively connected with such permanent establishment. In such case the provisions of Article 7 shall apply.

4. Where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the royalties, having regard to the use, right or information for which they are paid, exceeds the amount which would have been agreed upon by the payer and the beneficial owner in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In such case, the excess part of the payments shall remain taxable according to the laws of each Contracting State, due regard being had to the other provisions of this Convention.

HISTORY

Paragraph 1: Replaced on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. In the 1977 Model Convention and until 23 October 1997, paragraph 1 read as follows:

> "1. Royalties arising in a Contracting State and paid to a resident of the other Contracting State shall be taxable only in that other State if such resident is the beneficial owner of the royalties."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. Royalties arising in a Contracting State and paid to a resident of the other Contracting State shall be taxable only in that other State."

Paragraph 2: Amended on 23 July 1992, by deleting the words "or for the use of, or the right to use, industrial, commercial or scientific equipment", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 23 of the Report entitled "The Taxation of Income Derived

from the Leasing of Industrial, Commercial or Scientific Equipment" (adopted by the OECD Council on 13 September 1983). In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until 23 July 1992, paragraph 2 read as follows:

> "2. The term "royalties" as used in this Article means payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematograph films, any patent, trade mark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial or scientific experience."

Paragraph 3: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Convention and until 29 April 2000, paragraph 3 read as follows:

> "3. The provisions of paragraph 1 shall not apply if the beneficial owner of the royalties, being a resident of a Contracting State, carries on business in the other Contracting State in which the royalties arise, through a permanent establishment situated therein, or performs in that other State independent personal services from a fixed base situated therein, and the right or property in respect of which the royalties are paid is effectively connected with such permanent establishment or fixed base. In such case the provisions of Article 7 or Article 14, as the case may be, shall apply."

Paragraph 3 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

> "3. The provisions of paragraph 1 shall not apply if the recipient of the royalties, being a resident of a Contracting State, has in the other Contracting State in which the royalties arise a permanent establishment with which the right or property giving rise to the royalties is effectively connected. In such a case, the provisions of Article 7 shall apply."

Paragraph 4: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

> "4. Where, owing to a special relationship between the payer and the recipient or between both of them and some other person, the amount of the royalties paid, having regard to the use, right or information for which they are paid, exceeds the amount which would have been agreed upon by the payer and the recipient in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In that case, the excess part of the payments shall remain taxable according to the law of each Contracting State, due regard being had to the other provisions of this Convention."

ARTICLE 13
CAPITAL GAINS

1. Gains derived by a resident of a Contracting State from the alienation of immovable property referred to in Article 6 and situated in the other Contracting State may be taxed in that other State.

2. Gains from the alienation of movable property forming part of the business property of a permanent establishment which an enterprise of a Contracting State has in the other Contracting State, including such gains from the alienation of such a permanent establishment (alone or with the whole enterprise), may be taxed in that other State.

3. Gains from the alienation of ships or aircraft operated in international traffic, boats engaged in inland waterways transport or movable property pertaining to the operation of such ships, aircraft or boats, shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated.

4. Gains derived by a resident of a Contracting State from the alienation of shares deriving more than 50 per cent of their value directly or indirectly from immovable property situated in the other Contracting State may be taxed in that other State.

5. Gains from the alienation of any property, other than that referred to in paragraphs 1, 2, 3 and 4, shall be taxable only in the Contracting State of which the alienator is a resident.

HISTORY

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. Gains from the alienation of immovable property, as defined in paragraph 2 of Article 6, may be taxed in the Contracting State in which such property is situated."

Paragraph 2: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Convention and until 29 April 2000, paragraph 2 read as follows:

> "2. Gains from the alienation of movable property forming part of the business property of a permanent establishment which an enterprise of a Contracting State has in the other Contracting State or of movable property pertaining to a fixed base available to a resident of a Contracting State in the other Contracting State for the purpose of performing independent personal services, including such gains from

> the alienation of such a permanent establishment (alone or with the whole enterprise) or of such fixed base, may be taxed in that other State."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977 by replacing the word "professional" with "independent personal" and by deleting the last sentence (the principle of which was been taken up in paragraph 3). In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. Gains from the alienation of movable property forming part of the business property of a permanent establishment which an enterprise of a Contracting State has in the other Contracting State or of movable property pertaining to a fixed base available to a resident of a Contracting State in the other Contracting State for the purpose of performing professional services, including such gains from the alienation of such a permanent establishment (alone or together with the whole enterprise) or of such a fixed base, may be taxed in the other State. However, gains from the alienation of movable property of the kind referred to in paragraph 3 of Article 22 shall be taxable only in the Contracting State in which such movable property is taxable according to the said Article."

Paragraph 3: Added in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977; it corresponds generally to the last sentence of paragraph 2 of the 1963 Draft Convention.

Paragraph 4: Replaced paragraph 4 on 28 January 2003. Paragraph 4 was amended and renumbered as paragraph 5 (see history of paragraph 5) and a new paragraph 4 was added by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 5: Corresponds to paragraph 4 of the 1977 Model Convention. On 28 January 2003 paragraph 4 was amended and renumbered as paragraph 5 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 4 read as follows:

> "4. Gains from the alienation of any property other than that referred to in paragraphs 1, 2 and 3, shall be taxable only in the Contracting State of which the alienator is a resident."

Paragraph 4 corresponded to paragraph 3 of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977, paragraph 3 was renumbered as paragraph 4 and amended. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

> "3. Gains from the alienation of any property other than those mentioned in paragraphs 1 and 2, shall be taxable only in the Contracting State of which the alienator is a resident."

[Article 14 - INDEPENDENT PERSONAL SERVICES]

[Deleted]

HISTORY

Article 14 was deleted by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, Article 14 read as follows:

> "INDEPENDENT PERSONAL SERVICES
>
> 1. Income derived by a resident of a Contracting State in respect of professional services or other activities of an independent character shall be taxable only in that State unless he has a fixed base regularly available to him in the other Contracting State for the purpose of performing his activities. If he has such a fixed base, the income may be taxed in the other State but only so much of it as is attributable to that fixed base.
>
> 2. The term "professional services" includes especially independent scientific, literary, artistic, educational or teaching activities as well as the independent activities of physicians, lawyers, engineers, architects, dentists and accountants.
>
> **Paragraph 1**
>
> Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:
>
> > "1. Income derived by a resident of a Contracting State in respect of professional services or other independent activities of a similar character shall be taxable only in that State unless he has a fixed base regularly available to him in the other Contracting State for the purpose of performing his activities. If he has such a fixed base, the income may be taxed in the other Contracting State but only so much of it as is attributable to that fixed base."
>
> **Paragraph 2**
>
> Before it was deleted, on 29 April 2000, paragraph 2 was unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963."

ARTICLE 15

INCOME FROM EMPLOYMENT

1. Subject to the provisions of Articles 16, 18 and 19, salaries, wages and other similar remuneration derived by a resident of a Contracting State in respect of an employment shall be taxable only in that State unless the employment is exercised in the other Contracting State. If the employment is so exercised, such remuneration as is derived therefrom may be taxed in that other State.

2. Notwithstanding the provisions of paragraph 1, remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if:

a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and

b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State, and

c) the remuneration is not borne by a permanent establishment which the employer has in the other State.

3. Notwithstanding the preceding provisions of this Article, remuneration derived in respect of an employment exercised aboard a ship or aircraft operated in international traffic, or aboard a boat engaged in inland waterways transport, may be taxed in the Contracting State in which the place of effective management of the enterprise is situated.

HISTORY

The title of Article 15: Amended by the report entitled “The 2000 Update to the Model Tax Convention”, adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled “Issues related to Article 14 of the OECD Model Tax Convention” (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until 29 April 2000, the title of Article 15 read as follows:

“DEPENDENT PERSONAL SERVICES”

Paragraph 1: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 2: Amended on 29 April 2000, by deleting the words “or a fixed base” in subparagraph *c)*, by the report entitled “The 2000 Update to the Model Tax Convention”, adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled “Issues related to Article 14 of the OECD Model Tax Convention” (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000 paragraph 2 read as follows:

"2. Notwithstanding the provisions of paragraph 1, remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if:

a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and

b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State, and

c) the remuneration is not borne by a permanent establishment or a fixed base which the employer has in the other State."

Paragraph 2 was previously amended on 23 July 1992, by adding the words "in any twelve month period commencing or ending" to subparagraph *a)*, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 80 of the Report entitled "Taxation Issues Relating to the International Hiring-out of Labour" (adopted by the OECD Council on 24 August 1984). In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until 23 July 1992, paragraph 2 read as follows:

"2. Notwithstanding the provisions of paragraph 1, remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if:

a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in the fiscal year concerned, and.

b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State, and

c) the remuneration is not borne by a permanent establishment or a fixed base which the employer has in the other State."

Paragraph 3: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. Notwithstanding the preceding provisions of this Article, remuneration in respect of an employment exercised aboard a ship or aircraft in international traffic, or aboard a boat engaged in inland waterways transport, may be taxed in the Contracting State in which the place of effective management of the enterprise is situated."

ARTICLE 16

DIRECTORS' FEES

Directors' fees and other similar payments derived by a resident of a Contracting State in his capacity as a member of the board of directors of a company which is a resident of the other Contracting State may be taxed in that other State.

HISTORY

Article 16 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977 by adding the word "other" immediately before "similar payments". In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, Article 16 read as follows:

> "Directors' fees and similar payments derived by a resident of a Contracting State in his capacity as a member of the board of directors of a company which is a resident of the other Contracting State may be taxed in that other State."

ARTICLE 17

ARTISTES AND SPORTSMEN

1. Notwithstanding the provisions of Articles 7 and 15, income derived by a resident of a Contracting State as an entertainer, such as a theatre, motion picture, radio or television artiste, or a musician, or as a sportsman, from his personal activities as such exercised in the other Contracting State, may be taxed in that other State.

2. Where income in respect of personal activities exercised by an entertainer or a sportsman in his capacity as such accrues not to the entertainer or sportsman himself but to another person, that income may, notwithstanding the provisions of Articles 7 and 15, be taxed in the Contracting State in which the activities of the entertainer or sportsman are exercised.

HISTORY

The title of Article 17: Amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 5 of the Report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987). In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until 23 July 1992, the title of Article 17 read as follows:

"ARTISTES AND ATHLETES"

Paragraph 1: Amended on 29 April 2000, by replacing the cross-reference to "Article 14" with a cross-reference to "Article 7", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 1 read as follows:

"1. Notwithstanding the provisions of Articles 14 and 15, income derived by a resident of a Contracting State as an entertainer, such as a theatre, motion picture, radio or television artiste, or a musician, or as a sportsman, from his personal activities as such exercised in the other Contracting State, may be taxed in that other State."

Paragraph 1 was previously amended on 23 July 1992, by replacing the words "an athlete" with "a sportsman", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 5 of the Report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987). In the 1977 Model Convention and until 23 July 1992, paragraph 1 read as follows:

"1. Notwithstanding the provisions of Articles 14 and 15, income derived by a resident of a Contracting State as an entertainer, such as a theatre, motion picture, radio or television artiste, or a musician, or as an athlete, from his personal activities as such exercised in the other Contracting State, may be taxed in that other State."

Paragraph 1 was included in the 1963 Draft Convention as Article 17. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977 Article 17 was designated as paragraph 1 and amended. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "Notwithstanding the provisions of Articles 14 and 15, income derived by public entertainers, such as theatre, motion picture, radio or television artistes, and musicians, and by athletes, from their personal activities as such may be taxed in the Contracting State in which these activities are exercised."

Paragraph 2: Amended on 29 April 2000, by deleting the reference to Article 14, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 2 read as follows:

> "2. Where income in respect of personal activities exercised by an entertainer or a sportsman in his capacity as such accrues not to the entertainer or sportsman himself but to another person, that income may, notwithstanding the provisions of Articles 7, 14 and 15, be taxed in the Contracting State in which the activities of the entertainer or sportsman are exercised."

Paragraph 2 was amended on 23 July 1992, by replacing the two references to "athlete" with "sportsman", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 5 of the Report entitled "The Taxation of Income Derived from Entertainment, Artistic and Sporting Activities" (adopted by the OECD Council on 27 March 1987). In the 1977 Model Convention (adopted by the OECD Council on 11 April 1977) and until 23 July 1992, paragraph 2 read as follows:

> "2. Where income in respect of personal activities exercised by an entertainer or a athlete in his capacity as such accrues not to the entertainer or athlete himself but to another person, that income may, notwithstanding the provisions of Articles 7, 14 and 15, be taxed in the Contracting State in which the activities of the entertainer or sportsman are exercised."

ARTICLE 18

PENSIONS

Subject to the provisions of paragraph 2 of Article 19, pensions and other similar remuneration paid to a resident of a Contracting State in consideration of past employment shall be taxable only in that State.

HISTORY

Article 18 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977 by replacing the words "paragraph 1 of Article 19" with "paragraph 2 of Article 19", by the adoption of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, Article 18 read as follows:

> "Subject to the provisions of paragraph 1 of Article 19, pensions and other similar remuneration paid to a resident of a Contracting State in consideration of past employment shall be taxable only in that State."

ARTICLE 19

GOVERNMENT SERVICE

1. *a)* Salaries, wages and other similar remuneration paid by a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.

   b) However, such salaries, wages and other similar remuneration shall be taxable only in the other Contracting State if the services are rendered in that State and the individual is a resident of that State who:

   (i) is a national of that State; or

   (ii) did not become a resident of that State solely for the purpose of rendering the services.

2. *a)* Notwithstanding the provisions of paragraph 1, pensions and other similar remuneration paid by, or out of funds created by, a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.

   b) However, such pensions and other similar remuneration shall be taxable only in the other Contracting State if the individual is a resident of, and a national of, that State.

3. The provisions of Articles 15, 16, 17, and 18 shall apply to salaries, wages, pensions, and other similar remuneration in respect of services rendered in connection with a business carried on by a Contracting State or a political subdivision or a local authority thereof.

HISTORY

The title of Article 19: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title of Article 19 read as follows:

"GOVERNMENTAL FUNCTIONS"

Paragraph 1: Amended on 15 July 2005, by deleting the words "other than a pension" in subparagraph a), by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 31 March 1994 and until 15 July 2005, paragraph 1 read as follows:

"1. *a)* Salaries, wages and other similar remuneration, other than a pension, paid by a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.

b) However, such salaries, wages and other similar remuneration shall be taxable only in the other Contracting State if the services are rendered in that State and the individual is a resident of that State who:

(i) is a national of that State; or

(ii) did not become a resident of that State solely for the purpose of rendering the services."

Paragraph 1 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 1 read as follows:

"1. *a)* Remuneration, other than a pension, paid by a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.

b) However, such remuneration shall be taxable only in the other Contracting State if the services are rendered in that State and the individual is a resident of that State who:

(i) is a national of that State; or

(ii) did not become a resident of that State solely for the purpose of rendering the services."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

"1. Remuneration, including pensions, paid by, or out of funds created by, a Contracting State or a political subdivision or a local authority thereof to any individual in respect of services rendered to that State or subdivision or local authority thereof in the discharge of functions of a governmental nature may be taxed in that State."

Paragraph 2: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 2 read as follows:

"2. *a)* Any pension paid by, or out of funds created by, a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.

b) However, such pension shall be taxable only in the other Contracting State if the individual is a resident of, and a national of, that State."

Paragraph 2 of the 1963 Draft Convention was replaced in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977. Paragraph 2 of the 1963 Draft Convention was amended and renumbered as paragraph 3 (see history of paragraph 3) and new paragraph 2 was added when the 1977 Model Convention was adopted.

Paragraph 3: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 21 September 1995 and until 15 July 2005, paragraph 3 read as follows:

"3. The provisions of Articles 15, 16, 17, and 18 shall apply to salaries, wages and other similar remuneration, and to pensions, in respect of services rendered in connection with a business carried on by a Contracting State or a political subdivision or a local authority thereof."

Paragraph 3 was previously amended on 21 September 1995, by adding a reference to Article 17, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 31 March 1994 and until 21 September 1995 paragraph 3 read as follows:

> "3. The provisions of Articles 15, 16, and 18 shall apply to salaries, wages and other similar remuneration, and to pensions, in respect of services rendered in connection with a business carried on by a Contracting State or a political subdivision or a local authority thereof."

Paragraph 3 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 3 read as follows:

> "3. The provisions of Articles 15, 16 and 18 shall apply to remuneration and pensions in respect of services rendered in connection with a business carried on by a Contracting State or a political subdivision or a local authority thereof."

Paragraph 3 of the 1977 Model Convention corresponded to paragraph 2 of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977, paragraph 2 was renumbered as paragraph 3 and amended, by substituting "remuneration and pensions" for "remuneration or pensions" and by substituting "a business" for "any trade or business". In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. The provisions of Articles 15, 16 and 18 shall apply to remuneration or pensions in respect of services rendered in connection with a trade or business carried on by one of the Contracting States or a political subdivision or a local authority thereof."

ARTICLE 20
STUDENTS

Payments which a student or business apprentice who is or was immediately before visiting a Contracting State a resident of the other Contracting State and who is present in the first-mentioned State solely for the purpose of his education or training receives for the purpose of his maintenance, education or training shall not be taxed in that State, provided that such payments arise from sources outside that State.

HISTORY

Article 20 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, Article 20 read as follows:

> "Payments which a student or business apprentice who is or was formerly a resident of a Contracting State and who is present in the other Contracting State solely for the purpose of his education or training receives for the purpose of his maintenance, education or training shall not be taxed in that other State, provided that such payments are made to him from sources outside that other State."

ARTICLE 21

OTHER INCOME

1. Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

2. The provisions of paragraph 1 shall not apply to income, other than income from immovable property as defined in paragraph 2 of Article 6, if the recipient of such income, being a resident of a Contracting State, carries on business in the other Contracting State through a permanent establishment situated therein and the right or property in respect of which the income is paid is effectively connected with such permanent establishment. In such case the provisions of Article 7 shall apply.

HISTORY

The title of Article 21: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title of Article 21 read as follows:

> "INCOME NOT EXPRESSLY MENTIONED"

Paragraph 1: Corresponds to Article 21 of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977 Article 21 of the 1963 Draft Convention was designated as paragraph 1 and amended. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, Article 21 read as follows:

> "Items of income of a resident of a Contracting State which are not expressly mentioned in the foregoing Articles of this Convention shall be taxable only in that State."

Paragraph 2: Paragraph 2 was amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Convention (adopted by the OECD Council on 11 April 1977) and until 29 April 2000, paragraph 2 read as follows:

> "2. The provisions of paragraph 1 shall not apply to income, other than income from immovable property as defined in paragraph 2 of Article 6, if the recipient of such income, being a resident of a Contracting State, carries on business in the other Contracting State through a permanent establishment situated therein, or performs in that other State independent personal services from a fixed base situated therein, and the right or property in respect of which the income is paid is effectively connected with such permanent establishment or fixed base. In such case the provisions of Article 7 or Article 14, as the case may be, shall apply."

Chapter IV
TAXATION OF CAPITAL

ARTICLE 22

CAPITAL

1. Capital represented by immovable property referred to in Article 6, owned by a resident of a Contracting State and situated in the other Contracting State, may be taxed in that other State.

2. Capital represented by movable property forming part of the business property of a permanent establishment which an enterprise of a Contracting State has in the other Contracting State may be taxed in that other State.

3. Capital represented by ships and aircraft operated in international traffic and by boats engaged in inland waterways transport, and by movable property pertaining to the operation of such ships, aircraft and boats, shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated.

4. All other elements of capital of a resident of a Contracting State shall be taxable only in that State.

HISTORY

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. Capital represented by immovable property, as defined in paragraph 2 of Article 6, may be taxed in the Contracting State in which such property is situated."

Paragraph 2: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of the Annex of another report entitled "Issues related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Convention and until 29 April 2000, paragraph 2 read as follows:

> "2. Capital represented by movable property forming part of the business property of a permanent establishment which an enterprise of a Contracting State has in the other Contracting State or by movable property pertaining to a fixed base available to a resident of a Contracting State in the other Contracting State for the purpose of performing independent personal services, may be taxed in that other State."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. Capital represented by movable property forming part of the business property of a permanent establishment of an enterprise, or by movable property pertaining to a fixed base used for the performance of professional services, may be taxed in the Contracting State in which the permanent establishment or fixed base is situated."

Paragraph 3: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. Ships and aircraft operated in international traffic and boats engaged in inland waterways transport, and movable property pertaining to the operation of such ships, aircraft and boats, shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated."

Paragraph 4: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Chapter V

METHODS FOR ELIMINATION OF DOUBLE TAXATION

ARTICLE 23 A

EXEMPTION METHOD

1. Where a resident of a Contracting State derives income or owns capital which, in accordance with the provisions of this Convention, may be taxed in the other Contracting State, the first-mentioned State shall, subject to the provisions of paragraphs 2 and 3, exempt such income or capital from tax.

2. Where a resident of a Contracting State derives items of income which, in accordance with the provisions of Articles 10 and 11, may be taxed in the other Contracting State, the first-mentioned State shall allow as a deduction from the tax on the income of that resident an amount equal to the tax paid in that other State. Such deduction shall not, however, exceed that part of the tax, as computed before the deduction is given, which is attributable to such items of income derived from that other State.

3. Where in accordance with any provision of the Convention income derived or capital owned by a resident of a Contracting State is exempt from tax in that State, such State may nevertheless, in calculating the amount of tax on the remaining income or capital of such resident, take into account the exempted income or capital.

4. The provisions of paragraph 1 shall not apply to income derived or capital owned by a resident of a Contracting State where the other Contracting State applies the provisions of this Convention to exempt such income or capital from tax or applies the provisions of paragraph 2 of Article 10 or 11 to such income.

HISTORY

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. Where a resident of a Contracting State derives income or owns capital which, in accordance with the provisions of this Convention, may be taxed in the other Contracting State, the first-mentioned State shall, subject to the provisions of paragraph 2, exempt such income or capital from tax but may, in calculating tax on the remaining income or capital of that person, apply the rate of tax which would have been applicable if the exempted income or capital had not been so exempted."

Paragraph 2: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. Where a resident of a Contracting State derives income which, in accordance with the provisions of Articles 10 and 11, may be taxed in the other Contracting State, the first-mentioned State shall allow as a deduction from the tax on the income of that person an amount equal to the tax paid in that other Contracting State. Such deduction shall not, however, exceed that part of the tax, as computed before the deduction is given, which is appropriate to the income derived from that other Contracting State."

Paragraph 3: Added in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977.

Paragraph 4: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000, on the basis of paragraph 113 of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

ARTICLE 23 B

CREDIT METHOD

1. Where a resident of a Contracting State derives income or owns capital which, in accordance with the provisions of this Convention, may be taxed in the other Contracting State, the first-mentioned State shall allow:

a) as a deduction from the tax on the income of that resident, an amount equal to the income tax paid in that other State;

b) as a deduction from the tax on the capital of that resident, an amount equal to the capital tax paid in that other State.

Such deduction in either case shall not, however, exceed that part of the income tax or capital tax, as computed before the deduction is given, which is attributable, as the case may be, to the income or the capital which may be taxed in that other State.

2. Where in accordance with any provision of the Convention income derived or capital owned by a resident of a Contracting State is exempt from tax in that State, such State may nevertheless, in calculating the amount of tax on the remaining income or capital of such resident, take into account the exempted income or capital.

HISTORY

Paragraph 1: Corresponds to paragraphs 1 and 2 of the 1963 Draft Convention. These paragraphs were merged and amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraphs 1 and 2 read as follows:

> "1. Where a resident of a Contracting State derives income or owns capital which, in accordance with the provisions of this Convention, may be taxed in the other Contracting State, the first-mentioned State shall allow:
>
> *a)* as a deduction from the tax on the income of that person, an amount equal to the income tax paid in that other Contracting State;
>
> *b)* as a deduction from the tax on the capital of that person, an amount equal to the capital tax paid in that other Contracting State.
>
> 2. The deduction in either case shall not, however, exceed that part of the income tax or capital tax, respectively, as computed before the deduction is given, which is appropriate, as the case may be, to the income or the capital which may be taxed in the other Contracting State."

Paragraph 2: Replaced paragraph 2 of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977, paragraph 2 of the 1963 Draft Convention was merged with paragraph 1 (see history of paragraph 1) and a new paragraph 2 was added.

Chapter VI
SPECIAL PROVISIONS

ARTICLE 24

NON-DISCRIMINATION

1. Nationals of a Contracting State shall not be subjected in the other Contracting State to any taxation or any requirement connected therewith, which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances, in particular with respect to residence, are or may be subjected. This provision shall, notwithstanding the provisions of Article 1, also apply to persons who are not residents of one or both of the Contracting States.

2. Stateless persons who are residents of a Contracting State shall not be subjected in either Contracting State to any taxation or any requirement connected therewith, which is other or more burdensome than the taxation and connected requirements to which nationals of the State concerned in the same circumstances, in particular with respect to residence, are or may be subjected.

3. The taxation on a permanent establishment which an enterprise of a Contracting State has in the other Contracting State shall not be less favourably levied in that other State than the taxation levied on enterprises of that other State carrying on the same activities. This provision shall not be construed as obliging a Contracting State to grant to residents of the other Contracting State any personal allowances, reliefs and reductions for taxation purposes on account of civil status or family responsibilities which it grants to its own residents.

4. Except where the provisions of paragraph 1 of Article 9, paragraph 6 of Article 11, or paragraph 4 of Article 12, apply, interest, royalties and other disbursements paid by an enterprise of a Contracting State to a resident of the other Contracting State shall, for the purpose of determining the taxable profits of such enterprise, be deductible under the same conditions as if they had been paid to a resident of the first-mentioned State. Similarly, any debts of an enterprise of a Contracting State to a resident of the other Contracting State shall, for the purpose of determining the taxable capital of such enterprise, be deductible under the same conditions as if they had been contracted to a resident of the first-mentioned State.

5. Enterprises of a Contracting State, the capital of which is wholly or partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of the first-mentioned State are or may be subjected.

6. The provisions of this Article shall, notwithstanding the provisions of Article 2, apply to taxes of every kind and description.

HISTORY

Paragraph 1: Paragraph 1 was amended on 23 July 1992, by adding the words "in particular with respect to residence" in the first sentence, by the report entitled "The Revision of the Model Convention" adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 1 read as follows:

> "1. Nationals of a Contracting State shall not be subjected in the other Contracting State to any taxation or any requirement connected therewith, which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances are or may be subjected. This provision shall, notwithstanding the provisions of Article 1, also apply to persons who are not residents of one or both of the Contracting States."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977 notably by adding the second sentence. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. The nationals of a Contracting State shall not be subjected in the other Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances are or may be subjected."

Paragraph 2: Paragraph 2 was amended on 23 October 1997 by adding the words "in particular with respect to residence" after the words "in the same circumstances" by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, paragraph 2 read as follows:

> "2. Stateless persons who are residents of a Contracting State shall not be subjected in either Contracting State to any taxation or any requirement connected therewith, which is other or more burdensome than the taxation and connected requirements to which nationals of the State concerned in the same circumstances, in particular with respect to residence, are or may be subjected."

Paragraph 2 as it read after 23 July 1992 corresponded to paragraph 3 of the 1977 Model Convention. On 23 July 1992 paragraph 2 of the 1977 Model Convention was amended and redesignated as subparagraph 1 *f)* of Article 3 (see history of paragraph 1 of Article 3) and paragraph 3 was renumbered as paragraph 2 by the report entitled "The Revision of the Model Convention" adopted by the OECD Council

on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 3 read as follows:

> "3. The term "nationals" means:
>
> *a)* all individuals possessing the nationality of a Contracting State;
>
> *b)* all legal persons, partnerships and associations deriving their status as such from the laws in force in a Contracting State."

Paragraph 3 of the 1963 Draft Convention was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

> "3. Stateless persons shall not be subjected in a Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that State in the same circumstances are or may be subjected."

Paragraph 3: Paragraph 3 as it read after 23 July 1992 corresponds to paragraph 4 of the 1977 Model Convention. Paragraph 3 was renumbered as paragraph 2 (see history of paragraph 2) and paragraph 4 of the 1977 Model Convention was renumbered as paragraph 3 by the report entitled "The Revision of the Model Convention" adopted by the OECD Council on 23 July 1992.

Paragraph 4 of the 1977 Model Convention corresponded to paragraph 4 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963). The presentation of the 1963 Draft Convention was modified in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention, the second sentence was presented as a second paragraph.

Paragraph 4: Paragraph 4 as it read after 23 July 1992 corresponded to paragraph 5 of the 1977 Model Convention. On 23 July 1992 paragraph 4 was renumbered as paragraph 3 (see history of paragraph 3) and paragraph 5 of the 1977 Model Convention was renumbered as paragraph 4 by the report entitled "The Revision of the Model Convention" adopted by the OECD Council on 23 July 1992.

Paragraph 5 of the 1977 Model Convention was added in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977.

Paragraph 5: Paragraph 5 as it read after 23 July 1992 corresponded to paragraph 6 of the 1977 Model Convention. On 23 July 1992 paragraph 5 was renumbered as paragraph 4 (see history of paragraph 4) and paragraph 6 of the 1977 Model Convention was renumbered as paragraph 5 by the report entitled "The Revision of the Model Convention" adopted by the OECD Council on 23 July 1992.

Paragraph 6 of the 1977 Model Convention corresponded to paragraph 5 of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977 paragraph 5 of the 1963 Draft Convention was renumbered as paragraph 6 and amended. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

> "5. Enterprises of a Contracting State, the capital of which is wholly or partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of that first-mentioned State are or may be subjected."

Paragraph 6: Paragraph 6 as it read after 23 July 1992 corresponded to paragraph 7 of the 1977 Model Convention. On 23 July 1992 paragraph 6 was renumbered as

paragraph 5 (see history of paragraph 5) and paragraph 7 of the 1977 Model Convention was renumbered as paragraph 6 by the report entitled “The Revision of the Model Convention” adopted by the OECD Council on 23 July 1992.

Paragraph 7 of the 1977 Model Convention corresponded to paragraph 6 of the 1963 Draft Convention. In the 1977 Model Convention, adopted by the OECD Council on 11 April 1977 paragraph 6 of the 1963 Draft Convention was amended and renumbered as paragraph 7. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 6 read as follows:

> “6. In this Article the term “taxation” means taxes of every kind and description.”

ARTICLE 25

MUTUAL AGREEMENT PROCEDURE

1. Where a person considers that the actions of one or both of the Contracting States result or will result for him in taxation not in accordance with the provisions of this Convention, he may, irrespective of the remedies provided by the domestic law of those States, present his case to the competent authority of the Contracting State of which he is a resident or, if his case comes under paragraph 1 of Article 24, to that of the Contracting State of which he is a national. The case must be presented within three years from the first notification of the action resulting in taxation not in accordance with the provisions of the Convention.

2. The competent authority shall endeavour, if the objection appears to it to be justified and if it is not itself able to arrive at a satisfactory solution, to resolve the case by mutual agreement with the competent authority of the other Contracting State, with a view to the avoidance of taxation which is not in accordance with the Convention. Any agreement reached shall be implemented notwithstanding any time limits in the domestic law of the Contracting States.

3. The competent authorities of the Contracting States shall endeavour to resolve by mutual agreement any difficulties or doubts arising as to the interpretation or application of the Convention. They may also consult together for the elimination of double taxation in cases not provided for in the Convention.

4. The competent authorities of the Contracting States may communicate with each other directly, including through a joint commission consisting of themselves or their representatives, for the purpose of reaching an agreement in the sense of the preceding paragraphs.

5. Where,

a) under paragraph 1, a person has presented a case to the competent authority of a Contracting State on the basis that the actions of one or both of the Contracting States have resulted for that person in taxation not in accordance with the provisions of this Convention, and

b) the competent authorities are unable to reach an agreement to resolve that case pursuant to paragraph 2 within two years from the presentation of the case to the competent authority of the other Contracting State,

any unresolved issues arising from the case shall be submitted to arbitration if the person so requests. These unresolved issues shall not, however, be submitted to arbitration if a decision on these issues has already been

rendered by a court or administrative tribunal of either State. Unless a person directly affected by the case does not accept the mutual agreement that implements the arbitration decision, that decision shall be binding on both Contracting States and shall be implemented notwithstanding any time limits in the domestic laws of these States. The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of this paragraph.[1]

1 In some States, national law, policy or administrative considerations may not allow or justify the type of dispute resolution envisaged under this paragraph. In addition, some States may only wish to include this paragraph in treaties with certain States. For these reasons, the paragraph should only be included in the Convention where each State concludes that it would be appropriate to do so based on the factors described in paragraph 65 of the Commentary on the paragraph. As mentioned in paragraph 74 of that Commentary, however, other States may be able to agree to remove from the paragraph the condition that issues may not be submitted to arbitration if a decision on these issues has already been rendered by one of their courts or administrative tribunals.

HISTORY

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977 notably by adding the second sentence. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. Where a resident of a Contracting State considers that the actions of one or both of the Contracting States result or will result for him in taxation not in accordance with this Convention, he may, notwithstanding the remedies provided by the national laws of those States, present his case to the competent authority of the Contracting State of which he is a resident."

Paragraph 2: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977 notably by adding the second sentence. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. The competent authority shall endeavour, if the objection appears to it to be justified and if it is not itself able to arrive at an appropriate solution, to resolve the case by mutual agreement with the competent authority of the other Contracting State, with a view to the avoidance of taxation not in accordance with the Convention."

Paragraph 3: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 4: Amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until 21 September 1995, paragraph 4 read as follows:

> "4. The competent authorities of the Contracting States may communicate with each other directly for the purpose of reaching an agreement in the sense of the preceding paragraphs. When it seems advisable in order to reach agreement to have an oral exchange of opinions, such exchange may take place through a Commission consisting of representatives of the competent authorities of the Contracting States."

Paragraph 5: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

ARTICLE 26

EXCHANGE OF INFORMATION

1. The competent authorities of the Contracting States shall exchange such information as is foreseeably relevant for carrying out the provisions of this Convention or to the administration or enforcement of the domestic laws concerning taxes of every kind and description imposed on behalf of the Contracting States, or of their political subdivisions or local authorities, insofar as the taxation thereunder is not contrary to the Convention. The exchange of information is not restricted by Articles 1 and 2.

2. Any information received under paragraph 1 by a Contracting State shall be treated as secret in the same manner as information obtained under the domestic laws of that State and shall be disclosed only to persons or authorities (including courts and administrative bodies) concerned with the assessment or collection of, the enforcement or prosecution in respect of, the determination of appeals in relation to the taxes referred to in paragraph 1, or the oversight of the above. Such persons or authorities shall use the information only for such purposes. They may disclose the information in public court proceedings or in judicial decisions.

3. In no case shall the provisions of paragraphs 1 and 2 be construed so as to impose on a Contracting State the obligation:

a) to carry out administrative measures at variance with the laws and administrative practice of that or of the other Contracting State;

b) to supply information which is not obtainable under the laws or in the normal course of the administration of that or of the other Contracting State;

c) to supply information which would disclose any trade, business, industrial, commercial or professional secret or trade process, or information the disclosure of which would be contrary to public policy (*ordre public*).

4. If information is requested by a Contracting State in accordance with this Article, the other Contracting State shall use its information gathering measures to obtain the requested information, even though that other State may not need such information for its own tax purposes. The obligation contained in the preceding sentence is subject to the limitations of paragraph 3 but in no case shall such limitations be construed to permit a Contracting State to decline to supply information solely because it has no domestic interest in such information.

5. In no case shall the provisions of paragraph 3 be construed to permit a Contracting State to decline to supply information solely because the

information is held by a bank, other financial institution, nominee or person acting in an agency or a fiduciary capacity or because it relates to ownership interests in a person.

HISTORY

Paragraph 1: Corresponds to the first two sentences of paragraph 1 as they read before 15 July 2005. The first two sentences of Paragraph 1 were amended and the third and subsequent sentences were incorporated into paragraph 2 (see history of paragraph 2) by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). After 29 April 2000 and until 15 July 2005, paragraph 1 read as follows:

> "1. The competent authorities of the Contracting States shall exchange such information as is necessary for carrying out the provisions of this Convention or of the domestic laws concerning taxes of every kind and description imposed on behalf of the Contracting States, or of their political subdivisions or local authorities, insofar as the taxation thereunder is not contrary to the Convention. The exchange of information is not restricted by Articles 1 and 2. Any information received by a Contracting State shall be treated as secret in the same manner as information obtained under the domestic laws of that State and shall be disclosed only to persons or authorities (including courts and administrative bodies) concerned with the assessment or collection of, the enforcement or prosecution in respect of, or the determination of appeals in relation to the taxes referred to in the first sentence. Such persons or authorities shall use the information only for such purposes. They may disclose the information in public court proceedings or in judicial decisions."

Paragraph 1 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 21 September 1995 and until 29 April 2000, paragraph 1 read as follows:

> "1. The competent authorities of the Contracting States shall exchange such information as is necessary for carrying out the provisions of this Convention or of the domestic laws of the Contracting States concerning taxes covered by the Convention insofar as the taxation thereunder is not contrary to the Convention. The exchange of information is not restricted by Article 1. Any information received by a Contracting State shall be treated as secret in the same manner as information obtained under the domestic laws of that State and shall be disclosed only to persons or authorities (including courts and administrative bodies) concerned with the assessment or collection of, the enforcement or prosecution in respect of, or the determination of appeals in relation to, the taxes covered by the Convention. Such persons or authorities shall use the information only for such purposes. They may disclose the information in public court proceedings or in judicial decisions."

Paragraph 1 was previously amended on 21 September 1995, by replacing the words "involved in" with "concerned with", by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 1 read as follows:

> "1. The competent authorities of the Contracting States shall exchange such information as is necessary for carrying out the provisions of this Convention or of the domestic laws of the Contracting States concerning taxes covered by the

> Convention insofar as the taxation thereunder is not contrary to the Convention. The exchange of information is not restricted by Article 1. Any information received by a Contracting State shall be treated as secret in the same manner as information obtained under the domestic laws of that State and shall be disclosed only to persons or authorities (including courts and administrative bodies) involved in the assessment or collection of, the enforcement or prosecution in respect of, or the determination of appeals in relation to, the taxes covered by the Convention. Such persons or authorities shall use the information only for such purposes. They may disclose the information in public court proceedings or in judicial decisions."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. The competent authorities of the Contracting States shall exchange such information as is necessary for the carrying out of this Convention and of the domestic laws of the Contracting States concerning taxes covered by this Convention insofar as the taxation thereunder is in accordance with this Convention. Any information so exchanged shall be treated as secret and shall not be disclosed to any persons or authorities other than those concerned with the assessment or collection of the taxes which are the subject of the Convention."

Paragraph 2: Corresponds to the third and subsequent sentences of paragraph 1 as they read before 15 July 2005. Those sentences were amended and incorporated into a new paragraph 2 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004) (see history of paragraph 1). Paragraph 2 as it read before 15 July 2005 was renumbered as paragraph 3 (see history of paragraph 3) and amended (to include a cross reference to paragraph 2) by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 3: Corresponds to paragraph 2 as it read before 15 July 2005. On 15 July 2005 paragraph 2 was renumbered as paragraph 3 and amended, by adding a cross-reference to paragraph 2, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004). In the 1977 Model Convention and until 15 July 2005, paragraph 2 read as follows:

> "2. In no case shall the provisions of paragraphs 1 and be construed so as to impose on a Contracting State the obligation:
>
> *a)* to carry out administrative measures at variance with the laws and administrative practice of that or of the other Contracting State;
>
> *b)* to supply information which is not obtainable under the laws or in the normal course of the administration of that or of the other Contracting State;
>
> *c)* to supply information which would disclose any trade, business, industrial, commercial or professional secret or trade process, or information, the disclosure of which would be contrary to public policy (*ordre public*)."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the

OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. In no case shall the provisions of paragraph 1 be construed so as to impose on one of the Contracting States the obligation:

a) to carry out administrative measures at variance with the laws or the administrative practice of that or of the other Contracting State;

b) to supply particulars which are not obtainable under the laws or in the normal course of the administration of that or of the other Contracting State;

c) to supply information which would disclose any trade, business, industrial, commercial or professional secret or trade process, or information, the disclosure of which would be contrary to public policy (ordre public)."

Paragraph 4: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

Paragraph 5: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Changes to Articles 25 and 26 of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 1 June 2004).

ARTICLE 27

ASSISTANCE IN THE COLLECTION OF TAXES[1]

1. The Contracting States shall lend assistance to each other in the collection of revenue claims. This assistance is not restricted by Articles 1 and 2. The competent authorities of the Contracting States may by mutual agreement settle the mode of application of this Article.

2. The term "revenue claim" as used in this Article means an amount owed in respect of taxes of every kind and description imposed on behalf of the Contracting States, or of their political subdivisions or local authorities, insofar as the taxation thereunder is not contrary to this Convention or any other instrument to which the Contracting States are parties, as well as interest, administrative penalties and costs of collection or conservancy related to such amount.

3. When a revenue claim of a Contracting State is enforceable under the laws of that State and is owed by a person who, at that time, cannot, under the laws of that State, prevent its collection, that revenue claim shall, at the request of the competent authority of that State, be accepted for purposes of collection by the competent authority of the other Contracting State. That revenue claim shall be collected by that other State in accordance with the provisions of its laws applicable to the enforcement and collection of its own taxes as if the revenue claim were a revenue claim of that other State.

4. When a revenue claim of a Contracting State is a claim in respect of which that State may, under its law, take measures of conservancy with a view to ensure its collection, that revenue claim shall, at the request of the competent authority of that State, be accepted for purposes of taking measures of conservancy by the competent authority of the other Contracting State. That other State shall take measures of conservancy in respect of that revenue claim in accordance with the provisions of its laws as if the revenue claim were a revenue claim of that other State even if, at the time when such measures are applied, the revenue claim is not enforceable in the first-mentioned State or is owed by a person who has a right to prevent its collection.

---

1 In some countries, national law, policy or administrative considerations may not allow or justify the type of assistance envisaged under this Article or may require that this type of assistance be restricted, *e.g.* to countries that have similar tax systems or tax administrations or as to the taxes covered. For that reason, the Article should only be included in the Convention where each State concludes that, based on the factors described in paragraph 1 of the Commentary on the Article, they can agree to provide assistance in the collection of taxes levied by the other State.

5. Notwithstanding the provisions of paragraphs 3 and 4, a revenue claim accepted by a Contracting State for purposes of paragraph 3 or 4 shall not, in that State, be subject to the time limits or accorded any priority applicable to a revenue claim under the laws of that State by reason of its nature as such. In addition, a revenue claim accepted by a Contracting State for the purposes of paragraph 3 or 4 shall not, in that State, have any priority applicable to that revenue claim under the laws of the other Contracting State.

6. Proceedings with respect to the existence, validity or the amount of a revenue claim of a Contracting State shall not be brought before the courts or administrative bodies of the other Contracting State.

7. Where, at any time after a request has been made by a Contracting State under paragraph 3 or 4 and until the other Contracting State has collected and remitted the relevant revenue claim to the first-mentioned State, the relevant revenue claim ceases to be

a) in the case of a request under paragraph 3, a revenue claim of the first-mentioned State that is enforceable under the laws of that State and is owed by a person who, at that time, cannot, under the laws of that State, prevent its collection, or

b) in the case of a request under paragraph 4, a revenue claim of the first-mentioned State in respect of which that State may, under its laws, take measures of conservancy with a view to ensure its collection

the competent authority of the first-mentioned State shall promptly notify the competent authority of the other State of that fact and, at the option of the other State, the first-mentioned State shall either suspend or withdraw its request.

8. In no case shall the provisions of this Article be construed so as to impose on a Contracting State the obligation:

a) to carry out administrative measures at variance with the laws and administrative practice of that or of the other Contracting State;

b) to carry out measures which would be contrary to public policy (*ordre public*);

c) to provide assistance if the other Contracting State has not pursued all reasonable measures of collection or conservancy, as the case may be, available under its laws or administrative practice;

d) to provide assistance in those cases where the administrative burden for that State is clearly disproportionate to the benefit to be derived by the other Contracting State.

HISTORY

The title of Article 27: Replaced on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. The previous title of Article 27 was then redesignated as the title of Article 28 (see history of Article 28).

Paragraph 1: Replaced on 28 January 2003. Paragraph 1 as it read before 28 January 2003 was renumbered as paragraph 1 of Article 28 (see history of paragraph 1 of Article 28) and a new paragraph 1 was added by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003 (see history of Article 28).

Paragraph 2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2002.

Paragraph 3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2002.

Paragraph 4: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2002.

Paragraph 5: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2002.

Paragraph 6: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2002.

Paragraph 7: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2002.

Paragraph 8: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2002.

ARTICLE 28

MEMBERS OF DIPLOMATIC MISSIONS AND CONSULAR POSTS

Nothing in this Convention shall affect the fiscal privileges of members of diplomatic missions or consular posts under the general rules of international law or under the provisions of special agreements.

HISTORY

Article 28 corresponds to Article 27 as it read before 28 January 2003. On 28 January 2003 Article 28 was renumbered as paragraph 29 (see history of Article 29) and Article 27 was renumbered as paragraph 28 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Article 27 and its title were previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, Article 27 and its title read as follows:

"DIPLOMATIC AGENTS AND CONSULAR OFFICERS

> Nothing in this Convention shall affect the fiscal privileges of diplomatic agents or consular officers under the general rules of international law or under the provisions of special agreements."

Article 27 and its title were previously been amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, Article 27 and its title read as follows:

"DIPLOMATIC AND CONSULAR OFFICIALS

> Nothing in this Convention shall affect the fiscal privileges of diplomatic or consular officials under the general rules of international law or under the provisions of special agreements."

ARTICLE 29

TERRITORIAL EXTENSION[1]

1. This Convention may be extended, either in its entirety or with any necessary modifications [to any part of the territory of (State A) or of (State B) which is specifically excluded from the application of the Convention or], to any State or territory for whose international relations (State A) or (State B) is responsible, which imposes taxes substantially similar in character to those to which the Convention applies. Any such extension shall take effect from such date and subject to such modifications and conditions, including conditions as to termination, as may be specified and agreed between the Contracting States in notes to be exchanged through diplomatic channels or in any other manner in accordance with their constitutional procedures.

2. Unless otherwise agreed by both Contracting States, the termination of the Convention by one of them under Article 30 shall also terminate, in the manner provided for in that Article, the application of the Convention [to any part of the territory of (State A) or of (State B) or] to any State or territory to which it has been extended under this Article.

HISTORY

Article 29 corresponds to Article 28 as it read before 28 January 2003 when it was renumbered as Article 29 by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003.

Article 29 as it read before 28 January 2003 was renumbered as Article 30 (see history of Article 30) by the report entitled “The 2002 Update to the Model Tax Convention” adopted by the OECD Council on 28 January 2003.

Paragraph 1: Corresponds to paragraph 1 of Article 28 of the 1963 Draft Convention and until 28 January 2003. On 28 January 2003 paragraph 1 of Article 29 was renumbered as paragraph 1 of Article 30 (see history of paragraph 1 of Article 30) and paragraph 1 of Article 28 was renumbered as paragraph 1 of Article 29 by the report entitled “The 2002 Update to the Model Tax Convention” adopted by the OECD Council on 28 January 2003.

Paragraph 2: Corresponds to paragraph 2 of Article 28 as it read before 28 January 2003. On 28 January 2003 paragraph 2 of Article 29 was renumbered as paragraph 2 of Article 30 (see history of paragraph 2 of Article 30) and paragraph 2 of Article 28 was renumbered as paragraph 2 of Article 29 by the report entitled “The 2002 Update to the Model Tax Convention” adopted by the OECD Council on 28 January 2003.

Paragraph 2 of Article 28 as it read before 28 January 2003 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963

1 The words between brackets are of relevance when, by special provision, a part of the territory of a Contracting State is excluded from the application of the Convention.

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 of Article 28 read as follows:

> "2. Unless otherwise agreed by both Contracting States, the denunciation of the Convention by one of them under Article 30 shall terminate, in the manner provided for in that Article, the application of the Convention [to any part of the territory of (State A) or of (State B) or] to any State or territory to which it has been extended under this Article."

Chapter VII
FINAL PROVISIONS

ARTICLE 30

ENTRY INTO FORCE

1. This Convention shall be ratified and the instruments of ratification shall be exchanged at .... as soon as possible.

2. The Convention shall enter into force upon the exchange of instruments of ratification and its provisions shall have effect:

a) (in State A): ....

b) (in State B): ....

HISTORY

Article 30 corresponds to Article 29 as it read before 28 January 2003 when it was renumbered as Article 30 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Article 30 as it read before 28 January 2003 was renumbered as Article 31 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003 (see history of Article 31).

Paragraph 1: Corresponds to paragraph 1 of Article 29 of the 1963 Draft Convention as it read until 28 January 2003. On 28 January 2003 Article 30 was renumbered as Article 31 (see history of Article 31) and paragraph 1 of Article 29 was renumbered as paragraph 1 of Article 30 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 2: Corresponds to paragraph 2 of Article 29 of the 1963 Draft Convention as it read until 28 January 2003 when it was renumbered as paragraph 2 of Article 30 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

ARTICLE 31

TERMINATION

This Convention shall remain in force until terminated by a Contracting State. Either Contracting State may terminate the Convention, through diplomatic channels, by giving notice of termination at least six months before the end of any calendar year after the year ...... In such event, the Convention shall cease to have effect:

a) (in State A): ....

b) (in State B): ....

HISTORY

Article 31 corresponds to Article 30 as it read before 28 January 2003 when it was renumbered as Article 31 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Article 30 as it read before 28 January 2003 was amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, Article 30 read as follows:

"Article 30

> This Convention shall remain in force until denounced by one of the Contracting States. Either Contracting State may denounce the Convention, through diplomatic channels, by giving notice of termination at least six months before the end of any calendar year after the year ..... In such event, the Convention shall cease to have effect:
>
> *a)* in (State A) : ....
>
> *b)* in (State B) : ...."

COMMENTARIES ON THE ARTICLES OF THE MODEL TAX CONVENTION

COMMENTARY ON ARTICLE 1
CONCERNING THE PERSONS COVERED BY THE CONVENTION

1. Whereas the earliest conventions in general were applicable to "citizens" of the Contracting States, more recent conventions usually apply to "residents" of one or both of the Contracting States irrespective of nationality. Some conventions are of even wider scope because they apply more generally to "taxpayers" of the Contracting States; they are, therefore, also applicable to persons, who, although not residing in either State, are nevertheless liable to tax on part of their income or capital in each of them. It has been deemed preferable for practical reasons to provide that the Convention is to apply to persons who are residents of one or both of the Contracting States. The term "resident" is defined in Article 4.

(Amended on 21 September 1995; see HISTORY)

Application of the Convention to partnerships

2. Domestic laws differ in the treatment of partnerships. These differences create various difficulties when applying tax Conventions in relation to partnerships. These difficulties are analysed in the report by the Committee on Fiscal Affairs entitled "I. Introduction",[1] the conclusions of which have been incorporated below and in the Commentary on various other provisions of the Model Tax Convention.

(Replaced on 29 April 2000; see HISTORY)

3. As discussed in that report, a main source of difficulties is the fact that some countries treat partnerships as taxable units (sometimes even as companies) whereas other countries adopt what may be referred to as the fiscally transparent approach, under which the partnership is ignored for tax purposes and the individual partners are taxed on their respective share of the partnership's income.

(Replaced on 29 April 2000; see HISTORY)

4. A first difficulty is the extent to which a partnership is entitled as such to the benefits of the provisions of the Convention. Under Article 1, only persons who are residents of the Contracting States are entitled to the benefits of the tax Convention entered into by these States. While paragraph 2 of the Commentary on Article 1 explains why a partnership constitutes a person, a partnership does not necessarily qualify as a resident of a Contracting State under Article 4.

(Replaced on 29 April 2000; see HISTORY)

1 Reproduced in Volume II at page R(15)-1.

5. Where a partnership is treated as a company or taxed in the same way, it is a resident of the Contracting State that taxes the partnership on the grounds mentioned in paragraph 1 of Article 4 and, therefore, it is entitled to the benefits of the Convention. Where, however, a partnership is treated as fiscally transparent in a State, the partnership is not “liable to tax” in that State within the meaning of paragraph 1 of Article 4, and so cannot be a resident thereof for purposes of the Convention. In such a case, the application of the Convention to the partnership as such would be refused, unless a special rule covering partnerships were provided for in the Convention. Where the application of the Convention is so refused, the partners should be entitled, with respect to their share of the income of the partnership, to the benefits provided by the Conventions entered into by the States of which they are residents to the extent that the partnership’s income is allocated to them for the purposes of taxation in their State of residence (see paragraph 8.8 of the Commentary on Article 4).

(Amended on 17 July 2008; see HISTORY)

6. The relationship between the partnership’s entitlement to the benefits of a tax Convention and that of the partners raises other questions.

(Replaced on 29 April 2000; see HISTORY)

6.1 One issue is the effect that the application of the provisions of the Convention to a partnership can have on the taxation of the partners. Where a partnership is treated as a resident of a Contracting State, the provisions of the Convention that restrict the other Contracting State’s right to tax the partnership on its income do not apply to restrict that other State’s right to tax the partners who are its own residents on their share of the income of the partnership. Some states may wish to include in their conventions a provision that expressly confirms a Contracting State’s right to tax resident partners on their share of the income of a partnership that is treated as a resident of the other State.

(Added on 29 April 2000; see HISTORY)

6.2 Another issue is that of the effect of the provisions of the Convention on a Contracting State’s right to tax income arising on its territory where the entitlement to the benefits of one, or more than one, Conventions is different for the partners and the partnership. Where, for instance, the State of source treats a domestic partnership as fiscally transparent and therefore taxes the partners on their share of the income of the partnership, a partner that is resident of a State that taxes partnerships as companies would not be able to claim the benefits of the Convention between the two States with respect to the share of the partnership’s income that the State of source taxes in his hands since that income, though allocated to the person claiming the benefits

of the Convention under the laws of the State of source, is not similarly allocated for purposes of determining the liability to tax on that item of income in the State of residence of that person.

(Added on 29 April 2000; see HISTORY)

6.3 The results described in the preceding paragraph should obtain even if, as a matter of the domestic law of the State of source, the partnership would not be regarded as transparent for tax purposes but as a separate taxable entity to which the income would be attributed, provided that the partnership is not actually considered as a resident of the State of source. This conclusion is founded upon the principle that the State of source should take into account, as part of the factual context in which the Convention is to be applied, the way in which an item of income, arising in its jurisdiction, is treated in the jurisdiction of the person claiming the benefits of the Convention as a resident. For States which could not agree with this interpretation of the Article, it would be possible to provide for this result in a special provision which would avoid the resulting potential double taxation where the income of the partnership is differently allocated by the two States.

(Added on 29 April 2000; see HISTORY)

6.4 Where, as described in paragraph 6.2, income has "flowed through" a transparent partnership to the partners who are liable to tax on that income in the State of their residence then the income is appropriately viewed as "paid" to the partners since it is to them and not to the partnership that the income is allocated for purposes of determining their tax liability in their State of residence. Hence the partners, in these circumstances, satisfy the condition, imposed in several Articles, that the income concerned is "paid to a resident of the other Contracting State". Similarly the requirement, imposed by some other Articles, that income or gains are "derived by a resident of the other Contracting State" is met in the circumstances described above. This interpretation avoids denying the benefits of tax Conventions to a partnership's income on the basis that neither the partnership, because it is not a resident, nor the partners, because the income is not directly paid to them or derived by them, can claim the benefits of the Convention with respect to that income. Following from the principle discussed in paragraph 6.3, the conditions that the income be paid to, or derived by, a resident should be considered to be satisfied even where, as a matter of the domestic law of the State of source, the partnership would not be regarded as transparent for tax purposes, provided that the partnership is not actually considered as a resident of the State of source.

(Added on 29 April 2000; see HISTORY)

6.5 Partnership cases involving three States pose difficult problems with respect to the determination of entitlement to benefits under Conventions. However, many problems may be solved through the application of the principles described in paragraph 6.2 to 6.4. Where a partner is a resident of one State, the partnership is established in another State and the partner shares in partnership income arising in a third State then the partner may claim the benefits of the Convention between his State of residence and the State of source of the income to the extent that the partnership's income is allocated to him for the purposes of taxation in his State of residence. If, in addition, the partnership is taxed as a resident of the State in which it is established then the partnership may itself claim the benefits of the Convention between the State in which it is established and the State of source. In such a case of "double benefits", the State of source may not impose taxation which is inconsistent with the terms of either applicable Convention; therefore, where different rates are provided for in the two Conventions, the lower will be applied. However, Contracting States may wish to consider special provisions to deal with the administration of benefits under Conventions in situations such as these, so that the partnership may claim benefits but partners could not present concurrent claims. Such provisions could ensure appropriate and simplified administration of the giving of benefits. No benefits will be available under the Convention between the State in which the partnership is established and the State of source if the partnership is regarded as transparent for tax purposes by the State in which it is established. Similarly no benefits will be available under the Convention between the State of residence of the partner and the State of source if the income of the partnership is not allocated to the partner under the taxation law of the State of residence. If the partnership is regarded as transparent for tax purposes by the State in which it is established and the income of the partnership is not allocated to the partner under the taxation law of the State of residence of the partner, the State of source may tax partnership income allocable to the partner without restriction.

(Added on 29 April 2000; see HISTORY)

6.6 Differences in how countries apply the fiscally transparent approach may create other difficulties for the application of tax Conventions. Where a State considers that a partnership does not qualify as a resident of a Contracting State because it is not liable to tax and the partners are liable to tax in their State of residence on their share of the partnership's income, it is expected that that State will apply the provisions of the Convention as if the partners had earned the income directly so that the classification of the income for purposes of the allocative rules of Articles 6 to 21 will not be modified by the fact that the income flows through the partnership. Difficulties may arise, however, in the application of provisions which refer to

the activities of the taxpayer, the nature of the taxpayer, the relationship between the taxpayer and another party to a transaction. Some of these difficulties are discussed in paragraph 19.1 of the Commentary on Article 5 and paragraphs 6.1 and 6.2 of the Commentary on Article 15.

(Added on 29 April 2000; see HISTORY)

6.7 Finally, a number of other difficulties arise where different rules of the Convention are applied by the Contracting States to income derived by a partnership or its partners, depending on the domestic laws of these States or their interpretation of the provisions of the Convention or of the relevant facts. These difficulties relate to the broader issue of conflicts of qualification, which is dealt with in paragraphs 32.1 ff. and 56.1 ff. of the Commentary on Article 23.

(Added on 29 April 2000; see HISTORY)

Cross-Border Issues Relating to Collective Investment Vehicles

6.8 Most countries have dealt with the domestic tax issues arising from groups of small investors who pool their funds in collective investment vehicles (CIVs). In general, the goal of such systems is to provide for neutrality between direct investments and investments through a CIV. Whilst those systems generally succeed when the investors, the CIV and the investment are all located in the same country, complications frequently arise when one or more of those parties or the investments are located in different countries. These complications are discussed in the report by the Committee on Fiscal Affairs entitled “The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles”,[1] the main conclusions of which have been incorporated below. For purposes of the Report and for this discussion, the term “CIV” is limited to funds that are widely-held, hold a diversified portfolio of securities and are subject to investor-protection regulation in the country in which they are established.

(Added on 22 July 2010; see HISTORY)

Application of the Convention to CIVs

6.9 The primary question that arises in the cross-border context is whether a CIV should qualify for the benefits of the Convention in its own right. In order to do so under treaties that, like the Convention, do not include a specific provision dealing with CIVs, a CIV would have to qualify as a “person”

1 Reproduced in Volume II at page R(24)-1.

that is a "resident" of a Contracting State and, as regards the application of Articles 10 and 11, that is the "beneficial owner" of the income that it receives.

(Added on 22 July 2010; see HISTORY)

6.10 The determination of whether a CIV should be treated as a "person" begins with the legal form of the CIV, which differs substantially from country to country and between the various types of vehicles. In many countries, most CIVs take the form of a company. In others, the CIV typically would be a trust. In still others, many CIVs are simple contractual arrangements or a form of joint ownership. In most cases, the CIV would be treated as a taxpayer or a "person" for purposes of the tax law of the State in which it is established; for example, in some countries where the CIV is commonly established in the form of a trust, either the trust itself, or the trustees acting collectively in their capacity as such, is treated as a taxpayer or a person for domestic tax law purposes. In view of the wide meaning to be given to the term "person", the fact that the tax law of the country where such a CIV is established would treat it as a taxpayer would be indicative that the CIV is a "person" for treaty purposes. Contracting States wishing to expressly clarify that, in these circumstances, such CIVs are persons for the purposes of their conventions may agree bilaterally to modify the definition of "person" to include them.

(Added on 22 July 2010; see HISTORY)

6.11 Whether a CIV is a "resident" of a Contracting State depends not on its legal form (as long as it qualifies as a person) but on its tax treatment in the State in which it is established. Although a consistent goal of domestic CIV regimes is to ensure that there is only one level of tax, at either the CIV or the investor level, there are a number of different ways in which States achieve that goal. In some States, the holders of interests in the CIV are liable to tax on the income received by the CIV, rather than the CIV itself being liable to tax on such income. Such a fiscally transparent CIV would not be treated as a resident of the Contracting State in which it is established because it is not liable to tax therein.

(Added on 22 July 2010; see HISTORY)

6.12 By contrast, in other States, a CIV is in principle liable to tax but its income may be fully exempt, for instance, if the CIV fulfils certain criteria with regard to its purpose, activities or operation, which may include requirements as to minimum distributions, its sources of income and sometimes its sectors of operation. More frequently, CIVs are subject to tax but the base for taxation is reduced, in a variety of different ways, by reference to distributions paid to investors. Deductions for distributions will usually mean that no tax is in fact paid. Other States tax CIVs but at a special low tax rate. Finally, some States tax CIVs fully but with integration at the investor level to avoid double

taxation of the income of the CIV. For those countries that adopt the view, reflected in paragraph 8.6 of the Commentary on Article 4, that a person may be liable to tax even if the State in which it is established does not impose tax, the CIV would be treated as a resident of the State in which it is established in all of these cases because the CIV is subject to comprehensive taxation in that State. Even in the case where the income of the CIV is taxed at a zero rate, or is exempt from tax, the requirements to be treated as a resident may be met if the requirements to qualify for such lower rate or exemption are sufficiently stringent.

(Added on 22 July 2010; see HISTORY)

6.13 Those countries that adopt the alternative view, reflected in paragraph 8.7 of the Commentary on Article 4, that an entity that is exempt from tax therefore is not liable to tax may not view some or all of the CIVs described in the preceding paragraph as residents of the States in which they are established. States taking the latter view, and those States negotiating with such States, are encouraged to address the issue in their bilateral negotiations.

(Added on 22 July 2010; see HISTORY)

6.14 Some countries have questioned whether a CIV, even if it is a "person" and a "resident", can qualify as the beneficial owner of the income it receives. Because a "CIV" as defined in paragraph 6.8 above must be widely-held, hold a diversified portfolio of securities and be subject to investor-protection regulation in the country in which it is established, such a CIV, or its managers, often perform significant functions with respect to the investment and management of the assets of the CIV. Moreover, the position of an investor in a CIV differs substantially, as a legal and economic matter, from the position of an investor who owns the underlying assets, so that it would not be appropriate to treat the investor in such a CIV as the beneficial owner of the income received by the CIV. Accordingly, a vehicle that meets the definition of a widely-held CIV will also be treated as the beneficial owner of the dividends and interest that it receives, so long as the managers of the CIV have discretionary powers to manage the assets generating such income (unless an individual who is a resident of that State who would have received the income in the same circumstances would not have been considered to be the beneficial owner thereof).

(Added on 22 July 2010; see HISTORY)

6.15 Because these principles are necessarily general, their application to a particular type of CIV might not be clear to the CIV, investors and intermediaries. Any uncertainty regarding treaty eligibility is especially problematic for a CIV, which must take into account amounts expected to be

received, including any withholding tax benefits provided by treaty, when it calculates its net asset value ("NAV"). The NAV, which typically is calculated daily, is the basis for the prices used for subscriptions and redemptions. If the withholding tax benefits ultimately obtained by the CIV do not correspond to its original assumptions about the amount and timing of such withholding tax benefits, there will be a discrepancy between the real asset value and the NAV used by investors who have purchased, sold or redeemed their interests in the CIV in the interim.

(Added on 22 July 2010; see HISTORY)

6.16 In order to provide more certainty under existing treaties, tax authorities may want to reach a mutual agreement clarifying the treatment of some types of CIVs in their respective States. With respect to some types of CIVs, such a mutual agreement might simply confirm that the CIV satisfies the technical requirements discussed above and therefore is entitled to benefits in its own right. In other cases, the mutual agreement could provide a CIV an administratively feasible way to make claims with respect to treaty-eligible investors (see paragraphs 36 to 40 of the report "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" for a discussion of this issue). Of course, a mutual agreement could not cut back on benefits that otherwise would be available to the CIV under the terms of a treaty.

(Added on 22 July 2010; see HISTORY)

Policy issues raised by the current treatment of collective investment vehicles

6.17 The same considerations would suggest that treaty negotiators address expressly the treatment of CIVs. Thus, even if it appears that CIVs in each of the Contracting States would be entitled to benefits, it may be appropriate to confirm that position publicly (for example, through an exchange of notes) in order to provide certainty. It may also be appropriate to expressly provide for the treaty entitlement of CIVs by including, for example, a provision along the following lines:

> Notwithstanding the other provisions of this Convention, a collective investment vehicle which is established in a Contracting State and which receives income arising in the other Contracting State shall be treated, for purposes of applying the Convention to such income, as an individual who is a resident of the Contracting State in which it is established and as the beneficial owner of the income it receives (provided that, if an individual who is a resident of the first-mentioned State had received the income in the same circumstances, such individual would have been considered to be the beneficial owner thereof). For purposes of this paragraph, the term

> "collective investment vehicle" means, in the case of [State A], a [ ] and, in the case of [State B], a [ ], as well as any other investment fund, arrangement or entity established in either Contracting State which the competent authorities of the Contracting States agree to regard as a collective investment vehicle for purposes of this paragraph.

(Added on 22 July 2010; see HISTORY)

6.18 However, in negotiating new treaties or amendments to existing treaties, the Contracting States would not be restricted to clarifying the results of the application of other treaty provisions to CIVs, but could vary those results to the extent necessary to achieve policy objectives. For example, in the context of a particular bilateral treaty, the technical analysis may result in CIVs located in one of the Contracting States qualifying for benefits, whilst CIVs in the other Contracting State may not. This may make the treaty appear unbalanced, although whether it is so in fact will depend on the specific circumstances. If it is, then the Contracting States should attempt to reach an equitable solution. If the practical result in each of the Contracting States is that most CIVs do not in fact pay tax, then the Contracting States should attempt to overcome differences in legal form that might otherwise cause those in one State to qualify for benefits and those in the other to be denied benefits. On the other hand, the differences in legal form and tax treatment in the two Contracting States may mean that it is appropriate to treat CIVs in the two States differently. In comparing the taxation of CIVs in the two States, taxation in the source State and at the investor level should be considered, not just the taxation of the CIV itself. The goal is to achieve neutrality between a direct investment and an investment through a CIV in the international context, just as the goal of most domestic provisions addressing the treatment of CIVs is to achieve such neutrality in the wholly domestic context.

(Added on 22 July 2010; see HISTORY)

6.19 A Contracting State may also want to consider whether existing treaty provisions are sufficient to prevent CIVs from being used in a potentially abusive manner. It is possible that a CIV could satisfy all of the requirements to claim treaty benefits in its own right, even though its income is not subject to much, if any, tax in practice. In that case, the CIV could present the opportunity for residents of third countries to receive treaty benefits that would not have been available had they invested directly. Accordingly, it may be appropriate to restrict benefits that might otherwise be available to such a CIV, either through generally applicable anti-abuse or anti-treaty shopping rules (as discussed under "Improper use of the Convention" below) or through a specific provision dealing with CIVs.

(Added on 22 July 2010; see HISTORY)

6.20 In deciding whether such a provision is necessary, Contracting States will want to consider the economic characteristics, including the potential for treaty shopping, presented by the various types of CIVs that are prevalent in each of the Contracting States. For example, a CIV that is not subject to any taxation in the State in which it is established may present more of a danger of treaty shopping than one in which the CIV itself is subject to an entity-level tax or where distributions to non-resident investors are subject to withholding tax.

(Added on 22 July 2010; see HISTORY)

Possible provisions modifying the treatment of CIVs

6.21 Where the Contracting States have agreed that a specific provision dealing with CIVs is necessary to address the concerns described in paragraphs 6.18 through 6.20, they could include in the bilateral treaty the following provision:

a) Notwithstanding the other provisions of this Convention, a collective investment vehicle which is established in a Contracting State and which receives income arising in the other Contracting State shall be treated for purposes of applying the Convention to such income as an individual who is a resident of the Contracting State in which it is established and as the beneficial owner of the income it receives (provided that, if an individual who is a resident of the first-mentioned State had received the income in the same circumstances, such individual would have been considered to be the beneficial owner thereof), but only to the extent that the beneficial interests in the collective investment vehicle are owned by equivalent beneficiaries.

b) For purposes of this paragraph:

(i) the term "collective investment vehicle" means, in the case of [State A], a [ ] and, in the case of [State B], a [ ], as well as any other investment fund, arrangement or entity established in either Contracting State which the competent authorities of the Contracting States agree to regard as a collective investment vehicle for purposes of this paragraph; and

(ii) the term "equivalent beneficiary" means a resident of the Contracting State in which the CIV is established, and a resident of any other State with which the Contracting State in which the income arises has an income tax convention that provides for effective and comprehensive information exchange who would, if he received the particular item of income for which benefits are being claimed under this Convention, be entitled under that convention, or under the domestic law of the Contracting State in which the

income arises, to a rate of tax with respect to that item of income that is at least as low as the rate claimed under this Convention by the CIV with respect to that item of income.

(Added on 22 July 2010; see HISTORY)

6.22 It is intended that the Contracting States would provide in subdivision *b*)(*i*) specific cross-references to relevant tax or securities law provisions relating to CIVs. In deciding which treatment should apply with respect to particular CIVs, Contracting States should take into account the policy considerations discussed above. Negotiators may agree that economic differences in the treatment of CIVs in the two Contracting States, or even within the same Contracting State, justify differential treatment in the tax treaty. In that case, some combination of the provisions in this section might be included in the treaty.

(Added on 22 July 2010; see HISTORY)

6.23 The effect of allowing benefits to the CIV to the extent that it is owned by "equivalent beneficiaries" as defined in subdivision *b*)(*ii*) is to ensure that investors who would have been entitled to benefits with respect to income derived from the source State had they received the income directly are not put in a worse position by investing through a CIV located in a third country. The approach thus serves the goals of neutrality as between direct investments and investments through a CIV. It also decreases the risk of double taxation as between the source State and the State of residence of the investor, to the extent that there is a tax treaty between them. It is beneficial for investors, particularly those from small countries, who will consequently enjoy a greater choice of investment vehicles. It also increases economies of scale, which are a primary economic benefit of investing through CIVs. Finally, adopting this approach substantially simplifies compliance procedures. In many cases, nearly all of a CIV's investors will be "equivalent beneficiaries", given the extent of bilateral treaty coverage and the fact that rates in those treaties are nearly always 10-15 per cent on portfolio dividends.

(Added on 22 July 2010; see HISTORY)

6.24 At the same time, the provision prevents a CIV from being used by investors to achieve a better tax treaty position than they would have achieved by investing directly. This is achieved through the rate comparison in the definition of "equivalent beneficiary". Accordingly, the appropriate comparison is between the rate claimed by the CIV and the rate that the investor could have claimed had it received the income directly. For example, assume that a CIV established in State B receives dividends from a company resident in State A. Sixty-five per cent of the investors in the CIV are individual residents of State B; ten per cent are pension funds established in State C and

25 per cent are individual residents of State C. Under the A-B tax treaty, portfolio dividends are subject to a maximum tax rate at source of ten per cent. Under the A-C tax treaty, pension funds are exempt from taxation in the source State and other portfolio dividends are subject to tax at a maximum tax rate of 15 per cent. Both the A-B and A-C treaties include effective and comprehensive information exchange provisions. On these facts, 75 per cent of the investors in the CIV — the individual residents of State B and the pension funds established in State C — are equivalent beneficiaries.

(Added on 22 July 2010; see HISTORY)

6.25 A source State may also be concerned about the potential deferral of taxation that could arise with respect to a CIV that is subject to no or low taxation and that may accumulate its income rather than distributing it on a current basis. Such States may be tempted to limit benefits to the CIV to the proportion of the CIV's investors who are currently taxable on their share of the income of the CIV. However, such an approach has proven difficult to apply to widely-held CIVs in practice. Those States that are concerned about the possibility of such deferral may wish to negotiate provisions that extend benefits only to those CIVs that are required to distribute earnings currently. Other States may be less concerned about the potential for deferral, however. They may take the view that, even if the investor is not taxed currently on the income received by the CIV, it will be taxed eventually, either on the distribution, or on any capital gains if it sells its interest in the CIV before the CIV distributes the income. Those States may wish to negotiate provisions that grant benefits to CIVs even if they are not obliged to distribute their income on a current basis. Moreover, in many States, the tax rate with respect to investment income is not significantly higher than the treaty withholding rate on dividends, so there would be little, if any, residence State tax deferral to be achieved by earning such income through an investment fund rather than directly. In addition, many States have taken steps to ensure the current taxation of investment income earned by their residents through investment funds, regardless of whether the funds accumulate that income, further reducing the potential for such deferral. When considering the treatment of CIVs that are not required to distribute income currently, States may want to consider whether these or other factors address the concerns described above so that the type of limits described herein might not in fact be necessary.

(Added on 22 July 2010; see HISTORY)

6.26 Some States believe that taking all treaty-eligible investors, including those in third States, into account would change the bilateral nature of tax treaties. These States may prefer to allow treaty benefits to a CIV only to the extent that the investors in the CIV are residents of the Contracting State in

which the CIV is established. In that case, the provision would be drafted as follows:

a) Notwithstanding the other provisions of this Convention, a collective investment vehicle which is established in a Contracting State and which receives income arising in the other Contracting State shall be treated for purposes of applying the Convention to such income as an individual who is a resident of the Contracting State in which it is established and as the beneficial owner of the income it receives (provided that, if an individual who is a resident of the first-mentioned State had received the income in the same circumstances, such individual would have been considered to be the beneficial owner thereof), but only to the extent that the beneficial interests in the collective investment vehicle are owned by residents of the Contracting State in which the collective investment vehicle is established.

b) For purposes of this paragraph, the term "collective investment vehicle" means, in the case of [State A], a [ ] and, in the case of [State B], a [ ], as well as any other investment fund, arrangement or entity established in either Contracting State which the competent authorities of the Contracting States agree to regard as a collective investment vehicle for purposes of this paragraph.

(Added on 22 July 2010; see HISTORY)

6.27 Although the purely proportionate approach set out in paragraphs 6.21 and 6.26 protects against treaty shopping, it may also impose substantial administrative burdens as a CIV attempts to determine the treaty entitlement of every single investor. A Contracting State may decide that the fact that a substantial proportion of the CIV's investors are treaty-eligible is adequate protection against treaty shopping, and thus that it is appropriate to provide an ownership threshold above which benefits would be provided with respect to all income received by the CIV. Including such a threshold would also mitigate some of the procedural burdens that otherwise might arise. If desired, therefore, the following sentence could be added at the end of subparagraph *a)*:

However, if at least [ ] per cent of the beneficial interests in the collective investment vehicle are owned by [equivalent beneficiaries][residents of the Contracting State in which the collective investment vehicle is established], the collective investment vehicle shall be treated as an individual who is a resident of the Contracting State in which it is established and as the beneficial owner of all of the income it receives (provided that, if an individual who is a resident of the first-mentioned State had received the

income in the same circumstances, such individual would have been considered to be the beneficial owner thereof).

(Added on 22 July 2010; see HISTORY)

6.28 In some cases, the Contracting States might wish to take a different approach from that put forward in paragraphs 6.17, 6.21 and 6.26 with respect to certain types of CIVs and to treat the CIV as making claims on behalf of the investors rather than in its own name. This might be true, for example, if a large percentage of the owners of interests in the CIV as a whole, or of a class of interests in the CIV, are pension funds that are exempt from tax in the source country under terms of the relevant treaty similar to those described in paragraph 69 of the Commentary on Article 18. To ensure that the investors would not lose the benefit of the preferential rates to which they would have been entitled had they invested directly, the Contracting States might agree to a provision along the following lines with respect to such CIVs (although likely adopting one of the approaches of paragraph 6.17, 6.21 or 6.26 with respect to other types of CIVs):

a) A collective investment vehicle described in subparagraph *c*) which is established in a Contracting State and which receives income arising in the other Contracting State shall not be treated as a resident of the Contracting State in which it is established, but may claim, on behalf of the owners of the beneficial interests in the collective investment vehicle, the tax reductions, exemptions or other benefits that would have been available under this Convention to such owners had they received such income directly.

b) A collective investment vehicle may not make a claim under subparagraph *a*) for benefits on behalf of any owner of the beneficial interests in such collective investment vehicle if the owner has itself made an individual claim for benefits with respect to income received by the collective investment vehicle.

c) This paragraph shall apply with respect to, in the case of [State A], a [ ] and, in the case of [State B], a [ ], as well as any other investment fund, arrangement or entity established in either Contracting State to which the competent authorities of the Contracting States agree to apply this paragraph.

This provision would, however, limit the CIV to making claims on behalf of residents of the same Contracting State in which the CIV is established. If, for the reasons described in paragraph 6.23, the Contracting States deemed it desirable to allow the CIV to make claims on behalf of treaty-eligible residents of third States, that could be accomplished by replacing the words “this Convention” with “any Convention to which the other Contracting State is a party” in subparagraph *a*). If, as anticipated, the Contracting States would

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

agree that the treatment provided in this paragraph would apply only to specific types of CIVs, it would be necessary to ensure that the types of CIVs listed in subparagraph *c*) did not include any of the types of CIVs listed in a more general provision such as that in paragraph 6.17, 6.21 or 6.26 so that the treatment of a specific type of CIV would be fixed, rather than elective. Countries wishing to allow individual CIVs to elect their treatment, either with respect to the CIV as a whole or with respect to one or more classes of interests in the CIV, are free to modify the paragraph to do so.

(Added on 22 July 2010; see HISTORY)

6.29 Under either the approach in paragraphs 6.21 and 6.26 or in paragraph 6.28, it will be necessary for the CIV to make a determination regarding the proportion of holders of interests who would have been entitled to benefits had they invested directly. Because ownership of interests in CIVs changes regularly, and such interests frequently are held through intermediaries, the CIV and its managers often do not themselves know the names and treaty status of the beneficial owners of interests. It would be impractical for the CIV to collect such information from the relevant intermediaries on a daily basis. Accordingly, Contracting States should be willing to accept practical and reliable approaches that do not require such daily tracing.

(Added on 22 July 2010; see HISTORY)

6.30 For example, in many countries the CIV industry is largely domestic, with an overwhelming percentage of investors resident in the country in which the CIV is established. In some cases, tax rules discourage foreign investment by imposing a withholding tax on distributions, or securities laws may severely restrict offerings to non-residents. Governments should consider whether these or other circumstances provide adequate protection against investment by non-treaty-eligible residents of third countries. It may be appropriate, for example, to assume that a CIV is owned by residents of the State in which it is established if the CIV has limited distribution of its shares or units to the State in which the CIV is established or to other States that provide for similar benefits in their treaties with the source State.

(Added on 22 July 2010; see HISTORY)

6.31 In other cases, interests in the CIV are offered to investors in many countries. Although the identity of individual investors will change daily, the proportion of investors in the CIV that are treaty-entitled is likely to change relatively slowly. Accordingly, it would be a reasonable approach to require the CIV to collect from other intermediaries, on specified dates, information enabling the CIV to determine the proportion of investors that are treaty-entitled. This information could be required at the end of a calendar or fiscal

year or, if market conditions suggest that turnover in ownership is high, it could be required more frequently, although no more often than the end of each calendar quarter. The CIV could then make a claim on the basis of an average of those amounts over an agreed-upon time period. In adopting such procedures, care would have to be taken in choosing the measurement dates to ensure that the CIV would have enough time to update the information that it provides to other payers so that the correct amount is withheld at the beginning of each relevant period.

(Added on 22 July 2010; see HISTORY)

6.32 An alternative approach would provide that a CIV that is publicly traded in the Contracting State in which it is established will be entitled to treaty benefits without regard to the residence of its investors. This provision has been justified on the basis that a publicly-traded CIV cannot be used effectively for treaty shopping because the shareholders or unitholders of such a CIV cannot individually exercise control over it. Such a provision could read:

a) Notwithstanding the other provisions of this Convention, a collective investment vehicle which is established in a Contracting State and which receives income arising in the other Contracting State shall be treated for purposes of applying the Convention to such income as an individual who is a resident of the Contracting State in which it is established and as the beneficial owner of the income it receives (provided that, if an individual who is a resident of the first-mentioned State had received the income in the same circumstances, such individual would have been considered to be the beneficial owner thereof), if the principal class of shares or units in the collective investment vehicle is listed and regularly traded on a regulated stock exchange in that State.

b) For purposes of this paragraph, the term "collective investment vehicle" means, in the case of [State A], a [ ] and, in the case of [State B], a [ ], as well as any other investment fund, arrangement or entity established in either Contracting State which the competent authorities of the Contracting States agree to regard as a collective investment vehicle for purposes of this paragraph.

(Added on 22 July 2010; see HISTORY)

6.33 Each of the provisions in paragraphs 6.17, 6.21, 6.26 and 6.32 treats the CIV as the resident and the beneficial owner of the income it receives for the purposes of the application of the Convention to such income, which has the simplicity of providing for one reduced rate of withholding with respect to each type of income. These provisions should not be construed, however, as

restricting in any way the right of the State of source from taxing its own residents who are investors in the CIV. Clearly, these provisions are intended to deal with the source taxation of the CIV's income and not the residence taxation of its investors (this conclusion is analogous to the one put forward in paragraph 6.1 above as regards partnerships). States that wish to confirm this point in the text of the provisions are free to amend the provisions accordingly, which could be done by adding the following sentence: "This provision shall not be construed as restricting in any way a Contracting State's right to tax the residents of that State".

(Added on 22 July 2010; see HISTORY)

6.34 Also, each of these provisions is intended only to provide that the specific characteristics of the CIV will not cause it to be treated as other than the beneficial owner of the income it receives. Therefore, a CIV will be treated as the beneficial owner of all of the income it receives. The provision is not intended, however, to put a CIV in a different or better position than other investors with respect to aspects of the beneficial ownership requirement that are unrelated to the CIV's status as such. Accordingly, where an individual receiving an item of income in certain circumstances would not be considered as the beneficial owner of that income, a CIV receiving that income in the same circumstances could not be deemed to be the beneficial owner of the income. This result is confirmed by the parenthetical limiting the application of the provision to situations in which an individual in the same circumstances would have been treated as the beneficial owner of the income.

(Added on 22 July 2010; see HISTORY)

Application of the Convention to States, their subdivisions and their wholly-owned entities

6.35 Paragraph 1 of Article 4 provides that the Contracting States themselves, their political subdivisions and their local authorities are included in the definition of a "resident of a Contracting State" and are therefore entitled to the benefits of the Convention (paragraph 8.4 of the Commentary on Article 4 explains that the inclusion of these words in 1995 confirmed the prior general understanding of most member States).

(Added on 22 July 2010; see HISTORY)

6.36 Issues may arise, however, in the case of entities set up and wholly-owned by a State or one of its political subdivisions or local authorities. Some of these entities may derive substantial income from other countries and it may therefore be important to determine whether tax treaties apply to them (this would be the case, for instance, of sovereign wealth funds: see paragraph 8.5 of the Commentary on Article 4). In many cases, these entities

are totally exempt from tax and the question may arise as to whether they are entitled to the benefits of the tax treaties concluded by the State in which they are set up. In order to clarify the issue, some States modify the definition of "resident of a Contracting State" in paragraph 1 of Article 4 and include in that definition a "statutory body", an "agency or instrumentality" or a "legal person of public law" [*personne morale de droit public*] of a State, a political subdivision or local authority, which would therefore cover wholly-owned entities that are not considered to be a part of the State or its political subdivisions or local authorities.

(Added on 22 July 2010; see HISTORY)

6.37 In addition, many States include specific provisions in their bilateral conventions that grant an exemption to other States, and to some State-owned entities such as central banks, with respect to certain items of income such as interest (see paragraph 13.2 of the Commentary on Article 10 and paragraph 7.4 of the Commentary on Article 11). Treaty provisions that grant a tax exemption with respect to the income of pension funds (see paragraph 69 of the Commentary on Article 18) may similarly apply to pension funds that are wholly-owned by a State, depending on the wording of these provisions and the nature of the fund.

(Added on 22 July 2010; see HISTORY)

6.38 The application of the Convention to each Contracting State, its political subdivisions, and local authorities (and their statutory bodies, agencies or instrumentalities in the case of bilateral treaties that apply to such entities) should not be interpreted, however, as affecting in any way the possible application by each State of the customary international law principle of sovereign immunity. According to this principle, a sovereign State (including its agents, its property and activities) is, as a general rule, immune from the jurisdiction of the courts of another sovereign State. There is no international consensus, however, on the precise limits of the sovereign immunity principle. Most States, for example, would not recognise that the principle applies to business activities and many States do not recognise any application of this principle in tax matters. There are therefore considerable differences between States as regards the extent, if any, to which that principle applies to taxation. Even among States that would recognise its possible application in tax matters, some apply it only to the extent that it has been incorporated into domestic law and others apply it as customary international law but subject to important limitations. The Convention does not prejudge the issues of whether and to what extent the principle of sovereign immunity applies with respect to the persons covered under Article 1 and the taxes covered under Article 2 and each Contracting State is therefore free to apply its own interpretation of that principle as long as the

resulting taxation, if any, is in conformity with the provisions of its bilateral tax conventions.

(Added on 22 July 2010; see HISTORY)

6.39 States often take account of various factors when considering whether and to what extent tax exemptions should be granted, through specific treaty or domestic law provisions or through the application of the sovereign immunity doctrine, with respect to the income derived by other States, their political subdivisions, local authorities, or their statutory bodies, agencies or instrumentalities. These factors would include, for example, whether that type of income would be exempt on a reciprocal basis, whether the income is derived from activities of a governmental nature as opposed to activities of a commercial nature, whether the assets and income of the recipient entity are used for public purposes, whether there is any possibility that these could inure to the benefit of a non-governmental person and whether the income is derived from a portfolio or direct investment.

(Added on 22 July 2010; see HISTORY)

Improper use of the Convention

7. The principal purpose of double taxation conventions is to promote, by eliminating international double taxation, exchanges of goods and services, and the movement of capital and persons. It is also a purpose of tax conventions to prevent tax avoidance and evasion.

(Amended on 28 January 2003; see HISTORY)

7.1 Taxpayers may be tempted to abuse the tax laws of a State by exploiting the differences between various countries' laws. Such attempts may be countered by provisions or jurisprudential rules that are part of the domestic law of the State concerned. Such a State is then unlikely to agree to provisions of bilateral double taxation conventions that would have the effect of allowing abusive transactions that would otherwise be prevented by the provisions and rules of this kind contained in its domestic law. Also, it will not wish to apply its bilateral conventions in a way that would have that effect.

(Added on 28 January 2003; see HISTORY)

8. It is also important to note that the extension of double taxation conventions increases the risk of abuse by facilitating the use of artificial legal constructions aimed at securing the benefits of both the tax advantages available under certain domestic laws and the reliefs from tax provided for in double taxation conventions.

(Replaced on 28 January 2003; see HISTORY)

9. This would be the case, for example, if a person (whether or not a resident of a Contracting State), acts through a legal entity created in a State essentially to obtain treaty benefits that would not be available directly. Another case would be an individual who has in a Contracting State both his permanent home and all his economic interests, including a substantial shareholding in a company of that State, and who, essentially in order to sell the shares and escape taxation in that State on the capital gains from the alienation (by virtue of paragraph 5 of Article 13), transfers his permanent home to the other Contracting State, where such gains are subject to little or no tax.

(Amended on 28 January 2003; see HISTORY)

9.1 This raises two fundamental questions that are discussed in the following paragraphs:

— whether the benefits of tax conventions must be granted when transactions that constitute an abuse of the provisions of these conventions are entered into (see paragraphs 9.2 and following below); and

— whether specific provisions and jurisprudential rules of the domestic law of a Contracting State that are intended to prevent tax abuse conflict with tax conventions (see paragraphs 22 and following below).

(Added on 28 January 2003; see HISTORY)

9.2 For many States, the answer to the first question is based on their answer to the second question. These States take account of the fact that taxes are ultimately imposed through the provisions of domestic law, as restricted (and in some rare cases, broadened) by the provisions of tax conventions. Thus, any abuse of the provisions of a tax convention could also be characterised as an abuse of the provisions of domestic law under which tax will be levied. For these States, the issue then becomes whether the provisions of tax conventions may prevent the application of the anti-abuse provisions of domestic law, which is the second question above. As indicated in paragraph 22.1 below, the answer to that second question is that to the extent these anti-avoidance rules are part of the basic domestic rules set by domestic tax laws for determining which facts give rise to a tax liability, they are not addressed in tax treaties and are therefore not affected by them. Thus, as a general rule, there will be no conflict between such rules and the provisions of tax conventions.

(Added on 28 January 2003; see HISTORY)

9.3 Other States prefer to view some abuses as being abuses of the convention itself, as opposed to abuses of domestic law. These States, however, then consider that a proper construction of tax conventions allows

them to disregard abusive transactions, such as those entered into with the view to obtaining unintended benefits under the provisions of these conventions. This interpretation results from the object and purpose of tax conventions as well as the obligation to interpret them in good faith (see Article 31 of the Vienna Convention on the Law of Treaties).

(Added on 28 January 2003; see HISTORY)

9.4 Under both approaches, therefore, it is agreed that States do not have to grant the benefits of a double taxation convention where arrangements that constitute an abuse of the provisions of the convention have been entered into.

(Added on 28 January 2003; see HISTORY)

9.5 It is important to note, however, that it should not be lightly assumed that a taxpayer is entering into the type of abusive transactions referred to above. A guiding principle is that the benefits of a double taxation convention should not be available where a main purpose for entering into certain transactions or arrangements was to secure a more favourable tax position and obtaining that more favourable treatment in these circumstances would be contrary to the object and purpose of the relevant provisions.

(Added on 28 January 2003; see HISTORY)

9.6 The potential application of general anti-abuse provisions does not mean that there is no need for the inclusion, in tax conventions, of specific provisions aimed at preventing particular forms of tax avoidance. Where specific avoidance techniques have been identified or where the use of such techniques is especially problematic, it will often be useful to add to the Convention provisions that focus directly on the relevant avoidance strategy. Also, this will be necessary where a State which adopts the view described in paragraph 9.2 above believes that its domestic law lacks the anti-avoidance rules or principles necessary to properly address such strategy.

(Added on 28 January 2003; see HISTORY)

10. For instance, some forms of tax avoidance have already been expressly dealt with in the Convention, *e.g.* by the introduction of the concept of "beneficial owner" (in Articles 10, 11, and 12) and of special provisions such as paragraph 2 of Article 17 dealing with so-called artiste-companies. Such problems are also mentioned in the Commentaries on Article 10 (paragraphs 17 and 22), Article 11 (paragraph 12) and Article 12 (paragraph 7).

(Amended on 28 January 2003; see HISTORY)

10.1 Also, in some cases, claims to treaty benefits by subsidiary companies, in particular companies established in tax havens or benefiting from harmful preferential regimes, may be refused where careful consideration of the facts

and circumstances of a case shows that the place of effective management of a subsidiary does not lie in its alleged state of residence but, rather, lies in the state of residence of the parent company so as to make it a resident of that latter state for domestic law and treaty purposes (this will be relevant where the domestic law of a state uses the place of management of a legal person, or a similar criterion, to determine its residence).

(Added on 28 January 2003; see HISTORY)

10.2 Careful consideration of the facts and circumstances of a case may also show that a subsidiary was managed in the state of residence of its parent in such a way that the subsidiary had a permanent establishment (*e.g.* by having a place of management) in that state to which all or a substantial part of its profits were properly attributable.

(Added on 28 January 2003; see HISTORY)

11. A further example is provided by two particularly prevalent forms of improper use of the Convention which are discussed in two reports from the Committee on Fiscal Affairs entitled "Double Taxation Conventions and the Use of Base Companies" and "Double Taxation Conventions and the Use of Conduit Companies".[1] As indicated in these reports, the concern expressed in paragraph 9 above has proved to be valid as there has been a growing tendency toward the use of conduit companies to obtain treaty benefits not intended by the Contracting States in their bilateral negotiations. This has led an increasing number of member countries to implement treaty provisions (both general and specific) to counter abuse and to preserve anti-avoidance legislation in their domestic laws.

(Amended on 28 January 2003; see HISTORY)

12. The treaty provisions that have been designed to cover these and other forms of abuse take different forms. The following are examples derived from provisions that have been incorporated in bilateral conventions concluded by member countries. These provide models that treaty negotiators might consider when searching for a solution to specific cases. In referring to them there should be taken into account:

- — the fact that these provisions are not mutually exclusive and that various provisions may be needed in order to address different concerns;
- — the degree to which tax advantages may actually be obtained by a particular avoidance strategy;

1 These two reports are reproduced in Volume II at pages R(5)-1 and R(6)-1.

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

- — the legal context in both Contracting States and, in particular, the extent to which domestic law already provides an appropriate response to this avoidance strategy, and
- — the extent to which *bona fide* economic activities might be unintentionally disqualified by such provisions.

(Amended on 28 January 2003; see HISTORY)

Conduit company cases

13. Many countries have attempted to deal with the issue of conduit companies and various approaches have been designed for that purpose. One solution would be to disallow treaty benefits to a company not owned, directly or indirectly, by residents of the State of which the company is a resident. For example, such a "look-through" provision might have the following wording:

> A company that is a resident of a Contracting State shall not be entitled to relief from taxation under this Convention with respect to any item of income, gains or profits if it is owned or controlled directly or through one or more companies, wherever resident, by persons who are not residents of a Contracting State.

Contracting States wishing to adopt such a provision may also want, in their bilateral negotiations, to determine the criteria according to which a company would be considered as owned or controlled by non-residents.

(Amended on 28 January 2003; see HISTORY)

14. The "look-through approach" underlying the above provision seems an adequate basis for treaties with countries that have no or very low taxation and where little substantive business activities would normally be carried on. Even in these cases it might be necessary to alter the provision or to substitute for it another one to safeguard *bona fide* business activities.

(Amended on 28 January 2003; see HISTORY)

15. General subject-to-tax provisions provide that treaty benefits in the State of source are granted only if the income in question is subject to tax in the State of residence. This corresponds basically to the aim of tax treaties, namely to avoid double taxation. For a number of reasons, however, the Model Convention does not recommend such a general provision. Whilst this seems adequate with respect to a normal international relationship, a subject-to-tax approach might well be adopted in a typical conduit situation. A safeguarding provision of this kind could have the following wording:

> Where income arising in a Contracting State is received by a company resident of the other Contracting State and one or more persons not resident in that other Contracting State

> *a)* have directly or indirectly or through one or more companies, wherever resident, a substantial interest in such company, in the form of a participation or otherwise, or
>
> *b)* exercise directly or indirectly, alone or together, the management or control of such company,
>
> any provision of this Convention conferring an exemption from, or a reduction of, tax shall apply only to income that is subject to tax in the last-mentioned State under the ordinary rules of its tax law.

The concept of "substantial interest" may be further specified when drafting a bilateral convention. Contracting States may express it, for instance, as a percentage of the capital or of the voting rights of the company.

(Renumbered on 28 January 2003; see HISTORY)

16. The subject-to-tax approach seems to have certain merits. It may be used in the case of States with a well-developed economic structure and a complex tax law. It will, however, be necessary to supplement this provision by inserting *bona fide* provisions in the treaty to provide for the necessary flexibility (see paragraph 19 below); moreover, such an approach does not offer adequate protection against advanced tax avoidance schemes such as "stepping-stone strategies".

(Renumbered on 28 January 2003; see HISTORY)

17. The approaches referred to above are in many ways unsatisfactory. They refer to the changing and complex tax laws of the Contracting States and not to the arrangements giving rise to the improper use of conventions. It has been suggested that the conduit problem be dealt with in a more straightforward way by inserting a provision that would single out cases of improper use with reference to the conduit arrangements themselves (the channel approach). Such a provision might have the following wording:

> Where income arising in a Contracting State is received by a company that is a resident of the other Contracting State and one or more persons who are not residents of that other Contracting State
>
> *a)* have directly or indirectly or through one or more companies, wherever resident, a substantial interest in such company, in the form of a participation or otherwise, or
>
> *b)* exercise directly or indirectly, alone or together, the management or control of such company
>
> any provision of this Convention conferring an exemption from, or a reduction of, tax shall not apply if more than 50 per cent of such income is used to satisfy claims by such persons (including interest, royalties, development, advertising, initial and travel expenses, and depreciation of

any kind of business assets including those on immaterial goods and processes).

(Renumbered on 28 January 2003; see HISTORY)

18. A provision of this kind appears to be the only effective way of combatting “stepping-stone” devices. It is found in bilateral treaties entered into by Switzerland and the United States and its principle also seems to underly the Swiss provisions against the improper use of tax treaties by certain types of Swiss companies. States that consider including a clause of this kind in their convention should bear in mind that it may cover normal business transactions and would therefore have to be supplemented by a *bona fide* clause.

(Renumbered on 28 January 2003; see HISTORY)

19. The solutions described above are of a general nature and they need to be accompanied by specific provisions to ensure that treaty benefits will be granted in *bona fide* cases. Such provisions could have the following wording:

a) General bona fide provision

“The foregoing provisions shall not apply where the company establishes that the principal purpose of the company, the conduct of its business and the acquisition or maintenance by it of the shareholding or other property from which the income in question is derived, are motivated by sound business reasons and do not have as primary purpose the obtaining of any benefits under this Convention.”

b) Activity provision

“The foregoing provisions shall not apply where the company is engaged in substantive business operations in the Contracting State of which it is a resident and the relief from taxation claimed from the other Contracting State is with respect to income that is connected with such operations.”

c) Amount of tax provision

“The foregoing provisions shall not apply where the reduction of tax claimed is not greater than the tax actually imposed by the Contracting State of which the company is a resident.”

d) Stock exchange provision

“The foregoing provisions shall not apply to a company that is a resident of a Contracting State if the principal class of its shares is registered on an approved stock exchange in a Contracting State or if such company is wholly owned — directly or through one or more companies each of which is a resident of the first-mentioned State —

by a company which is a resident of the first-mentioned State and the principal class of whose shares is so registered."

e) Alternative relief provision

In cases where an anti-abuse clause refers to non-residents of a Contracting State, it could be provided that the term "shall not be deemed to include residents of third States that have income tax conventions in force with the Contracting State from which relief from taxation is claimed and such conventions provide relief from taxation not less than the relief from taxation claimed under this Convention."

These provisions illustrate possible approaches. The specific wording of the provisions to be included in a particular treaty depends on the general approach taken in that treaty and should be determined on a bilateral basis. Also, where the competent authorities of the Contracting States have the power to apply discretionary provisions, it may be considered appropriate to include an additional rule that would give the competent authority of the source country the discretion to allow the benefits of the Convention to a resident of the other State even if the resident fails to pass any of the tests described above.

(Renumbered on 28 January 2003; see HISTORY)

20. Whilst the preceding paragraphs identify different approaches to deal with conduit situations, each of them deals with a particular aspect of the problem commonly referred to as "treaty shopping". States wishing to address the issue in a comprehensive way may want to consider the following example of detailed limitation-of-benefits provisions aimed at preventing persons who are not resident of either Contracting States from accessing the benefits of a Convention through the use of an entity that would otherwise qualify as a resident of one of these States, keeping in mind that adaptations may be necessary and that many States prefer other approaches to deal with treaty shopping:

1. Except as otherwise provided in this Article, a resident of a Contracting State who derives income from the other Contracting State shall be entitled to all the benefits of this Convention otherwise accorded to residents of a Contracting State only if such resident is a "qualified person" as defined in paragraph 2 and meets the other conditions of this Convention for the obtaining of such benefits.

2. A resident of a Contracting State is a qualified person for a fiscal year only if such resident is either:

a) an individual;

b) a qualified governmental entity;

c) a company, if

(i) the principal class of its shares is listed on a recognised stock exchange specified in subparagraph *a)* or *b)* of paragraph 6 and is regularly traded on one or more recognised stock exchanges, or

(ii) at least 50 per cent of the aggregate vote and value of the shares in the company is owned directly or indirectly by five or fewer companies entitled to benefits under subdivision *(i)* of this subparagraph, provided that, in the case of indirect ownership, each intermediate owner is a resident of either Contracting State;

d) a charity or other tax-exempt entity, provided that, in the case of a pension trust or any other organization that is established exclusively to provide pension or other similar benefits, more than 50 per cent of the person's beneficiaries, members or participants are individuals resident in either Contracting State; or

e) a person other than an individual, if:

(i) on at least half the days of the fiscal year persons that are qualified persons by reason of subparagraph *a)*, *b)* or *d)* or subdivision *c) (i)* of this paragraph own, directly or indirectly, at least 50 per cent of the aggregate vote and value of the shares or other beneficial interests in the person, and

(ii) less than 50 per cent of the person's gross income for the taxable year is paid or accrued, directly or indirectly, to persons who are not residents of either Contracting State in the form of payments that are deductible for purposes of the taxes covered by this Convention in the person's State of residence (but not including arm's length payments in the ordinary course of business for services or tangible property and payments in respect of financial obligations to a bank, provided that where such a bank is not a resident of a Contracting State such payment is attributable to a permanent establishment of that bank located in one of the Contracting States).

3. *a)* A resident of a Contracting State will be entitled to benefits of the Convention with respect to an item of income, derived from the other State, regardless of whether the resident is a qualified person, if the resident is actively carrying on business in the first-mentioned State (other than the business of making or managing investments for the resident's own account, unless these activities are banking, insurance or securities activities carried on by a bank, insurance company or registered securities dealer), the income derived from the other Contracting State is derived in connection with, or is incidental to, that business and that resident satisfies the other conditions of this Convention for the obtaining of such benefits.

b) If the resident or any of its associated enterprises carries on a business activity in the other Contracting State which gives rise to an item of income, subparagraph *a)* shall apply to such item only if the business activity in the first-mentioned State is substantial in relation to business carried on in the other State. Whether a business activity is substantial for purposes of this paragraph will be determined based on all the facts and circumstances.

c) In determining whether a person is actively carrying on business in a Contracting State under subparagraph *a)*, activities conducted by a partnership in which that person is a partner and activities conducted by persons connected to such person shall be deemed to be conducted by such person. A person shall be connected to another if one possesses at least 50 per cent of the beneficial interest in the other (or, in the case of a company, at least 50 per cent of the aggregate vote and value of the company's shares) or another person possesses, directly or indirectly, at least 50 per cent of the beneficial interest (or, in the case of a company, at least 50 per cent of the aggregate vote and value of the company's shares) in each person. In any case, a person shall be considered to be connected to another if, based on all the facts and circumstances, one has control of the other or both are under the control of the same person or persons.

4. Notwithstanding the preceding provisions of this Article, if a company that is a resident of a Contracting State, or a company that controls such a company, has outstanding a class of shares

a) which is subject to terms or other arrangements which entitle its holders to a portion of the income of the company derived from the other Contracting State that is larger than the portion such holders would receive absent such terms or arrangements ("the disproportionate part of the income"); and

b) 50 per cent or more of the voting power and value of which is owned by persons who are not qualified persons

the benefits of this Convention shall not apply to the disproportionate part of the income.

5. A resident of a Contracting State that is neither a qualified person pursuant to the provisions of paragraph 2 or entitled to benefits under paragraph 3 or 4 shall, nevertheless, be granted benefits of the Convention if the competent authority of that other Contracting State determines that the establishment, acquisition or maintenance of such person and the conduct of its operations did not have as one of its principal purposes the obtaining of benefits under the Convention.

6. For the purposes of this Article the term "recognised stock exchange" means:

a) in State A ……..;

b) in State B ……..; and

c) any other stock exchange which the competent authorities agree to recognise for the purposes of this Article.

(Replaced on 28 January 2003; see HISTORY)

Provisions which are aimed at entities benefiting from preferential tax regimes

21. Specific types of companies enjoying tax privileges in their State of residence facilitate conduit arrangements and raise the issue of harmful tax practices. Where tax-exempt (or nearly tax-exempt) companies may be distinguished by special legal characteristics, the improper use of tax treaties may be avoided by denying the tax treaty benefits to these companies (the exclusion approach). As such privileges are granted mostly to specific types of companies as defined in the commercial law or in the tax law of a country, the most radical solution would be to exclude such companies from the scope of the treaty. Another solution would be to insert a safeguarding clause which would apply to the income received or paid by such companies and which could be drafted along the following lines:

> No provision of the Convention conferring an exemption from, or reduction of, tax shall apply to income received or paid by a company as defined under section … of the … Act, or under any similar provision enacted by … after the signature of the Convention.

The scope of this provision could be limited by referring only to specific types of income, such as dividends, interest, capital gains, or directors' fees. Under such provisions companies of the type concerned would remain entitled to the protection offered under Article 24 (non-discrimination) and to the benefits of Article 25 (mutual agreement procedure) and they would be subject to the provisions of Article 26 (exchange of information).

(Added on 28 January 2003; see HISTORY)

21.1 Exclusion provisions are clear and their application is simple, even though they may require administrative assistance in some instances. They are an important instrument by which a State that has created special privileges in its tax law may prevent those privileges from being used in connection with the improper use of tax treaties concluded by that State.

(Renumbered on 28 January 2003; see HISTORY)

21.2 Where it is not possible or appropriate to identify the companies enjoying tax privileges by reference to their special legal characteristics, a more general formulation will be necessary. The following provision aims at denying the benefits of the Convention to entities which would otherwise qualify as residents of a Contracting State but which enjoy, in that State, a preferential tax regime restricted to foreign-held entities (*i.e.* not available to entities that belong to residents of that State):

> Any company, trust or partnership that is a resident of a Contracting State and is beneficially owned or controlled directly or indirectly by one or more persons who are not residents of that State shall not be entitled to the benefits of this Convention if the amount of the tax imposed on the income or capital of the company, trust or partnership by that State (after taking into account any reduction or offset of the amount of tax in any manner, including a refund, reimbursement, contribution, credit or allowance to the company, trust or partnership, or to any other person) is substantially lower than the amount that would be imposed by that State if all of the shares of the capital stock of the company or all of the interests in the trust or partnership, as the case may be, were beneficially owned by one or more residents of that State.

(Added on 28 January 2003; see HISTORY)

Provisions which are aimed at particular types of income

21.3 The following provision aims at denying the benefits of the Convention with respect to income that is subject to low or no tax under a preferential tax regime:

> 1. The benefits of this Convention shall not apply to income which may, in accordance with the other provisions of the Convention, be taxed in a Contracting State and which is derived from activities the performance of which do not require substantial presence in that State, including:
>
> *a)* such activities involving banking, shipping, financing, insurance or electronic commerce activities; or
>
> *b)* activities involving headquarter or coordination centre or similar arrangements providing company or group administration, financing or other support; or
>
> *c)* activities which give rise to passive income, such as dividends, interest and royalties
>
> where, under the laws or administrative practices of that State, such income is preferentially taxed and, in relation thereto, information is accorded confidential treatment that prevents the effective exchange of information.

2. For the purposes of paragraph 1, income is preferentially taxed in a Contracting State if, other than by reason of the preceding Articles of this Agreement, an item of income:

a) is exempt from tax; or

b) is taxable in the hands of a taxpayer but that is subject to a rate of tax that is lower than the rate applicable to an equivalent item that is taxable in the hands of similar taxpayers who are residents of that State; or

c) benefits from a credit, rebate or other concession or benefit that is provided directly or indirectly in relation to that item of income, other than a credit for foreign tax paid.

(Added on 28 January 2003; see HISTORY)

Anti-abuse rules dealing with source taxation of specific types of income

21.4 The following provision has the effect of denying the benefits of specific Articles of the convention that restrict source taxation where transactions have been entered into for the main purpose of obtaining these benefits. The Articles concerned are 10, 11, 12 and 21; the provision should be slightly modified as indicated below to deal with the specific type of income covered by each of these Articles:

> The provisions of this Article shall not apply if it was the main purpose or one of the main purposes of any person concerned with the creation or assignment of the [Article 10: "shares or other rights"; Article 11: "debt-claim"; Articles 12 and 21: "rights"] in respect of which the [Article 10: "dividend"; Article 11: "interest"; Articles 12 "royalties" and Article 21: "income"] is paid to take advantage of this Article by means of that creation or assignment.

(Added on 28 January 2003; see HISTORY)

Provisions which are aimed at preferential regimes introduced after the signature of the convention

21.5 States may wish to prevent abuses of their conventions involving provisions introduced by a Contracting State after the signature of the Convention. The following provision aims to protect a Contracting State from having to give treaty benefits with respect to income benefiting from a special regime for certain offshore income introduced after the signature of the treaty:

> The benefits of Articles 6 to 22 of this Convention shall not accrue to persons entitled to any special tax benefit under:

a) a law of either one of the States which has been identified in an exchange of notes between the States; or

b) any substantially similar law subsequently enacted.

(Added on 28 January 2003; see HISTORY)

22. Other forms of abuse of tax treaties (*e.g.* the use of a base company) and possible ways to deal with them, including "substance-over-form", "economic substance" and general anti-abuse rules have also been analysed, particularly as concerns the question of whether these rules conflict with tax treaties, which is the second question mentioned in paragraph 9.1 above.

(Amended on 28 January 2003; see HISTORY)

22.1 Such rules are part of the basic domestic rules set by domestic tax laws for determining which facts give rise to a tax liability; these rules are not addressed in tax treaties and are therefore not affected by them. Thus, as a general rule and having regard to paragraph 9.5, there will be no conflict. For example, to the extent that the application of the rules referred to in paragraph 22 results in a recharacterisation of income or in a redetermination of the taxpayer who is considered to derive such income, the provisions of the Convention will be applied taking into account these changes.

(Added on 28 January 2003; see HISTORY)

22.2 Whilst these rules do not conflict with tax conventions, there is agreement that member countries should carefully observe the specific obligations enshrined in tax treaties to relieve double taxation as long as there is no clear evidence that the treaties are being abused.

(Added on 28 January 2003; see HISTORY)

23. The use of base companies may also be addressed through controlled foreign companies provisions. A significant number of member and non-member countries have now adopted such legislation. Whilst the design of this type of legislation varies considerably among countries, a common feature of these rules, which are now internationally recognised as a legitimate instrument to protect the domestic tax base, is that they result in a Contracting State taxing its residents on income attributable to their participation in certain foreign entities. It has sometimes been argued, based on a certain interpretation of provisions of the Convention such as paragraph 1 of Article 7 and paragraph 5 of Article 10, that this common feature of controlled foreign companies legislation conflicted with these provisions. For the reasons explained in paragraphs 14 of the Commentary on Article 7 and 37 of the Commentary on Article 10, that interpretation does not accord with the text of the provisions. It also does not hold when these provisions are read in their context. Thus, whilst some countries have felt it

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

useful to expressly clarify, in their conventions, that controlled foreign companies legislation did not conflict with the Convention, such clarification is not necessary. It is recognised that controlled foreign companies legislation structured in this way is not contrary to the provisions of the Convention.

(Amended on 22 July 2010; see HISTORY)

24. *(Deleted on 28 January 2003; see HISTORY)*

25. *(Renumbered on 28 January 2003; see HISTORY)*

26. States that adopt controlled foreign companies provisions or the anti-abuse rules referred to above in their domestic tax laws seek to maintain the equity and neutrality of these laws in an international environment characterised by very different tax burdens, but such measures should be used only for this purpose. As a general rule, these measures should not be applied where the relevant income has been subjected to taxation that is comparable to that in the country of residence of the taxpayer.

(Replaced on 28 January 2003; see HISTORY)

Remittance based taxation

26.1 Under the domestic law of some States, persons who qualify as residents but who do not have what is considered to be a permanent link with the State (sometimes referred to as domicile) are only taxed on income derived from sources outside the State to the extent that this income is effectively repatriated, or remitted, thereto. Such persons are not, therefore, subject to potential double taxation to the extent that foreign income is not remitted to their State of residence and it may be considered inappropriate to give them the benefit of the provisions of the Convention on such income. Contracting States which agree to restrict the application of the provisions of the Convention to income that is effectively taxed in the hands of these persons may do so by adding the following provision to the Convention:

> Where under any provision of this Convention income arising in a Contracting State is relieved in whole or in part from tax in that State and under the law in force in the other Contracting State a person, in respect of the said income, is subject to tax by reference to the amount thereof which is remitted to or received in that other State and not by reference to the full amount thereof, then any relief provided by the provisions of this Convention shall apply only to so much of the income as is taxed in the other Contracting State.

In some States, the application of that provision could create administrative difficulties if a substantial amount of time elapsed between the time the income arose in a Contracting State and the time it were taxed by the other

Contracting State in the hands of a resident of that other State. States concerned by these difficulties could subject the rule in the last part of the above provision, *i.e.* that the income in question will be entitled to benefits in the first-mentioned State only when taxed in the other State, to the condition that the income must be so taxed in that other State within a specified period of time from the time the income arises in the first-mentioned State.

(Added on 28 January 2003; see HISTORY)

Limitations of source taxation: procedural aspects

26.2 A number of Articles of the Convention limit the right of a State to tax income derived from its territory. As noted in paragraph 19 of the Commentary on Article 10 as concerns the taxation of dividends, the Convention does not settle procedural questions and each State is free to use the procedure provided in its domestic law in order to apply the limits provided by the Convention. A State can therefore automatically limit the tax that it levies in accordance with the relevant provisions of the Convention, subject to possible prior verification of treaty entitlement, or it can impose the tax provided for under its domestic law and subsequently refund the part of that tax that exceeds the amount that it can levy under the provisions of the Convention. As a general rule, in order to ensure expeditious implementation of taxpayers' benefits under a treaty, the first approach is the highly preferable method. If a refund system is needed, it should be based on observable difficulties in identifying entitlement to treaty benefits. Also, where the second approach is adopted, it is extremely important that the refund be made expeditiously, especially if no interest is paid on the amount of the refund, as any undue delay in making that refund is a direct cost to the taxpayer.

(Added on 28 January 2003; see HISTORY)

Observations on the Commentary

27. *Chile* considers that some of the solutions put forward in the report "The Application of the OECD Model Tax Convention to Partnerships" and incorporated in the Commentary can only be applied if expressly incorporated in a tax convention.

(Added on 22 July 2010; see HISTORY)

27.1 The *Netherlands* will adhere to the conclusions on the application of the Convention to partnerships incorporated in the Commentary on Article 1 and in the Commentaries on the other relevant provisions of the Convention only, and to the extent to which, it is explicitly so confirmed in a specific tax treaty,

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

as a result of mutual agreement between competent authorities as meant in Article 25 of the Convention or as unilateral policy.

(Added on 29 April 2000; see HISTORY)

27.2 *France* has expressed a number of reservations on the report on "I. Introduction". In particular, France does not agree with the interpretation put forward in paragraphs 5 and 6 above according to which if a partnership is denied the benefits of a tax convention, its members are always entitled to the benefits of the tax conventions entered into by their State of residence. France believes that this result is only possible, when France is the State of source, if its internal law authorises that interpretation or if provisions to that effect are included in the convention entered into with the State of residence of the partners.

(Amended on 17 July 2008; see HISTORY)

27.3 *Portugal*, where all partnerships are taxed as such, has expressed a number of reservations on the report on "I. Introduction" and considers that the solutions put forward in that report should be incorporated in special provisions only applicable when included in tax conventions. This is the case, for example, of the treatment of the situation of partners of partnerships — a concept which is considerably fluid given the differences between States — that are fiscally transparent, including the situation where a third State is inserted between the State of source and the State of residence of the partners. The administrative difficulties resulting from some of the solutions put forward should also be noted, as indicated in the report itself in certain cases.

(Added on 29 April 2000; see HISTORY)

27.4 *Belgium* cannot share the views expressed in paragraph 23 of the Commentary. Belgium considers that the application of controlled foreign companies legislation is contrary to the provisions of paragraph 7 of Article 5, paragraph 1 of Article 7 and paragraph 5 of Article 10 of the Convention. This is especially the case where a Contracting State taxes one of its residents on income derived by a foreign entity by using a fiction attributing to that resident, in proportion to his participation in the capital of the foreign entity, the income derived by that entity. By doing so, that State increases the tax base of its resident by including in it income which has not been derived by that resident but by a foreign entity which is not taxable in that State in accordance with the Convention. That Contracting State thus disregards the legal personality of the foreign entity and therefore acts contrary to the Convention (see also paragraph 79 of the Commentary on Article 7 and paragraph 68.1 of the Commentary on Article 10).

(Amended on 22 July 2010; see HISTORY)

27.5 Concerning potential conflicts between anti-abuse provisions (including controlled foreign company — CFC — provisions) in domestic law and the provisions of tax treaties, *Ireland* considers that it is not possible to have a simple general conclusion that no conflict will exist or that any conflict must be resolved in favour of the domestic law. This will depend on the nature of the domestic law provision and also on the legal and constitutional relationship in individual member countries between domestic law and international agreements and law. Also, Ireland does not agree with the deletion of the language in paragraph 26 (as it read until 2002), which stated: "It would be contrary to the general principles underlying the Model Convention and to the spirit of tax treaties in general if counteracting measures were to be extended to activities such as production, normal rendering of services or trading of companies engaged in real industrial or commercial activity, when they are clearly related to the economic environment of the country where they are resident in a situation where these activities are carried out in such a way that no tax avoidance could be suspected".

(Added on 28 January 2003; see HISTORY)

27.6 *Luxembourg* does not share the interpretation in paragraphs 9.2, 22.1 and 23 which provide that there is generally no conflict between anti-abuse provisions of the domestic law of a Contracting State and the provisions of its tax conventions. Absent an express provision in the Convention, Luxembourg therefore believes that a State can only apply its domestic anti-abuse provisions in specific cases after recourse to the mutual agreement procedure.

(Added on 28 January 2003; see HISTORY)

27.7 The *Netherlands* does not adhere to the statements in the Commentaries that as a general rule domestic anti-avoidance rules and controlled foreign companies provisions do not conflict with the provisions of tax conventions. The compatibility of such rules and provisions with tax treaties is, among other things, dependent on the nature and wording of the specific provision, the wording and purpose of the relevant treaty provision and the relationship between domestic and international law in a country. Since tax conventions are not meant to facilitate the improper use thereof, the application of national rules and provisions may be justified in specific cases of abuse or clearly unintended use. In such situations the application of domestic measures has to respect the principle of proportionality and should not go beyond what is necessary to prevent the abuse or the clearly unintended use.

(Added on 28 January 2003; see HISTORY)

27.8 *(Deleted on 22 July 2010; see HISTORY)*

27.9 *Switzerland* does not share the view expressed in paragraph 7 according to which the purpose of double taxation conventions is to prevent tax avoidance and evasion. Also, this view seems to contradict the footnote to the Title of the Model Tax Convention. With respect to paragraph 22.1, Switzerland believes that domestic tax rules on abuse of tax conventions must conform to the general provisions of tax conventions, especially where the convention itself includes provisions intended to prevent its abuse. With respect to paragraph 23, Switzerland considers that controlled foreign corporation legislation may, depending on the relevant concept, be contrary to the spirit of Article 7.

(Added on 28 January 2003; see HISTORY)

27.10 *Mexico* does not agree with the interpretation put forward in paragraphs 5 and 6 above according to which if a partnership is denied the benefits of a tax convention, its members are entitled to the benefits of the tax conventions entered into by their State of residence. Mexico believes that this result is only possible, to a certain extent, if provisions to that effect are included in the convention entered into with the State where the partnership is situated.

(Added on 17 July 2008; see HISTORY)

Reservation on the Article

28. The *United States* reserves the right, with certain exceptions, to tax its citizens and residents, including certain former citizens and long-term residents, without regard to the Convention.

(Amended on 29 April 2000; see HISTORY)

29. *(Deleted on 31 March 1994; see HISTORY)*

HISTORY

Paragraph 1: Amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. In the 1977 Model Convention and until 21 September 1995, paragraph 1 read as follows:

> "1. Whereas the earliest conventions in general were applicable to "citizens" of the Contracting States, more recent conventions usually apply to "residents" of one or both of the Contracting States irrespective of nationality. Some conventions are of even wider scope inasmuch they apply more generally to "taxpayers" of the Contracting States; they are, therefore, also applicable to persons, who, although not residing in either State, are nevertheless liable to tax on part of their income or capital in each of them. The Convention is intended to be applied between OECD Member countries and it has been deemed preferable for practical reasons to provide that the Convention is to apply to persons who are residents of one or both of the Contracting States. The term "resident" is defined in Article 4."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

"1. Whereas older Conventions in general were applicable to "citizens" of the Contracting States, recent Conventions usually apply to "residents" of one or both of the Contracting States, without distinction of nationality. Some Conventions are of even wider scope inasmuch as they apply more generally to "taxpayers" of the Contracting States; they are, therefore, also applicable to persons, who, although not residing in either State, are nevertheless liable to tax on part of their income or capital in each of them. The Convention is intended to be applied between Member countries of the O.E.C.D. and it has been deemed preferable for practical reasons to provide that the Convention is to apply to persons who are residents of one or both of the Contracting States. It is recalled that the meaning of the term "resident" is defined in Article 4 concerning fiscal domicile."

Paragraph 2: Replaced on 29 April 2000 when the second sentence of paragraph 2 of the 1977 Model was incorporated into an amended paragraph 3 and a new paragraph 2 was added by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "I. Introduction" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999). In the 1977 Model Convention and until 29 April 2000, paragraph 2 read as follows:

"2. The domestic laws of the various OECD Member countries differ in the treatment of partnerships. The main issue of such differences is founded on the fact that some countries treat partnerships as taxable units (sometimes even as companies) whereas other countries disregard the partnership and tax only the individual partners on their shares of the partnership income."

Paragraph 2 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 3: Replaced on 29 April 2000 when part of the previous paragraph 3 was incorporated in paragraph 5 and a new paragraph 3 was added by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "I. Introduction" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999). After 21 September 1995 and until 29 April 2000, paragraph 3 read as follows:

"3. These differences in views have many effects on the application of the Convention in the case of partnerships, especially where one or more partners are not residents of the State in which the partnership was created or organised. First, the question arises whether a partnership as such may invoke the provisions of the Convention. Where a partnership is treated as a company or taxed in the same way, it may reasonably be argued that the partnership is a resident of the Contracting State taxing the partnership on the grounds mentioned in paragraph 1 of Article 4 and therefore, falling under the scope of the Convention, is entitled to the benefits of the Convention. In the other instances mentioned in paragraph 2 above, the application of the Convention to the partnership as such might be refused, at least if no special rule covering partnerships is provided for in the Convention."

Paragraph 3 was amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. In the 1977 Model Convention and until 21 September 1995, paragraph 3 read as follows:

"3. These differences in views have many effects on the application of the Convention in the case of partnerships, especially where one or more partners are not residents of the State in which the partnership was created or organised. First the question arises whether a partnership as such may invoke the provisions of the Convention. Where a partnership is treated as a company or taxed in the same way, it may reasonably be argued that the partnership is a resident of the Contracting State taxing the partnership on the grounds mentioned in paragraph 1 of Article 4 and therefore, falling under the scope of the Convention, is entitled to the benefits of the Convention. In the other instances mentioned in paragraph 2 above, the application of the Convention to the partnership as such might be refused, at least if no special rule is provided for in the Convention covering partnerships."

Paragraph 3 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 4: Replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "I. Introduction" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999). In the 1977 Model Convention and until it was deleted on 29 April 2000, paragraph 4 read as follows:

"4. Moreover, different rules of the Convention may be applied in the Contracting States to income derived by a partner from the partnership, depending on the approach of such States. In States where partnerships are treated as companies, distributions of profits to the partners may be considered to be dividends (paragraph 3 of Article 10), whilst for other States all profits of a partnership, whether distributed or not, are considered as business profits of the partners (Article 7). In many States, business profits of partnerships include, for tax purposes, all or some special remuneration paid by a partnership to its partners (such as rents, interest, royalties, remuneration for services), whilst in other States such payments are not dealt with as business profits (Article 7) but under other headings (in the above-mentioned examples: Articles 6, 11, 12, 14 and 15, respectively)."

Paragraph 4 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 5: Amended on 17 July 2008, by replacing the cross-reference to "paragraph 8.4 of the Commentary on Article 4" by "paragraph 8.7 of the Commentary on Article 4", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 5 read as follows:

"5. Where a partnership is treated as a company or taxed in the same way, it is a resident of the Contracting State that taxes the partnership on the grounds mentioned in paragraph 1 of Article 4 and, therefore, it is entitled to the benefits of the Convention. Where, however, a partnership is treated as fiscally transparent in a State, the partnership is not "liable to tax" in that State within the meaning of paragraph 1 of Article 4, and so cannot be a resident thereof for purposes of the Convention. In such a case, the application of the Convention to the partnership as such would be refused, unless a special rule covering partnerships were provided for in the Convention. Where the application of the Convention is so refused, the partners should be entitled, with respect to their share of the income of the partnership, to the benefits provided by the Conventions entered into by the States of which they are residents to the extent that the partnership's income is allocated

> to them for the purposes of taxation in their State of residence (see paragraph 8.4 of the Commentary on Article 4)."

Paragraph 5 was replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "I. Introduction" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999). The new paragraph 5 incorporated, with amendments, the second sentence of paragraph 3 of the 1977 Model Convention (see history of paragraph 3). In the 1977 Model Convention and until it was deleted on 29 April 2000, paragraph 5 read as follows:

> "5. Finally the capital invested in a partnership or the alienation of a participation in a partnership may be treated, depending on the approach, under paragraph 2 of Articles 22 and 13 (permanent establishment) or paragraph 4 of Articles 22 and 13 (other movable property)."

Paragraph 5 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 6: Replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "I. Introduction" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999). After 23 July 1992 and until it was deleted on 29 April 2000, paragraph 6 read as follows:

> "6. The concurrent application of different Articles of the Convention in the two Contracting States (or even the non-application of the Convention in one of them) may result not only in double taxation, but also in non-taxation. However the practical application of double taxation conventions, whether or not based on the Model Convention, and discussions in the Committee on Fiscal Affairs when the 1977 Model Convention was being drafted have shown that the opinions of the OECD Member countries differ too much and that it is extremely difficult to find a uniform solution that would be acceptable to all or even to the great majority of Member countries. The Convention does not, therefore, contain any special provisions relating to partnerships. Contracting States are however left free to examine the problems of partnerships in their bilateral negotiations and to agree upon such special provisions as they may find necessary and appropriate."

Paragraph 6 was amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 6 read as follows:

> "6. The concurrent application of different Articles of the Convention in the two Contracting States (or even the non-application of the Convention in one of them) may not only result in double taxation, but also in non-taxation. However the practical application of double taxation conventions, whether or not based on the 1963 Draft Convention, and the discussions on the revision of the 1963 Draft Convention have shown that the opinions of the OECD Member countries differ too much and that it is extremely difficult to find a uniform solution which would be acceptable to all or even to the great majority of Member countries. The Convention does not, therefore, contain any special provisions relating to partnerships. Contracting States are however left free to examine the problems of partnerships in their bilateral negotiations and to agree upon such special provisions as they may find necessary and appropriate."

Paragraph 6 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Introduction" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 6.7: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "I. Introduction" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 6.8: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.9: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.10: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.11: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.12: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.13: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.14: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.15: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.16: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.17: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.18: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.19: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.20: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.21: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.22: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.23: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.24: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.25: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.26: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.27: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.28: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.29: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.30: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.31: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.32: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.33: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.34: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010, on the basis of another report entitled "The Granting of Treaty Benefits with Respect to the Income of Collective Investment Vehicles" (adopted by the OECD Committee on Fiscal Affairs on 23 April 2010).

Paragraph 6.35: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 6.36: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 6.37: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 6.38: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 6.39: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 7: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 7 read as follows:

> "7. The purpose of double taxation conventions is to promote, by eliminating international double taxation, exchanges of goods and services, and the movement of capital and persons; they should not, however, help tax avoidance or evasion. True, taxpayers have the possibility, irrespective of double taxation conventions, to exploit differences in tax levels between States and the tax advantages provided by various countries' taxation laws, but it is for the States concerned to adopt provisions in their domestic laws to counter such manoeuvres. Such States will then wish, in their bilateral double taxation conventions, to preserve the application of provisions of this kind contained in their domestic laws."

Paragraph 7 was previously amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. In the 1977 Model Convention and until 21 September 1995, paragraph 7 read as follows:

> "7. The purpose of double taxation conventions is to promote, by eliminating international double taxation, exchanges of goods and services, and the movement of capital and persons; they should not, however, help tax avoidance or evasion. True, taxpayers have the possibility, double taxation conventions being left aside, to exploit differences in tax levels between States and the tax advantages provided by various countries' taxation laws, but it is for the States concerned to adopt provisions in their domestic laws to counter such manoeuvres. Such States will then wish, in their bilateral double taxation conventions, to preserve the application of provisions of this kind contained in their domestic laws."

Paragraph 7 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 7.1: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 8: Replaced on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until it was deleted on January 2003, paragraph 8 read as follows:

> "8. Moreover, the extension of the network of double taxation conventions still reinforces the impact of such manoeuvres by making it possible, using artificial legal constructions, to benefit both from the tax advantages available under domestic laws and the tax relief provided for in double taxation conventions."

Paragraph 8 was amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. In the 1977 Model Convention and until 21 September 1995, paragraph 8 read as follows:

> "8. Moreover, the extension of the network of double taxation conventions still reinforces the impact of such manoeuvres by making it possible, through the creation of usually artificial legal constructions, to benefit both from the tax advantages available under domestic laws and the tax relief provided for in double taxation conventions."

Paragraph 8 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 9: Amended on 28 January 2003, by changing the cross-reference to "paragraph 4 of Article 13", in the last sentence, to "paragraph 5 of Article 13", by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until January 2003, paragraph 9 read as follows:

> "9. This would be the case, for example, if a person (whether or not a resident of a Contracting State), acts through a legal entity created in a State essentially to obtain treaty benefits that would not be available directly. Another case would be an individual who has in a Contracting State both his permanent home and all his economic interests, including a substantial shareholding in a company of that State, and who, essentially in order to sell the shares and escape taxation in that State on the capital gains from the alienation (by virtue of paragraph 4 of Article 13), transfers his permanent home to the other Contracting State, where such gains are subject to little or no tax."

Paragraph 9 was previously amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. In the 1977 Model Convention and until 21 September 1995, paragraph 9 read as follows:

> "9. This would be the case, for example, if a person (whether or not a resident of a Contracting State), acts through a legal entity created in a State essentially to obtain treaty benefits that would not be available directly to such person. Another case would be one of an individual having in a Contracting State both his permanent home and all his economic interests, including a substantial participation in a company of that State, and who, essentially in order to sell the participation and escape taxation in that State on the capital gains from the alienation (by virtue of paragraph 4 of Article 13), transfers his permanent home to the other Contracting State, where such gains are subject to little or no tax."

Paragraph 9 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 9.1: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 9.2: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 9.3: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 9.4: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 9.5: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 9.6: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 10: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). In the 1977 Model Convention and until 28 January 2003, paragraph 10 read as follows:

> "10. Some of these situations are dealt with in the Convention, *e.g.* by the introduction of the concept of "beneficial owner" (in Articles 10, 11 and 12) and of special provisions, for so-called artiste-companies (paragraph 2 of Article 17). Such problems are also mentioned in the Commentaries on Article 10 (paragraphs 17 and 22), Article 11 (paragraph 12), and Article 12 (paragraph 7). It may be appropriate for Contracting States to agree in bilateral negotiations that any relief from tax should not apply in certain cases, or to agree that the application of the provisions of domestic laws against tax avoidance should not be affected by the Convention."

Paragraph 10 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 10.1: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 10.2: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 11: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 21 September 1995 and until 28 January 2003, paragraph 11 read as follows:

> "11. Improper uses of the Convention are discussed in two reports from the Committee on Fiscal Affairs entitled "Double Taxation Conventions and the Use of Base Companies" and "Double Taxation Conventions and the Use of Conduit Companies". As indicated in these reports, the concern expressed in paragraph 9 above has proved to be valid as there has been a growing tendency toward the use of conduit companies to obtain treaty benefits not intended by the Contracting States in their bilateral negotiations. This has led an increasing number of Member countries to implement treaty provisions (both general and specific) to counter abuse and to preserve anti-avoidance legislation in their domestic laws."

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

Paragraph 11 was previously amended on 23 October 1997, by replacing the footnote to the paragraph, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, the footnote read as follows:

"1 These and two other reports were published in 1987 under the joint title *International Tax Avoidance and Evasion — Four Related Studies*, in "Issues of International Taxation" No. 1, OECD, Paris, 1987."

Paragraph 11 was previously amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. After 23 July 1992 and until 21 September 1995, paragraph 11 read as follows:

"11. Such improper uses of the Convention are discussed in two reports from the Committee on Fiscal Affairs entitled "Double Taxation Conventions and the Use of Base Companies" and "Double Taxation Conventions and the Use of Conduit Companies". As indicated in these reports, the concern expressed in paragraph 9 above has proved to be valid as there has been a growing tendency for the use of conduit companies to obtain treaty benefits not intended by the Contracting States in their bilateral negotiations. This has led an increasing number of Member countries to implement treaty provisions (both general and specific) to counter abuse and to preserve anti-avoidance legislation in their domestic laws."

Paragraph 11 as it read after 23 July 1992 replaced paragraph 11 of the 1977 Model Convention, which was renumbered as paragraph 28 (see history of paragraph 28) by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 12: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 21 September 1995 and until 28 January 2003, paragraph 12 read as follows:

"12. Several solutions have been considered but, for the reasons set out in the above-mentioned reports, no definitive texts have been drafted, no strict recommendations as to the circumstances in which they should be applied made, and no exhaustive list of such possible counter-measures given. The texts quoted below are merely intended as suggested benchmarks that treaty negotiators might consider when searching for a solution to specific cases. In referring to them there should be taken into account:

— the degree to which tax advantages may actually be obtained by conduit companies;

— the legal context in both Contracting States, and

— the extent to which *bona fide* economic activities might be unintentionally disqualified by such provisions."

Paragraph 12 was previously amended on 21 September 1995, by replacing the words "the extent to which" with "the scope of" in the third subparagraph, when a number of minor drafting changes that did not affect the meaning of the text were made. After 23 July 1992 and until 21 September 1995, the third subparagraph of paragraph 12 read as follows:

"— the scope of *bona fide* economic activities might be unintentionally disqualified by such provisions."

Paragraph 12 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of

paragraph 22 of a previous report entitled “Double Taxation Conventions and the Use of Conduit Companies” (adopted by the Council of the OECD on 27 November 1986).

Paragraph 13: Amended and the heading preceding it was added on 28 January 2003 by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003, on the basis of another report entitled “Restricting the Entitlement to Treaty Benefits” (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 21 September 1995 and until 28 January 2003, paragraph 13 read as follows:

> “13. A solution to the problem of conduit companies would be to disallow treaty benefits to a company not owned, directly or indirectly, by residents of the State of which the company is a resident. For example, such a “look-through” provision might have the following wording:
>
> > “A company that is a resident of a Contracting State shall not be entitled to relief from taxation under this Convention with respect to any item of income, gains or profits if it is owned or controlled directly or through one or more companies, wherever resident, by persons who are not residents of a Contracting State.”
>
> Contracting States wishing to adopt such a provision may also want, in their bilateral negotiations, to determine the criteria according to which a company would be considered as owned or controlled by non-residents.”

Paragraph 13 was previously amended on 21 September 1995, by deleting the words “insofar as the company” from the first sentence, when a number of minor drafting changes that did not affect the meaning of the text were made. After 31 March 1994 and until 21 September 1995, the first sentence of paragraph 13 read as follows:

> “13. A solution to the problem of conduit companies would be to disallow treaty benefits to a company insofar as the company is not owned, directly or indirectly, by residents of the State of which the company is a resident.”

Paragraph 13 was previously amended on 31 March 1994, by replacing the words “the first-mentioned State” with “a Contracting State” at the end of the suggested provision, by the report entitled “1994 Update to the Model Tax Convention”, adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 13 read as follows:

> “13. A solution to the problem of conduit companies would be to disallow treaty benefits to a company insofar as the company is not owned, directly or indirectly, by residents of the State of which the company is a resident. For example, such a “look-through” provision might have the following wording:
>
> > “A company which is a resident of a Contracting State shall not be entitled to relief from taxation under this Convention with respect to any item of income, gains or profits unless it is neither owned nor controlled directly or through one or more companies, wherever resident, by persons who are not residents of the first mentioned State.”
>
> Contracting States wishing to adopt such a provision may also want, in their bilateral negotiations, to determine the criteria according to which a company would be considered as owned or controlled by non-residents.”

Paragraph 13 was added on 23 July 1992 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992, on the basis of paragraph 23 of a previous report entitled “Double Taxation Conventions and the Use of Conduit Companies” (adopted by the Council of the OECD on 27 November 1986).

Paragraph 14: Amended on 28 January 2003, by adding the “words underlying the above provision”, by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003, on the basis of another

report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 21 September 1995 and until 28 January 2003, paragraph 14 read as follows:

> "14. The "look-through approach" seems an adequate basis for treaties with countries that have no or very low taxation and where little substantive business activities would normally be carried on. Even in these cases it might be necessary to alter the provision or to substitute for it another one to safeguard *bona fide* business activities."

Paragraph 14 was previously amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. After 23 July 1992 and until 21 September 1995, paragraph 14 read as follows:

> "14. The "look-through approach" seems an adequate basis for treaties with countries which have no or very low taxation and where little substantive business activities would normally be carried on. Even in these cases it would be necessary to alter the provision or to substitute for it another one to safeguard *bona fide* business activities."

Paragraph 14 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 25 of a previous report entitled "Double Taxation Conventions and the Use of Conduit Companies" (adopted by the Council of the OECD on 27 November 1986).

Paragraph 15: Corresponds to paragraph 17 as it read before 28 January 2003. Paragraph 15 as it read before 28 January 2003 was amended and renumbered as paragraph 21 (see history of paragraph 21) and paragraph 17 was renumbered as paragraph 15 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 17 was amended on 23 October 1997, by replacing the word "and" by "or" at the end of subparagraph *a)* of the suggested provision included in the paragraph, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, subparagraph *a)* of the suggested provision included in paragraph 17 read as follows:

> "*a)* have directly or indirectly or through one or more companies, wherever resident, a substantial interest in such company, in the form of a participation or otherwise, and."

Paragraph 17 was previously amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. The amendment replaced the words "only if the respective income" with "only if the income" in the first sentence and replaced the words "in terms of a certain percentage" with "as a percentage" in the first sentence.

Paragraph 17 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 29 of a previous report entitled "Double Taxation Conventions and the Use of Conduit Companies" (adopted by the Council of the OECD on 27 November 1986).

Paragraph 16: Corresponds to paragraph 18 as it read before 28 January 2003. Paragraph 16 as it read before 28 January 2003 was renumbered as paragraph 21.1 (see history of paragraph 21.1) and paragraph 18 was renumbered as paragraph 16 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the

Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 18 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 36 of a previous report entitled "Double Taxation Conventions and the Use of Conduit Companies" (adopted by the Council of the OECD on 27 November 1986).

Paragraph 17: Corresponds to paragraph 19 as it read before 28 January 2003. Paragraph 17 as it read before 28 January 2003 was renumbered as paragraph 15 (see history of paragraph 15) and paragraph 19 was renumbered as paragraph 17 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 19 was amended on 23 October 1997, by replacing the word "and" by "or" at the end of subparagraph *a)* of the suggested provision included in the paragraph, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, subparagraph *a)* of the suggested provision included in paragraph 19 previously read as follows:

"a) have directly or indirectly or through one or more companies, wherever resident, a substantial interest in such company, in the form of a participation or otherwise, and."

Paragraph 19 was previously amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. This included replacing the word "which" with "that" in the third sentence and by deleting ",etc" at the end of the paragraph.

Paragraph 19 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 37 of a previous report entitled "Double Taxation Conventions and the Use of Conduit Companies" (adopted by the Council of the OECD on 27 November 1986).

Paragraph 18: Corresponds to paragraph 20 as it read before 28 January 2003. Paragraph 18 as it read before 28 January 2003 was renumbered as paragraph 16 (see history of paragraph 16) and paragraph 20 was renumbered as paragraph 18 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 20 was amended on 21 September 1995, by replacing the word "which" with "that" in the first sentence, on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1.

Paragraph 20 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 41 of a previous report entitled "Double Taxation Conventions and the Use of Conduit Companies" (adopted by the Council of the OECD on 27 November 1986).

Paragraph 19: Corresponds to paragraph 21 as it read before 28 January 2003. Paragraph 19 as it read before 28 January 2003 was renumbered as paragraph 17 (see history of paragraph 17) and paragraph 21 was renumbered as paragraph 19 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the

Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 21 was amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. After 23 July 1992 and until 21 September 1995, paragraph 21 read as follows:

"21. The solutions described above are of a general nature and they need to be accompanied by specific provisions to ensure that treaty benefits will be granted in *bona fide* cases. Such provisions could have the following wording:

a) General bona fide provision

"The foregoing provisions shall not apply where the company establishes that the principal purpose of the company, the conduct of its business and the acquisition or maintenance by it of the shareholding or other property from which the income in question is derived, are motivated by sound business reasons and do not have as primary purpose the obtaining of any benefits under this Convention."

b) Activity provision

"The foregoing provisions shall not apply where the company is engaged in substantive business operations in the Contracting State of which it is a resident and the relief from taxation claimed from the other Contracting State is with respect to income that is connected with such operations."

c) Amount of tax provision

"The foregoing provisions shall not apply where the reduction of tax claimed is not greater than the tax actually imposed by the Contracting State of which the company is a resident."

d) Stock exchange provision

"The foregoing provisions shall not apply to a company that is a resident of a Contracting State if the principal class of its shares is registered on an approved stock exchange in a Contracting State or if such company is wholly owned — directly or through one or more companies each of which is a resident of the first-mentioned State — by a company which is a resident of the first-mentioned State and the principal class of whose shares is so registered."

e) Alternative relief provision

"In cases where an anti-abuse clause refers to non-residents of a Contracting State, it could be provided that the term "shall not be deemed to include residents of third States that have income tax conventions in force with the Contracting State from which relief from taxation is claimed and such conventions provide relief from taxation not less than the relief from taxation claimed under this Convention"."

These provisions illustrate possible approaches. The specific wording of the provisions to be included in a particular treaty depends on the general approach taken in that treaty and should be determined on a bilateral basis. Also, where the competent authorities of the Contracting States have the power to apply discretionary provisions, it may be considered appropriate to include an additional rule that would give the competent authority of the source country the discretion to allow the benefits of the Convention to a resident of the other State even if the resident fails to pass any of the tests described above."

Paragraph 21 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of

paragraph 42 of a previous report entitled “Double Taxation Conventions and the Use of Conduit Companies” (adopted by the Council of the OECD on 27 November 1986).

Paragraph 20: Replaced on 28 January 2003 when paragraph 20 as it read before 28 January 2003 was renumbered as paragraph 18 (see history of paragraph 18) and a new paragraph 20 was added by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003, on the basis of another report entitled “Restricting the Entitlement to Treaty Benefits” (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 21: Corresponds to paragraph 15 as it read before 28 January 2003. Paragraph 21 as it read before 28 January 2003 was renumbered paragraph 19 (see history of paragraph 19), paragraph 15 was amended and renumbered as paragraph 21 and the heading preceding paragraph 21 was added by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003, on the basis of another report entitled “Restricting the Entitlement to Treaty Benefits” (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 23 October 1997 and until 28 January 2003, paragraph 15 read as follows:

> “15. Conduit situations can be created by the use of tax-exempt (or nearly tax-exempt) companies that may be distinguished by special legal characteristics. The improper use of tax treaties may then be avoided by denying the tax treaty benefits to these companies (the exclusion approach). The main cases are specific types of companies enjoying tax privileges in their State of residence giving them in fact a status similar to that of a non-resident. As such privileges are granted mostly to specific types of companies as defined in the commercial law or in the tax law of a country, the most radical solution would be to exclude such companies from the scope of the treaty. Another solution would be to insert a safeguarding clause such as the following:
>
> > “No provision of the Convention conferring an exemption from, or reduction of, tax shall apply to income received or paid by a company as defined under Section ... of the ... Act, or under any similar provision enacted by ... after the signature of the Convention.”
>
> The scope of this provision could be limited by referring only to specific types of income, such as dividends, interest, capital gains, or directors’ fees. Under such provisions companies of the type concerned would remain entitled to the protection offered under Article 24 (non-discrimination) and to the benefits of Article 25 (mutual agreement procedure) and they would be subject to the provisions of Article 26 (exchange of information).”

Paragraph 15 was previously amended on 23 October 1997, by deleting the words “as far as the income paid by the company is concerned” in the first line of the last part of the paragraph, by the report entitled “The 1997 Update to the Model Tax Convention”, adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 15 read as follows:

> “15. Conduit situations can be created by the use of tax-exempt (or nearly tax-exempt) companies that may be distinguished by special legal characteristics. The improper use of tax treaties may then be avoided by denying the tax treaty benefits to these companies (the exclusion approach). The main cases are specific types of companies enjoying tax privileges in their State of residence giving them in fact a status similar to that of a non-resident. As such privileges are granted mostly to specific types of companies as defined in the commercial law or in the tax law of a country, the most radical solution would be to exclude such companies from the scope of the treaty. Another solution would be to insert a safeguarding clause such as the following:

> "No provision of the Convention conferring an exemption from, or reduction of, tax shall apply to income received or paid by a company as defined under Section … of the … Act, or under any similar provision enacted by … after the signature of the Convention."

The scope of this provision, as far as the income paid by the company is concerned, could be limited by referring only to specific types of income, such as dividends, interest, capital gains, or directors' fees. Under such provisions companies of the type concerned would remain entitled to the protection offered under Article 24 (non-discrimination) and to the benefits of Article 25 (mutual agreement procedure) and they would be subject to the provisions of Article 26 (exchange of information)."

Paragraph 15 was previously amended on 21 September 1995, by replacing the word "which" with "that" in the first sentence, on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1.

Paragraph 15 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 26 of a previous report entitled "Double Taxation Conventions and the Use of Conduit Companies" (adopted by the Council of the OECD on 27 November 1986).

Paragraph 21.1: Corresponds to paragraph 16 as it read before 28 January 2003. Paragraph 16 was renumbered as paragraph 21.1 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 16 was previously amended on 21 September 1995, by replacing the word "which" with "that" in the second sentence, when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. After 23 July 1992 and until 21 September 1995, paragraph 16 read as follows:

> "16. Exclusion provisions are clear and their application is simple, even though they may require administrative assistance in some instances. They are an important instrument by which a State which has created special privileges in its tax law may prevent those privileges from being used in connection with the improper use of tax treaties concluded by that State."

Paragraph 16 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 28 of a previous report entitled "Double Taxation Conventions and the Use of Conduit Companies" (adopted by the Council of the OECD on 27 November 1986).

Paragraph 21.2: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 21.3: Added with the heading preceding it on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 21.4: Added with the heading preceding it on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the

Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 21.5: Added with the heading preceding it on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 22: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 22 read as follows:

> "22. Other forms of abuse of tax treaties (*e.g.* the use of a base company) and of possible ways to deal with them such as "substance-over-form" rules and "sub-part F type" provisions have also been analysed."

Paragraph 22 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 22.1: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 22.2: Corresponds to paragraph 25 as it read before 28 January 2003. Paragraph 25 was amended and renumbered as paragraph 22.2 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 25 read as follows:

> "25. While these and the other counteracting measures described in the reports mentioned in paragraph 11 above are not inconsistent with the spirit of tax treaties, there is agreement that member countries should carefully observe the specific obligations enshrined in tax treaties, as long as there is no clear evidence that the treaties are being improperly used. Furthermore, it seems desirable that counteracting measures comply with the spirit of tax treaties with a view to avoiding double taxation. Where the taxpayer complies with such counteracting measures, it might furthermore be appropriate to grant him the protection of the treaty network."

Paragraph 25 was previously amended on 21 September 1995, by replacing the words "it might be adequate to grant him" with "it might be appropriate to grant him" in the last sentence, when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1.

Paragraph 25 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 46 of a previous report entitled "Double Taxation Conventions and the Use of Base Companies" (adopted by the Council of the OECD on 27 November 1986).

Paragraph 23: Amended on 22 July 2010, by replacing the cross reference to paragraph "13 of the Commentary on Article 7" with "14 of the Commentary on Article 7", by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 23 read as follows:

> "23. The use of base companies may also be addressed through controlled foreign companies provisions. A significant number of Member and non-member countries have now adopted such legislation. Whilst the design of this type of legislation varies considerably among countries, a common feature of these rules, which are now internationally recognised as a legitimate instrument to protect the domestic tax base, is that they result in a Contracting State taxing its residents on income attributable to their participation in certain foreign entities. It has

sometimes been argued, based on a certain interpretation of provisions of the Convention such as paragraph 1 of Article 7 and paragraph 5 of Article 10, that this common feature of controlled foreign companies legislation conflicted with these provisions. For the reasons explained in paragraphs 13 of the Commentary on Article 7 and 37 of the Commentary on Article 10, that interpretation does not accord with the text of the provisions. It also does not hold when these provisions are read in their context. Thus, whilst some countries have felt it useful to expressly clarify, in their conventions, that controlled foreign companies legislation did not conflict with the Convention, such clarification is not necessary. It is recognised that controlled foreign companies legislation structured in this way is not contrary to the provisions of the Convention."

Paragraph 23 was previously amended on 17 July 2008, by replacing the cross reference to paragraph "10.1 of the Commentary on Article 7" with "13 of the Commentary on Article 7", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 23 read as follows:

"23. The use of base companies may also be addressed through controlled foreign companies provisions. A significant number of Member and non-member countries have now adopted such legislation. Whilst the design of this type of legislation varies considerably among countries, a common feature of these rules, which are now internationally recognised as a legitimate instrument to protect the domestic tax base, is that they result in a Contracting State taxing its residents on income attributable to their participation in certain foreign entities. It has sometimes been argued, based on a certain interpretation of provisions of the Convention such as paragraph 1 of Article 7 and paragraph 5 of Article 10, that this common feature of controlled foreign companies legislation conflicted with these provisions. For the reasons explained in paragraphs 13 of the Commentary on Article 7 and 37 of the Commentary on Article 10, that interpretation does not accord with the text of the provisions. It also does not hold when these provisions are read in their context. Thus, whilst some countries have felt it useful to expressly clarify, in their conventions, that controlled foreign companies legislation did not conflict with the Convention, such clarification is not necessary. It is recognised that controlled foreign companies legislation structured in this way is not contrary to the provisions of the Convention."

Paragraph 23 was replaced on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until it was deleted on 28 January 2003, paragraph 23 read as follows:

"23. The large majority of OECD member countries consider that such measures are part of the basic domestic rules set by national tax law for determining which facts give rise to a tax liability. These rules are not addressed in tax treaties and are therefore not affected by them. One could invoke the spirit of the Convention, which would be violated only if a company, which is a person within the meaning of the Convention, ended up with no or almost no activity or income being attributed to it, and the Contracting States took divergent views on the subject, with economic double taxation resulting therefrom, the same income being taxed twice in the hands of two different taxpayers (see paragraph 2 of Article 9). A dissenting view, on the other hand, holds that such rules are subject to the general provisions of tax treaties against double taxation, especially where the treaty itself contains provisions aimed at counteracting its improper use."

Paragraph 23 was previously amended on 21 September 1995, by replacing the words "almost no activity and/or income" with "almost no activity or income" in the third sentence, on 21 September 1995 when a number of minor drafting changes that did

not affect the meaning of the text were made to the Commentary on Article 1. After 23 July 1992 and until 21 September 1995, paragraph 23 read as follows:

> "23. The large majority of OECD member countries consider that such measures are part of the basic domestic rules set by national tax law for determining which facts give rise to a tax liability. These rules are not addressed in tax treaties and are therefore not affected by them. One could invoke the spirit of the Convention, which would be violated only if a company, which is a person within the meaning of the Convention, ended up with no or almost no activity and/or income being attributed to it, and the Contracting States took divergent views on the subject, with economic double taxation resulting therefrom, the same income being taxed twice in the hands of two different taxpayers (see paragraph 2 of Article 9). A dissenting view, on the other hand, holds that such rules are subject to the general provisions of tax treaties against double taxation, especially where the treaty itself contains provisions aimed at counteracting its improper use."

Paragraph 23 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 39 of a previous report entitled "Double Taxation Conventions and the Use of Base Companies" (adopted by the Council of the OECD on 27 November 1986).

Paragraph 24: Deleted on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 24 read as follows:

> "24. It is not easy to reconcile these divergent opinions, either in theory or in mutual agreement procedures on specific cases. The main problem seems to be whether or not general principles such as "substance-over-form" are inherent in treaty provisions, *i.e.* whether they can be applied in any case, or only to the extent they are expressly mentioned in bilateral conventions. The dissenting view argues that to give domestic rules precedence over treaty rules as to who, for tax purposes, is regarded as the recipient of the income shifted to a base company, would erode the protection of taxpayers against double taxation (*e.g.* where by applying these rules, base company income is taxed in the country of the shareholders even though there is no permanent establishment of the base company there). However, it is the view of the wide majority that such rules, and the underlying principles, do not have to be confirmed in the text of the convention to be applicable."

Paragraph 24 was amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. After 23 July 1992 and until 21 September 1995, paragraph 24 read as follows:

> "24. It is not easy to reconcile these divergent opinions in theory, or in mutual agreement procedures on specific cases. The main problem seems to be whether or not general principles such as "substance-over-form" are inherent in treaty provisions, *i.e.* whether they can be applied in any case, or only to the extent they are expressly mentioned in bilateral conventions. On the dissenting view, it is argued that to give domestic rules precedence over treaty rules as to who, for tax purposes, is regarded as the recipient of the income shifted to a base company, would erode the protection of taxpayers against double taxation (*e.g.* where by applying these rules, base company income is taxed in the country of the shareholders even though there is no permanent establishment of the base company there). However, it is the view of the wide majority that such rules, and the underlying principles, do not have to be confirmed in the text of the convention to be applicable."

Paragraph 24 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of

paragraph 40 of a previous report entitled “Double Taxation Conventions and the Use of Base Companies” (adopted by the Council of the OECD on 27 November 1986).

Paragraph 25: Renumbered as paragraph 22.2 and amended on 28 January 2003 by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003.

Paragraph 26: Replaced on 28 January 2003 by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 26 read as follows:

> “26. The majority of member countries accept counteracting measures as a necessary means of maintaining equity and neutrality of national tax laws in an international environment characterised by very different tax burdens, but believe that such measures should be used only for this purpose. It would be contrary to the general principles underlying the Model Convention and to the spirit of tax treaties in general if counteracting measures were to be extended to activities such as production, normal rendering of services or trading of companies engaged in real industrial or commercial activity, when they are clearly related to the economic environment of the country where they are resident in a situation where these activities are carried out in such a way that no tax avoidance could be suspected. Counteracting measures should not be applied to countries in which taxation is comparable to that of the country of residence of the taxpayer.”

Paragraph 26 was amended on 21 September 1995, by replacing the words “but such measures” with “but believe that such measures” in the first sentence, when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 1. After 23 July 1992 and until 21 September 1995, paragraph 26 read as follows:

> “26. The majority of member countries accept counteracting measures as a necessary means of maintaining equity and neutrality of national tax laws in an international environment characterised by very different tax burdens, but such measures should be used only for this purpose. It would be contrary to the general principles underlying the Model Convention and to the spirit of tax treaties in general if counteracting measures were to be extended to activities such as production, normal rendering of services or trading of companies engaged in real industrial or commercial activity, when they are clearly related to the economic environment of the country where they are resident in a situation where these activities are carried out in such a way that no tax avoidance could be suspected. Counteracting measures should not be applied to countries in which taxation is comparable to that of the country of residence of the taxpayer.”

Paragraph 26 was added on 23 July 1992 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992, on the basis of paragraph 47 of a previous report entitled “Double Taxation Conventions and the Use of Base Companies” (adopted by the Council of the OECD on 27 November 1986).

Paragraph 26.1: Added with the heading preceding it on 28 January 2003 by the report entitled the “2002 Update to the Model Tax Convention” adopted by the OECD Council on 28 January 2003.

Paragraph 26.2: Added with the heading preceding it on 28 January 2003 by the report entitled the “2002 Update to the Model Tax Convention” adopted by the OECD Council on 28 January 2003.

Paragraph 27: Added on 22 July 2010 by the report entitled the “2010 Update to the Model Tax Convention” adopted by the OECD Council on 22 July 2010.

Paragraph 27 was deleted on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 27 read as follows:

> "27. The *United States* believes that the business activities referred to in subparagraph *b)* of paragraph 21 of the Commentary should exclude "the business of making or managing investments, unless these activities are banking or insurance activities carried on by a bank or insurance company." Absent this language, a third-country resident could set up a classic treaty shopping conduit operation — a personal investment company — and argue that the company is engaged in a substantive business operation (the managing of the third-country owner's personal portfolio) and the income in respect of which benefits are claimed (dividends and interest) is connected with those business operations."

Paragraph 27 was added with the heading preceding it on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 27.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 27.2: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 27.2 read as follows:

> "27.2 *France* has expressed a number of reservations on the report on "The Application of the OECD Model Tax Convention to Partnerships". In particular, France does not agree with the interpretation put forward in paragraphs 5 and 6 above according to which if a partnership is denied the benefits of a tax convention, its members are entitled to the benefits of the tax conventions entered into by their State of residence. France believes that this result is only possible, to a certain extent, if provisions to that effect are included in the convention entered into with the State where the partnership is situated. This view is also shared by *Mexico*."

Paragraph 27.2 was previously amended on 28 January 2003, by adding Mexico as a country making the observation, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 27.2 read as follows:

> "27.2 *France* has expressed a number of reservations on the report on "I. Introduction". In particular, France does not agree with the interpretation put forward in paragraphs 5 and 6 above according to which if a partnership is denied the benefits of a tax convention, its members are entitled to the benefits of the tax conventions entered into by their State of residence. France believes that this result is only possible, to a certain extent, if provisions to that effect are included in the convention entered into with the State where the partnership is situated."

Paragraph 27.2 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 27.3: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 27.4: Amended on 22 July 2010, by replacing the cross-reference to "paragraph 66 of the Commentary on Article 7" with "paragraph 74 of the Commentary on Article 7", by the report entitled "The 2010 Update to the Model Tax

Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 27.4 read as follows:

> "27.4 *Belgium* cannot share the views expressed in paragraph 23 of the Commentary. Belgium considers that the application of controlled foreign companies legislation is contrary to the provisions of paragraph 7 of Article 5, paragraph 1 of Article 7 and paragraph 5 of Article 10 of the Convention. This is especially the case where a Contracting State taxes one of its residents on income derived by a foreign entity by using a fiction attributing to that resident, in proportion to his participation in the capital of the foreign entity, the income derived by that entity. By doing so, that State increases the tax base of its resident by including in it income which has not been derived by that resident but by a foreign entity which is not taxable in that State in accordance with the Convention. That Contracting State thus disregards the legal personality of the foreign entity and therefore acts contrary to the Convention (see also paragraph 66 of the Commentary on Article 7 and paragraph 68.1 of the Commentary on Article 10)"

Paragraph 27.4 was previously amended on 17 July 2008, by replacing the cross-reference to "paragraph 40.1 of the Commentary on Article 7" with "paragraph 66 of the Commentary on Article 7", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 27.4 read as follows:

> "27.4 *Belgium* cannot share the views expressed in paragraph 23 of the Commentary. Belgium considers that the application of controlled foreign companies legislation is contrary to the provisions of paragraph 7 of Article 5, paragraph 1 of Article 7 and paragraph 5 of Article 10 of the Convention. This is especially the case where a Contracting State taxes one of its residents on income derived by a foreign entity by using a fiction attributing to that resident, in proportion to his participation in the capital of the foreign entity, the income derived by that entity. By doing so, that State increases the tax base of its resident by including in it income which has not been derived by that resident but by a foreign entity which is not taxable in that State in accordance with the Convention. That Contracting State thus disregards the legal personality of the foreign entity and therefore acts contrary to the Convention (see also paragraph 40.1 of the Commentary on Article 7 and paragraph 68.1 of the Commentary on Article 10)."

Paragraph 27.4 was added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 27.5: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 27.6: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 27.7: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 27.8: Deleted on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 27.8 read as follows:

> "27.8 Whenever the prevailing hierarchy of tax conventions regarding internal law is not respected, *Portugal* will not adhere to the conclusions on the clarification of domestic anti-abuse rules incorporated in the Commentary on Article 1."

Paragraph 27.8 was added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 27.9: Added on 28 January 2003 by the report entitled the "2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 27.10: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 28: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 28 read as follows:

> "28. The *United States* reserves the right to tax its citizens and residents (with certain exceptions) without regard to the Convention."

Paragraph 28 as it read after 23 July 1992 corresponded to paragraph 11 of the 1977 Model Convention, which was renumbered as paragraph 28 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 11 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 29: Deleted on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 29 read as follows:

> "29. The United States reserves the right to limit the benefits of the Convention to certain persons."

Paragraph 29 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

COMMENTARY ON ARTICLE 2
CONCERNING TAXES COVERED BY THE CONVENTION

1. This Article is intended to make the terminology and nomenclature relating to the taxes covered by the Convention more acceptable and precise, to ensure identification of the Contracting States' taxes covered by the Convention, to widen as much as possible the field of application of the Convention by including, as far as possible, and in harmony with the domestic laws of the Contracting States, the taxes imposed by their political subdivisions or local authorities, to avoid the necessity of concluding a new convention whenever the Contracting States' domestic laws are modified, and to ensure for each Contracting State notification of significant changes in the taxation laws of the other State.

(Amended on 29 April 2000; see HISTORY)

Paragraph 1

2. This paragraph defines the scope of application of the Convention: taxes on income and on capital; the term "direct taxes" which is far too imprecise has therefore been avoided. It is immaterial on behalf of which authorities such taxes are imposed; it may be the State itself or its political subdivisions or local authorities (constituent States, regions, provinces, *départements*, cantons, districts, *arrondissements*, *Kreise*, municipalities or groups of municipalities, etc.). The method of levying the taxes is equally immaterial: by direct assessment or by deduction at the source, in the form of surtaxes or surcharges, or as additional taxes (*centimes additionnels*), etc.

(Amended on 11 April 1977; see HISTORY)

Paragraph 2

3. This paragraph gives a definition of taxes on income and on capital. Such taxes comprise taxes on total income and on elements of income, on total capital and on elements of capital. They also include taxes on profits and gains derived from the alienation of movable or immovable property, as well as taxes on capital appreciation. Finally, the definition extends to taxes on the total amounts of wages or salaries paid by undertakings ("payroll taxes"; in Germany, "*Lohnsummensteuer*"; in France, "*taxe sur les salaires*"). Social security charges, or any other charges paid where there is a direct connection between the levy and the individual benefits to be received, shall not be regarded as "taxes on the total amount of wages".

(Amended on 11 April 1977; see HISTORY)

4. Clearly a State possessing taxing powers — and it alone — may levy the taxes imposed by its legislation together with any duties or charges accessory

to them: increases, costs, interest, etc. It has not been considered necessary to specify this in the Article, as it is obvious that in the levying of the tax the accessory duties or charges depend on the same rule as the principal duty. Practice among member countries varies with respect to the treatment of interest and penalties. Some countries never treat such items as taxes covered by the Article. Others take the opposite approach, especially in cases where the additional charge is computed with reference to the amount of the underlying tax. Countries are free to clarify this point in their bilateral negotiations.

(Amended on 29 April 2000; see HISTORY)

5. The Article does not mention "ordinary taxes" or "extraordinary taxes". Normally, it might be considered justifiable to include extraordinary taxes in a model convention, but experience has shown that such taxes are generally imposed in very special circumstances. In addition, it would be difficult to define them. They may be extraordinary for various reasons; their imposition, the manner in which they are levied, their rates, their objects, etc. This being so, it seems preferable not to include extraordinary taxes in the Article. But, as it is not intended to exclude extraordinary taxes from all conventions, ordinary taxes have not been mentioned either. The Contracting States are thus free to restrict the convention's field of application to ordinary taxes, to extend it to extraordinary taxes, or even to establish special provisions.

(Amended on 11 April 1977; see HISTORY)

Paragraph 3

6. This paragraph lists the taxes in force at the time of signature of the Convention. The list is not exhaustive. It serves to illustrate the preceding paragraphs of the Article. In principle, however, it will be a complete list of taxes imposed in each State at the time of signature and covered by the Convention.

(Added on 30 July 1963; see HISTORY)

6.1 Some member countries do not include paragraphs 1 and 2 in their bilateral conventions. These countries prefer simply to list exhaustively the taxes in each country to which the Convention will apply, and clarify that the Convention will also apply to subsequent taxes that are similar to those listed. Countries that wish to follow this approach might use the following wording:

1. The taxes to which the Convention shall apply are:

   a) (in State A): ....

   b) (in State B): ....

> 2. The Convention shall apply also to any identical or substantially similar taxes that are imposed after the date of signature of the Convention in addition to, or in place of, the taxes listed in paragraph 1. The competent authorities of the Contracting States shall notify each other of any significant changes that have been made in their taxation laws.

As mentioned in paragraph 3 above, social security charges and similar charges should be excluded from the list of taxes covered.

(Added on 29 April 2000; see HISTORY)

Paragraph 4

7. This paragraph provides, since the list of taxes in paragraph 3 is purely declaratory, that the Convention is also to apply to all identical or substantially similar taxes that are imposed in a Contracting State after the date of signature of the Convention in addition to, or in place of, the existing taxes in that State.

(Amended on 29 April 2000; see HISTORY)

8. Each State undertakes to notify the other of any significant changes made to its taxation laws by communicating to it, for example, details of new or substituted taxes. Member countries are encouraged to communicate other significant developments as well, such as new regulations or judicial decisions; many countries already follow this practice. Contracting States are also free to extend the notification requirement to cover any significant changes in other laws that have an impact on their obligations under the convention; Contracting States wishing to do so may replace the last sentence of the paragraph by the following:

> The competent authorities of the Contracting States shall notify each other of any significant changes that have been made in their taxation laws or other laws affecting their obligations under the Convention.

(Amended on 29 April 2000; see HISTORY)

9. *(Deleted on 28 January 2003; see HISTORY)*

Reservations on the Article

10. *Canada*, *Chile* and the *United States* reserve their positions on that part of paragraph 1 which states that the Convention should apply to taxes of political subdivisions or local authorities.

(Amended on 22 July 2010; see HISTORY)

11. *Australia*, *Japan* and *Korea* reserve their position on that part of paragraph 1 which states that the Convention shall apply to taxes on capital.

(Amended on 15 July 2005; see HISTORY)

12. *Greece* holds the view that “taxes on the total amounts of wages or salaries paid by enterprises” should not be regarded as taxes on income and therefore will not be covered by the Convention.

(Added on 21 September 1995; see HISTORY)

HISTORY

Paragraph 1: Amended on 29 April 2000 by the report entitled “The 2000 Update to the Model Tax Convention”, adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. In the 1977 Model Convention and until 29 April 2000, paragraph 1 read as follows:

> “1. This Article is intended to make the terminology and nomenclature relating to the taxes covered by the Convention more acceptable and precise, to ensure identification of the Contracting States' taxes covered by the Convention, to widen as much as possible the field of application of the Convention by including, as far as possible, and in harmony with the domestic laws of the Contracting States, the taxes imposed by their political subdivisions or local authorities, and to avoid the necessity of concluding a new convention whenever the Contracting States' domestic laws are modified, by means of the periodical exchange of lists and through a procedure for mutual consultation.”

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> “1. The Article is intended to make the terminology and nomenclature relating to the taxes covered by the Convention more acceptable and precise, to ensure identification of the Contracting States' taxes covered by the Convention, to widen as much as possible the field of application of the Convention by including as far as possible, and in harmony with the internal legislation of the Contracting States, the taxes imposed by their political subdivisions or local authorities -- and to avoid the necessity of concluding a new Convention whenever the Contracting States' taxation legislation is modified, by means of the periodical exchange of lists and through a procedure for mutual consultation.”

Paragraph 2: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> “2. This paragraph defines the subject of the Convention: taxes on income and capital; the term “direct taxes” which is far too imprecise has therefore been omitted. It is immaterial on behalf of which authorities such taxes are imposed; it may be the State itself or its political subdivisions or local authorities (constituent States, regions, provinces, “departements”, Cantons, districts, “arrondissements”, circles [“Kreise”], municipalities or groups of municipalities, etc.). The method of levying the taxes is equally immaterial: by direct assessment or by deduction at the source, in the form of surtaxes or surcharges, or as additional taxes [“centimes additionels”], etc.”

Paragraph 3: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. This paragraph explains what is meant by taxes on income and capital. Such taxes comprise taxes on total income and on each element of income, on total capital and on each element of capital. They also include taxes on profits derived from the alienation of movable or immovable property, *i.e.* in particular capital gains and profits on real property, as well as taxes on capital appreciation, Finally, the definition extends to taxes on the total amounts of wages or salaries paid by undertakings ("payroll taxes"; in Germany, "Lohnsummensteuer"; in France the "versement forfaitaire a la charge des employeurs")."

Paragraph 4: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until 29 April 2000, paragraph 4 read as follows:

"4. Clearly a State possessing taxing powers — and it alone — may levy the taxes imposed by its legislation together with any duties or charges accessory to them: increases, costs, interest, etc. It has not been considered necessary to specify this in the Article, as it is obvious that in the levying of the tax the accessory duties or charges depend on the same rule as the principal duty."

Paragraph 5: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

"5. The Article does not mention 'ordinary taxes' or 'extraordinary taxes'. Normally, it might be considered justifiable to include extraordinary taxes in a draft Convention, but experience has shown that such taxes are generally imposed in very special circumstances. In addition, it would be difficult to define them. They may be extraordinary for various reasons; their imposition, the manner in which they are levied, their rates, their objects, etc. This being so, it seems preferable not to include extraordinary taxes in the Article. But, as it is not intended to exclude extraordinary taxes from all the Conventions, ordinary taxes have not been mentioned either. The Contracting States are thus free to restrict the Convention's field of application to ordinary taxes, to extend it to extraordinary taxes, or even to establish special provisions."

Paragraph 6: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 6.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 7: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. In the 1977 Model Convention and until 29 April 2000, paragraph 7 read as follows:

"7. This paragraph provides, since the list of taxes in paragraph 3 is purely declaratory, that the Convention is also to apply to all identical or substantially similar taxes which are imposed after the date of signature of the Convention in addition to, or in place of, the existing taxes. This provision is necessary to prevent the Convention from becoming inoperative in the event of one of the States modifying its taxation laws."

Paragraph 7 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 7 read as follows:

"7. This paragraph provides, since the list of taxes in paragraph 3 is purely declaratory, that the Convention is also to apply to all identical or substantially similar taxes which are subsequently imposed in addition to, or in place of the existing taxes. This provision is necessary to prevent the Convention from becoming inoperative in the event of one of the States modifying its laws."

Paragraph 8: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. In the 1977 Model Convention and until 29 April 2000, paragraph 8 read as follows:

"8. Each State undertakes to notify the other of any amendments made to its taxation laws by communicating to it at the end of each year, when necessary, a list of new or substituted taxes imposed during that year."

Paragraph 8 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 8 read as follows:

"8. Each State undertakes to notify to the other any amendments made to its tax laws by communication to it at the end of each year, when necessary, a list of new or substituted taxes, imposed during that year."

Paragraph 9: Deleted, together with the heading preceding it, on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 9 and the heading read as follows:

"Observation on the Commentary

9. In contexts such as limitations on the rate of tax or the granting of credits for foreign tax, *New Zealand* would wish to make it clear that the term "tax" does not include penalties, or interest on overpayment or underpayment of tax."

Paragraph 9 was amended on 21 September 1995, by adding the words ", or interest on overpayment or underpayment of tax", by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 9 read as follows:

"9. In contexts such as limitations on the rate of tax or the granting of credits for foreign tax, *New Zealand* would wish to make it clear that the term "tax" does not include penalties."

Paragraph 9 of the 1977 Model Convention replaced paragraph 9 of the 1963 Draft Convention, which was amended and renumbered as paragraph 10 (see history of paragraph 10), when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, the heading preceding paragraph 9 was moved immediately before paragraph 10 and a new heading was added immediately before paragraph 9.

Paragraph 10: Amended on 22 July 2010, by adding Chile to the list of countries making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 10 read as follows:

"10. *Canada* and the *United States* reserve their positions on that part of paragraph 1 which states that the Convention should apply to taxes of political subdivisions or local authorities."

Paragraph 10 was previously amended on 15 July 2005 by deleting Australia from the list of countries making the reservation, by the report entitled "The 2005 Update to the

Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 10 read as follows:

> "10. *Australia*, *Canada* and the *United States* reserve their positions on that part of paragraph 1 which states that the Convention should apply to taxes of political subdivisions or local authorities."

Paragraph 10 of the 1977 Model Convention corresponded to paragraph 9 of the 1963 Draft Convention. Paragraph 9 of the 1963 Draft Convention was amended and renumbered as paragraph 10 and the heading preceding paragraph 9 was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 9 read as follows:

> "9. Canada and the United States reserve their position on that part of paragraph 1 of the Article which states that the Convention shall apply to taxes of political subdivisions or local authorities."

Paragraph 11: Amended on 15 July 2005, by adding Australia to the list of countries making the reservation, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 11 read as follows:

> "11. *Japan* and *Korea* reserve their position on that part of paragraph 1 which states that the Convention shall apply to taxes on capital."

Paragraph 11 was previously amended on 23 October 1997, by adding Korea to the list of countries making the reservation, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. In the 1977 Model Convention and until 23 October 1997, paragraph 11 read as follows:

> "11. *Japan* reserves its position on that part of paragraph 1 which states that the Convention shall apply to taxes on capital."

Paragraph 11 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 12: Added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

COMMENTARY ON ARTICLE 3 CONCERNING GENERAL DEFINITIONS

1. This Article groups together a number of general provisions required for the interpretation of the terms used in the Convention. The meaning of some important terms, however, is explained elsewhere in the Convention. Thus, the terms "resident" and "permanent establishment" are defined in Articles 4 and 5 respectively, while the interpretation of certain terms appearing in the Articles on special categories of income ("income from immovable property", "dividends", etc.) is clarified by provisions embodied in those Articles. In addition to the definitions contained in the Article, Contracting States are free to agree bilaterally on definitions of the terms "a Contracting State" and "the other Contracting State". Furthermore, Contracting States are free to agree bilaterally to include in the possible definitions of "Contracting States" a reference to continental shelves.

(Amended on 21 September 1995; see HISTORY)

Paragraph 1

The term "person"

2. The definition of the term "person" given in subparagraph *a)* is not exhaustive and should be read as indicating that the term "person" is used in a very wide sense (see especially Articles 1 and 4). The definition explicitly mentions individuals, companies and other bodies of persons. From the meaning assigned to the term "company" by the definition contained in subparagraph *b)* it follows that, in addition, the term "person" includes any entity that, although not incorporated, is treated as a body corporate for tax purposes. Thus, *e.g.* a foundation (*fondation*, *Stiftung*) may fall within the meaning of the term "person". Partnerships will also be considered to be "persons" either because they fall within the definition of "company" or, where this is not the case, because they constitute other bodies of persons.

(Amended on 29 April 2000; see HISTORY)

The term "company"

3. The term "company" means in the first place any body corporate. In addition, the term covers any other taxable unit that is treated as a body corporate according to the tax laws of the Contracting State in which it is organised. The definition is drafted with special regard to the Article on dividends. The term "company" has a bearing only on that Article, paragraph 7 of Article 5, and Article 16.

(Amended on 21 September 1995; see HISTORY)

The term "enterprise"

4. The question whether an activity is performed within an enterprise or is deemed to constitute in itself an enterprise has always been interpreted according to the provisions of the domestic laws of the Contracting States. No exhaustive definition of the term "enterprise" has therefore been attempted in this Article. However, it is provided that the term "enterprise" applies to the carrying on of any business. Since the term "business" is expressly defined to include the performance of professional services and of other activities of an independent character, this clarifies that the performance of professional services or other activities of an independent character must be considered to constitute an enterprise, regardless of the meaning of that term under domestic law. States which consider that such clarification is unnecessary are free to omit the definition of the term "enterprise" from their bilateral conventions.

(Amended on 29 April 2000; see HISTORY)

The term "international traffic"

5. The definition of the term "international traffic" is based on the principle set forth in paragraph 1 of Article 8 that the right to tax profits from the operation of ships or aircraft in international traffic resides only in the Contracting State in which the place of effective management is situated in view of the special nature of the international traffic business. However, as stated in the Commentary on paragraph 1 of Article 8, the Contracting States are free on a bilateral basis to insert in subparagraph *e)* a reference to residence, in order to be consistent with the general pattern of the other Articles. In such a case, the words "an enterprise that has its place of effective management in a Contracting State" should be replaced, by "an enterprise of a Contracting State" or "a resident of a Contracting State".

(Amended on 21 September 1995; see HISTORY)

6. The definition of the term "international traffic" is broader than is normally understood. The broader definition is intended to preserve for the State of the place of effective management the right to tax purely domestic traffic as well as international traffic between third States, and to allow the other Contracting State to tax traffic solely within its borders. This intention may be clarified by the following illustration. Suppose an enterprise of a Contracting State or an enterprise that has its place of effective management in a Contracting State, through an agent in the other Contracting State, sells tickets for a passage that is confined wholly within the first-mentioned State or alternatively, within a third State. The Article does not permit the other State to tax the profits of either voyage. The other State is allowed to tax such

an enterprise of the first-mentioned State only where the operations are confined solely to places in that other State.

(Amended on 21 September 1995; see HISTORY)

6.1 A ship or aircraft is operated solely between places in the other Contracting State in relation to a particular voyage if the place of departure and the place of arrival of the ship or aircraft are both in that other Contracting State. However, the definition applies where the journey of a ship or aircraft between places in the other Contracting State forms part of a longer voyage of that ship or aircraft involving a place of departure or a place of arrival which is outside that other Contracting State. For example, where, as part of the same voyage, an aircraft first flies between a place in one Contracting State to a place in the other Contracting State and then continues to another destination also located in that other Contracting State, the first and second legs of that trip will both be part of a voyage regarded as falling within the definition of "international traffic".

(Added on 29 April 2000; see HISTORY)

6.2 Some States take the view that the definition of "international traffic" should rather refer to a transport as being the journey of a passenger or cargo so that any voyage of a passenger or cargo solely between two places in the same Contracting State should not be considered as covered by the definition even if that voyage is made on a ship or plane that is used for a voyage in international traffic. Contracting States having that view may agree bilaterally to delete the reference to "the ship or aircraft" in the exception included in the definition, so as to use the following definition:

> *e*) the term "international traffic" means any transport by a ship or aircraft operated by an enterprise that has its place of effective management in a Contracting State, except when such transport is solely between places in the other Contracting State;

(Added on 29 April 2000; see HISTORY)

6.3 The definition of "international traffic" does not apply to a transport by an enterprise which has its place of effective management in one Contracting State when the ship or aircraft is operated between two places in the other State, even if part of the transport takes place outside that State. Thus, for example, a cruise beginning and ending in that other State without a stop in a foreign port does not constitute a transport of passengers in international traffic. Contracting States wishing to expressly clarify that point in their conventions may agree bilaterally to amend the definition accordingly.

(Amended on 15 July 2005; see HISTORY)

The term "competent authority"

7. The definition of the term "competent authority" recognises that in some OECD member countries the execution of double taxation conventions does not exclusively fall within the competence of the highest tax authorities; some matters are reserved or may be delegated to other authorities. The present definition enables each Contracting State to designate one or more authorities as being competent.

(Amended on 21 September 1995; see HISTORY)

The term "national"

8. The definition of the term "national" merely stipulates that, in relation to a Contracting State, the term applies to any individual possessing the nationality or citizenship of that Contracting State. Whilst the concept of nationality covers citizenship, the latter term was also included in 2002 because it is more frequently used in some States. It was not judged necessary to include in the text of the Convention any more precise definition of the terms nationality and citizenship, nor did it seem indispensable to make any special comment on the meaning and application of these words. Obviously, in determining what is meant by "national" in the case of an individual, reference must be made to the sense in which the term is usually employed and each State's particular rules on the acquisition or loss of nationality or citizenship.

(Amended on 28 January 2003; see HISTORY)

9. Subparagraph *g)* is more specific as to legal persons, partnerships and associations. By declaring that any legal person, partnership or association deriving its status as such from the laws in force in a Contracting State is considered to be a national, the provision disposes of a difficulty that often arises. In defining the nationality of companies, certain States have regard less to the law that governs the company than to the origin of the capital with which the company was formed or the nationality of the individuals or legal persons controlling it.

(Replaced on 23 July 1992; see HISTORY)

10. Moreover, in view of the legal relationship created between a company and the State under whose law it is organised, which from certain points of view is closely akin to the relationship of nationality in the case of individuals, it seems justifiable not to deal with legal persons, partnerships and associations in a special provision, but to assimilate them with individuals under the term "national".

(Replaced on 23 July 1992; see HISTORY)

10.1 The separate mention of partnerships in subparagraph 1 *g)* is not inconsistent with the status of a partnership as a person under subparagraph 1 *a)*. Under the domestic laws of some countries, it is possible for an entity to be a "person" but not a "legal person" for tax purposes. The explicit statement is necessary to avoid confusion.

(Added on 29 April 2000; see HISTORY)

The term "business"

10.2 The Convention does not contain an exhaustive definition of the term "business", which, under paragraph 2, should generally have the meaning which it has under the domestic law of the State that applies the Convention. Subparagraph *h)*, however, provides expressly that the term includes the performance of professional services and of other activities of an independent character. This provision was added in 2000 at the same time as Article 14, which dealt with Independent Personal Services, was deleted from the Convention. This addition, which ensures that the term "business" includes the performance of the activities which were previously covered by Article 14, was intended to prevent that the term "business" be interpreted in a restricted way so as to exclude the performance of professional services, or other activities of an independent character, in States where the domestic law does not consider that the performance of such services or activities can constitute a business. Contracting States for which this is not the case are free to agree bilaterally to omit the definition.

(Added on 29 April 2000; see HISTORY)

Paragraph 2

11. This paragraph provides a general rule of interpretation for terms used in the Convention but not defined therein. However, the question arises which legislation must be referred to in order to determine the meaning of terms not defined in the Convention, the choice being between the legislation in force when the Convention was signed or that in force when the Convention is being applied, *i.e.* when the tax is imposed. The Committee on Fiscal Affairs concluded that the latter interpretation should prevail, and in 1995 amended the Model to make this point explicitly.

(Amended on 21 September 1995; see HISTORY)

12. However, paragraph 2 specifies that this applies only if the context does not require an alternative interpretation. The context is determined in particular by the intention of the Contracting States when signing the Convention as well as the meaning given to the term in question in the legislation of the other Contracting State (an implicit reference to the principle

of reciprocity on which the Convention is based). The wording of the Article therefore allows the competent authorities some leeway.

(Added on 23 July 1992; see HISTORY)

13. Consequently, the wording of paragraph 2 provides a satisfactory balance between, on the one hand, the need to ensure the permanency of commitments entered into by States when signing a convention (since a State should not be allowed to make a convention partially inoperative by amending afterwards in its domestic law the scope of terms not defined in the Convention) and, on the other hand, the need to be able to apply the Convention in a convenient and practical way over time (the need to refer to outdated concepts should be avoided).

(Added on 23 July 1992; see HISTORY)

13.1 Paragraph 2 was amended in 1995 to conform its text more closely to the general and consistent understanding of member states. For purposes of paragraph 2, the meaning of any term not defined in the Convention may be ascertained by reference to the meaning it has for the purpose of any relevant provision of the domestic law of a Contracting State, whether or not a tax law. However, where a term is defined differently for the purposes of different laws of a Contracting State, the meaning given to that term for purposes of the laws imposing the taxes to which the Convention applies shall prevail over all others, including those given for the purposes of other tax laws. States that are able to enter into mutual agreements (under the provisions of Article 25 and, in particular, paragraph 3 thereof) that establish the meanings of terms not defined in the Convention should take those agreements into account in interpreting those terms.

(Added on 21 September 1995; see HISTORY)

Reservations on the Article

14. *Italy* and *Portugal* reserve the right not to include the definitions in subparagraphs 1 *c)* and *h)* ("enterprise" and "business") because they reserve the right to include an article concerning the taxation of independent personal services.

(Replaced on 29 April 2000; see HISTORY)

15. *Chile*, *Mexico* and the *United States* reserve the right to omit the phrase "operated by an enterprise that has its place of effective management in a Contracting State" from the definition of "international traffic" in subparagraph *e)* of paragraph 1.

(Amended on 22 July 2010; see HISTORY)

16. *(Deleted on 28 January 2003; see HISTORY)*

HISTORY

Paragraph 1: Amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 3. In the 1977 Model Convention and until 21 September 1995, paragraph 1 read as follows:

> "1. This Article groups together a number of general provisions required for the interpretation of the terms used in the Convention. It should be observed, however, that the meaning of some important terms, however, is explained elsewhere in the Convention. Thus, the terms "resident" and "permanent establishment" are defined in Articles 4 and 5 respectively, while the interpretation of certain terms appearing in the Articles on special categories of income ("immovable property", "dividends", etc.) is clarified by provisions embodied in those Articles. In addition to the definitions contained in the Article, Contracting States are free to agree bilaterally on definitions of the terms "a Contracting State" and "the other Contracting State". Furthermore, Contracting States are free to agree bilaterally to include in the possible definitions of "Contracting States" a reference to continental shelves."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. This Article groups together a number of general provisions required for the interpretation of the terms used in the Convention. It should be observed, however, that the meaning of some important terms is explained elsewhere in the Convention. Thus, the terms "resident" and "permanent establishment" are defined in Articles 4 and 5 respectively, while the interpretation of certain terms appearing in the Articles on special categories of income ("immovable property", "dividends", etc.) is clarified by provisions embodied in those Articles."

Paragraph 2: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "I. Introduction" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999). After 21 September 1995 and until 29 April 2000, paragraph 2 read as follows:

> "2. The definition of the term "person" given in subparagraph *a)* is not exhaustive and should be read as indicating that the term "person" is used in a very wide sense (see especially Articles 1 and 4). The definition explicitly mentions individuals, companies and other bodies of persons. From the meaning assigned to the term "company" by the definition contained in subparagraph *b)* it follows that, in addition, the term "person" includes any entity that, although not incorporated, is treated as a body corporate for tax purposes. Thus, *e.g.* a foundation (*fondation*, *Stiftung*) may fall within the meaning of the term "person". Special considerations for the application of the Convention to partnerships are found in paragraphs 2 to 6 of the Commentary on Article 1."

Paragraph 2 was previously amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 3. In the 1977 Model Convention and until 21 September 1995, paragraph 2 read as follows:

> "2. The definition of the term "person" given in subparagraph *a)* is not exhaustive and should be read as indicating that the term "person" is used in a very wide sense (see especially Articles 1 and 4). The definition explicitly mentions individuals, companies and other bodies of persons. From the meaning assigned to

the term "company" by the definition contained in subparagraph *b)* it follows that, in addition, the term "person" includes any entity which, although itself not a body of persons, is treated as a body corporate for tax purposes. Thus, *e.g.* a foundation ("fondation", "Stiftung") may fall within the meaning of the term "person". Special considerations for the application of the Convention to partnerships are found in paragraphs 2 to 6 of the Commentary on Article 1."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. The definition of the term "person" given in subparagraph (b) is in substance similar to the one commonly included in current double taxation Conventions. The provision is not worded as an exhaustive definition and should be read as indicating that the term person is used in a very wide sense (see especially Articles 1 and 4). The definition explicitly mentions individuals, companies and other bodies of persons. From the meaning assigned to the term "company" by the definition contained in sub-paragraph (c) it follows that, in addition, the term "person" comprises any entity which, although itself not a body of persons, is treated as a body corporate for purposes of tax. Thus, *e.g.* a foundation ("fondation", "Stiftung") may fall within the meaning of the term person."

Paragraph 3: Amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 3. In the 1977 Model Convention and until 21 September 1995, paragraph 3 read as follows:

"3. The term "company" means in the first place any body corporate. In addition, the term covers any other taxable unit that is treated as a body corporate according to the tax laws of the Contracting State in which it is organised. The definition is drafted with special regard to the Article on dividends. It should be noted that the term "company" has a bearing only on that Article, paragraph 7 of Article 5, and Article 16."

Paragraph 3 of the 1977 Model Convention corresponded to paragraph 4 of the 1963 Draft Convention. Paragraph 3 of the 1963 Draft Convention was deleted, paragraph 4 of the 1963 Draft Convention was amended and renumbered as paragraph 3 and the heading preceding paragraph 4 was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

"4. The term "company" includes in the first place all corporate bodies. In addition, the term covers other taxable units which are treated as corporate bodies according to the tax laws of the Contracting State in which they are organised. The definition is drafted with special regard to the Article on dividends. It should be noted that the term company has a bearing only on that Article and Article 16 on taxation of directors' fees and paragraph 6 of Article 5 on permanent establishment."

Paragraph 3 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, read as follows:

"3. If differences exist between two Contracting States in the taxation of profits of partnerships or like taxable units, the tax treatment of the partnership or like taxable units on the one hand and of the resident or non-resident partners on the other hand, could give rise to double taxation or non-taxation. In this case special

appropriate provisions should be agreed upon by the Contracting States concerned and adopted in their bilateral relations."

Paragraph 4: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 21 September 1995 and until 29 April 2000, paragraph 4 read as follows:

"4. The question whether an activity is performed within an enterprise or is deemed to constitute in itself an enterprise has always been interpreted according to the provisions of the domestic laws of the Contracting States. No definition of the term "enterprise" has therefore been attempted in this Article."

Paragraph 4 was amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 3. In the 1977 Model Convention and until 21 September 1995, paragraph 4 read as follows:

"4. The question whether an activity is performed within the framework of an enterprise or is deemed to constitute in itself an enterprise has always been interpreted according to the provisions of the domestic laws of the Contracting States. No definition, properly speaking, of the term "enterprise" has therefore been attempted in this Article."

Paragraph 4 of the 1977 Model Convention corresponded to paragraph 5 of the 1963 Draft Convention. Paragraph 4 of the 1963 Draft Convention was amended and renumbered as paragraph 3 (see history of paragraph 3), paragraph 5 of the 1963 Draft Convention was amended and renumbered as paragraph 4 of the 1977 Model Convention and the heading preceding paragraph 5 was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

"5. The question whether an activity is performed within the framework of an enterprise or is deemed to constitute in itself an enterprise has hitherto always been interpreted according to the provisions of the national law of the Contracting States. No definition, properly speaking, of the term "enterprise" has been attempted in this Article; also no such definition can be found in the double taxation Conventions in force."

Paragraph 5: Amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 3. In the 1977 Model Convention and until 21 September 1995, paragraph 5 read as follows:

"5. The definition of the term "international traffic" is based on the principle as set forth in paragraph 1 of Article 8 that the right to tax profits from the operation of ships or aircraft in international traffic resides only in the Contracting State in which the place of effective management is situated in view of the special nature of the international traffic business. However, as stated in the Commentary on paragraph 1 of Article 8, the Contracting States are free on a bilateral basis to insert in subparagraph *d)* the reference to residence, in order to be consistent with the general pattern of the other Articles. In such a case, the words "an enterprise which has its place of effective management in a Contracting State" should be replaced, by "an enterprise of a Contracting State" or "a resident of a Contracting State.""

Paragraph 5 of the 1977 Model Convention replaced paragraph 5 of the 1963 Draft Convention, which was amended and renumbered as paragraph 4 (see history of paragraph 4) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, a new paragraph 5 and the heading preceding it were added.

Paragraph 6: Amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 3. In the 1977 Model Convention and until 21 September 1995, paragraph 6 read as follows:

> "6. It is to be noted that the definition of the term "international traffic" is broader than the term normally signifies. However, this has been deliberate in order to preserve for the State of the place of effective management the right to tax purely domestic traffic as well as international traffic between third States, and to allow the other Contracting State to tax traffic solely within its borders. This intention may be clarified by the following illustration. Suppose an enterprise of a Contracting State or an enterprise which has its place of effective management in a Contracting State, through an agent in the other Contracting State, sells tickets for a passage which is confined wholly within the first-mentioned State or, alternatively, within a third State. The Article does not permit the other State to tax the profits of either voyage. The other State is allowed to tax such an enterprise of the first-mentioned State only where the operations are confined solely to places in that other State."

Paragraph 6 of the 1977 Model Convention replaced paragraph 6 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 6 read as follows:

> "6. The laws of some Member States do not treat a partnership as a taxable unit and, consequently, a partnership as such cannot be regarded as "a resident of a Contracting State" under Article 4 on fiscal domicile; where such a Member State is concerned, it could be maintained that an enterprise carried on by a partnership is not strictly "an enterprise carried on by a resident of a Contracting State". In such a case, it may assist towards a clarification of the meaning of the term "an enterprise of a Contracting State" if each participation in a partnership is looked upon as a separate enterprise, the test being whether the partner holding the participation is a resident of the one or the other Contracting State or of a third State. The Member States concerned may consider adopting this line of interpretation in bilateral relations."

Paragraph 6.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 6.2: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 6.3: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 6.3 read as follows:

> "6.3 The definition of "international traffic" does not apply to any transport when the ship is operated between two places in the same Contracting State, even if part of the transport takes place outside that State. Thus, for example, a cruise beginning and ending in the same Contracting State without a stop in a foreign port does not constitute a transport of passengers in international traffic.

Contracting States wishing to expressly clarify that point in their conventions may agree bilaterally to amend the definition accordingly"

Paragraph 6.3 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 7: Amended on 21 September 1995 when a number of minor drafting changes that did not affect the meaning of the text were made to the Commentary on Article 3. In the 1977 Model Convention and until 21 September 1995, paragraph 7 read as follows:

"7. The definition of the term "competent authority" has regard to the fact that in some OECD member countries the execution of double taxation conventions does not exclusively fall within the competence of the highest tax authorities but that some matters are reserved or may be delegated to other authorities. The present definition enables each Contracting State to nominate one or more authorities as being competent."

Paragraph 7 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 7 read as follows:

"7. The definition of the term "competent authorities" has regard to the fact that in some O.E.C.D. Member countries the execution of double taxation Conventions does not exclusively fall within the competence of the highest fiscal authorities, but that some matters are reserved or may be delegated to other authorities. The present definition enables each Contracting State to nominate one or more authorities as being competent."

Paragraph 8: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 8 read as follows:

"8. The definition of the term "national" merely stipulates that the term applies to any individual possessing the nationality of a Contracting State. It was not judged necessary to include in the text of the Convention any more precise definition of nationality, nor did it seem indispensable to make any special comment on the meaning and application of the word. Obviously, in determining what is meant by "the nationals of a Contracting State" in relation to individuals, reference must be made to the sense in which the term is usually employed and each State's particular rules on the acquisition or loss of nationality."

Paragraph 8, as it read after 23 July 1992, corresponded to paragraph 11 of the Commentary on Article 24 of the 1977 Model Convention. Paragraph 8 was amended and renumbered paragraph 11 (see history of paragraph 11) and the heading preceding paragraph 8 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. At the same time, paragraph 11 of the Commentary on Article 24 was amended and renumbered as paragraph 8 of the Commentary on Article 3 and the heading preceding paragraph 8 (The term "national"), was added. The renumbering and amendment of paragraph 11 of the Commentary on Article 24 on 23 July 1992 was a consequence of the redesignation of paragraph 2 of Article 24 as subparagraph 1 *f)* of Article 3 (see history of subparagraph 1 *f)* of Article 3 of the Model Convention). In the 1977 Model Convention and until 23 July 1992, paragraph 11 of the Commentary on Article 24 and the heading preceding it read as follows:

"Paragraph 2

11. Paragraph 2 merely stipulates that the term "nationals" applies to all individuals possessing the nationality of a Contracting State. It has not been judged necessary here to introduce into the text of the Article any considerations on the signification of the concept of nationality, any more than it seemed indispensable to make any special comment here on the meaning and application of the word. Obviously, in determining in relation to individuals, what is meant by "the nationals of a Contracting State", reference must be made to the sense in which the term is usually employed and each State's particular rules on the acquisition or loss of nationality."

Paragraph 11 of the Commentary on Article 24 of the 1977 Model Convention corresponded to paragraph 10 of the Commentary on Article 24 of the 1963 Draft Convention. Paragraph 11 of the 1963 Draft Convention was amended and renumbered as paragraph 12 (see history of paragraph 9 of the Commentary on Article 24) and paragraph 10 of the 1963 Draft Convention was amended and renumbered as paragraph 11 of the 1977 Model Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 10 read as follows:

"10. The purpose of paragraph 2 is more to specify the content of the expression "nationals" used in paragraph 1 than to define it. It merely stipulates in a customary formula that this expression applies to all individuals possessing the nationality of one of the Contracting States. It has not been judged necessary here to introduce into the text of the Article any considerations on the signification of the concept of nationality, any more than it seemed indispensable to make any special comment here on the meaning and application of the word. Obviously, in determining, in relation to individuals, what is meant by "the nationals of a Contracting State", reference must be made to the sense in which the term is usually employed and each State's particular rules on the acquisition or loss of nationality."

Paragraph 9: Paragraph 9 as it read after 23 July 1992, corresponded to paragraph 12 of the Commentary on Article 24 of the 1977 Model Convention. Paragraph 9 was amended and renumbered as paragraph 14 (see history of paragraph 14) and paragraph 12 of the Commentary on Article 24 was amended and renumbered as paragraph 9 of the Commentary on Article 3 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. The renumbering and amendment of paragraph 12 of the Commentary on Article 24 on 23 July 1992 was a consequence of the redesignation of paragraph 2 of Article 24 as subparagraph 1*f)* of Article 3 (see history of subparagraph 1 *f)* of Article 3 of the Model Convention). In the 1977 Model Convention and until 23 July 1992, paragraph 12 of the Commentary on Article 24 read as follows:

"12. But paragraph 2 is more specific as to legal persons, partnerships and associations. By declaring that all legal persons, partnerships and associations deriving their status as such from the laws in force in a Contracting State are considered to be nationals for the purposes of paragraph 1, the provision disposes of a difficulty which often arises in determining the nationality of companies. In defining the nationality of companies, certain States have regard less to the law which governs the company than to the origin of the capital with which the company was formed or the nationality of the individuals or legal persons controlling it."

Paragraph 12 of the 1977 Model Convention corresponded to paragraph 11 of the 1963 Draft Convention. Paragraph 12 of the 1963 Draft Convention was amended and renumbered as paragraph 13 of the Commentary on Article 24 (see history of paragraph 13 of the Commentary on Article 24) and paragraph 11 of the 1963 Draft

Convention was amended and renumbered as paragraph 12 of the 1977 Model Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 11 read as follows:

> "11. But paragraph 2 is more specific as to legal persons, partnerships and associations. By declaring that all legal persons, partnerships and associations deriving their status as such from the law in force in a Contracting State are considered to be nationals for the purposes of paragraph 1 of the Article, the provision disposes of a difficulty which often arises in determining the nationality of companies. In defining the nationality of companies, certain States have regard less to the law which governs the company than to the origin of the capital with which the company was formed or the nationality of the individuals or legal persons controlling it. No ambiguity need be apprehended therefore."

Paragraph 10: Corresponds to paragraph 13 of the Commentary on Article 24 of the 1977 Model Convention. Paragraph 10 of the 1977 Model Convention was deleted and paragraph 13 of the Commentary on Article 24 was amended and renumbered as paragraph 10 of the Commentary on Article 3 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. The renumbering and amendment of paragraph 13 of the Commentary on Article 24 on 23 July 1992 was a consequence of the redesignation of paragraph 2 of Article 24 as subparagraph 1 *f)* of Article 3 (see history of subparagraph 1 *f)* of Article 3 of the Model Convention). In the 1977 Model Convention and until 23 July 1992, paragraph 13 of the Commentary on Article 24 read as follows:

> "13. Moreover, in view of the legal relationship created between the company and the State under whose law it is constituted, which from certain points of view is closely akin to the relationship of nationality in the case of individuals, it seems justifiable not to deal with legal persons, partnerships and associations in a special provision, but to assimilate them with individuals under the term "nationals"."

Paragraph 13 of the Commentary on Article 24 of the 1977 Model Convention corresponded to paragraph 12 of the Commentary on Article 24 of the 1963 Draft Convention. Paragraph 12 was amended and renumbered as paragraph 13 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 12 of the Commentary on Article 24 read as follows:

> "12. Moreover, in view of the legal relationship created between the company and the State under whose law it is constituted, which from certain points of view is closely akin to the relationship of nationality in the case on individuals, it seems justifiable not to deal with legal persons, partnerships and associations in a special provision, but to bring them under the same term with individuals."

Paragraph 10 of the 1977 Model Convention was deleted on 23 July 1992 and the heading preceding paragraph 10 was moved immediately before paragraph 15 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 10 read as follows:

> "10. *Belgium* reserves the right to vary, in its conventions, subparagraph *b)* of paragraph 1 of Article 3, and paragraph 1 of Article 4, so as to make it clear that partnerships constituted under Belgian law must be treated as residents of Belgium, in view of the twofold fact that they are legal persons and that their world income is in all cases subject to tax in Belgium."

Paragraph 10 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 10.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "I. Introduction" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 10.2: Added on 29 April 2000 with the heading preceding it by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000).

Paragraph 11: Amended on 21 September 1995, by adding at the end of the paragraph the words ", and in 1995 amended the Model to make this point explicitly", by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 11 read as follows:

> "11. This paragraph provides a general rule of interpretation for terms used in the Convention but not defined therein. However, the question arises which legislation must be referred to in order to determine the meaning of terms not defined in the Convention, the choice being between the legislation in force when the Convention was signed or that in force when the Convention is being applied, *i.e.* when the tax is imposed. The Committee on Fiscal Affairs concluded that the latter interpretation should prevail."

Paragraph 11 as it read after 23 July 1992 corresponded to paragraph 8 of the 1977 Model Convention. Paragraph 8 of the 1977 Model Convention was amended and renumbered as paragraph 11 and the heading preceding paragraph 8 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 8 read as follows:

> "8. This paragraph provides a general rule of interpretation in respect of terms used in the Convention but not defined therein."

Paragraph 8 of the 1977 Model Convention, replaced paragraph 8 of the 1963 Draft Convention, which was deleted, when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 8 read as follows:

> "8. The rule of interpretation laid down in paragraph 2 corresponds to similar provisions normally appearing in double taxation Conventions. The rule of interpretation in paragraph 2 of Article 6 on the taxation of income from immovable property, which has to be regarded as "lex specialis" is in no way affected by the present general rule of interpretation."

Paragraph 12: Added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 13: Added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 13.1: Added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 14: Replaced paragraph 14 as it read before 29 April 2000. Paragraph 14 and the heading preceding it were deleted, a new paragraph 14 was added and the heading preceding paragraph 15 was moved immediately before paragraph 14 by the report

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

entitled “The 2000 Update to the Model Tax Convention”, adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 14 and the heading preceding it read as follows:

> *“Observation on the Commentary*
>
> 14. For the purposes of Articles 10, 11 and 12, *New Zealand* would wish to treat dividends, interest and royalties in respect of which a trustee is subject to tax in the State of which he is a resident as being beneficially owned by that trustee.”

Paragraph 14 as it read after 23 July 1992 corresponded to paragraph 9 of the 1977 Model Convention. Paragraph 9 of the 1977 Model Convention was renumbered as paragraph 14 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 9 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 15: Amended on 22 July 2010, by adding Chile to the list of countries making the reservation, by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 15 read as follows:

> “15. *Mexico* and the *United States* reserve the right to omit the phrase “operated by an enterprise that has its place of effective management in a Contracting State” from the definition of “international traffic” in subparagraph *e)* of paragraph 1.”

Paragraph 15 was previously amended on 15 July 2005 by adding Mexico as a country making the reservation, by the report entitled the 2005 Update to the Model Tax Convention, adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 15 read as follows:

> “15. The *United States* reserves the right to omit the phrase “operated by an enterprise that has its place of effective management in a Contracting State” from the definition of “international traffic” in subparagraph *e)* of paragraph 1.”

Paragraph 15 was added on 29 April 2000 and the heading preceding paragraph 15 was moved immediately before paragraph 14 by the report entitled “The 2000 Update to the Model Tax Convention”, adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 15 was deleted on 21 September 1995 by the report entitled “The 1995 Update to the Model Tax Convention”, adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 15 read as follows:

> “15. *France* reserves the right to specify in paragraph 2 that for the purposes of the Convention, the meaning that a term or expression has under taxation law will prevail over any other meanings that the term or the expression may have under other branches of the law.”

Paragraph 15 was added on 23 July 1992 and the heading preceding paragraph 10 of the 1977 Model Convention was moved immediately before paragraph 15 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 16: Deleted on 28 January 2003 by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 16 read as follows:

> “16. *Ireland* reserves the right to omit the final phrase of paragraph 2, which gives tax law precedence over other laws.”

Paragraph 16 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

COMMENTARY ON ARTICLE 4 CONCERNING THE DEFINITION OF RESIDENT

I. Preliminary remarks

1. The concept of "resident of a Contracting State" has various functions and is of importance in three cases:

a) in determining a convention's personal scope of application;

b) in solving cases where double taxation arises in consequence of double residence;

c) in solving cases where double taxation arises as a consequence of taxation in the State of residence and in the State of source or situs.

(Amended on 11 April 1977; see HISTORY)

2. The Article is intended to define the meaning of the term "resident of a Contracting State" and to solve cases of double residence. To clarify the scope of the Article some general comments are made below referring to the two typical cases of conflict, *i.e.* between two residences and between residence and source or situs. In both cases the conflict arises because, under their domestic laws, one or both Contracting States claim that the person concerned is resident in their territory.

(Amended on 11 April 1977; see HISTORY)

3. Generally the domestic laws of the various States impose a comprehensive liability to tax — "full tax liability" — based on the taxpayers' personal attachment to the State concerned (the "State of residence"). This liability to tax is not imposed only on persons who are "domiciled" in a State in the sense in which "domicile" is usually taken in the legislations (private law). The cases of full liability to tax are extended to comprise also, for instance, persons who stay continually, or maybe only for a certain period, in the territory of the State. Some legislations impose full liability to tax on individuals who perform services on board ships which have their home harbour in the State.

(Amended on 11 April 1977; see HISTORY)

4. Conventions for the avoidance of double taxation do not normally concern themselves with the domestic laws of the Contracting States laying down the conditions under which a person is to be treated fiscally as "resident" and, consequently, is fully liable to tax in that State. They do not lay down standards which the provisions of the domestic laws on "residence" have to fulfil in order that claims for full tax liability can be accepted between

the Contracting States. In this respect the States take their stand entirely on the domestic laws.

(Amended on 11 April 1977; see HISTORY)

5. This manifests itself quite clearly in the cases where there is no conflict at all between two residences, but where the conflict exists only between residence and source or situs. But the same view applies in conflicts between two residences. The special point in these cases is only that no solution of the conflict can be arrived at by reference to the concept of residence adopted in the domestic laws of the States concerned. In these cases special provisions must be established in the Convention to determine which of the two concepts of residence is to be given preference.

(Amended on 11 April 1977; see HISTORY)

6. An example will elucidate the case. An individual has his permanent home in State A, where his wife and children live. He has had a stay of more than six months in State B and according to the legislation of the latter State he is, in consequence of the length of the stay, taxed as being a resident of that State. Thus, both States claim that he is fully liable to tax. This conflict has to be solved by the Convention.

(Amended on 11 April 1977; see HISTORY)

7. In this particular case the Article (under paragraph 2) gives preference to the claim of State A. This does not, however, imply that the Article lays down special rules on "residence" and that the domestic laws of State B are ignored because they are incompatible with such rules. The fact is quite simply that in the case of such a conflict a choice must necessarily be made between the two claims, and it is on this point that the Article proposes special rules.

(Amended on 11 April 1977; see HISTORY)

II. Commentary on the provisions of the Article

Paragraph 1

8. Paragraph 1 provides a definition of the expression "resident of a Contracting State" for the purposes of the Convention. The definition refers to the concept of residence adopted in the domestic laws (see Preliminary remarks). As criteria for the taxation as a resident the definition mentions: domicile, residence, place of management or any other criterion of a similar nature. As far as individuals are concerned, the definition aims at covering the various forms of personal attachment to a State which, in the domestic taxation laws, form the basis of a comprehensive taxation (full liability to tax). It also covers cases where a person is deemed, according to the taxation laws

of a State, to be a resident of that State and on account thereof is fully liable to tax therein (*e.g.* diplomats or other persons in government service).

(Amended on 11 April 1977; see HISTORY)

8.1 In accordance with the provisions of the second sentence of paragraph 1, however, a person is not to be considered a "resident of a Contracting State" in the sense of the Convention if, although not domiciled in that State, he is considered to be a resident according to the domestic laws but is subject only to a taxation limited to the income from sources in that State or to capital situated in that State. That situation exists in some States in relation to individuals, *e.g.* in the case of foreign diplomatic and consular staff serving in their territory.

(Replaced on 17 July 2008; see HISTORY)

8.2 According to its wording and spirit the second sentence also excludes from the definition of a resident of a Contracting State foreign held companies exempted from tax on their foreign income by privileges tailored to attract conduit companies. It also excludes companies and other persons who are not subject to comprehensive liability to tax in a Contracting State because these persons, whilst being residents of that State under that State's tax law, are considered to be residents of another State pursuant to a treaty between these two States. The exclusion of certain companies or other persons from the definition would not of course prevent Contracting States from exchanging information about their activities (see paragraph 2 of the Commentary on Article 26). Indeed States may feel it appropriate to develop spontaneous exchanges of information about persons who seek to obtain unintended treaty benefits.

(Replaced on 17 July 2008; see HISTORY)

8.3 The application of the second sentence, however, has inherent difficulties and limitations. It has to be interpreted in the light of its object and purpose, which is to exclude persons who are not subjected to comprehensive taxation (full liability to tax) in a State, because it might otherwise exclude from the scope of the Convention all residents of countries adopting a territorial principle in their taxation, a result which is clearly not intended.

(Replaced on 17 July 2008; see HISTORY)

8.4 It has been the general understanding of most member countries that the government of each State, as well as any political subdivision or local authority thereof, is a resident of that State for purposes of the Convention. Before 1995, the Model did not explicitly state this; in 1995, Article 4 was amended to conform the text of the Model to this understanding.

(Renumbered on 17 July 2008; see HISTORY)

8.5 This raises the issue of the application of paragraph 1 to sovereign wealth funds, which are special purpose investment funds or arrangements created by a State or a political subdivision for macroeconomic purposes. These funds hold, manage or administer assets to achieve financial objectives, and employ a set of investment strategies which include investing in foreign financial assets. They are commonly established out of balance of payments surpluses, official foreign currency operations, the proceeds of privatisations, fiscal surpluses or receipts resulting from commodity exports.[1] Whether a sovereign wealth fund qualifies as a "resident of a Contracting State" depends on the facts and circumstances of each case. For example, when a sovereign wealth fund is an integral part of the State, it will likely fall within the scope of the expression "[the] State and any political subdivision or local authority thereof" in Article 4. In other cases, paragraphs 8.6 and 8.7 below will be relevant. States may want to address the issue in the course of bilateral negotiations, particularly in relation to whether a sovereign wealth fund qualifies as a "person" and is "liable to tax" for purposes of the relevant tax treaty (see also paragraphs 6.35 to 6.39 of the Commentary on Article 1).

(Replaced on 22 July 2010; see HISTORY)

8.6 Paragraph 1 refers to persons who are "liable to tax" in a Contracting State under its laws by reason of various criteria. In many States, a person is considered liable to comprehensive taxation even if the Contracting State does not in fact impose tax. For example, pension funds, charities and other organisations may be exempted from tax, but they are exempt only if they meet all of the requirements for exemption specified in the tax laws. They are, thus, subject to the tax laws of a Contracting State. Furthermore, if they do not meet the standards specified, they are also required to pay tax. Most States would view such entities as residents for purposes of the Convention (see, for example, paragraph 1 of Article 10 and paragraph 5 of Article 11).

(Renumbered on 22 July 2010; see HISTORY)

8.7 In some States, however, these entities are not considered liable to tax if they are exempt from tax under domestic tax laws. These States may not regard such entities as residents for purposes of a convention unless these entities are expressly covered by the convention. Contracting States taking this view are free to address the issue in their bilateral negotiations.

(Renumbered on 22 July 2010; see HISTORY)

8.8 Where a State disregards a partnership for tax purposes and treats it as fiscally transparent, taxing the partners on their share of the partnership

1 This definition is drawn from: International Working Group of Sovereign Wealth Funds, Sovereign Wealth Funds — Generally Accepted Principles and Practices — *"Santiago Principles"*, October 2008, Annex 1.

income, the partnership itself is not liable to tax and may not, therefore, be considered to be a resident of that State. In such a case, since the income of the partnership "flows through" to the partners under the domestic law of that State, the partners are the persons who are liable to tax on that income and are thus the appropriate persons to claim the benefits of the conventions concluded by the States of which they are residents. This latter result will be achieved even if, under the domestic law of the State of source, the income is attributed to a partnership which is treated as a separate taxable entity. For States which could not agree with this interpretation of the Article, it would be possible to provide for this result in a special provision which would avoid the resulting potential double taxation where the income of the partnership is differently allocated by the two States.

(Renumbered on 22 July 2010; see HISTORY)

Paragraph 2

9. This paragraph relates to the case where, under the provisions of paragraph 1, an individual is a resident of both Contracting States.

(Renumbered and amended on 11 April 1977; see HISTORY)

10. To solve this conflict special rules must be established which give the attachment to one State a preference over the attachment to the other State. As far as possible, the preference criterion must be of such a nature that there can be no question but that the person concerned will satisfy it in one State only, and at the same time it must reflect such an attachment that it is felt to be natural that the right to tax devolves upon that particular State. The facts to which the special rules will apply are those existing during the period when the residence of the taxpayer affects tax liability, which may be less than an entire taxable period. For example, in one calendar year an individual is a resident of State A under that State's tax laws from 1 January to 31 March, then moves to State B. Because the individual resides in State B for more than 183 days, the individual is treated by the tax laws of State B as a State B resident for the entire year. Applying the special rules to the period 1 January to 31 March, the individual was a resident of State A. Therefore, both State A and State B should treat the individual as a State A resident for that period, and as a State B resident from 1 April to 31 December.

(Amended on 21 September 1995; see HISTORY)

11. The Article gives preference to the Contracting State in which the individual has a permanent home available to him. This criterion will frequently be sufficient to solve the conflict, *e.g.* where the individual has a

permanent home in one Contracting State and has only made a stay of some length in the other Contracting State.

(Amended on 11 April 1977; see HISTORY)

12. Subparagraph *a)* means, therefore, that in the application of the Convention (that is, where there is a conflict between the laws of the two States) it is considered that the residence is that place where the individual owns or possesses a home; this home must be permanent, that is to say, the individual must have arranged and retained it for his permanent use as opposed to staying at a particular place under such conditions that it is evident that the stay is intended to be of short duration.

(Replaced on 11 April 1977; see HISTORY)

13. As regards the concept of home, it should be observed that any form of home may be taken into account (house or apartment belonging to or rented by the individual, rented furnished room). But the permanence of the home is essential; this means that the individual has arranged to have the dwelling available to him at all times continuously, and not occasionally for the purpose of a stay which, owing to the reasons for it, is necessarily of short duration (travel for pleasure, business travel, educational travel, attending a course at a school, etc.).

(Replaced on 11 April 1977; see HISTORY)

14. If the individual has a permanent home in both Contracting States, paragraph 2 gives preference to the State with which the personal and economic relations of the individual are closer, this being understood as the centre of vital interests. In the cases where the residence cannot be determined by reference to this rule, paragraph 2 provides as subsidiary criteria, first, habitual abode, and then nationality. If the individual is a national of both States or of neither of them, the question shall be solved by mutual agreement between the States concerned according to the procedure laid down in Article 25.

(Amended on 11 April 1977; see HISTORY)

15. If the individual has a permanent home in both Contracting States, it is necessary to look at the facts in order to ascertain with which of the two States his personal and economic relations are closer. Thus, regard will be had to his family and social relations, his occupations, his political, cultural or other activities, his place of business, the place from which he administers his property, etc. The circumstances must be examined as a whole, but it is nevertheless obvious that considerations based on the personal acts of the individual must receive special attention. If a person who has a home in one State sets up a second in the other State while retaining the first, the fact that

he retains the first in the environment where he has always lived, where he has worked, and where he has his family and possessions, can, together with other elements, go to demonstrate that he has retained his centre of vital interests in the first State.

(Replaced on 11 April 1977; see HISTORY)

16. Subparagraph *b)* establishes a secondary criterion for two quite distinct and different situations:

- *a)* the case where the individual has a permanent home available to him in both Contracting States and it is not possible to determine in which one he has his centre of vital interests;
- *b)* the case where the individual has a permanent home available to him in neither Contracting State.

Preference is given to the Contracting State where the individual has an habitual abode.

(Replaced on 11 April 1977; see HISTORY)

17. In the first situation, the case where the individual has a permanent home available to him in both States, the fact of having an habitual abode in one State rather than in the other appears therefore as the circumstance which, in case of doubt as to where the individual has his centre of vital interests, tips the balance towards the State where he stays more frequently. For this purpose regard must be had to stays made by the individual not only at the permanent home in the State in question but also at any other place in the same State.

(Replaced on 11 April 1977; see HISTORY)

18. The second situation is the case of an individual who has a permanent home available to him in neither Contracting State, as for example, a person going from one hotel to another. In this case also all stays made in a State must be considered without it being necessary to ascertain the reasons for them.

(Replaced on 11 April 1977; see HISTORY)

19. In stipulating that in the two situations which it contemplates preference is given to the Contracting State where the individual has an habitual abode, subparagraph *b)* does not specify over what length of time the comparison must be made. The comparison must cover a sufficient length of time for it to be possible to determine whether the residence in each of the two States is habitual and to determine also the intervals at which the stays take place.

(Replaced on 11 April 1977; see HISTORY)

20. Where, in the two situations referred to in subparagraph *b)* the individual has an habitual abode in both Contracting States or in neither, preference is given to the State of which he is a national. If, in these cases still, the individual is a national of both Contracting States or of neither of them, subparagraph *d)* assigns to the competent authorities the duty of resolving the difficulty by mutual agreement according to the procedure established in Article 25.

(Replaced on 11 April 1977; see HISTORY)

Paragraph 3

21. This paragraph concerns companies and other bodies of persons, irrespective of whether they are or not legal persons. It may be rare in practice for a company, etc. to be subject to tax as a resident in more than one State, but it is, of course, possible if, for instance, one State attaches importance to the registration and the other State to the place of effective management. So, in the case of companies, etc., also, special rules as to the preference must be established.

(Renumbered and amended on 11 April 1977; see HISTORY)

22. It would not be an adequate solution to attach importance to a purely formal criterion like registration. Therefore paragraph 3 attaches importance to the place where the company, etc. is actually managed.

(Renumbered and amended on 11 April 1977; see HISTORY)

23. The formulation of the preference criterion in the case of persons other than individuals was considered in particular in connection with the taxation of income from shipping, inland waterways transport and air transport. A number of conventions for the avoidance of double taxation on such income accord the taxing power to the State in which the "place of management" of the enterprise is situated; other conventions attach importance to its "place of effective management", others again to the "fiscal domicile of the operator".

(Amended on 23 July 1992; see HISTORY)

24. As a result of these considerations, the "place of effective management" has been adopted as the preference criterion for persons other than individuals. The place of effective management is the place where key management and commercial decisions that are necessary for the conduct of the entity's business as a whole are in substance made. All relevant facts and circumstances must be examined to determine the place of effective management. An entity may have more than one place of management, but it can have only one place of effective management at any one time.

(Amended on 17 July 2008; see HISTORY)

24.1 Some countries, however, consider that cases of dual residence of persons who are not individuals are relatively rare and should be dealt with on a case-by-case basis. Some countries also consider that such a case-by-case approach is the best way to deal with the difficulties in determining the place of effective management of a legal person that may arise from the use of new communication technologies. These countries are free to leave the question of the residence of these persons to be settled by the competent authorities, which can be done by replacing the paragraph by the following provision:

> 3. Where by reason of the provisions of paragraph 1 a person other than an individual is a resident of both Contracting States, the competent authorities of the Contracting States shall endeavour to determine by mutual agreement the Contracting State of which such person shall be deemed to be a resident for the purposes of the Convention, having regard to its place of effective management, the place where it is incorporated or otherwise constituted and any other relevant factors. In the absence of such agreement, such person shall not be entitled to any relief or exemption from tax provided by this Convention except to the extent and in such manner as may be agreed upon by the competent authorities of the Contracting State.

Competent authorities having to apply such a provision to determine the residence of a legal person for purposes of the Convention would be expected to take account of various factors, such as where the meetings of its board of directors or equivalent body are usually held, where the chief executive officer and other senior executives usually carry on their activities, where the senior day-to-day management of the person is carried on, where the person's headquarters are located, which country's laws govern the legal status of the person, where its accounting records are kept, whether determining that the legal person is a resident of one of the Contracting States but not of the other for the purpose of the Convention would carry the risk of an improper use of the provisions of the Convention etc. Countries that consider that the competent authorities should not be given the discretion to solve such cases of dual residence without an indication of the factors to be used for that purpose may want to supplement the provision to refer to these or other factors that they consider relevant. Also, since the application of the provision would normally be requested by the person concerned through the mechanism provided for under paragraph 1 of Article 25, the request should be made within three years from the first notification to that person that its taxation is not in accordance with the Convention since it is considered to be a resident of both Contracting States. Since the facts on which a decision will be based may change over time, the competent authorities that reach a

decision under that provision should clarify which period of time is covered by that decision.

(Added on 17 July 2008; see HISTORY)

Observations on the Commentary

25. As regards paragraphs 24 and 24.1, *Italy* holds the view that the place where the main and substantial activity of the entity is carried on is also to be taken into account when determining the place of effective management of a person other than an individual.

(Amended on 17 July 2008; see HISTORY)

26. *Spain*, due to the fact that according to its internal law the fiscal year coincides with the calendar year and there is no possibility of concluding the fiscal period by reason of the taxpayer's change of residence, will not be able to proceed in accordance with paragraph 10 of the Commentary on Article 4. In this case, a mutual agreement procedure will be needed to ascertain the date from which the taxpayer will be deemed to be a resident of one of the Contracting States.

(Replaced on 21 September 1995; see HISTORY)

26.1 *Mexico* does not agree with the general principle expressed in paragraph 8.8 of the Commentary according to which if tax owed by a partnership is determined on the basis of the personal characteristics of the partners, these partners are entitled to the benefits of tax conventions entered into by the States of which they are residents as regards income that "flows through" that partnership.

(Amended on 17 July 2008; see HISTORY)

26.2 *(Deleted on 17 July 2008; see HISTORY)*

26.3 *France* considers that the definition of the place of effective management in paragraph 24, according to which "the place of effective management is the place where key management and commercial decisions that are necessary for the conduct of the entity's business as a whole are in substance made", will generally correspond to the place where the person or group of persons who exercises the most senior functions (for example a board of directors or management board) makes its decisions. It is the place where the organs of direction, management and control of the entity are, in fact, mainly located.

(Added on 17 July 2008; see HISTORY)

26.4 As regards paragraph 24, *Hungary* is of the opinion that in determining the place of effective management, one should not only consider the place where key management and commercial decisions that are necessary for the

conduct of the entity's business as a whole are in substance made, but should also take into account the place where the chief executive officer and other senior executives usually carry on their activities as well as the place where the senior day-to-day management of the enterprise is usually carried on.

(Added on 17 July 2008; see HISTORY)

Reservations on the Article

27. *Canada* reserves the right to use as the test for paragraph 3 the place of incorporation or organisation with respect to a company and, failing that, to deny dual resident companies the benefits under the Convention.

(Amended on 29 April 2000; see HISTORY)

28. *Japan* and *Korea* reserve their position on the provisions in this and other Articles in the *Model Tax Convention* which refer directly or indirectly to the place of effective management. Instead of the term "place of effective management", these countries wish to use in their conventions the term "head or main office".

(Amended on 23 October 1997; see HISTORY)

29. *France* does not agree with the general principle according to which if tax owed by a partnership is determined on the basis of the personal characteristics of the partners, these partners are entitled to the benefits of tax conventions entered into by the States of which they are residents as regards income that "flows through" that partnership. For this reason, France reserves the right to amend the Article in its tax conventions in order to specify that French partnerships must be considered as residents of France in view of their legal and tax characteristics and to indicate in which situations and under which conditions flow-through partnerships located in the other Contracting State or in a third State will be entitled to benefit from the recognition by France of their flow-through nature.

(Amended on 29 April 2000; see HISTORY)

30. *Turkey* reserves the right to use the "registered office" criterion (legal head office) as well as the "place of effective management" criterion for determining the residence of a person, other than an individual, which is a resident of both Contracting States because of the provisions of paragraph 1 of the Article.

(Renumbered on 21 September 1995; see HISTORY)

31. The *United States* reserves the right to use a place of incorporation test for determining the residence of a corporation, and, failing that, to deny dual resident companies certain benefits under the Convention.

(Amended on 17 July 2008; see HISTORY)

32. *Germany* reserves the right to include a provision under which a partnership that is not a resident of a Contracting State according to the provisions of paragraph 1 is deemed to be a resident of the Contracting State where the place of its effective management is situated, but only to the extent that the income derived from the other Contracting State or the capital situated in that other State is liable to tax in the first-mentioned State.

(Replaced on 29 April 2000; see HISTORY)

HISTORY

Title: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the heading read as follows:

"COMMENTARY ON ARTICLE 4 CONCERNING FISCAL DOMICILE"

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 and the heading preceding it read as follows:

"GENERAL COMMENTS

1. The concept of "domicile" has various functions and is of importance in three cases:

a) in determining a Convention's field of application with respect to physical and legal persons;

b) in solving cases where double taxation arises in consequence of double domicile;

c) in solving cases where double taxation arises as a consequence of conflict between domicile and source."

Paragraph 2: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. The Article is intended only to define the meaning of the term "resident of a Contracting State" and to solve cases of conflict between two domiciles. For further elucidation of the Article some general comments are made below referring to the two typical cases of conflict, *i.e.* between two domiciles and between domicile and source. In both cases the conflict arises because, under their internal legislation, one or both Contracting States claim that the person concerned has his domicile in their territories."

Paragraph 3: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. Generally the national legislations of the various States impose a comprehensive liability to tax — "full tax liability" based on the taxpayers' personal attachment to the State concerned (the State of "domicile"). This liability to tax is not imposed only on persons who are "domiciled" in a State in the sense in which "domicile" is usually taken in the legislations (civil law). The cases of full liability to tax are extended to comprise also, for instance, persons who stay continually, or maybe only for a certain period, in the territory of the State. Some legislations impose full liability to tax on individuals who perform services on board ships which have their home port in the State."

Paragraph 4: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

"4. Conventions for the avoidance of double taxation do not normally concern themselves with the national rules of law of the Contracting States laying down the cases in which a person is to be treated fiscally as "domiciled" and, consequently, is "fully liable to taxation" in that State. They do not lay down standards which the national rules of law on "domicile" have to fulfil in order that claims for full tax liability can be accepted between the Contracting States. In this respect the States take their stand entirely on the national legislations."

Paragraph 5: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

"5. This manifests itself quite clearly in the cases where there is no conflict at all between two domiciles, but where the conflict exists only between domicile and source. But the same view applies in conflicts between two domiciles. The special point in these cases is only that no solution of the conflict can be arrived at by reference to the concept of domicile adopted in the national laws of the States concerned. In these cases special provisions must be established in the Convention to determine which of the two concepts of domicile is to be given preference."

Paragraph 6: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 6 read as follows:

"6. An example will elucidate the case. An individual has his permanent home in State A, where his wife and children live. He has had a stay of more than six months in State B and according to the legislation of the latter State he is, in consequence of the length of the stay, taxed as being domiciled in that State. Thus, both States claim that he is fully liable to tax. This conflict has to be solved by the Convention."

Paragraph 7: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 7 read as follows:

"7. In this particular case the Article (under paragraph 2) gives preference to the claim of State A. This does not, however, imply that the Article lays down special rules on "domicile" and that the national rules of law of State B are ignored because they are incompatible with such rules. The fact is quite simply that in the case of such a conflict a choice must necessarily be made between the two claims, and it is on this point that the Article proposes special rules."

Paragraph 8: Corresponds to the first five sentences of paragraph 8 as they read before 17 July 2008. The sixth and seventh sentences were incorporated into paragraph 8.1, the ninth sentence was amended and incorporated into paragraph 8.3 and the eighth, penultimate and final sentences were amended and incorporated into paragraph 8.2 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 July 1992 and until 17 July 2008, paragraph 8 read as follows:

> "8. Paragraph 1 provides a definition of the expression "resident of a Contracting State" for the purposes of the Convention. The definition refers to the concept of residence adopted in the domestic laws (cf. Preliminary remarks). As criteria for the taxation as a resident the definition mentions: domicile, residence, place of management or any other criterion of a similar nature. As far as individuals are concerned, the definition aims at covering the various forms of personal attachment to a State which, in the domestic taxation laws, form the basis of a comprehensive taxation (full liability to tax). It also covers cases where a person is deemed, according to the taxation laws of a State, to be a resident of that State and on account thereof is fully liable to tax therein (*e.g.* diplomats or other persons in government service). In accordance with the provisions of the second sentence of paragraph 1, however, a person is not to be considered a "resident of a Contracting State" in the sense of the Convention if, although not domiciled in that State, he is considered to be a resident according to the domestic laws but is subject only to a taxation limited to the income from sources in that State or to capital situated in that State. That situation exists in some States in relation to individuals, *e.g.* in the case of foreign diplomatic and consular staff serving in their territory. According to its wording and spirit the provision would also exclude from the definition of a resident of a Contracting State foreign-held companies exempted from tax on their foreign income by privileges tailored to attract conduit companies. This, however, has inherent difficulties and limitations. Thus it has to be interpreted restrictively because it might otherwise exclude from the scope of the Convention all residents of countries adopting a territorial principle in their taxation, a result which is clearly not intended. The exclusion of certain companies from the definition would not of course prevent Contracting States from exchanging information about their activities (cf. paragraph 2 of the Commentary on Article 26). Indeed States may feel it appropriate to develop spontaneous exchanges of information about companies which seek to obtain treaty benefits unintended by the Model Convention."

Paragraph 8 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992 on the basis of paragraph 14 of a previous report entitled "Double Taxation Conventions and the Use of Conduit Companies" (adopted by the OECD Council on 27 November 1986). In the 1977 Model Convention and until 23 July 1992, paragraph 8 read as follows:

> "8. Paragraph 1 provides a definition of the expression "resident of a Contracting State" for the purposes of the Convention. The definition refers to the concept of residence adopted in the domestic laws (cf. Preliminary Remarks). As criteria for the taxation as a resident the definition mentions: domicile, residence, place of management or any other criterion of a similar nature. As far as individuals are concerned, the definition aims at covering the various forms of personal attachment to a State which, in the domestic taxation laws, form the basis of a comprehensive taxation (full liability to tax). It also covers cases where a person is deemed, according to the taxation laws of a State, to be a resident of that State and on account thereof is fully liable to tax therein (*e.g.* diplomats or other persons in government service). In accordance with the provisions of the second sentence of

paragraph 1, however, a person is not to be considered a "resident of a Contracting State" in the sense of the Convention if, although not domiciled in that State, he is considered to be a resident according to the domestic laws but is subject only to a taxation limited to the income from sources in that State or to capital situated in that State. That situation exists in some States in relation to individuals, *e.g.* in the case of foreign diplomatic and consular staff serving in their territory."

Paragraph 8 of the 1977 Model Convention corresponded to paragraph 10 of the 1963 Draft Convention. Paragraph 8 of the 1963 Draft Convention was deleted and paragraph 10 of the 1963 Draft Convention was amended and renumbered as paragraph 8 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the headings preceding paragraph 9 of the 1963 Draft Convention were amended and moved immediately before paragraph 8 (see history of paragraph 9). In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 10 read as follows:

"10. Paragraph 1 provides a definition of the expression "resident of a Contracting State" for the purposes of the Convention. The definition refers to the concept of residence adopted in the national laws (cf. General Comments). As criteria for the taxation as a resident the definition mentions: domicile, residence, place of management or any other similar criterion. As far as individuals are concerned, the definition aims at covering the various forms of personal attachment to a State which, in the national fiscal legislations, form the basis of a more comprehensive taxation (full liability to tax). An individual, however, is not to be considered a "resident of a Contracting State" in the sense of the Convention if, although not domiciled in that State, he is considered as a resident according to the national law and is only subject to a limited taxation on the income arising in that State."

In the 1963 Draft Convention and until it was deleted when the 1977 Model Convention was adopted, paragraph 8 read as follows:

"8. What is stated above gives the general background of the Article. Special comments are made below."

Paragraph 8.1: Replaced paragraph 8.1 as it read before 17 July 2008. Paragraph 8.1 was renumbered as paragraph 8.4 (see history of paragraph 8.4) and a new paragraph 8.1 was added, which corresponds to the sixth and seventh sentences of paragraph 8 as they read before 17 July 2008 (see history of paragraph 8) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.2: Replaced paragraph 8.2 as it read before 17 July 2008. Paragraph 8.2 was renumbered as paragraph 8.5 (see history of paragraph 8.6) and a new paragraph 8.2 was added, which incorporated, with amendments, the eighth, penultimate and final sentences of paragraph 8 as they read before 17 July 2008 (see history of paragraph 8) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.3: Replaced paragraph 8.3 as it read before 17 July 2008. Paragraph 8.3 was renumbered as paragraph 8.6 (see history of paragraph 8.7) and a new paragraph 8.3 was added, which incorporated, with amendments, the ninth sentence of paragraph 8 as it read before 17 July 2008 (see history of paragraph 8) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.4: Corresponds to paragraph 8.1 as it read before 17 July 2008. Paragraph 8.4 was renumbered as paragraph 8.7 (see history of paragraph 8.8) and paragraph 8.1 was renumbered as paragraph 8.4 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.1 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 8.5: Replaced paragraph 8.5 as it read before 22 July 2010. Paragraph 8.5 was renumbered as paragraph 8.6 (see history of paragraph 8.6) and a new paragraph 8.5 was added by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2010.

Paragraph 8.6: Corresponds to paragraph 8.5 as it read before 22 July 2010. Paragraph 8.6 was renumbered as paragraph 8.7 (see history of paragraph 8.7) and paragraph 8.5 was renumbered as paragraph 8.6 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2010.

Paragraph 8.5, as it read after 17 July 2008, corresponded to paragraph 8.2. Paragraph 8.2 was renumbered as paragraph 8.5 on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.2 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 8.7: Corresponds to paragraph 8.6 as it read before 22 July 2010. Paragraph 8.7 was renumbered as paragraph 8.8 (see history of paragraph 8.8) and Paragraph 8.6 was renumbered as paragraph 8.7 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2010.

Paragraph 8.6, as it read after 17 July 2008, corresponded to paragraph 8.3. Paragraph 8.3 was renumbered as paragraph 8.6 on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.3 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 8.8: Corresponds to paragraph 8.7 as it read before 22 July 2010. Paragraph 8.7 was renumbered as paragraph 8.8 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2010.

Paragraph 8.7, as it read after 17 July 2008, corresponded to paragraph 8.4. Paragraph 8.4 was renumbered as paragraph 8.7 on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.4 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "The Application of the OECD Model Tax Convention to Partnerships" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 9: Corresponds to paragraph 11 of the 1963 Draft Convention. Paragraph 9 of the 1963 Draft Convention was deleted and paragraph 11 of the 1963 Draft Convention was amended and renumbered as paragraph 9 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the headings preceding paragraph 9 of the 1963 Draft Convention were amended and moved immediately before paragraph 8 and the heading preceding paragraph 11 of the 1963 Draft Convention was moved immediately before paragraph 9. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 11 read as follows:

"11. This paragraph relates to the case where, under the provision of paragraph 1, an individual is subject to tax as a resident in both Contracting States."

In the 1963 Draft Convention and until the adoption of the 1977 Model Convention, paragraph 9 and the headings preceding it read as follows:

"2. SPECIAL COMMENTS ON THE ARTICLE

Paragraph 1

9. The Conventions usually refer to the State of "domicile" in several Articles. It was felt that, for terminological reasons, it would be useful if a "shorthand expression" could be used in all cases where the State of "domicile" is mentioned. In the Article the term "resident" is used. This term is used in Conventions concluded by the United Kingdom and by the United States of America. In the Convention between the United Kingdom and France the expression "un résident" is used in the French text."

Paragraph 10: Amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 10 read as follows:

"10. To solve this conflict special rules must be established which give the attachment to one State a preference over the attachment to the other State. As far as possible, the preference criterion must be of such a nature that there can be no question but that the person concerned will satisfy it in one State only, and at the same time it must reflect such an attachment that it is felt to be natural that the right to tax devolves upon that particular State."

Paragraph 10 of the 1977 Model Convention corresponded to paragraph 12 of the 1963 Draft Convention. Paragraph 10 of the 1963 Draft Convention was amended and renumbered as paragraph 8 (see history of paragraph 8) and paragraph 12 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) was renumbered as paragraph 10 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 11: Corresponds to paragraph 13 of the 1963 Draft Convention. Paragraph 11 was amended and renumbered as paragraph 9 (see history of paragraph 9) and paragraph 13 of the 1963 Draft Convention was amended and renumbered as paragraph 11 of the 1977 Model Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 13 read as follows:

"13. The Article gives preference to the Contracting State in which the individual has a permanent home available to him. This is in accordance with the usual provisions in double taxation Conventions, and this criterion will frequently be sufficient to solve the conflict, *e.g.* where the individual has a permanent home in one Contracting State and has only made a stay of some length in the other Contracting State."

Paragraph 12: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 12 of the 1963 Draft Convention was renumbered as paragraph 10 (see history of paragraph 10) and a new paragraph 12 was added.

Paragraph 13: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 13 of the 1963 Draft Convention was renumbered as paragraph 11 (see history of paragraph 11) and a new paragraph 13 was added.

Paragraph 14: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 14 read as follows:

> "14. If the individual has a permanent home in both Contracting States, the Article gives preference to the State with which his personal and economic relations are closest, this being understood as the centre of vital interests."

Paragraph 15: Replaced paragraph 15 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 15 read as follows:

> "15. In the cases where the residence cannot be determined by reference to the above mentioned provisions, the Article provides as subsidiary criteria, first, habitual abode, and then nationality."

Paragraph 16: Replaced paragraph 16 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 16 read as follows:

> "16. If the individual is a national of both Contracting States or of none of them, the question shall be solved by mutual agreement between the States concerned according to the procedure laid down in Article 25."

Paragraph 17: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 17 of the 1963 Draft Convention was amended and renumbered as paragraph 21 (see history of paragraph 21), the heading preceding paragraph 17 was moved with it and a new paragraph 17 was added.

Paragraph 18: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 18 of the 1963 Draft Convention was amended and renumbered as paragraph 22 (see history of paragraph 22) and a new paragraph 18 was added.

Paragraph 19: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 19 of the 1963 Draft Convention was amended and renumbered as paragraph 23 (see history of paragraph 23) and a new paragraph 19 was added.

Paragraph 20: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 20 of the 1963 Draft Convention was renumbered as paragraph 24 (see history of paragraph 24) and a new paragraph 20 was added.

Paragraph 21: Corresponds to paragraph 17 of the 1963 Draft Convention. Paragraph 21 of the 1963 Draft Convention was deleted and paragraph 17 of the 1963 Draft Convention was amended and renumbered as paragraph 21 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the heading preceding paragraph 17 was moved with it and the heading preceding paragraph 21 was moved immediately before paragraph 26. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 17 and the heading preceding it read as follows:

> "*Paragraph 3*
>
> 17. This paragraph concerns companies and other bodies of persons not being individuals, irrespective of whether they are or not legal persons. It may be rare in practice for a company, etc. to be subject to tax as a resident in more than one

State, but it is, of course, possible if, for instance, one State attaches importance to the registration and the other State to the place of effective management. So, in the case of companies, etc., also, special rules as to the preference must be established."

Paragraph 21 of the 1963 Draft Convention, until it was deleted when the 1977 Model Convention was adopted, read as follows:

"21. Ireland cannot envisage treating as non-resident in Ireland an individual who is resident in that country under Irish law. In Conventions which have been made by Ireland with other countries double taxation of the dual resident is relieved by way of exemption or of credit."

Paragraph 22: Corresponds to paragraph 18 of the 1963 Draft Convention. Paragraph 22 of the 1963 Draft Convention was deleted and paragraph 18 of the 1963 Draft Convention was amended and renumbered as paragraph 22 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 18 read as follows:

"18. It would not be natural to attach importance to a purely formal criterion like registration which is used but rarely in double taxation Conventions. Generally, these attach importance to the place where the company is actually managed, but the formulation of this criterion varies from one Convention to another."

In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until it was deleted when the 1977 Model Convention was adopted, paragraph 22 read as follows:

"22. Since the United States has traditionally imposed tax on the basis of citizenship (place of incorporation, in the case of companies), it reserves the right to do so when entering into tax Conventions with other O.E.C.D. Member countries."

Paragraph 23: Amended on 23 July 1992, by deleting the last sentence of the paragraph, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 23 read as follows:

"23. The formulation of the preference criterion in the case of persons other than individuals was considered in particular in connection with the taxation of income from shipping, inland waterways transport and air transport. A number of conventions for the avoidance of double taxation on such income accord the taxing power to the State in which the "place of management" of the enterprise is situated; other conventions attach importance to its "place of effective management", others again to the "fiscal domicile of the operator". Concerning conventions concluded by the United Kingdom which provide that a company shall be regarded as resident in the State in which "its business is managed and controlled", it has been made clear, on the United Kingdom side, that this expression means the "effective management" of the enterprise."

Paragraph 23 of the 1977 Model Convention corresponded to paragraph 19 of the 1963 Draft Convention. Paragraph 19 of the 1963 Draft Convention was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 19 read as follows:

"19. The formulation of the preference criterion in the case of persons other than individuals was considered in connection with the question of the taxation of income of shipping, inland waterways transport and air transport enterprises. A

study of the existing bilateral Conventions for the avoidance of double taxation on such income has shown that a number of Conventions accord the taxing power to the State in which the "place of management" of the enterprise is situated; other Conventions attach importance to its "place of effective management", others again to "the fiscal domicile of the operator". The Conventions concluded by the United Kingdom in recent years provide, as regards corporate bodies, that a company shall be regarded as resident in the State in which "its business is managed and controlled". In this connection it has been made clear on the United Kingdom side that this expression means the "effective management" of the enterprise."

Paragraph 24: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 24 read as follows:

"24. As a result of these considerations, the "place of effective management" has been adopted as the preference criterion for persons other than individuals. The place of effective management is the place where key management and commercial decisions that are necessary for the conduct of the entity's business are in substance made. The place of effective management will ordinarily be the place where the most senior person or group of persons (for example a board of directors) makes its decisions, the place where the actions to be taken by the entity as a whole are determined; however, no definitive rule can be given and all relevant facts and circumstances must be examined to determine the place of effective management. An entity may have more than one place of management, but it can have only one place of effective management at any one time."

Paragraph 24 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. In the 1977 Model Convention and until 29 April 2000, paragraph 24 read as follows:

"24. As a result of these considerations, the "place of effective management" has been adopted as the preference criterion for persons other than individuals."

Paragraph 24 of the 1977 Model Convention corresponded to paragraph 20 of the 1963 Draft Convention. Paragraph 20 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 24.1: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 25: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 25 read as follows:

"25. *Italy* does not adhere to the interpretation given in paragraph 24 above concerning "the most senior person or group of persons (for example, a board of directors)" as the sole criterion to identify the place of effective management of an entity. In its opinion the place where the main and substantial activity of the entity is carried on is also to be taken into account when determining the place of effective management."

Paragraph 25 was replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. In the 1977 Model Convention and until 29 April 2000, paragraph 25 read as follows:

"25. *New Zealand's* interpretation of the term "effective management" is practical day to day management, irrespective of where the overriding control is exercised."

Paragraph 25 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 26: Replaced paragraph 26 of the 1977 Model Convention on 21 September 1995. Paragraph 26 of the 1977 Model was renumbered paragraph 27 (see history of paragraph 27), the heading preceding paragraph 26 was moved with it and a new paragraph 26 was added by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 26.1: Amended on 17 July 2008, by replacing the cross-reference to "paragraph 8.4" with "paragraph 8.7", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 26.1 read as follows:

> "26.1 *Mexico* does not agree with the general principle expressed in paragraph 8.4 of the Commentary according to which if tax owed by a partnership is determined on the basis of the personal characteristics of the partners, these partners are entitled to the benefits of tax conventions entered into by the States of which they are residents as regards income that "flows through" that partnership."

Paragraph 26.1 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 26.2: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 26.2 read as follows:

> "26.2 Concerning the residence of tax-exempt not profit making organisations and charities, *Greece* adopts the view presented in paragraph 8.3 of the Commentary."

Paragraph 26.2 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 26.3: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 26.4: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 27: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 21 September 1995 and until 29 April 2000, paragraph 27 read as follows:

> "27. *Canada* reserves the right to use as the test for paragraph 3 the place of incorporation or organisation with respect to a company."

Paragraph 27 as it read after 21 September 1995 corresponded to paragraph 26 as it read after 23 July 1992. Paragraph 27 was renumbered as paragraph 28 (see history of paragraph 28), paragraph 26 was renumbered as paragraph 27 and the heading preceding paragraph 26 was moved with it by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 26 was previously amended on 23 July 1992, by deleting the United States as a country making the reservation and incorporating that reservation into paragraph 30 (see history of paragraph 31), by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 26 read as follows:

> "26. *Canada* and the *United States* reserve the right to use as the test for paragraph 3 the place of incorporation or organisation with respect to a company."

Paragraph 26 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 28: Amended on 23 October 1997, by adding Korea to the list of countries making the reservation, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 28 read as follows:

> "28. *Japan* reserves its position on the provisions in this and other Articles in the Model Tax Convention which refer directly or indirectly to the place of effective management. Instead of the term "place of effective management", Japan wishes to use in its conventions the term "head or main office"."

Paragraph 28 as it read after 21 September 1995 corresponded to paragraph 27 as it read after 31 March 1994. Paragraph 27 was renumbered as paragraph 28 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 27 was previously amended on 31 March 1994, by adding a second sentence, by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 27 read as follows:

> "27. *Japan* reserves its position on the provisions in this and other Articles in the Model Convention which refer directly or indirectly to the place of effective management."

Paragraph 27, as it read after 23 July 1992, corresponded to paragraph 28 of the 1977 Model Convention. Paragraph 27 of the 1977 Model Convention was deleted and paragraph 28 of the 1977 Model Convention was renumbered as paragraph 27 and amended, by deleting the word "also" immediately after "Japan", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 28 read as follows:

> "28. *Japan* also reserves its position on the provisions in this and other Articles in the Model Convention which refer directly or indirectly to the place of effective management."

Paragraph 28 of the 1977 Model Convention was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 27 read as follows:

> "27. *Japan* wishes to be free to conclude a bilateral convention which provides that the fiscal domicile of a resident of both Contracting States is to be determined through consultation between competent authorities. When entering into such consultation, Japan is prepared to take into consideration the rules set out in paragraph 2 of this Article as far as practicable."

Paragraph 27 of the 1977 Model Convention was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 29: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 29 read as follows:

> "29. *France* does not agree with the general principle according to which if tax owed by a partnership is determined on the basis of the personal characteristics of the partners, these partners are entitled to the benefits of tax conventions entered into by the States of which they are residents as regards income that "flows through" that partnership. Under French domestic law, a partnership is considered to be liable to tax even though, technically, that tax is collected from the partners; for that reason, France reserves the right to amend the Article in its tax

conventions in order to specify that French partnerships must be considered as residents of France in view of their legal and tax characteristics."

Paragraph 29 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 21 September 1995 and until 29 April 2000, paragraph 29 read as follows:

"29. *France* reserves the right to amend the Article in its tax conventions in order to specify that French partnerships must be considered as residents of France in view of their legal and tax characteristics."

Paragraph 29 as it read after 21 September 1995 corresponded to paragraph 28 as it read after 23 July 1992. Paragraph 28 was renumbered as paragraph 29 by the report entitled "The 1995 Update to the Model Tax Convention", which was adopted by the OECD Council on 21 September 1995.

Paragraph 28 as it read after 23 July 1992 replaced paragraph 28 of the 1977 Model Convention. Paragraph 28 of the 1977 Model Convention was amended and renumbered as paragraph 27 (see history of paragraph 28) and a new paragraph 28 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 30: Corresponds to paragraph 29 as it read before 21 September 1995. Paragraph 30 was renumbered as paragraph 31 (see history of paragraph 31) and paragraph 29 was renumbered as paragraph 30 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 29 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 31: Amended on 17 July 2008, by deleting Mexico from the list of countries making the reservation, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 31 read as follows:

"31. *Mexico* and the *United States* reserve the right to use a place of incorporation test for determining the residence of a corporation, and, failing that, to deny dual resident companies certain benefits under the Convention."

Paragraph 31 was previously amended on 29 April 2000, by adding Mexico as a country making the reservation, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. Paragraph 31 previously read as follows:

"31. The *United States* reserves the right to use a place of incorporation test for determining the residence of a corporation, and, failing that, to deny dual resident companies certain benefits under the Convention."

Paragraph 31 as it read after 21 September 1995 corresponded to paragraph 30 as it read after 31 March 1994. Paragraph 31 was renumbered paragraph 32 (see history of paragraph 32) and paragraph 30 was renumbered as paragraph 31 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 30 was previously amended on 31 March 1994, by adding the word "certain" before the word "benefits", by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 30 read as follows:

"30. The *United States* reserves the right to use a place of incorporation test for determining the residence of a corporation, and, failing that, to deny dual resident companies benefits under the Convention."

Paragraph 30 as it read after 23 July 1992 corresponded in part to paragraph 26 of the 1977 Model Convention (see history of paragraph 27). The reservation of the United States was incorporated into paragraph 30 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 32: Replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 21 September 1995 and until 29 April 2000, paragraph 32 read as follows:

"32. *Mexico* reserves the right to be excluded from the application of the portion of subparagraph *d)* of paragraph 2 that addresses double nationality, because the Mexican Constitution does not allow Mexican nationals to be nationals of any other State."

Paragraph 32 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

COMMENTARY ON ARTICLE 5 CONCERNING THE DEFINITION OF PERMANENT ESTABLISHMENT

1. The main use of the concept of a permanent establishment is to determine the right of a Contracting State to tax the profits of an enterprise of the other Contracting State. Under Article 7 a Contracting State cannot tax the profits of an enterprise of the other Contracting State unless it carries on its business through a permanent establishment situated therein.

(Replaced on 11 April 1977; see HISTORY)

1.1 Before 2000, income from professional services and other activities of an independent character was dealt under a separate Article, *i.e.* Article 14. The provisions of that Article were similar to those applicable to business profits but it used the concept of fixed base rather than that of permanent establishment since it had originally been thought that the latter concept should be reserved to commercial and industrial activities. The elimination of Article 14 in 2000 reflected the fact that there were no intended differences between the concepts of permanent establishment, as used in Article 7, and fixed base, as used in Article 14, or between how profits were computed and tax was calculated according to which of Article 7 or 14 applied. The elimination of Article 14 therefore meant that the definition of permanent establishment became applicable to what previously constituted a fixed base.

(Added on 29 April 2000; see HISTORY)

Paragraph 1

2. Paragraph 1 gives a general definition of the term "permanent establishment" which brings out its essential characteristics of a permanent establishment in the sense of the Convention, i.e. a distinct "situs", a "fixed place of business". The paragraph defines the term "permanent establishment" as a fixed place of business, through which the business of an enterprise is wholly or partly carried on. This definition, therefore, contains the following conditions:

- the existence of a "place of business", *i.e.* a facility such as premises or, in certain instances, machinery or equipment;
- this place of business must be "fixed", *i.e.* it must be established at a distinct place with a certain degree of permanence;
- the carrying on of the business of the enterprise through this fixed place of business. This means usually that persons who, in one way or another, are dependent on the enterprise (personnel) conduct the

business of the enterprise in the State in which the fixed place is situated.

(Replaced on 11 April 1977; see HISTORY)

3. It could perhaps be argued that in the general definition some mention should also be made of the other characteristic of a permanent establishment to which some importance has sometimes been attached in the past, namely that the establishment must have a productive character, *i.e.* contribute to the profits of the enterprise. In the present definition this course has not been taken. Within the framework of a well-run business organisation it is surely axiomatic to assume that each part contributes to the productivity of the whole. It does not, of course, follow in every case that because in the wider context of the whole organisation a particular establishment has a "productive character" it is consequently a permanent establishment to which profits can properly be attributed for the purpose of tax in a particular territory (see Commentary on paragraph 4).

(Amended on 11 April 1977; see HISTORY)

4. The term "place of business" covers any premises, facilities or installations used for carrying on the business of the enterprise whether or not they are used exclusively for that purpose. A place of business may also exist where no premises are available or required for carrying on the business of the enterprise and it simply has a certain amount of space at its disposal. It is immaterial whether the premises, facilities or installations are owned or rented by or are otherwise at the disposal of the enterprise. A place of business may thus be constituted by a pitch in a market place, or by a certain permanently used area in a customs depot (*e.g.* for the storage of dutiable goods). Again the place of business may be situated in the business facilities of another enterprise. This may be the case for instance where the foreign enterprise has at its constant disposal certain premises or a part thereof owned by the other enterprise.

(Replaced on 11 April 1977; see HISTORY)

4.1 As noted above, the mere fact that an enterprise has a certain amount of space at its disposal which is used for business activities is sufficient to constitute a place of business. No formal legal right to use that place is therefore required. Thus, for instance, a permanent establishment could exist where an enterprise illegally occupied a certain location where it carried on its business.

(Added on 28 January 2003; see HISTORY)

4.2 Whilst no formal legal right to use a particular place is required for that place to constitute a permanent establishment, the mere presence of an

enterprise at a particular location does not necessarily mean that that location is at the disposal of that enterprise. These principles are illustrated by the following examples where representatives of one enterprise are present on the premises of another enterprise. A first example is that of a salesman who regularly visits a major customer to take orders and meets the purchasing director in his office to do so. In that case, the customer's premises are not at the disposal of the enterprise for which the salesman is working and therefore do not constitute a fixed place of business through which the business of that enterprise is carried on (depending on the circumstances, however, paragraph 5 could apply to deem a permanent establishment to exist).

(Added on 28 January 2003; see HISTORY)

4.3 A second example is that of an employee of a company who, for a long period of time, is allowed to use an office in the headquarters of another company (*e.g.* a newly acquired subsidiary) in order to ensure that the latter company complies with its obligations under contracts concluded with the former company. In that case, the employee is carrying on activities related to the business of the former company and the office that is at his disposal at the headquarters of the other company will constitute a permanent establishment of his employer, provided that the office is at his disposal for a sufficiently long period of time so as to constitute a "fixed place of business" (see paragraphs 6 to 6.3) and that the activities that are performed there go beyond the activities referred to in paragraph 4 of the Article.

(Added on 28 January 2003; see HISTORY)

4.4 A third example is that of a road transportation enterprise which would use a delivery dock at a customer's warehouse every day for a number of years for the purpose of delivering goods purchased by that customer. In that case, the presence of the road transportation enterprise at the delivery dock would be so limited that that enterprise could not consider that place as being at its disposal so as to constitute a permanent establishment of that enterprise.

(Added on 28 January 2003; see HISTORY)

4.5 A fourth example is that of a painter who, for two years, spends three days a week in the large office building of its main client. In that case, the presence of the painter in that office building where he is performing the most important functions of his business (*i.e.* painting) constitute a permanent establishment of that painter.

(Added on 28 January 2003; see HISTORY)

4.6 The words "through which" must be given a wide meaning so as to apply to any situation where business activities are carried on at a particular location that is at the disposal of the enterprise for that purpose. Thus, for

instance, an enterprise engaged in paving a road will be considered to be carrying on its business "through" the location where this activity takes place.

(Added on 28 January 2003; see HISTORY)

5. According to the definition, the place of business has to be a "fixed" one. Thus in the normal way there has to be a link between the place of business and a specific geographical point. It is immaterial how long an enterprise of a Contracting State operates in the other Contracting State if it does not do so at a distinct place, but this does not mean that the equipment constituting the place of business has to be actually fixed to the soil on which it stands. It is enough that the equipment remains on a particular site (but see paragraph 20 below).

(Amended on 23 July 1992; see HISTORY)

5.1 Where the nature of the business activities carried on by an enterprise is such that these activities are often moved between neighbouring locations, there may be difficulties in determining whether there is a single "place of business" (if two places of business are occupied and the other requirements of Article 5 are met, the enterprise will, of course, have two permanent establishments). As recognised in paragraphs 18 and 20 below a single place of business will generally be considered to exist where, in light of the nature of the business, a particular location within which the activities are moved may be identified as constituting a coherent whole commercially and geographically with respect to that business.

(Added on 28 January 2003; see HISTORY)

5.2 This principle may be illustrated by examples. A mine clearly constitutes a single place of business even though business activities may move from one location to another in what may be a very large mine as it constitutes a single geographical and commercial unit as concerns the mining business. Similarly, an "office hotel" in which a consulting firm regularly rents different offices may be considered to be a single place of business of that firm since, in that case, the building constitutes a whole geographically and the hotel is a single place of business for the consulting firm. For the same reason, a pedestrian street, outdoor market or fair in different parts of which a trader regularly sets up his stand represents a single place of business for that trader.

(Added on 28 January 2003; see HISTORY)

5.3 By contrast, where there is no commercial coherence, the fact that activities may be carried on within a limited geographic area should not result in that area being considered as a single place of business. For example, where a painter works successively under a series of unrelated contracts for a number of unrelated clients in a large office building so that it cannot be said

that there is one single project for repainting the building, the building should not be regarded as a single place of business for the purpose of that work. However, in the different example of a painter who, under a single contract, undertakes work throughout a building for a single client, this constitutes a single project for that painter and the building as a whole can then be regarded as a single place of business for the purpose of that work as it would then constitute a coherent whole commercially and geographically.

(Added on 28 January 2003; see HISTORY)

5.4 Conversely, an area where activities are carried on as part of a single project which constitutes a coherent commercial whole may lack the necessary geographic coherence to be considered as a single place of business. For example, where a consultant works at different branches in separate locations pursuant to a single project for training the employees of a bank, each branch should be considered separately. However if the consultant moves from one office to another within the same branch location, he should be considered to remain in the same place of business. The single branch location possesses geographical coherence which is absent where the consultant moves between branches in different locations.

(Added on 28 January 2003; see HISTORY)

5.5 Clearly, a permanent establishment may only be considered to be situated in a Contracting State if the relevant place of business is situated in the territory of that State. The question of whether a satellite in geostationary orbit could constitute a permanent establishment for the satellite operator relates in part to how far the territory of a State extends into space. No member country would agree that the location of these satellites can be part of the territory of a Contracting State under the applicable rules of international law and could therefore be considered to be a permanent establishment situated therein. Also, the particular area over which a satellite's signals may be received (the satellite's "footprint") cannot be considered to be at the disposal of the operator of the satellite so as to make that area a place of business of the satellite's operator.

(Added on 22 July 2010; see HISTORY)

6. Since the place of business must be fixed, it also follows that a permanent establishment can be deemed to exist only if the place of business has a certain degree of permanency, *i.e.* if it is not of a purely temporary nature. A place of business may, however, constitute a permanent establishment even though it exists, in practice, only for a very short period of time because the nature of the business is such that it will only be carried on for that short period of time. It is sometimes difficult to determine whether this is the case. Whilst the practices followed by member countries have not

been consistent in so far as time requirements are concerned, experience has shown that permanent establishments normally have not been considered to exist in situations where a business had been carried on in a country through a place of business that was maintained for less than six months (conversely, practice shows that there were many cases where a permanent establishment has been considered to exist where the place of business was maintained for a period longer than six months). One exception has been where the activities were of a recurrent nature; in such cases, each period of time during which the place is used needs to be considered in combination with the number of times during which that place is used (which may extend over a number of years). Another exception has been made where activities constituted a business that was carried on exclusively in that country; in this situation, the business may have short duration because of its nature but since it is wholly carried on in that country, its connection with that country is stronger. For ease of administration, countries may want to consider these practices when they address disagreements as to whether a particular place of business that exists only for a short period of time constitutes a permanent establishment.

(Amended on 28 January 2003; see HISTORY)

6.1 As mentioned in paragraphs 11 and 19, temporary interruptions of activities do not cause a permanent establishment to cease to exist. Similarly, as discussed in paragraph 6, where a particular place of business is used for only very short periods of time but such usage takes place regularly over long periods of time, the place of business should not be considered to be of a purely temporary nature.

(Added on 28 January 2003; see HISTORY)

6.2 Also, there may be cases where a particular place of business would be used for very short periods of time by a number of similar businesses carried on by the same or related persons in an attempt to avoid that the place be considered to have been used for more than purely temporary purposes by each particular business. The remarks of paragraph 18 on arrangements intended to abuse the twelve month period provided for in paragraph 3 would equally apply to such cases.

(Added on 28 January 2003; see HISTORY)

6.3 Where a place of business which was, at the outset, designed to be used for such a short period of time that it would not have constituted a permanent establishment but is in fact maintained for such a period that it can no longer be considered as a temporary one, it becomes a fixed place of business and thus — retrospectively — a permanent establishment. A place of business can also constitute a permanent establishment from its inception even though it existed, in practice, for a very short period of time, if as a consequence of

special circumstances (*e.g.* death of the taxpayer, investment failure), it was prematurely liquidated.

(Added on 28 January 2003; see HISTORY)

7. For a place of business to constitute a permanent establishment the enterprise using it must carry on its business wholly or partly through it. As stated in paragraph 3 above, the activity need not be of a productive character. Furthermore, the activity need not be permanent in the sense that there is no interruption of operation, but operations must be carried out on a regular basis.

(Replaced on 11 April 1977; see HISTORY)

8. Where tangible property such as facilities, industrial, commercial or scientific (ICS) equipment, buildings, or intangible property such as patents, procedures and similar property, are let or leased to third parties through a fixed place of business maintained by an enterprise of a Contracting State in the other State, this activity will, in general, render the place of business a permanent establishment. The same applies if capital is made available through a fixed place of business. If an enterprise of a State lets or leases facilities, ICS equipment, buildings or intangible property to an enterprise of the other State without maintaining for such letting or leasing activity a fixed place of business in the other State, the leased facility, ICS equipment, building or intangible property, as such, will not constitute a permanent establishment of the lessor provided the contract is limited to the mere leasing of the ICS equipment, etc. This remains the case even when, for example, the lessor supplies personnel after installation to operate the equipment provided that their responsibility is limited solely to the operation or maintenance of the ICS equipment under the direction, responsibility and control of the lessee. If the personnel have wider responsibilities, for example, participation in the decisions regarding the work for which the equipment is used, or if they operate, service, inspect and maintain the equipment under the responsibility and control of the lessor, the activity of the lessor may go beyond the mere leasing of ICS equipment and may constitute an entrepreneurial activity. In such a case a permanent establishment could be deemed to exist if the criterion of permanency is met. When such activity is connected with, or is similar in character to, those mentioned in paragraph 3, the time limit of twelve months applies. Other cases have to be determined according to the circumstances.

(Amended on 23 July 1992; see HISTORY)

9. The leasing of containers is one particular case of the leasing of industrial or commercial equipment which does, however, have specific features. The question of determining the circumstances in which an

enterprise involved in the leasing of containers should be considered as having a permanent establishment in another State is more fully discussed in a report entitled "The Taxation of Income Derived from the Leasing of Containers."[1]

(Replaced on 23 July 1992; see HISTORY)

9.1 Another example where an enterprise cannot be considered to carry on its business wholly or partly through a place of business is that of a telecommunications operator of a Contracting State who enters into a "roaming" agreement with a foreign operator in order to allow its users to connect to the foreign operator's telecommunications network. Under such an agreement, a user who is outside the geographical coverage of that user's home network can automatically make and receive voice calls, send and receive data or access other services through the use of the foreign network. The foreign network operator then bills the operator of that user's home network for that use. Under a typical roaming agreement, the home network operator merely transfers calls to the foreign operator's network and does not operate or have physical access to that network. For these reasons, any place where the foreign network is located cannot be considered to be at the disposal of the home network operator and cannot, therefore, constitute a permanent establishment of that operator.

(Added on 22 July 2010; see HISTORY)

10. The business of an enterprise is carried on mainly by the entrepreneur or persons who are in a paid-employment relationship with the enterprise (personnel). This personnel includes employees and other persons receiving instructions from the enterprise (*e.g.* dependent agents). The powers of such personnel in its relationship with third parties are irrelevant. It makes no difference whether or not the dependent agent is authorised to conclude contracts if he works at the fixed place of business (see paragraph 35 below). But a permanent establishment may nevertheless exist if the business of the enterprise is carried on mainly through automatic equipment, the activities of the personnel being restricted to setting up, operating, controlling and maintaining such equipment. Whether or not gaming and vending machines and the like set up by an enterprise of a State in the other State constitute a permanent establishment thus depends on whether or not the enterprise carries on a business activity besides the initial setting up of the machines. A permanent establishment does not exist if the enterprise merely sets up the machines and then leases the machines to other enterprises. A permanent establishment may exist, however, if the enterprise which sets up the machines also operates and maintains them for its own account. This also

1 Reproduced in Volume II at page R(3)-1.

applies if the machines are operated and maintained by an agent dependent on the enterprise.

(Renumbered and amended on 23 July 1992; see HISTORY)

11. A permanent establishment begins to exist as soon as the enterprise commences to carry on its business through a fixed place of business. This is the case once the enterprise prepares, at the place of business, the activity for which the place of business is to serve permanently. The period of time during which the fixed place of business itself is being set up by the enterprise should not be counted, provided that this activity differs substantially from the activity for which the place of business is to serve permanently. The permanent establishment ceases to exist with the disposal of the fixed place of business or with the cessation of any activity through it, that is when all acts and measures connected with the former activities of the permanent establishment are terminated (winding up current business transactions, maintenance and repair of facilities). A temporary interruption of operations, however, cannot be regarded as a closure. If the fixed place of business is leased to another enterprise, it will normally only serve the activities of that enterprise instead of the lessor's; in general, the lessor's permanent establishment ceases to exist, except where he continues carrying on a business activity of his own through the fixed place of business.

(Renumbered on 23 July 1992; see HISTORY)

Paragraph 2

12. This paragraph contains a list, by no means exhaustive, of examples, each of which can be regarded, *prima facie*, as constituting a permanent establishment. As these examples are to be seen against the background of the general definition given in paragraph 1, it is assumed that the Contracting States interpret the terms listed, "a place of management", "a branch", "an office", etc. in such a way that such places of business constitute permanent establishments only if they meet the requirements of paragraph 1.

(Renumbered on 23 July 1992; see HISTORY)

13. The term "place of management" has been mentioned separately because it is not necessarily an "office". However, where the laws of the two Contracting States do not contain the concept of "a place of management" as distinct from an "office", there will be no need to refer to the former term in their bilateral convention.

(Renumbered on 23 July 1992; see HISTORY)

14. Subparagraph *f)* provides that mines, oil or gas wells, quarries or any other place of extraction of natural resources are permanent establishments. The term "any other place of extraction of natural resources" should be

interpreted broadly. It includes, for example, all places of extraction of hydrocarbons whether on or off-shore.

(Renumbered on 23 July 1992; see HISTORY)

15. Subparagraph *f)* refers to the extraction of natural resources, but does not mention the exploration of such resources, whether on or off shore. Therefore, whenever income from such activities is considered to be business profits, the question whether these activities are carried on through a permanent establishment is governed by paragraph 1. Since, however, it has not been possible to arrive at a common view on the basic questions of the attribution of taxation rights and of the qualification of the income from exploration activities, the Contracting States may agree upon the insertion of specific provisions. They may agree, for instance, that an enterprise of a Contracting State, as regards its activities of exploration of natural resources in a place or area in the other Contracting State:

a) shall be deemed not to have a permanent establishment in that other State; or

b) shall be deemed to carry on such activities through a permanent establishment in that other State; or

c) shall be deemed to carry on such activities through a permanent establishment in that other State if such activities last longer than a specified period of time.

The Contracting States may moreover agree to submit the income from such activities to any other rule.

(Renumbered on 23 July 1992; see HISTORY)

Paragraph 3

16. The paragraph provides expressly that a building site or construction or installation project constitutes a permanent establishment only if it lasts more than twelve months. Any of those items which does not meet this condition does not of itself constitute a permanent establishment, even if there is within it an installation, for instance an office or a workshop within the meaning of paragraph 2, associated with the construction activity. Where, however, such an office or workshop is used for a number of construction projects and the activities performed therein go beyond those mentioned in paragraph 4, it will be considered a permanent establishment if the conditions of the Article are otherwise met even if none of the projects involve a building site or construction or installation project that lasts more than twelve months. In that case, the situation of the workshop or office will therefore be different from that of these sites or projects, none of which will constitute a permanent establishment, and it will be important to ensure that only the profits properly

attributable to the functions performed through that office or workshop, taking into account the assets used and the risks assumed through that office or workshop, are attributed to the permanent establishment. This could include profits attributable to functions performed in relation to the various construction sites but only to the extent that these functions are properly attributable to the office.

(Amended on 22 July 2010; see HISTORY)

17. The term "building site or construction or installation project" includes not only the construction of buildings but also the construction of roads, bridges or canals, the renovation (involving more than mere maintenance or redecoration) of buildings, roads, bridges or canals, the laying of pipe-lines and excavating and dredging. Additionally, the term "installation project" is not restricted to an installation related to a construction project; it also includes the installation of new equipment, such as a complex machine, in an existing building or outdoors. On-site planning and supervision of the erection of a building are covered by paragraph 3. States wishing to modify the text of the paragraph to provide expressly for that result are free to do so in their bilateral conventions.

(Amended on 28 January 2003; see HISTORY)

18. The twelve month test applies to each individual site or project. In determining how long the site or project has existed, no account should be taken of the time previously spent by the contractor concerned on other sites or projects which are totally unconnected with it. A building site should be regarded as a single unit, even if it is based on several contracts, provided that it forms a coherent whole commercially and geographically. Subject to this proviso, a building site forms a single unit even if the orders have been placed by several persons (*e.g.* for a row of houses). The twelve month threshold has given rise to abuses; it has sometimes been found that enterprises (mainly contractors or subcontractors working on the continental shelf or engaged in activities connected with the exploration and exploitation of the continental shelf) divided their contracts up into several parts, each covering a period less than twelve months and attributed to a different company which was, however, owned by the same group. Apart from the fact that such abuses may, depending on the circumstances, fall under the application of legislative or judicial anti-avoidance rules, countries concerned with this issue can adopt solutions in the framework of bilateral negotiations.

(Renumbered and amended on 23 July 1992; see HISTORY)

19. A site exists from the date on which the contractor begins his work, including any preparatory work, in the country where the construction is to be established, *e.g.* if he installs a planning office for the construction. In general,

it continues to exist until the work is completed or permanently abandoned. A site should not be regarded as ceasing to exist when work is temporarily discontinued. Seasonal or other temporary interruptions should be included in determining the life of a site. Seasonal interruptions include interruptions due to bad weather. Temporary interruption could be caused, for example, by shortage of material or labour difficulties. Thus, for example, if a contractor started work on a road on 1 May, stopped on 1 November because of bad weather conditions or a lack of materials but resumed work on 1 February the following year, completing the road on 1 June, his construction project should be regarded as a permanent establishment because thirteen months elapsed between the date he first commenced work (1 May) and the date he finally finished (1 June of the following year). If an enterprise (general contractor) which has undertaken the performance of a comprehensive project subcontracts parts of such a project to other enterprises (subcontractors), the period spent by a subcontractor working on the building site must be considered as being time spent by the general contractor on the building project. The subcontractor himself has a permanent establishment at the site if his activities there last more than twelve months.

(Renumbered on 23 July 1992; see HISTORY)

19.1 In the case of fiscally transparent partnerships, the twelve month test is applied at the level of the partnership as concerns its own activities. If the period of time spent on the site by the partners and the employees of the partnership exceeds twelve months, the enterprise carried on by the partnership will therefore be considered to have a permanent establishment. Each partner will thus be considered to have a permanent establishment for purposes of the taxation of his share of the business profits derived by the partnership regardless of the time spent by himself on the site.

(Added on 29 April 2000; see HISTORY)

20. The very nature of a construction or installation project may be such that the contractor's activity has to be relocated continuously or at least from time to time, as the project progresses. This would be the case for instance where roads or canals were being constructed, waterways dredged, or pipe-lines laid. Similarly, where parts of a substantial structure such as an offshore platform are assembled at various locations within a country and moved to another location within the country for final assembly, this is part of a single project. In such cases, the fact that the work force is not present for twelve months in one particular location is immaterial. The activities performed at each particular spot are part of a single project, and that project must be regarded as a permanent establishment if, as a whole, it lasts more than twelve months.

(Amended on 28 January 2003; see HISTORY)

Paragraph 4

21. This paragraph lists a number of business activities which are treated as exceptions to the general definition laid down in paragraph 1 and which are not permanent establishments, even if the activity is carried on through a fixed place of business. The common feature of these activities is that they are, in general, preparatory or auxiliary activities. This is laid down explicitly in the case of the exception mentioned in subparagraph *e)*, which actually amounts to a general restriction of the scope of the definition contained in paragraph 1. Moreover subparagraph *f)* provides that combinations of activities mentioned in subparagraphs *a)* to *e)* in the same fixed place of business shall be deemed not to be a permanent establishment, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character. Thus the provisions of paragraph 4 are designed to prevent an enterprise of one State from being taxed in the other State, if it carries on in that other State, activities of a purely preparatory or auxiliary character.

(Renumbered on 23 July 1992; see HISTORY)

22. Subparagraph *a)* relates only to the case in which an enterprise acquires the use of facilities for storing, displaying or delivering its own goods or merchandise. Subparagraph *b)* relates to the stock of merchandise itself and provides that the stock, as such, shall not be treated as a permanent establishment if it is maintained for the purpose of storage, display or delivery. Subparagraph *c)* covers the case in which a stock of goods or merchandise belonging to one enterprise is processed by a second enterprise, on behalf of, or for the account of, the first-mentioned enterprise. The reference to the collection of information in subparagraph *d)* is intended to include the case of the newspaper bureau which has no purpose other than to act as one of many "tentacles" of the parent body; to exempt such a bureau is to do no more than to extend the concept of "mere purchase".

(Renumbered on 23 July 1992; see HISTORY)

23. Subparagraph *e)* provides that a fixed place of business through which the enterprise exercises solely an activity which has for the enterprise a preparatory or auxiliary character, is deemed not to be a permanent establishment. The wording of this subparagraph makes it unnecessary to produce an exhaustive list of exceptions. Furthermore, this subparagraph provides a generalised exception to the general definition in paragraph 1 and, when read with that paragraph, provides a more selective test, by which to determine what constitutes a permanent establishment. To a considerable degree it limits that definition and excludes from its rather wide scope a number of forms of business organisations which, although they are carried on through a fixed place of business, should not be treated as permanent

establishments. It is recognised that such a place of business may well contribute to the productivity of the enterprise, but the services it performs are so remote from the actual realisation of profits that it is difficult to allocate any profit to the fixed place of business in question. Examples are fixed places of business solely for the purpose of advertising or for the supply of information or for scientific research or for the servicing of a patent or a know-how contract, if such activities have a preparatory or auxiliary character.

(Renumbered on 23 July 1992; see HISTORY)

24. It is often difficult to distinguish between activities which have a preparatory or auxiliary character and those which have not. The decisive criterion is whether or not the activity of the fixed place of business in itself forms an essential and significant part of the activity of the enterprise as a whole. Each individual case will have to be examined on its own merits. In any case, a fixed place of business whose general purpose is one which is identical to the general purpose of the whole enterprise, does not exercise a preparatory or auxiliary activity. Where, for example, the servicing of patents and know-how is the purpose of an enterprise, a fixed place of business of such enterprise exercising such an activity cannot get the benefits of subparagraph *e)*. A fixed place of business which has the function of managing an enterprise or even only a part of an enterprise or of a group of the concern cannot be regarded as doing a preparatory or auxiliary activity, for such a managerial activity exceeds this level. If enterprises with international ramifications establish a so-called “management office” in States in which they maintain subsidiaries, permanent establishments, agents or licensees, such office having supervisory and coordinating functions for all departments of the enterprise located within the region concerned, a permanent establishment will normally be deemed to exist, because the management office may be regarded as an office within the meaning of paragraph 2. Where a big international concern has delegated all management functions to its regional management offices so that the functions of the head office of the concern are restricted to general supervision (so-called polycentric enterprises), the regional management offices even have to be regarded as a “place of management” within the meaning of subparagraph *a)* of paragraph 2. The function of managing an enterprise, even if it only covers a certain area of the operations of the concern, constitutes an essential part of the business operations of the enterprise and therefore can in no way be regarded as an activity which has a preparatory or auxiliary character within the meaning of subparagraph *e)* of paragraph 4.

(Renumbered on 23 July 1992; see HISTORY)

25. A permanent establishment could also be constituted if an enterprise maintains a fixed place of business for the delivery of spare parts to customers

for machinery supplied to those customers where, in addition, it maintains or repairs such machinery, as this goes beyond the pure delivery mentioned in subparagraph *a)* of paragraph 4. Since these after-sale organisations perform an essential and significant part of the services of an enterprise vis-à-vis its customers, their activities are not merely auxiliary ones. Subparagraph *e)* applies only if the activity of the fixed place of business is limited to a preparatory or auxiliary one. This would not be the case where, for example, the fixed place of business does not only give information but also furnishes plans etc. specially developed for the purposes of the individual customer. Nor would it be the case if a research establishment were to concern itself with manufacture.

(Amended on 28 January 2003; see HISTORY)

26. Moreover, subparagraph *e)* makes it clear that the activities of the fixed place of business must be carried on for the enterprise. A fixed place of business which renders services not only to its enterprise but also directly to other enterprises, for example to other companies of a group to which the company owning the fixed place belongs, would not fall within the scope of subparagraph *e)*.

(Renumbered on 23 July 1992; see HISTORY)

26.1 Another example is that of facilities such as cables or pipelines that cross the territory of a country. Apart from the fact that income derived by the owner or operator of such facilities from their use by other enterprises is covered by Article 6 where they constitute immovable property under paragraph 2 of Article 6, the question may arise as to whether paragraph 4 applies to them. Where these facilities are used to transport property belonging to other enterprises, subparagraph *a)*, which is restricted to delivery of goods or merchandise belonging to the enterprise that uses the facility, will not be applicable as concerns the owner or operator of these facilities. Subparagraph *e)* also will not be applicable as concerns that enterprise since the cable or pipeline is not used solely for the enterprise and its use is not of preparatory or auxiliary character given the nature of the business of that enterprise. The situation is different, however, where an enterprise owns and operates a cable or pipeline that crosses the territory of a country solely for purposes of transporting its own property and such transport is merely incidental to the business of that enterprise, as in the case of an enterprise that is in the business of refining oil and that owns and operates a pipeline that crosses the territory of a country solely to transport its own oil to its refinery located in another country. In such case, subparagraph *a)* would be applicable. An additional question is whether the cable or pipeline could also constitute a permanent establishment for the customer of the operator of the cable or pipeline, *i.e.* the enterprise whose data, power or property is

transmitted or transported from one place to another. In such a case, the enterprise is merely obtaining transmission or transportation services provided by the operator of the cable or pipeline and does not have the cable or pipeline at its disposal. As a consequence, the cable or pipeline cannot be considered to be a permanent establishment of that enterprise.

(Amended on 22 July 2010; see HISTORY)

27. As already mentioned in paragraph 21 above, paragraph 4 is designed to provide for exceptions to the general definition of paragraph 1 in respect of fixed places of business which are engaged in activities having a preparatory or auxiliary character. Therefore, according to subparagraph *f)* of paragraph 4, the fact that one fixed place of business combines any of the activities mentioned in the subparagraphs *a)* to *e)* of paragraph 4 does not mean of itself that a permanent establishment exists. As long as the combined activity of such a fixed place of business is merely preparatory or auxiliary a permanent establishment should be deemed not to exist. Such combinations should not be viewed on rigid lines, but should be considered in the light of the particular circumstances. The criterion "preparatory or auxiliary character" is to be interpreted in the same way as is set out for the same criterion of subparagraph *e)* (see paragraphs 24 and 25 above). States which want to allow any combination of the items mentioned in subparagraphs *a)* to *e)*, disregarding whether or not the criterion of the preparatory or auxiliary character of such a combination is met, are free to do so by deleting the words "provided" to "character" in subparagraph *f)*.

(Amended on 28 January 2003; see HISTORY)

27.1 Subparagraph *f)* is of no importance in a case where an enterprise maintains several fixed places of business within the meaning of subparagraphs *a)* to *e)* provided that they are separated from each other locally and organisationally, as in such a case each place of business has to be viewed separately and in isolation for deciding whether a permanent establishment exists. Places of business are not "separated organisationally" where they each perform in a Contracting State complementary functions such as receiving and storing goods in one place, distributing those goods through another etc. An enterprise cannot fragment a cohesive operating business into several small operations in order to argue that each is merely engaged in a preparatory or auxiliary activity.

(Added on 28 January 2003; see HISTORY)

28. The fixed places of business mentioned in paragraph 4 cannot be deemed to constitute permanent establishments so long as their activities are restricted to the functions which are the prerequisite for assuming that the fixed place of business is not a permanent establishment. This will be the case

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

even if the contracts necessary for establishing and carrying on the business are concluded by those in charge of the places of business themselves. The employees of places of business within the meaning of paragraph 4 who are authorised to conclude such contracts should not be regarded as agents within the meaning of paragraph 5. A case in point would be a research institution the manager of which is authorised to conclude the contracts necessary for maintaining the institution and who exercises this authority within the framework of the functions of the institution. A permanent establishment, however, exists if the fixed place of business exercising any of the functions listed in paragraph 4 were to exercise them not only on behalf of the enterprise to which it belongs but also on behalf of other enterprises. If, for instance, an advertising agency maintained by an enterprise were also to engage in advertising for other enterprises, it would be regarded as a permanent establishment of the enterprise by which it is maintained.

(Renumbered on 23 July 1992; see HISTORY)

29. If a fixed place of business under paragraph 4 is deemed not to be a permanent establishment, this exception applies likewise to the disposal of movable property forming part of the business property of the place of business at the termination of the enterprise's activity in such installation (see paragraph 11 above and paragraph 2 of Article 13). Since, for example, the display of merchandise is excepted under subparagraphs *a)* and *b)*, the sale of the merchandise at the termination of a trade fair or convention is covered by this exception. The exception does not, of course, apply to sales of merchandise not actually displayed at the trade fair or convention.

(Renumbered and amended on 23 July 1992; see HISTORY)

30. A fixed place of business used both for activities which rank as exceptions (paragraph 4) and for other activities would be regarded as a single permanent establishment and taxable as regards both types of activities. This would be the case, for instance, where a store maintained for the delivery of goods also engaged in sales.

(Renumbered on 23 July 1992; see HISTORY)

Paragraph 5

31. It is a generally accepted principle that an enterprise should be treated as having a permanent establishment in a State if there is under certain conditions a person acting for it, even though the enterprise may not have a fixed place of business in that State within the meaning of paragraphs 1 and 2. This provision intends to give that State the right to tax in such cases. Thus paragraph 5 stipulates the conditions under which an enterprise is deemed to have a permanent establishment in respect of any activity of a person acting

for it. The paragraph was redrafted in the 1977 Model Convention to clarify the intention of the corresponding provision of the 1963 Draft Convention without altering its substance apart from an extension of the excepted activities of the person.

(Renumbered and amended on 23 July 1992; see HISTORY)

32. Persons whose activities may create a permanent establishment for the enterprise are so-called dependent agents *i.e.* persons, whether or not employees of the enterprise, who are not independent agents falling under paragraph 6. Such persons may be either individuals or companies and need not be residents of, nor have a place of business in, the State in which they act for the enterprise. It would not have been in the interest of international economic relations to provide that the maintenance of any dependent person would lead to a permanent establishment for the enterprise. Such treatment is to be limited to persons who in view of the scope of their authority or the nature of their activity involve the enterprise to a particular extent in business activities in the State concerned. Therefore, paragraph 5 proceeds on the basis that only persons having the authority to conclude contracts can lead to a permanent establishment for the enterprise maintaining them. In such a case the person has sufficient authority to bind the enterprise's participation in the business activity in the State concerned. The use of the term "permanent establishment" in this context presupposes, of course, that that person makes use of this authority repeatedly and not merely in isolated cases.

(Amended on 28 January 2003; see HISTORY)

32.1 Also, the phrase "authority to conclude contracts in the name of the enterprise" does not confine the application of the paragraph to an agent who enters into contracts literally in the name of the enterprise; the paragraph applies equally to an agent who concludes contracts which are binding on the enterprise even if those contracts are not actually in the name of the enterprise. Lack of active involvement by an enterprise in transactions may be indicative of a grant of authority to an agent. For example, an agent may be considered to possess actual authority to conclude contracts where he solicits and receives (but does not formally finalise) orders which are sent directly to a warehouse from which goods are delivered and where the foreign enterprise routinely approves the transactions.

(Added on 28 January 2003; see HISTORY)

33. The authority to conclude contracts must cover contracts relating to operations which constitute the business proper of the enterprise. It would be irrelevant, for instance, if the person had authority to engage employees for the enterprise to assist that person's activity for the enterprise or if the person were authorised to conclude, in the name of the enterprise, similar contracts

relating to internal operations only. Moreover the authority has to be habitually exercised in the other State; whether or not this is the case should be determined on the basis of the commercial realities of the situation. A person who is authorised to negotiate all elements and details of a contract in a way binding on the enterprise can be said to exercise this authority "in that State", even if the contract is signed by another person in the State in which the enterprise is situated or if the first person has not formally been given a power of representation. The mere fact, however, that a person has attended or even participated in negotiations in a State between an enterprise and a client will not be sufficient, by itself, to conclude that the person has exercised in that State an authority to conclude contracts in the name of the enterprise. The fact that a person has attended or even participated in such negotiations could, however, be a relevant factor in determining the exact functions performed by that person on behalf of the enterprise. Since, by virtue of paragraph 4, the maintenance of a fixed place of business solely for purposes listed in that paragraph is deemed not to constitute a permanent establishment, a person whose activities are restricted to such purposes does not create a permanent establishment either.

(Amended on 15 July 2005; see HISTORY)

33.1 The requirement that an agent must "habitually" exercise an authority to conclude contracts reflects the underlying principle in Article 5 that the presence which an enterprise maintains in a Contracting State should be more than merely transitory if the enterprise is to be regarded as maintaining a permanent establishment, and thus a taxable presence, in that State. The extent and frequency of activity necessary to conclude that the agent is "habitually exercising" contracting authority will depend on the nature of the contracts and the business of the principal. It is not possible to lay down a precise frequency test. Nonetheless, the same sorts of factors considered in paragraph 6 would be relevant in making that determination.

(Added on 28 January 2003; see HISTORY)

34. Where the requirements set out in paragraph 5 are met, a permanent establishment of the enterprise exists to the extent that the person acts for the latter, *i.e.* not only to the extent that such a person exercises the authority to conclude contracts in the name of the enterprise.

(Renumbered on 23 July 1992; see HISTORY)

35. Under paragraph 5, only those persons who meet the specific conditions may create a permanent establishment; all other persons are excluded. It should be borne in mind, however, that paragraph 5 simply provides an alternative test of whether an enterprise has a permanent establishment in a State. If it can be shown that the enterprise has a permanent establishment

within the meaning of paragraphs 1 and 2 (subject to the provisions of paragraph 4), it is not necessary to show that the person in charge is one who would fall under paragraph 5.

(Renumbered on 23 July 1992; see HISTORY)

Paragraph 6

36. Where an enterprise of a Contracting State carries on business dealings through a broker, general commission agent or any other agent of an independent status, it cannot be taxed in the other Contracting State in respect of those dealings if the agent is acting in the ordinary course of his business (see paragraph 32 above). Although it stands to reason that such an agent, representing a separate enterprise, cannot constitute a permanent establishment of the foreign enterprise, paragraph 6 has been inserted in the Article for the sake of clarity and emphasis.

(Renumbered and amended on 23 July 1992; see HISTORY)

37. A person will come within the scope of paragraph 6, *i.e.* he will not constitute a permanent establishment of the enterprise on whose behalf he acts only if:

a) he is independent of the enterprise both legally and economically, and

b) he acts in the ordinary course of his business when acting on behalf of the enterprise.

(Renumbered and amended on 23 July 1992; see HISTORY)

38. Whether a person is independent of the enterprise represented depends on the extent of the obligations which this person has vis-à-vis the enterprise. Where the person's commercial activities for the enterprise are subject to detailed instructions or to comprehensive control by it, such person cannot be regarded as independent of the enterprise. Another important criterion will be whether the entrepreneurial risk has to be borne by the person or by the enterprise the person represents.

(Amended on 28 January 2003; see HISTORY)

38.1 In relation to the test of legal dependence, it should be noted that the control which a parent company exercises over its subsidiary in its capacity as shareholder is not relevant in a consideration of the dependence or otherwise of the subsidiary in its capacity as an agent for the parent. This is consistent with the rule in paragraph 7 of Article 5. But, as paragraph 41 of the Commentary indicates, the subsidiary may be considered a dependent agent of its parent by application of the same tests which are applied to unrelated companies.

(Added on 28 January 2003; see HISTORY)

38.2 The following considerations should be borne in mind when determining whether an agent may be considered to be independent.

(Added on 28 January 2003; see HISTORY)

38.3 An independent agent will typically be responsible to his principal for the results of his work but not subject to significant control with respect to the manner in which that work is carried out. He will not be subject to detailed instructions from the principal as to the conduct of the work. The fact that the principal is relying on the special skill and knowledge of the agent is an indication of independence.

(Added on 28 January 2003; see HISTORY)

38.4 Limitations on the scale of business which may be conducted by the agent clearly affect the scope of the agent's authority. However such limitations are not relevant to dependency which is determined by consideration of the extent to which the agent exercises freedom in the conduct of business on behalf of the principal within the scope of the authority conferred by the agreement.

(Added on 28 January 2003; see HISTORY)

38.5 It may be a feature of the operation of an agreement that an agent will provide substantial information to a principal in connection with the business conducted under the agreement. This is not in itself a sufficient criterion for determination that the agent is dependent unless the information is provided in the course of seeking approval from the principal for the manner in which the business is to be conducted. The provision of information which is simply intended to ensure the smooth running of the agreement and continued good relations with the principal is not a sign of dependence.

(Added on 28 January 2003; see HISTORY)

38.6 Another factor to be considered in determining independent status is the number of principals represented by the agent. Independent status is less likely if the activities of the agent are performed wholly or almost wholly on behalf of only one enterprise over the lifetime of the business or a long period of time. However, this fact is not by itself determinative. All the facts and circumstances must be taken into account to determine whether the agent's activities constitute an autonomous business conducted by him in which he bears risk and receives reward through the use of his entrepreneurial skills and knowledge. Where an agent acts for a number of principals in the ordinary course of his business and none of these is predominant in terms of the business carried on by the agent legal dependence may exist if the

principals act in concert to control the acts of the agent in the course of his business on their behalf.

(Added on 28 January 2003; see HISTORY)

38.7 Persons cannot be said to act in the ordinary course of their own business if, in place of the enterprise, such persons perform activities which, economically, belong to the sphere of the enterprise rather than to that of their own business operations. Where, for example, a commission agent not only sells the goods or merchandise of the enterprise in his own name but also habitually acts, in relation to that enterprise, as a permanent agent having an authority to conclude contracts, he would be deemed in respect of this particular activity to be a permanent establishment, since he is thus acting outside the ordinary course of his own trade or business (namely that of a commission agent), unless his activities are limited to those mentioned at the end of paragraph 5.

(Added on 28 January 2003; see HISTORY)

38.8 In deciding whether or not particular activities fall within or outside the ordinary course of business of an agent, one would examine the business activities customarily carried out within the agent's trade as a broker, commission agent or other independent agent rather than the other business activities carried out by that agent. Whilst the comparison normally should be made with the activities customary to the agent's trade, other complementary tests may in certain circumstances be used concurrently or alternatively, for example where the agent's activities do not relate to a common trade.

(Added on 28 January 2003; see HISTORY)

39. According to the definition of the term "permanent establishment" an insurance company of one State may be taxed in the other State on its insurance business, if it has a fixed place of business within the meaning of paragraph 1 or if it carries on business through a person within the meaning of paragraph 5. Since agencies of foreign insurance companies sometimes do not meet either of the above requirements, it is conceivable that these companies do large-scale business in a State without being taxed in that State on their profits arising from such business. In order to obviate this possibility, various conventions concluded by OECD member countries include a provision which stipulates that insurance companies of a State are deemed to have a permanent establishment in the other State if they collect premiums in that other State through an agent established there — other than an agent who already constitutes a permanent establishment by virtue of paragraph 5 — or insure risks situated in that territory through such an agent. The decision as to whether or not a provision along these lines should be included in a convention will depend on the factual and legal situation prevailing in the

Contracting States concerned. Frequently, therefore, such a provision will not be contemplated. In view of this fact, it did not seem advisable to insert a provision along these lines in the Model Convention.

(Renumbered on 23 July 1992; see HISTORY)

Paragraph 7

40. It is generally accepted that the existence of a subsidiary company does not, of itself, constitute that subsidiary company a permanent establishment of its parent company. This follows from the principle that, for the purpose of taxation, such a subsidiary company constitutes an independent legal entity. Even the fact that the trade or business carried on by the subsidiary company is managed by the parent company does not constitute the subsidiary company a permanent establishment of the parent company.

(Renumbered on 23 July 1992; see HISTORY)

41. A parent company may, however, be found, under the rules of paragraphs 1 or 5 of the Article, to have a permanent establishment in a State where a subsidiary has a place of business. Thus, any space or premises belonging to the subsidiary that is at the disposal of the parent company (see paragraphs 4, 5 and 6 above) and that constitutes a fixed place of business through which the parent carries on its own business will constitute a permanent establishment of the parent under paragraph 1, subject to paragraphs 3 and 4 of the Article (see for instance, the example in paragraph 4.3 above). Also, under paragraph 5, a parent will be deemed to have a permanent establishment in a State in respect of any activities that its subsidiary undertakes for it if the subsidiary has, and habitually exercises, in that State an authority to conclude contracts in the name of the parent (see paragraphs 32, 33 and 34 above), unless these activities are limited to those referred to in paragraph 4 of the Article or unless the subsidiary acts in the ordinary course of its business as an independent agent to which paragraph 6 of the Article applies.

(Amended on 15 July 2005; see HISTORY)

41.1 The same principles apply to any company forming part of a multinational group so that such a company may be found to have a permanent establishment in a State where it has at its disposal (see paragraphs 4, 5 and 6 above) and uses premises belonging to another company of the group, or if the former company is deemed to have a permanent establishment under paragraph 5 of the Article (see paragraphs 32, 33 and 34 above). The determination of the existence of a permanent establishment under the rules of paragraphs 1 or 5 of the Article must, however, be done separately for each company of the group. Thus, the existence in one State of

a permanent establishment of one company of the group will not have any relevance as to whether another company of the group has itself a permanent establishment in that State.

(Added on 15 July 2005; see HISTORY)

42. Whilst premises belonging to a company that is a member of a multinational group can be put at the disposal of another company of the group and may, subject to the other conditions of Article 5, constitute a permanent establishment of that other company if the business of that other company is carried on through that place, it is important to distinguish that case from the frequent situation where a company that is a member of a multinational group provides services (*e.g.* management services) to another company of the group as part of its own business carried on in premises that are not those of that other company and using its own personnel. In that case, the place where those services are provided is not at the disposal of the latter company and it is not the business of that company that is carried on through that place. That place cannot, therefore, be considered to be a permanent establishment of the company to which the services are provided. Indeed, the fact that a company's own activities at a given location may provide an economic benefit to the business of another company does not mean that the latter company carries on its business through that location: clearly, a company that merely purchases parts produced or services supplied by another company in a different country would not have a permanent establishment because of that, even though it may benefit from the manufacturing of these parts or the supplying of these services.

(Replaced on 15 July 2005; see HISTORY)

Electronic commerce

42.1 There has been some discussion as to whether the mere use in electronic commerce operations of computer equipment in a country could constitute a permanent establishment. That question raises a number of issues in relation to the provisions of the Article.

(Added on 28 January 2003; see HISTORY)

42.2 Whilst a location where automated equipment is operated by an enterprise may constitute a permanent establishment in the country where it is situated (see below), a distinction needs to be made between computer equipment, which may be set up at a location so as to constitute a permanent establishment under certain circumstances, and the data and software which is used by, or stored on, that equipment. For instance, an Internet web site, which is a combination of software and electronic data, does not in itself constitute tangible property. It therefore does not have a location that can

constitute a "place of business" as there is no "facility such as premises or, in certain instances, machinery or equipment" (see paragraph 2 above) as far as the software and data constituting that web site is concerned. On the other hand, the server on which the web site is stored and through which it is accessible is a piece of equipment having a physical location and such location may thus constitute a "fixed place of business" of the enterprise that operates that server.

(Added on 28 January 2003; see HISTORY)

42.3 The distinction between a web site and the server on which the web site is stored and used is important since the enterprise that operates the server may be different from the enterprise that carries on business through the web site. For example, it is common for the web site through which an enterprise carries on its business to be hosted on the server of an Internet Service Provider (ISP). Although the fees paid to the ISP under such arrangements may be based on the amount of disk space used to store the software and data required by the web site, these contracts typically do not result in the server and its location being at the disposal of the enterprise (see paragraph 4 above), even if the enterprise has been able to determine that its web site should be hosted on a particular server at a particular location. In such a case, the enterprise does not even have a physical presence at that location since the web site is not tangible. In these cases, the enterprise cannot be considered to have acquired a place of business by virtue of that hosting arrangement. However, if the enterprise carrying on business through a web site has the server at its own disposal, for example it owns (or leases) and operates the server on which the web site is stored and used, the place where that server is located could constitute a permanent establishment of the enterprise if the other requirements of the Article are met.

(Added on 28 January 2003; see HISTORY)

42.4 Computer equipment at a given location may only constitute a permanent establishment if it meets the requirement of being fixed. In the case of a server, what is relevant is not the possibility of the server being moved, but whether it is in fact moved. In order to constitute a fixed place of business, a server will need to be located at a certain place for a sufficient period of time so as to become fixed within the meaning of paragraph 1.

(Added on 28 January 2003; see HISTORY)

42.5 Another issue is whether the business of an enterprise may be said to be wholly or partly carried on at a location where the enterprise has equipment such as a server at its disposal. The question of whether the business of an enterprise is wholly or partly carried on through such equipment needs to be examined on a case-by-case basis, having regard to whether it can be said

that, because of such equipment, the enterprise has facilities at its disposal where business functions of the enterprise are performed.

(Added on 28 January 2003; see HISTORY)

42.6 Where an enterprise operates computer equipment at a particular location, a permanent establishment may exist even though no personnel of that enterprise is required at that location for the operation of the equipment. The presence of personnel is not necessary to consider that an enterprise wholly or partly carries on its business at a location when no personnel are in fact required to carry on business activities at that location. This conclusion applies to electronic commerce to the same extent that it applies with respect to other activities in which equipment operates automatically, *e.g.* automatic pumping equipment used in the exploitation of natural resources.

(Added on 28 January 2003; see HISTORY)

42.7 Another issue relates to the fact that no permanent establishment may be considered to exist where the electronic commerce operations carried on through computer equipment at a given location in a country are restricted to the preparatory or auxiliary activities covered by paragraph 4. The question of whether particular activities performed at such a location fall within paragraph 4 needs to be examined on a case-by-case basis having regard to the various functions performed by the enterprise through that equipment. Examples of activities which would generally be regarded as preparatory or auxiliary include:

— providing a communications link — much like a telephone line — between suppliers and customers;

— advertising of goods or services;

— relaying information through a mirror server for security and efficiency purposes;

— gathering market data for the enterprise;

— supplying information.

(Added on 28 January 2003; see HISTORY)

42.8 Where, however, such functions form in themselves an essential and significant part of the business activity of the enterprise as a whole, or where other core functions of the enterprise are carried on through the computer equipment, these would go beyond the activities covered by paragraph 4 and if the equipment constituted a fixed place of business of the enterprise (as discussed in paragraphs 42.2 to 42.6 above), there would be a permanent establishment.

(Added on 28 January 2003; see HISTORY)

42.9 What constitutes core functions for a particular enterprise clearly depends on the nature of the business carried on by that enterprise. For instance, some ISPs are in the business of operating their own servers for the purpose of hosting web sites or other applications for other enterprises. For these ISPs, the operation of their servers in order to provide services to customers is an essential part of their commercial activity and cannot be considered preparatory or auxiliary. A different example is that of an enterprise (sometimes referred to as an "e-tailer") that carries on the business of selling products through the Internet. In that case, the enterprise is not in the business of operating servers and the mere fact that it may do so at a given location is not enough to conclude that activities performed at that location are more than preparatory and auxiliary. What needs to be done in such a case is to examine the nature of the activities performed at that location in light of the business carried on by the enterprise. If these activities are merely preparatory or auxiliary to the business of selling products on the Internet (for example, the location is used to operate a server that hosts a web site which, as is often the case, is used exclusively for advertising, displaying a catalogue of products or providing information to potential customers), paragraph 4 will apply and the location will not constitute a permanent establishment. If, however, the typical functions related to a sale are performed at that location (for example, the conclusion of the contract with the customer, the processing of the payment and the delivery of the products are performed automatically through the equipment located there), these activities cannot be considered to be merely preparatory or auxiliary.

(Added on 28 January 2003; see HISTORY)

42.10 A last issue is whether paragraph 5 may apply to deem an ISP to constitute a permanent establishment. As already noted, it is common for ISPs to provide the service of hosting the web sites of other enterprises on their own servers. The issue may then arise as to whether paragraph 5 may apply to deem such ISPs to constitute permanent establishments of the enterprises that carry on electronic commerce through web sites operated through the servers owned and operated by these ISPs. Whilst this could be the case in very unusual circumstances, paragraph 5 will generally not be applicable because the ISPs will not constitute an agent of the enterprises to which the web sites belong, because they will not have authority to conclude contracts in the name of these enterprises and will not regularly conclude such contracts or because they will constitute independent agents acting in the ordinary course of their business, as evidenced by the fact that they host the web sites of many different enterprises. It is also clear that since the web site through which an enterprise carries on its business is not itself a "person" as defined in Article 3, paragraph 5 cannot apply to deem a permanent establishment to

exist by virtue of the web site being an agent of the enterprise for purposes of that paragraph.

(Added on 28 January 2003; see HISTORY)

The taxation of services

42.11 The combined effect of this Article and Article 7 is that the profits from services performed in the territory of a Contracting State by an enterprise of the other Contracting State are not taxable in the first-mentioned State if they are not attributable to a permanent establishment situated therein (as long as they are not covered by other Articles of the Convention that would allow such taxation). This result, under which these profits are only taxable in the other State, is supported by various policy and administrative considerations. It is consistent with the principle of Article 7 that until an enterprise of one State sets up a permanent establishment in another State, it should not be regarded as participating in the economic life of that State to such an extent that it comes within the taxing jurisdiction of that other State. Also, the provision of services should, as a general rule subject to a few exceptions for some types of service (*e.g.* those covered by Article 8 and 17), be treated the same way as other business activities and, therefore, the same permanent establishment threshold of taxation should apply to all business activities, including the provision of independent services.

(Added on 17 July 2008; see HISTORY)

42.12 One of the administrative considerations referred to above is that the extension of the cases where source taxation of profits from services performed in the territory of a Contracting State by an enterprise of the other Contracting State would be allowed would increase the compliance and administrative burden of enterprises and tax administrations. This would be especially problematic with respect to services provided to non-business consumers, which would not need to be disclosed to the source country's tax administration for purposes of claiming a business expense deduction. Since the rules that have typically been designed for that purpose are based on the amount of time spent in a State, both tax administrations and enterprises would need to take account of the time spent in a country by personnel of service enterprises and these enterprises would face the risk of having a permanent establishment in unexpected circumstances in cases where they would be unable to determine in advance how long personnel would be present in a particular country (*e.g.* in situations where that presence would be extended because of unforeseen difficulties or at the request of a client). These cases create particular compliance difficulties as they require an enterprise to retroactively comply with a number of administrative requirements associated with a permanent establishment. These concerns

relate to the need to maintain books and records, the taxation of the employees (*e.g.* the need to make source deductions in another country) as well as other non-income tax requirements.

(Added on 17 July 2008; see HISTORY)

42.13 Also, the source taxation of profits from services performed in the territory of a Contracting State by an enterprise of the other Contracting State that does not have a fixed place of business in the first-mentioned State would create difficulties concerning the determination of the profits to be taxed and the collection of the relevant tax. In most cases, the enterprise would not have the accounting records and assets typically associated with a permanent establishment and there would be no dependent agent which could comply with information and collection requirements. Moreover, whilst it is a common feature of States' domestic law to tax profits from services performed in their territory, it does not necessarily represent optimal tax treaty policy.

(Added on 17 July 2008; see HISTORY)

42.14 Some States, however, are reluctant to adopt the principle of exclusive residence taxation of services that are not attributable to a permanent establishment situated in their territory but that are performed in that territory. These States propose changes to the Article in order to preserve source taxation rights, in certain circumstances, with respect to the profits from such services. States that believe that additional source taxation rights should be allocated under a treaty with respect to services performed in their territory rely on various arguments to support their position.

(Added on 17 July 2008; see HISTORY)

42.15 These States may consider that profits from services performed in a given state should be taxable in that state on the basis of the generally-accepted policy principles for determining when business profits should be considered to have their source within a jurisdiction. They consider that, from the exclusive angle of the pure policy question of where business profits originate, the State where services are performed should have a right to tax even when these services are not attributable to a permanent establishment as defined in Article 5. They would note that the domestic law of many countries provides for the taxation of services performed in these countries even in the absence of a permanent establishment (even though services performed over very short periods of time may not always be taxed in practice).

(Added on 17 July 2008; see HISTORY)

42.16 These States are concerned that some service businesses do not require a fixed place of business in their territory in order to carry on a substantial level of business activities therein and consider that these additional rights are therefore appropriate.

(Added on 17 July 2008; see HISTORY)

42.17 Also, these States consider that even if the taxation of profits of enterprises carried on by non-residents that are not attributable to a permanent establishment raises certain compliance and administrative difficulties, these difficulties do not justify exempting from tax the profits from all services performed on their territory by such enterprises. Those who support that view may refer to mechanisms that are already in place in some States to ensure taxation of services performed in these States but not attributable to permanent establishments (such mechanisms are based on requirements for resident payers to report, and possibly withhold tax on, payments to non-residents for services performed in these States).

(Added on 17 July 2008; see HISTORY)

42.18 It should be noted, however, that all member States agree that a State should not have source taxation rights on income derived from the provision of services performed by a non-resident outside that State. Under tax conventions, the profits from the sale of goods that are merely imported by a resident of a country and that are neither produced nor distributed through a permanent establishment in that country are not taxable therein and the same principle should apply in the case of services. The mere fact that the payer of the consideration for services is a resident of a State, or that such consideration is borne by a permanent establishment situated in that State or that the result of the services is used within the State does not constitute a sufficient nexus to warrant allocation of income taxing rights to that State.

(Added on 17 July 2008; see HISTORY)

42.19 Another fundamental issue on which there is general agreement relates to the determination of the amount on which tax should be levied. In the case of non-employment services (and subject to possible exceptions such as Article 17) only the profits derived from the services should be taxed. Thus, provisions that are sometimes included in bilateral conventions and that allow a State to tax the gross amount of the fees paid for certain services if the payer of the fees is a resident of that State do not seem to provide an appropriate way of taxing services. First, because these provisions are not restricted to services performed in the State of source, they have the effect of allowing a State to tax business activities that do not take place in that State.

Second, these rules allow taxation of the gross payments for services as opposed to the profits therefrom.

(Added on 17 July 2008; see HISTORY)

42.20 Also, member States agree that it is appropriate, for compliance and other reasons, not to allow a State to tax the profits from services performed in their territory in certain circumstances (*e.g.* when such services are provided during a very short period of time).

(Added on 17 July 2008; see HISTORY)

42.21 The Committee therefore considered that it was important to circumscribe the circumstances in which States that did not agree with the conclusion in paragraph 42.11 above could, if they wished to, provide that profits from services performed in the territory of a Contracting State by an enterprise of the other Contracting State would be taxable by that State even if there was no permanent establishment, as defined in Article 5, to which the profits were attributable.

(Added on 17 July 2008; see HISTORY)

42.22 Clearly, such taxation should not extend to services performed outside the territory of a State and should apply only to the profits from these services rather than to the payments for them. Also, there should be a minimum level of presence in a State before such taxation is allowed.

(Added on 17 July 2008; see HISTORY)

42.23 The following is an example of a provision that would conform to these requirements; States are free to agree bilaterally to include such a provision in their tax treaties:

> Notwithstanding the provisions of paragraphs 1, 2 and 3, where an enterprise of a Contracting State performs services in the other Contracting State
>
> *a)* through an individual who is present in that other State for a period or periods exceeding in the aggregate 183 days in any twelve month period, and more than 50 per cent of the gross revenues attributable to active business activities of the enterprise during this period or periods are derived from the services performed in that other State through that individual, or
>
> *b)* for a period or periods exceeding in the aggregate 183 days in any twelve month period, and these services are performed for the same project or for connected projects through one or more individuals who are present and performing such services in that other State

the activities carried on in that other State in performing these services shall be deemed to be carried on through a permanent establishment of the enterprise situated in that other State, unless these services are limited to those mentioned in paragraph 4 which, if performed through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph. For the purposes of this paragraph, services performed by an individual on behalf of one enterprise shall not be considered to be performed by another enterprise through that individual unless that other enterprise supervises, directs or controls the manner in which these services are performed by the individual.

(Added on 17 July 2008; see HISTORY)

42.24 That alternative provision constitutes an extension of the permanent establishment definition that allows taxation of income from services provided by enterprises carried on by non-residents but does so in conformity with the principles described in paragraph 42.22. The following paragraphs discuss various aspects of the alternative provision; clearly these paragraphs are not relevant in the case of treaties that do not include such a provision and do not, therefore, allow a permanent establishment to be found merely because the conditions described in this provision have been met.

(Added on 17 July 2008; see HISTORY)

42.25 The provision has the effect of deeming a permanent establishment to exist where one would not otherwise exist under the definition provided in paragraph 1 and the examples of paragraph 2. It therefore applies notwithstanding these paragraphs. As is the case of paragraph 5 of the Article, the provision provides a supplementary basis under which an enterprise may be found to have a permanent establishment in a State; it could apply, for example, where a consultant provides services over a long period in a country but at different locations that do not meet the conditions of paragraph 1 to constitute one or more permanent establishments. If it can be shown that the enterprise has a permanent establishment within the meaning of paragraphs 1 and 2 (subject to the provisions of paragraph 4), it is not necessary to apply the provision in order to find a permanent establishment. Since the provision simply creates a permanent establishment when none would otherwise exist, it does not provide an alternative definition of the concept of permanent establishment and obviously cannot limit the scope of the definition in paragraph 1 and of the examples in paragraph 2.

(Added on 17 July 2008; see HISTORY)

42.26 The provision also applies notwithstanding paragraph 3. Thus, an enterprise may be deemed to have a permanent establishment because it

performs services in a country for the periods of time provided for in the suggested paragraph even if the various locations where these services are performed do not constitute permanent establishments pursuant to paragraph 3. The following example illustrates that result. A self-employed individual resident of one Contracting State provides services and is present in the other Contracting State for more than 183 days during a twelve month period but his services are performed for equal periods of time at a location that is not a construction site (and are not in relation to a construction or installation project) as well as on two unrelated building sites which each lasts less than the period of time provided for in paragraph 3. Whilst paragraph 3 would deem the two sites not to constitute permanent establishments, the proposed paragraph, which applies notwithstanding paragraph 3, would deem the enterprise carried on by that person to have a permanent establishment (since the individual is self-employed, it must be assumed that the 50 per cent of gross revenues test will be met with respect to his enterprise).

(Added on 17 July 2008; see HISTORY)

42.27 Another example is that of a large construction enterprise that carries on a single construction project in a country. If the project is carried on at a single site, the provision should not have a significant impact as long as the period required for the site to constitute a permanent establishment is not substantially different from the period required for the provision to apply. States that wish to use the alternative provision may therefore wish to consider referring to the same periods of time in that provision and in paragraph 3 of Article 5; if a shorter period is used in the alternative provision, this will reduce, in practice, the scope of application of paragraph 3.

(Added on 17 July 2008; see HISTORY)

42.28 The situation, however, may be different if the project, or connected projects, are carried out in different parts of a country. If the individual sites where a single project is carried on do not last sufficiently long for each of them to constitute a permanent establishment (see, however, paragraph 20 above), a permanent establishment will still be deemed to exist if the conditions of the alternative provision are met. That result is consistent with the purpose of the provision, which is to subject to source taxation foreign enterprises that are present in a country for a sufficiently long period of time notwithstanding the fact that their presence at any particular location in that country is not sufficiently long to make that location a fixed place of business of the enterprise. Some States, however, may consider that paragraph 3 should prevail over the alternative provision and may wish to amend the provision accordingly.

(Added on 17 July 2008; see HISTORY)

42.29 The suggested paragraph only applies to services. Other types of activities that do not constitute services are therefore excluded from its scope. Thus, for instance, the paragraph would not apply to a foreign enterprise that carries on fishing activities in the territorial waters of a State and derives revenues from selling its catches (in some treaties, however, activities such as fishing and oil extraction may be covered by specific provisions).

(Added on 17 July 2008; see HISTORY)

42.30 The provision applies to services performed by an enterprise. Thus, services must be provided by the enterprise to third parties. Clearly, the provision could not have the effect of deeming an enterprise to have a permanent establishment merely because services are provided to that enterprise. For example, services might be provided by an individual to his employer without that employer performing any services (*e.g.* an employee who provides manufacturing services to an enterprise that sells manufactured products). Another example would be where the employees of one enterprise provide services in one country to an associated enterprise under detailed instructions and close supervision of the latter enterprise; in that case, assuming the services in question are not for the benefit of any third party, the latter enterprise does not itself perform any services to which the provision could apply.

(Added on 17 July 2008; see HISTORY)

42.31 Also, the provision only applies to services that are performed in a State by a foreign enterprise. Whether or not the relevant services are furnished to a resident of the State does not matter; what matters is that the services are performed in the State through an individual present in that State.

(Added on 17 July 2008; see HISTORY)

42.32 The alternative provision does not specify that the services must be provided "through employees or other personnel engaged by the enterprise", a phrase that is sometimes found in bilateral treaties. It simply provides that the services must be performed by an enterprise. As explained in paragraph 10, the business of an enterprise (which, in the context of the paragraph, would include the services performed in a Contracting State) "is carried on mainly by the entrepreneur or persons who are in paid-employment relationship with the enterprise (personnel). This personnel includes employees and other persons receiving instructions from the enterprise (*e.g.* dependent agents)." For the purposes of the alternative provision, the individuals through which an enterprise provides services will therefore be the individuals referred to in paragraph 10, subject to the exception included in the last sentence of that provision (see paragraph 42.43 below).

(Added on 17 July 2008; see HISTORY)

42.33 The alternative provision will apply in two different sets of circumstances. Subparagraph *a)* looks at the duration of the presence of the individual through whom an enterprise derives most of its revenues in a way that is similar to that of subparagraph 2 *a)* of Article 15; subparagraph *b)* looks at the duration of the activities of the individuals through whom the services are performed.

(Added on 17 July 2008; see HISTORY)

42.34 Subparagraph *a)* deals primarily with the situation of an enterprise carried on by a single individual. It also covers, however, the case of an enterprise which, during the relevant period or periods, derives most of its revenues from services provided by one individual. Such extension is necessary to avoid a different treatment between, for example, a case where services are provided by an individual and a case where similar services are provided by a company all the shares of which are owned by the only employee of that company.

(Added on 17 July 2008; see HISTORY)

42.35 The subparagraph may apply in different situations where an enterprise performs services through an individual, such as when the services are performed by a sole proprietorship, by the partner of a partnership, by the employee of a company etc. The main conditions are that

- — the individual through whom the services are performed be present in a State for a period or periods exceeding in the aggregate 183 days in any twelve month period, and
- — more than 50 per cent of the gross revenues attributable to active business activities of the enterprise during the period or periods of presence be derived from the services performed in that State through that individual.

(Added on 17 July 2008; see HISTORY)

42.36 The first condition refers to the days of presence of an individual. Since the formulation is identical to that of subparagraph 2 *a)* of Article 15, the principles applicable to the computation of the days of presence for purposes of that last subparagraph are also applicable to the computation of the days of presence for the purpose of the suggested paragraph.

(Added on 17 July 2008; see HISTORY)

42.37 For the purposes of the second condition, according to which more than 50 per cent of the gross revenues attributable to active business activities of the enterprise during the relevant period or periods must be derived from the services performed in that State through that individual, the gross revenues attributable to active business activities of the enterprise would represent

what the enterprise has charged or should charge for its active business activities, regardless of when the actual billing will occur or of domestic law rules concerning when such revenues should be taken into account for tax purposes. Such active business activities are not restricted to activities related to the provision of services. Gross revenues attributable to "active business activities" would clearly exclude income from passive investment activities, including, for example, receiving interest and dividends from investing surplus funds. States may, however, prefer to use a different test, such as "50 per cent of the business profits of the enterprise during this period or periods is derived from the services" or "the services represent the most important part of the business activities of the enterprise", in order to identify an enterprise that derives most of its revenues from services performed by an individual on their territory.

(Added on 17 July 2008; see HISTORY)

42.38 The following examples illustrate the application of subparagraph *a)* (assuming that the alternative provision has been included in a treaty between States R and S):

— Example 1: W, a resident of State R, is a consultant who carries on her business activities in her own name (*i.e.* that enterprise is a sole proprietorship). Between 2 February 00 and 1 February 01, she is present in State S for a period or periods of 190 days and during that period all the revenues from her business activities are derived from services that she performs in State S. Since subparagraph *a)* applies in that situation, these services shall be deemed to be performed through a permanent establishment in State S.

— Example 2: X, a resident of State R, is one of the two shareholders and employees of XCO, a company resident of State R that provides engineering services. Between 20 December 00 and 19 December 01, X is present in State S for a period or periods of 190 days and during that period, 70 per cent of all the gross revenues of XCO attributable to active business activities are derived from the services that X performs in State S. Since subparagraph *a)* applies in that situation, these services shall be deemed to be performed through a permanent establishment of XCO in State S.

— Example 3: X and Y, who are residents of State R, are the two partners of X&Y, a partnership established in State R which provides legal services. For tax purposes, State R treats partnerships as transparent entities. Between 15 July 00 and 14 July 01, Y is present in State S for a period or periods of 240 days and during that period, 55 per cent of all the fees of X&Y attributable to X&Y's active business activities are derived from the services that Y performs in State S. Subparagraph *a)* applies in that

situation and, for the purposes of the taxation of X and Y, the services performed by Y are deemed to be performed through a permanent establishment in State S.

— Example 4: Z, a resident of State R, is one of 10 employees of ACO, a company resident of State R that provides accounting services. Between 10 April 00 and 9 April 01, Z is present in State S for a period or periods of 190 days and during that period, 12 per cent of all the gross revenues of ACO attributable to its active business activities are derived from the services that Z performs in State S. Subparagraph *a)* does not apply in that situation and, unless subparagraph *b)* applies to ACO, the alternative provision will not deem ACO to have a permanent establishment in State S.

(Added on 17 July 2008; see HISTORY)

42.39 Subparagraph *b)* addresses the situation of an enterprise that performs services in a Contracting State in relation to a particular project (or for connected projects) and which performs these through one or more individuals over a substantial period. The period or periods referred to in the subparagraph apply in relation to the enterprise and not to the individuals. It is therefore not necessary that it be the same individual or individuals who perform the services and are present throughout these periods. As long as, on a given day, the enterprise is performing its services through at least one individual who is doing so and is present in the State, that day would be included in the period or periods referred to in the subparagraph. Clearly, however, that day will count as a single day regardless of how many individuals are performing such services for the enterprise during that day.

(Added on 17 July 2008; see HISTORY)

42.40 The reference to an "enterprise … performing these services for the same project" should be interpreted from the perspective of the enterprise that provides the services. Thus, an enterprise may have two different projects to provide services to a single customer (*e.g.* to provide tax advice and to provide training in an area unrelated to tax) and whilst these may be related to a single project of the customer, one should not consider that the services are performed for the same project.

(Added on 17 July 2008; see HISTORY)

42.41 The reference to "connected projects" is intended to cover cases where the services are provided in the context of separate projects carried on by an enterprise but these projects have a commercial coherence (see paragraphs 5.3 and 5.4 above). The determination of whether projects are connected will depend on the facts and circumstances of each case but factors that would generally be relevant for that purpose include:

— whether the projects are covered by a single master contract;

— where the projects are covered by different contracts, whether these different contracts were concluded with the same person or with related persons and whether the conclusion of the additional contracts would reasonably have been expected when concluding the first contract;

— whether the nature of the work involved under the different projects is the same;

— whether the same individuals are performing the services under the different projects.

(Added on 17 July 2008; see HISTORY)

42.42 Subparagraph *b)* requires that during the relevant periods, the enterprise is performing services through individuals who are performing such services in that other State. For that purpose, a period during which individuals are performing services means a period during which the services are actually provided, which would normally correspond to the working days of these individuals. An enterprise that agrees to keep personnel available in case a client needs the services of such personnel and charges the client standby charges for making such personnel available is performing services through the relevant individuals even though they are idle during the working days when they remain available.

(Added on 17 July 2008; see HISTORY)

42.43 As indicated in paragraph 42.32, for the purposes of the alternative provision, the individuals through whom an enterprise provides services will be the individuals referred to in paragraph 10 above. If, however, an individual is providing the services on behalf of one enterprise, the exception included in the last sentence of the provision clarifies that the services performed by that individual will only be taken into account for another enterprise if the work of that individual is exercised under the supervision, direction or control of the last-mentioned enterprise. Thus, for example, where a company that has agreed by contract to provide services to third parties provides these services through the employees of a separate enterprise (*e.g.* an enterprise providing outsourced services), the services performed through these employees will not be taken into account for purposes of the application of subparagraph *b)* to the company that entered into the contract to provide services to third parties. This rule applies regardless of whether the separate enterprise is associated to, or independent from, the company that entered into the contract.

(Added on 17 July 2008; see HISTORY)

42.44 The following examples illustrate the application of subparagraph *b)* (assuming that the alternative provision has been included in a treaty between States R and S):

— Example 1: X, a company resident of State R, has agreed with company Y to carry on geological surveys in various locations in State S where company Y owns exploration rights. Between 15 May 00 and 14 May 01, these surveys are carried on over 185 working days by employees of X as well as by self-employed individuals to whom X has sub-contracted part of the work but who work under the direction, supervision or control of X. Since subparagraph *b)* applies in that situation, these services shall be deemed to be performed through a permanent establishment of X in State S.

— Example 2: Y, a resident of State T, is one of the two shareholders and employees of WYCO, a company resident of State R that provides training services. Between 10 June 00 and 9 June 01, Y performs services in State S under a contract that WYCO has concluded with a company which is a resident of State S to train the employees of that company. These services are performed in State S over 185 working days. During the period of Y's presence in State S, the revenues from these services account for 40 per cent of the gross revenues of WYCO from its active business activities. Whilst subparagraph *a)* does not apply in that situation, subparagraph *b)* applies and these services shall be deemed to be performed through a permanent establishment of WYCO in State S.

— Example 3: ZCO, a resident of State R, has outsourced to company OCO, which is a resident of State S, the technical support that it provides by telephone to its clients. OCO operates a call centre for a number of companies similar to ZCO. During the period of 1 January 00 to 31 December 00, the employees of OCO provide technical support to various clients of ZCO. Since the employees of OCO are not under the supervision, direction or control of ZCO, it cannot be considered, for the purposes of subparagraph *b)*, that ZCO is performing services in State S through these employees. Additionally, whilst the services provided by OCO's employees to the various clients of ZCO are similar, these are provided under different contracts concluded by ZCO with unrelated clients: these services cannot, therefore, be considered to be rendered for the same or connected projects.

(Added on 17 July 2008; see HISTORY)

42.45 The 183-day thresholds provided for in the alternative provision may give rise to the same type of abuse as is described in paragraph 18 above. As indicated in that paragraph, legislative or judicial anti-avoidance rules may apply to prevent such abuses. Some States, however, may prefer to deal with

them by including a specific provision in the Article. Such a provision could be drafted along the following lines:

> For the purposes of paragraph [x], where an enterprise of a Contracting State that is performing services in the other Contracting State is, during a period of time, associated with another enterprise that performs substantially similar services in that other State for the same project or for connected projects through one or more individuals who, during that period, are present and performing such services in that State, the first-mentioned enterprise shall be deemed, during that period of time, to be performing services in the other State for that same project or for connected projects through these individuals. For the purpose of the preceding sentence, an enterprise shall be associated with another enterprise if one is controlled directly or indirectly by the other, or both are controlled directly or indirectly by the same persons, regardless of whether or not these persons are residents of one of the Contracting States.

(Added on 17 July 2008; see HISTORY)

42.46 According to the provision, the activities carried on in the other State by the individuals referred to in subparagraph *a)* or *b)* through which the services are performed by the enterprise during the period or periods referred to in these subparagraphs are deemed to be carried on through a permanent establishment that the enterprise has in that other State. The enterprise is therefore deemed to have a permanent establishment in that other State for the purposes of all the provisions of the Convention (including, for example, paragraph 5 of Article 11 and paragraph 2 of Article 15) and the profits derived from the activities carried on in the other State in providing these services are attributable to that permanent establishment and are therefore taxable in that State pursuant to Article 7.

(Added on 17 July 2008; see HISTORY)

42.47 By deeming the activities carried on in performing the relevant services to be carried on through a permanent establishment that the enterprise has in a Contracting State, the provision allows the application of Article 7 and therefore, the taxation, by that State, of the profits attributable to these activities. As a general rule, it is important to ensure that only the profits derived from the activities carried on in performing the services are taxed; whilst there may be certain exceptions, it would be detrimental to the cross-border trade in services if payments received for these services were taxed regardless of the direct or indirect expenses incurred for the purpose of performing these services.

(Added on 17 July 2008; see HISTORY)

42.48 This alternative provision will not apply if the services performed are limited to those mentioned in paragraph 4 of Article 5 which, if performed through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph. Since the provision refers to the performance of services by the enterprise and this would not cover services provided to the enterprise itself, most of the provisions of paragraph 4 would not appear to be relevant. It may be, however, that the services that are performed are exclusively of a preparatory or auxiliary character (*e.g.* the supply of information to prospective customers when this is merely preparatory to the conduct of the ordinary business activities of the enterprise; see paragraph 23 above) and in that case, it is logical not to consider that the performance of these services will constitute a permanent establishment.

(Added on 17 July 2008; see HISTORY)

Observations on the Commentary

43. Concerning paragraph 26.1, *Germany* reserves its position on whether and under which circumstances the acquisition of a right of disposal over the transport capacity of pipelines or the capacity of technical installations, lines and cables for the transmission of electrical power or communications (including the distribution of radio and television programs) owned by an unrelated third party could result in disposal over the pipeline, cable or line as a fixed place of business.

(Replaced on 22 July 2010; see HISTORY)

44. The *Czech Republic* and the *Slovak Republic* would add to paragraph 25 their view that when an enterprise has established an office (such as a commercial representation office) in a country, and the employees working at that office are substantially involved in the negotiation of contracts for the import of products or services into that country, the office will in most cases not fall within paragraph 4 of Article 5. Substantial involvement in the negotiations exists when the essential parts of the contract — the type, quality, and amount of goods, for example, and the time and terms of delivery — are determined by the office. These activities form a separate and indispensable part of the business activities of the foreign enterprise, and are not simply activities of an auxiliary or preparatory character.

(Amended on 28 January 2003; see HISTORY)

45. Regarding paragraph 38, *Mexico* believes that the arm's length principle should also be considered in determining whether or not an agent is of an independent status for purposes of paragraph 6 of the Article and wishes,

when necessary, to add wording to its conventions to clarify that this is how the paragraph should be interpreted.

(Amended on 28 January 2003; see HISTORY)

45.1 *(Deleted on 15 July 2005; see HISTORY)*

45.2 *Italy* and *Portugal* deem as essential to take into consideration that — irrespective of the meaning given to the third sentence of paragraph 1.1 — as far as the method for computing taxes is concerned, national systems are not affected by the new wording of the model, *i.e.* by the elimination of Article 14.

(Added on 29 April 2000; see HISTORY)

45.3 The *Czech Republic* has expressed a number of explanations and reservations on the report on "Issues Arising Under Article 5 of the OECD Model Tax Convention". In particular, the Czech Republic does not agree with the interpretation mentioned in paragraphs 5.3 (first part of the paragraph) and 5.4 (first part of the paragraph). According to its policy, these examples could also be regarded as constituting a permanent establishment if the services are furnished on its territory over a substantial period of time.

(Added on 28 January 2003; see HISTORY)

45.4 As regards paragraph 17, the *Czech Republic* adopts a narrower interpretation of the term "installation project" and therefore, it restricts it to an installation and assembly related to a construction project. Furthermore, the Czech Republic adheres to an interpretation that supervisory activities will be automatically covered by paragraph 3 of Article 5 only if they are carried on by the building contractor. Otherwise, they will be covered by it, but only if they are expressly mentioned in this special provision. In the case of an installation project not in relation with a construction project and in the case that supervisory activity is carried on by an enterprise other than the building contractor and it is not expressly mentioned in paragraph 3 of Article 5, then these activities are automatically subject to the rules concerning the taxation of income derived from the provision of other services.

(Added on 28 January 2003; see HISTORY)

45.5 In relation to paragraphs 42.1 to 42.10, the *United Kingdom* takes the view that a server used by an e-tailer, either alone or together with web sites, could not as such constitute a permanent establishment.

(Added on 28 January 2003; see HISTORY)

45.6 *Chile* and *Greece* do not adhere to all the interpretations in paragraphs 42.1 to 42.10.

(Replaced on 22 July 2010; see HISTORY)

45.7 *Germany* does not agree with the interpretation of the "painter example" in paragraph 4.5 which it regards as inconsistent with the principle stated in the first sentence of paragraph 4.2, thus not giving rise to a permanent establishment under Article 5 paragraph 1 of the Model Convention. As regards the example described in paragraph 5.4, Germany would require that the consultant has disposal over the offices used apart from his mere presence during the training activities.

(Added on 15 July 2005; see HISTORY)

45.8 *Germany* reserves its position concerning the scope and limits of application of guidance in sentences 2 and 5 to 7 in paragraph 6, taking the view that in order to permit the assumption of a fixed place of business, the necessary degree of permanency requires a certain minimum period of presence during the year concerned, irrespective of the recurrent or other nature of an activity. Germany does in particular not agree with the criterion of economic nexus — as described in sentence 6 of paragraph 6 — to justify an exception from the requirements of qualifying presence and duration.

(Added on 15 July 2005; see HISTORY)

45.9 *Germany*, as regards paragraph 33.1 (with reference to paragraphs 32 and 6), attaches increased importance to the requirement of minimum duration of representation of the enterprise under Article 5 paragraph 5 of the Model Convention in the absence of a residence and/or fixed place of business of the agent in the source country. Germany therefore in these cases takes a particularly narrow view on the applicability of the factors mentioned in paragraph 6.

(Added on 15 July 2005; see HISTORY)

45.10 *Italy* wishes to clarify that, with respect to paragraphs 33, 41, 41.1 and 42, its jurisprudence is not to be ignored in the interpretation of cases falling in the above paragraphs.

(Added on 15 July 2005; see HISTORY)

45.11 *Portugal* wishes to reserve its right not to follow the position expressed in paragraphs 42.1 to 42.10.

(Added on 17 July 2008; see HISTORY)

Reservations on the Article

Paragraph 1

46. *Australia* reserves the right to treat an enterprise as having a permanent establishment in a State if it carries on activities relating to natural resources or operates substantial equipment in that State with a certain degree of

continuity, or a person — acting in that State on behalf of the enterprise — manufactures or processes in that State goods or merchandise belonging to the enterprise.

(Amended on 17 July 2008; see HISTORY)

47. Considering the special problems in applying the provisions of the Model Convention to offshore hydrocarbon exploration and exploitation and related activities, *Canada*, *Denmark*, *Ireland*, *Norway* and the *United Kingdom* reserve the right to insert in a special article provisions related to such activities.

(Renumbered on 22 July 2010; see HISTORY)

48. *Chile* reserves the right to deem an enterprise to have a permanent establishment in certain circumstances where services are provided.

(Replaced on 22 July 2010; see HISTORY)

49. The *Czech Republic* and the *Slovak Republic*, whilst agreeing with the "fixed place of business" requirement of paragraph 1, reserve the right to propose in bilateral negotiations specific provisions clarifying the application of this principle to arrangements for the performance of services over a substantial period of time.

(Renumbered on 22 July 2010; see HISTORY)

50. *Greece* reserves the right to treat an enterprise as having a permanent establishment in Greece if the enterprise carries on planning, supervisory or consultancy activities in connection with a building site or construction or installation project lasting more than six months, if scientific equipment or machinery is used in Greece for more than three months by the enterprise in the exploration or extraction of natural resources or if the enterprise carries out more than one separate project, each one lasting less than six months, in the same period of time (*i.e.* within a calendar year).

(Added on 23 July 1992; see HISTORY)

51. *Greece* reserves the right to insert special provisions relating to offshore activities.

(Renumbered on 22 July 2010; see HISTORY)

52. *Mexico* reserves the right to tax individuals performing professional services or other activities of an independent character if they are present in Mexico for a period or periods exceeding in the aggregate 183 days in any twelve month period.

(Renumbered on 22 July 2010; see HISTORY)

53. *New Zealand* reserves the right to insert provisions that deem a permanent establishment to exist if, for more than six months, an enterprise

conducts activities relating to the exploration or exploitation of natural resources or uses or leases substantial equipment.

(Renumbered on 22 July 2010; see HISTORY)

54. *Turkey* reserves the right to treat a person as having a permanent establishment in Turkey if the person performs professional services and other activities of independent character, including planning, supervisory or consultancy activities, with a certain degree of continuity either directly or through the employees of a separate enterprise.

(Renumbered on 22 July 2010; see HISTORY)

Paragraph 2

55. *Canada* and *Chile* reserve the right in subparagraph 2 *f)* to replace the words "of extraction" with the words "relating to the exploration for or the exploitation".

(Renumbered and amended on 22 July 2010; see HISTORY)

56. *Greece* reserves the right to include paragraph 2 of Article 5 as it was drafted in the 1963 Draft Convention.

(Renumbered on 22 July 2010; see HISTORY)

Paragraph 3

57. *Australia*, *Chile*, *Greece*, *Korea*, *New Zealand*, *Portugal* and *Turkey* reserve their positions on paragraph 3, and consider that any building site or construction or installation project which lasts more than six months should be regarded as a permanent establishment.

(Renumbered and amended on 22 July 2010; see HISTORY)

58. *Australia* reserves the right to treat an enterprise as having a permanent establishment in a State if it carries on in that State supervisory or consultancy activities for more than 183 days in any twelve month period in connection with a building site or construction or installation project in that State.

(Replaced on 22 July 2010; see HISTORY)

59. *Korea* reserves its position so as to be able to tax an enterprise which carries on supervisory activities for more than six months in connection with a building site or construction or installation project lasting more than six months.

(Renumbered on 22 July 2010; see HISTORY)

60. *Slovenia* reserves the right to include connected supervisory or consultancy activities in paragraph 3 of the Article.

(Amended and renumbered on 22 July 2010; see HISTORY)

61. *Mexico* and the *Slovak Republic* reserve the right to tax an enterprise that carries on supervisory activities for more than six months in connection with a building site or a construction, assembly, or installation project.

(Renumbered and amended on 22 July 2010; see HISTORY)

62. *Mexico* and the *Slovak Republic* reserve their position on paragraph 3 and consider that any building site or construction, assembly, or installation project that lasts more than six months should be regarded as a permanent establishment.

(Renumbered on 22 July 2010; see HISTORY)

63. *Poland* and *Slovenia* reserve the right to replace "construction or installation project" with "construction, assembly, or installation project".

(Renumbered and amended on 22 July 2010; see HISTORY)

64. *Portugal* reserves the right to treat an enterprise as having a permanent establishment in Portugal if the enterprise carries on an activity consisting of planning, supervising, consulting, any auxiliary work or any other activity in connection with a building site or construction or installation project lasting more than six months, if such activities or work also last more than six months.

(Renumbered on 22 July 2010; see HISTORY)

65. The *United States* reserves the right to add "a drilling rig or ship used for the exploration of natural resources" to the activities covered by the twelve month threshold test in paragraph 3.

(Renumbered and amended on 22 July 2010; see HISTORY)

Paragraph 4

66. *Chile* reserves the right to amend paragraph 4 by eliminating subparagraph *f*) and replacing subparagraph *e*) with the corresponding text of the 1963 Draft Model Tax Convention.

(Added on 22 July 2010; see HISTORY)

67. *Mexico* reserves the right to exclude subparagraph *f)* of paragraph 4 of the Article to consider that a permanent establishment could exist where a fixed place of business is maintained for any combination of activities mentioned in subparagraphs *a)* to *e)* of paragraph 4.

(Renumbered on 22 July 2010; see HISTORY)

Paragraph 6

68. *Slovenia* reserves the right to amend paragraph 6 to make clear that an agent whose activities are conducted wholly or almost wholly on behalf of a single enterprise will not be considered an agent of an independent status.

(Added on 22 July 2010; see HISTORY)

HISTORY

Title: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title read as follows:

"COMMENTARY ON ARTICLE 5 CONCERNING PERMANENT ESTABLISHMENT"

Paragraph 1: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 1 read as follows:

"1. The permanent establishment Article is the result of a good deal of discussion and much careful thought and consideration. During the drafting of the Article a number of proposals and suggestions were made which for good reason were finally rejected. In view of this, the Commentary does not restrict itself to giving the reasons for, and putting a gloss on, the proposals now contained in the Article. It also mentions the reasons for the rejection or omission of a number of the more important proposals that were not ultimately adopted, since these omissions are themselves of some significance and the reasons for them may be of interest."

Paragraph 1.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000).

Paragraph 2: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 1 read as follows 2 read as follows:

"2. For the sake of clarity, it is preferable to have a general definition of the concept of "permanent establishment" which is set out in a separate paragraph and not one which is almost hidden in a list of a number of agreed examples, as is the case in Article V, paragraph 1, of the Mexico and London Drafts of the Model Tax Convention published by the League of Nations. For this reason, the Article begins in paragraph 1 by attempting a general definition of "permanent establishment". This general definition attempts to bring out the essential characteristic of a permanent establishment, viz. that it has a distinct "situs", a "fixed place of business"."

Paragraph 3: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. It could perhaps be argued that in the terms of the general definition some mention should also be made of the other characteristic of a permanent

establishment to which some importance is attached in the Commentary on the Mexico and London Drafts, namely that, in the words of that Commentary, the establishment "must have a productive character — *i.e.* contribute to business earnings". In the present permanent establishment Article this course has not been taken. Within the framework of a well run business organisation it is surely axiomatic to assume that each part contributes to the productivity of the whole. It does not, of course, follow in every case that because in the wider context of the whole organisation a particular establishment has a "productive character" it is consequently an establishment to which profits can properly be attributed for the purpose of tax in a particular territory (see the Commentary on paragraph 3)."

Paragraph 4: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 4 read as follows:

"4. The criterion of "productive character" having been rejected, it would have been possible as an alternative to add to the general definition as it is now drafted in paragraph 1 of the Article the criterion of "profitability". This course was not taken mainly because the concept of profitability did not seem wholly relevant. There seemed to be three possible ways of distinguishing such a concept. First, it would be possible to add at the end of the general definition as it now stands in paragraph 1, the words "and through which profits are made or realised" or some similar formula. But this is clearly unsatisfactory because a permanent establishment which makes profits one year may not do so the next and it would be a most unfortunate result if, because of fluctuations in profitability, certain business activities were deemed to constitute a permanent establishment in one year and not in the next. To some extent this difficulty could be surmounted by taking the second course and adopting a formula on the lines "and through which, taking one year with another, profits are made or realised", but this is by no means a complete answer to the problem, because even a branch establishment which year after year itself makes a loss may, nevertheless, in the context of the whole enterprise of which it is a part, "contribute to business earnings" in the sense that the League of Nations' Commentary seems to have meant. The third course is to draft an addition to the general definition in a manner which pays no regard to the question whether the establishment does or does not make distinguishable profits and to adopt the formula "... in which the business of the enterprise is wholly or partly carried on with the intention of realising profits". In many respects this third course could perhaps be regarded as the most satisfactory of the three, because it ignores what may be the actual accounting results of the enterprise and attempts to define its inherent profitability. But as will be seen, it is based upon a test not of fact but of motive and this is clearly a serious objection. To import a motive test into a set of rules intended to define with precision the taxation liabilities of individuals and companies is wholly undesirable and obviously unacceptable on that ground alone."

Paragraph 4.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 4.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 4.3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 4.4: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 4.5: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 4.6: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 5: Amended on 23 July 1992, by replacing the cross reference to "paragraph 19" by a reference to "paragraph 20" (see history of paragraph 20) by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 5 read as follows:

> "5. According to the definition, the place of business has to be a "fixed" one. Thus in the normal way there has to be a link between the place of business and a specific geographical point. It is immaterial how long an enterprise of a Contracting State operates in the other Contracting State if it does not do so at a distinct place, but this does not mean that the equipment constituting the place of business has to be actually fixed to the soil on which it stands. It is enough that the equipment remains on a particular site (but cf. paragraph 19 below)."

Paragraph 5 of the 1977 Model Convention replaced paragraph 5 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 5 read as follows:

> "5. The general definition in paragraph 1 of the Article has, therefore, been drafted in its present form because it is the one which gives the greatest clarity and which promises to be the easiest to administer. There follows in paragraph 2 a list of prima facie examples of permanent establishments. In paragraph 3 there is provided a list of specific exceptions which, although they involve a fixed place of business should be excepted from the general rule in order to foster international trade or for convenience of administration. It is not, of course, suggested that the list in paragraph 2 is exhaustive. The last words of paragraph 3 (*e*) also provide a generalised exception to the general definition laid down in paragraph 1. These words have the effect of restricting to some extent the effect of paragraph 1 and go some way to meeting criticism that the scope of the general definition is too wide."

Paragraph 5.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent

Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 5.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 5.3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 5.4: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 5.5: Added on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 6: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). In the 1977 Model Convention and until 28 January 2003, paragraph 6 read as follows:

> "6. Since the place of business must be fixed, it also follows that a permanent establishment can be deemed to exist only if the place of business has a certain degree of permanency, *i.e.* if it is not of a purely temporary nature. If the place of business was not set up merely for a temporary purpose, it can constitute a permanent establishment, even though it existed, in practice, only for a very short period of time because of the special nature of the activity of the enterprise or because, as a consequence of special circumstances (*e.g.* death of the taxpayer, investment failure), it was prematurely liquidated. Where a place of business which was, at the outset, designed for a short temporary purpose only, is maintained for such a period that it cannot be considered as a temporary one, it becomes a fixed place of business and thus — retrospectively — a permanent establishment."

Paragraph 6 of the 1977 Model Convention replaced paragraph 6 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 6 read as follows:

> "6. During the drafting of the permanent establishment Article a good deal of consideration was given to the question whether it should contain some special provision for itinerant merchants, pedlars and watermen. After careful consideration it was decided that in such cases there should only be deemed to be a permanent establishment if there is a fixed place of business. Itinerants of this kind are, in general, subject to tax in the country of residence. A special provision to deal with these people seems unnecessary because their income will, in general be small and it is likely to be most difficult to tax them in any country except the one in which they reside. Moreover, any loss of tax which a country may suffer through giving up its right to tax itinerants from other countries is likely to be more

or less compensated by the fact it will have the sole right to tax itinerants residing within its own borders. It may be, of course, that countries with common frontiers will regard this problem as of sufficient importance to merit some special provision."

Paragraph 6.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 6.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 6.3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 7: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, the heading preceding paragraph 7 was moved immediately before paragraph 11. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 7 read as follows:

"7. This paragraph contains a list, by no means exhaustive, of examples each of which can be regarded a priori as constituting a "permanent establishment". In the many bilateral Conventions concluded between O.E.C.D. Member countries there can, of course, be found other examples which, because of their importance in relation to the domestic taxation law of one or both of the contracting parties, have an equally strong claim to be included in this paragraph. In drafting this paragraph there were, however, three possible courses. First, there could have been compiled a composite paragraph which would necessarily have been of considerable length and would in effect have consolidated and brought together all the particular instances of permanent establishments which Member countries have found it convenient to include in their Conventions with one another. Secondly, there could have been drawn up a paragraph of medium length, selecting some of the more usual examples from existing bilateral Conventions and rejecting others, giving reasons for the choice. Finally, it would have been possible to take the minimum list of those examples common to, and agreed between Member countries. The method finally selected was to a considerable degree dictated by the nature of the task with which the draftsmen of the Article were faced. The main purpose of preparing a new permanent establishment Article was to delimit with some degree of precision the common ground between Member countries, in other words to compile an Article which Member countries would be able to accept with a minimum of discussion. With this purpose in mind it would have been a singularly useless exercise to pursue the first of the courses outlined above; the resulting Article would have been of inordinate length and many of its examples would have been completely inapplicable to the circumstances of a large number of Member countries. Similarly with the second course; to select from the many Conventions which exist examples worthy of inclusion would have been somewhat invidious and, unless the selection had been based on an extremely precise and detailed knowledge of the domestic law of each Member country — in the nature of things a most difficult test to satisfy — would have been scarcely less than impertinent.

Moreover, the resulting Article would have suffered from many of the defects inherent in the first of the courses mentioned above; some of its examples would have been inapplicable to the circumstances of many Member countries."

Paragraph 8: Amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992 on the basis of a previous report entitled "The Taxation of Income Derived from the Leasing of Industrial, Commercial or Scientific Equipment" (adopted by the OECD Council on 13 September 1983). In the 1977 Model Convention and until 23 July 1992, paragraph 8 read as follows:

"8. Where tangible property such as facilities, equipment, buildings, or intangible property such as patents, procedures and similar property, are let or leased to third parties through a fixed place of business maintained by an enterprise of a Contracting State in the other State, this activity will, in general, render the place of business a permanent establishment. The same applies if capital is made available through a fixed place of business. If an enterprise of a State lets or leases facilities, equipment, buildings or intangible property to an enterprise of the other State without maintaining for such letting or leasing activity a fixed place of business in the other State, the leased facility, equipment, building or intangible property, as such, will not constitute a permanent establishment of the lessor provided the contract is limited to the mere leasing of the equipment, etc. This remains the case even when, for example, the lessor supplies personnel after installation to operate the equipment provided that their responsibility is limited solely to the operation or maintenance of the equipment under the direction, responsibility and control of the lessee. If the personnel have wider responsibilities, for example, participation in the decisions regarding the work for which the equipment is used, the activity of the lessor may go beyond the mere leasing of equipment and may constitute an entrepreneurial activity. In such a case a permanent establishment could be deemed to exist if the criterion of permanency is met. When such activity is connected with, or is similar in character to, those mentioned in paragraph 3, the time limit of twelve months applies. Other cases have to be determined according to the circumstances."

Paragraph 8 of the 1977 Model Convention replaced paragraph 8 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 8 read as follows:

"8. It is, therefore, the third course which has been taken. Basing itself on Article V of the Mexico and London Drafts, the Article attempts to comprise a list of examples which represent common ground on which Member countries are able to agree. There has been included in paragraph 2 most of the examples given in sub-paragraph 1 of Article V of the Mexico and London Drafts; there is, however, one addition and there are one or two exceptions. There has been added "place of management"; it is considered that this example should be specially mentioned since a "place of management" need not necessarily be an "office". On the other hand, it did not seem necessary to include "head office". Insofar as this term is not covered, like "professional premises" which has also been omitted, by the general term "office" it seemed that the "head office" of an organisation would normally be a "place of management". "Installations" has also been left out as being a term so general as to be virtually meaningless. The terms "building site or construction or assembly project" cover constructional activities such as excavating or dredging. The provision that a building site or assembly project shall only be deemed to be a permanent establishment if it exists for more than twelve months is not intended to prevent a country from raising a tax assessment before a year has expired if it appears that the site or project is likely to last for more than twelve months. The

period of twelve months may, of course, fall, in part, into more than one fiscal year."

Paragraph 9: Replaced paragraph 9 of the 1977 Model Convention on 23 July 1992. Paragraph 9 of the 1977 Model Convention was amended and renumbered as paragraph 10 (see history of paragraph 10) and a new paragraph 9 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 9.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 10: Corresponds to paragraph 9 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 10 of the 1977 Model Convention was renumbered as paragraph 11 (see history of paragraph 11) and paragraph 9 was renumbered as paragraph 10 and amended, by replacing the cross reference therein to paragraph 34 by a reference to paragraph 35, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 9 read as follows:

"9. The business of an enterprise is carried on mainly by the entrepreneur or persons who are in a paid-employment relationship with the enterprise (personnel). This personnel includes employees and other persons receiving instructions from the enterprise (*e.g.* dependent agents). The powers of such personnel in its relationship with third parties are irrelevant. It makes no difference whether or not the dependent agent is authorised to conclude contracts if he works at the fixed place of business (cf. paragraph 34 below). But a permanent establishment may nevertheless exist if the business of the enterprise is carried on mainly through automatic equipment, the activities of the personnel being restricted to setting up, operating, controlling and maintaining such equipment. Whether or not gaming and vending machines and the like set up by an enterprise of a State in the other State constitute a permanent establishment thus depends on whether or not the enterprise carries on a business activity besides the initial setting up of the machines. A permanent establishment does not exist if the enterprise merely sets up the machines and then leases the machines to other enterprises. A permanent establishment may exist, however, if the enterprise which sets up the machines also operates and maintains them for its own account. This also applies if the machines are operated and maintained by an agent dependent on the enterprise."

Paragraph 9 of the 1977 Model Convention replaced paragraph 9 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 9 read as follows:

"9. During the drafting of the Article it was proposed that the term "warehouse" should be included as a separate item in paragraph 2. This example has been traditionally included in similar Articles as sufficiently important to merit particular mention. The purpose of including the term was, of course, to cover those warehouses in which the business of letting storage space or other facilities to third parties was carried on. The insertion of the term was not intended to treat as a permanent establishment a warehouse controlled by an enterprise, but used only for the storage, etc., of its own goods. It was, however, suggested that to insert the term would cause confusion and that the term "warehouse" in paragraph 2 read together with a) and b) of paragraph 3 would be misleading. It was accordingly decided not to include the term "warehouse" in paragraph 2. A warehouse in which the business of letting facilities for storage, etc. to third parties is carried on will be

a permanent establishment under the general definition of paragraph 1 even though it is not specifically mentioned in the list of examples in paragraph 2. Paragraph 3, however, makes it clear that a warehouse is not a permanent establishment if it is used by the enterprise which controls it merely for the purpose of storage, etc."

Paragraph 11: Corresponds to paragraph 10 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 11 of the 1977 Model Convention was renumbered as paragraph 12 (see history of paragraph 12), the heading preceding paragraph 11 was moved with it and paragraph 10 was renumbered as paragraph 11 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 10 of the 1977 Model Convention replaced paragraph 10 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 10 read as follows:

"10. This paragraph contains, first, a number of examples of forms of business activity which should not be treated as constituting permanent establishments even though the activity is carried on in a fixed place of business and, secondly, in the last few words of sub-paragraph e), a generalised exception to the rule laid down in paragraph 1 that a "fixed place of business in which the business of the enterprise is wholly or partly carried on" shall be regarded a priori as a permanent establishment."

Paragraph 12: Corresponds to paragraph 11 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 12 of the 1977 Model Convention was renumbered as paragraph 13 (see history of paragraph 13), paragraph 11 was renumbered as paragraph 12 and the heading preceding paragraph 11 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 11 of the 1977 Model Convention replaced paragraph 11 of the 1963 Draft Convention, which was amended and renumbered as paragraph 21 (see history of paragraph 22) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, the heading preceding paragraph 7 was moved immediately before paragraph 11 when the 1977 Model Convention was adopted.

Paragraph 13: Corresponds to paragraph 12 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 13 of the 1977 Model Convention was renumbered as paragraph 14 (see history of paragraph 14) and paragraph 12 was renumbered as paragraph 13 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 12 of the 1977 Model Convention replaced paragraph 12 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 12 read as follows:

"12. Comment is perhaps called for on the examples mentioned in paragraph 3 *e*). It is recognised that a place of business the function of which is solely that of advertising, or the supply of information, or of scientific research may well contribute to the productivity of its parent enterprise. To assume so is once more axiomatic. But the services it performs for its parent enterprise are so far antecedent to the actual realisation of profits by its parent body that no profits can properly be allocated to it; accordingly it does not constitute a taxable unit. It should, of course, be emphasised that exemption should be given only so long as

the place of business completely satisfies the conditions laid down. If, for example, the research establishment were to concern itself with manufacture, then exemption would be forfeited."

Paragraph 14: Corresponds to paragraph 13 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 14 of the 1977 Model Convention was renumbered as paragraph 15 (see history of paragraph 15) and paragraph 13 was renumbered as paragraph 14 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 13 of the 1977 Model Convention replaced paragraph 13 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 13 read as follows:

"13. The last words of sub-paragraph *e)*, "or for similar activities which have a preparatory or auxiliary character for the enterprise" require a special explanation of their own. The purpose of these words is twofold. In the first place, since it would be unreasonable to seek to claim that the list of examples quoted in paragraph 3 is, or in the nature of things could hope to be exhaustive, the last words of sub-paragraph *e)* are intended to cover any further examples (such as the organisation maintained solely for the purposes of servicing a patent or "know-how" contract) which are not listed among the exceptions in paragraph 3 but are nevertheless within the spirit of them. The words in question are, therefore, intended to make it unnecessary to attempt to produce an exhaustive list of exceptions which, even if it were comprehensive, would inevitably be of inordinate length and undesirable rigidity. In the second place, the words extend the principle underlying the examples in sub-paragraph *e)* to provide a generalised exception to the general definition in paragraph 1. To a considerable degree they delimit that definition and exclude from its rather wide scope a number of forms of business organisation which, although they are carried on in a fixed place of business, should not be treated as taxable units. To put the matter in another way, the last words of subparagraph *e)* refine the general definition in paragraph 1 and, when read with that paragraph, provide a more selective test by which to determine what constitutes a properly taxable permanent establishment. In view of the examples given, the reference to "similar activities" cannot lead to an arbitrary extension of the exemption set out in paragraph 3 *e)*. It will, of course, be the responsibility of the enterprise to prove that the activities in question are of a preparatory or auxiliary character within the framework of the whole activities of the enterprise. If, for example, the results of the research carried on in a laboratory are not only used by the enterprise but are also sold to a third party, the paragraph would cease to apply. Alternatively, it would be possible for countries to include in bilateral agreements a provision that, where the results of the laboratory's research are used partly by the enterprise and in part are sold to third parties, the charge to tax on the permanent establishment should be limited to the profits arising from the sales to third parties. Such a provision would be analogous to the provisions relating to "mere purchase" in a number of Conventions."

Paragraph 15: Corresponds to paragraph 14 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 15 of the 1977 Model Convention was renumbered as paragraph 16 (see history of paragraph 16), the heading preceding paragraph 15 was moved with it and paragraph 14 was renumbered as paragraph 15 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 14 of the 1977 Model Convention replaced paragraph 14 of the 1963 Draft Convention and the headings preceding it when the 1977 Model Convention was

adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until they were deleted when the 1977 Model Convention was adopted, paragraph 14 and the preceding headings read as follows:

> "*Paragraph 4*
>
> DEPENDENT AGENTS AND EMPLOYEES
>
> 14. Whilst in paragraph 3 of the Article certain exceptions are made to the general definition in paragraph 1, it seems necessary in conformity with the international practice hitherto followed to treat certain groups of persons as permanent establishments on account of the nature of their business activities, even though the enterprise may not have a fixed place of business."

Paragraph 16: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 16 read as follows:

> "16. This paragraph provides expressly that a building site or construction or installation project constitutes a permanent establishment only if it lasts more than twelve months. Any of those items which does not meet this condition does not of itself constitute a permanent establishment, even if there is within it an installation, for instance an office or a workshop within the meaning of paragraph 2, associated with the construction activity. Where, however, such an office or workshop is used for a number of construction projects and the activities performed therein go beyond those mentioned in paragraph 4, it will be considered a permanent establishment if the conditions of the Article are otherwise met even if none of the projects involve a building site or construction or installation project that lasts more than 12 months. In that case, the situation of the workshop or office will therefore be different from that of these sites or projects, none of which will constitute a permanent establishment, and it will be important to ensure that only the profits properly attributable to the functions performed and risks assumed through that office or workshop are attributed to the permanent establishment. This could include profits attributable to functions performed and risks assumed in relation to the various construction sites but only to the extent that these functions and risks are properly attributable to the office."

Paragraph 16 was previously amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 23 July 1992 and until 28 January 2003, paragraph 16 read as follows:

> "16. This paragraph provides expressly that a building site or construction or installation project constitutes a permanent establishment only if it lasts more than twelve months. Any of those items which does not meet this condition does not of itself constitute a permanent establishment, even if there is within it an installation, for instance an office or a workshop within the meaning of paragraph 2, associated with the construction activity."

Paragraph 16 as it read after 23 July 1992 corresponded to paragraph 15 of the 1977 Model Convention. On 23 July 1992 paragraph 16 of the 1977 Model Convention was renumbered as paragraph 17 (see history of paragraph 17), paragraph 15 was renumbered as paragraph 16 and the heading preceding paragraph 15 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 15 of the 1977 Model Convention replaced paragraph 15 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11

April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 15 read as follows:

"15. Persons who may be deemed to be permanent establishments must be strictly limited to those who are dependent, both from the legal and economic points of view, upon the enterprise for which they carry on business dealings (Report of the Fiscal Committee of the League of Nations, 1928, page 12). Where an enterprise has business dealings with an independent agent, this cannot be held to mean that the enterprise itself carries on a business in the other State. In such a case, there are two separate enterprises."

Paragraph 17: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 23 July 1992 and until 28 January 2003, paragraph 17 read as follows:

"17. The term "building site or construction or installation project" includes not only the construction of buildings but also the construction of roads, bridges or canals, the laying of pipe-lines and excavating and dredging. Planning and supervision of the erection of a building are covered by this term, if carried out by the building contractor. However, planning and supervision is not included if carried out by another enterprise whose activities in connection with the construction concerned are restricted to planning and supervising the work. If that other enterprise has an office which it uses only for planning or supervision activities relating to a site or project which does not constitute a permanent establishment, such office does not constitute a fixed place of business within the meaning of paragraph 1, because its existence has not a certain degree of permanence."

Paragraph 17 as it read after 23 July 1992 corresponded to paragraph 16 of the 1977 Model Convention. On 23 July 1992 paragraph 17 of the 1977 Model Convention was amended and renumbered as paragraph 18 (see history of paragraph 18) and paragraph 16 was renumbered as paragraph 17 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 16 of the 1977 Model Convention replaced paragraph 16 of the 1963 Draft Convention, which was amended and renumbered as paragraph 31 (see history of paragraph 32) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 18: Corresponds to paragraph 17 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 18 of the 1977 Model Convention was renumbered as paragraph 19 (see history of paragraph19) and paragraph 17 was amended and renumbered as paragraph 18 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 17 read as follows:

"17. The twelve month test applies to each individual site or project. In determining how long the site or project has existed, no account should be taken of the time previously spent by the contractor concerned on other sites or projects which are totally unconnected with it. A building site should be regarded as a single unit, even if it is based on several contracts, provided that it forms a coherent whole commercially and geographically. Subject to this proviso, a building site forms a single unit even if the orders have been placed by several persons (*e.g.* for a row of houses)."

Paragraph 17 of the 1977 Model Convention replaced paragraph 17 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 17 read as follows:

> "17. During the drafting of the Article, it was at one stage suggested that one of the tests that should be used to determine whether or not an agent is to be regarded as a permanent establishment should be the availability in the country in which the agent operates, and at the disposal of the agent of a stock of goods or merchandise belonging to the enterprise. This is, of course, a criterion commonly employed in bilateral Conventions for the avoidance of double taxation. For a number of reasons, this suggestion was not pursued and in its present form paragraph 4 of the Article is founded on the view that the only real criterion is the nature of the authority entrusted to the agent; in brief, whether or not he has, and habitually exercises, an authority to conclude contracts in the name of the enterprise."

Paragraph 19: Corresponds to paragraph 18 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 19 of the 1977 Model Convention was renumbered as paragraph 20 (see history of paragraph 20) and paragraph 18 was renumbered as paragraph 19 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 18 of the 1977 Model Convention replaced paragraph 18 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 18 read as follows:

> "18. Since the maintenance of a place of business exclusively for the purchase of goods or merchandise is not to constitute a permanent establishment (cf. paragraph 3 of the Article), a person should not be deemed to be a permanent establishment merely because he has an authority to conclude contracts which is strictly limited to contracts covering the purchase of goods or merchandise."

Paragraph 19.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of Annex I of another report entitled "I. Introduction" (adopted by the OECD Committee on Fiscal Affairs on 20 January 1999).

Paragraph 20: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 23 July 1992 and until 28 January 2003, paragraph 20 read as follows:

> "20. The very nature of a construction or installation project may be such that the contractor's activity has to be relocated continuously or at least from time to time, as the project progresses. This would be the case for instance where roads or canals were being constructed, waterways dredged, or pipe-lines laid. In such a case, the fact that the work force is not present for twelve months in one particular place is immaterial. The activities performed at each particular spot are part of a single project, and that project must be regarded as a permanent establishment if, as a whole, it lasts more than twelve months."

Paragraph 20 as it read after 23 July 1992 corresponded to paragraph 19 of the 1977 Model Convention. On 23 July 1992 paragraph 20 of the 1977 Model Convention was renumbered as paragraph 21 (see history of paragraph 21), the heading preceding

paragraph 20 was moved with it and paragraph 19 was renumbered as paragraph 20 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 19 of the 1977 Model Convention replaced paragraph 19 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 19 read as follows:

> "19. Under paragraph 4 of the Article, only one category of dependent agents, who meet specific conditions, is deemed to be permanent establishments. All independent agents and the remaining dependent ones are deemed to be permanent establishments. Mention should be made of the fact that the Mexico and London Drafts (Article V, paragraph 4, of the Protocol) and a number of Conventions, do not enumerate exhaustively such dependent agents as are deemed to be permanent establishments, but merely give examples. In the interest of preventing differences of interpretation and of furthering international economic relations, it appeared advisable to define, as exhaustively as possible, the cases where agents are deemed to be "permanent establishments"."

Paragraph 21: Corresponds to paragraph 20 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 21 of the 1977 Model Convention was renumbered as paragraph 22 (see history of paragraph 22), paragraph 20 was renumbered as paragraph 21 and the heading preceding paragraph 20 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 20 of the 1977 Model Convention replaced paragraph 20 of the 1963 Draft Convention, which was amended and incorporated into the first sentence of paragraph 35 (see history of paragraph 36) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, the headings preceding paragraph 20 were amended and moved with it.

Paragraph 22: Corresponds to paragraph 21 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 22 of the 1977 Model Convention was renumbered as paragraph 23 (see history of paragraph 23) and paragraph 21 was renumbered as paragraph 22 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 21 of the 1977 Model Convention corresponded to paragraph 11 of the 1963 Draft Convention. Paragraph 21 of the 1963 Draft Convention was amended and incorporated into the second sentence of paragraph 35 (see history of paragraph 36) and paragraph 11 of the 1963 Draft Convention was renumbered and amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 11 read as follows:

> "11. The exceptions listed in sub-paragraphs *a)* to *e)* do not require much detailed comment. The first two and the fourth are common in the bilateral Conventions concluded between Member countries. Paragraph 3 *a)* of the Article relates only to the case in which an enterprise acquires the use of facilities for storing, displaying or delivering its own goods or merchandise. Paragraph 3 *b)* relates to the stock of merchandise itself and provides that the stock shall not be treated as a permanent establishment if it is maintained for the purpose of storage, display or delivery. Paragraph 3 *c)* covers the case in which a stock of goods or merchandise belonging to one enterprise is processed by a second enterprise in another territory on behalf of, or for the account of the first-mentioned enterprise. The reference to the collection of information in paragraph 3 *d)* is intended to cover the case of the

> newspaper bureau which has no purpose other than to act as one of many 'tentacles' of the parent body; to exempt such a bureau is no more than an extension of the concept of "mere purchase"."

Paragraph 23: Corresponds to paragraph 22 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 23 of the 1977 Model Convention was renumbered as paragraph 24 (see history of paragraph 24) and paragraph 22 was renumbered as paragraph 23 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 22 of the 1977 Model Convention replaced paragraph 22 of the 1963 Draft Convention, which was amended and renumbered as paragraph 39 (see history of paragraph 40) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, the headings preceding paragraph 22 were amended and moved with it.

Paragraph 24: Corresponds to paragraph 23 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 24 of the 1977 Model Convention was amended and renumbered as paragraph 25 (see history of paragraph 25) and paragraph 23 was renumbered as paragraph 24 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 23 of the 1977 Model Convention replaced paragraph 23 of the 1963 Draft Convention, which was amended and renumbered as paragraph 40 (see history of paragraph 41) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 25: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 23 July 1992 and until 28 January 2003, paragraph 25 read as follows:

> "25. A permanent establishment could also be constituted if an enterprise maintains a fixed place of business in order to supply spare parts to customers for the machinery supplied to such customers, or to maintain or repair such machinery, as this goes beyond the pure delivery mentioned in subparagraph a) of paragraph 4. Since these after-sale organisations perform an essential and significant part of the services of an enterprise vis-à-vis its customers, their activities are not merely auxiliary ones. Subparagraph *e)* applies only if the activity of the fixed place of business is limited to a preparatory or auxiliary one. This would not be the case where, for example, the fixed place of business does not only give information but also furnishes plans etc. specially developed for the purposes of the individual customer. Nor would it be the case if a research establishment were to concern itself with manufacture."

Paragraph 25 as it read after 23 July 1992 corresponded to paragraph 24 of the 1977 Model Convention. On 23 July 1992 paragraph 25 of the 1977 Model Convention was renumbered as paragraph 26 (see history of paragraph 26) and paragraph 24 was renumbered as paragraph 25 and amended, by replacing the words "or to maintain or repair" with "and to maintain and repair" in the first sentence, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 24 read as follows:

> "24. A permanent establishment could also be constituted if an enterprise maintains a fixed place of business in order to supply spare parts to customers for the machinery supplied to such customers, or to maintain or repair such machinery, as this goes beyond the pure delivery mentioned in subparagraph a) of paragraph 4. Since these after-sale organisations perform an essential and

significant part of the services of an enterprise vis-à-vis its customers, their activities are not merely auxiliary ones. Subparagraph *e)* applies only if the activity of the fixed place of business is limited to a preparatory or auxiliary one. This would not be the case where, for example, the fixed place of business does not only give information but also furnishes plans etc. specially developed for the purposes of the individual customer. Nor would it be the case if a research establishment were to concern itself with manufacture."

Paragraph 24 of the 1977 Model Convention replaced paragraph 24 of the 1963 Draft Convention, which was amended and renumbered as paragraph 41 (see history of paragraph 42) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 26: Corresponds to paragraph 25 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 26 of the 1977 Model Convention was amended and renumbered as paragraph 27 (see history of paragraph 27) and paragraph 25 was renumbered as paragraph 26 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on23 July 1992.

Paragraph 25 of the 1977 Model Convention replaced paragraph 25 of the 1963 Draft Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, the heading preceding paragraph 25 was moved immediately before paragraph 45. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 25 read as follows:

"25. Canada reserves its position on paragraph 4 of this Article. When negotiating Conventions with other Member countries, the Canadian authorities would wish to alter paragraph 4 so as to reflect the Canadian position that a person acting in Canada on behalf of an enterprise of the other contracting State who has a stock of merchandise from which he regularly fills orders on behalf of the enterprise in the other Contracting state should be regarded as a permanent establishment."

Paragraph 26.1: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 26.1 read as follows:

"26.1 Another example is that of facilities such as cables or pipelines that cross the territory of a country. Apart from the fact that income derived by the owner or operator of such facilities from their use by other enterprises is covered by Article 6 where they constitute immovable property under paragraph 2 of Article 6, the question may arise as to whether paragraph 4 applies to them. Where these facilities are used to transport property belonging to other enterprises, subparagraph *a)*, which is restricted to delivery of goods or merchandise belonging to the enterprise that uses the facility, will not be applicable as concerns the owner or operator of these facilities. Subparagraph *e)* also will not be applicable as concerns that enterprise since the cable or pipeline is not used solely for the enterprise and its use is not of preparatory or auxiliary character given the nature of the business of that enterprise. The situation is different, however, where an enterprise owns and operates a cable or pipeline that crosses the territory of a country solely for purposes of transporting its own property and such transport is merely incidental to the business of that enterprise, as in the case of an enterprise that is in the business of refining oil and that owns and operates a pipeline that crosses the territory of a country solely to transport its own oil to its refinery located in another country. In such case, subparagraph *a)* would be applicable."

Paragraph 26.1 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent

Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 27: Amended on 28 January 2003, by deleting the sixth sentence, which was incorporated into new paragraph 27.1, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 23 July 1992 and until 28 January 2003, paragraph 27 read as follows:

> "27. As already mentioned in paragraph 21 above, paragraph 4 is designed to provide for exceptions to the general definition of paragraph 1 in respect of fixed places of business which are engaged in activities having a preparatory or auxiliary character. Therefore, according to subparagraph *f)* of paragraph 4, the fact that one fixed place of business combines any of the activities mentioned in the subparagraphs *a)* to *e)* of paragraph 4 does not mean of itself that a permanent establishment exists. As long as the combined activity of such a fixed place of business is merely preparatory or auxiliary a permanent establishment should be deemed not to exist. Such combinations should not be viewed on rigid lines, but should be considered in the light of the particular circumstances. The criterion "preparatory or auxiliary character" is to be interpreted in the same way as is set out for the same criterion of subparagraph *e)* (cf. paragraphs 24 and 25 above). Subparagraph *f)* is of no importance in a case where an enterprise maintains several fixed places of business within the meaning of the subparagraphs *a)* to *e)* provided that they are separated from each other locally and organisationally, as in such a case each place of business has to be viewed separately and in isolation for deciding the question whether or not a permanent establishment exists. States which want to allow any combination of the items mentioned in subparagraphs *a)* to *e)*, disregarding whether or not the criterion of the preparatory or auxiliary character of such a combination is met, are free to do so by deleting the words "provided" to "character" in subparagraph *f)*."

Paragraph 27 as it read after 23 July corresponded to paragraph 26 of the 1977 Model Convention. On 23 July 1992 paragraph 27 of the 1977 Model Convention was renumbered as paragraph 28 (see history of paragraph 28) and paragraph 26 was renumbered as paragraph 27 and amended, by replacing the cross-references to paragraphs 20, 23 and 24 with cross-references to paragraphs 21, 24 and 25, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 26 read as follows:

> "26. As already mentioned in paragraph 20 1 above, paragraph 4 is designed to provide for exceptions to the general definition of paragraph 1 in respect of fixed places of business which are engaged in activities having a preparatory or auxiliary character. Therefore, according to subparagraph *f)* of paragraph 4, the fact that one fixed place of business combines any of the activities mentioned in the subparagraphs *a)* to *e)* of paragraph 4 does not mean of itself that a permanent establishment exists. As long as the combined activity of such a fixed place of business is merely preparatory or auxiliary a permanent establishment should be deemed not to exist. Such combinations should not be viewed on rigid lines, but should be considered in the light of the particular circumstances. The criterion "preparatory or auxiliary character" is to be interpreted in the same way as is set out for the same criterion of subparagraph *e)* (cf. paragraphs 23 and 24 above). Subparagraph *f)* is of no importance in a case where an enterprise maintains several fixed places of business within the meaning of the subparagraphs *a)* to *e)* provided that they are separated from each other locally and organisationally, as in

such a case each place of business has to be viewed separately and in isolation for deciding the question whether or not a permanent establishment exists. States which want to allow any combination of the items mentioned in subparagraphs *a)* to *e)*, disregarding whether or not the criterion of the preparatory or auxiliary character of such a combination is met, are free to do so by deleting the words "provided" to "character" in subparagraph *f)*."

Paragraph 26 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 27.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). Before 28 January 2003, the first sentence of paragraph 27.1 was the sixth sentence of paragraph 27 (see history of paragraph 27).

Paragraph 28: Corresponds to paragraph 27 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 28 of the 1977 Model Convention was amended and renumbered as paragraph 29 (see history of paragraph 29) and paragraph 27 was renumbered as paragraph 28 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 27 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 29: Corresponds to paragraph 28 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 29 of the 1977 Model Convention was renumbered as paragraph 30 (see history of paragraph 30) and paragraph 28 was renumbered as paragraph 29 and amended, by replacing the cross-reference to "paragraph 10" of the Commentary on Article 5 with "paragraph 11", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 28 read as follows:

"28. If a fixed place of business under paragraph 4 is deemed not to be a permanent establishment, this exception applies likewise to the disposal of movable property forming part of the business property of the place of business at the termination of the enterprise's activity in such installation (cf. paragraph 10 above and paragraph 2 of Article 13). Since, for example, the display of merchandise is excepted under subparagraphs *a)* and *b)*, the sale of the merchandise at the termination of a trade fair or convention is covered by this exception. The exception does not, of course, apply to sales of merchandise not actually displayed at the trade fair or convention."

Paragraph 28 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 30: Corresponds to paragraph 29 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 30 of the 1977 Model Convention was amended and renumbered as paragraph 31 (see history of paragraph 31), the heading preceding paragraph 30 was moved with it and paragraph 29 was renumbered as paragraph 30 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 29 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 31: Corresponds to paragraph 30 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 31 of the 1977 Model Convention was renumbered as paragraph 32 (see history of paragraph 32), paragraph 30 was

renumbered as paragraph 31 and amended by replacing the words "has been redrafted" with "was redrafted in the 1977 Model Convention" in the last sentence and the heading preceding paragraph 30 was moved with it, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 30 read as follows:

> "30. It is a generally accepted principle that an enterprise should be treated as having a permanent establishment in a State if there is under certain conditions a person acting for it, even though the enterprise may not have a fixed place of business in that State within the meaning of paragraphs 1 and 2. This provision intends to give that State the right to tax in such cases. Thus paragraph 5 stipulates the conditions under which an enterprise is deemed to have a permanent establishment in respect of any activity of a person acting for it. The paragraph has been redrafted to clarify the intention of the corresponding provision of the 1963 Draft Convention without altering its substance apart from an extension of the excepted activities of the person."

Paragraph 30 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 32: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 31 March 1994 and until 28 January 2003, paragraph 32 read as follows:

> "32. Persons whose activities may create a permanent establishment for the enterprise are so-called dependent agents *i.e.* persons, whether employees or not, who are not independent agents falling under paragraph 6. Such persons may be either individuals or companies. It would not have been in the interest of international economic relations to provide that the maintenance of any dependent person would lead to a permanent establishment for the enterprise. Such treatment is to be limited to persons who in view of the scope of their authority or the nature of their activity involve the enterprise to a particular extent in business activities in the State concerned. Therefore, paragraph 5 proceeds on the basis that only persons having the authority to conclude contracts can lead to a permanent establishment for the enterprise maintaining them. In such a case the person has sufficient authority to bind the enterprise's participation in the business activity in the State concerned. The use of the term "permanent establishment" in this context presupposes, of course, that that person makes use of this authority repeatedly and not merely in isolated cases. Also, the phrase "authority to conclude contracts in the name of the enterprise" does not confine the application of the paragraph to an agent who enters into contracts literally in the name of the enterprise; the paragraph applies equally to an agent who concludes contracts which are binding on the enterprise even if those contracts are not actually in the name of the enterprise."

Paragraph 32 was previously amended on 31 March 1994, by adding a sentence at the end of the paragraph, by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 32 read as follows:

> "32. Persons whose activities may create a permanent establishment for the enterprise are so-called dependent agents *i.e.* persons, whether employees or not, who are not independent agents falling under paragraph 6. Such persons may be either individuals or companies. It would not have been in the interest of international economic relations to provide that the maintenance of any

dependent person would lead to a permanent establishment for the enterprise. Such treatment is to be limited to persons who in view of the scope of their authority or the nature of their activity involve the enterprise to a particular extent in business activities in the State concerned. Therefore, paragraph 5 proceeds on the basis that only persons having the authority to conclude contracts can lead to a permanent establishment for the enterprise maintaining them. In such a case the person has sufficient authority to bind the enterprise's participation in the business activity in the State concerned. The use of the term "permanent establishment" in this context presupposes, of course, that that person makes use of this authority repeatedly and not merely in isolated cases."

Paragraph 32 as it read after 23 July 1992 corresponded to paragraph 31 of the 1977 Model Convention. On 23 July 1992 paragraph 32 of the 1977 Model Convention was renumbered as paragraph 33 (see history of paragraph 33) and paragraph 31 was renumbered as paragraph 32 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 31 of the 1977 Model Convention corresponded to paragraph 16 of the 1963 Draft Convention. Paragraph 16 of the 1963 Draft Convention was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 16 read as follows:

"16. Having thus excluded the independent agents from the term "permanent establishments", it would likewise not be in the interest of international economic relations to treat all dependent agents as being permanent establishments. Treatment as a permanent establishment should be limited to dependent agents of those enterprises which, in view of the scope of their agent's authority or of the nature of their agent's business dealings, take part to a particular extent in business activities in the other State. Therefore, the Article proceeds on the basis that only persons having the authority to conclude contracts shall be treated as permanent establishments. The term "general authority" which has been commonly used in bilateral Conventions has been abandoned and replaced simply by the term "authority". In practice, it seems unlikely that any dependent agents have a completely unfettered authority to conclude contracts. In all cases the authority must be to some extent circumscribed. For administrative reasons, it seems advisable to avoid the difficulties which would inevitably arise if the question whether or not the dependent agent is a permanent establishment had to be decided by reference to the precise extent of his authority. When the agent has sufficient authority to bind the enterprise's participation in the business activity of the other country is such that the agent should be deemed to be a permanent establishment. The use of the term "permanent establishment" in relation to a person, presupposes, of course, that that person makes use of his authority repeatedly and not merely in isolated cases."

Paragraph 32.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 33: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 33 read as follows:

"33. The authority to conclude contracts must cover contracts relating to operations which constitute the business proper of the enterprise. It would be

irrelevant, for instance, if the person had authority to engage employees for the enterprise to assist that person's activity for the enterprise or if the person were authorised to conclude, in the name of the enterprise, similar contracts relating to internal operations only. Moreover the authority has to be habitually exercised in the other State; whether or not this is the case should be determined on the basis of the commercial realities of the situation. A person who is authorised to negotiate all elements and details of a contract in a way binding on the enterprise can be said to exercise this authority "in that State", even if the contract is signed by another person in the State in which the enterprise is situated. Since, by virtue of paragraph 4, the maintenance of a fixed place of business solely for purposes listed in that paragraph is deemed not to constitute a permanent establishment, a person whose activities are restricted to such purposes does not create a permanent establishment either."

Paragraph 33 as it read after 23 July 1992 corresponded to paragraph 32 of the 1977 Model Convention. On 23 July 1992 paragraph 33 of the 1977 Model Convention was renumbered as paragraph 34 (see history of paragraph 34) and paragraph 32 was renumbered as paragraph 33 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 32 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 33.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 34: Corresponds to paragraph 33 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 34 of the 1977 Model Convention was renumbered as paragraph 35 (see history of paragraph 35) and paragraph 33 was renumbered as paragraph 34 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 33 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 35: Corresponds to paragraph 34 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 35 of the 1977 Model Convention was amended and renumbered as paragraph 36 (see history of paragraph 36), and the heading preceding paragraph 35 was moved with it and paragraph 34 was renumbered as paragraph 35 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 34 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 36: Corresponds to paragraph 35 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 36 of the 1977 Model Convention was amended and renumbered as paragraph 37 (see history of paragraph 37), paragraph 35 was renumbered as paragraph 36 and amended, by replacing the reference therein to paragraph 31 with a reference to paragraph 32, and the heading preceding paragraph 35 was moved with it, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 35 read as follows:

"35. Where an enterprise of a Contracting State carries on business dealings through a broker, general commission agent or any other agent of an independent status, it cannot be taxed in the other Contracting State in respect of those dealings

if the agent is acting in the ordinary course of his business (cf. paragraph 31 above). Although it stands to reason that such an agent, representing a separate enterprise, cannot constitute a permanent establishment of the foreign enterprise, paragraph 6 has been inserted in the Article for the sake of clarity and emphasis."

Paragraph 35 of the 1977 Model Convention corresponded to paragraphs 20 and 21 of the 1963 Draft Convention. Paragraphs 20 and 21, as they read in the 1963 Draft Convention, were amended and incorporated into paragraph 35 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, the headings preceding paragraph 20 of the 1963 Draft Convention were amended and moved immediately before paragraph 35. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraphs 20 and 21 and the headings preceding paragraph 20 read as follows:

"*Paragraph* 5

INDEPENDENT AGENTS

20. Where the enterprise carries on business dealings through an agent of an independent status, it cannot be taxed in the other Contracting State (cf. the reasons given in paragraph 15 above). Corresponding provisions are included in the Mexico and London Drafts (Article V, paragraph 5, of the Protocol) and in numerous other Conventions for the avoidance of double taxation. In the Mexico and London Drafts and in the Conventions, brokers and commission agents are stated to be agents of an independent status. Similarly, business dealings carried on with the co-operation of a any other independent person carrying on a trade or business (*e.g.* a forwarding agent) do not constitute a permanent establishment. Such independent agents must, however, be acting in the ordinary course of their business. Where, for example, a commission agent not only sells the goods or merchandise of the enterprise in his own name but also habitually acts, in relation to that enterprise, as a permanent agent having an authority to conclude contracts, he would be deemed in respect of this particular activity to be a permanent establishment since he is thus acting outside the ordinary course of his own trade or business (namely that of a commission agent).

21. Although it stands to reason that agents of an independent status, representing as they do a separate enterprise, cannot constitute a permanent establishment of the foreign enterprise where they are acting in the ordinary course of their business (cf. paragraph 15 of the present Commentary), paragraph 5 is retained in the Article for the sake of clarity and emphasis especially since a similar provision is contained in nearly all of the double taxation Conventions so far concluded."

Paragraph 37: Corresponds to paragraph 36 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 37 of the 1977 Model Convention was renumbered as paragraph 38 (see history of paragraph 38) and paragraph 36 was renumbered as paragraph 37 and amended by replacing the word "this" with "his" in subparagraph *b)* thereof by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 36 read as follows:

"36. A person will come within the scope of paragraph 6, *i.e.* he will not constitute a permanent establishment of the enterprise on whose behalf he acts only if:

a) he is independent of the enterprise both legally and economically, and

b) he acts in the ordinary course of this business when acting on behalf of the enterprise."

Paragraph 36 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 38: Amended on 28 January 2003 by deleting the fourth sentence and incorporating the fifth and subsequent sentences into new paragraph 38.7, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 23 July 1992 and until 28 January 2003, paragraph 38 read as follows:

> "38. Whether a person is independent of the enterprise represented depends on the extent of the obligations which this person has vis-à-vis the enterprise. Where the person's commercial activities for the enterprise are subject to detailed instructions or to comprehensive control by it, such person cannot be regarded as independent of the enterprise. Another important criterion will be whether the entrepreneurial risk has to be borne by the person or by the enterprise the person represents. A subsidiary is not to be considered dependent on its parent company solely because of the parent's ownership of the share capital. Persons cannot be said to act in the ordinary course of their own business if, in place of the enterprise, such persons perform activities which, economically, belong to the sphere of the enterprise rather than to that of their own business operations. Where, for example, a commission agent not only sells the goods or merchandise of the enterprise in his own name but also habitually acts, in relation to that enterprise, as a permanent agent having an authority to conclude contracts, he would be deemed in respect of this particular activity to be a permanent establishment, since he is thus acting outside the ordinary course of his own trade or business (namely that of a commission agent), unless his activities are limited to those mentioned at the end of paragraph 5."

Paragraph 38 as it read after 23 July 1992 corresponded to paragraph 37 of the 1977 Model Convention. On 23 July 1992 paragraph 38 of the 1977 Model Convention was renumbered as paragraph 39 (see history of paragraph 39) and paragraph 37 was renumbered as paragraph 38 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 37 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 38.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 38.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 38.3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 38.4: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

Paragraph 38.5: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 38.6: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 38.7: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). Prior to 28 January 2003, paragraph 38.7 corresponded to the fifth and subsequent sentences of paragraph 38 (see history of paragraph 38).

Paragraph 38.8: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 39: Corresponds to paragraph 38 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 39 of the 1977 Model Convention was renumbered as paragraph 40 (see history of paragraph 40), the heading preceding paragraph 39 was moved with it and paragraph 38 was renumbered as paragraph 39 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 38 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 40: Corresponds to paragraph 39 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 40 of the 1977 Model Convention was renumbered as paragraph 41 (see history of paragraph 41), paragraph 39 was renumbered as paragraph 40 and the heading preceding paragraph 39 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 39 of the 1977 Model Convention corresponded to paragraph 22 of the 1963 Draft Convention. Paragraph 22 of the 1963 Draft Convention was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 22 and the preceding headings read as follows:

> "*Paragraph 6*
>
> SUBSIDIARY COMPANIES
>
> 22. The Mexico and London Drafts (Article V, paragraph 8, of the Protocol) and numerous Conventions for the avoidance of double taxation, provide that the existence of a subsidiary company does not, of itself, constitute that subsidiary company a permanent establishment of its parent company. This follows, from the principle that, for the purpose of taxation, such a subsidiary company constitutes an independent legal entity. Even the fact that the trade or business carried on by

the subsidiary company is managed by the parent company does not constitute the subsidiary company a permanent establishment of the parent company."

Paragraph 41: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 41 read as follows:

"41. However, a subsidiary company will constitute a permanent establishment for its parent company under the same conditions stipulated in paragraph 5 as are valid for any other unrelated company, *i.e.* if it cannot be regarded as an independent agent in the meaning of paragraph 6, and if it has and habitually exercises an authority to conclude contracts in the name of the parent company. And the effects would be the same as for any other unrelated company to which paragraph 5 applies."

Paragraph 41 as it read after 23 July 1992 corresponded to paragraph 40 of the 1977 Model Convention. On 23 July 1992 paragraph 41 of the 1977 Model Convention was renumbered as paragraph 42 (see history of paragraph 42) and paragraph 40 was renumbered as paragraph 41 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 40 of the 1977 Model Convention corresponded to paragraph 23 of the 1963 Draft Convention. Paragraph 23 of the 1963 Draft Convention was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 23 read as follows:

"23. Where, however, the subsidiary company, on behalf of its parent company, carries on an activity within the provisions of paragraph 4 of the Article, that subsidiary company is deemed to be a permanent establishment of the parent company. Where, for example, the subsidiary company, on the strength of an authority, concludes contracts of sale in the name of the parent company, the subsidiary company will be treated as a permanent establishment of the parent company (but only in respect of such activities). The parent company is subject to tax on so much of the profits accruing from such sales as is attributable to that permanent establishment. This does not affect the separate taxation of the subsidiary company's own profits."

Paragraph 41.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 42: Replaced on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 42 read as follows:

"42. The same rules should apply to activities which one subsidiary carries on for any other subsidiary of the same company."

Paragraph 42 as it read after 23 July 1992 corresponded to paragraph 41 of the 1977 Model Convention. On 23 July 1992 paragraph 42 of the 1977 Model Convention was deleted, the heading preceding paragraph 42 was moved immediately before paragraph 43 and paragraph 41 was renumbered as paragraph 42 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 41 of the 1977 Model Convention corresponded to paragraph 24 of the 1963 Draft Convention. Paragraph 24 of the 1963 Draft Convention was amended and renumbered paragraph 41 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council

on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 24 read as follows:

> "24. For the same reasons, a parent company should not be treated as constituting a permanent establishment of its subsidiary unless it fulfills the conditions set out in paragraph 4 of the Article. The same rules should apply to two or more subsidiaries of the same company."

In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 42 read as follows:

> "42. Treatment in Irish tax law of non-resident operators in *Ireland* and in the Irish continental shelf area. Profits arising to a person not resident in Ireland from exploration or exploitation activities in Ireland or in the Irish continental shelf area as well as profits from exploration or exploitation rights are treated as the profits of a trade carried on in Ireland through a branch or agency and are, in consequence, taxable in Ireland. This includes non-resident contractors who supply well-drilling, pipe-laying and similar services in Ireland or in the Irish continental shelf area. In addition, capital gains accruing on the disposal of exploration or exploitation rights in Ireland or in the Irish continental shelf area are treated as gains accruing on the disposal of assets situated in Ireland. When negotiating conventions with other member countries, Ireland would wish subparagraph *f)* of paragraph 2 to be so drafted and interpreted as to reflect the Irish position."

Paragraph 42 of the 1977 Model Convention was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 42.1: Added on 28 January 2003, together with the heading preceding it, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 42.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 42.3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 42.4: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 42.5: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 42.6: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 42.7: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 42.8: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 42.9: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 42.10: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 42.11: Added on 17 July 2008, together with the heading preceding it, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.12: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.13: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.14: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.15: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.16: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.17: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.18: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.19: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.20: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.21: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.22: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.23: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.24: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.25: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.26: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.27: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.28: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.29: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.30: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.31: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.32: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.33: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.34: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.35: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.36: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.37: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.38: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.39: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.40: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.41: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.42: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.43: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.44: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.45: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.46: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.47: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42.48: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 43: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until it was deleted on 22 July 2010, paragraph 43 read as follows:

> "43. *Italy* does not adhere to the interpretation given in paragraph 12 above concerning the list of examples of paragraph 2. In its opinion, these examples can always be regarded as constituting *a priori* permanent establishments."

Paragraph 43 was amended on 23 July 1992, by replacing the reference therein to "paragraph 11" with a reference to "paragraph 12", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. At the same time, the heading preceding paragraph 42 was moved immediately before paragraph 43. In the 1977 Model Convention and until 23 July 1992, paragraph 43 read as follows:

> "43. *Italy* does not adhere to the interpretation given in paragraph 11 above concerning the list of examples of paragraph 2. In its opinion, these examples can always be regarded as constituting *a priori* permanent establishments."

Paragraph 43 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

The footnote to the heading "Observations on the Commentary" preceding paragraph 43 was deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, the footnote read as follows:

"1 At the time of approval of paragraphs 42.11 to 42.13 above by the Committee, France, Spain, Sweden, Switzerland and the United States, which among others agree with the Committee's conclusions set out in these paragraphs and do not share the views of some States expressed in paragraphs 42.14 to 42.17, have asked that their position on this issue be expressly stated in the OECD Model Tax Convention."

The footnote to the heading "Observations on the Commentary" preceding paragraph 43 was added on 17 July 2008, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 44: Amended on 28 January 2003, by adding the Slovak Republic as a country making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 44 read as follows:

"44. The *Czech Republic* would add to paragraph 25 its view that when an enterprise has established an office (such as a commercial representation office) in a country, and the employees working at that office are substantially involved in the negotiation of contracts for the import of products or services into that country, the office will in most cases not fall within paragraph 4 of Article 5. Substantial involvement in the negotiations exists when the essential parts of the contract — the type, quality, and amount of goods, for example, and the time and terms of delivery — are determined by the office. These activities form a separate and indispensable part of the business activities of the foreign enterprise, and are not simply activities of an auxiliary or preparatory character."

Paragraph 44 was added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 44, as it read before 31 March 1994, was amended and renumbered as paragraph 56 (see history of paragraph 53) by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 45: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 45 read as follows:

"45. *Mexico* wishes to include some wording in its conventions to emphasize that the arm's length principle should be considered in determining whether or not an agent is of independent status."

Paragraph 45 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 45 as it read before 31 March 1994 was deleted by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 45 read as follows:

"45. The *United Kingdom* considers that an agent who is not an agent of independent status within paragraph 6 of this Article and who has the characteristics described in paragraphs 32 and 33 above will represent a permanent establishment of an enterprise if he has the authority to conclude contracts on behalf of that enterprise whether in his own name or that of the enterprise."

Paragraph 45 as it read after 23 July 1992 replaced paragraph 45 of the 1977 Model Convention, which was renumbered as paragraph 46 (see history of paragraph 46), by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. At the same time, the heading preceding paragraph 45 was moved with it.

Paragraph 45.1: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 45.1 read as follows:

"45.1 *Hungary* is of the opinion that an agent, whether commission agent or not, should be of an independent status within the sense of the Convention."

Paragraph 45.1 was added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 45.2: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 45.3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 45.4: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 45.5: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 45.6: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 45.6 read as follows:

"45.6 *Spain* has expressed a number of reservations on the Report "Clarification of the permanent establishment definition in e-commerce". *Greece* and *Spain* have some doubts concerning the opportunity of introducing paragraphs 42.1 to 42.10 of the Commentary in the Model at this time. Since the OECD continues the study of e-commerce taxation, these States will not necessarily take into consideration the aforementioned paragraphs until the OECD has come to a final conclusion."

Paragraph 45.6 was amended on 17 July 2008, by deleting Portugal from the list of countries making the reservation, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 45.6 read as follows:

"45.6 *Spain* and *Portugal* have expressed a number of reservations on the Report "Clarification of the permanent establishment definition in e-commerce". *Greece*, *Spain* and *Portugal* have some doubts concerning the opportunity of introducing paragraphs 42.1 to 42.10 of the Commentary in the Model at this time. Since the OECD continues the study of e-commerce taxation, these States will not necessarily take into consideration the aforementioned paragraphs until the OECD has come to a final conclusion."

Paragraph 45.6 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 45.7: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 45.8: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 45.9: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 45.10: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 45.11: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 46: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 46 read as follows:

> "46. *Australia* reserves the right to treat an enterprise as having a permanent establishment in a State if it carries on activities relating to natural resources or operates substantial equipment in that State with a certain degree of continuity, or a person — acting in that State on behalf of the enterprise — manufactures or processes in that State goods or merchandise belonging to the enterprise."

Paragraph 46 was previously amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 46 read as follows:

> "46. *Australia* reserves the right to treat an enterprise as having a permanent establishment in a State if the enterprise carries on designated supervisory activities in that State for more than twelve months, if substantial equipment is used in that State for more than twelve months by, for or under contract with the enterprise in the exploration for or exploitation of natural resources, or if a person — acting in that State on behalf of the enterprise — manufactures or processes there goods or merchandise belonging to the enterprise."

Paragraph 46 as it read after 23 July 1992 corresponded to paragraph 45 of the 1977 Model Convention. On 23 July 1992 paragraph 46 of the 1977 Model Convention was renumbered as paragraph 47 (see history of paragraph 57), paragraph 45 was renumbered as paragraph 46 and the heading preceding paragraph 45 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 45 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, the heading preceding paragraph 25 was moved immediately before paragraph 45.

Paragraph 47: Corresponds to paragraph 52 as it read before 22 July 2010. On 22 July 2010 paragraph 47 was amended and renumbered as paragraph 57 (see history of paragraph 57) and paragraph 52 was renumbered as paragraph 47 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 52 as it read before 22 July 2010 was amended on 28 January 2003, by adding Canada to the list of countries making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 52 read as follows:

> "52. Considering the special problems in applying the provisions of the Model Convention to offshore hydrocarbon exploration and exploitation and related activities, *Denmark*, *Ireland*, *Norway* and the *United Kingdom* reserve the right to insert in a special article provisions relating to such activities."

Paragraph 52 was previously amended on 21 September 1995, by adding Ireland to the list of countries making the reservation, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 31 March 1994 and until 21 September 1995, paragraph 52 read as follows:

> "52. Considering the special problems in applying the provisions of the Model Convention to offshore hydrocarbon exploration and exploitation and related activities, *Denmark*, *Norway* and the *United Kingdom* reserve the right to insert in a special article provisions relating to such activities."

Paragraph 52 was previously amended on 31 March 1994, by adding United Kingdom to the list of countries making the reservation, by the report entitled "1994 Update to

the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 52 read as follows:

> "52. Considering the special problems in applying the provisions of the Model Convention to offshore hydrocarbon exploration and exploitation and related activities, *Denmark* and *Norway* reserve the right to insert in a special article provisions relating to such activities."

Paragraph 52 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 48: Replaced paragraph 48 as it read before 22 July 2010, which was amended and renumbered as paragraph 65 (see history of paragraph 65), by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 49: Corresponds to paragraph 60 as it read before 22 July 2010. On 22 July 2010 paragraph 49 was deleted and paragraph 60 was renumbered as paragraph 49 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 60 was amended on 28 January 2003, by adding the Slovak Republic as a country making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 58 read as follows:

> "60. The *Czech Republic*, while agreeing with the "fixed place of business" requirement of paragraph 1, reserves the right to propose in bilateral negotiations specific provisions clarifying the application of this principle to arrangements for the performance of services over a substantial period of time."

Paragraph 60 was added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 49, as it read before 22 July 2010, was deleted by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until 22 July 2010, paragraph 49 read as follows:

> "49. *Spain* reserves its position on paragraph 3 so as to be able to tax an enterprise having a permanent establishment in Spain, even if the site of the construction or installation project does not last for more than twelve months, where the activity of this enterprise in Spain presents a certain degree of permanency within the meaning of paragraphs 1 and 2. Spain also reserves its right to tax an enterprise as having a permanent establishment in Spain when such an enterprise carries on supervisory activities in Spain for more than 12 months in connection with a building site or construction or installation project also lasting more than 12 months."

Paragraph 49 as it read after 23 July 1992 corresponded to paragraph 48 of the 1977 Model Convention. On 23 July 1992 paragraph 48 was amended and renumbered as paragraph 49 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 48 read as follows:

> "48. *Spain* reserves its position on paragraph 3 so as to be able to tax an enterprise having a permanent establishment in Spain, even if the site of the construction or installation project does not last for more than twelve months, where the activity of this enterprise in Spain presents a certain degree of permanency within the meaning of paragraphs 1 and 2."

Paragraph 48 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 50: Added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 51: Corresponds to paragraph 57 as it read before 22 July 2010. Paragraph 51 as it read before 22 July 2010 was renumbered as paragraph 56 (see history of paragraph 56) and paragraph 57 was renumbered as paragraph 51 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 57 was added on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 52: Corresponds to paragraph 64 as it read before 22 July 2010. Paragraph 52 as it read before 22 July 2010 was renumbered as paragraph 47 (see history of paragraph 47) and paragraph 64 was renumbered as paragraph 52 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 64 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 53: Corresponds to paragraph 56, as it read before 22 July 2010. Paragraph 53 as it read before 22 July 2010 was amended and renumbered as paragraph 60 (see history of paragraph 60) and paragraph 56 was renumbered as paragraph 53 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 56 was amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 56 read as follows:

> "56. *New Zealand* reserves the right to insert provisions that deem a permanent establishment to exist if, for more than six months, an enterprise conducts activities relating to the exploration or exploitation of natural resources, uses or leases substantial equipment or furnishes services (including consultancy and independent personal services)."

Paragraph 56 was amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 31 March 1994 and until 29 April 2000, paragraph 56 read as follows:

> "56. New Zealand reserves the right to negotiate the addition of specific provisions deeming an enterprise in some particular situations to have a permanent establishment in New Zealand."

Paragraph 56 as it read after 31 March 1994 corresponded to paragraph 44 of the 1977 Model Convention, which was amended and renumbered as paragraph 56 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 44 read as follows:

> "44. While, subject to its reservations in relation to this Article, *New Zealand*, for the purpose of negotiating conventions with other member countries, accepts, in general, the principles of this Article, it would wish to be free to negotiate for the addition of specific provisions deeming an enterprise in some particular situations to have a permanent establishment in New Zealand."

Paragraph 44 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 54: Corresponds to paragraph 55 as it read before 22 July 2010. Paragraph 54 as it read before 22 July 2010 was renumbered as paragraph 64 (see history of paragraph 64) and paragraph 55 was renumbered as paragraph 54 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 55 was amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 55 read as follows:

> "55. *Turkey* reserves the right to treat a person as having a permanent establishment in Turkey if the person performs professional services and other activities of independent character, including planning, supervisory or consultancy activities, with a certain degree of continuity."

Paragraph 55 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 55 read as follows:

> "55. *Turkey* reserves the right to treat an enterprise as having a permanent establishment in Turkey if the enterprise carries on planning, supervisory or consultancy activities in connection with a building site or construction or installation project lasting more than six months."

Paragraph 55 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 55: Corresponds to paragraph 63 as it read before 22 July 2010. Paragraph 55 as it read before 22 July 2010 was renumbered as paragraph 54 (see history of paragraph 54) and paragraph 63 was amended, by adding Chile as a country making the reservation, and renumbered as paragraph 55 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. At the same time, the heading preceding paragraph 55 was added. After 29 April 2000 and until 22 July 2010, paragraph 63 read as follows:

> "63. *Canada* reserves the right in subparagraph 2 *f)* to replace the words "of extraction" with the words "relating to the exploration for or the exploitation""

Paragraph 63 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 56: Corresponds to paragraph 51 as it read before 22 July 2010. Paragraph 56 as it read before 22 July 2010 was renumbered as paragraph 53 (see history of paragraph 53) and paragraph 51 was renumbered as paragraph 56 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 51 was amended on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, paragraph 51 read as follows:

> "51. *Greece* for the purpose of negotiating Conventions with other member countries would wish to be free to propose paragraph 2 of Article 5 as it is drafted in the 1963 Draft Convention."

Paragraph 51 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 57: Corresponds to paragraph 47 as it read before 22 July 2010. Paragraph 57 as it read before 22 July 2010 was renumbered as paragraph 51 (see history of paragraph 51) and paragraph 47 was amended, by adding Chile to the list of countries

making the reservation, and renumbered as paragraph 57 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. At the same time the heading preceding paragraph 57 was added. After 15 July 2005 and until 22 July 2010, paragraph 47 read as follows:

> "47. *Australia*, *Greece*, *Korea*, *New Zealand*, *Portugal* and *Turkey* reserve their positions on paragraph 3, and consider that any building site or construction or installation project which lasts more than six months should be regarded as a permanent establishment."

Paragraph 47 was previously amended on 15 July 2005, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 47 read as follows:

> "47. *Greece*, *Korea*, *New Zealand*, *Portugal* and *Turkey* reserve their positions on paragraph 3, and consider that any building site or construction or installation project which lasts more than six months should be regarded as a permanent establishment."

Paragraph 47 was previously amended on 23 October 1997, by adding Korea to the list of countries making the reservation, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, paragraph 47 read as follows:

> "47. *Greece*, *New Zealand*, *Portugal* and *Turkey* reserve their positions on paragraph 3, and consider that any building site or construction or installation project which lasts more than six months should be regarded as a permanent establishment."

Paragraph 47 as it read after 23 July 1992 corresponded to paragraph 46 of the 1977 Model Convention. On 23 July 1992 paragraph 47 of the 1977 Model Convention was renumbered as paragraph 48 (see history of paragraph 48) and paragraph 46 was renumbered as paragraph 47 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 46 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 58: Replaced paragraph 58 as it read before 22 July 2010, which was renumbered as paragraph 62 (see history of paragraph 62) by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 59: Corresponds to paragraph 62 as it read before 22 July 2010. Paragraph 59 as it read before 22 July 2010 was renumbered as paragraph 61 (see history of paragraph 61) and paragraph 62 was renumbered as paragraph 59 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 62 was added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 60: Corresponds to paragraph 53 as it read before 22 July 2010. Paragraph 60 as it read before 22 July 2010 was renumbered as paragraph 49 (see history of paragraph 49) by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. At the same time, paragraph 53 was amended, by adding Slovenia and deleting Norway, and renumbered as paragraph 60. After 17 July 2008 and until 22 July 2010, paragraph 53 read as follows:

> "53. *Norway* reserves the right to include connected supervisory or consultancy activities in paragraph 3 of the Article."

Paragraph 53 was previously amended on 17 July 2008, by deleting Australia from the list of countries making the reservation, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 53 read as follows:

> "53. *Australia* and *Norway* also reserve the right to include connected supervisory or consultancy activities in paragraph 3 of the Article. *Australia* also reserves the right to add use of substantial equipment for rental or other purposes to the list of activities covered by paragraph 3."

Paragraph 53 was previously amended on 15 July 2005, by adding Australia as a country making the reservation, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 53 read as follows:

> "53. *Norway* also reserves the right to include connected supervisory or consultancy activities in paragraph 3 of the Article."

Paragraph 53 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 61: Corresponds to paragraph 59 as it read before 22 July 2010. Paragraph 61 as it read before 22 July 2010 was amended and renumbered as paragraph 63 (see history of paragraph 63) and paragraph 59 was renumbered as paragraph 61 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 59 was amended on 28 January 2003, by adding the Slovak Republic as a country making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 59 read as follows:

> "59. *Mexico* reserves the right to tax an enterprise that carries on supervisory activities for more than six months in connection with a building site or a construction, assembly, or installation project."

Paragraph 59 was added on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 62: Corresponds to paragraph 58 as it read before 22 July 2010. Paragraph 62 as it read before 22 July 2010 was renumbered as paragraph 59 (see history of paragraph 59) and paragraph 58 was renumbered as paragraph 62 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 58 was amended on 28 January 2003, by adding the Slovak Republic as a country making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 58 read as follows:

> "58. *Mexico* reserves its position on paragraph 3 and considers that any building site or construction, assembly, or installation project that lasts more than six months should be regarded as a permanent establishment."

Paragraph 58 was added on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 63: Corresponds to paragraph 61 as it read before 22 July 2010. Paragraph 63 as it read before 22 July 2010 was renumbered and amended as paragraph 55 (see history of paragraph 55) and paragraph 61 was renumbered and amended as

paragraph 63 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 61, as it read before 22 July 2010, was added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 64: Corresponds to paragraph 54 as it read before 22 July 2010. Paragraph 64 as it read before 22 July 2010 was amended and renumbered as paragraph 52 (see history of paragraph 52) and paragraph 54 was renumbered as paragraph 64 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 54 was amended on 17 July 2008, by deleting the last sentence, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 July 1992 and until 17 July 2008, paragraph 54 read as follows:

> "54. *Portugal* reserves the right to treat an enterprise as having a permanent establishment in Portugal if the enterprise carries on an activity consisting of planning, supervising, consulting, any auxiliary work or any other activity in connection with a building site or construction or installation project lasting more than six months, if such activities or work also last more than six months. Portugal also reserves the right to consider that a permanent establishment exists if the activity of the enterprise is carried on with a certain degree of continuity by employees or any other personnel under contract."

Paragraph 54 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 65: Corresponds to paragraph 48 as it read before 22 July 2010. Paragraph 65 as it read before 22 July 2010 was renumbered as paragraph 67 (see history of paragraph 67) and paragraph 48 was amended and renumbered as paragraph 65 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 29 April 2000 and until 22 July 2010, paragraph 48 read as follows:

> "48. The *United States* reserves the right to add "a drilling rig or ship used for the exploration of natural resources" to the activities covered by the 12 month threshold test in paragraph 3."

Paragraph 48 as it read before 22 July 2010 was replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 October 1997 and until it was deleted on 29 April 2000, paragraph 48 read as follows:

> "48. *Korea* and *New Zealand* also reserve the right to tax an enterprise that carries on supervisory activities for more than six months in connection with a building site or construction or installation project lasting more than six months, and also, in the case of New Zealand, an enterprise where substantial equipment or machinery is being used by, for, or under contract with the enterprise."

Paragraph 48 was amended on 23 October 1997, by adding Korea as a country making the reservation, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 48 read as follows:

> "48. *New Zealand* also reserves the right to tax an enterprise that carries on supervisory activities for more than six months in connection with a building site or construction or installation project lasting more than six months, and also an enterprise where substantial equipment or machinery is being used by, for, or under contract with the enterprise."

Paragraph 48 was previously amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 48 read as follows:

> "48. *New Zealand* also reserves its position so as to be able to tax an enterprise which carries on supervisory activities for more than six months in connection with a building site or construction or installation project lasting more than six months, and also an enterprise where substantial equipment or machinery is for more than six months being used by, for or under contract with the enterprise."

Paragraph 48 as it read after 23 July 1992 corresponded to paragraph 47 of the 1977 Model Convention. On 23 July 1992 paragraph 48 of the 1977 Model Convention was amended and renumbered as paragraph 49 (see history of paragraph 49) and paragraph 47 was renumbered as paragraph 48 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 47 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 66: Added together with the preceding heading on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 67: Corresponds to paragraph 65 as it read before 22 July 2010, which was renumbered as paragraph 67 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 65 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 68: Added on 22 July 2010 together with the preceding heading by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

COMMENTARY ON ARTICLE 6
CONCERNING THE TAXATION OF INCOME FROM IMMOVABLE PROPERTY

1. Paragraph 1 gives the right to tax income from immovable property to the State of source, that is, the State in which the property producing such income is situated. This is due to the fact that there is always a very close economic connection between the source of this income and the State of source. Although income from agriculture or forestry is included in Article 6, Contracting States are free to agree in their bilateral conventions to treat such income under Article 7. Article 6 deals only with income which a resident of a Contracting State derives from immovable property situated in the other Contracting State. It does not, therefore, apply to income from immovable property situated in the Contracting State of which the recipient is a resident within the meaning of Article 4 or situated in a third State; the provisions of paragraph 1 of Article 21 shall apply to such income.

(Amended on 11 April 1977; see HISTORY)

2. Defining the concept of immovable property by reference to the law of the State in which the property is situated, as is provided in paragraph 2, will help to avoid difficulties of interpretation over the question whether an asset or a right is to be regarded as immovable property or not. The paragraph, however, specifically mentions the assets and rights which must always be regarded as immovable property. In fact such assets and rights are already treated as immovable property according to the laws or the taxation rules of most OECD member countries. Conversely, the paragraph stipulates that ships, boats and aircraft shall never be considered as immovable property. No special provision has been included as regards income from indebtedness secured by immovable property, as this question is settled by Article 11.

(Amended on 11 April 1977; see HISTORY)

3. Paragraph 3 indicates that the general rule applies irrespective of the form of exploitation of the immovable property. Paragraph 4 makes it clear that the provisions of paragraphs 1 and 3 apply also to income from immovable property of industrial, commercial and other enterprises. Income in the form of distributions from Real Estate Investment Trusts (REITs), however, raises particular issues which are discussed in paragraphs 67.1 to 67.7 of the Commentary on Article 10.

(Amended on 17 July 2008; see HISTORY)

4. It should be noted in this connection that the right to tax of the State of source has priority over the right to tax of the other State and applies also where, in the case of an enterprise, income is only indirectly derived from

immovable property. This does not prevent income from immovable property, when derived through a permanent establishment, from being treated as income of an enterprise, but secures that income from immovable property will be taxed in the State in which the property is situated also in the case where such property is not part of a permanent establishment situated in that State. It should further be noted that the provisions of the Article do not prejudge the application of domestic law as regards the manner in which income from immovable property is to be taxed.

(Amended on 29 April 2000; see HISTORY)

Reservations on the Article

5. *Finland* reserves the right to tax income of shareholders in Finnish companies from the direct use, letting, or use in any other form of the right to enjoyment of immovable property situated in Finland and held by the company, where such right is based on the ownership of shares or other corporate rights in the company.

(Amended on 23 July 1992; see HISTORY)

6. *France* wishes to retain the possibility of applying the provisions in its domestic laws relative to the taxation of income from shares or rights, which are treated therein as income from immovable property.

(Added on 11 April 1977; see HISTORY)

7. *Spain* reserves its right to tax income from any form of use of a right to enjoyment of immovable property situated in Spain when such right derives from the holding of shares or other corporate rights in the company owning the property.

(Added on 23 July 1992; see HISTORY)

8. *Canada* reserves the right to include in paragraph 3 a reference to income from the alienation of immovable property.

(Added on 29 April 2000; see HISTORY)

9. *New Zealand* reserves the right to include fishing and rights relating to all natural resources under this Article.

(Added on 29 April 2000; see HISTORY)

10. The *United States* reserves the right to add a paragraph to Article 6 allowing a resident of a Contracting State to elect to be taxed by the other Contracting State on a net basis on income from real property.

(Added on 29 April 2000; see HISTORY)

11. *Australia* reserves the right to include rights relating to all natural resources under this Article.

(Added on 15 July 2005; see HISTORY)

12. *Mexico* reserves the right to treat as immovable property any right that allows the use or enjoyment of immovable property situated in a Contracting State where that use or enjoyment relates to time sharing since under its domestic law such right is not considered to constitute immovable property.

(Added on 15 July 2005; see HISTORY)

HISTORY

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. All Double Taxation Conventions in force give the right to tax income from immovable property to the State of source, that is, the State in which the property producing such income is situated. This uniform practice in the Conventions is due to the fact that there is always a very close economic connection between the source of the income and the State of source. The rule laid down in paragraph 1 of the Article is in conformity with this practice."

Paragraph 2: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

> "2. Defining the concept of immovable property by reference to the laws of the State of situs, as is provided in paragraph 2, will help to avoid difficulties of interpretation over the question whether an asset or a right is to be regarded as immovable property or not. The Article, however, specifically mentions the assets and rights which must always be regarded as immovable property. In fact such assets and rights are already treated as immovable property according to the laws or the taxation rules of most O.E.C.D. Member countries. Conversely, the Article stipulates that ships, boats and aircraft shall never be considered as immovable property. No special provision has been included as regards income from indebtedness secured by immovable property, as the question is settled by Article 11 on the taxation of interest."

Paragraph 3: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Tax Treaty Issues Relating to REITs" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 29 April 2000 and until 17 July 2008, paragraph 3 read as follows:

> "3. Paragraph 3 indicates that the general rule applies irrespective of the form of exploitation of the immovable property. Paragraph 4 makes it clear that the provisions of paragraphs 1 and 3 apply also to income from immovable property of industrial, commercial and other enterprises."

Paragraph 3 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD

Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 3 read as follows:

> "3. Paragraph 3 indicates that the general rule applies irrespective of the form of exploitation of the immovable property. Paragraph 4 makes it clear that the provisions of paragraphs 1 and 3 apply also to income from immovable property of industrial, commercial and other enterprises and to income from immovable property used for the performance of independent personal services."

Paragraph 3 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

> "3. As indicated in paragraph 3 of the Article, the general rule applies irrespective of the form of exploitation of the immovable property. Paragraphs 3 and 4 also make it clear that the provisions of the Article apply not only to income from immovable property of industrial, commercial and other enterprises as well as to income from immovable property used for the performance of professional services."

Paragraph 4: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 4 read as follows:

> "4. It should be noted in this connection that the right to tax of the State of source has priority over the right to tax of the other State and applies also where, in the case of an enterprise or of non-industrial and non-commercial activities, income is only indirectly derived from immovable property. This does not prevent income from immovable property, when derived through a permanent establishment, from being treated as income of an enterprise, but secures that income from immovable property will be taxed in the State in which the property is situated also in the case where such property is not part of a permanent establishment situated in that State. It should further be noted that the provisions of the Article do not prejudge the application of domestic law as regards the manner in which income from immovable property is to be taxed."

Paragraph 4 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

> "4. It should be noted in this connection that the right to tax of the State of source has priority over other rights to tax and applies also where, in the case of a business undertaking or of non-industrial and non-commercial activities, income is only indirectly derived from immovable property. This does not prevent income from immovable property, when derived through a permanent establishment, from being treated as income of a business enterprise, but secures that income from immovable property will be taxed in the State in which the property is situated also in the case where such property is not part of a permanent establishment situated in that State. It should further be noted that the provisions of the Article do not prejudge the application of national laws as regards the manner in which income from immovable property is to be taxed."

Paragraph 5: Amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, by substituting the

word "held" for the word "owned". In the 1977 Model Convention and until 23 July 1992, paragraph 5 read as follows:

> "5. *Finland* reserves the right to tax income of shareholders in Finnish companies from the direct use, letting, or use in any other form of the right to enjoyment of immovable property situated in Finland and owned by the company, where such right is based on the ownership of shares or other corporate rights in the company."

Paragraph 5 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 6: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 7: Added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 8: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 9: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 10: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 11: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 12: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

COMMENTARY ON ARTICLE 7 CONCERNING THE TAXATION OF BUSINESS PROFITS

I. Preliminary remarks

1. This Article allocates taxing rights with respect to the business profits of an enterprise of a Contracting State to the extent that these profits are not subject to different rules under other Articles of the Convention. It incorporates the basic principle that unless an enterprise of a Contracting State has a permanent establishment situated in the other State, the business profits of that enterprise may not be taxed by that other State unless these profits fall into special categories of income for which other Articles of the Convention give taxing rights to that other State.

(Replaced on 22 July 2010; see HISTORY)

2. Article 5, which includes the definition of the concept of permanent establishment, is therefore relevant to the determination of whether the business profits of an enterprise of a Contracting State may be taxed in the other State. That Article, however, does not itself allocate taxing rights: when an enterprise of a Contracting State carries on business in the other Contracting State through a permanent establishment situated therein, it is necessary to determine what, if any, are the profits that the other State may tax. Article 7 provides the answer to that question by determining that the other State may tax the profits that are attributable to the permanent establishment.

(Replaced on 22 July 2010; see HISTORY)

2.1 *(Renumbered and amended on 17 July 2008; see HISTORY)*

3. The principles underlying Article 7, and in particular paragraph 2 of the Article, have a long history. When the OECD first examined what criteria should be used in attributing profits to a permanent establishment, this question had previously been addressed in a large number of tax conventions and in various models developed by the League of Nations. The separate entity and arm's length principles, on which paragraph 2 is based, had already been incorporated in these conventions and models and the OECD considered that it was sufficient to restate these principles with some slight amendments and modifications for the main purpose of clarification.

(Replaced on 22 July 2010; see HISTORY)

4. Practical experience has shown, however, that there was considerable variation in the interpretation of these general principles and of other provisions of earlier versions of Article 7. This lack of a common interpretation created problems of double taxation and non-taxation. Over the

years, the Committee on Fiscal Affairs spent considerable time and effort trying to ensure a more consistent interpretation and application of the rules of the Article. Minor changes to the wording of the Article and a number of changes to the Commentary were made when the 1977 Model Tax Convention was adopted. A report that addressed that question in the specific case of banks was published in 1984.[1] In 1987, noting that the determination of profits attributable to a permanent establishment could give rise to some uncertainty, the Committee undertook a review of the question which led to the adoption, in 1993, of the report entitled "Attribution of Income to Permanent Establishments"[2] and to subsequent changes to the Commentary.

(Renumbered and amended on 22 July 2010; see HISTORY)

5. Despite that work, the practices of OECD and non-OECD countries regarding the attribution of profits to permanent establishments and these countries' interpretation of Article 7 continued to vary considerably. The Committee acknowledged the need to provide more certainty to taxpayers: in its report *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*[3] (the "OECD Transfer Pricing Guidelines"), it indicated that further work would address the application of the arm's length principle to permanent establishments. That work resulted, in 2008, in a report entitled *Attribution of Profits to Permanent Establishments*[4] (the "2008 Report").

(Renumbered and amended on 22 July 2010; see HISTORY)

6. The approach developed in the 2008 Report was not constrained by either the original intent or by the historical practice and interpretation of Article 7. Instead, the focus was on formulating the most preferable approach to attributing profits to a permanent establishment under Article 7 given modern-day multinational operations and trade. When it approved the 2008 Report, the Committee considered that the guidance included therein represented a better approach to attributing profits to permanent establishments than had previously been available. It also recognised, however, that there were differences between some of the conclusions of the 2008 Report and the interpretation of Article 7 previously given in this

1 "The Taxation of Multinational Banking Enterprises", in *Transfer Pricing and Multinational Enterprises: Three Taxation Issues*, OECD, Paris, 1984.

2 *Attribution of Income to Permanent Establishments*, Issues in International Taxation No. 5, OECD, Paris, 1994; reproduced in Volume II at page R(13)-1.

3 The original version of that report was approved by the Council of the OECD on 27 June 1995 and was updated a number of times since then. Published by the OECD as *OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*.

Commentary.

(Amended on 22 July 2010; see HISTORY)

7. In order to provide maximum certainty on how profits should be attributed to permanent establishments, the Committee therefore decided that the 2008 Report's full conclusions should be reflected in a new version of Article 7, together with accompanying Commentary, to be used in the negotiation of future treaties and the amendment of existing treaties. In addition, in order to provide improved certainty for the interpretation of treaties that had already been concluded on the basis of the previous wording of Article 7, the Committee decided that a revised Commentary for that previous version of the Article should also be prepared, to take into account those aspects of the report that did not conflict with the Commentary as it read before the adoption of the 2008 Report.

(Replaced on 22 July 2010; see HISTORY)

8. The new version of the Article, which now appears in the Model Tax Convention, was adopted in 2010. At the same time, the Committee adopted a revised version of the 2008 Report in order to ensure that the conclusions of that report could be read harmoniously with the new wording and modified numbering of this new version of the Article. Whilst the conclusions and interpretations included in the revised report that was thus adopted in 2010[1] (hereinafter referred to as "the Report") are identical to those of the 2008 Report, that revised version takes account of the drafting of the Article as it now reads (the Annex to this Commentary includes, for historical reference, the text of the previous wording of Article 7 and that revised Commentary, as they read before the adoption of the current version of the Article).

(Replaced on 22 July 2010; see HISTORY)

9. The current version of the Article therefore reflects the approach developed in the Report and must be interpreted in light of the guidance contained in it. The Report deals with the attribution of profits both to permanent establishments in general (Part I of the Report) and, in particular, to permanent establishments of businesses operating in the financial sector, where trading through a permanent establishment is widespread (Part II of the Report, which deals with permanent establishments of banks, Part III, which deals with permanent establishments of enterprises carrying on global trading and Part IV, which deals with permanent establishments of enterprises carrying on insurance activities).

(Renumbered and amended on 22 July 2010; see HISTORY)

1 *Attribution of Profits to Permanent Establishments*, OECD, Paris, 2010.

II. Commentary on the provisions of the Article

Paragraph 1

C (7)

10. paragraph 1 incorporates the rules for the allocation of taxing rights on the business profits of enterprises of each Contracting State. First, it states that unless an enterprise of a Contracting State has a permanent establishment situated in the other State, the business profits of that enterprise may not be taxed by that other State. Second, it provides that if such an enterprise carries on business in the other State through a permanent establishment situated therein, the profits that are attributable to the permanent establishment, as determined in accordance with paragraph 2, may be taxed by that other State. As explained below, however, paragraph 4 restricts the application of these rules by providing that Article 7 does not affect the application of other Articles of the Convention that provide special rules for certain categories of profits (e.g. those derived from the operation of ships and aircraft in international traffic) or for certain categories of income that may also constitute business profits (e.g. income derived by an enterprise in respect of personal activities of an entertainer or sportsman).

(Replaced on 22 July 2010; see HISTORY)

10.1 *(Renumbered and amended on 17 July 2008; see HISTORY)*

11. The first principle underlying paragraph 1, *i.e.* that the profits of an enterprise of one Contracting State shall not be taxed in the other State unless the enterprise carries on business in that other State through a permanent establishment situated therein, has a long history and reflects the international consensus that, as a general rule, until an enterprise of one State has a permanent establishment in another State, it should not properly be regarded as participating in the economic life of that other State to such an extent that the other State should have taxing rights on its profits.

(Renumbered and amended on 22 July 2010; see HISTORY)

12. The second principle, which is reflected in the second sentence of the paragraph, is that the right to tax of the State where the permanent establishment is situated does not extend to profits that the enterprise may derive from that State but that are not attributable to the permanent establishment. This is a question on which there have historically been differences of view, a few countries having some time ago pursued a principle of general "force of attraction" according to which income such as other business profits, dividends, interest and royalties arising from sources in their territory was fully taxable by them if the beneficiary had a permanent establishment therein even though such income was clearly not attributable to that permanent establishment. Whilst some bilateral tax conventions

include a limited anti-avoidance rule based on a restricted force of attraction approach that only applies to business profits derived from activities similar to those carried on by a permanent establishment, the general force of attraction approach described above has now been rejected in international tax treaty practice. The principle that is now generally accepted in double taxation conventions is based on the view that in taxing the profits that a foreign enterprise derives from a particular country, the tax authorities of that country should look at the separate sources of profit that the enterprise derives from their country and should apply to each the permanent establishment test, subject to the possible application of other Articles of the Convention. This solution allows simpler and more efficient tax administration and compliance, and is more closely adapted to the way in which business is commonly carried on. The organisation of modern business is highly complex. There are a considerable number of companies each of which is engaged in a wide diversity of activities and is carrying on business extensively in many countries. A company may set up a permanent establishment in another country through which it carries on manufacturing activities whilst a different part of the same company sells different goods in that other country through independent agents. That company may have perfectly valid commercial reasons for doing so: these may be based, for example, on the historical pattern of its business or on commercial convenience. If the country in which the permanent establishment is situated wished to go so far as to try to determine, and tax, the profit element of each of the transactions carried on through independent agents, with a view to aggregating that profit with the profits of the permanent establishment, that approach would interfere seriously with ordinary commercial activities and would be contrary to the aims of the Convention.

(Renumbered and amended on 22 July 2010; see HISTORY)

12.1 *(Renumbered and amended on 17 July 2008; see HISTORY)*

12.2 *(Deleted on 17 July 2008; see HISTORY)*

13. As indicated in the second sentence of paragraph 1, the profits that are attributable to the permanent establishment are determined in accordance with the provisions of paragraph 2, which provides the meaning of the phrase "profits that are attributable to the permanent establishment" found in paragraph 1. Since paragraph 1 grants taxing rights to the State in which the permanent establishment is situated only with respect to the profits that are attributable to that permanent establishment, the paragraph therefore prevents that State, subject to the application of other Articles of the

Convention, from taxing the enterprise of the other Contracting State on profits that are not attributable to the permanent establishment.

(Replaced on 22 July 2010; see HISTORY)

14. The purpose of paragraph 1 is to limit the right of one Contracting State to tax the business profits of enterprises of the other Contracting State. The paragraph does not limit the right of a Contracting State to tax its own residents under controlled foreign companies provisions found in its domestic law even though such tax imposed on these residents may be computed by reference to the part of the profits of an enterprise that is resident of the other Contracting State that is attributable to these residents' participation in that enterprise. Tax so levied by a State on its own residents does not reduce the profits of the enterprise of the other State and may not, therefore, be said to have been levied on such profits (see also paragraph 23 of the Commentary on Article 1 and paragraphs 37 to 39 of the Commentary on Article 10).

(Renumbered and amended on 22 July 2010; see HISTORY)

Paragraph 2

15. Paragraph 2 provides the basic rule for the determination of the profits that are attributable to a permanent establishment. According to the paragraph, these profits are the profits that the permanent establishment might be expected to make if it were a separate and independent enterprise engaged in the same or similar activities under the same or similar conditions, taking into account the functions performed, assets used and risks assumed through the permanent establishment and through other parts of the enterprise. In addition, the paragraph clarifies that this rule applies with respect to the dealings between the permanent establishment and the other parts of the enterprise.

(Replaced on 22 July 2010; see HISTORY)

15.1 *(Renumbered and amended on 17 July 2008; see HISTORY)*

15.2 *(Deleted on 17 July 2008; see HISTORY)*

15.3 *(Deleted on 17 July 2008; see HISTORY)*

15.4 *(Deleted on 17 July 2008; see HISTORY)*

16. The basic approach incorporated in the paragraph for the purposes of determining what are the profits that are attributable to the permanent establishment is therefore to require the determination of the profits under the fiction that the permanent establishment is a separate enterprise and that such an enterprise is independent from the rest of the enterprise of which it is a part as well as from any other person. The second part of that fiction

corresponds to the arm's length principle which is also applicable, under the provisions of Article 9, for the purpose of adjusting the profits of associated enterprises (see paragraph 1 of the Commentary on Article 9).

(Replaced on 22 July 2010; see HISTORY)

17. Paragraph 2 does not seek to allocate the overall profits of the whole enterprise to the permanent establishment and its other parts but, instead, requires that the profits attributable to a permanent establishment be determined as if it were a separate enterprise. Profits may therefore be attributed to a permanent establishment even though the enterprise as a whole has never made profits. Conversely, paragraph 2 may result in no profits being attributed to a permanent establishment even though the enterprise as a whole has made profits.

(Replaced on 22 July 2010; see HISTORY)

17.1 *(Renumbered on 17 July 2008; see HISTORY)*

17.2 *(Renumbered on 17 July 2008; see HISTORY)*

17.3 *(Renumbered on 17 July 2008; see HISTORY)*

17.4 *(Renumbered and amended on 17 July 2008; see HISTORY)*

17.5 *(Renumbered on 17 July 2008; see HISTORY)*

17.6 *(Renumbered on 17 July 2008; see HISTORY)*

17.7 *(Renumbered on 17 July 2008; see HISTORY)*

18. Clearly, however, where an enterprise of a Contracting State has a permanent establishment in the other Contracting State, the first State has an interest in the directive of paragraph 2 being correctly applied by the State where the permanent establishment is located. Since that directive applies to both Contracting States, the State of the enterprise must, in accordance with either Article 23 A or 23 B, eliminate double taxation on the profits properly attributable to the permanent establishment (see paragraph 27 below). In other words, if the State where the permanent establishment is located attempts to tax profits that are not attributable to the permanent establishment under Article 7, this may result in double taxation of profits that should properly be taxed only in the State of the enterprise.

(Replaced on 22 July 2010; see HISTORY)

18.1 *(Deleted on 17 July 2008; see HISTORY)*

18.2 *(Deleted on 17 July 2008; see HISTORY)*

18.3 *(Deleted on 17 July 2008; see HISTORY)*

19. As indicated in paragraphs 8 and 9 above, Article 7, as currently worded, reflects the approach developed in the Report adopted by the Committee on Fiscal Affairs in 2010. The Report dealt primarily with the application of the separate and independent enterprise fiction that underlies paragraph 2 and the main purpose of the changes made to that paragraph following the adoption of the Report was to ensure that the determination of the profits attributable to a permanent establishment followed the approach put forward in that Report. The Report therefore provides a detailed guide as to how the profits attributable to a permanent establishment should be determined under the provisions of paragraph 2.

(Replaced on 22 July 2010; see HISTORY)

20. As explained in the Report, the attribution of profits to a permanent establishment under paragraph 2 will follow from the calculation of the profits (or losses) from all its activities, including transactions with independent enterprises, transactions with associated enterprises (with direct application of the OECD Transfer Pricing Guidelines) and dealings with other parts of the enterprise. This analysis involves two steps which are described below. The order of the listing of items within each of these two steps is not meant to be prescriptive, as the various items may be interrelated (*e.g.* risk is initially attributed to a permanent establishment as it performs the significant people functions relevant to the assumption of that risk but the recognition and characterisation of a subsequent dealing between the permanent establishment and another part of the enterprise that manages the risk may lead to a transfer of the risk and supporting capital to the other part of the enterprise).

(Replaced on 22 July 2010; see HISTORY)

21. Under the first step, a functional and factual analysis is undertaken which will lead to:

- the attribution to the permanent establishment, as appropriate, of the rights and obligations arising out of transactions between the enterprise of which the permanent establishment is a part and separate enterprises;
- the identification of significant people functions relevant to the attribution of economic ownership of assets, and the attribution of economic ownership of assets to the permanent establishment;
- the identification of significant people functions relevant to the assumption of risks, and the attribution of risks to the permanent establishment;
- the identification of other functions of the permanent establishment;

— the recognition and determination of the nature of those dealings between the permanent establishment and other parts of the same enterprise that can appropriately be recognised, having passed the threshold test referred to in paragraph 26; and

— the attribution of capital based on the assets and risks attributed to the permanent establishment.

(Replaced on 22 July 2010; see HISTORY)

22. Under the second step, any transactions with associated enterprises attributed to the permanent establishment are priced in accordance with the guidance of the OECD Transfer Pricing Guidelines and these Guidelines are applied by analogy to dealings between the permanent establishment and the other parts of the enterprise of which it is a part. The process involves the pricing on an arm's length basis of these recognised dealings through:

— the determination of comparability between the dealings and uncontrolled transactions, established by applying the Guidelines' comparability factors directly (characteristics of property or services, economic circumstances and business strategies) or by analogy (functional analysis, contractual terms) in light of the particular factual circumstances of the permanent establishment; and

— the application by analogy of one of the Guidelines' methods to arrive at an arm's length compensation for the dealings between the permanent establishment and the other parts of the enterprise, taking into account the functions performed by and the assets and risks attributed to the permanent establishment and the other parts of the enterprise.

(Replaced on 22 July 2010; see HISTORY)

23. Each of these operations is discussed in greater detail in the Report, in particular as regards the attribution of profits to permanent establishments of businesses operating in the financial sector, where trading through a permanent establishment is widespread (see Part II of the Report, which deals with permanent establishments of banks; Part III, which deals with permanent establishments of enterprises carrying on global trading, and Part IV, which deals with permanent establishments of enterprises carrying on insurance activities).

(Replaced on 22 July 2010; see HISTORY)

24. paragraph 2 refers specifically to the dealings between the permanent establishment and other parts of the enterprise of which the permanent establishment is a part in order to emphasise that the separate and independent enterprise fiction of the paragraph requires that these dealings be treated the same way as similar transactions taking place between

independent enterprises. That specific reference to dealings between the permanent establishment and other parts of the enterprise does not, however, restrict the scope of the paragraph. Where a transaction that takes place between the enterprise and an associated enterprise affects directly the determination of the profits attributable to the permanent establishment (*e.g.* the acquisition by the permanent establishment from an associated enterprise of goods that will be sold through the permanent establishment), paragraph 2 also requires that, for the purpose of computing the profits attributable to the permanent establishment, the conditions of the transaction be adjusted, if necessary, to reflect the conditions of a similar transaction between independent enterprises. Assume, for instance, that the permanent establishment situated in State S of an enterprise of State R acquires property from an associated enterprise of State T. If the price provided for in the contract between the two associated enterprises exceeds what would have been agreed to between independent enterprises, paragraph 2 of Article 7 of the treaty between State R and State S will authorise State S to adjust the profits attributable to the permanent establishment to reflect what a separate and independent enterprise would have paid for that property. In such a case, State R will also be able to adjust the profits of the enterprise of State R under paragraph 1 of Article 9 of the treaty between State R and State T, which will trigger the application of the corresponding adjustment mechanism of paragraph 2 of Article 9 of that treaty.

(Replaced on 22 July 2010; see HISTORY)

25. Dealings between the permanent establishment and other parts of the enterprise of which it is a part have no legal consequences for the enterprise as a whole. This implies a need for greater scrutiny of these dealings than of transactions between two associated enterprises. This also implies a greater scrutiny of documentation (in the inevitable absence, for example, of legally binding contracts) that might otherwise exist.

(Replaced on 22 July 2010; see HISTORY)

26. It is generally not intended that more burdensome documentation requirements be imposed in connection with such dealings than apply to transactions between associated enterprises. Moreover, as in the case of transfer pricing documentation referred to in the OECD Transfer Pricing Guidelines, the requirements should not be applied in such a way as to impose on taxpayers costs and burdens disproportionate to the circumstances. Nevertheless, considering the uniqueness of the nature of a dealing, countries would wish to require taxpayers to demonstrate clearly that it would be appropriate to recognise the dealing. Thus, for example, an accounting record and contemporaneous documentation showing a dealing that transfers economically significant risks, responsibilities and benefits would be a useful

starting point for the purposes of attributing profits. Taxpayers are encouraged to prepare such documentation, as it may reduce substantially the potential for controversies regarding application of the approach. Tax administrations would give effect to such documentation, notwithstanding its lack of legal effect, to the extent that:

- — the documentation is consistent with the economic substance of the activities taking place within the enterprise as revealed by the functional and factual analysis;
- — the arrangements documented in relation to the dealing, viewed in their entirety, do not differ from those which would have been adopted by comparable independent enterprises behaving in a commercially rational manner, or if they do, the structure as presented in the taxpayer's documentation does not practically impede the tax administration from determining an appropriate transfer price; and
- — the dealing presented in the taxpayer's documentation does not violate the principles of the approach put forward in the Report by, for example, purporting to transfer risks in a way that segregates them from functions.

(Replaced on 22 July 2010; see HISTORY)

27. The opening words of paragraph 2 and the phrase "in each Contracting State" indicate that paragraph 2 applies not only for the purposes of determining the profits that the Contracting State in which the permanent establishment is situated may tax in accordance with the last sentence of paragraph 1 but also for the application of Articles 23 A and 23 B by the other Contracting State. Where an enterprise of one State carries on business through a permanent establishment situated in the other State, the first-mentioned State must either exempt the profits that are attributable to the permanent establishment (Article 23 A) or give a credit for the tax levied by the other State on these profits (Article 23 B). Under both these Articles, that State must therefore determine the profits attributable to the permanent establishment in order to provide relief from double taxation and is required to follow the provisions of paragraph 2 for that purpose.

(Replaced on 22 July 2010; see HISTORY)

28. The separate and independent enterprise fiction that is mandated by paragraph 2 is restricted to the determination of the profits that are attributable to a permanent establishment. It does not extend to create notional income for the enterprise which a Contracting State could tax as such under its domestic law by arguing that such income is covered by another Article of the Convention which, in accordance with paragraph 4 of Article 7, allows taxation of that income notwithstanding paragraph 1 of Article 7.

Assume, for example, that the circumstances of a particular case justify considering that the economic ownership of a building used by the permanent establishment should be attributed to the head office (see paragraph 75 of Part I of the Report). In such a case, paragraph 2 could require the deduction of a notional rent in determining the profits of the permanent establishment. That fiction, however, could not be interpreted as creating income from immovable property for the purposes of Article 6. Indeed, the fiction mandated by paragraph 2 does not change the nature of the income derived by the enterprise; it merely applies to determine the profits attributable to the permanent establishment for the purposes of Articles 7, 23 A and 23 B. Similarly, the fact that, under paragraph 2, a notional interest charge could be deducted in determining the profits attributable to a permanent establishment does not mean that any interest has been paid to the enterprise of which the permanent establishment is a part for the purposes of paragraphs 1 and 2 of Article 11. The separate and independent enterprise fiction does not extend to Article 11 and, for the purposes of that Article, one part of an enterprise cannot be considered to have made an interest payment to another part of the same enterprise. Clearly, however, if interest paid by an enterprise to a different person is paid on indebtedness incurred in connection with a permanent establishment of the enterprise and is borne by that permanent establishment, this real interest payment may, under paragraph 2 of Article 11, be taxed by the State in which the permanent establishment is located. Also, where a transfer of assets between a permanent establishment and the rest of the enterprise is treated as a dealing for the purposes of paragraph 2 of Article 7, Article 13 does not prevent States from taxing profits or gains from such a dealing as long as such taxation is in accordance with Article 7 (see paragraphs 4, 8 and 10 of the Commentary on Article 13).

(Replaced on 22 July 2010; see HISTORY)

29. Some States consider that, as a matter of policy, the separate and independent enterprise fiction that is mandated by paragraph 2 should not be restricted to the application of Articles 7, 23 A and 23 B but should also extend to the interpretation and application of other Articles of the Convention, so as to ensure that permanent establishments are, as far as possible, treated in the same way as subsidiaries. These States may therefore consider that notional charges for dealings which, pursuant to paragraph 2, are deducted in computing the profits of a permanent establishment should be treated, for the purposes of other Articles of the Convention, in the same way as payments that would be made by a subsidiary to its parent company. These States may therefore wish to include in their tax treaties provisions according to which charges for internal dealings should be recognised for the purposes of Articles 6 and 11 (it should be noted, however, that tax will be levied in

accordance with such provisions only to the extent provided for under domestic law). Alternatively, these States may wish to provide that no internal dealings will be recognised in circumstances where an equivalent transaction between two separate enterprises would give rise to income covered by Article 6 or 11 (in that case, however, it will be important to ensure that an appropriate share of the expenses related to what would otherwise have been recognised as a dealing be attributed to the relevant part of the enterprise). States considering these alternatives should, however, take account of the fact that, due to special considerations applicable to internal interest charges between different parts of a financial enterprise (*e.g.* a bank), dealings resulting in such charges have long been recognised, even before the adoption of the present version of the Article.

(Replaced on 22 July 2010; see HISTORY)

30. Paragraph 2 determines the profits that are attributable to a permanent establishment for the purposes of the rule in paragraph 1 that allocates taxing rights on these profits. Once the profits that are attributable to a permanent establishment have been determined in accordance with paragraph 2 of Article 7, it is for the domestic law of each Contracting State to determine whether and how such profits should be taxed as long as there is conformity with the requirements of paragraph 2 and the other provisions of the Convention. Paragraph 2 does not deal with the issue of whether expenses are deductible when computing the taxable income of the enterprise in either Contracting State. The conditions for the deductibility of expenses are a matter to be determined by domestic law, subject to the provisions of the Convention and, in particular, paragraph 3 of Article 24 (see paragraphs 33 and 34 below).

(Replaced on 22 July 2010; see HISTORY)

31. Thus, for example, whilst domestic law rules that would ignore the recognition of dealings that should be recognised for the purposes of determining the profits attributable to a permanent establishment under paragraph 2 or that would deny the deduction of expenses not incurred exclusively for the benefit of the permanent establishment would clearly be in violation of paragraph 2, rules that prevent the deduction of certain categories of expenses (*e.g.* entertainment expenses) or that provide when a particular expense should be deducted are not affected by paragraph 2. In making that distinction, however, some difficult questions may arise as in the case of domestic law restrictions based on when an expense or element of income is actually paid. Since, for instance, an internal dealing will not involve an actual transfer or payment between two different persons, the application of such domestic law restrictions should generally take into account the nature of the

dealing and, therefore, treat the relevant transfer or payment as if it had been made between two different persons.

(Replaced on 22 July 2010; see HISTORY)

32. Variations between the domestic laws of the two States concerning matters such as depreciation rates, the timing of the recognition of income and restrictions on the deductibility of certain expenses will normally result in a different amount of taxable income in each State even though, for the purposes of the Convention, the amount of profits attributable to the permanent establishment will have been computed on the basis of paragraph 2 in both States (see also paragraphs 39-43 of the Commentary on Articles 23 A and 23 B). Thus, even though paragraph 2 applies equally to the Contracting State in which the permanent establishment is situated (for the purposes of paragraph 1) and to the other Contracting State (for the purposes of Articles 23 A or 23 B), it is likely that the amount of taxable income on which an enterprise of a Contracting State will be taxed in the State where the enterprise has a permanent establishment will, for a given taxable period, be different from the amount of taxable income with respect to which the first State will have to provide relief pursuant to Articles 23 A or 23 B. Also, to the extent that the difference results from domestic law variations concerning the types of expenses that are deductible, as opposed to timing differences in the recognition of these expenses, the difference will be permanent.

(Replaced on 22 July 2010; see HISTORY)

33. In taxing the profits attributable to a permanent establishment situated on its territory, a Contracting State will, however, have to take account of the provisions of paragraph 3 of Article 24. That paragraph requires, among other things, that expenses be deductible under the same conditions whether they are incurred for the purposes of a permanent establishment situated in a Contracting State or for the purposes of an enterprise of that State. As stated in paragraph 40 of the Commentary on Article 24:

> Permanent establishments must be accorded the same right as resident enterprises to deduct the trading expenses that are, in general, authorised by the taxation law to be deducted from taxable profits. Such deductions should be allowed without any restrictions other than those also imposed on resident enterprises.

(Replaced on 22 July 2010; see HISTORY)

34. The requirement imposed by paragraph 3 of Article 24 is the same regardless of how expenses incurred by an enterprise for the benefit of a permanent establishment are taken into account for the purposes of paragraph 2 of Article 7. In some cases, it will not be appropriate to consider that a dealing has taken place between different parts of the enterprise. In

such cases, expenses incurred by an enterprise for the purposes of the activities performed by the permanent establishment will be directly deducted in determining the profits of the permanent establishment (*e.g.* the salary of a local construction worker hired and paid locally to work exclusively on a construction site that constitutes a permanent establishment of a foreign enterprise). In other cases, expenses incurred by the enterprise will be attributed to functions performed by other parts of the enterprise wholly or partly for the benefit of the permanent establishment and an appropriate charge will be deducted in determining the profits attributable to the permanent establishment (*e.g.* overhead expenses related to administrative functions performed by the head office for the benefit of the permanent establishment). In both cases, paragraph 3 of Article 24 will require that, as regards the permanent establishment, the expenses be deductible under the same conditions as those applicable to an enterprise of that State. Thus, any expense incurred by the enterprise directly or indirectly for the benefit of the permanent establishment must not, for tax purposes, be treated less favourably than a similar expense incurred by an enterprise of that State. That rule will apply regardless of whether or not, for the purposes of paragraph 2 of this Article 7, the expense is directly attributed to the permanent establishment (first example) or is attributed to another part of the enterprise but reflected in a notional charge to the permanent establishment (second example).

(Replaced on 22 July 2010; see HISTORY)

35. Paragraph 3 of Article 5 sets forth a special rule for a fixed place of business that is a building site or a construction or installation project. Such a fixed place of business is a permanent establishment only if it lasts more than twelve months. Experience has shown that these types of permanent establishments can give rise to special problems in attributing income to them under Article 7.

(Replaced on 22 July 2010; see HISTORY)

36. These problems arise chiefly where goods are provided, or services performed, by the other parts of the enterprise or a related party in connection with the building site or construction or installation project. Whilst these problems can arise with any permanent establishment, they are particularly acute for building sites and construction or installation projects. In these circumstances, it is necessary to pay close attention to the general principle that income is attributable to a permanent establishment only when it results from activities carried on by the enterprise through that permanent establishment.

(Replaced on 22 July 2010; see HISTORY)

37. For example, where such goods are supplied by the other parts of the enterprise, the profits arising from that supply do not result from the activities carried on through the permanent establishment and are not attributable to it. Similarly, profits resulting from the provision of services (such as planning, designing, drawing blueprints, or rendering technical advice) by the parts of the enterprise operating outside the State where the permanent establishment is located do not result from the activities carried on through the permanent establishment and are not attributable to it.

(Replaced on 22 July 2010; see HISTORY)

38. Article 7, as it read before 2010, included the following paragraph 3:

> In determining the profits of a permanent establishment, there shall be allowed as deductions expenses which are incurred for the purposes of the permanent establishment, including executive and general administrative expenses so incurred, whether in the State in which the permanent establishment is situated or elsewhere.

Whilst that paragraph was originally intended to clarify that paragraph 2 required expenses incurred directly or indirectly for the benefit of a permanent establishment to be taken into account in determining the profits of the permanent establishment even if these expenses had been incurred outside the State in which the permanent establishment was located, it had sometimes been read as limiting the deduction of expenses that indirectly benefited the permanent establishment to the actual amount of the expenses.

(Replaced on 22 July 2010; see HISTORY)

39. This was especially the case of general and administrative expenses, which were expressly mentioned in that paragraph. Under the previous version of paragraph 2, as interpreted in the Commentary, this was generally not a problem since a share of the general and administrative expenses of the enterprise could usually only be allocated to a permanent establishment on a cost-basis.

(Replaced on 22 July 2010; see HISTORY)

40. As now worded, however, paragraph 2 requires the recognition and arm's length pricing of the dealings through which one part of the enterprise performs functions for the benefit of the permanent establishment (*e.g.* through the provision of assistance in day-to-day management). The deduction of an arm's length charge for these dealings, as opposed to a deduction limited to the amount of the expenses, is required by paragraph 2. The previous paragraph 3 has therefore been deleted to prevent it from being misconstrued as limiting the deduction to the amount of the expenses themselves. That deletion does not affect the requirement, under paragraph 2, that in determining the profits attributable to a permanent establishment, all

relevant expenses of the enterprise, wherever incurred, be taken into account. Depending on the circumstances, this will be done through the deduction of all or part of the expenses or through the deduction of an arm's length charge in the case of a dealing between the permanent establishment and another part of the enterprise.

(Replaced on 22 July 2010; see HISTORY)

40.1 *(Renumbered and amended on 17 July 2008; see HISTORY)*

40.2 *(Renumbered and amended on 17 July 2008; see HISTORY)*

40.3 *(Renumbered and amended on 17 July 2008; see HISTORY)*

41. Article 7, as it read before 2010, also included a provision that allowed the attribution of profits to a permanent establishment to be done on the basis of an apportionment of the total profits of the enterprise to its various parts. That method, however, was only to be applied to the extent that its application had been customary in a Contracting State and that the result was in accordance with the principles of Article 7. For the Committee, methods other than an apportionment of total profits of an enterprise can be applied even in the most difficult cases. The Committee therefore decided to delete that provision because its application had become very exceptional and because of concerns that it was extremely difficult to ensure that the result of its application would be in accordance with the arm's length principle.

(Replaced on 22 July 2010; see HISTORY)

42. At the same time, the Committee also decided to eliminate another provision that was found in the previous version of the Article and according to which the profits to be attributed to the permanent establishment were to be "determined by the same method year by year unless there is good and sufficient reason to the contrary." That provision, which was intended to ensure continuous and consistent treatment, was appropriate as long as it was accepted that the profits attributable to a permanent establishment could be determined through direct or indirect methods or even on the basis of an apportionment of the total profits of the enterprise to its various parts. The new approach developed by the Committee, however, does not allow for the application of such fundamentally different methods and therefore avoids the need for such a provision.

(Replaced on 22 July 2010; see HISTORY)

43. A final provision that was deleted from the Article at the same time provided that "[n]o profits shall be attributed to a permanent establishment by reason of the mere purchase by that permanent establishment of goods or merchandise for the enterprise." Subparagraph 4 *d)* of Article 5 recognises that where an enterprise of a Contracting State maintains in the other State a fixed

place of business exclusively for the purpose of purchasing goods for itself, its activity at that location should not be considered to have reached a level that justifies taxation in that other State. Where, however, subparagraph 4 d) is not applicable because other activities are carried on by the enterprise through that place of business, which therefore constitutes a permanent establishment, it is appropriate to attribute profits to all the functions performed at that location. Indeed, if the purchasing activities were performed by an independent enterprise, the purchaser would be remunerated on an arm's length basis for its services. Also, since a tax exemption restricted to purchasing activities undertaken for the enterprise would require that expenses incurred for the purposes of performing these activities be excluded in determining the profits of the permanent establishment, such an exemption would raise administrative problems. The Committee therefore considered that a provision according to which no profits should be attributed to a permanent establishment by reason of the mere purchase of goods or merchandise for the enterprise was not consistent with the arm's length principle and should not be included in the Article.

(Replaced on 22 July 2010; see HISTORY)

Paragraph 3

44. The combination of Articles 7 (which restricts the taxing rights of the State in which the permanent establishment is situated) and 23 A and 23 B (which oblige the other State to provide relief from double taxation) ensures that there is no unrelieved double taxation of the profits that are properly attributable to the permanent establishment. This result may require that the two States resolve differences based on different interpretations of paragraph 2 and it is important that mechanisms be available to resolve all such differences to the extent necessary to eliminate double taxation.

(Replaced on 22 July 2010; see HISTORY)

45. As already indicated, the need for the two Contracting States to reach a common understanding as regards the application of paragraph 2 in order to eliminate risks of double taxation has led the Committee to develop detailed guidance on the interpretation of that paragraph. This guidance is reflected in the Report, which draws on the principles of the OECD Transfer Pricing Guidelines.

(Replaced on 22 July 2010; see HISTORY)

46. Risks of double taxation will usually be avoided because the taxpayer will determine the profits attributable to the permanent establishment in the same manner in each Contracting State and in accordance with paragraph 2 as interpreted by the Report, which will ensure the same result for the

purposes of Articles 7 and 23 A or 23 B (see, however, paragraph 66). Insofar as each State agrees that the taxpayer has done so, it should refrain from adjusting the profits in order to reach a different result under paragraph 2. This is illustrated in the following example.

(Replaced on 22 July 2010; see HISTORY)

47. Example. A manufacturing plant located in State R of an enterprise of State R has transferred goods for sale to a permanent establishment of the enterprise situated in State S. For the purpose of determining the profits attributable to the permanent establishment under paragraph 2, the Report provides that a dealing must be recognised and a notional arm's length price must be determined for that dealing. The enterprise's documentation, which is consistent with the functional and factual analysis and which has been used by the taxpayer as the basis for the computation of its taxable income in each State, shows that a dealing in the nature of a sale of the goods by the plant in State R to the permanent establishment in State S has occurred and that a notional arm's length price of 100 has been used to determine the profits attributable to the permanent establishment. Both States agree that the recognition of the dealing and the price used by the taxpayer are in conformity with the principles of the Report and of the OECD Transfer Pricing Guidelines. In this case, both States should refrain from adjusting the profits on the basis that a different arm's length price should have been used; as long as there is agreement that the taxpayer has conformed with paragraph 2, the tax administrations of both States cannot substitute their judgment for that of the taxpayer as to what are the arm's length conditions. In this example, the fact that the same arm's length price has been used in both States and that both States will recognise that price for the purposes of the application of the Convention will ensure that any double taxation related to that dealing will be eliminated under Article 23 A or 23 B.

(Replaced on 22 July 2010; see HISTORY)

48. In the previous example, both States agreed that the recognition of the dealing and the price used by the taxpayer were in conformity with the principles of the Report and of the OECD Transfer Pricing Guidelines. The Contracting States, however, may not always reach such an agreement. In some cases, the Report and the OECD Transfer Pricing Guidelines may allow different interpretations of paragraph 2 and, to the extent that double taxation would otherwise result from these different interpretations, it is essential to ensure that such double taxation is relieved. paragraph 3 provides the mechanism that guarantees that outcome.

(Replaced on 22 July 2010; see HISTORY)

49. For example, as explained in paragraphs 105-171 of Part I of the Report, paragraph 2 permits different approaches for determining, on the basis of the attribution of "free" capital to a permanent establishment, the interest expense attributable to that permanent establishment. The Committee recognised that this could create problems, in particular for financial institutions. It concluded that in this and other cases where the two Contracting States have interpreted paragraph 2 differently and it is not possible to conclude that either interpretation is not in accordance with paragraph 2, it is important to ensure that any double taxation that would otherwise result from that difference will be eliminated.

(Replaced on 22 July 2010; see HISTORY)

50. Paragraph 3 will ensure that this result is achieved. It is important to note, however, that the cases where it will be necessary to have recourse to that paragraph are fairly limited.

(Replaced on 22 July 2010; see HISTORY)

51. First, as explained in paragraph 46 above, where the taxpayer has determined the profits attributable to the permanent establishment in the same manner in each Contracting State and both States agree that the taxpayer has done so in accordance with paragraph 2 as interpreted by the Report, no adjustments should be made to the profits in order to reach a different result under paragraph 2.

(Replaced on 17 July 2008; see HISTORY)

52. Second, paragraph 3 is not intended to limit in any way the remedies already available to ensure that each Contracting State conforms with its obligations under Articles 7 and 23 A or 23 B. For example, if the determination, by a Contracting State, of the profits attributable to a permanent establishment situated in that State is not in conformity with paragraph 2, the taxpayer will be able to use the available domestic legal remedies and the mutual agreement procedure provided for by Article 25 to address the fact that the taxpayer has not been taxed by that State in accordance with the Convention. Similarly, these remedies will also be available if the other State does not, for the purposes of Article 23 A or 23 B, determine the profits attributable to the permanent establishment in conformity with paragraph 2 and therefore does not comply with the provisions of this Article.

(Replaced on 22 July 2010; see HISTORY)

53. Where, however, the taxpayer has not determined the profits attributable to the permanent establishment in conformity with paragraph 2, each State is entitled to make an adjustment in order to ensure conformity

with that paragraph. Where one State makes an adjustment in conformity with paragraph 2, that paragraph certainly permits the other State to make a reciprocal adjustment so as to avoid any double taxation through the combined application of paragraph 2 and of Article 23 A or 23 B (see paragraph 65 below). It may be, however, that the domestic law of that other State (*e.g.* the State where the permanent establishment is located) may not allow it to make such a change or that State may have no incentive to do it on its own if the effect is to reduce the amount of profits that was previously taxable in that State. It may also be that, as indicated above, the two Contracting States will adopt different interpretations of paragraph 2 and it is not possible to conclude that either interpretation is not in accordance with paragraph 2.

(Replaced on 22 July 2010; see HISTORY)

54. Such concerns are addressed by paragraph 3. The following example illustrates the application of that paragraph.

(Replaced on 22 July 2010; see HISTORY)

55. Example. A manufacturing plant located in State R of an enterprise of State R has transferred goods for sale to a permanent establishment of the enterprise situated in State S. For the purpose of determining the profits attributable to the permanent establishment under paragraph 2, a dealing must be recognised and a notional arm's length price must be determined for that dealing. The enterprise's documentation, which is consistent with the functional and factual analysis and which has been used by the taxpayer as the basis for the computation of its taxable income in each State, shows that a dealing in the nature of a sale of the goods by the plant in State R to the permanent establishment in State S has occurred and that a notional price of 90 has been used to determine the profits attributable to the permanent establishment. State S accepts the amount used by the taxpayer but State R considers that the amount is below what is required by its domestic law and the arm's length principle of paragraph 2. It considers that the appropriate arm's length price that should have been used is 110 and adjusts the amount of tax payable in State R accordingly after reducing the amount of the exemption (Article 23 A) or the credit (Article 23 B) claimed by the taxpayer with respect to the profits attributable to the permanent establishment. In that situation, since the price of the same dealing will have been determined as 90 in State S and 110 in State R, profits of 20 may be subject to double taxation. paragraph 3 will address that situation by requiring State S, to the extent that there is indeed double taxation and that the adjustment made by State R is in conformity with paragraph 2, to provide a corresponding adjustment to the tax payable in State S on the profits that are taxed in both States.

(Replaced on 22 July 2010; see HISTORY)

56. If State S, however, does not agree that the adjustment by State R was warranted by paragraph 2, it will not consider that it has to make the adjustment. In such a case, the issue of whether State S should make the adjustment under paragraph 3 (if the adjustment by State R is justified under paragraph 2) or whether State R should refrain from making the initial adjustment (if it is not justified under paragraph 2) will be solved under a mutual agreement procedure pursuant to paragraph 1 of Article 25 using, if necessary, the arbitration provision of paragraph 5 of Article 25 (since it involves the question of whether the actions of one or both of the Contracting States have resulted or will result for the taxpayer in taxation not in accordance with the Convention). Through that procedure, the two States will be able to agree on the same arm's length price, which may be one of the prices put forward by the taxpayer and the two States or a different one.

(Replaced on 22 July 2010; see HISTORY)

57. As shown by the example in paragraph 55, paragraph 3 addresses the concern that the Convention might not provide adequate protection against double taxation in some situations where the two Contracting States adopt different interpretations of paragraph 2 of Article 7 and each State could be considered to be taxing "in accordance with" the Convention. paragraph 3 ensures that relief of double taxation will be provided in such a case, which is consistent with the overall objectives of the Convention.

(Replaced on 22 July 2010; see HISTORY)

58. Paragraph 3 shares the main features of paragraph 2 of Article 9. First, it applies to each State with respect to an adjustment made by the other State. It therefore applies reciprocally whether the initial adjustment has been made by the State where the permanent establishment is situated or by the other State. Also, it does not apply unless there is an adjustment by one of the States.

(Replaced on 22 July 2010; see HISTORY)

59. As is the case for paragraph 2 of Article 9, a corresponding adjustment is not automatically to be made under paragraph 3 simply because the profits attributed to the permanent establishment have been adjusted by one of the Contracting States. The corresponding adjustment is required only if the other State considers that the adjusted profits conform with paragraph 2. In other words, paragraph 3 may not be invoked and should not be applied where the profits attributable to the permanent establishment are adjusted to a level that is different from what they would have been if they had been correctly computed in accordance with the principles of paragraph 2. Regardless of which State makes the initial adjustment, the other State is obliged to make an appropriate corresponding adjustment only if it considers that the

adjusted profits correctly reflect what the profits would have been if the permanent establishment's dealings had been transactions at arm's length. The other State is therefore committed to make such a corresponding adjustment only if it considers that the initial adjustment is justified both in principle and as regards the amount.

(Replaced on 22 July 2010; see HISTORY)

60. Paragraph 3 does not specify the method by which a corresponding adjustment is to be made. Where the initial adjustment is made by the State in which the permanent establishment is situated, the adjustment provided for by paragraph 3 could be granted in the other State through the adjustment of the amount of income that must be exempted under Article 23 A or of the credit that must be granted under Article 23 B. Where the initial adjustment is made by that other State, the adjustment provided for by paragraph 3 could be made by the State in which the permanent establishment is situated by re-opening the assessment of the enterprise of the other State in order to reduce the taxable income by an appropriate amount.

(Replaced on 22 July 2010; see HISTORY)

61. The issue of so-called "secondary adjustments", which is discussed in paragraph 8 of the Commentary on Article 9, does not arise in the case of an adjustment under paragraph 3. As indicated in paragraph 28 above, the determination of the profits attributable to a permanent establishment is only relevant for the purposes of Articles 7 and 23 A and 23 B and does not affect the application of other Articles of the Convention.

(Replaced on 22 July 2010; see HISTORY)

62. Like paragraph 2 of Article 9, paragraph 3 leaves open the question whether there should be a period of time after the expiration of which a State would not be obliged to make an appropriate adjustment to the profits attributable to a permanent establishment following an upward revision of these profits in the other State. Some States consider that the commitment should be open-ended — in other words, that however many years the State making the initial adjustment has gone back, the enterprise should in equity be assured of an appropriate adjustment in the other State. Other States consider that an open-ended commitment of this sort is unreasonable as a matter of practical administration. This problem has not been dealt with in the text of either paragraph 2 of Article 9 or paragraph 3 but Contracting States are left free in bilateral conventions to include, if they wish, provisions dealing with the length of time during which a State should be obliged to make an appropriate adjustment (see on this point paragraphs 39, 40 and 41 of the Commentary on Article 25).

(Replaced on 22 July 2010; see HISTORY)

63. There may be cases where the initial adjustment made by one State will not immediately require a corresponding adjustment to the amount of tax charged on profits in the other State (*e.g.* where the initial adjustment by one State of the profits attributable to the permanent establishment will affect the determination of the amount of a loss attributable to the rest of the enterprise in the other State). The competent authorities may, in accordance with the second sentence of paragraph 3, determine the future impact that the initial adjustment will have on the tax that will be payable in the other State before that tax is actually levied; in fact, in order to avoid the problem described in the preceding paragraph, competent authorities may wish to use the mutual agreement procedure at the earliest opportunity in order to determine to what extent a corresponding adjustment may be required in the other State at a later stage.

(Replaced on 22 July 2010; see HISTORY)

64. If there is a dispute between the parties concerned over the amount and character of the appropriate adjustment, the mutual agreement procedure provided for under Article 25 should be implemented, as is the case for an adjustment under paragraph 2 of Article 9. Indeed, as shown in the example in paragraph 55 above, if one of the two Contracting States adjusts the profits attributable to a permanent establishment without the other State granting a corresponding adjustment to the extent needed to avoid double taxation, the taxpayer will be able to use the mutual agreement procedure of paragraph 1 of Article 25, and if necessary the arbitration provision of paragraph 5 of Article 25, to require the competent authorities to agree that either the initial adjustment by one State or the failure by the other State to make a corresponding adjustment is not in accordance with the provisions of the Convention (the arbitration provision of paragraph 5 of Article 25 will play a critical role in cases where the competent authorities would otherwise be unable to agree as it will ensure that the issues that prevent an agreement are resolved through arbitration).

(Replaced on 22 July 2010; see HISTORY)

65. Paragraph 3 only applies to the extent necessary to eliminate the double taxation of profits that result from the adjustment. Assume, for instance, that the State where the permanent establishment is situated adjusts the profits that the taxpayer attributed to the permanent establishment to reflect the fact that the price of a dealing between the permanent establishment and the rest of the enterprise did not conform with the arm's length principle. Assume that the other State also agrees that the price used by the taxpayer was not at arm's length. In that case, the combined application of paragraph 2 and of Article 23 A or 23 B will require that other State to attribute to the permanent establishment, for the purposes of providing relief of double taxation,

adjusted profits that would reflect an arm's length price. In such a case, paragraph 3 will only be relevant to the extent that States adopt different interpretations of what the correct arm's length price should be.

(Replaced on 22 July 2010; see HISTORY)

66. Paragraph 3 only applies with respect to differences in the determination of the profits attributed to a permanent establishment that result in the same part of the profits being attributed to different parts of the enterprise in conformity with the Article. As already explained (see paragraphs 30 and 31 above), Article 7 does not deal with the computation of taxable income but, instead, with the attribution of profits for the purpose of the allocation of taxing rights between the two Contracting States. The Article therefore only serves to allocate revenues and expenses for the purposes of allocating taxing rights and does not prejudge the issue of which revenues are taxable and which expenses are deductible, which is a matter of domestic law as long as there is conformity with paragraph 2. Where the profits attributed to the permanent establishment are the same in each State, the amount that will be included in the taxable income on which tax will be levied in each State for a given taxable period may be different given differences in domestic law rules, *e.g.* for the recognition of income and the deduction of expenses. Since these different domestic law rules only apply to the profits attributed to each State, they do not, by themselves, result in double taxation for the purposes of paragraph 3.

(Replaced on 22 July 2010; see HISTORY)

67. Also, paragraph 3 does not apply to affect the computation of the exemption or credit under Article 23 A or 23 B except for the purposes of providing what would otherwise be unavailable double taxation relief for the tax paid to the Contracting State in which the permanent establishment is situated on the profits that have been attributed to the permanent establishment in that State. This paragraph will therefore not apply where these profits have been fully exempted by the other State or where the tax paid in the first-mentioned State has been fully credited against the other State's tax under the domestic law of that other State and in accordance with Article 23 A or 23 B.

(Replaced on 22 July 2010; see HISTORY)

68. Some States may prefer that the cases covered by paragraph 3 be resolved through the mutual agreement procedure (a failure to do so triggering the application of the arbitration provision of paragraph 5 of Article 25) if a State does not unilaterally agree to make a corresponding adjustment, without any deference being given to the adjusting State's preferred position as to the arm's length price or method. These States would

therefore prefer a provision that would always give the possibility for a State to negotiate with the adjusting State over the arm's length price or method to be applied. States that share that view may prefer to use the following alternative version of paragraph 3:

> Where, in accordance with paragraph 2, a Contracting State adjusts the profits that are attributable to a permanent establishment of an enterprise of one of the Contracting States and taxes accordingly profits of the enterprise that have been charged to tax in the other State, the other Contracting State shall, to the extent necessary to eliminate double taxation, make an appropriate adjustment if it agrees with the adjustment made by the first-mentioned State; if the other Contracting State does not so agree, the Contracting States shall eliminate any double taxation resulting therefrom by mutual agreement.

(Replaced on 22 July 2010; see HISTORY)

69. This alternative version is intended to ensure that the State being asked to give a corresponding adjustment would always be able to require that to be done through the mutual agreement procedure. This version differs significantly from paragraph 3 in that it does not create a legal obligation on that State to agree to give a corresponding adjustment, even where it considers the adjustment made by the other State to have been made in accordance with paragraph 2. The provision would always give the possibility for a State to negotiate with the other State over what is the most appropriate arm's length price or method. Where the State in question does not unilaterally agree to make the corresponding adjustment, this version of paragraph 3 would ensure that the taxpayer has the right to access the mutual agreement procedure to have the case resolved. Moreover, where the mutual agreement procedure is triggered in such a case, the provision imposes a reciprocal legal obligation on the Contracting States to eliminate the double taxation by mutual agreement even though it does not provide a substantive standard to govern which State has the obligation to compromise its position to achieve that mutual agreement. If the two Contracting States do not reach an agreement to eliminate the double taxation, they will both be in violation of their treaty obligation. The obligation to eliminate such cases of double taxation by mutual agreement is therefore stronger than the standard of paragraph 2 of Article 25, which merely requires the competent authorities to "endeavour" to resolve a case by mutual agreement.

(Replaced on 22 July 2010; see HISTORY)

70. If Contracting States agree bilaterally to replace paragraph 3 by the alternative above, the comments made in paragraphs 66 and 67 as regards paragraph 3 will also apply with respect to that provision.

(Replaced on 22 July 2010; see HISTORY)

Paragraph 4

71. Although it has not been found necessary in the Convention to define the term "profits", it should nevertheless be understood that the term when used in this Article and elsewhere in the Convention has a broad meaning including all income derived in carrying on an enterprise. Such a broad meaning corresponds to the use of the term made in the tax laws of most OECD member countries.

(Renumbered on 22 July 2010; see HISTORY)

72. Absent paragraph 4, this interpretation of the term "profits" could have given rise to some uncertainty as to the application of the Convention. If the profits of an enterprise include categories of income which are dealt with separately in other Articles of the Convention, *e.g.* dividends, the question would have arisen as to which Article should apply to these categories of income, *e.g.* in the case of dividends, this Article or Article 10.

(Added on 22 July 2010; see HISTORY)

73. To the extent that the application of this Article and of the relevant other Article would result in the same tax treatment, there is little practical significance to this question. Also, other Articles of the Convention deal specifically with this question with respect to some types of income (e.g. paragraph 4 of Article 6, paragraph 4 of Articles 10 and 11, paragraph 3 of Article 12, paragraphs 1 and 2 of Article 17 and paragraph 2 of Article 21).

(Renumbered and amended on 22 July 2010; see HISTORY)

74. The question, however, could arise with respect to other types of income and it has therefore been decided to include a rule of interpretation that ensures that Articles applicable to specific categories of income will have priority over Article 7. It follows from this rule that Article 7 will be applicable to business profits which do not belong to categories of income covered by these other Articles, and, in addition, to income which under paragraph 4 of Articles 10 and 11, paragraph 3 of Article 12 and paragraph 2 of Article 21, fall within Article 7. This rule does not, however, govern the manner in which the income will be classified for the purposes of domestic law; thus, if a Contracting State may tax an item of income pursuant to other Articles of this Convention, that State may, for its own domestic tax purposes, characterise such income as it wishes (*i.e.* as business profits or as a specific category of income) provided that the tax treatment of that item of income is in

accordance with the provisions of the Convention. It should also be noted that where an enterprise of a Contracting State derives income from immovable property through a permanent establishment situated in the other State, that other State may not tax that income if it is derived from immovable property situated in the first-mentioned State or in a third State (see paragraph 4 of the Commentary on Article 21 and paragraphs 9 and 10 of the Commentary on Articles 23 A and 23 B).

(Renumbered and amended on 22 July 2010; see HISTORY)

75. It is open to Contracting States to agree bilaterally upon special explanations or definitions concerning the term "profits" with a view to clarifying the distinction between this term and *e.g.* the concept of dividends. It may in particular be found appropriate to do so where in a convention under negotiation a deviation has been made from the definitions in the Articles on dividends, interest and royalties.

(Renumbered and amended on 22 July 2010; see HISTORY)

76. Finally, it should be noted that two categories of profits that were previously covered by other Articles of the Convention are now covered by Article 7. First, whilst the definition of "royalties" in paragraph 2 of Article 12 of the 1963 Draft Convention and 1977 Model Convention included payments "for the use of, or the right to use, industrial, commercial, or scientific equipment", the reference to these payments was subsequently deleted from that definition in order to ensure that income from the leasing of industrial, commercial or scientific equipment, including the income from the leasing of containers, falls under the provisions of Article 7 or Article 8 (see paragraph 9 of the Commentary on that Article), as the case may be, rather than under those of Article 12, a result that the Committee on Fiscal Affairs considers appropriate given the nature of such income.

(Renumbered and amended on 22 July 2010; see HISTORY)

77. Second, before 2000, income from professional services and other activities of an independent character was dealt with under a separate Article, *i.e.* Article 14. The provisions of that Article were similar to those applicable to business profits but Article 14 used the concept of fixed base rather than that of permanent establishment since it had originally been thought that the latter concept should be reserved to commercial and industrial activities. However, it was not always clear which activities fell within Article 14 as opposed to Article 7. The elimination of Article 14 in 2000 reflected the fact that there were no intended differences between the concepts of permanent establishment, as used in Article 7, and fixed base, as used in Article 14, or between how profits were computed and tax was calculated according to which of Article 7 or 14 applied. The effect of the deletion of Article 14 is that

income derived from professional services or other activities of an independent character is now dealt with under Article 7 as business profits. This was confirmed by the addition, in Article 3, of a definition of the term "business" which expressly provides that this term includes professional services or other activities of an independent character.

(Renumbered and amended on 22 July 2010; see HISTORY)

Observations on the Commentary

78. *Italy* and *Portugal* deem as essential to take into consideration that — irrespective of the meaning given to the fourth sentence of paragraph 77 — as far as the method for computing taxes is concerned, national systems are not affected by the new wording of the model, *i.e.* by the elimination of Article 14.

(Renumbered on 17 July 2008; see HISTORY)

79. *Belgium* cannot share the views expressed in paragraph 14 of the Commentary. Belgium considers that the application of controlled foreign companies legislation is contrary to the provisions of paragraph 1 of Article 7. This is especially the case where a Contracting State taxes one of its residents on income derived by a foreign entity by using a fiction attributing to that resident, in proportion to his participation in the capital of the foreign entity, the income derived by that entity. By doing so, that State increases the tax base of its resident by including in it income which has not been derived by that resident but by a foreign entity which is not taxable in that State in accordance with paragraph 1 of Article 7. That Contracting State thus disregards the legal personality of the foreign entity and acts contrary to paragraph 1 of Article 7.

(Renumbered and amended on 22 July 2010; see HISTORY)

80. *Luxembourg* does not share the interpretation in paragraph 14 which provides that paragraph 1 of Article 7 does not restrict a Contracting State's right to tax its own residents under controlled foreign companies provisions found in its domestic law as this interpretation challenges the fundamental principle contained in paragraph 1 of Article 7.

(Renumbered and amended on 22 July 2010; see HISTORY)

81. With reference to paragraph 14, *Ireland* notes its general observation in paragraph 27.5 of the Commentary on Article 1.

(Renumbered and amended on 22 July 2010; see HISTORY)

82. *Sweden* wishes to clarify that it does not consider that the different approaches for attributing "free" capital that are included in the Report *Attribution of Profits to Permanent Establishments* will necessarily lead to a result in accordance with the arm's length principle. Consequently, Sweden would,

when looking at the facts and circumstances of each case, in many cases not consider that the amount of interest deduction resulting from the application of these approaches conforms to the arm's length principle. When the different views on attributing "free" capital will lead to double taxation, the mutual agreement procedure provided for in Article 25 will have to be used.

(Replaced on 22 July 2010; see HISTORY)

83. With reference to paragraphs 27 and 65, the *United States* wishes to clarify how it will relieve double taxation arising due to the application of paragraph 2 of Article 7. Where a taxpayer can demonstrate to the competent authority of the United States that such double taxation has been left unrelieved after the application of mechanisms under the United States' domestic law such as the utilisation of foreign tax credit limitation created by other transactions, the United States will relieve such additional double taxation.

(Replaced on 22 July 2010; see HISTORY)

84. *Turkey* does not share the views expressed in paragraph 28 of the Commentary on Article 7.

(Added on 22 July 2010; see HISTORY)

Reservations on the Article

85. *Australia* reserves the right to include a provision that will permit its domestic law to apply in relation to the taxation of profits from any form of insurance.

(Renumbered and amended on 22 July 2010; see HISTORY)

86. *Australia* reserves the right to include a provision clarifying its right to tax a share of business profits to which a resident of the other Contracting State is beneficially entitled where those profits are derived by a trustee of a trust estate (other than certain unit trusts that are treated as companies for Australian tax purposes) from the carrying on of a business in Australia through a permanent establishment.

(Renumbered and amended on 22 July 2010; see HISTORY)

87. *Korea* and *Portugal* reserve the right to tax persons performing professional services or other activities of an independent character if they are present on their territory for a period or periods exceeding in the aggregate 183 days in any twelve month period, even if they do not have a permanent establishment (or a fixed base) available to them for the purpose of performing such services or activities.

(Renumbered on 22 July 2010; see HISTORY)

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

88. *Italy* and *Portugal* reserve the right to tax persons performing independent personal services under a separate article which corresponds to Article 14 as it stood before its elimination in 2000.

(Renumbered on 22 July 2010; see HISTORY)

89. The *United States* reserves the right to amend Article 7 to provide that, in applying paragraphs 1 and 2 of the Article, any income or gain attributable to a permanent establishment during its existence may be taxable by the Contracting State in which the permanent establishment exists even if the payments are deferred until after the permanent establishment has ceased to exist. The United States also wishes to note that it reserves the right to apply such a rule, as well, under Articles 11, 12, 13 and 21.

(Renumbered on 22 July 2010; see HISTORY)

90. *Turkey* reserves the right to subject income from the leasing of containers to a withholding tax at source in all cases. In case of the application of Articles 5 and 7 to such income, Turkey would like to apply the permanent establishment rule to the simple depot, depot-agency and operational branch cases.

(Renumbered on 22 July 2010; see HISTORY)

91. *Norway* and the *United States* reserve the right to treat income from the use, maintenance or rental of containers used in international traffic under Article 8 in the same manner as income from shipping and air transport.

(Renumbered on 22 July 2010; see HISTORY)

92. *Australia* and *Portugal* reserve the right to propose in bilateral negotiations a provision to the effect that, if the information available to the competent authority of a Contracting State is inadequate to determine the profits to be attributed to the permanent establishment of an enterprise, the competent authority may apply to that enterprise for that purpose the provisions of the taxation law of that State, subject to the qualification that such law will be applied, so far as the information available to the competent authority permits, in accordance with the principles of this Article.

(Renumbered on 22 July 2010; see HISTORY)

93. *Mexico* reserves the right to tax in the State where the permanent establishment is situated business profits derived from the sale of goods or merchandise carried out directly by its home office situated in the other Contracting State, provided that those goods and merchandise are of the same or similar kind as the ones sold through that permanent establishment. The Government of Mexico will apply this rule only as a safeguard against abuse and not as a general "force of attraction" principle; thus, the rule will not apply

when the enterprise proves that the sales have been carried out for reasons other than obtaining a benefit under the Convention.

(Renumbered on 22 July 2010; see HISTORY)

94. The *Czech Republic* reserves the right to add to paragraph 3 a provision limiting the potential corresponding adjustments to *bona fide* cases.

(Added on 22 July 2010; see HISTORY)

95. *New Zealand* reserves the right to use the previous version of Article 7 taking into account its observation and reservations on that version (*i.e.* the version included in the Model Tax Convention immediately before the 2010 update of the Model Tax Convention) because it does not agree with the approach reflected in Part I of the 2010 Report *Attribution of Profits to Permanent Establishments*. It does not, therefore, endorse the changes to the Commentary on the Article made through that update.

(Added on 22 July 2010; see HISTORY)

96. *Chile*, *Greece*, *Mexico* and *Turkey* reserve the right to use the previous version of Article 7, *i.e.* the version that was included in the Model Tax Convention immediately before the 2010 update of the Model Tax Convention. They do not, therefore, endorse the changes to the Commentary on the Article made through that update.

(Added on 22 July 2010; see HISTORY)

97. *Portugal* reserves its right to continue to adopt in its conventions the text of the Article as it read before 2010 until its domestic law is adapted in order to apply the new approach.

(Added on 22 July 2010; see HISTORY)

98. *Slovenia* reserves the right to specify that a potential adjustment will be made under paragraph 3 only if it is considered justified.

(Added on 22 July 2010; see HISTORY)

ANNEX

PREVIOUS VERSION OF ARTICLE 7 AND ITS COMMENTARY

The following is the text of Article 7 and its Commentary as they read before 22 July 2010. That previous version of the Article and Commentary is provided below for historical reference as it will continue to be relevant for the application and interpretation of bilateral tax conventions concluded before that date.

ARTICLE 7
BUSINESS PROFITS

1. The profits of an enterprise of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein. If the enterprise carries on business as aforesaid, the profits of the enterprise may be taxed in the other State but only so much of them as is attributable to that permanent establishment.

2. Subject to the provisions of paragraph 3, where an enterprise of a Contracting State carries on business in the other Contracting State through a permanent establishment situated therein, there shall in each Contracting State be attributed to that permanent establishment the profits which it might be expected to make if it were a distinct and separate enterprise engaged in the same or similar activities under the same or similar conditions and dealing wholly independently with the enterprise of which it is a permanent establishment.

3. In determining the profits of a permanent establishment, there shall be allowed as deductions expenses which are incurred for the purposes of the permanent establishment, including executive and general administrative expenses so incurred, whether in the State in which the permanent establishment is situated or elsewhere.

4. Insofar as it has been customary in a Contracting State to determine the profits to be attributed to a permanent establishment on the basis of an apportionment of the total profits of the enterprise to its various parts, nothing in paragraph 2 shall preclude that Contracting State from determining the profits to be taxed by such an apportionment as may be customary; the method of apportionment adopted shall, however, be such that the result shall be in accordance with the principles contained in this Article.

5. No profits shall be attributed to a permanent establishment by reason of the mere purchase by that permanent establishment of goods or merchandise for the enterprise.

6. For the purposes of the preceding paragraphs, the profits to be attributed to the permanent establishment shall be determined by the same method year by year unless there is good and sufficient reason to the contrary.

7. Where profits include items of income which are dealt with separately in other Articles of this Convention, then the provisions of those Articles shall not be affected by the provisions of this Article.

COMMENTARY ON ARTICLE 7 CONCERNING THE TAXATION OF BUSINESS PROFITS

I. Preliminary remarks

1. This Article is in many respects a continuation of, and a corollary to, Article 5 on the definition of the concept of permanent establishment. The permanent establishment criterion is commonly used in international double taxation conventions to determine whether a particular kind of income shall or shall not be taxed in the country from which it originates but the criterion does not of itself provide a complete solution to the problem of the double taxation of business profits; in order to prevent such double taxation it is necessary to supplement the definition of permanent establishment by adding to it an agreed set of rules by reference to which the profits attributable to the permanent establishment are to be calculated. To put the matter in a slightly different way, when an enterprise of a Contracting State carries on business in the other Contracting State the authorities of that second State have to ask themselves two questions before they levy tax on the profits of the enterprise: the first question is whether the enterprise has a permanent establishment in their country; if the answer is in the affirmative the second question is what, if any, are the profits on which that permanent establishment should pay tax. It is with the rules to be used in determining the answer to this second question that Article 7 is concerned. Rules for ascertaining the profits of an enterprise of a Contracting State which is trading with an enterprise of the other Contracting State when both enterprises are associated are dealt with in Article 9.

2. Articles 7 and 9 are not particularly detailed and were not strikingly novel when they were adopted by the OECD. The question of what criteria should be used in attributing profits to a permanent establishment, and of how to allocate profits from transactions between associated enterprises, has had to be dealt with in a large number of double taxation conventions and in various models developed by the League of Nations before the OECD first dealt with it and the solutions adopted have generally conformed to a standard pattern.

3. It is generally recognised that the essential principles on which this standard pattern is based are well founded, and, when the OECD first examined that question, it was thought sufficient to restate them with some slight amendments and modifications primarily aimed at producing greater clarity. The two Articles incorporate a number of directives. They do not, nor in the nature of things could they be expected to, lay down a series of precise rules for dealing with every kind of problem that may arise when an enterprise of one State makes profits in another. Modern commerce organises itself in an infinite variety of ways, and it would be quite impossible within the fairly narrow limits of an Article in a double taxation convention to specify an exhaustive set of rules for dealing with every kind of problem that may arise.

4. It must be acknowledged, however, that there has been considerable variation in the interpretation of the general directives of Article 7 and of the provisions of earlier conventions and models on which the wording of the Article is based. This lack of a common interpretation of Article 7 can lead to problems of

double taxation and non-taxation. For that reason, it is important for tax authorities to agree on mutually consistent methods of dealing with these problems, using, where appropriate, the mutual agreement procedure provided for in Article 25.

5. Over the years, the Committee on Fiscal Affairs has therefore spent considerable time and effort trying to ensure a more consistent interpretation and application of the rules of the Article. Minor changes to the wording of the Article and a number of changes to the Commentary were made when the 1977 Model Tax Convention was adopted. A report that addressed that question in the specific case of banks was published in 1984.[1] In 1987, noting that the determination of profits attributable to a permanent establishment could give rise to some uncertainty, the Committee undertook a review of the question which led to the adoption, in 1993, of the report entitled "Attribution of Income to Permanent Establishments"[2] and to subsequent changes to the Commentary.

6. Despite that work, the practices of OECD and non-OECD countries regarding the attribution of profits to permanent establishments and these countries' interpretation of Article 7 continued to vary considerably. The Committee acknowledged the need to provide more certainty to taxpayers: in its report *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*, adopted in 1995, it indicated that further work would address the application of the arm's length principle to permanent establishments. That work resulted, in 2008, in a report entitled *Attribution of Profits to Permanent Establishments*. The approach developed in that report was not constrained by either the original intent or by the historical practice and interpretation of Article 7. Instead, the focus has been on formulating the most preferable approach to attributing profits to a permanent establishment under Article 7 given modern-day multinational operations and trade.

7. The approach put forward in that Report deals with the attribution of profits both to permanent establishments in general (Part I of the Report) and, in particular, to permanent establishments of businesses operating in the financial sector, where trading through a permanent establishment is widespread (Part II of the Report, which deals with permanent establishments of banks, Part III, which deals with permanent establishments of enterprises carrying on global trading and Part IV, which deals with permanent establishments of enterprises carrying on insurance activities). The Committee considers that the guidance included in the Report represents a better approach to attributing profits to permanent establishments than has previously been available. It does recognise, however, that there are differences between some of the conclusions of the Report and the interpretation of the Article previously given in this Commentary. For that reason, this Commentary has been amended to incorporate a number of conclusions of the Report that did not conflict with the previous version of this Commentary, which prescribed specific approaches in some areas and left considerable leeway in others. The Report therefore represents internationally agreed principles and, to the extent that it does not conflict with this Commentary, provides guidelines for the application of the arm's length principle incorporated in the Article.

1 "The Taxation of Multinational Banking Enterprises", in *Transfer Pricing and Multinational Enterprises Three Taxation Issues*, OECD, Paris, 1984.
2 Reproduced in Volume II at page R(13)-1.

8. Before 2000, income from professional services and other activities of an independent character was dealt with under a separate Article, *i.e*. Article 14. The provisions of that Article were similar to those applicable to business profits but it used the concept of fixed base rather than that of permanent establishment since it had originally been thought that the latter concept should be reserved to commercial and industrial activities. However, it was not always clear which activities fell within Article 14 as opposed to Article 7. The elimination of Article 14 in 2000 reflected the fact that there were no intended differences between the concepts of permanent establishment, as used in Article 7, and fixed base, as used in Article 14, or between how profits were computed and tax was calculated according to which of Article 7 or 14 applied. The effect of the deletion of Article 14 is that income derived from professional services or other activities of an independent character is now dealt with under Article 7 as business profits. This was confirmed by the addition of a definition of the term "business" which expressly provides that this term includes professional services or other activities of an independent character.

II. Commentary on the provisions of the Article

Paragraph 1

9. This paragraph is concerned with two questions. First, it restates the generally accepted principle of double taxation conventions that an enterprise of one State shall not be taxed in the other State unless it carries on business in that other State through a permanent establishment situated therein. It is hardly necessary to argue here the merits of this principle. It is perhaps sufficient to say that it has come to be accepted in international fiscal matters that until an enterprise of one State sets up a permanent establishment in another State it should not properly be regarded as participating in the economic life of that other State to such an extent that it comes within the jurisdiction of that other State's taxing rights.

10. The second principle, which is reflected in the second sentence of the paragraph, is that the right to tax of the State where the permanent establishment is situated does not extend to profits that the enterprise may derive from that State but that are not attributable to the permanent establishment. This is a question on which there have historically been differences of view, a few countries having some time ago pursued a principle of general "force of attraction" according to which income such as other business profits, dividends, interest and royalties arising from sources in their territory was fully taxable by them if the beneficiary had a permanent establishment therein even though such income was clearly not attributable to that permanent establishment. Whilst some bilateral tax conventions include a limited anti-avoidance rule based on a restricted force of attraction approach that only applies to business profits derived from activities similar to those carried on by a permanent establishment, the general force of attraction approach described above has now been rejected in international tax treaty practice. The principle that is now generally accepted in double taxation conventions is based on the view that in taxing the profits that a foreign enterprise derives from a particular country, the tax authorities of that country should look at the separate sources of profit that the enterprise derives from their country and should apply to each the permanent establishment test, subject to the possible application of other Articles of the Convention. This solution allows simpler and

more efficient tax administration and compliance, and is more closely adapted to the way in which business is commonly carried on. The organisation of modern business is highly complex. There are a considerable number of companies each of which is engaged in a wide diversity of activities and is carrying on business extensively in many countries. A company may set up a permanent establishment in another country through which it carries on manufacturing activities whilst a different part of the same company sells different goods or manufactures in that other country through independent agents. That company may have perfectly valid commercial reasons for doing so: these may be based, for example, on the historical pattern of its business or on commercial convenience. If the country in which the permanent establishment is situated wished to go so far as to try to determine, and tax, the profit element of each of the transactions carried on through independent agents, with a view to aggregating that profit with the profits of the permanent establishment, that approach would interfere seriously with ordinary commercial activities and would be contrary to the aims of the Convention.

11. When referring to the part of the profits of an enterprise that is attributable to a permanent establishment, the second sentence of paragraph 1 refers directly to paragraph 2, which provides the directive for determining what profits should be attributed to a permanent establishment. As paragraph 2 is part of the context in which the sentence must be read, that sentence should not be interpreted in a way that could contradict paragraph 2, *e.g.* by interpreting it as restricting the amount of profits that can be attributed to a permanent establishment to the amount of profits of the enterprise as a whole. Thus, whilst paragraph 1 provides that a Contracting State may only tax the profits of an enterprise of the other Contracting State to the extent that they are attributable to a permanent establishment situated in the first State, it is paragraph 2 that determines the meaning of the phrase "profits attributable to a permanent establishment". In other words, the directive of paragraph 2 may result in profits being attributed to a permanent establishment even though the enterprise as a whole has never made profits; conversely, that directive may result in no profits being attributed to a permanent establishment even though the enterprise as a whole has made profits.

12. Clearly, however, the Contracting State of the enterprise has an interest in the directive of paragraph 2 being correctly applied by the State where the permanent establishment is located. Since that directive applies to both Contracting States, the State of the enterprise must, in accordance with Article 23, eliminate double taxation on the profits properly attributable to the permanent establishment. In other words, if the State where the permanent establishment is located attempts to tax profits that are not attributable to the permanent establishment under Article 7, this may result in double taxation of profits that should properly be taxed only in the State of the enterprise.

13. The purpose of paragraph 1 is to provide limits to the right of one Contracting State to tax the business profits of enterprises of the other Contracting State. The paragraph does not limit the right of a Contracting State to tax its own residents under controlled foreign companies provisions found in its domestic law even though such tax imposed on these residents may be computed by reference to the part of the profits of an enterprise that is resident of the other Contracting State that is attributable to these residents' participation in that enterprise. Tax so levied by a State on its own residents does not reduce the profits of the enterprise

of the other State and may not, therefore, be said to have been levied on such profits (see also paragraph 23 of the Commentary on Article 1 and paragraphs 37 to 39 of the Commentary on Article 10).

Paragraph 2

14. This paragraph contains the central directive on which the attribution of profits to a permanent establishment is intended to be based. The paragraph incorporates the view that the profits to be attributed to a permanent establishment are those which that permanent establishment would have made if, instead of dealing with the rest of the enterprise, it had been dealing with an entirely separate enterprise under conditions and at prices prevailing in the ordinary market. This corresponds to the "arm's length principle" discussed in the Commentary on Article 9. Normally, the profits so determined would be the same profits that one would expect to be determined by the ordinary processes of good business accountancy.

15. The paragraph requires that this principle be applied in each Contracting State. Clearly, this does not mean that the amount on which the enterprise will be taxed in the source State will, for a given period of time, be exactly the same as the amount of income with respect to which the other State will have to provide relief pursuant to Articles 23 A or 23 B. Variations between the domestic laws of the two States concerning matters such as depreciation rates, the timing of the recognition of income and restrictions on the deductibility of certain expenses that are in accordance with paragraph 3 of this Article will normally result in a different amount of taxable income in each State.

16. In the great majority of cases, trading accounts of the permanent establishment — which are commonly available if only because a well-run business organisation is normally concerned to know what is the profitability of its various branches — will be used to ascertain the profit properly attributable to that establishment. Exceptionally there may be no separate accounts (cf. paragraphs 51 to 55 below). But where there are such accounts they will naturally form the starting point for any processes of adjustment in case adjustment is required to produce the amount of profits that are properly attributable to the permanent establishment under the directive contained in paragraph 2. It should perhaps be emphasised that this directive is no justification to construct hypothetical profit figures *in vacuo*; it is always necessary to start with the real facts of the situation as they appear from the business records of the permanent establishment and to adjust as may be shown to be necessary the profit figures which those facts produce. As noted in paragraph 19 below and as explained in paragraph 39 of Part I of the Report *Attribution of Profits to Permanent Establishments*, however, records and documentation must satisfy certain requirements in order to be considered to reflect the real facts of the situation.

17. In order to determine whether such an adjustment is required by paragraph 2, it will be necessary to determine the profits that would have been realised if the permanent establishment had been a separate and distinct enterprise engaged in the same or similar activities under the same or similar conditions and dealing wholly independently with the rest of the enterprise. Sections D-2 and D-3 of Part I of the Report *Attribution of Profits to Permanent Establishments* describe the two-step approach through which this should be done. This approach will allow the calculation of the profits attributable to all the

activities carried on through the permanent establishment, including transactions with other independent enterprises, transactions with associated enterprises and dealings (*e.g.* the internal transfer of capital or property or the internal provision of services — see for instance paragraphs 31 and 32) with other parts of the enterprise (under the second step referred to above), in accordance with the directive of paragraph 2.

18. The first step of that approach requires the identification of the activities carried on through the permanent establishment. This should be done through a functional and factual analysis (the guidance found in the *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*[1] will be relevant for that purpose). Under that first step, the economically significant activities and responsibilities undertaken through the permanent establishment will be identified. This analysis should, to the extent relevant, consider the activities and responsibilities undertaken through the permanent establishment in the context of the activities and responsibilities undertaken by the enterprise as a whole, particularly those parts of the enterprise that engage in dealings with the permanent establishment. Under the second step of that approach, the remuneration of any such dealings will be determined by applying by analogy the principles developed for the application of the arm's length principle between associated enterprises (these principles are articulated in the *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*) by reference to the functions performed, assets used and risk assumed by the enterprise through the permanent establishment and through the rest of the enterprise.

19. A question that may arise is to what extent accounting records should be relied upon when they are based on agreements between the head office and its permanent establishments (or between the permanent establishments themselves). Clearly, such internal agreements cannot qualify as legally binding contracts. However, to the extent that the trading accounts of the head office and the permanent establishments are both prepared symmetrically on the basis of such agreements and that those agreements reflect the functions performed by the different parts of the enterprise, these trading accounts could be accepted by tax authorities. Accounts should not be regarded as prepared symmetrically, however, unless the values of transactions or the methods of attributing profits or expenses in the books of the permanent establishment corresponded exactly to the values or methods of attribution in the books of the head office in terms of the national currency or functional currency in which the enterprise recorded its transactions. Also, as explained in paragraph 16, records and documentation must satisfy certain requirements in order to be considered to reflect the real facts of the situation. For example, where trading accounts are based on internal agreements that reflect purely artificial arrangements instead of the real economic functions of the different parts of the enterprise, these agreements should simply be ignored and the accounts corrected accordingly. One such case would be where a permanent establishment involved in sales were, under such an internal agreement, given the role of principal (accepting all the risks and entitled to all the profits from the sales) when in fact the permanent establishment concerned was

1 The original version of that report was approved by the Council of the OECD on 27 June 1995. Published in a loose-leaf format as *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*, OECD, Paris, 1995.

nothing more than an intermediary or agent (incurring limited risks and entitled to receive only a limited share of the resulting income) or, conversely, were given the role of intermediary or agent when in reality it was a principal.

20. It may therefore be concluded that accounting records and contemporaneous documentation that meet the above-mentioned requirements constitute a useful starting point for the purposes of attributing profits to a permanent establishment. Taxpayers are encouraged to prepare such documentation, as it may reduce substantially the potential for controversies. Section D-2 *(vi)b)* of Part I of the Report *Attribution of Profits to Permanent Establishments* discusses the conditions under which tax administrations would give effect to such documentation.

21. There may be a realisation of a taxable profit when an asset, whether or not trading stock, forming part of the business property of a permanent establishment situated within a State's territory is transferred to a permanent establishment or the head office of the same enterprise situated in another State. Article 7 allows the former State to tax profits deemed to arise in connection with such a transfer. Such profits may be determined as indicated below. In cases where such transfer takes place, whether or not it is a permanent one, the question arises as to when taxable profits are realised. In practice, where such property has a substantial market value and is likely to appear on the balance sheet of the importing permanent establishment or other part of the enterprise after the taxation year during that in which the transfer occurred, the realisation of the taxable profits will not, so far as the enterprise as a whole is concerned, necessarily take place in the taxation year of the transfer under consideration. However, the mere fact that the property leaves the purview of a tax jurisdiction may trigger the taxation of the accrued gains attributable to that property as the concept of realisation depends on each country's domestic law.

22. Where the countries in which the permanent establishments operate levy tax on the profits accruing from an internal transfer as soon as it is made, even when these profits are not actually realised until a subsequent commercial year, there will be inevitably a time lag between the moment when tax is paid abroad and the moment it can be taken into account in the country where the enterprise's head office is located. A serious problem is inherent in the time lag, especially when a permanent establishment transfers fixed assets or — in the event that it is wound up — its entire operating equipment stock, to some other part of the enterprise of which it forms part. In such cases, it is up to the head office country to seek, on a case by case basis, a bilateral solution with the outward country where there is serious risk of overtaxation.

23. Paragraph 3 of Article 5 sets forth a special rule for a fixed place of business that is a building site or a construction or installation project. Such a fixed place of business is a permanent establishment only if it lasts more than twelve months. Experience has shown that these types of permanent establishments can give rise to special problems in attributing income to them under Article 7.

24. These problems arise chiefly where goods are provided, or services performed, by the other parts of the enterprise or a related party in connection with the building site or construction or installation project. Whilst these problems can arise with any permanent establishment, they are particularly acute for building sites and construction or installation projects. In these circumstances, it is

necessary to pay close attention to the general principle that income is attributable to a permanent establishment only when it results from activities carried on by the enterprise through that permanent establishment.

25. For example, where such goods are supplied by the other parts of the enterprise, the profits arising from that supply do not result from the activities carried on through the permanent establishment and are not attributable to it. Similarly, profits resulting from the provision of services (such as planning, designing, drawing blueprints, or rendering technical advice) by the parts of the enterprise operating outside the State where the permanent establishment is located do not result from the activities carried on through the permanent establishment and are not attributable to it.

26. Where, under paragraph 5 of Article 5, a permanent establishment of an enterprise of a Contracting State is deemed to exist in the other Contracting State by reason of the activities of a so-called dependent agent (see paragraph 32 of the Commentary on Article 5), the same principles used to attribute profits to other types of permanent establishment will apply to attribute profits to that deemed permanent establishment. As a first step, the activities that the dependent agent undertakes for the enterprise will be identified through a functional and factual analysis that will determine the functions undertaken by the dependent agent both on its own account and on behalf of the enterprise. The dependent agent and the enterprise on behalf of which it is acting constitute two separate potential taxpayers. On the one hand, the dependent agent will derive its own income or profits from the activities that it performs on its own account for the enterprise; if the agent is itself a resident of either Contracting State, the provisions of the Convention (including Article 9 if that agent is an enterprise associated to the enterprise on behalf of which it is acting) will be relevant to the taxation of such income or profits. On the other hand, the deemed permanent establishment of the enterprise will be attributed the assets and risks of the enterprise relating to the functions performed by the dependent agent on behalf of that enterprise (*i.e.* the activities that the dependent agent undertakes for that enterprise), together with sufficient capital to support those assets and risks. Profits will then be attributed to the deemed permanent establishment on the basis of those assets, risks and capital; these profits will be separate from, and will not include, the income or profits that are properly attributable to the dependent agent itself (see section D-5 of Part I of the Report *Attribution of Profits to Permanent Establishments*).

Paragraph 3

27. This paragraph clarifies, in relation to the expenses of a permanent establishment, the general directive laid down in paragraph 2. The paragraph specifically recognises that in calculating the profits of a permanent establishment allowance is to be made for expenses, wherever incurred, that were incurred for the purposes of the permanent establishment. Clearly in some cases it will be necessary to estimate or to calculate by conventional means the amount of expenses to be taken into account. In the case, for example, of general administrative expenses incurred at the head office of the enterprise, it may be appropriate to take into account a proportionate part based on the ratio that the permanent establishment's turnover (or perhaps gross profits) bears to that of the enterprise as a whole. Subject to this, it is considered that the amount of expenses to be taken into account as incurred for the purposes of the permanent

establishment should be the actual amount so incurred. The deduction allowable to the permanent establishment for any of the expenses of the enterprise attributed to it does not depend upon the actual reimbursement of such expenses by the permanent establishment.

28. It has sometimes been suggested that the need to reconcile paragraphs 2 and 3 created practical difficulties as paragraph 2 required that prices between the permanent establishment and the head office be normally charged on an arm's length basis, giving to the transferring entity the type of profit which it might have been expected to make were it dealing with an independent enterprise, whilst the wording of paragraph 3 suggested that the deduction for expenses incurred for the purposes of permanent establishments should be the actual cost of those expenses, normally without adding any profit element.

29. In fact, whilst the application of paragraph 3 may raise some practical difficulties, especially in relation to the separate enterprise and arm's length principles underlying paragraph 2, there is no difference of principle between the two paragraphs. Paragraph 3 indicates that in determining the profits of a permanent establishment, certain expenses must be allowed as deductions whilst paragraph 2 provides that the profits determined in accordance with the rule contained in paragraph 3 relating to the deduction of expenses must be those that a separate and distinct enterprise engaged in the same or similar activities under the same or similar conditions would have made. Thus, whilst paragraph 3 provides a rule applicable for the determination of the profits of the permanent establishment, paragraph 2 requires that the profits so determined correspond to the profits that a separate and independent enterprise would have made.

30. Also, paragraph 3 only determines which expenses should be attributed to the permanent establishment for purposes of determining the profits attributable to that permanent establishment. It does not deal with the issue of whether those expenses, once attributed, are deductible when computing the taxable income of the permanent establishment since the conditions for the deductibility of expenses are a matter to be determined by domestic law, subject to the rules of Article 24 on Non-discrimination (in particular, paragraphs 3 and 4 of that Article).

31. In applying these principles to the practical determination of the profits of a permanent establishment, the question may arise as to whether a particular cost incurred by an enterprise can truly be considered as an expense incurred for the purposes of the permanent establishment, keeping in mind the separate and independent enterprise principles of paragraph 2. Whilst in general independent enterprises in their dealings with each other will seek to realise a profit and, when transferring property or providing services to each other, will charge such prices as the open market would bear, nevertheless, there are also circumstances where it cannot be considered that a particular property or service would have been obtainable from an independent enterprise or when independent enterprises may agree to share between them the costs of some activity which is pursued in common for their mutual benefit. In these particular circumstances, it may be appropriate to treat any relevant costs incurred by the enterprise as an expense incurred for the permanent establishment. The difficulty arises in making a distinction between these circumstances and the cases where a cost incurred by an enterprise should not be considered as an expense of the permanent establishment and the relevant property or service should be considered, on the

basis of the separate and independent enterprises principle, to have been transferred between the head office and the permanent establishment at a price including an element of profit. The question must be whether the internal transfer of property and services, be it temporary or final, is of the same kind as those which the enterprise, in the normal course of its business, would have charged to a third party at an arm's length price, *i.e.* by normally including in the sale price an appropriate profit.

32. On the one hand, the answer to that question will be in the affirmative if the expense is initially incurred in performing a function the direct purpose of which is to make sales of a specific good or service and to realise a profit through a permanent establishment. On the other hand, the answer will be in the negative if, on the basis of the facts and circumstances of the specific case, it appears that the expense is initially incurred in performing a function the essential purpose of which is to rationalise the overall costs of the enterprise or to increase in a general way its sales.[1]

33. Where goods are supplied for resale whether in a finished state or as raw materials or semi-finished goods, it will normally be appropriate for the provisions of paragraph 2 to apply and for the supplying part of the enterprise to be allocated a profit, measured by reference to arm's length principles. But there may be exceptions even here. One example might be where goods are not supplied for resale but for temporary use in the trade so that it may be appropriate for the parts of the enterprise which share the use of the material to bear only their share of the cost of such material *e.g.* in the case of machinery, the depreciation costs that relate to its use by each of these parts. It should of course be remembered that the mere purchase of goods does not constitute a permanent establishment (subparagraph 4 *d*) of Article 5) so that no question of attribution of profit arises in such circumstances.

34. In the case of intangible rights, the rules concerning the relations between enterprises of the same group (*e.g.* payment of royalties or cost sharing arrangements) cannot be applied in respect of the relations between parts of the same enterprise. Indeed, it may be extremely difficult to allocate "ownership" of the intangible right solely to one part of the enterprise and to argue that this part of the enterprise should receive royalties from the other parts as if it were an independent enterprise. Since there is only one legal entity it is not possible to allocate legal ownership to any particular part of the enterprise and in practical terms it will often be difficult to allocate the costs of creation exclusively to one part of the enterprise. It may therefore be preferable for the costs of creation of intangible rights to be regarded as attributable to all parts of the enterprise which will make use of them and as incurred on behalf of the various parts of the enterprise to which they are relevant accordingly. In such circumstances it would be appropriate to allocate between the various parts of the enterprise the actual costs of the creation or acquisition of such intangible rights, as well as the costs subsequently incurred with respect to these intangible rights, without any mark-up for profit or royalty. In so doing, tax authorities must be aware of the fact that the possible adverse consequences deriving from any research and development

1 Internal transfers of financial assets, which are primarily relevant for banks and other financial institutions, raise specific issues which have been dealt with in Parts II and III of the Report *Attribution of Profits to Permanent Establishments*.

activity (*e.g.* the responsibility related to the products and damages to the environment) shall also be allocated to the various parts of the enterprise, therefore giving rise, where appropriate, to a compensatory charge.

35. The area of services is the one in which difficulties may arise in determining whether in a particular case a service should be charged between the various parts of a single enterprise at its actual cost or at that cost plus a mark-up to represent a profit to the part of the enterprise providing the service. The trade of the enterprise, or part of it, may consist of the provision of such services and there may be a standard charge for their provision. In such a case it will usually be appropriate to charge a service at the same rate as is charged to the outside customer.

36. Where the main activity of a permanent establishment is to provide specific services to the enterprise to which it belongs and where these services provide a real advantage to the enterprise and their costs represent a significant part of the expenses of the enterprise, the host country may require that a profit margin be included in the amount of the costs. As far as possible, the host country should then try to avoid schematic solutions and rely on the value of these services in the given circumstances of each case.

37. However, more commonly the provision of services is merely part of the general management activity of the company taken as a whole as where, for example, the enterprise conducts a common system of training and employees of each part of the enterprise benefit from it. In such a case it would usually be appropriate to treat the cost of providing the service as being part of the general administrative expenses of the enterprise as a whole which should be allocated on an actual cost basis to the various parts of the enterprise to the extent that the costs are incurred for the purposes of that part of the enterprise, without any mark-up to represent profit to another part of the enterprise.

38. The treatment of services performed in the course of the general management of an enterprise raises the question whether any part of the total profits of an enterprise should be deemed to arise from the exercise of good management. Consider the case of a company that has its head office in one country but carries on all its business through a permanent establishment situated in another country. In the extreme case it might well be that only the directors' meetings were held at the head office and that all other activities of the company apart from purely formal legal activities, were carried on in the permanent establishment. In such a case there is something to be said for the view that at least part of the profits of the whole enterprise arose from the skillful management and business acumen of the directors and that part of the profits of the enterprise ought, therefore, to be attributed to the country in which the head office was situated. If the company had been managed by a managing agency, then that agency would doubtless have charged a fee for its services and the fee might well have been a simple percentage participation in the profits of the enterprise. But whatever the theoretical merits of such a course, practical considerations weigh heavily against it. In the kind of case quoted the expenses of management would, of course, be set against the profits of the permanent establishment in accordance with the provisions of paragraph 3, but when the matter is looked at as a whole, it is thought that it would not be right to go further by deducting and taking into account some notional figure for "profits of management". In cases identical to the extreme case mentioned above, no account should therefore be

taken in determining taxable profits of the permanent establishment of any notional figure such as profits of management.

39. It may be, of course, that countries where it has been customary to allocate some proportion of the total profits of an enterprise to the head office of the enterprise to represent the profits of good management will wish to continue to make such an allocation. Nothing in the Article is designed to prevent this. Nevertheless it follows from what is said in paragraph 38 above that a country in which a permanent establishment is situated is in no way required to deduct when calculating the profits attributable to that permanent establishment an amount intended to represent a proportionate part of the profits of management attributable to the head office.

40. It might well be that if the country in which the head office of an enterprise is situated allocates to the head office some percentage of the profits of the enterprise only in respect of good management, while the country in which the permanent establishment is situated does not, the resulting total of the amounts charged to tax in the two countries would be greater than it should be. In any such case the country in which the head office of the enterprise is situated should take the initiative in arranging for such adjustments to be made in computing the taxation liability in that country as may be necessary to ensure that any double taxation is eliminated.

41. The treatment of interest charges raises particular issues. First, there might be amounts which, under the name of interest, are charged by a head office to its permanent establishment with respect to internal "loans" by the former to the latter. Except for financial enterprises such as banks, it is generally agreed that such internal "interest" need not be recognised. This is because:

- — From the legal standpoint, the transfer of capital against payment of interest and an undertaking to repay in full at the due date is really a formal act incompatible with the true legal nature of a permanent establishment.
- — From the economic standpoint, internal debts and receivables may prove to be non existent, since if an enterprise is solely or predominantly equity funded it ought not to be allowed to deduct interest charges that it has manifestly not had to pay. Whilst, admittedly, symmetrical charges and returns will not distort the enterprise's overall profits, partial results may well be arbitrarily changed.

42. For these reasons, the ban on deductions for internal debts and receivables should continue to apply generally, subject to the special situation of banks, as mentioned below.

43. A different issue, however, is that of the deduction of interest on debts actually incurred by the enterprise. Such debts may relate in whole or in part to the activities of the permanent establishment; indeed, loans contracted by an enterprise will serve either the head office, the permanent establishment or both. The question that arises in relation to these debts is how to determine the part of the interest that should be deducted in computing the profits attributable to the permanent establishment.

44. The approach suggested in this Commentary before 1994, namely the direct and indirect apportionment of actual debt charges, did not prove to be a practical solution, notably since it was unlikely to be applied in a uniform manner. Also, it is well known that the indirect apportionment of total interest payment charges, or

of the part of interest that remains after certain direct allocations, comes up against practical difficulties. It is also well known that direct apportionment of total interest expense may not accurately reflect the cost of financing the permanent establishment because the taxpayer may be able to control where loans are booked and adjustments may need to be made to reflect economic reality, in particular the fact that an independent enterprise would normally be expected to have a certain level of "free" capital.

45. Consequently, the majority of member countries consider that it would be preferable to look for a practicable solution that would take into account a capital structure appropriate to both the organization and the functions performed. This appropriate capital structure will take account of the fact that in order to carry out its activities, the permanent establishment requires a certain amount of funding made up of "free" capital and interest bearing debt. The objective is therefore to attribute an arm's length amount of interest to the permanent establishment after attributing an appropriate amount of "free" capital in order to support the functions, assets and risks of the permanent establishment. Under the arm's length principle a permanent establishment should have sufficient capital to support the functions it undertakes, the assets it economically owns and the risks it assumes. In the financial sector regulations stipulate minimum levels of regulatory capital to provide a cushion in the event that some of the risks inherent in the business crystallise into financial loss. Capital provides a similar cushion against crystallisation of risk in non-financial sectors.

46. As explained in section D-2 *(v)b)* of Part I of the Report *Attribution of Profits to Permanent Establishments*, there are different acceptable approaches for attributing "free" capital that are capable of giving an arm's length result. Each approach has its own strengths and weaknesses, which become more or less material depending on the facts and circumstances of particular cases. Different methods adopt different starting points for determining the amount of "free" capital attributable to a permanent establishment, which either put more emphasis on the actual structure of the enterprise of which the permanent establishment is a part or alternatively, on the capital structures of comparable independent enterprises. The key to attributing "free" capital is to recognise:

— the existence of strengths and weaknesses in any approach and when these are likely to be present;

— that there is no single arm's length amount of "free" capital, but a range of potential capital attributions within which it is possible to find an amount of "free" capital that can meet the basic principle set out above.

47. It is recognised, however, that the existence of different acceptable approaches for attributing "free" capital to a permanent establishment which are capable of giving an arm's length result can give rise to problems of double taxation. The main concern, which is especially acute for financial institutions, is that if the domestic law rules of the State where the permanent establishment is located and of the State of the enterprise require different acceptable approaches for attributing an arm's length amount of free capital to the permanent establishment, the amount of profits calculated by the State of the permanent establishment may be higher than the amount of profits calculated by the State of the enterprise for purposes of relief of double taxation.

48. Given the importance of that issue, the Committee has looked for a practical solution. OECD member countries have therefore agreed to accept, for the purposes of determining the amount of interest deduction that will be used in computing double taxation relief, the attribution of capital derived from the application of the approach used by the State in which the permanent establishment is located if the following two conditions are met: first, if the difference in capital attribution between that State and the State of the enterprise results from conflicting domestic law choices of capital attribution methods, and second, if there is agreement that the State in which the permanent establishment is located has used an authorised approach to the attribution of capital and there is also agreement that that approach produces a result consistent with the arm's length principle in the particular case. OECD member countries consider that they are able to achieve that result either under their domestic law, through the interpretation of Articles 7 and 23 or under the mutual agreement procedure of Article 25 and, in particular, the possibility offered by that Article to resolve any issues concerning the application or interpretation of their tax treaties.

49. As already mentioned, special considerations apply to internal interest charges on advances between different parts of a financial enterprise (*e.g.* a bank), in view of the fact that making and receiving advances is closely related to the ordinary business of such enterprises. This problem, as well as other problems relating to the application of Article 7 to the permanent establishments of banks and enterprises carrying on global trading, is discussed in Parts II and III of the *Report Attribution of Profits to Permanent Establishments*.

50. The determination of the investment assets attributable to a permanent establishment through which insurance activities are carried on also raises particular issues, which are discussed in Part IV of the Report.

51. It is usually found that there are, or there can be constructed, adequate accounts for each part or section of an enterprise so that profits and expenses, adjusted as may be necessary, can be allocated to a particular part of the enterprise with a considerable degree of precision. This method of allocation is, it is thought, to be preferred in general wherever it is reasonably practicable to adopt it. There are, however, circumstances in which this may not be the case and paragraphs 2 and 3 are in no way intended to imply that other methods cannot properly be adopted where appropriate in order to arrive at the profits of a permanent establishment on a "separate enterprise" footing. It may well be, for example, that profits of insurance enterprises can most conveniently be ascertained by special methods of computation, *e.g.* by applying appropriate co-efficients to gross premiums received from policy holders in the country concerned. Again, in the case of a relatively small enterprise operating on both sides of the border between two countries, there may be no proper accounts for the permanent establishment nor means of constructing them. There may, too, be other cases where the affairs of the permanent establishment are so closely bound up with those of the head office that it would be impossible to disentangle them on any strict basis of branch accounts. Where it has been customary in such cases to estimate the arm's length profit of a permanent establishment by reference to suitable criteria, it may well be reasonable that that method should continue to be followed, notwithstanding that the estimate thus made may not achieve as high a degree of accurate measurement of the profit as adequate accounts. Even where such a course has not

been customary, it may, exceptionally, be necessary for practical reasons to estimate the arm's length profits based on other methods.

Paragraph 4

52. It has in some cases been the practice to determine the profits to be attributed to a permanent establishment not on the basis of separate accounts or by making an estimate of arm's length profit, but simply by apportioning the total profits of the enterprise by reference to various formulae. Such a method differs from those envisaged in paragraph 2, since it contemplates not an attribution of profits on a separate enterprise footing, but an apportionment of total profits; and indeed it might produce a result in figures which would differ from that which would be arrived at by a computation based on separate accounts. Paragraph 4 makes it clear that such a method may continue to be employed by a Contracting State if it has been customary in that State to adopt it, even though the figure arrived at may at times differ to some extent from that which would be obtained from separate accounts, provided that the result can fairly be said to be in accordance with the principles contained in the Article. It is emphasised, however, that in general the profits to be attributed to a permanent establishment should be determined by reference to the establishment's accounts if these reflect the real facts. It is considered that a method of allocation which is based on apportioning total profits is generally not as appropriate as a method which has regard only to the activities of the permanent establishment and should be used only where, exceptionally, it has as a matter of history been customary in the past and is accepted in the country concerned both by the taxation authorities and taxpayers generally there as being satisfactory. It is understood that paragraph 4 may be deleted where neither State uses such a method. Where, however, Contracting States wish to be able to use a method which has not been customary in the past the paragraph should be amended during the bilateral negotiations to make this clear.

53. It would not, it is thought, be appropriate within the framework of this Commentary to attempt to discuss at length the many various methods involving apportionment of total profits that have been adopted in particular fields for allocating profits. These methods have been well documented in treatises on international taxation. It may, however, not be out of place to summarise briefly some of the main types and to lay down some very general directives for their use.

54. The essential character of a method involving apportionment of total profits is that a proportionate part of the profits of the whole enterprise is allocated to a part thereof, all parts of the enterprise being assumed to have contributed on the basis of the criterion or criteria adopted to the profitability of the whole. The difference between one such method and another arises for the most part from the varying criteria used to determine what is the correct proportion of the total profits. It is fair to say that the criteria commonly used can be grouped into three main categories, namely those which are based on the receipts of the enterprise, its expenses or its capital structure. The first category covers allocation methods based on turnover or on commission, the second on wages and the third on the proportion of the total working capital of the enterprise allocated to each branch or part. It is not, of course, possible to say *in vacuo* that any of these methods is intrinsically more accurate than the others; the appropriateness of any particular method will depend on the circumstances to which it is applied. In some

enterprises, such as those providing services or producing proprietary articles with a high profit margin, net profits will depend very much on turnover. For insurance enterprises it may be appropriate to make an apportionment of total profits by reference to premiums received from policy holders in each of the countries concerned. In the case of an enterprise manufacturing goods with a high cost raw material or labour content, profits may be found to be related more closely to expenses. In the case of banking and financial concerns the proportion of total working capital may be the most relevant criterion. It is considered that the general aim of any method involving apportionment of total profits ought to be to produce figures of taxable profit that approximate as closely as possible to the figures that would have been produced on a separate accounts basis, and that it would not be desirable to attempt in this connection to lay down any specific directive other than that it should be the responsibility of the taxation authority, in consultation with the authorities of other countries concerned, to use the method which in the light of all the known facts seems most likely to produce that result.

55. The use of any method which allocates to a part of an enterprise a proportion of the total profits of the whole does, of course, raise the question of the method to be used in computing the total profits of the enterprise. This may well be a matter which will be treated differently under the laws of different countries. This is not a problem which it would seem practicable to attempt to resolve by laying down any rigid rule. It is scarcely to be expected that it would be accepted that the profits to be apportioned should be the profits as they are computed under the laws of one particular country; each country concerned would have to be given the right to compute the profits according to the provisions of its own laws.

Paragraph 5

56. In paragraph 4 of Article 5 there are listed a number of examples of activities which, even though carried on at a fixed place of business, are deemed not to be included in the term "permanent establishment". In considering rules for the allocation of profits to a permanent establishment the most important of these examples is the activity mentioned in paragraph 5 of this Article, *i.e.* the purchasing office.

57. Paragraph 5 is not, of course, concerned with the organisation established solely for purchasing; such an organisation is not a permanent establishment and the profits allocation provisions of this Article would not therefore come into play. The paragraph is concerned with a permanent establishment which, although carrying on other business, also carries on purchasing for its head office. In such a case the paragraph provides that the profits of the permanent establishment shall not be increased by adding to them a notional figure for profits from purchasing. It follows, of course, that any expenses that arise from the purchasing activities will also be excluded in calculating the taxable profits of the permanent establishment.

Paragraph 6

58. This paragraph is intended to lay down clearly that a method of allocation once used should not be changed merely because in a particular year some other method produces more favourable results. One of the purposes of a double taxation convention is to give an enterprise of a Contracting State some degree of certainty about the tax treatment that will be accorded to its permanent establishment in the other Contracting State as well as to the part of it in its home State which is

dealing with the permanent establishment; for this reason, paragraph 6 gives an assurance of continuous and consistent tax treatment.

Paragraph 7

59. Although it has not been found necessary in the Convention to define the term “profits”, it should nevertheless be understood that the term when used in this Article and elsewhere in the Convention has a broad meaning including all income derived in carrying on an enterprise. Such a broad meaning corresponds to the use of the term made in the tax laws of most OECD member countries.

60. This interpretation of the term “profits”, however, may give rise to some uncertainty as to the application of the Convention. If the profits of an enterprise include categories of income which are treated separately in other Articles of the Convention, *e.g.* dividends, it may be asked whether the taxation of those profits is governed by the special Article on dividends etc., or by the provisions of this Article.

61. To the extent that an application of this Article and the special Article concerned would result in the same tax treatment, there is little practical significance to this question. Further, it should be noted that some of the special Articles contain specific provisions giving priority to a specific Article (cf. paragraph 4 of Article 6, paragraph 4 of Articles 10 and 11, paragraph 3 of Article 12, and paragraph 2 of Article 21).

62. It has seemed desirable, however, to lay down a rule of interpretation in order to clarify the field of application of this Article in relation to the other Articles dealing with a specific category of income. In conformity with the practice generally adhered to in existing bilateral conventions, paragraph 7 gives first preference to the special Articles on dividends, interest etc. It follows from the rule that this Article will be applicable to business profits which do not belong to categories of income covered by the special Articles, and, in addition, to dividends, interest etc. which under paragraph 4 of Articles 10 and 11, paragraph 3 of Article 12 and paragraph 2 of Article 21, fall within this Article (cf. paragraphs 12 to 18 of the Commentary on Article 12 which discuss the principles governing whether, in the particular case of computer software, payments should be classified as business profits within Article 7 or as a capital gain within Article 13 on the one hand or as royalties within Article 12 on the other). It is understood that the items of income covered by the special Articles may, subject to the provisions of the Convention, be taxed either separately, or as business profits, in conformity with the tax laws of the Contracting States.

63. It is open to Contracting States to agree bilaterally upon special explanations or definitions concerning the term “profits” with a view to clarifying the distinction between this term and *e.g.* the concept of dividends. It may in particular be found appropriate to do so where in a convention under negotiation a deviation has been made from the definitions in the special Articles on dividends, interest and royalties. It may also be deemed desirable if the Contracting States wish to place on notice, that, in agreement with the domestic tax laws of one or both of the States, the term “profits” includes special classes of receipts such as income from the alienation or the letting of a business or of movable property used in a business. In this connection it may have to be considered whether it would be useful to include also additional rules for the allocation of such special profits.

64. It should also be noted that, whilst the definition of "royalties" in paragraph 2 of Article 12 of the 1963 Draft Convention and 1977 Model Convention included payments "for the use of, or the right to use, industrial, commercial, or scientific equipment", the reference to these payments was subsequently deleted from that definition in order to ensure that income from the leasing of industrial, commercial or scientific equipment, including the income from the leasing of containers, falls under the provisions of Article 7 rather than those of Article 12, a result that the Committee on Fiscal Affairs considers to be appropriate given the nature of such income.

Observations on the Commentary

65. *Italy* and *Portugal* deem as essential to take into consideration that — irrespective of the meaning given to the fourth sentence of paragraph 8 — as far as the method for computing taxes is concerned, national systems are not affected by the new wording of the model, *i.e.* by the elimination of Article 14.

66. *Belgium* cannot share the views expressed in paragraph 13 of the Commentary. Belgium considers that the application of controlled foreign companies legislation is contrary to the provisions of paragraph 1 of Article 7. This is especially the case where a Contracting State taxes one of its residents on income derived by a foreign entity by using a fiction attributing to that resident, in proportion to his participation in the capital of the foreign entity, the income derived by that entity. By doing so, that State increases the tax base of its resident by including in it income which has not been derived by that resident but by a foreign entity which is not taxable in that State in accordance with paragraph 1 of Article 7. That Contracting State thus disregards the legal personality of the foreign entity and acts contrary to paragraph 1 of Article 7.

67. *Luxembourg* does not share the interpretation in paragraph 13 which provides that paragraph 1 of Article 7 does not restrict a Contracting State's right to tax its own residents under controlled foreign companies provisions found in its domestic law as this interpretation challenges the fundamental principle contained in paragraph 1 of Article 7.

68. With reference to paragraph 13, *Ireland* notes its general observation in paragraph 27.5 of the Commentary on Article 1.

69. With regard to paragraph 45, *Greece* notes that the Greek internal law does not foresee any rules or methods for attributing "free" capital to permanent establishments. Concerning loans contracted by an enterprise that relate in whole or in part to the activities of the permanent establishment, Greece allows as deduction the part of the interest which corresponds to the amount of a loan contracted by the head office and actually remitted to the permanent establishment.

70. *Portugal* wishes to reserve its right not to follow the position expressed in paragraph 45 of the Commentary on Article 7 except whenever there are specific domestic provisions foreseeing certain levels of "free" capital for permanent establishments.

71. With regard to paragraph 46, *Sweden* wishes to clarify that it does not consider that the different approaches for attributing "free" capital that the paragraph refers to as being "acceptable" will necessarily lead to a result in accordance with the arm's length principle. Consequently, when looking at the

facts and circumstances of each case in order to determine whether the amount of interest deduction resulting from the application of these approaches conforms to the arm's length principle, Sweden in many cases would not consider that the other States' approach conforms to the arm's length principle. Sweden is of the opinion that double taxation will therefore often occur, requiring the use of the mutual agreement procedure.

72. *Portugal* wishes to reserve its right not to follow the "symmetry" approach described in paragraph 48 of the Commentary on Article 7, insofar as the Portuguese internal law does not foresee any rules or methods for attributing "free" capital to permanent establishments. In eliminating double taxation according to Article 23, Portugal, as the home country, determines the amount of profits attributable to a permanent establishment according to the domestic law.

73. *Germany*, *Japan* and the *United States*, whilst agreeing to the practical solution described in paragraph 48, wish to clarify how this agreement will be implemented. Neither Germany, nor Japan, nor the United States can automatically accept for all purposes all calculations by the State in which the permanent establishment is located. In cases involving Germany or Japan, the second condition described in paragraph 48 has to be satisfied through a mutual agreement procedure under Article 25. In the case of Japan and the United States, a taxpayer who seeks to obtain additional foreign tax credit limitation must do so through a mutual agreement procedure in which the taxpayer would have to prove to the Japanese or the United States competent authority, as the case may be, that double taxation of the permanent establishment profits which resulted from the conflicting domestic law choices of capital attribution methods has been left unrelieved after applying mechanisms under their respective domestic tax law such as utilisation of foreign tax credit limitation created by other transactions.

74. With reference to paragraphs 6 and 7, *New Zealand* notes that it does not agree with the approach put forward on the attribution of profits to permanent establishments in general, as reflected in Part I of the Report *Attribution of Profits to Permanent Establishments*.

Reservations on the Article

75. *Australia*, *Chile*[1] and *New Zealand* reserve the right to include a provision that will permit their domestic law to apply in relation to the taxation of profits from any form of insurance.

76. *Australia* and *New Zealand* reserve the right to include a provision clarifying their right to tax a share of business profits to which a resident of the other Contracting State is beneficially entitled where those profits are derived by a trustee of a trust estate (other than certain unit trusts that are treated as companies for Australian and New Zealand tax purposes) from the carrying on of a business in Australia or New Zealand, as the case may be, through a permanent establishment.

77. *Korea* and *Portugal* reserve the right to tax persons performing professional services or other activities of an independent character if they are present on their territory for a period or periods exceeding in the aggregate 183 days in any twelve

1 Chile was added to this reservation when it joined the OECD in 2010.

month period, even if they do not have a permanent establishment (or a fixed base) available to them for the purpose of performing such services or activities.

78. *Chile,*[1] *Italy* and *Portugal* reserve the right to tax persons performing independent personal services under a separate article which corresponds to Article 14 as it stood before its elimination in 2000.

79. The *United States* reserves the right to amend Article 7 to provide that, in applying paragraphs 1 and 2 of the Article, any income or gain attributable to a permanent establishment during its existence may be taxable by the Contracting State in which the permanent establishment exists even if the payments are deferred until after the permanent establishment has ceased to exist. The United States also wishes to note that it reserves the right to apply such a rule, as well, under Articles 11, 12, 13 and 21.

80. *Turkey* reserves the right to subject income from the leasing of containers to a withholding tax at source in all cases. In case of the application of Articles 5 and 7 to such income, Turkey would like to apply the permanent establishment rule to the simple depot, depot-agency and operational branches cases.

81. *Norway* and the *United States* reserve the right to treat income from the use, maintenance or rental of containers used in international traffic under Article 8 in the same manner as income from shipping and air transport.

82. *Australia* and *Portugal* reserve the right to propose in bilateral negotiations a provision to the effect that, if the information available to the competent authority of a Contracting State is inadequate to determine the profits to be attributed to the permanent establishment of an enterprise, the competent authority may apply to that enterprise for that purpose the provisions of the taxation law of that State, subject to the qualification that such law will be applied, so far as the information available to the competent authority permits, in accordance with the principles of this Article.

83. *Mexico* reserves the right to tax in the State where the permanent establishment is situated business profits derived from the sale of goods or merchandise carried out directly by its home office situated in the other Contracting State, provided that those goods and merchandise are of the same or similar kind as the ones sold through that permanent establishment. The Government of Mexico will apply this rule only as a safeguard against abuse and not as a general "force of attraction" principle; thus, the rule will not apply when the enterprise proves that the sales have been carried out for reasons other than obtaining a benefit under the Convention.

HISTORY

Paragraph 1: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 1 read as follows:

"1. This Article is in many respects a continuation of, and a corollary to, Article 5 on the definition of the concept of permanent establishment. The permanent establishment criterion is commonly used in international double taxation conventions to determine whether a particular kind of income shall or shall not be taxed in the country from which it originates but the criterion does not of

itself provide a complete solution to the problem of the double taxation of business profits; in order to prevent such double taxation it is necessary to supplement the definition of permanent establishment by adding to it an agreed set of rules by reference to which the profits attributable to the permanent establishment are to be calculated. To put the matter in a slightly different way, when an enterprise of a Contracting State carries on business in the other Contracting State the authorities of that second State have to ask themselves two questions before they levy tax on the profits of the enterprise: the first question is whether the enterprise has a permanent establishment in their country; if the answer is in the affirmative the second question is what, if any, are the profits on which that permanent establishment should pay tax. It is with the rules to be used in determining the answer to this second question that Article 7 is concerned. Rules for ascertaining the profits of an enterprise of a Contracting State which is trading with an enterprise of the other Contracting State when both enterprises are associated are dealt with in Article 9."

Paragraph 1 was amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. In the 1977 Model Convention and until 17 July 2008, paragraph 1 read as follows:

"1. This Article is in many respects a continuation of, and a corollary to, Article 5 on the definition of the concept of permanent establishment. The permanent establishment criterion is commonly used in international double taxation conventions to determine whether a particular kind of income shall or shall not be taxed in the country from which it originates but the criterion does not of itself provide a complete solution to the problem of the double taxation of business profits; in order to prevent such double taxation it is necessary to supplement the definition of permanent establishment by adding to it an agreed set of rules of reference to which the profits made by the permanent establishment, or by an enterprise trading with a foreign member of the same group of enterprises, are to be calculated. To put the matter in a slightly different way, when an enterprise of a Contracting State carries on business in the other Contracting State the authorities of that second State have to ask themselves two questions before they levy tax on the profits of the enterprise: the first question is whether the enterprise has a permanent establishment in their country; if the answer is in the affirmative the second question is what, if any, are the profits on which that permanent establishment should pay tax. It is with the rules to be used in determining the answer to this second question that Article 7 is concerned. Rules for ascertaining the profits of an enterprise of a Contracting State which is trading with an enterprise of the other Contracting State when both enterprises are members of the same group of enterprises or are under the same effective control are dealt with in Article 9."

Paragraph 1 and the heading preceding it were previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 and the heading preceding it read as follows:

"GENERAL INTRODUCTION

1. Article 7 on business profits is in many respects a continuation of, and a corollary to, Article 5 on the definition of the concept of permanent establishment. The permanent establishment criterion is commonly used in international double taxation Conventions to determine whether a particular kind of income shall or shall not be taxed in the country from which it originates but the criterion does not of itself provide a complete solution to the problem of the double taxation of business profits; in order to prevent such double taxation it is necessary to

supplement the definition of permanent establishment by adding to it an agreed set of rules of reference to which the profits made by the permanent establishment, or by an enterprise trading with a foreign member of the same group of enterprises, are to be calculated. To put the matter in a slightly different way, when an enterprise of a Contracting State carries on business in the other Contracting State the authorities of that second State have to ask themselves two questions before they levy tax on the profits of the enterprise; the first question is whether the enterprise has a permanent establishment in their country; if the answer is in the affirmative the second question is what, if any, are the profits on which that permanent establishment should pay tax. It is with the rules to be used in determining the answer to this second question that Article 7 is concerned. Rules for ascertaining the profits of an enterprise of a Contracting State which is trading with an enterprise of the other Contracting State when both enterprises are members of the same group of enterprises or are under the same effective control are dealt with in Article 9."

Paragraph 2: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 2 read as follows:

"2. Articles 7 and 9 are not particularly detailed and were not strikingly novel when they were adopted by the OECD. The question of what criteria should be used in attributing profits to a permanent establishment, and of how to allocate profits from transactions between associated enterprises, has had to be dealt with in a large number of double taxation conventions and in various models developed by the League of Nations before the OECD first dealt with it and the solutions adopted have generally conformed to a standard pattern."

Paragraph 2 was amended on 17 July 2008, by incorporating the third, fourth, fifth and sixth sentences into paragraph 3, by incorporating the penultimate sentence into paragraph 4 and by amending the remaining first and second sentences of paragraph 2 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 2 read as follows:

"2. It should perhaps be said at this point that neither Article is strikingly novel or particularly detailed. The question of what criteria should be used in attributing profits to a permanent establishment, and of how to allocate profits from transactions between enterprises under common control, has had to be dealt with in a large number of double taxation conventions and it is fair to say that the solutions adopted have generally conformed to a standard pattern. It is generally recognised that the essential principles on which this standard pattern is based are well founded, and it has been thought sufficient to restate them with some slight amendments and modifications primarily aimed at producing greater clarity. The two Articles incorporate a number of directives. They do not, nor in the nature of things could they be expected to, lay down a series of precise rules for dealing with every kind of problem that may arise when an enterprise of one State makes profits in another. Modern commerce organises itself in an infinite variety of ways, and it would be quite impossible within the fairly narrow limits of an Article in a double taxation convention to specify an exhaustive set of rules for dealing with every kind of problem that may arise. However, since such problems may result in unrelieved double taxation or non taxation of certain profits, it is more important for tax authorities to agree on mutually consistent methods of dealing with these problems, using, where appropriate, the mutual agreement procedure provided for in Article 25, than to adopt unilateral interpretations of basic principles to be adhered to despite differences of opinion with other States.

In this respect, the methods for solving some of the problems most often encountered are discussed below."

Paragraph 2 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of Annex III of another report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993). In the 1977 Model Convention and until 31 March 1994, paragraph 2 read as follows:

"2. It should perhaps be said at this point that neither Article is strikingly novel or particularly detailed. The question of what criteria should be used in attributing profits to a permanent establishment, and of how to allocate profits from transactions between enterprises under common control, has had to be dealt with in a large number of double taxation conventions and it is fair to say that the solutions adopted have generally conformed to a standard pattern. It is generally recognised that the essential principles on which this standard pattern is based are well founded, and it has been thought sufficient to restate them with some slight amendments and modifications primarily aimed at producing greater clarity. The two Articles incorporate a number of directives. They do not, nor in the nature of things could they be expected to, lay down a series of precise rules for dealing with every kind of problem that may arise when an enterprise of one State makes profits in another. Modern commerce organises itself in an infinite variety of ways, and it would be quite impossible within the fairly narrow limits of an Article in a double taxation convention to specify an exhaustive set of rules for dealing with every kind of problem that may arise. This, however, is a matter of relatively minor importance, if there is agreement on general lines. Special cases may require special consideration, but it should not be difficult to find an appropriate solution if the problem is approached within the framework of satisfactory rules based on agreed principles."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. It should perhaps be said at this point that neither Article is strikingly novel or particularly detailed. The question of what criteria should be used in attributing profits to a permanent establishment, and of how to allocate profits from transactions between enterprises under common control, has had to be dealt with in a large number of European double taxation Conventions concluded since the war, and it is fair to say that the solutions adopted have generally conformed to a standard pattern. It is generally recognised that the essential principles on which this standard pattern is based are well founded, and it has been thought sufficient to restate them with some slight amendments and modifications primarily aimed at producing greater clarity. The two Articles incorporate a number of directives. They do not, nor in the nature of things could they be expected to, lay down a series of precise rules for dealing with every kind of problem that may arise when an enterprise of one State makes profits in another. Modern commerce organises itself in an infinite variety of ways, and it would be quite impossible within the fairly narrow limits of an Article in a double taxation Convention to specify an exhaustive set of rules for dealing with every kind of problem that may arise. This, however, is a matter of relatively minor importance. If there is agreement on general lines. Special cases may require special consideration, but it should not be difficult to find an appropriate solution if the problem is approached within the framework of satisfactory rules based on agreed principles."

Paragraph 2.1: Amended and renumbered as paragraph 8 (see history of paragraph 77) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 3: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 3 read as follows:

> "3. It is generally recognised that the essential principles on which this standard pattern is based are well founded, and, when the OECD first examined that question, it was thought sufficient to restate them with some slight amendments and modifications primarily aimed at producing greater clarity. The two Articles incorporate a number of directives. They do not, nor in the nature of things could they be expected to, lay down a series of precise rules for dealing with every kind of problem that may arise when an enterprise of one State makes profits in another. Modern commerce organises itself in an infinite variety of ways, and it would be quite impossible within the fairly narrow limits of an Article in a double taxation convention to specify an exhaustive set of rules for dealing with every kind of problem that may arise."

Paragraph 3 as it read after 17 July 2008 corresponded to the third, fourth, fifth and sixth sentences of paragraph 2. On 17 July 2008, paragraph 3 was renumbered as paragraph 9 (see history of paragraph 11), the headings preceding paragraph 3 were moved with it and the third, fourth, fifth and sixth sentences of paragraph 2, with amendments, were incorporated into paragraph 3 (see history of paragraph 2) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 4: Corresponds to paragraph 5, as it read before 22 July 2010. Paragraph 4, was deleted and paragraph 5 was amended and renumbered as paragraph 4 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 5 read as follows:

> "5. Over the years, the Committee on Fiscal Affairs has therefore spent considerable time and effort trying to ensure a more consistent interpretation and application of the rules of the Article. Minor changes to the wording of the Article and a number of changes to the Commentary were made when the 1977 Model Tax Convention was adopted. A report that addressed that question in the specific case of banks was published in 1984.[1] In 1987, noting that the determination of profits attributable to a permanent establishment could give rise to some uncertainty, the Committee undertook a review of the question which led to the adoption, in 1993, of the report entitled "Attribution of Income to Permanent Establishments"[2] and to subsequent changes to the Commentary.
>
> 1 The Taxation of Multinational Banking Enterprises", in *Transfer Pricing and Multinational Enterprises Three Taxation Issues*, OECD, Paris, 1984.
>
> 2 Reproduced in Volume II at page R(13)-1."

Paragraph 5 was replaced on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 July 1992 and until it was deleted on 17 July 2008, paragraph 5 read as follows:

> "5. The second and more important point is that it is laid down — in the second sentence — that when an enterprise carries on business through a permanent establishment in another State that State may tax the profits of the enterprise but only so much of them as is attributable to the permanent establishment, in other words that the right to tax does not extend to profits that the enterprise may derive from that State otherwise than through the permanent establishment. This is a question on which there may be differences of view. Some

countries have taken the view that when a foreign enterprise has set up a permanent establishment within their territory it has brought itself within their fiscal jurisdiction to such a degree that they can properly tax all profits that the enterprise derives from their territory, whether the profits come from the permanent establishment or from other activities in that territory. But it is thought that it is preferable to adopt the principle contained in the second sentence of paragraph 1, namely that the test that business profits should not be taxed unless there is a permanent establishment is one that should properly be applied not to the enterprise itself but to its profits. To put the matter another way, the principle laid down in the second sentence of paragraph 1 is based on the view that in taxing the profits that a foreign enterprise derives from a particular country, the fiscal authorities of that country should look at the separate sources of profit that the enterprise derives from their country and should apply to each the permanent establishment test. This is of course without prejudice to other Articles."

Paragraph 5 as it read after 23 July 1992 corresponded to paragraph 4 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 5 of the 1963 Draft Convention was renumbered as paragraph 6 (see history of paragraph 6) and paragraph 4 was renumbered as paragraph 5 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 4, as it read after 17 July 2008 and until it was deleted on 22 July 2010, read as follows:

"4. It must be acknowledged, however, that there has been considerable variation in the interpretation of the general directives of Article 7 and of the provisions of earlier conventions and models on which the wording of the Article is based. This lack of a common interpretation of Article 7 can lead to problems of double taxation and non-taxation. For that reason, it is important for tax authorities to agree on mutually consistent methods of dealing with these problems, using, where appropriate, the mutual agreement procedure provided for in Article 25."

Paragraph 4 as it read after 17 July 2008 corresponded in part to the penultimate sentence of paragraph 2. On 17 July 2008 paragraph 4 was deleted and the penultimate sentence of paragraph 2, with amendments, was incorporated into a new paragraph 4 (see history of paragraph 2) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 4 read as follows:

"4. There have been, since the 1950s, rapid developments of activities in space: the launching of rockets and spaceships, the permanent presence of many satellites in space with human crews spending longer and longer periods on board, industrial activities being carried out in space, etc. Since all this could give rise to new situations as regards the implementation of double taxation conventions, would it be desirable to insert in the Model Convention special provisions covering these new situations? Firstly, no country envisage extending its tax sovereignty to activities exercised in space or treating these as activities exercised on its territory. Consequently, space could not be considered as the source of income or profits and hence activities carried out or to be carried out there would not run any new risks of double taxation. Secondly, if there are double taxation problems, the Model Convention, by giving a ruling on the taxing rights of the State of residence and the State of source of the income, should be sufficient to settle them. The same applies with respect to individuals working on board space stations: it is not necessary to derogate from double taxation conventions, since Articles 15 and 19, as appropriate, are sufficient to determine which Contracting State has the right to tax remuneration and Article 4 should make it possible to determine the residence

of the persons concerned, it being understood that any difficulties or doubts can be settled in accordance with the mutual agreement procedure."

Paragraph 4 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 4 read as follows:

"4. There have been, over the last decades, rapid developments of activities in space: the launching of rockets and spaceships, the permanent presence of many satellites in space with human crews spending longer and longer periods on board, the prospect in the fairly near future of industrial activities being carried out in satellites, etc. Since all this could give rise to new situations as regards the implementation of double taxation conventions, would it be desirable to insert in the Model Convention special provisions covering these new situations? Firstly, no country envisage extending its tax sovereignty to activities exercised in space or treating these as activities exercised on its territory. Consequently, space could not be considered as the source of income or profits and hence activities carried out or to be carried out there would not run any new risks of double taxation. Secondly, if there are double taxation problems, the Model Convention, by giving a ruling on the taxing rights of the State of residence and the State of source of the income, should be sufficient to settle them. The same applies with respect to individuals working on board space stations: it is not necessary to derogate from double taxation conventions, since Articles 15 and 19, as appropriate, are sufficient to determine which Contracting State has the right to tax remuneration and Article 4 should make it possible to determine the residence of the persons concerned, it being understood that any difficulties or doubts can be settled in accordance with the mutual agreement procedure."

Paragraph 4 of the 1977 Model Convention was replaced on 23 July 1992. Paragraph 4 of the 1977 Model Convention was renumbered as paragraph 5 (see history of paragraph 5 as it read before 22 July 2010 in paragraph 4 (above)) and a new paragraph 4 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 5: Corresponds to the first three sentences of paragraph 6, as they read before 22 July 2010. Paragraph 5, was amended and renumbered as paragraph 4 (see history of paragraph 4) and the first three sentences of paragraph 6 were amended and incorporated into paragraph 5 (see history of paragraph 6) by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 6: Amended, and the first three sentences of paragraph 6 were incorporated into paragraph 5, on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 6 read as follows:

"6. Despite that work, the practices of OECD and non-OECD countries regarding the attribution of profits to permanent establishments and these countries' interpretation of Article 7 continued to vary considerably. The Committee acknowledged the need to provide more certainty to taxpayers: in its report *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*, adopted in 1995, it indicated that further work would address the application of the arm's length principle to permanent establishments. That work resulted, in 2008, in a report entitled *Attribution of Profits to Permanent Establishments*. The approach developed in that report was not constrained by either the original intent or by the historical practice and interpretation of Article 7. Instead, the focus has been on formulating the most preferable approach to attributing profits to a permanent

establishment under Article 7 given modern-day multinational operations and trade."

Paragraph 6 was replaced on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 July 1992 and until it was deleted on 17 July 2008, paragraph 6 read as follows:

"6. On this matter, naturally, there is room for differences of view, and since it is an important question it may be useful to set out the arguments for each point of view."

Paragraph 6 as it read after 23 July 1992 corresponded to paragraph 5 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. On 23 July 1992 paragraph 6 of the 1963 Draft Convention was renumbered as paragraph 7 (see history of paragraph 9) and paragraph 5 was renumbered as paragraph 6 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 7: Replaced paragraph 7 as it read before 22 July 2010, which was amended and renumbered as paragraph 9 (see history of paragraph 9) by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 8: Replaced paragraph 8 as it read before 22 July 2010, which was renumbered as paragraph 77 (see history of paragraph 77) by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 9: Corresponds to paragraph 7 as it read before 22 July 2010. On 22 July 2010 paragraph 9 was amended and renumbered as paragraph 11 (see history of paragraph 11), the headings preceding paragraph 9 were moved immediately before paragraph 10 and paragraph 7 was amended and renumbered as paragraph 9 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 7 read as follows:

"7. The approach put forward in that Report deals with the attribution of profits both to permanent establishments in general (Part I of the Report) and, in particular, to permanent establishments of businesses operating in the financial sector, where trading through a permanent establishment is widespread (Part II of the Report, which deals with permanent establishments of banks, Part III, which deals with permanent establishments of enterprises carrying on global trading and Part IV, which deals with permanent establishments of enterprises carrying on insurance activities). The Committee considers that the guidance included in the Report represents a better approach to attributing profits to permanent establishments than has previously been available. It does recognise, however, that there are differences between some of the conclusions of the Report and the interpretation of the Article previously given in this Commentary. For that reason, this Commentary has been amended to incorporate a number of conclusions of the Report that did not conflict with the previous version of this Commentary, which prescribed specific approaches in some areas and left considerable leeway in others. The Report therefore represents internationally agreed principles and, to the extent that it does not conflict with this Commentary, provides guidelines for the application of the arm's length principle incorporated in the Article."

Paragraph 7 was replaced on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 July 1992 and until it was deleted on 17 July 2008, paragraph 7 read as follows:

"7. Apart from the background question of fiscal jurisdiction, the main argument commonly put forward against the solution advocated above is that there is a risk that it might facilitate avoidance of tax. This solution, the argument

runs, might leave it open to an enterprise to set up in a particular country a permanent establishment which made no profits, was never intended to make profits, but existed solely to supervise a trade, perhaps of an extensive nature, that the enterprise carried on in that country through independent agents and the like. Moreover, the argument goes, although the whole of this trade might be directed and arranged by the permanent establishment, it might be difficult in practice to prove that that was the case. If the rates of tax are higher in that country than they are in the country in which the head office is situated, then the enterprise has a strong incentive to see that it pays as little tax as possible in the other territory; the main criticism of the solution advocated above is that it might conceivably provide the enterprise with a means of ensuring that result."

Paragraph 7 as it read after 23 July 1992 corresponded to paragraph 6 of the 1963 Convention, adopted by the OECD Council on 30 July 1963. On 23 July 1992 paragraph 7 of the 1963 Draft Convention was renumbered as paragraph 8 (see history of paragraph 77) and paragraph 6 was renumbered as paragraph 7 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 10: Replaced paragraph 10 as it read before 22 July 2010. On 22 July 2010 paragraph 10 was amended and renumbered as paragraph 12 (see history of paragraph 12) and a new paragraph 10 was added by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. At the same time the headings preceding paragraph 9 were moved immediately before paragraph 10.

Paragraph 10.1: Amended and renumbered as paragraph 13 (see history of paragraph 14) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 11: Corresponds to paragraph 9, as it read before 22 July 2010. Paragraph 11, was deleted and paragraph 9 was amended and renumbered as paragraph 9 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 9 read as follows:

"9. This paragraph is concerned with two questions. First, it restates the generally accepted principle of double taxation conventions that an enterprise of one State shall not be taxed in the other State unless it carries on business in that other State through a permanent establishment situated therein. It is hardly necessary to argue here the merits of this principle. It is perhaps sufficient to say that it has come to be accepted in international fiscal matters that until an enterprise of one State sets up a permanent establishment in another State it should not properly be regarded as participating in the economic life of that other State to such an extent that it comes within the jurisdiction of that other State's taxing rights."

Paragraph 9 as it read after 17 July 2008 corresponded to paragraph 3 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. On 17 July 2008 paragraph 9 as it read before 17 July 2008 was deleted and paragraph 3 was renumbered as paragraph 9 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. At the same time, the headings preceding paragraph 3 were moved with it.

The heading preceding paragraph 3, "II. COMMENTARY ON THE PROVISIONS OF THE ARTICLE", was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 9, as it read after 31 March 1994 and until it was deleted on 17 July 2008, read as follows:

"9. It is no doubt true that evasion of tax could be practised by undisclosed channelling of profits away from a permanent establishment and that this may sometimes need to be watched, but it is necessary in considering this point to preserve a sense of proportion and to bear in mind what is said above. It is not, of course, sought in any way to sanction any such malpractice, or to shelter any concern thus evading tax from the consequences that would follow from detection by the fiscal authorities concerned. It is fully recognised that Contracting States should be free to use all methods at their disposal to fight fiscal evasion."

Paragraph 9 as it read after 23 July 1992 corresponded to paragraph 8 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 9 of the 1963 Draft Convention was renumbered as paragraph 10 (cf. history of paragraph 12) and paragraph 8 was renumbered as paragraph 9 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 11 as it read after 17 July 2008 and until it was deleted on 22 July 2010, read as follows:

"11. When referring to the part of the profits of an enterprise that is attributable to a permanent establishment, the second sentence of paragraph 1 refers directly to paragraph 2, which provides the directive for determining what profits should be attributed to a permanent establishment. As paragraph 2 is part of the context in which the sentence must be read, that sentence should not be interpreted in a way that could contradict paragraph 2, e.g. by interpreting it as restricting the amount of profits that can be attributed to a permanent establishment to the amount of profits of the enterprise as a whole. Thus, whilst paragraph 1 provides that a Contracting State may only tax the profits of an enterprise of the other Contracting State to the extent that they are attributable to a permanent establishment situated in the first State, it is paragraph 2 that determines the meaning of the phrase "profits attributable to a permanent establishment". In other words, the directive of paragraph 2 may result in profits being attributed to a permanent establishment even though the enterprise as a whole has never made profits; conversely, that directive may result in no profits being attributed to a permanent establishment even though the enterprise as a whole has made profits."

Paragraph 11 was replaced on 17 July 2008. Paragraph 11 was renumbered as paragraph 14 (see history of paragraph 14), the heading preceding paragraph 11 was moved with it and a new paragraph 11 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 12: Corresponds to paragraph 10, as it read before 22 July 2010. Paragraph 12 as it read before 22 July 2010, was deleted and paragraph 10 was amended and renumbered as paragraph 12 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 10 read as follows:

"10. The second principle, which is reflected in the second sentence of the paragraph, is that the right to tax of the State where the permanent establishment is situated does not extend to profits that the enterprise may derive from that State but that are not attributable to the permanent establishment. This is a question on which there have historically been differences of view, a few countries having some time ago pursued a principle of general "force of attraction" according to which income such as other business profits, dividends, interest and royalties arising from sources in their territory was fully taxable by them if the beneficiary had a permanent establishment therein even though such income was clearly not attributable to that permanent establishment. Whilst some bilateral tax conventions include a limited anti-avoidance rule based on a restricted force of attraction approach that only applies to business profits derived from activities

similar to those carried on by a permanent establishment, the general force of attraction approach described above has now been rejected in international tax treaty practice. The principle that is now generally accepted in double taxation conventions is based on the view that in taxing the profits that a foreign enterprise derives from a particular country, the tax authorities of that country should look at the separate sources of profit that the enterprise derives from their country and should apply to each the permanent establishment test, subject to the possible application of other Articles of the Convention. This solution allows simpler and more efficient tax administration and compliance, and is more closely adapted to the way in which business is commonly carried on. The organisation of modern business is highly complex. There are a considerable number of companies each of which is engaged in a wide diversity of activities and is carrying on business extensively in many countries. A company may set up a permanent establishment in another country through which it carries on manufacturing activities whilst a different part of the same company sells different goods or manufactures in that other country through independent agents. That company may have perfectly valid commercial reasons for doing so: these may be based, for example, on the historical pattern of its business or on commercial convenience. If the country in which the permanent establishment is situated wished to go so far as to try to determine, and tax, the profit element of each of the transactions carried on through independent agents, with a view to aggregating that profit with the profits of the permanent establishment, that approach would interfere seriously with ordinary commercial activities and would be contrary to the aims of the Convention."

Paragraph 10 was replaced on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 July 1992 and until it was deleted on 17 July 2008, paragraph 10 read as follows:

"10. For the reasons given above, it is thought that the argument that the solution advocated might lead to increased avoidance of tax by foreign enterprises should not be given undue weight. Much more importance is attached to the desirability of interfering as little as possible with existing business organisation and of refraining from inflicting demands for information on foreign enterprises which are unnecessarily onerous."

Paragraph 10 as it read after 23 July 1992 corresponded to paragraph 9 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. On 23 July 1992 paragraph 10 of the 1977 Model Convention was renumbered as paragraph 11 (cf. history of paragraph 14), the heading preceding paragraph 10 was moved with it and paragraph 9 was renumbered as paragraph 10 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 12, as it read after 17 July 2008 and until it was deleted on 22 July 2010, read as follows:

"12. Clearly, however, the Contracting State of the enterprise has an interest in the directive of paragraph 2 being correctly applied by the State where the permanent establishment is located. Since that directive applies to both Contracting States, the State of the enterprise must, in accordance with Article 23, eliminate double taxation on the profits properly attributable to the permanent establishment. In other words, if the State where the permanent establishment is located attempts to tax profits that are not attributable to the permanent establishment under Article 7, this may result in double taxation of profits that should properly be taxed only in the State of the enterprise."

Paragraph 12 was replaced on 17 July 2008, when it was renumbered as paragraph 16 (see history of paragraph 16) and a new paragraph 12 was added by the report entitled

"The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 12.1: Amended and renumbered as paragraph 19 (see history of paragraph 19) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 12.2: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 12.2 read as follows:

> "12.2 In this respect, it should also be noted that the principle set out in paragraph 2 is subject to the provisions contained in paragraph 3, especially as regards the treatment of payments which, under the name of interest, royalties, etc. are made by a permanent establishment to its head office in return for money loaned, or patent rights conceded by the latter to the permanent establishment (cf. paragraphs 17.1ff. below)."

Paragraph 12.2 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 13: Replaced paragraph 13 as it read before 22 July 2010. On 22 July 2010 paragraph 13 was amended and renumbered as paragraph 14 (see history of paragraph 14) and a new paragraph 13 was added by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 14: Corresponds to paragraph 13, as it read before 22 July 2010. Paragraph 14 was deleted and paragraph 13 was amended and renumbered as paragraph 14 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010. At the same time the heading preceding paragraph 14 was moved immediately before paragraph 15. After 17 July 2008 and until 22 July 2010, paragraph 13 read as follows:

> "13. The purpose of paragraph 1 is to provide limits to the right of one Contracting State to tax the business profits of enterprises of the other Contracting State. The paragraph does not limit the right of a Contracting State to tax its own residents under controlled foreign companies provisions found in its domestic law even though such tax imposed on these residents may be computed by reference to the part of the profits of an enterprise that is resident of the other Contracting State that is attributable to these residents' participation in that enterprise. Tax so levied by a State on its own residents does not reduce the profits of the enterprise of the other State and may not, therefore, be said to have been levied on such profits (see also paragraph 23 of the Commentary on Article 1 and paragraphs 37 to 39 of the Commentary on Article 10)."

Paragraph 13 as it read after 17 July 2008 corresponded to paragraph 10.1. On 17 July 2008 paragraph 13 was deleted and paragraph 10.1 was amended and renumbered as paragraph 13 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 10.1 read as follows:

> "10.1 The purpose of paragraph 1 is to provide limits to the right of one Contracting State to tax the business profits of enterprises that are residents of the other Contracting State. The paragraph does not limit the right of a Contracting State to tax its own residents under controlled foreign companies provisions found in its domestic law even though such tax imposed on these residents may be computed by reference to the part of the profits of an enterprise that is resident of the other Contracting State that is attributable to these residents' participation in

that enterprise. Tax so levied by a State on its own residents does not reduce the profits of the enterprise of the other State and may not, therefore, be said to have been levied on such profits (see also paragraph 23 of the Commentary on Article 1 and paragraphs 37 to 39 of the Commentary on Article 10)."

Paragraph 10.1 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 13 as it read before 17 July 2008 was deleted by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 13 read as follows:

"13. Even where a permanent establishment is able to produce detailed accounts which purport to show the profits arising from its activities, it may still be necessary for the taxation authorities of the country concerned to rectify those accounts in accordance with the arm's length principle (cf. paragraph 2 above). Adjustment of this kind may be necessary, for example, because goods have been invoiced from the head office to the permanent establishment at prices which are not consistent with this principle, and profits have thus been diverted from the permanent establishment to the head office, or vice versa."

Paragraph 13 as it read before 31 March 1994 was replaced by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of Annex III of another report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993). After 23 July 1992 and until it was deleted on 31 March 1994, paragraph 13 read as follows:

"13. Even where a permanent establishment is able to produce proper accounts which purport to show the profits arising from its activities, it may still be necessary for the taxation authorities of the country concerned to rectify those accounts, in accordance with the general directive laid down in paragraph 2. Adjustment of this kind may be necessary, for example, because goods have been invoiced from the head office to the permanent establishment at prices which are not consistent with this directive, and profits have thus been diverted from the permanent establishment to the head office, or vice versa."

Paragraph 13, as it read after 23 July 1992 corresponded to paragraph 12 of the 1977 Model Convention. On 23 July 1992 paragraph 13 of the 1977 Model Convention was renumbered as paragraph 14 (see history of paragraph 14 (below)) and paragraph 12 was renumbered as paragraph 13 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 12 of the 1977 Model Convention corresponded to paragraph 11 of the 1963 Draft Convention. Paragraph 12 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 13 (see history of paragraph 14 (below)) and paragraph 11 was renumbered as paragraph 12 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 14, as it read after 17 July 2008 and until it was deleted on 22 July 2010, read as follows:

"14. This paragraph contains the central directive on which the attribution of profits to a permanent establishment is intended to be based. The paragraph incorporates the view that the profits to be attributed to a permanent establishment are those which that permanent establishment would have made if, instead of dealing with the rest of the enterprise, it had been dealing with an entirely separate enterprise under conditions and at prices prevailing in the ordinary market. This corresponds to the "arm's length principle" discussed in the Commentary on Article 9. Normally, the profits so determined would be the same

profits that one would expect to be determined by the ordinary processes of good business accountancy."

Paragraph 14 as it read after 17 July 2008 corresponded to paragraph 11. Paragraph 14 as it read before 17 July 2008 was deleted, paragraph 11 was amended and renumbered as paragraph 14 and the heading preceding paragraph 11 was moved with it and by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 11 read as follows:

"11. This paragraph contains the central directive on which the allocation of profits to a permanent establishment is intended to be based. The paragraph incorporates the view, which is generally contained in bilateral conventions, that the profits to be attributed to a permanent establishment are those which that permanent establishment would have made if, instead of dealing with its head office, it had been dealing with an entirely separate enterprise under conditions and at prices prevailing in the ordinary market. This corresponds to the "arm's length principle" discussed in the Commentary on Article 9. Normally, the profits so determined would be the same profits that one would expect to be determined by the ordinary processes of good business accountancy. The arm's length principle also extends to the allocation of profits which the permanent establishment may derive from transactions with other permanent establishments of the enterprise; but Contracting States which consider that the existing paragraph does not in fact cover these more general transactions may, in their bilateral negotiations, agree upon more detailed provisions or amend paragraph 2 to read as follows:

"Subject to the provisions of paragraph 3, where an enterprise of a Contracting State carries on business in the other Contracting State through a permanent establishment situated therein, there shall in each Contracting State be attributed to that permanent establishment the profits which it might be expected to make if it were a distinct and independent enterprise engaged in the same or similar activities under the same or similar conditions.""

Paragraph 11, as it read before 31 March 1994, was replaced by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of Annex III of another report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993). After 23 July 1992 and until 31 March 1994, paragraph 11 read as follows:

"11. This paragraph contains the central directive on which the allocation of profits to a permanent establishment is intended to be based. The paragraph incorporates the view, which is generally contained in bilateral conventions, that the profits to be attributed to a permanent establishment are those which that permanent establishment would have made if, instead of dealing with its head office, it had been dealing with an entirely separate enterprise under conditions and at prices prevailing in the ordinary market. Normally, these would be the same profits that one would expect to be determined by the ordinary processes of good business accountancy. This principle also extends to the allocation of profits which the permanent establishment may derive from transactions with other permanent establishments of the enterprise and with associated companies and their permanent establishments; but Contracting States which consider that the existing paragraph does not in fact cover these more general transactions may in their bilateral negotiations, agree upon more detailed provisions."

Paragraph 11, as it read after 23 July 1992, corresponded to paragraph 10 of the 1977 Model Convention. On 23 July 1992 paragraph 11 of the 1977 Model Convention was

 MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

amended and renumbered as paragraph 12 (see history of paragraph 16), paragraph 10 was renumbered as paragraph 11 and the heading preceding paragraph 10 was moved with it by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 10 of the 1977 Model Convention (adopted by the OECD Council on 11 April 1977), included the first three sentences of paragraph 10 as they read in the 1963 Draft Convention. Paragraph 10 was amended and divided between paragraphs 10 and 11 when the 1977 Model Convention was adopted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 10 read as follows:

> “10. This paragraph contains the central directive on which the allocation of profits to a permanent establishment is intended to be based. The paragraph incorporates the view, which is generally contained in bilateral Conventions that have been concluded since the war, that the profits to be attributed to a permanent establishment are those which that permanent establishment would have made if, instead of dealing with its head office, it had been dealing with an entirely separate enterprise under conditions and at prices prevailing in the ordinary market. Normally, this would be the same profit that one would expect to be reached by the ordinary processes of good business accountancy. In the great majority of cases, therefore, trading accounts of the permanent establishment -- which are commonly available if only because a well-run business organisation is normally concerned to know what is the profitability of its various branches -- will be used by the taxation authorities concerned to ascertain the profit properly attributable to that establishment. Exceptionally, there may be no separate accounts (see paragraphs 21 to 25 below). But where there are such accounts they will naturally form the starting point for any processes of adjustment in case adjustment is required to produce the amount of properly attributable profits. It should perhaps be emphasized that the directive contained in paragraph 2 is no justification for tax administrations to construct hypothetical profit figures in vacuo; it is always necessary to start with the real facts of the situation as they appear from the business records of the permanent establishment and to adjust as may be shown to be necessary the profit figures which those facts produce.”

Paragraph 14 as it read after 23 July 1992 and until 17 July 2008 was deleted by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008. After 23 July 1992 and until 17 July 2008, paragraph 14 read as follows:

> “14. In such cases, it will usually be appropriate to substitute for the prices used ordinary market prices for the same or similar goods supplied on the same or similar conditions. Clearly the price at which goods can be bought on open market terms varies with the quantity required and the period over which they will be supplied; such factors would have to be taken into account in deciding the open market price to be used. It is perhaps only necessary to mention at this point that there may sometimes be perfectly good commercial reasons for an enterprise invoicing its goods at prices less than those prevailing in the ordinary market; this may, for example, be a perfectly normal commercial method of establishing a competitive position in a new market and should not then be taken as evidence of an attempt to divert profits from one country to another. Difficulties may also occur in the case of proprietary goods produced by an enterprise, all of which are sold through its permanent establishments; if in such circumstances there is no open market price, and it is thought that the figures in the accounts are unsatisfactory, it may be necessary to calculate the permanent establishment’s profits by other methods, for example, by applying an average ratio of gross profit to the turnover of the permanent establishment and then deducting from the

figure so obtained the proper amount of expenses incurred. Clearly many special problems of this kind may arise in individual cases but the general rule should always be that the profits attributed to a permanent establishment should be based on that establishment's accounts insofar as accounts are available which represent the real facts of the situation. If available accounts do not represent the real facts then new accounts will have to be constructed, or the original ones rewritten, and for this purpose the figures to be used will be those prevailing in the open market."

Paragraph 14 as it read after 23 July 1992 corresponded to paragraph 13 of the 1977 Model Convention. On 23 July 1992 paragraph 14 of the 1977 Model Convention was amended and renumbered as paragraph 15 (see history of paragraph 21) and paragraph 13 was renumbered as paragraph 14 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 13 of the 1977 Model Convention corresponded to paragraph 12 of the 1963 Draft Convention. Paragraph 13 of the 1963 Draft Convention was amended and renumbered as paragraph 15 (see history of paragraph 27) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 12 of the 1963 Draft Convention was amended and renumbered as paragraph 13 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 12 read as follows:

"12. In such cases, it will usually be appropriate to substitute for the prices used ordinary market prices for the same or similar goods supplied on the same or similar conditions. (Clearly the price at which goods can be bought on open market terms varies with the quantity required and the period over which they will be supplied; such factors would have to be taken into account in deciding the open market price to be used). It is perhaps only necessary to mention at this point that there may sometimes be perfectly good commercial reasons for an enterprise invoicing its goods at prices less than those prevailing in the ordinary market; this may, for example, be a perfectly normal commercial method of establishing a competitive position in a new market and should not then be taken as evidence of an attempt to divert profits from one country to another. Difficulties may also occur in the case of proprietary goods produced by an enterprise, all of which are sold through its permanent establishments; if in such circumstances there is no open market price and it is thought that the figures in the accounts are unsatisfactory it may be necessary to calculate the permanent establishment's profits by other methods, for example, by applying an average ratio of gross profit to the turnover of the permanent establishment and then deducting from the figure so obtained the proper amount of expenses incurred. Clearly many special problems of this kind may arise in individual cases but the general rule should always be that the profits attributed to a permanent establishment should be based on that establishment's accounts insofar as accounts are available which represent the real facts of the situation. If available accounts do not represent the real facts then new accounts will have to be constructed, or the original ones re-written, and for this purpose the figures to be used will be those prevailing in the open market."

Paragraph 15: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. At the same time the heading preceding paragraph 14 was moved immediately before paragraph 15. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 15 read as follows:

"15. The paragraph requires that this principle be applied in each Contracting State. Clearly, this does not mean that the amount on which the enterprise will be taxed in the source State will, for a given period of time, be exactly the same as the amount of income with respect to which the other State will have to provide relief

pursuant to Articles 23 A or 23 B. Variations between the domestic laws of the two States concerning matters such as depreciation rates, the timing of the recognition of income and restrictions on the deductibility of certain expenses that are in accordance with paragraph 3 of this Article will normally result in a different amount of taxable income in each State."

Paragraph 15 was previously replaced on 17 July 2008. Paragraph 15 was amended and renumbered as paragraph 21 (see history of paragraph 21) and a new paragraph 15 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 15.1: Amended and renumbered as paragraph 22 (see history of paragraph 22) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 15.2: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 15.2 read as follows:

"15.2 Another significant problem concerning the transfer of assets, such as bad loans, arises in relation to international banking. Debts may be transferred, for supervisory and financing purposes, from branch to head office or from branch to branch within a single bank. Such transfers should not be recognised where it cannot be reasonably considered that they take place for valid commercial reasons or that they would have taken place between independent enterprises, for instance where they are undertaken solely for tax purposes with the aim of maximising the tax relief available to the bank. In such cases, the transfers would not have been expected to take place between wholly independent enterprises and therefore would not have affected the amount of profits which such an independent enterprise might have been expected to make in independent dealing with the enterprise of which it is a permanent establishment."

Paragraph 15.2 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 15.3: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 15.3 read as follows:

"15.3 However, there may exist a commercial market for the transfer of such loans from one bank to another and the circumstances of an internal transfer may be similar to those which might have been expected to have taken place between independent banks. An instance of such a transfer might be a case where a bank closed down a particular foreign branch and had therefore to transfer the debts concerned either back to its head office or to another branch. Another example might be the opening of a new branch in a given country and the subsequent transfer to it, solely for commercial reasons, of all loans previously granted to residents of that country by the head office or other branches. Any such transfer should be treated (to the extent that it is recognised for tax purposes at all) as taking place at the open market value of the debt at the date of the transfer. Some relief has to be taken into account in computing the profits of the permanent establishment since, between separate entities, the value of the debt at the date of transfer would have been taken into account in deciding on the price to be charged and principles of sound accounting require that the book value of the asset should be varied to take into account market values (this question is further discussed in the report of the Committee on Fiscal Affairs entitled "Attribution of Income to Permanent Establishments"[1])."

1 Attribution of Income to Permanent Establishments, reproduced in Volume II at page R(13)-1."

Paragraph 15.3 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 15.4: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 15.4 read as follows:

"15.4 Where loans which have gone bad are transferred, in order that full, but not excessive, relief for such a loss be granted, it is important that the two jurisdictions concerned reach an agreement for a mutually consistent basis for granting relief. In such cases, account should be taken of whether the transfer value, at the date of the internal transfer, was the result of mistaken judgment as to the debtor's solvency or whether the value at that date reflected an appropriate judgment of the debtor's position at that time. In the former case, it might be appropriate for the country of the transferring branch to limit relief to the actual loss suffered by the bank as a whole and for the receiving country not to tax the subsequent apparent gain. Where, however, the loan was transferred for commercial reasons from one part of the bank to another and did, after a certain time, improve in value, then the transferring branch should normally be given relief on the basis of the actual value at the time of the transfer. The position is somewhat different where the receiving entity is the head office of a bank in a credit country because normally the credit country will tax the bank on its worldwide profits and will therefore give relief by reference to the total loss suffered in respect of the loan between the time the loan was made and the time it was finally disposed of. In such a case, the transferring branch should receive relief for the period during which the loan was in the hands of that branch by reference to the principles above. The country of the head office will then give relief from double taxation by granting a credit for the tax borne by the branch in the host country."

Paragraph 15.4 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 16: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 16 read as follows:

"16. In the great majority of cases, trading accounts of the permanent establishment — which are commonly available if only because a well-run business organisation is normally concerned to know what is the profitability of its various branches — will be used to ascertain the profit properly attributable to that establishment. Exceptionally there may be no separate accounts (cf. paragraphs 51 to 55 below). But where there are such accounts they will naturally form the starting point for any processes of adjustment in case adjustment is required to produce the amount of profits that are properly attributable to the permanent establishment under the directive contained in paragraph 2. It should perhaps be emphasized that this directive is no justification to construct hypothetical profit figures *in vacuo*; it is always necessary to start with the real facts of the situation as they appear from the business records of the permanent establishment and to adjust as may be shown to be necessary the profit figures which those facts produce. As noted in paragraph 19 below and as explained in paragraph 39 of Part I of the Report *Attribution of Profits to Permanent Establishments*, however, records and

documentation must satisfy certain requirements in order to be considered to reflect the real facts of the situation."

Paragraph 16 as it read after 17 July 2008 corresponded to paragraph 12. On 17 July 2008 paragraph 16 was renumbered as paragraph 27 (see history of paragraph 27), the heading preceding paragraph 16 was moved with it and paragraph 12 was amended and renumbered as paragraph 16 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 12 read as follows:

"12. In the great majority of cases, trading accounts of the permanent establishment — which are commonly available if only because a well-run business organisation is normally concerned to know what is the profitability of its various branches — will be used by the taxation authorities concerned to ascertain the profit properly attributable to that establishment. Exceptionally there may be no separate accounts (cf. paragraphs 24 to 28 below). But where there are such accounts they will naturally form the starting point for any processes of adjustment in case adjustment is required to produce the amount of properly attributable profits. It should perhaps be emphasized that the directive contained in paragraph 2 is no justification for tax administrations to construct hypothetical profit figures *in vacuo*; it is always necessary to start with the real facts of the situation as they appear from the business records of the permanent establishment and to adjust as may be shown to be necessary the profit figures which those facts produce."

Paragraph 12 was replaced on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of Annex III of another report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993). After 23 July 1992 and until it was deleted on 31 March 1994, paragraph 12 read as follows:

"12. In the great majority of cases, trading accounts of the permanent establishment — which are commonly available if only because a well-run business organisation is normally concerned to know what is the profitability of its various branches — will be used by the taxation authorities concerned to ascertain the profit properly attributable to that establishment. Exceptionally there may be no separate accounts (cf. paragraphs 24 to 28 below). But where there are such accounts they will naturally form the starting point for any processes of adjustment in case adjustment is required to produce the amount of properly attributable profits. It should perhaps be emphasized that the directive contained in paragraph 2 is no justification for tax administrations to construct hypothetical profit figures *in vacuo*; it is always necessary to start with the real facts of the situation as they appear from the business records of the permanent establishment and to adjust as may be shown to be necessary the profit figures which those facts produce. It should also be noted that the principle set out in paragraph 2 is subject to the provisions contained in paragraph 3, especially as regards the treatment of payments which, under the name of interest, royalties, etc. are made by a permanent establishment to its head office in return for money loaned, or patent rights conceded by the latter to the permanent establishment (cf. paragraphs 17 below and following)."

Paragraph 12, as it read after 23 July 1992, corresponded to paragraph 11 of the 1977 Model Convention. On 23 July 1992 paragraph 12 of the 1977 Model Convention was renumbered as paragraph 13 (see history of paragraph 14) and paragraph 11 was renumbered as paragraph 12 and amended, by replacing the reference therein to paragraphs 16 and 23 to 27 by a reference to paragraphs 17 and 24 to 28, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on

23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 11 read as follows:

"11. In the great majority of cases, trading accounts of the permanent establishment — which are commonly available if only because a well-run business organisation is normally concerned to know what is the profitability of its various branches — will be used by the taxation authorities concerned to ascertain the profit properly attributable to that establishment. Exceptionally there may be no separate accounts (cf. paragraphs 23 to 27 below). But where there are such accounts they will naturally form the starting point for any processes of adjustment in case adjustment is required to produce the amount of properly attributable profits. It should perhaps be emphasized that the directive contained in paragraph 2 is no justification for tax administrations to construct hypothetical profit figures *in vacuo*; it is always necessary to start with the real facts of the situation as they appear from the business records of the permanent establishment and to adjust as may be shown to be necessary the profit figures which those facts produce. It should also be noted that the principle set out in paragraph 2 is subject to the provisions contained in paragraph 3, especially as regards the treatment of payments which, under the name of interest, royalties, etc. are made by a permanent establishment to its head office in return for money loaned, or patent rights conceded by the latter to the permanent establishment (cf. paragraphs 16 below and following)."

Paragraph 11 of the 1977 Model Convention corresponded to part of paragraph 10 of the 1963 Draft Convention. Paragraph 11 of the 1963 Draft Convention was amended and renumbered as paragraph 12 (see history of paragraph 14) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the forth and subsequent sentences of paragraph 10 of the 1963 Draft Convention were incorporated into paragraph 11 of the 1977 Model Convention (see history of paragraph 14).

Paragraph 17: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 17 read as follows:

"17. In order to determine whether such an adjustment is required by paragraph 2, it will be necessary to determine the profits that would have been realized if the permanent establishment had been a separate and distinct enterprise engaged in the same or similar activities under the same or similar conditions and dealing wholly independently with the rest of the enterprise. Sections D-2 and D-3 of Part I of the Report Attribution of Profits to Permanent Establishments describe the two-step approach through which this should be done. This approach will allow the calculation of the profits attributable to all the activities carried on through the permanent establishment, including transactions with other independent enterprises, transactions with associated enterprises and dealings (e.g. the internal transfer of capital or property or the internal provision of services – see for instance paragraphs 31 and 32) with other parts of the enterprise (under the second step referred to above), in accordance with the directive of paragraph 2."

Paragraph 17 was previously replaced on 17 July 2008. The first sentence of paragraph 17 was incorporated into paragraph 28, the second and subsequent sentences of paragraph 17 were incorporated into paragraph 29 (see history of paragraph 28) and a new paragraph 17 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.1: Renumbered as paragraph 31 (see history of paragraph 31) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.2: Renumbered as paragraph 32 (see history of paragraph 32) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.3: Renumbered as paragraph 33 (see history of paragraph 33) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.4: Amended and renumbered as paragraph 34 (see history of paragraph 34) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.5: Renumbered as paragraph 35 (see history of paragraph 35) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.6: Renumbered as paragraph 36 (see history of paragraph 36) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.7: Renumbered as paragraph 37 (see history of paragraph 37) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 18: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 18 read as follows:

> "18. The first step of that approach requires the identification of the activities carried on through the permanent establishment. This should be done through a functional and factual analysis (the guidance found in the *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations* will be relevant for that purpose). Under that first step, the economically significant activities and responsibilities undertaken through the permanent establishment will be identified. This analysis should, to the extent relevant, consider the activities and responsibilities undertaken through the permanent establishment in the context of the activities and responsibilities undertaken by the enterprise as a whole, particularly those parts of the enterprise that engage in dealings with the permanent establishment. Under the second step of that approach, the remuneration of any such dealings will be determined by applying by analogy the principles developed for the application of the arm's length principle between associated enterprises (these principles are articulated in the *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*) by reference to the functions performed, assets used and risk assumed by the enterprise through the permanent establishment and through the rest of the enterprise.
>
> 1 The original version of that report was approved by the Council of the OECD on 27 June 1995. Published in a loose-leaf format as *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*, OECD, Paris, 1995."

Paragraph 18 as it read before 17 July 2008 was previously replaced by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until it was deleted on 17 July 2008, paragraph 18 read as follows:

> "18. Special considerations apply to payments which, under the name of interest, are made to a head office by its permanent establishment with respect to loans made by the former to the latter. In that case, the main issue is not so much

whether a debtor/creditor relationship should be recognised within the same legal entity as whether an arm's length interest rate should be charged. This is because:

— from the legal standpoint, the transfer of capital against payment of interest and an undertaking to repay in full at the due date is really a formal act incompatible with the true legal nature of a permanent establishment;

— from the economic standpoint, internal debts and receivables may prove to be non-existent, since if an enterprise is solely or predominantly equity-funded it ought not to be allowed to deduct interest charges that it has manifestly not had to pay. While, admittedly, symmetrical charges and returns will not distort the enterprise's overall profits, partial results may well be arbitrarily changed."

Paragraph 18 as it read before 31 March 1994 was previously replaced by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of Annex III of another report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993). After 23 July 1992 and until it was deleted on 31 March 1994, paragraph 18 read as follows:

"18. The first of these cases relates to payments which under the name of interest, royalties, etc. are made by a permanent establishment to its head office in return for money loaned, or patent rights conceded, by the latter to the permanent establishment. In such a case, it is considered that the payments should not be allowed as deductions in computing the permanent establishment's taxable profits. Equally, such payments made to a permanent establishment by the head office should be excluded from the computation of the permanent establishment's taxable profits. It is, however, recognised that special considerations apply to payments of interest made by different parts of a financial enterprise (*e.g.* a bank) to each other on advances etc. (as distinct from capital allotted to them), in view of the fact that making and receiving advances is narrowly related to the ordinary business of such enterprises. Furthermore, if an enterprise makes payments of interest, etc. to a third party and these payments in part relate to the activities of the permanent establishment, then a proportionate part of them should naturally be taken into account in calculating the permanent establishment's profits insofar as they can properly be regarded as expenses incurred for the purposes of the permanent establishment."

Paragraph 18, as it read after 23 July 1992, corresponded to paragraph 17 of the 1977 Model Convention. On 23 July 1992 paragraph 18 of the 1977 Model Convention was renumbered as paragraph 19 (see history of paragraph 19) and paragraph 17 was renumbered as paragraph 18 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 17 of the 1977 Model Convention corresponded to paragraph 15 of the 1963 Draft Convention. Paragraph 17 of the 1963 Draft Convention was amended and renumbered as paragraph 19 (see history of paragraph 20) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 15 of the 1963 Draft Convention was amended and renumbered as paragraph 17 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 15 read as follows:

"15. The first of these cases relates to interest, royalties and other similar payments made by a permanent establishment to its head office in return for money loaned, or patent rights conceded, by the latter to the permanent establishment. In such a case, it is considered that the payments should not be allowed as deductions in computing the permanent establishment's taxable

profits. (Equally, such payments made to a permanent establishment by the head office should be excluded from the computation of the permanent establishment's taxable profits.) It is, however, recognised that special considerations apply to payments of interest made by different parts of a financial enterprise (*e.g.* a bank) to each other on advances, etc., (as distinct from capital allotted to them), in view of the fact that making and receiving advances is narrowly related to the ordinary business of such enterprises. Furthermore, if an enterprise makes payments of interest, etc., to a third party and these payments in part relate to the activities of the permanent establishment, then a proportionate part of them should naturally be taken into account in calculating the permanent establishment's profits insofar as they can properly be regarded as expenses incurred for the purposes of the permanent establishment."

Paragraph 18.1: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 18.1 read as follows:

"18.1 If debts incurred by the head office of an enterprise were used solely to finance its activity or clearly and exclusively the activity of a particular permanent establishment, the problem would be reduced to one of thin capitalisation of the actual user of such loans. In fact, loans contracted by an enterprise's head office usually serve its own needs only to a certain extent, the rest of the money borrowed providing basic capital for its permanent establishments."

Paragraph 18.1 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 18.2: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 18.2 read as follows:

"18.2 The approach previously suggested in this Commentary, namely the direct and indirect apportionment of actual debt charges, did not prove to be a practical solution, notably since it was unlikely to be applied in a uniform manner. Also, it is well known that the indirect apportionment of total interest payment charges, or of the part of interest that remains after certain direct allocations, comes up against practical difficulties. It is also well known that direct apportionment of total interest expense may not accurately reflect the cost of financing the permanent establishment because the taxpayer may be able to control where loans are booked and adjustments may need to be made to reflect economic reality."

Paragraph 18.2 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 18.3: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 18.3 read as follows:

"18.3 Consequently, the majority of member countries considered that it would be preferable to look for a practicable solution that would take into account a capital structure appropriate to both the organization and the functions performed. For that reason, the ban on deductions for internal debts and receivables should continue to apply generally, subject to the special problems of banks mentioned below (this question is further discussed in the reports of the Committee entitled "Attribution of Income to Permanent Establishment" and "Thin Capitalisation")."

Paragraph 18.3 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 19: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 19 read as follows:

"19. A question that may arise is to what extent accounting records should be relied upon when they are based on agreements between the head office and its permanent establishments (or between the permanent establishments themselves). Clearly, such internal agreements cannot qualify as legally binding contracts. However, to the extent that the trading accounts of the head office and the permanent establishments are both prepared symmetrically on the basis of such agreements and that those agreements reflect the functions performed by the different parts of the enterprise, these trading accounts could be accepted by tax authorities. Accounts should not be regarded as prepared symmetrically, however, unless the values of transactions or the methods of attributing profits or expenses in the books of the permanent establishment corresponded exactly to the values or methods of attribution in the books of the head office in terms of the national currency or functional currency in which the enterprise recorded its transactions. Also, as explained in paragraph 16, records and documentation must satisfy certain requirements in order to be considered to reflect the real facts of the situation. For example, where trading accounts are based on internal agreements that reflect purely artificial arrangements instead of the real economic functions of the different parts of the enterprise, these agreements should simply be ignored and the accounts corrected accordingly. One such case would be where a permanent establishment involved in sales were, under such an internal agreement, given the role of principal (accepting all the risks and entitled to all the profits from the sales) when in fact the permanent establishment concerned was nothing more than an intermediary or agent (incurring limited risks and entitled to receive only a limited share of the resulting income) or, conversely, were given the role of intermediary or agent when in reality it was a principal."

Paragraph 19 as it read after 17 July 2008 corresponded to paragraph 12.1. On 17 July 2008 paragraph 12.1 was amended and renumbered as paragraph 19 and paragraph 19, as it read before 17 July 2008, was deleted by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 12.1 read as follows:

"12.1 This raises the question as to what extent such accounts should be relied upon when they are based on agreements between the head office and its permanent establishments (or between the permanent establishments themselves). Clearly, such internal agreements cannot qualify as legally binding contracts. However, to the extent that the trading accounts of the head office and the permanent establishments are both prepared symmetrically on the basis of such agreements and that those agreements reflect the functions performed by the different parts of the enterprise, these trading accounts could be accepted by tax authorities. In that respect, accounts could not be regarded as prepared symmetrically unless the values of transactions or the methods of attributing profits or expenses in the books of the permanent establishment corresponded exactly to the values or methods of attribution in the books of the head office in terms of the national currency or functional currency in which the enterprise recorded its transactions. However, where trading accounts are based on internal agreements that reflect purely artificial arrangements instead of the real economic functions of the different parts of the enterprise, these agreements should simply

be ignored and the accounts corrected accordingly. This would be the case if, for example, a permanent establishment involved in sales were, under such an internal agreement, given the role of principal (accepting all the risks and entitled to all the profits from the sales) when in fact the permanent establishment concerned was nothing more than an intermediary or agent (incurring limited risks and entitled to receive only a limited share of the resulting income) or, conversely, were given the role of intermediary or agent when in reality it was a principal."

Paragraph 12.1 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 19 as it read after 31 March 1994 and until 17 July 2008 was deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 19 read as follows:

"19. It is, however, recognised that special considerations apply to payments of interest made by different parts of a financial enterprise (*e.g.* a bank) to each other on advances etc. (as distinct from capital allotted to them), in view of the fact that making and receiving advances is closely related to the ordinary business of such enterprises. This problem, as well as other problems relating to the transfer of financial assets, are considered in the report on multinational banking enterprises included in the OECD 1984 publication entitled *Transfer Pricing and Multinational Enterprises — Three Taxation Studies*. This Commentary does not depart from the positions expressed in the report on this topic. One issue not discussed in the report relates to the transfer of debts by bankers from one part of the bank to another; this is discussed in paragraphs 15.2 to 15.4 above."

Paragraph 19 as it read before 31 March 1994 was replaced on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of Annex III of another report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993). After 23 July 1992 and until it was deleted on 31 March 1994, paragraph 19 read as follows:

"19. The second case relates to the performance of ancillary services by a permanent establishment on behalf of its head office or vice versa. Consider, for example, the case of a large company with a varied business, part of which it carries on in another country through a permanent establishment. In addition, that permanent establishment advertises on behalf of its head office goods which that enterprise produces but which the permanent establishment itself does not handle. Clearly, in calculating for tax purposes the profits of the permanent establishment, the profits should be increased by the amount of the expense it has incurred on behalf of the head office (unless, of course, such an adjustment has already been made in drawing up the accounts of the permanent establishment). In fact, if the permanent establishment and its head office were entirely separate and independent, the permanent establishment would ordinarily carry out services for the head office only if it were paid a commission as well as reimbursed the actual expenses incurred. It is, therefore, necessary to decide whether the calculation should be made on the basis of account being taken not only of any expenses borne by a permanent establishment by reason of services performed for the head office but also of a notional commission increasing the profits of the permanent establishment."

Paragraph 19, as it read after 23 July 1992, corresponded to paragraph 18 of the 1977 Model Convention. On 23 July 1992 paragraph 19 of the 1977 Model Convention was renumbered as paragraph 20 (see history of paragraph 20) and paragraph 18 was renumbered as paragraph 19 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 18 of the 1977 Model Convention corresponded to paragraph 16 of the 1963 Draft Convention. Paragraph 18 of the 1963 Draft Convention was renumbered as paragraph 20 (see history of paragraph 38) and paragraph 16 of the 1963 Draft Convention was amended and renumbered as paragraph 18 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 16 read as follows:

> "16. The second case relates to the performance of ancillary services by a permanent establishment on behalf of its head office (or vice versa). Consider, for example, the case of a large company with a varied business, part of which it carries on in another country through a permanent establishment. In addition, that permanent establishment advertises on behalf of its head office goods which that enterprise produces but which the permanent establishment itself does not handle. Clearly, in calculating for tax purposes the profits of the permanent establishment, the profits should be increased by the amount of the expense it has incurred on behalf of the head office (unless, of course, such an adjustment has already been made in drawing up the accounts of the permanent establishment). But if the permanent establishment and its head office were entirely separate and independent, the permanent establishment would ordinarily carry out services for the head office only if it were paid a commission as well as reimbursed the actual expenses incurred. It is, therefore, necessary to decide whether the calculation should be made on the basis of account being taken not only of any expenses borne by a permanent establishment by reason of services performed for the head office but also of a notional commission increasing the profits of the permanent establishment."

Paragraph 20: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 20 read as follows:

> "20. It may therefore be concluded that accounting records and contemporaneous documentation that meet the above-mentioned requirements constitute a useful starting point for the purposes of attributing profits to a permanent establishment. Taxpayers are encouraged to prepare such documentation, as it may reduce substantially the potential for controversies. Section D-2 (*vi)b)* of Part I of the Report *Attribution of Profits to Permanent Establishments* discusses the conditions under which tax administrations would give effect to such documentation."

Paragraph 20 was previously replaced on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until it was deleted on 17 July 2008, paragraph 20 read as follows:

> "20. The above-mentioned report also addresses the issue of the attribution of capital to the permanent establishment of a bank in situations where actual assets were transferred to such a branch and in situations where they were not. Difficulties in practice continue to arise from the differing views of member countries on these questions and the present Commentary can only emphasise the desirability of agreement on mutually consistent methods of dealing with these problems."

Paragraph 20 was previously replaced on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of Annex III of another report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993). After 23 July 1992 and until it was deleted on 31 March 1994, paragraph 20 read as follows:

"20. After consideration of this question, it is thought that in such circumstances the profits of the permanent establishment should not be increased by the addition of a "commission" figure. While, on one view, to include a "commission" figure in the profits of every permanent establishment that has performed services otherwise than for its own purposes could be looked at in theory as a consequential application of the fiction of separate enterprise, it would inevitably be found exceedingly cumbersome in practice. There would be scope for lengthy argument about, and usually no concrete basis for determining, the percentage to be used in calculating the amount of notional "commission". In the great majority of cases the accounts of the permanent establishment would doubtless take into consideration actual expenses incurred; in other words they would not normally include any credit for "commission". If as a general rule the "separate enterprise" test were to be applied to services performed by a permanent establishment on behalf of its head office and a notional "commission" profit were to be included in the profits of the permanent establishment, it would, therefore, be necessary in the great majority of cases first to settle how the "commission" element was to be calculated and then re-write the accounts of the permanent establishment. Considerations of practical administration weigh heavily against such a course. Therefore no "commission" element should in such cases be included in the profits of the permanent establishment. Similarly, in the converse case where the head office undertakes services on behalf of the permanent establishment, no "commission" element should be deducted in determining the profits of the permanent establishment."

Paragraph 20 as it read after 23 July 1992 corresponded to paragraph 19 of the 1977 Model Convention. On 23 July 1992, paragraph 20 of the 1977 Model Convention was renumbered as paragraph 21 (see history of paragraph 38) and paragraph 19 was renumbered as paragraph 20 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 19 of the 1977 Model Convention corresponded to paragraph 17 of the 1963 Draft Convention. Paragraph 19 of the 1963 Draft Convention was amended and renumbered as paragraph 21 (see history of paragraph 39) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 17 of the 1963 Draft Convention was amended and renumbered as paragraph 19 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 17 read as follows:

"17. After careful consideration of this question, it is thought that in such circumstances the profits of the permanent establishment should not be increased by the addition of a "commission" figure. While, on one view, to include a commission figure in the profits of every permanent establishment that has performed services otherwise than for its own purposes could be looked at in theory as a consequential application of the fiction of separate enterprise, it would inevitably be found exceedingly cumbersome in practice. There would be scope for lengthy argument about, and usually no concrete basis for determining, the percentage to be used in calculating the amount of notional commission. In the great majority of cases the accounts of the permanent establishment would doubtless take into consideration the actual expenses incurred; in other words

they would not normally include any credit for commission. If as a general rule the "separate enterprise" test were to be applied to services performed by a permanent establishment on behalf of its head office and a notional "commission" profit were to be included in the profits of the permanent establishment, it would, therefore, be necessary in the great majority of cases first to settle how the "commission" element was to be calculated and then re-write the accounts of the permanent establishment. Considerations of practical administration weigh heavily against such a course. Therefore no "commission" element should in such cases be included in the profits of the permanent establishment. Similarly, in the converse case where the head office undertakes services on behalf of the permanent establishment) no "commission" element should be deducted in determining the profits of the permanent establishment."

Paragraph 21: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 21 read as follows:

"21. There may be a realisation of a taxable profit when an asset, whether or not trading stock, forming part of the business property of a permanent establishment situated within a State's territory is transferred to a permanent establishment or the head office of the same enterprise situated in another State. Article 7 allows the former State to tax profits deemed to arise in connection with such a transfer. Such profits may be determined as indicated below. In cases where such transfer takes place, whether or not it is a permanent one, the question arises as to when taxable profits are realised. In practice, where such property has a substantial market value and is likely to appear on the balance sheet of the importing permanent establishment or other part of the enterprise after the taxation year during that in which the transfer occurred, the realisation of the taxable profits will not, so far as the enterprise as a whole is concerned, necessarily take place in the taxation year of the transfer under consideration. However, the mere fact that the property leaves the purview of a tax jurisdiction may trigger the taxation of the accrued gains attributable to that property as the concept of realisation depends on each country's domestic law."

Paragraph 21 as it read after 17 July 2008 corresponded to paragraph 15. On 17 July 2008 paragraph 21 was amended and renumbered as paragraph 38 (see history of paragraph 38) and paragraph 15 was amended and renumbered as paragraph 21 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 15 read as follows:

"15. Many States consider that there is a realisation of a taxable profit when an asset, whether or not trading stock, forming part of the business property of a permanent establishment situated within their territory is transferred to a permanent establishment or the head office of the same enterprise situated in another State. Article 7 allows such States to tax profits deemed to arise in connection with such a transfer. Such profits may be determined as indicated below. In cases where such transfer takes place, whether or not it is a permanent one, the question arises as to when taxable profits are realised. In practice, where such property has a substantial market value and is likely to appear on the balance sheet of the importing permanent establishment or other part of the enterprise after the taxation year during that in which the transfer occurred, the realisation of the taxable profits will not, so far as the enterprise as a whole is concerned, necessarily take place in the taxation year of the transfer under consideration. However, the mere fact that the property leaves the purview of a tax jurisdiction may trigger the taxation of the accrued gains attributable to that property as the concept of realisation depends on each country's domestic law."

Paragraph 15 as it read as it read before 31 March 1994 was replaced by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of Annex III of another report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993). After 23 July 1992 and until it was deleted on 31 March 1994, paragraph 15 read as follows:

> "15. Some States consider that there is a realisation of a taxable profit when an asset, other than trading stock, forming part of the business property of a permanent establishment situated within their territory is transferred to a permanent establishment or the head office of the same enterprise situated in another State. Article 7 allows such States to tax profits deemed to arise in connection with such a transfer. Such profits may be determined as indicated in paragraphs 11 to 14 above."

Paragraph 15, as it read after 23 July 1992, corresponded to paragraph 14 of the 1977 Model Convention. On 23 July 1992 paragraph 15 of the 1977 Model Convention was renumbered as paragraph 16 (see history of paragraph 27), the heading preceding paragraph 15 was moved with it and paragraph 14 was renumbered as paragraph 15 and amended by replacing the reference therein to "paragraphs 10 to 13" by a reference to "paragraphs 11 to 14" by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 14 read as follows:

> "14. Some States consider that there is a realisation of a taxable profit when an asset, other than trading stock, forming part of the business property of a permanent establishment situated within their territory is transferred to a permanent establishment or the head office of the same enterprise situated in another State. Article 7 allows such States to tax profits deemed to arise in connection with such a transfer. Such profits may be determined as indicated in paragraphs 10 to 13 above."

Paragraph 14 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 14 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 16 (see history of paragraph 28) and a new paragraph 14 was added when the 1977 Model Convention was adopted.

Paragraph 22: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 22 read as follows:

> "22. Where the countries in which the permanent establishments operate levy tax on the profits accruing from an internal transfer as soon as it is made, even when these profits are not actually realised until a subsequent commercial year, there will be inevitably a time lag between the moment when tax is paid abroad and the moment it can be taken into account in the country where the enterprise's head office is located. A serious problem is inherent in the time lag, especially when a permanent establishment transfers fixed assets or — in the event that it is wound up — its entire operating equipment stock, to some other part of the enterprise of which it forms part. In such cases, it is up to the head office country to seek, on a case by case basis, a bilateral solution with the outward country where there is serious risk of overtaxation."

Paragraph 22 as it read after 17 July 2008 corresponded to paragraph 15.1. On 17 July 2008 paragraph 22 was amended and renumbered as paragraph 39 (see history of paragraph 39) and paragraph 15.1 was renumbered as paragraph 22 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 15.1 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 23: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 23 read as follows:

> "23. Paragraph 3 of Article 5 sets forth a special rule for a fixed place of business that is a building site or a construction or installation project. Such a fixed place of business is a permanent establishment only if it lasts more than twelve months. Experience has shown that these types of permanent establishments can give rise to special problems in attributing income to them under Article 7."

Paragraph 23 was previously replaced on 17 July 2008. Paragraph 23 was renumbered as paragraph 40 (see history of paragraph 40) and a new paragraph 23 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 24: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 24 read as follows:

> "24. These problems arise chiefly where goods are provided, or services performed, by the other parts of the enterprise or a related party in connection with the building site or construction or installation project. Whilst these problems can arise with any permanent establishment, they are particularly acute for building sites and construction or installation projects. In these circumstances, it is necessary to pay close attention to the general principle that income is attributable to a permanent establishment only when it results from activities carried on by the enterprise through that permanent establishment."

Paragraph 24 was previously replaced on 17 July 2008. Paragraph 24 was amended and renumbered as paragraph 51 (see history of paragraph 51) and a new paragraph 24 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 25: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 25 read as follows:

> "25. For example, where such goods are supplied by the other parts of the enterprise, the profits arising from that supply do not result from the activities carried on through the permanent establishment and are not attributable to it. Similarly, profits resulting from the provision of services (such as planning, designing, drawing blueprints, or rendering technical advice) by the parts of the enterprise operating outside the State where the permanent establishment is located do not result from the activities carried on through the permanent establishment and are not attributable to it."

Paragraph 25 was previously replaced on 17 July 2008. Paragraph 25 was renumbered as paragraph 52 (see history of paragraph 52), the heading preceding paragraph 25 was moved with it and a new paragraph 25 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 26: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 26 read as follows:

"26. Where, under paragraph 5 of Article 5, a permanent establishment of an enterprise of a Contracting State is deemed to exist in the other Contracting State by reason of the activities of a so-called dependent agent (see paragraph 32 of the Commentary on Article 5), the same principles used to attribute profits to other types of permanent establishment will apply to attribute profits to that deemed permanent establishment. As a first step, the activities that the dependent agent undertakes for the enterprise will be identified through a functional and factual analysis that will determine the functions undertaken by the dependent agent both on its own account and on behalf of the enterprise. The dependent agent and the enterprise on behalf of which it is acting constitute two separate potential taxpayers. On the one hand, the dependent agent will derive its own income or profits from the activities that it performs on its own account for the enterprise; if the agent is itself a resident of either Contracting State, the provisions of the Convention (including Article 9 if that agent is an enterprise associated to the enterprise on behalf of which it is acting) will be relevant to the taxation of such income or profits. On the other hand, the deemed permanent establishment of the enterprise will be attributed the assets and risks of the enterprise relating to the functions performed by the dependent agent on behalf of that enterprise (*i.e.* the activities that the dependent agent undertakes for that enterprise), together with sufficient capital to support those assets and risks. Profits will then be attributed to the deemed permanent establishment on the basis of those assets, risks and capital; these profits will be separate from, and will not include, the income or profits that are properly attributable to the dependent agent itself (see section D-5 of Part I of the Report *Attribution of Profits to Permanent Establishments*)."

Paragraph 26 was previously replaced on 17 July 2008. Paragraph 26 was renumbered as paragraph 53 (see history of paragraph 53) and a new paragraph 26 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 27: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. At the same time the heading preceding paragraph 27 was moved immediately before paragraph 44. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 27 read as follows:

"27. This paragraph clarifies, in relation to the expenses of a permanent establishment, the general directive laid down in paragraph 2. The paragraph specifically recognises that in calculating the profits of a permanent establishment allowance is to be made for expenses, wherever incurred, that were incurred for the purposes of the permanent establishment. Clearly in some cases it will be necessary to estimate or to calculate by conventional means the amount of expenses to be taken into account. In the case, for example, of general administrative expenses incurred at the head office of the enterprise, it may be appropriate to take into account a proportionate part based on the ratio that the permanent establishment's turnover (or perhaps gross profits) bears to that of the enterprise as a whole. Subject to this, it is considered that the amount of expenses to be taken into account as incurred for the purposes of the permanent establishment should be the actual amount so incurred. The deduction allowable to the permanent establishment for any of the expenses of the enterprise attributed to it does not depend upon the actual reimbursement of such expenses by the permanent establishment."

Paragraph 27 as it read after 17 July 2008 corresponded to paragraph 16. On 17 July 2008 paragraph27 was renumbered as paragraph 54 (see history of paragraph 54), paragraph 16 was renumbered as paragraph 27 and the heading preceding

paragraph 16 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 16, as it read after 23 July 1992, corresponded to paragraph 15 of the 1977 Model Convention. On 23 July 1992 paragraph 16 of the 1977 Model Convention was renumbered as paragraph 17 (see history of paragraph 28), paragraph 15 was renumbered as paragraph 16 and the heading preceding paragraph 15 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 15 of the 1977 Model Convention corresponded to paragraph 13 of the 1963 Draft Convention. Paragraph 15 of the 1963 Draft Convention was amended and renumbered as paragraph 17 (see history of paragraph 18) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 13 of the 1963 Draft Convention was amended and renumbered as paragraph 15 and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 13 read as follows:

"13. This paragraph clarifies, in relation to the expenses of a permanent establishment, the general directive laid down in paragraph 2. It is valuable to include paragraph 3 if only for the sake of removing doubts. The paragraph specifically recognises that in calculating the profits of a permanent establishment allowance is to be made for expenses, wherever incurred, that were incurred for the purposes of the permanent establishment. Clearly in some cases it will be necessary to estimate or to calculate by conventional means the amount of expenses to be taken into account. In the case, for example, of general administrative expenses incurred at the head office of the enterprise it may be appropriate to take into account a proportionate part based on the ratio that the permanent establishment's turnover (or perhaps gross profits) bears to that of the enterprise as a whole. Subject to this, it is considered that the amount of expenses to be taken into account as incurred for the purposes of the permanent establishment should be the actual amount so incurred."

Paragraph 28: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 28 read as follows:

"28. It has sometimes been suggested that the need to reconcile paragraphs 2 and 3 created practical difficulties as paragraph 2 required that prices between the permanent establishment and the head office be normally charged on an arm's length basis, giving to the transferring entity the type of profit which it might have been expected to make were it dealing with an independent enterprise, whilst the wording of paragraph 3 suggested that the deduction for expenses incurred for the purposes of permanent establishments should be the actual cost of those expenses, normally without adding any profit element."

Paragraph 28 as it read after 17 July 2008 corresponded to the first sentence of paragraph 17 as it read before 17 July 2008. On 17 July 2008 paragraph 28 was renumbered as paragraph 55 (see history of paragraph 55), the first sentence of paragraph 17 was incorporated into paragraph 28 and the second and subsequent sentences of paragraph 17 were incorporated into paragraph 29 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 17 read as follows:

"17. It has sometimes been suggested that the need to reconcile paragraphs 2 and 3 created practical difficulties as paragraph 2 required that prices between the permanent establishment and the head office be normally charged on an arm's length basis, giving to the transferring entity the type of profit which it might

have been expected to make were it dealing with an independent enterprise, whilst the wording of paragraph 3 suggested that the deduction for expenses incurred for the purposes of permanent establishments should be the actual cost of those expenses, normally without adding any profit element. In fact, whilst the application of paragraph 3 may raise some practical difficulties, especially in relation to the separate enterprise and arm's length principles underlying paragraph 2, there is no difference of principle between the two paragraphs. Paragraph 3 indicates that in determining the profits of a permanent establishment, certain expenses must be allowed as deductions whilst paragraph 2 provides that the profits determined in accordance with the rule contained in paragraph 3 relating to the deduction of expenses must be those that a separate and distinct enterprise engaged in the same or similar activities under the same or similar conditions would have made. Thus, whilst paragraph 3 provides a rule applicable for the determination of the profits of the permanent establishment, paragraph 2 requires that the profits so determined correspond to the profits that a separate and independent enterprise would have made."

Paragraph 17 was replaced on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of Annex III of another report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993). After 23 July 1992 and until it was deleted on 31 March 1994, paragraph 17 read as follows:

"17. Apart from what may be regarded as ordinary expenses, there are some classes of payments between permanent establishments and head offices which give rise to special problems, and it is convenient to deal with them at this point. The next paragraphs discuss three specific cases of this kind and give solutions for them. It should not, of course, be inferred that it is only in relation to the three classes of payments mentioned in these paragraphs that problems may arise; there may well be payments of other kinds to which similar considerations apply."

Paragraph 17, as it read after 23 July 1992, corresponded to paragraph 16 of the 1977 Model Convention. On 23 July 1992 paragraph 17 of the 1977 Model Convention was renumbered as paragraph 18 (see history of paragraph 18) and paragraph 16 was renumbered as paragraph 17 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 16 of the 1977 Model Convention corresponded to paragraph 14 of the 1963 Draft Convention. Paragraph 16 of the 1963 Draft Convention was amended and renumbered as paragraph 18 (see history of paragraph 19) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 14 of the 1963 Draft Convention was amended and renumbered as paragraph 16 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 14 read as follows:

"14. Apart from what may be regarded as ordinary expenses, there are some classes of payment between permanent establishments and head offices which give rise to special problems, and it is convenient to deal with them at this point. The next five paragraphs discuss three specific cases of this kind and give solutions for them. It should not, of course, be inferred that it is only in relation to the three classes of payments mentioned in these paragraphs that problems may arise; there may well be payments of other kinds to which similar considerations apply."

Paragraph 29: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 29 read as follows:

"29. In fact, whilst the application of paragraph 3 may raise some practical difficulties, especially in relation to the separate enterprise and arm's length principles underlying paragraph 2, there is no difference of principle between the two paragraphs. Paragraph 3 indicates that in determining the profits of a permanent establishment, certain expenses must be allowed as deductions whilst paragraph 2 provides that the profits determined in accordance with the rule contained in paragraph 3 relating to the deduction of expenses must be those that a separate and distinct enterprise engaged in the same or similar activities under the same or similar conditions would have made. Thus, whilst paragraph 3 provides a rule applicable for the determination of the profits of the permanent establishment, paragraph 2 requires that the profits so determined correspond to the profits that a separate and independent enterprise would have made."

Paragraph 29 as it read after 17 July 2008 corresponded to the second and subsequent sentences of paragraph 17. On 17 July 2008 paragraph 29 was renumbered as paragraph 56 (see history of paragraph 56), the heading preceding paragraph 29 was moved with it, and the second and subsequent sentences of paragraph 17 were incorporated into paragraph 29 (see history of paragraph 17 in history of paragraph 28) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 30: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 30 read as follows:

"30. Also, paragraph 3 only determines which expenses should be attributed to the permanent establishment for purposes of determining the profits attributable to that permanent establishment. It does not deal with the issue of whether those expenses, once attributed, are deductible when computing the taxable income of the permanent establishment since the conditions for the deductibility of expenses are a matter to be determined by domestic law, subject to the rules of Article 24 on Non-discrimination (in particular, paragraphs 3 and 4 of that Article)."

Paragraph 30 previously replaced paragraph 30 on 17 July 2008. Paragraph 30 was renumbered as paragraph 57 (see history of paragraph 57) and a new paragraph 30 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 31: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 31 read as follows:

"31. In applying these principles to the practical determination of the profits of a permanent establishment, the question may arise as to whether a particular cost incurred by an enterprise can truly be considered as an expense incurred for the purposes of the permanent establishment, keeping in mind the separate and independent enterprise principles of paragraph 2. Whilst in general independent enterprises in their dealings with each other will seek to realise a profit and, when transferring property or providing services to each other, will charge such prices as the open market would bear, nevertheless, there are also circumstances where it cannot be considered that a particular property or service would have been obtainable from an independent enterprise or when independent enterprises may agree to share between them the costs of some activity which is pursued in common for their mutual benefit. In these particular circumstances, it may be appropriate to treat any relevant costs incurred by the enterprise as an expense incurred for the permanent establishment. The difficulty arises in making a distinction between these circumstances and the cases where a cost incurred by an enterprise should not be considered as an expense of the permanent

establishment and the relevant property or service should be considered, on the basis of the separate and independent enterprises principle, to have been transferred between the head office and the permanent establishment at a price including an element of profit. The question must be whether the internal transfer of property and services, be it temporary or final, is of the same kind as those which the enterprise, in the normal course of its business, would have charged to a third party at an arm's length price, *i.e.* by normally including in the sale price an appropriate profit."

Paragraph 31 as it read after 17 July 2008 corresponded to paragraph 17.1. On 17 July 2008 paragraph 31 was renumbered as paragraph 58 (see history of paragraph 58), the heading preceding paragraph 31 was moved with it and paragraph 17.1 was renumbered as paragraph 31 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.1 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 32: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 32 read as follows:

"32. On the one hand, the answer to that question will be in the affirmative if the expense is initially incurred in performing a function the direct purpose of which is to make sales of a specific good or service and to realise a profit through a permanent establishment. On the other hand, the answer will be in the negative if, on the basis of the facts and circumstances of the specific case, it appears that the expense is initially incurred in performing a function the essential purpose of which is to rationalise the overall costs of the enterprise or to increase in a general way its sales.[1]

1 Internal transfers of financial assets, which are primarily relevant for banks and other financial institutions, raise specific issues which have been dealt with in Parts II and III of the Report *Attribution of Profits to Permanent Establishments*."

Paragraph 32 as it read after 17 July 2008 corresponded to paragraph 17.2. Paragraph 32 as it read before 17 July 2008 was renumbered as paragraph 59 (see history of paragraph 71) and the heading preceding paragraph 32 was moved with it. At the same time paragraph 17.2 was amended, by revising the footnote, and renumbered as paragraph 32 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, the footnote to paragraph 17.2 read as follows:

"1 Internal transfers of financial assets, which are primarily relevant for banks and other financial institutions, raise specific issues which have already been dealt with in a separate study entitled "The Taxation of Multinational Banking Enterprises" (published under the title Transfer Pricing and Multinational Enterprises — Three Taxation Issues, OECD, Paris, 1984) and which are the subject of paragraphs 19 and 20 below."

Paragraph 17.2 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 33: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 33 read as follows:

"33. Where goods are supplied for resale whether in a finished state or as raw materials or semi-finished goods, it will normally be appropriate for the provisions

of paragraph 2 to apply and for the supplying part of the enterprise to be allocated a profit, measured by reference to arm's length principles. But there may be exceptions even here. One example might be where goods are not supplied for resale but for temporary use in the trade so that it may be appropriate for the parts of the enterprise which share the use of the material to bear only their share of the cost of such material *e.g.* in the case of machinery, the depreciation costs that relate to its use by each of these parts. It should of course be remembered that the mere purchase of goods does not constitute a permanent establishment (subparagraph 4 *d)* of Article 5) so that no question of attribution of profit arises in such circumstances."

Paragraph 33 as it read after 17 July 2008 corresponded to paragraph 17.3. On 17 July 2008 paragraph 33 was renumbered as paragraph 60 (see history of paragraph 72) and paragraph 17.3 was renumbered as paragraph 33 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.3 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 34: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 34 read as follows:

"34. In the case of intangible rights, the rules concerning the relations between enterprises of the same group (*e.g.* payment of royalties or cost sharing arrangements) cannot be applied in respect of the relations between parts of the same enterprise. Indeed, it may be extremely difficult to allocate "ownership" of the intangible right solely to one part of the enterprise and to argue that this part of the enterprise should receive royalties from the other parts as if it were an independent enterprise. Since there is only one legal entity it is not possible to allocate legal ownership to any particular part of the enterprise and in practical terms it will often be difficult to allocate the costs of creation exclusively to one part of the enterprise. It may therefore be preferable for the costs of creation of intangible rights to be regarded as attributable to all parts of the enterprise which will make use of them and as incurred on behalf of the various parts of the enterprise to which they are relevant accordingly. In such circumstances it would be appropriate to allocate between the various parts of the enterprise the actual costs of the creation or acquisition of such intangible rights, as well as the costs subsequently incurred with respect to these intangible rights, without any mark-up for profit or royalty. In so doing, tax authorities must be aware of the fact that the possible adverse consequences deriving from any research and development activity (*e.g.* the responsibility related to the products and damages to the environment) shall also be allocated to the various parts of the enterprise, therefore giving rise, where appropriate, to a compensatory charge."

Paragraph 34 as it read after 17 July 2008 corresponded to paragraph 17.4. On 17 July 2008 paragraph 34 was renumbered as paragraph 61 (see history of paragraph 73) and paragraph 17.4 was amended and renumbered as paragraph 34 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 17.4 read as follows:

"17.4 In the case of intangible rights, the rules concerning the relations between enterprises of the same group (*e.g.* payment of royalties or cost sharing arrangements) cannot be applied in respect of the relations between parts of the same enterprise. Indeed, it may be extremely difficult to allocate "ownership"

of the intangible right solely to one part of the enterprise and to argue that this part of the enterprise should receive royalties from the other parts as if it were an independent enterprise. Since there is only one legal entity it is not possible to allocate legal ownership to any particular part of the enterprise and in practical terms it will often be difficult to allocate the costs of creation exclusively to one part of the enterprise. It may therefore be preferable for the costs of creation of intangible rights to be regarded as attributable to all parts of the enterprise which will make use of them and as incurred on behalf of the various parts of the enterprise to which they are relevant accordingly. In such circumstances it would be appropriate to allocate the actual costs of the creation of such intangible rights between the various parts of the enterprise without any mark-up for profit or royalty. In so doing, tax authorities must be aware of the fact that the possible adverse consequences deriving from any research and development activity (*e.g.* the responsibility related to the products and damages to the environment) shall also be allocated to the various parts of the enterprise, therefore giving rise, where appropriate, to a compensatory charge."

Paragraph 17.4 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 35: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 35 read as follows:

"35. The area of services is the one in which difficulties may arise in determining whether in a particular case a service should be charged between the various parts of a single enterprise at its actual cost or at that cost plus a mark-up to represent a profit to the part of the enterprise providing the service. The trade of the enterprise, or part of it, may consist of the provision of such services and there may be a standard charge for their provision. In such a case it will usually be appropriate to charge a service at the same rate as is charged to the outside customer."

Paragraph 35 as it read after 17 July 2008 corresponded to paragraph 17.5. On 17 July 2008, paragraph 35 was amended and renumbered as paragraph 62 (see history of paragraph 74) and paragraph 17.5 was renumbered as paragraph 35 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.5 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 36: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 36 read as follows:

"36. Where the main activity of a permanent establishment is to provide specific services to the enterprise to which it belongs and where these services provide a real advantage to the enterprise and their costs represent a significant part of the expenses of the enterprise, the host country may require that a profit margin be included in the amount of the costs. As far as possible, the host country should then try to avoid schematic solutions and rely on the value of these services in the given circumstances of each case."

Paragraph 36 as it read after 17 July 2008 corresponded to paragraph 17.6. On 17 July 2008 paragraph 36 was renumbered as paragraph 63 (see history of paragraph 75) and

paragraph 17.6 was renumbered as paragraph 36 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.6 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 37: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 37 read as follows:

> "37. However, more commonly the provision of services is merely part of the general management activity of the company taken as a whole as where, for example, the enterprise conducts a common system of training and employees of each part of the enterprise benefit from it. In such a case it would usually be appropriate to treat the cost of providing the service as being part of the general administrative expenses of the enterprise as a whole which should be allocated on an actual cost basis to the various parts of the enterprise to the extent that the costs are incurred for the purposes of that part of the enterprise, without any mark-up to represent profit to another part of the enterprise."

Paragraph 37 as it read after 17 July 2008 corresponded to paragraph 17.7. On 17 July 2008 paragraph 37 was renumbered as paragraph 64 (see history of paragraph 76) and paragraph 17.7 was renumbered as paragraph 64 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17.7 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of a previous report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993).

Paragraph 38: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 38 read as follows:

> "38. The treatment of services performed in the course of the general management of an enterprise raises the question whether any part of the total profits of an enterprise should be deemed to arise from the exercise of good management. Consider the case of a company that has its head office in one country but carries on all its business through a permanent establishment situated in another country. In the extreme case it might well be that only the directors' meetings were held at the head office and that all other activities of the company apart from purely formal legal activities, were carried on in the permanent establishment. In such a case there is something to be said for the view that at least part of the profits of the whole enterprise arose from the skillful management and business acumen of the directors and that part of the profits of the enterprise ought, therefore, to be attributed to the country in which the head office was situated. If the company had been managed by a managing agency, then that agency would doubtless have charged a fee for its services and the fee might well have been a simple percentage participation in the profits of the enterprise. But whatever the theoretical merits of such a course, practical considerations weigh heavily against it. In the kind of case quoted the expenses of management would, of course, be set against the profits of the permanent establishment in accordance with the provisions of paragraph 3, but when the matter is looked at as a whole, it is thought that it would not be right to go further by deducting and taking into account some notional figure for "profits of management". In cases identical to the extreme case mentioned above, no account should therefore be

taken in determining taxable profits of the permanent establishment of any notional figure such as profits of management."

Paragraph 38 as it read after 17 July 2008 corresponded to paragraph 21. On 17 July 2008, paragraph 21 was amended and renumbered and replaced paragraph 38 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 21 read as follows:

"21. Another case is related to the question whether any part of the total profits of an enterprise should be deemed to arise from the exercise of good management. Consider the case of a company that has its head office in one country but carries on all its business through a permanent establishment situated in another country. In the extreme case it might well be that only the directors' meetings were held at the head office and that all other activities of the company apart from purely formal legal activities, were carried on in the permanent establishment. In such a case there is something to be said for the view that at least part of the profits of the whole enterprise arose from the skillful management and business acumen of the directors and that part of the profits of the enterprise ought, therefore, to be attributed to the country in which the head office was situated. If the company had been managed by a managing agency, then that agency would doubtless have charged a fee for its services and the fee might well have been a simple percentage participation in the profits of the enterprise. But, once again, whatever the theoretical merits of such a course, practical considerations weigh heavily against it. In the kind of case quoted the expenses of management would, of course, be set against the profits of the permanent establishment in accordance with the provisions of paragraph 3, but when the matter is looked at as a whole, it is thought that it would not be right to go further by deducting and taking into account some notional figure for "profits of management". In cases identical to the extreme case mentioned above, no account should therefore be taken in determining taxable profits of the permanent establishment of any notional figure such as profits of management."

Paragraph 21 as it read before 31 March 1994 was amended by replacing the words "The third" by "Another" at the beginning of the paragraph by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994, on the basis of Annex III of another report entitled "Attribution of Income to Permanent Establishments" (adopted by the OECD Council on 26 November 1993). After 23 July 1992 and until 31 March 1994, paragraph 21 read as follows:

"21. The third case is related to the question whether any part of the total profits of an enterprise should be deemed to arise from the exercise of good management. Consider the case of a company that has its head office in one country but carries on all its business through a permanent establishment situated in another country. In the extreme case it might well be that only the directors' meetings were held at the head office and that all other activities of the company apart from purely formal legal activities, were carried on in the permanent establishment. In such a case there is something to be said for the view that at least part of the profits of the whole enterprise arose from the skillful management and business acumen of the directors and that part of the profits of the enterprise ought, therefore, to be attributed to the country in which the head office was situated. If the company had been managed by a managing agency, then that agency would doubtless have charged a fee for its services and the fee might well have been a simple percentage participation in the profits of the enterprise. But, once again, whatever the theoretical merits of such a course, practical considerations weigh heavily against it. In the kind of case quoted the expenses of management would, of course, be set against the profits of the permanent establishment in accordance with the

provisions of paragraph 3, but when the matter is looked at as a whole, it is thought that it would not be right to go further by deducting and taking into account some notional figure for "profits of management". In cases identical to the extreme case mentioned above, no account should therefore be taken in determining taxable profits of the permanent establishment of any notional figure such as profits of management."

Paragraph 21, as it read after 23 July 1992, corresponded to paragraph 20 of the 1977 Model Convention. On 23 July 1992 paragraph 21 of the 1977 Model Convention was renumbered as paragraph 22 (see history of paragraph 39) and paragraph 20 was renumbered as paragraph 21 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 20 of the 1977 Model Convention corresponded to paragraph 18 of the 1963 Draft Convention. Paragraph 20 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was renumbered as paragraph 22 (see history of paragraph 40) and paragraph 18 of the 1963 Draft Convention was renumbered as paragraph 20 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 38 as it read after 21 September 1995 and until 17 July 2008 was deleted and the heading preceding it was relocated immediately before paragraph 65 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 21 September 1995 and until 17 July 2008, paragraph 38 read as follows:

"38. *Greece* will take into consideration the comments in paragraph 18 above where payments under the name of royalties are made to a head office by its permanent establishment."

Paragraph 38 as it read after 21 September 1995 was added by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 38 as it read before 31 March 1994 was amended and renumbered as paragraph 52 (see history of paragraph 92) by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 39: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 39 read as follows:

"39. It may be, of course, that countries where it has been customary to allocate some proportion of the total profits of an enterprise to the head office of the enterprise to represent the profits of good management will wish to continue to make such an allocation. Nothing in the Article is designed to prevent this. Nevertheless it follows from what is said in paragraph 38 above that a country in which a permanent establishment is situated is in no way required to deduct when calculating the profits attributable to that permanent establishment an amount intended to represent a proportionate part of the profits of management attributable to the head office."

Paragraph 39 as it read after 17 July 2008 corresponded to paragraph 22. On 17 July 2008 paragraph 39 as it read before 17 July 2008 was amended and renumbered as paragraph 65 (see history of paragraph 78). At the same time paragraph 22 was amended, by replacing the reference therein to "paragraph 21" with a reference to "paragraph 38", and renumbered as paragraph 39 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 July 1992 and until 17 July 2008, paragraph 22 read as follows:

"22. It may be, of course, that countries where it has been customary to allocate some proportion of the total profits of an enterprise to the head office of the enterprise to represent the profits of good management will wish to continue to make such an allocation. Nothing in the Article is designed to prevent this. Nevertheless it follows from what is said in paragraph 21 above that a country in which a permanent establishment is situated is in no way required to deduct when calculating the profits attributable to that permanent establishment an amount intended to represent a proportionate part of the profits of management attributable to the head office."

Paragraph 22, as it read after 23 July 1992, corresponded to paragraph 21 of the 1977 Model Convention. On 23 July 1992 paragraph 22 of the 1977 Model Convention was renumbered as paragraph 23 (see history of paragraph 40) and paragraph 21 was renumbered as paragraph 22, and amended by replacing the reference therein to paragraph 20 by a reference to paragraph 21 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 21 of the 1977 Model Convention corresponded to paragraph 19 of the 1963 Draft Convention. Paragraph 21 of the 1963 Draft Convention was amended and renumbered as paragraph 23 (see history of paragraph 51) of the 1977 Model Convention. At the same time paragraph 19 of the 1963 Draft Convention was amended and renumbered as paragraph 21 of the 1977 Model Convention when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 19 read as follows:

"19. It may be, of course, that countries where it has been customary to allocate some proportion of the total profits of an enterprise to the head office of the enterprise to represent the profits of good management will wish to continue to make such an allocation. Nothing in the recommendation made is designed to prevent this. Nevertheless it follows from what is said in paragraph 18 that a country in which a permanent establishment is situated is in no way required to deduct when calculating the profits attributable to that permanent establishment an amount intended to represent a proportionate part of the profits of management attributable to the head office."

Paragraph 40: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 40 read as follows:

"40. It might well be that if the country in which the head office of an enterprise is situated allocates to the head office some percentage of the profits of the enterprise only in respect of good management, while the country in which the permanent establishment is situated does not, the resulting total of the amounts charged to tax in the two countries would be greater than it should be. In any such case the country in which the head office of the enterprise is situated should take the initiative in arranging for such adjustments to be made in computing the taxation liability in that country as may be necessary to ensure that any double taxation is eliminated."

Paragraph 40 as it read after 17 July 2008 corresponded to paragraph 23. On 17 July 2008 paragraph 40 was deleted and paragraph 23 was renumbered as paragraph 40 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 23 as it read after 23 July 1992 and until 17 July 2008 corresponded to paragraph 22 of the 1977 Model Convention. Paragraph 23 of the 1977 Model Convention was renumbered as paragraph 24 (see history of paragraph 51) and

paragraph 22 was renumbered as paragraph 23 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 22 of the 1977 Model Convention corresponded to paragraph 20 of the 1963 Draft Convention. Paragraph 22 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 24 (see history of paragraph 52) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 20 of the 1963 Draft Convention was renumbered as paragraph 22 of the 1977 Model Convention.

Paragraph 40 as it read after 31 March 1994 and until 15 July 2005 was deleted by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 31 March 1994 and until 15 July 2005, paragraph 40 read as follows:

> "40. *Australia* does not recognise intra-entity transfers for tax purposes. Accordingly, Australia does not allow a mark-up for profit on dealings between permanent establishments or between a permanent establishment and its head office."

Paragraph 40 as it read before 31 March 1994 was replaced by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 40 read as follows:

> "40. While *New Zealand*, for the purpose of negotiating conventions with other member countries, accepts, in general, the principles of this Article relating to the attribution of profits to a permanent establishment, it would wish to be free to negotiate for the inclusion of specific provision governing the basis of attribution in some particular situations."

Paragraph 40 as it read after 23 July 1992 corresponded to paragraph 38 of the 1977 Model Convention. On 23 July 1992 paragraph 40 of the 1977 Model Convention was deleted and paragraph 38 was renumbered as paragraph 40 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 38 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 40 read as follows:

> "40. The *United States* believes it appropriate to provide in paragraph 2 for arm's length treatment not only with the head office of the enterprise, but also with any person controlling, controlled by, or subject to the same common control as, the enterprise. This can be accomplished by changing the phrase "separate enterprise" to "independent enterprise" and by deleting the last fourteen words."

Paragraph 40 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 40.1: Amended and renumbered as paragraph 66 (see history of paragraph 79) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 40.2: Amended and renumbered as paragraph 67 (see history of paragraph 80) on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 40.3: Amended and renumbered as paragraph 68 (see history of paragraph 81) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 41: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 41 read as follows:

"41. The treatment of interest charges raises particular issues. First, there might be amounts which, under the name of interest, are charged by a head office to its permanent establishment with respect to internal "loans" by the former to the latter. Except for financial enterprises such as banks, it is generally agreed that such internal "interest" need not be recognised. This is because:

— From the legal standpoint, the transfer of capital against payment of interest and an undertaking to repay in full at the due date is really a formal act incompatible with the true legal nature of a permanent establishment.

— From the economic standpoint, internal debts and receivables may prove to be non existent, since if an enterprise is solely or predominantly equity funded it ought not to be allowed to deduct interest charges that it has manifestly not had to pay. Whilst, admittedly, symmetrical charges and returns will not distort the enterprise's overall profits, partial results may well be arbitrarily changed."

Paragraph 41 was previously replaced on 17 July 2008. Paragraph 41 was renumbered as paragraph 75 (see history of paragraph 85), the heading preceding paragraph 41 was moved with it and a new paragraph 42 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 42 read as follows:

"42. For these reasons, the ban on deductions for internal debts and receivables should continue to apply generally, subject to the special situation of banks, as mentioned below."

Paragraph 42 was previously replaced on 17 July 2008. Paragraph 42 was renumbered as paragraph 76 (see history of paragraph 86) and a new paragraph 42 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 43: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 43 read as follows:

"43. A different issue, however, is that of the deduction of interest on debts actually incurred by the enterprise. Such debts may relate in whole or in part to the activities of the permanent establishment; indeed, loans contracted by an enterprise will serve either the head office, the permanent establishment or both. The question that arises in relation to these debts is how to determine the part of the interest that should be deducted in computing the profits attributable to the permanent establishment."

Paragraph 43 was previously replaced on 17 July 2008. Paragraph 43 was renumbered as paragraph 77 (see history of paragraph 87) and a new paragraph 43 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 44: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. At the same time the heading preceding paragraph 27 was moved immediately before paragraph 44. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 44 read as follows:

"44. The approach suggested in this Commentary before 1994, namely the direct and indirect apportionment of actual debt charges, did not prove to be a practical solution, notably since it was unlikely to be applied in a uniform manner. Also, it is well known that the indirect apportionment of total interest payment charges, or of the part of interest that remains after certain direct allocations, comes up against practical difficulties. It is also well known that direct apportionment of total interest expense may not accurately reflect the cost of financing the permanent establishment because the taxpayer may be able to control where loans are booked and adjustments may need to be made to reflect economic reality, in particular the fact that an independent enterprise would normally be expected to have a certain level of "free" capital."

Paragraph 44 was previously replaced on 17 July 2008. Paragraph 44 was renumbered as paragraph 78 (see history of paragraph 88) and a new paragraph 44 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 45: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 45 read as follows:

"45. Consequently, the majority of member countries consider that it would be preferable to look for a practicable solution that would take into account a capital structure appropriate to both the organization and the functions performed. This appropriate capital structure will take account of the fact that in order to carry out its activities, the permanent establishment requires a certain amount of funding made up of "free" capital and interest bearing debt. The objective is therefore to attribute an arm's length amount of interest to the permanent establishment after attributing an appropriate amount of "free" capital in order to support the functions, assets and risks of the permanent establishment. Under the arm's length principle a permanent establishment should have sufficient capital to support the functions it undertakes, the assets it economically owns and the risks it assumes. In the financial sector regulations stipulate minimum levels of regulatory capital to provide a cushion in the event that some of the risks inherent in the business crystallise into financial loss. Capital provides a similar cushion against crystallisation of risk in non-financial sectors."

Paragraph 45 was previously replaced on 17 July 2008. Paragraph 45 was renumbered as paragraph 79 (see history of paragraph 89) and a new paragraph 45 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 46: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 46 read as follows:

"46. As explained in section D-2 *(v)b)* of Part I of the Report *Attribution of Profits to Permanent Establishments*, there are different acceptable approaches for attributing "free" capital that are capable of giving an arm's length result. Each approach has its own strengths and weaknesses, which become more or less material depending on the facts and circumstances of particular cases. Different methods adopt different starting points for determining the amount of "free" capital attributable to a permanent establishment, which either put more emphasis on the actual structure of the enterprise of which the permanent establishment is a part or alternatively, on the capital structures of comparable independent enterprises. The key to attributing "free" capital is to recognise:

— the existence of strengths and weaknesses in any approach and when these are likely to be present;

— that there is no single arm's length amount of "free" capital, but a range of potential capital attributions within which it is possible to find an amount of "free" capital that can meet the basic principle set out above."

Paragraph 46 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 46 as it read before 21 September 1995 was amended and renumbered as paragraph 42 of the Commentary on Article 12 (see history of paragraph 42 of the Commentary on Article 12) by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 47: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 47 read as follows:

> "47. It is recognised, however, that the existence of different acceptable approaches for attributing "free" capital to a permanent establishment which are capable of giving an arm's length result can give rise to problems of double taxation. The main concern, which is especially acute for financial institutions, is that if the domestic law rules of the State where the permanent establishment is located and of the State of the enterprise require different acceptable approaches for attributing an arm's length amount of free capital to the permanent establishment, the amount of profits calculated by the State of the permanent establishment may be higher than the amount of profits calculated by the State of the enterprise for purposes of relief of double taxation."

Paragraph 47 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 47, as it read after 23 July 1992 and until 21 September 1995, was deleted by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 47 read as follows:

> "47. *Portugal* reserves the right to tax at source as royalties income from the leasing of industrial, commercial or scientific equipment and of containers, as well as income arising from technical assistance in connection with the use of, or the right to use, such equipment and containers."

Paragraph 47 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, partly on the basis of paragraph 31 of a previous report entitled *The Taxation of Income Derived from the Leasing of Industrial, Commercial and Scientific Equipment* (adopted by the OECD Council on 13 September 1983) and of paragraph 49 of another report entitled *The Taxation of Income Derived from the Leasing of Containers* (also adopted by the OECD Council on 13 September 1983).

Paragraph 48: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 48 read as follows:

> "48. Given the importance of that issue, the Committee has looked for a practical solution. OECD member countries have therefore agreed to accept, for the purposes of determining the amount of interest deduction that will be used in computing double taxation relief, the attribution of capital derived from the application of the approach used by the State in which the permanent establishment is located if the following two conditions are met: first, if the difference in capital attribution between that State and the State of the enterprise results from conflicting domestic law choices of capital attribution methods, and second, if there is agreement that the State in which the permanent establishment

is located has used an authorised approach to the attribution of capital and there is also agreement that that approach produces a result consistent with the arm's length principle in the particular case. OECD member countries consider that they are able to achieve that result either under their domestic law, through the interpretation of Articles 7 and 23 or under the mutual agreement procedure of Article 25 and, in particular, the possibility offered by that Article to resolve any issues concerning the application or interpretation of their tax treaties."

Paragraph 48 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 48 as it read after 23 July 1992 and until 21 September 1995 was deleted by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 48 read as follows:

"48. *Spain* reserves the right to tax at source as royalties payments from the leasing of industrial, commercial or scientific equipment and of containers."

Paragraph 48 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 31 of a previous report entitled *The Taxation of Income Derived from the Leasing of Industrial, Commercial and Scientific Equipment* (adopted by the OECD Council on 13 September 1983) and of paragraph 49 of another report entitled *The Taxation of Income Derived from the Leasing of Containers* (also adopted by the OECD Council on 13 September 1983).

Paragraph 49: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 49 read as follows:

"49. As already mentioned, special considerations apply to internal interest charges on advances between different parts of a financial enterprise (*e.g.* a bank), in view of the fact that making and receiving advances is closely related to the ordinary business of such enterprises. This problem, as well as other problems relating to the application of Article 7 to the permanent establishments of banks and enterprises carrying on global trading, is discussed in Parts II and III of the *Report Attribution of Profits to Permanent Establishments*."

Paragraph 49 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 49 as it read before 21 September 1995 was renumbered as paragraph 46 of the Commentary on Article 12 (see history of paragraph 46 of the Commentary on Article 12) by the report entitled "The 1995 Update to the Model Tax Convention", which was adopted by the OECD Council on 21 September 1995.

Paragraph 50: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 50 read as follows:

"50. The determination of the investment assets attributable to a permanent establishment through which insurance activities are carried on also raises particular issues, which are discussed in Part IV of the Report."

Paragraph 50 was previously replaced on 17 July 2008. Paragraph 50 as it read before 17 July 2008 was renumbered as paragraph 80 (see history of paragraph 90) and a new paragraph 50 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

Paragraph 51: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 51 read as follows:

"51. It is usually found that there are, or there can be constructed, adequate accounts for each part or section of an enterprise so that profits and expenses, adjusted as may be necessary, can be allocated to a particular part of the enterprise with a considerable degree of precision. This method of allocation is, it is thought, to be preferred in general wherever it is reasonably practicable to adopt it. There are, however, circumstances in which this may not be the case and paragraphs 2 and 3 are in no way intended to imply that other methods cannot properly be adopted where appropriate in order to arrive at the profits of a permanent establishment on a "separate enterprise" footing. It may well be, for example, that profits of insurance enterprises can most conveniently be ascertained by special methods of computation, *e.g.* by applying appropriate co-efficients to gross premiums received from policy holders in the country concerned. Again, in the case of a relatively small enterprise operating on both sides of the border between two countries, there may be no proper accounts for the permanent establishment nor means of constructing them. There may, too, be other cases where the affairs of the permanent establishment are so closely bound up with those of the head office that it would be impossible to disentangle them on any strict basis of branch accounts. Where it has been customary in such cases to estimate the arm's length profit of a permanent establishment by reference to suitable criteria, it may well be reasonable that that method should continue to be followed, notwithstanding that the estimate thus made may not achieve as high a degree of accurate measurement of the profit as adequate accounts. Even where such a course has not been customary, it may, exceptionally, be necessary for practical reasons to estimate the arm's length profits based on other methods."

Paragraph 51 as it read after 17 July 2008 corresponded to paragraph 24. On 17 July 2008 paragraph 51 was renumbered as paragraph 81 (see history of paragraph 91) and paragraph 24 was renumbered as paragraph 51 and amended, by inserting the words, "based on other methods", at the end of the paragraph, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 July 1992 and until 17 July 2008, paragraph 24 read as follows:

"24. It is usually found that there are, or there can be constructed, adequate accounts for each part or section of an enterprise so that profits and expenses, adjusted as may be necessary, can be allocated to a particular part of the enterprise with a considerable degree of precision. This method of allocation is, it is thought, to be preferred in general wherever it is reasonably practicable to adopt it. There are, however, circumstances in which this may not be the case and paragraphs 2 and 3 are in no way intended to imply that other methods cannot properly be adopted where appropriate in order to arrive at the profits of a permanent establishment on a "separate enterprise" footing. It may well be, for example, that profits of insurance enterprises can most conveniently be ascertained by special methods of computation, *e.g.* by applying appropriate co-efficients to gross premiums received from policy holders in the country concerned. Again, in the case of a relatively small enterprise operating on both sides of the border between two countries, there may be no proper accounts for the permanent establishment nor means of constructing them. There may, too, be other cases where the affairs of the permanent establishment are so closely bound up with those of the head office that it would be impossible to disentangle them on any strict basis of branch accounts. Where it has been customary in such cases to estimate the arm's length profit of a permanent establishment by reference to suitable criteria, it may well be reasonable that that method should continue to be followed, notwithstanding that

the estimate thus made may not achieve as high a degree of accurate measurement of the profit as adequate accounts. Even where such a course has not been customary, it may, exceptionally, be necessary for practical reasons to estimate the arm's length profits."

Paragraph 24 as it read after 23 July 1992 corresponded to paragraph 23 of the 1977 Model Convention. On 23 July 1992 paragraph 24 of the 1977 Model Convention was renumbered as paragraph 25 (see history of paragraph 52), the heading preceding paragraph 24 was moved with it and paragraph 23 was renumbered as paragraph 24 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 23 of the 1977 Model Convention corresponded to paragraph 21 of the 1963 Draft Convention. Paragraph 23 of the 1963 Draft Convention was renumbered as paragraph 25 (see history of paragraph 53) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 21 of the 1963 Draft Convention was amended and renumbered as paragraph 23 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 21 read as follows:

"21. It is usually found that there are, or there can be constructed, adequate accounts for each part or section of an enterprise so that profits and expenses, adjusted as may be necessary, can be allocated to a particular part of the enterprise with a considerable degree of precision. This method of allocation is, it is thought, to be preferred in general wherever it is reasonably practicable to adopt it. There are, however, circumstances in which this may not be the case, and paragraphs 2 and 3 are in no way intended to imply that other methods cannot properly be adopted where appropriate in order to arrive at the profits of a permanent establishment on a "separate enterprise" footing. It may well be, for example, that profits of insurance enterprises can most conveniently be ascertained by special methods of computation, *e.g.* by applying appropriate coefficients to gross premiums received from policy holders in the country concerned. Again, in the case of a relatively undeveloped enterprise operating on both sides of a land frontier, there may be no proper accounts for the permanent establishment nor means of constructing them. There may, too, be other cases where the affairs of the permanent establishment are so closely bound up with those of the head office that it would be impossible to disentangle them on any strict basis of branch accounts. Where it has been customary in such cases to estimate the arm's length profit of a permanent establishment by reference to suitable criteria, it may well be reasonable that that method should continue to be followed, notwithstanding that the estimate thus made may not achieve as high a degree of accurate measurement of the profit as adequate accounts. Even where such a course has not been customary, it may, exceptionally, be necessary for practical reasons to estimate the arm's length profits."

Paragraph 52: Replaced and the preceding heading was deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until they were deleted on 22 July 2010, paragraph 52 and the preceding heading read as follows:

"Paragraph 4

52. It has in some cases been the practice to determine the profits to be attributed to a permanent establishment not on the basis of separate accounts or by making an estimate of arm's length profit, but simply by apportioning the total profits of the enterprise by reference to various formulae. Such a method differs from those envisaged in paragraph 2, since it contemplates not an

attribution of profits on a separate enterprise footing, but an apportionment of total profits; and indeed it might produce a result in figures which would differ from that which would be arrived at by a computation based on separate accounts. Paragraph 4 makes it clear that such a method may continue to be employed by a Contracting State if it has been customary in that State to adopt it, even though the figure arrived at may at times differ to some extent from that which would be obtained from separate accounts, provided that the result can fairly be said to be in accordance with the principles contained in the Article. It is emphasized, however, that in general the profits to be attributed to a permanent establishment should be determined by reference to the establishment's accounts if these reflect the real facts. It is considered that a method of allocation which is based on apportioning total profits is generally not as appropriate as a method which has regard only to the activities of the permanent establishment and should be used only where, exceptionally, it has as a matter of history been customary in the past and is accepted in the country concerned both by the taxation authorities and taxpayers generally there as being satisfactory. It is understood that paragraph 4 may be deleted where neither State uses such a method. Where, however, Contracting States wish to be able to use a method which has not been customary in the past the paragraph should be amended during the bilateral negotiations to make this clear."

Paragraph 52 as it read after 17 July 2008 corresponded to paragraph 25. On 17 July 2008 paragraph 52 as it read before 17 July 2008 was renumbered as paragraph 82 (see history of paragraph 92), paragraph 25 was renumbered as paragraph 52 and the heading preceding paragraph 25 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 25 as it read after 23 July 1992 corresponded to paragraph 24 of the 1977 Model Convention. On 23 July 1992 paragraph 25 of the 1977 Model Convention was renumbered as paragraph 26 (see history of paragraph 53), paragraph 24 was renumbered as paragraph 25 and the preceding heading was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 24 of the 1977 Model Convention corresponded to paragraph 22 of the 1963 Draft Convention. Paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 26 (see history of paragraph 54) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 22 of the 1963 Draft Convention was amended and renumbered as paragraph 24 and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 22 read as follows:

"22. It has in some cases been the practice to determine the profits to be attributed to a permanent establishment not on the basis of separate accounts or by making an estimate of arm's length profit, but simply by apportioning the total profits of the enterprise by reference to various formulae. Such a method differs from those envisaged in paragraph 2 of the Article, since it contemplates not an attribution of profits on a separate enterprise footing, but an apportionment of total profits: and indeed it might produce a result in figures which would differ from that which would be arrived at by a computation based on separate accounts. Paragraph 4 makes it clear that such a method may continue to be employed by a Contracting State if it has been customary in that State to adopt it, even though the figure arrived at may at times differ to some extent from that which would be obtained from separate accounts, provided that the result can fairly be said to be in accordance with the principles embodied in the Article. It is considered, however, that a method of allocation which is based on apportioning total profits is generally

not as appropriate as a method which has regard only to the activities of the permanent establishment, and should be used only where, exceptionally, it has as a matter of history been customary in the past and is accepted in the country concerned both by the taxation authorities and taxpayers generally there as being satisfactory."

Paragraph 53: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 53 read as follows:

"53. It would not, it is thought, be appropriate within the framework of this Commentary to attempt to discuss at length the many various methods involving apportionment of total profits that have been adopted in particular fields for allocating profits. These methods have been well documented in treatises on international taxation. It may, however, not be out of place to summarise briefly some of the main types and to lay down some very general directives for their use."

Paragraph 53 as it read after 17 July 2008 corresponded to paragraph 26. On 17 July 2008 paragraph 26 was renumbered as paragraph 53 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 26 as it read after 23 July 1992 corresponded to paragraph 25 of the 1977 Model Convention. On 23 July 1992 paragraph 26 of the 1977 Model Convention was renumbered as paragraph 27 (see history of paragraph 54) and paragraph 25 was renumbered as paragraph 26 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 25 of the 1977 Model Convention corresponded to paragraph 23 of the 1963 Draft Convention. Paragraph 25 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 27 (see history of paragraph 55) and paragraph 23 was renumbered as paragraph 25 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 53 as it read after 31 March 1994 and until 29 April 2000 was deleted by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 31 March 1994 and until 29 April 2000 paragraph 53 read as follows:

"53. *Australia* reserves the right to include a provision that will permit resort to domestic law in relation to the taxation of the profit of an insurance enterprise."

Paragraph 53, as it read after 31 March 1994 corresponded to paragraph 39. Paragraph 39 was amended and renumbered as paragraph 53 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994 paragraph 39 read as follows:

"39. *Australia* would wish that in this Article there be provision that will permit resort to domestic law in relation to the taxation of the profit of an insurance enterprise."

Paragraph 39 as it read after 23 July 1992 corresponded to paragraph 37 of the 1977 Model Convention. On 23 July 1992 paragraph 39 of the 1977 Model Convention was renumbered as paragraph 41 (see history of paragraph 85), the heading preceding paragraph 39 was moved with it and paragraph 37 was renumbered as paragraph 39 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 37 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 54: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2010 and until it was deleted on 22 July 2010, paragraph 54 read as follows:

> "54. The essential character of a method involving apportionment of total profits is that a proportionate part of the profits of the whole enterprise is allocated to a part thereof, all parts of the enterprise being assumed to have contributed on the basis of the criterion or criteria adopted to the profitability of the whole. The difference between one such method and another arises for the most part from the varying criteria used to determine what is the correct proportion of the total profits. It is fair to say that the criteria commonly used can be grouped into three main categories, namely those which are based on the receipts of the enterprise, its expenses or its capital structure. The first category covers allocation methods based on turnover or on commission, the second on wages and the third on the proportion of the total working capital of the enterprise allocated to each branch or part. It is not, of course, possible to say *in vacuo* that any of these methods is intrinsically more accurate than the others; the appropriateness of any particular method will depend on the circumstances to which it is applied. In some enterprises, such as those providing services or producing proprietary articles with a high profit margin, net profits will depend very much on turnover. For insurance enterprises it may be appropriate to make an apportionment of total profits by reference to premiums received from policy holders in each of the countries concerned. In the case of an enterprise manufacturing goods with a high cost raw material or labour content, profits may be found to be related more closely to expenses. In the case of banking and financial concerns the proportion of total working capital may be the most relevant criterion. It is considered that the general aim of any method involving apportionment of total profits ought to be to produce figures of taxable profit that approximate as closely as possible to the figures that would have been produced on a separate accounts basis, and that it would not be desirable to attempt in this connection to lay down any specific directive other than that it should be the responsibility of the taxation authority, in consultation with the authorities of other countries concerned, to use the method which in the light of all the known facts seems most likely to produce that result."

Paragraph 54 as it read after 17 July 2008 corresponded to paragraph 27. On 17 July 2008 paragraph 54 was renumbered as paragraph 83 (see history of paragraph 93) and paragraph 27 was renumbered as paragraph 54 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 27 as it read after 23 July 1992 corresponded to paragraph 26 of the 1977 Model Convention. On 23 July 1992 paragraph 27 of the 1977 Model Convention was renumbered as paragraph 28 (see history of paragraph 55) and paragraph 26 was renumbered as paragraph 27 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 26 of the 1977 Model Convention corresponded to paragraph 24 of the 1963 Draft Convention. Paragraph 26 of the 1963 Draft Convention was amended and renumbered as paragraph 28 (see history of paragraph 56) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 26 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 24 read as follows:

> "24. The essential character of a method involving apportionment of total profits is that a proportionate part of the profits of the whole enterprise is allocated to a part thereof, all parts of the enterprise being assumed to have contributed on the basis of the criterion or criteria adopted to the profitability of the whole. The

difference between one such method and another arises for the most part from the varying criteria used to determine what is the correct proportion of the total profits. It is fair to say that the criteria commonly used can be grouped into three main categories, namely those which are based on the receipts of the enterprise, its expenses or its capital structure. The first category covers allocation methods based on turnover or on commission, the second on wages and the third on the proportion of the total working capital of the enterprise allocated to each branch or part. It is not, of course, possible to say in vacuo that any of these methods is intrinsically more accurate than the others; the appropriateness of any particular method will depend on the circumstances to which it is applied. In some enterprises, such as those providing services or producing proprietary articles with a high profit margin, net profits will depend very much on turnover. For insurance enterprises it may be appropriate to make an apportionment of total income by reference to premiums received from policy holders in each of the countries concerned. In the case of an enterprise manufacturing goods with a high cost raw material or labour content profits may be found to be related more closely to expenses. In the case of banking and financial concerns the proportion of total working capital may be the most relevant criterion. It is considered that the general aim of any method involving apportionment of total profits ought to be to produce figures of taxable profit that approximate as closely as possible to the figures that would have been produced on a separate accounts basis, and that it would not be desirable to attempt in this connection to lay down any specific directive other than that it should be the responsibility of the taxation authority, in consultation with the authorities of other countries concerned, to use the method which in the light of all the known facts seems most likely to produce that result."

Paragraph 55: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 55 read as follows:

"55. The use of any method which allocates to a part of an enterprise a proportion of the total profits of the whole does, of course, raise the question of the method to be used in computing the total profits of the enterprise. This may well be a matter which will be treated differently under the laws of different countries. This is not a problem which it would seem practicable to attempt to resolve by laying down any rigid rule. It is scarcely to be expected that it would be accepted that the profits to be apportioned should be the profits as they are computed under the laws of one particular country; each country concerned would have to be given the right to compute the profits according to the provisions of its own laws."

Paragraph 55 as it read after 17 July 2008 corresponded to paragraph 28. On 17 July 2008 paragraph 28 was renumbered as paragraph 55 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 28 as it read after 23 July 1992 corresponded to paragraph 27 of the 1977 Model Convention. On 23 July 1992 paragraph 28 of the 1977 Model Convention was renumbered as paragraph 29 (see history of paragraph 56), the heading preceding paragraph 28 was moved with it and paragraph 27 was renumbered as paragraph 28 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 27 of the 1977 Model Convention corresponded to paragraph 25 of the 1963 Draft Convention. Paragraph 27 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 29 (see history of paragraph 55) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 25 of the 1963 Draft Convention was amended and renumbered as paragraph 27 of the 1977 Model Convention. In the 1963

Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 25 read as follows:

"25. The use of any method which allocates to a part of an enterprise a proportion of the total profits of the whole does, of course, raise the question of the method to be used in computing the total profits of the enterprise. This may well be a matter which will be treated differently under the laws of different countries. This is not a problem which it would seem practicable to attempt to resolve by laying down any rigid rule. It is scarcely to be expected that it would be accepted that the profits to be apportioned should be the profits as they are computed under the laws of one particular country; each country concerned would have to be given the right to compute the profits according to the provisions of its own law."

Paragraph 56: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. At the same time the heading preceding paragraph 56 was deleted. After 17 July 2008 and until they were deleted on 22 July 2010, paragraph 56 and the preceding heading read as follows:

"*Paragraph 5*

56. In paragraph 4 of Article 5 there are listed a number of examples of activities which, even though carried on at a fixed place of business, are deemed not to be included in the term "permanent establishment". In considering rules for the allocation of profits to a permanent establishment the most important of these examples is the activity mentioned in paragraph 5 of this Article, *i.e.* the purchasing office."

Paragraph 56 as it read after 17 July 2008 corresponded to paragraph 29. On 17 July 2008 paragraph 29 was renumbered as paragraph 56 and the heading preceding paragraph 29 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 29 as it read after 23 July 1992 corresponded to paragraph 28 of the 1977 Model Convention. On 23 July 1992 paragraph 29 of the 1977 Model Convention was renumbered as paragraph 30 (see history of paragraph 57), paragraph 28 was renumbered as paragraph 29 and the heading preceding paragraph 28 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 28 of the 1977 Model Convention corresponded to paragraph 26 of the 1963 Draft Convention. Paragraph 28 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was renumbered as paragraph 30 (see history of paragraph 58) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 26 of the 1963 Draft Convention was amended and renumbered as paragraph 28 and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 26 read as follows:

"26. In paragraph 3 of Article 5 defining the concept of permanent establishment there are listed a number of examples of activities which, even though carried on at a fixed place of business, are not to be deemed to be included in the term "permanent establishment". In considering rules for the allocation of profits to a permanent establishment the most important of these examples is the activity mentioned in paragraph 5 of the present Article, *i.e.* the purchasing office."

Paragraph 57: Replaced paragraph 57 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 57 read as follows:

"57. Paragraph 5 is not, of course, concerned with the organisation established solely for purchasing; such an organisation is not a permanent establishment and the profits allocation provisions of this Article would not therefore come into play. The paragraph is concerned with a permanent establishment which, although carrying on other business, also carries on purchasing for its head office. In such a case the paragraph provides that the profits of the permanent establishment shall not be increased by adding to them a notional figure for profits from purchasing. It follows, of course, that any expenses that arise from the purchasing activities will also be excluded in calculating the taxable profits of the permanent establishment."

Paragraph 57 as it read after 17 July 2008 corresponded to paragraph 30. On 17 July 2008 paragraph 30 was renumbered as paragraph 57 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 30 as it read after 23 July 1992 corresponded to paragraph 29 of the 1977 Model Convention. On 23 July 1992 paragraph 30 of the 1977 Model Convention was renumbered as paragraph 31 (see history of paragraph 58), the heading preceding paragraph 30 was moved with it and paragraph 29 was renumbered as paragraph 30 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 29 of the 1977 Model Convention corresponded to paragraph 27 of the 1963 Draft Convention. Paragraph 29 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 31 (see history of paragraph 71) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 27 of the 1963 Draft Convention was amended and renumbered as paragraph 29 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 27 read as follows:

"27. This present paragraph is not, of course, concerned with the organisation established solely for purchasing; such an organisation is not a permanent establishment and the profits allocation provisions of this Article would not therefore come into play. The paragraph is concerned with a permanent establishment which although carrying on other business also carries on purchasing for its head office. In such a case the paragraph provides that the profits of the permanent establishment shall not be increased by adding to them a notional figure for profits from purchasing. It follows, of course, that any expenses that arise from the purchasing activities will also be excluded in calculating the taxable profits of the permanent establishment."

Paragraph 58: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. At the same time the heading preceding paragraph 58 was deleted. After 17 July 2008 and until they were deleted on 22 July 2010, paragraph 58 and the preceding heading read as follows:

"*Paragraph 6*

58. This paragraph is intended to lay down clearly that a method of allocation once used should not be changed merely because in a particular year some other method produces more favourable results. One of the purposes of a double taxation convention is to give an enterprise of a Contracting State some degree of certainty about the tax treatment that will be accorded to its permanent establishment in the other Contracting State as well as to the part of it in its home State which is dealing with the permanent establishment; for this reason, paragraph 6 gives an assurance of continuous and consistent tax treatment."

Paragraph 58 as it read after 17 July 2008 corresponded to paragraph 31. On 17 July 2008 paragraph 31 was renumbered as paragraph 58 and the heading preceding paragraph 31 was moved with it by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008.

Paragraph 31 as it read after 23 July 1992 corresponded to paragraph 30 of the 1977 Model Convention. On 23 July 1992 paragraph 31 of the 1977 Model Convention was renumbered as paragraph 32 (see history of paragraph 71), the heading preceding paragraph31 was moved with it, paragraph 30 was renumbered as paragraph 31 and the heading preceding paragraph 30 was moved with it by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 30 of the 1977 Model Convention corresponded to paragraph 28 of the 1963 Draft Convention. Paragraph 30 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) was amended and renumbered as paragraph 32 (see history of paragraph 72) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 28 of the 1963 Draft Convention was renumbered as paragraph 30 and the preceding heading was moved with it.

Paragraph 59: Replaced paragraph 59 as it read before 22 July 2010. On 22 July 2010 paragraph 59 was renumbered as paragraph 71 (see history of paragraph 71), the heading preceding paragraph 59 was amended and moved with it and a new paragraph 59 was added by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010.

Paragraph 60: Replaced paragraph 60 as it read before 22 July 2010. On 22 July 2010 paragraph 60 was amended and renumbered as paragraph 72 (see history of paragraph 72) and a new paragraph 60 was added by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010.

Paragraph 61: Replaced paragraph 61 as it read before 22 July 2010. On 22 July 2010 paragraph 61 was renumbered as paragraph 73 (see history of paragraph 73) and a new paragraph 61 was added by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010.

Paragraph 62: Replaced paragraph 62 as it read before 22 July 2010. On 22 July 2010 paragraph 62 was amended and renumbered as paragraph 74 (see history of paragraph 74) and a new paragraph 62 was added by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010.

Paragraph 63: Replaced paragraph 63 as it read before 22 July 2010. On 22 July 2010 paragraph 63 was amended and renumbered as paragraph 75 (see history of paragraph 75) and a new paragraph 63 was added by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010.

Paragraph 64: Replaced paragraph 64 as it read before 22 July 2010. On 22 July 2010 paragraph 64 was amended and renumbered as paragraph 76 (see history of paragraph 76) and a new paragraph 64 was added by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010.

Paragraph 65: Replaced paragraph 65 as it read before 22 July 2010. On 22 July 2010 paragraph 65 was amended and renumbered as paragraph 78 (see history of paragraph 78), the preceding heading was moved with it and a new paragraph 65 was added by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010.

Paragraph 66: Replaced paragraph 66 as it read before 22 July 2010. On 22 July 2010 paragraph 66 was amended and renumbered as paragraph 79 (see history of paragraph 79) and a new paragraph 66 was added by the report entitled “The 2010 Update to the Model Tax Convention”, adopted by the OECD Council on 22 July 2010.

Paragraph 67: Replaced paragraph 67 as it read before 22 July 2010. On 22 July 2010 paragraph 67 was amended and renumbered as paragraph 80 (see history of paragraph 80) and a new paragraph 67 was added by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 68: Replaced paragraph 68 as it read before 22 July 2010. On 22 July 2010 paragraph 68 was amended and renumbered as paragraph 81 (see history of paragraph 81) and a new paragraph 68 was added by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 69: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 69 read as follows:

> "69. With regard to paragraph 45, Greece notes that the Greek internal law does not foresee any rules or methods for attributing "free" capital to permanent establishments. Concerning loans contracted by an enterprise that relate in whole or in part to the activities of the permanent establishment, Greece allows as deduction the part of the interest which corresponds to the amount of a loan contracted by the head office and actually remitted to the permanent establishment."

Paragraph 69 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 70: Replaced on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until it was deleted on 22 July 2010, paragraph 70 read as follows:

> "70. *Portugal* wishes to reserve its right not to follow the position expressed in paragraph 45 of the Commentary on Article 7 except whenever there are specific domestic provisions foreseeing certain levels of "free" capital for permanent establishments."

Paragraph 70 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 71: Corresponds to paragraph 59, as it read before 22 July 2010. Paragraph 71, was deleted and paragraph 59 was renumbered as paragraph 71 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010. At the same time the heading preceding paragraph 59 was renumbered "Paragraph 4" and moved with it.

Paragraph 59 as it read after 17 July 2008 corresponded to paragraph 32. On 17 July 2008 paragraph 32 was renumbered as paragraph 59 and the heading preceding paragraph 32 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 32 as it read after 23 July 1992 corresponded to paragraph 31 of the 1977 Model Convention. On 23 July 1992 paragraph 32 of the 1977 Model Convention was renumbered as paragraph 33 (see history of paragraph 72), paragraph 31 was renumbered as paragraph 32 and the heading preceding paragraph 31 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 31 of the 1977 Model Convention corresponded to paragraph 29 of the 1963 Draft Convention. Paragraph 31 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 33 (see history of paragraph 73) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 29 of the 1963 Draft Convention was amended and renumbered as paragraph 29 and the preceding heading was moved

with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 29 read as follows:

> "29. Although it has not been found necessary in this Convention to define the term "profits", it should nevertheless be understood that the term when used in this Article and elsewhere in the Convention has a broad meaning including all income derived in carrying on an enterprise. Such a broad meaning corresponds to the use of the term made in the tax laws of most Member States."

Paragraph 71, as it read after 17 July 2008 and until it was deleted on 22 July 2010, read as follows:

> "71. With regard to paragraph 46, *Sweden* wishes to clarify that it does not consider that the different approaches for attributing "free" capital that the paragraph refers to as being "acceptable" will necessarily lead to a result in accordance with the arm's length principle. Consequently, when looking at the facts and circumstances of each case in order to determine whether the amount of interest deduction resulting from the application of these approaches conforms to the arm's length principle, Sweden in many cases would not consider that the other States' approach conforms to the arm's length principle. Sweden is of the opinion that double taxation will therefore often occur, requiring the use of the mutual agreement procedure."

Paragraph 71 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 72: Corresponds to paragraph 60, as it read before 22 July 2010. Paragraph 72, was deleted and paragraph 60 was amended and renumbered as paragraph 72 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 60 read as follows:

> "60. This interpretation of the term "profits", however, may give rise to some uncertainty as to the application of the Convention. If the profits of an enterprise include categories of income which are treated separately in other Articles of the Convention, *e.g.* dividends, it may be asked whether the taxation of those profits is governed by the special Article on dividends etc., or by the provisions of this Article."

Paragraph 60 as it read after 17 July 2008 corresponded to paragraph 33. On 17 July 2008 paragraph 33 was renumbered as paragraph 60 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 33 as it read after 23 July 1992 corresponded to paragraph 32 of the 1977 Model Convention. On 23 July 1992 paragraph 33 of the 1977 Model Convention was amended and renumbered as paragraph 34 (see history of paragraph 73) and paragraph 32 was renumbered as paragraph 33 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 32 of the 1977 Model Convention corresponded to paragraph 30 of the 1963 Draft Convention. Paragraph 32 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 34 (see history of paragraph 74) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 30 of the 1963 Draft Convention was amended and renumbered as paragraph 32 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 30 read as follows:

> "30. This interpretation of the term "profits", however, may give rise to some uncertainty as to the application of the Convention. If the profits of an enterprise include categories of income which are treated separately in other Articles of the

Convention, *e.g.* dividends, it may be asked whether the taxation of those profits is governed by the special Article on dividends etc. or by the provisions of the present Article."

Paragraph 72 as it read after 17 July 2008 and until it was deleted on 22 July 2010, read as follows:

"72. *Portugal* wishes to reserve its right not to follow the "symmetry" approach described in paragraph 48 of the Commentary on Article 7, insofar as the Portuguese internal law does not foresee any rules or methods for attributing "free" capital to permanent establishments. In eliminating double taxation according to Article 23, Portugal, as the home country, determines the amount of profits attributable to a permanent establishment according to the domestic law."

Paragraph 72 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 73: Corresponds to paragraph 61, as it read before 22 July 2010. Paragraph 73 was deleted and paragraph 61 was amended and renumbered as paragraph 73 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 61 read as follows:

"61. To the extent that an application of this Article and the special Article concerned would result in the same tax treatment, there is little practical significance to this question. Further, it should be noted that some of the special Articles contain specific provisions giving priority to a specific Article (see paragraph 4 of Article 6, paragraph 4 of Articles 10 and 11, paragraph 3 of Article 12, and paragraph 2 of Article 21)."

Paragraph 61 as it read after 17 July 2008 corresponded to paragraph 34. On 17 July 2008 paragraph 34 was renumbered as paragraph 61 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 34 as it read after 23 July 1992 corresponded to paragraph 33 of the 1977 Model Convention. On 23 July 1992 paragraph 34 of the 1977 Model Convention was amended and renumbered as paragraph 35 (see history of paragraph 74) and paragraph 33 was amended, by substituting the word "noted" for "noticed" in the second sentence, and renumbered as paragraph 34 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 33 of the 1977 Model Convention corresponded to paragraph 31 of the 1963 Draft Convention. Paragraph 33 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 35 (see history of paragraph 75) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 31 of the 1963 Draft Convention was amended and renumbered as paragraph 33 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 31 read as follows:

"31. To the extent that an application of the present Article and the special Article concerned would result in the same tax treatment, there is little practical significance to this question. Further, it should be noticed that some of the special Articles contain specific provisions giving priority to a specific Article (cf. paragraphs 3 and 4 of Article 7, paragraph 4 of Articles 10 and 11 and paragraph 3 of Article 12)."

Paragraph 73, as it read after 17 July 2008 and until it was deleted on 22 July 2010, read as follows:

"73. *Germany*, *Japan* and the *United States*, whilst agreeing to the practical solution described in paragraph 48, wish to clarify how this agreement will be

implemented. Neither Germany, nor Japan, nor the United States can automatically accept for all purposes all calculations by the State in which the permanent establishment is located. In cases involving Germany or Japan, the second condition described in paragraph 48 has to be satisfied through a mutual agreement procedure under Article 25. In the case of Japan and the United States, a taxpayer who seeks to obtain additional foreign tax credit limitation must do so through a mutual agreement procedure in which the taxpayer would have to prove to the Japanese or the United States competent authority, as the case may be, that double taxation of the permanent establishment profits which resulted from the conflicting domestic law choices of capital attribution methods has been left unrelieved after applying mechanisms under their respective domestic tax law such as utilisation of foreign tax credit limitation created by other transactions."

Paragraph 73 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 74: Corresponds to paragraph 62, as it read before 22 July 2010. Paragraph 74, was deleted and paragraph 62 was amended and renumbered as paragraph 74 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 62 read as follows:

"62. It has seemed desirable, however, to lay down a rule of interpretation in order to clarify the field of application of this Article in relation to the other Articles dealing with a specific category of income. In conformity with the practice generally adhered to in existing bilateral conventions, paragraph 7 gives first preference to the special Articles on dividends, interest etc. It follows from the rule that this Article will be applicable to business profits which do not belong to categories of income covered by the special Articles, and, in addition, to dividends, interest etc. which under paragraph 4 of Articles 10 and 11, paragraph 3 of Article 12 and paragraph 2 of Article 21, fall within this Article (cf. paragraphs 12 to 18 of the Commentary on Article 12 which discuss the principles governing whether, in the particular case of computer software, payments should be classified as business profits within Article 7 or as a capital gain within Article 13 on the one hand or as royalties within Article 12 on the other). It is understood that the items of income covered by the special Articles may, subject to the provisions of the Convention, be taxed either separately, or as business profits, in conformity with the tax laws of the Contracting States."

Paragraph 62 as it read after 17 July 2008 corresponded to paragraph 35. Paragraph 35 was amended and renumbered as paragraph 62 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 35 read as follows:

"35. It has seemed desirable, however, to lay down a rule of interpretation in order to clarify the field of application of this Article in relation to the other Articles dealing with a specific category of income. In conformity with the practice generally adhered to in existing bilateral conventions, paragraph 7 gives first preference to the special Articles on dividends, interest etc. It follows from the rule that this Article will be applicable to business profits which do not belong to categories of income covered by the special Articles, and, in addition, to dividends, interest etc. which under paragraph 4 of Articles 10 and 11, paragraph 3 of Article 12 and paragraph 2 of Article 21, fall within this Article (cf. paragraphs 12 to 18 of the Commentary on Article 12 which discusses the principles governing whether, in the particular case of computer software, payments should be classified as income within Articles 7 or as a capital gains matter within Article 13 on the one hand or as royalties within Article 12 on the other). It is understood that the items of income covered by the special Articles may, subject to the provisions of the

Convention, be taxed either separately, or as business profits, in conformity with the tax laws of the Contracting States."

Paragraph 35 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 35 read as follows:

"35. It has seemed desirable, however, to lay down a rule of interpretation in order to clarify the field of application of this Article in relation to the other Articles dealing with a specific category of income. In conformity with the practice generally adhered to in existing bilateral conventions, paragraph 7 gives first preference to the special Articles on dividends, interest etc. It follows from the rule that this Article will be applicable to industrial and commercial income which does not belong to categories of income covered by the special Articles, and, in addition, to dividends, interest etc. which under paragraph 4 of Articles 10 and 11, paragraph 3 of Article 12 and paragraph 2 of Article 21, fall within this Article (cf. paragraphs 12 to 18 of the Commentary on Article 12 which discusses the principles governing whether, in the particular case of computer software, payments should be classified as commercial income within Articles 7 or 14 or as a capital gains matter within Article 13 on the one hand or as royalties within Article 12 on the other). It is understood that the items of income covered by the special Articles may, subject to the provisions of the Convention, be taxed either separately, or as industrial and commercial profits, in conformity with the tax laws of the Contracting States."

Paragraph 35 as it read after 23 July 1992 corresponded to paragraph 34 of the 1977 Model Convention. On 23 July 1992 paragraph 35 of the 1977 Model Convention was renumbered as paragraph 36 (see history of paragraph 75) and paragraph 34 was amended and renumbered as paragraph 35 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Appendix 3 of the Report entitled "The Tax Treatment of Software", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 34 read as follows:

"34. It has seemed desirable, however, to lay down a rule of interpretation in order to clarify the field of application of the present Article in relation to the other Articles dealing with a specific category of income. In conformity with the practice generally adhered to in existing bilateral conventions, paragraph 7 gives first preference to the special Articles on dividends, interest etc. It follows from the rule that this Article will be applicable to industrial and commercial income which does not belong to categories of income covered by the special Articles, and, in addition, to dividends, interest etc. which under paragraph 4 of Articles 10 and 11, paragraph 3 of Article 12 and paragraph 2 of Article 21, fall within this Article. It is understood that the items of income covered by the special Articles may, subject to the provisions of the Convention, be taxed either separately, or as industrial and commercial profits, in conformity with the tax laws of the Contracting States."

Paragraph 34 of the 1977 Model Convention corresponded to paragraph 32 of the 1963 Draft Convention. Paragraph 32 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 32 read as follows:

> "32. It has seemed desirable, however, to lay down a rule of interpretation in order to clarify the field of application of the present Article in relation to the other Articles dealing with a specific category of income. In conformity with the practice generally adhered to in existing bilateral Conventions paragraph 7 of the present Article gives first preference to the special Articles on dividends, interest etc. It follows from the rule that the present Article will be applicable to industrial and commercial income which does not belong to categories of income covered by the special Articles and, in addition, to dividends, interest and royalties which under paragraph 4 of Articles 10 and 11 and paragraph 3 of Article 12 fall within the present Article. It is understood that the items of income covered by the special Articles may, subject to the provisions of the Convention, be taxed either separately, or as industrial and commercial profits, in conformity with the tax laws of the Contracting States."

Paragraph 74 as it read after 17 July 2008 and until it was deleted on 22 July 2010, read as follows:

> "74. With reference to paragraphs 6 and 7, *New Zealand* notes that it does not agree with the approach put forward on the attribution of profits to permanent establishments in general, as reflected in Part I of the Report *Attribution of Profits to Permanent Establishments*."

Paragraph 74 was added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 75: Corresponds to paragraph 63 as it read before 22 July 2010. On 22 July 2010 paragraph 75 was amended and renumbered as paragraph 85 (see history of paragraph 85) and the preceding heading was moved with it. At the same time paragraph 63 was amended and renumbered as paragraph 75 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 63 read as follows:

> "63. It is open to Contracting States to agree bilaterally upon special explanations or definitions concerning the term "profits" with a view to clarifying the distinction between this term and *e.g.* the concept of dividends. It may in particular be found appropriate to do so where in a convention under negotiation a deviation has been made from the definitions in the special Articles on dividends, interest and royalties. It may also be deemed desirable if the Contracting States wish to place on notice, that, in agreement with the domestic tax laws of one or both of the States, the term "profits" includes special classes of receipts such as income from the alienation or the letting of a business or of movable property used in a business. In this connection it may have to be considered whether it would be useful to include also additional rules for the allocation of such special profits."

Paragraph 63 as it read after 17 July 2008 corresponded to paragraph 36. On 17 July 2008 paragraph 36 was renumbered as paragraph 63 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 36 as it read after 23 July 1992 corresponded to paragraph 35 of the 1977 Model Convention. On 23 July 1992 paragraph 36 of the 1977 Model Convention was renumbered as paragraph 38 (see history of paragraph 92), the heading preceding paragraph 36 was moved with it and paragraph 35 was renumbered as paragraph 36 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 35 of the 1977 Model Convention corresponded to paragraph 33 of the 1963 Draft Convention. Paragraph 33 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft

Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 33 read as follows:

> "33. It is open to Contracting States to agree bilaterally upon special explanations or definitions concerning the term "profits" with a view to clarifying the distinction between this term and *e.g.* the concept of dividends. It may in particular be found appropriate to do so where in a Convention under negotiation a deviation has been made from the recommended definitions in the special Articles on dividends, interest and royalties. It may also be deemed desirable if the Contracting States wish to place on notice that, in agreement with the national tax laws of one or both of the States, the term "profits" includes special classes of receipt, such as income from the alienation or the letting of a business or of movable property used in a business. In this connection it may have to be considered whether it would be useful to include also additional rules for the allocation of such special profits."

Paragraph 76: Corresponds to paragraph 64 as it read before 22 July 2010. On 22 July 2010 paragraph 76 was amended and renumbered as paragraph 86 (see history of paragraph 86) and paragraph 64 was amended and renumbered as paragraph 76 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 64 read as follows:

> "64. It should also be noted that, whilst the definition of "royalties" in paragraph 2 of Article 12 of the 1963 Draft Convention and 1977 Model Convention included payments "for the use of, or the right to use, industrial, commercial, or scientific equipment", the reference to these payments was subsequently deleted from that definition in order to ensure that income from the leasing of industrial, commercial or scientific equipment, including the income from the leasing of containers, falls under the provisions of Article 7 rather than those of Article 12, a result that the Committee on Fiscal Affairs considers to be appropriate given the nature of such income."

Paragraph 64 as it read after 17 July 2008 corresponded to paragraph 37. On 17 July 2008 paragraph 37 was renumbered as paragraph 64 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 37 as it read after 23 July 1992 replaced paragraph 37 of the 1977 Model Convention. On 23 July 1992 paragraph 37 of the 1977 Model Convention was renumbered as paragraph 39 (see history of paragraph 53) and a new paragraph 37 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of two previous reports entitled "The Taxation of Income from the Leasing of Industrial, Commercial or Scientific Equipment" (adopted by the OECD Council on 13 September 1983) and "The Taxation of Income from the Leasing of Containers" (adopted by the OECD Council on 13 September 1983).

Paragraph 77: Corresponds to paragraph 8 as it read before 22 July 2010. On 22 July 2010, paragraph 77 was renumbered as paragraph 87 (see history of paragraph 87) and paragraph 8 was amended and renumbered as paragraph 77 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 8 read as follows:

> "8. Before 2000, income from professional services and other activities of an independent character was dealt with under a separate Article, *i.e.* Article 14. The provisions of that Article were similar to those applicable to business profits but it used the concept of fixed base rather than that of permanent establishment since it had originally been thought that the latter concept should be reserved to commercial and industrial activities. However, it was not always clear which activities fell within Article 14 as opposed to Article 7. The elimination of Article 14

in 2000 reflected the fact that there were no intended differences between the concepts of permanent establishment, as used in Article 7, and fixed base, as used in Article 14, or between how profits were computed and tax was calculated according to which of Article 7 or 14 applied. The effect of the deletion of Article 14 is that income derived from professional services or other activities of an independent character is now dealt with under Article 7 as business profits. This was confirmed by the addition of a definition of the term "business" which expressly provides that this term includes professional services or other activities of an independent character."

Paragraph 8 as it read after 17 July 2008 corresponded to paragraph 2.1. On 18 July 2008 paragraph 8 was deleted and paragraph 2.1 was amended, by inserting the word "with" in the first sentence, and renumbered as paragraph 8 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 2.1 read as follows:

"2.1 Before 2000, income from professional services and other activities of an independent character was dealt under a separate Article, *i.e.* Article 14. The provisions of that Article were similar to those applicable to business profits but it used the concept of fixed base rather than that of permanent establishment since it had originally been thought that the latter concept should be reserved to commercial and industrial activities. However, it was not always clear which activities fell within Article 14 as opposed to Article 7. The elimination of Article 14 in 2000 reflected the fact that there were no intended differences between the concepts of permanent establishment, as used in Article 7, and fixed base, as used in Article 14, or between how profits were computed and tax was calculated according to which of Article 7 or 14 applied. The effect of the deletion of Article 14 is that income derived from professional services or other activities of an independent character is now dealt with under Article 7 as business profits. This was confirmed by the addition of a definition of the term "business" which expressly provides that this term includes professional services or other activities of an independent character."

Paragraph 2.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000).

Paragraph 8 was deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 July 1992 and until 17 July 2008, paragraph 8 read as follows:

"8. Apart again from the question of the proper extent of fiscal jurisdiction, the main argument in favour of the proposed solution is that it is conducive to simple and efficient administration, and that it is more closely adapted to the way in which business is commonly transacted. The organisation of modern business is highly complex. In OECD member countries, there are a considerable number of companies each of which is engaged in a wide diversity of activities and is carrying on business extensively in many countries. It may be that such a company may have set up a permanent establishment in a second country and may be transacting a considerable amount of business through that permanent establishment in one particular kind of manufacture; that a different part of the same company may be selling quite different goods or manufactures in that second country through independent agents; and that the company may have perfectly genuine reasons for taking this course, reasons based, for example, either on the historical pattern of its business or on commercial convenience. Is it desirable that the fiscal authorities should go so far as to insist on trying to

search out the profit element of each of the transactions carried on through independent agents, with a view to aggregating that profit with the profits of the permanent establishment? Such an Article might interfere seriously with ordinary commercial processes, and so be out of keeping with the aims of the Convention."

Paragraph 8 as it read after 23 July 1992 corresponded to paragraph 7 of the 1977 Model Convention. On 23 July 1992 paragraph 8 of the 1977 Model Convention was renumbered as paragraph 9 (see history of paragraph 11) and paragraph 7 was renumbered as paragraph 8 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 7 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 7 read as follows:

"7. Apart again from the question of the proper extent of fiscal jurisdiction, the main argument in favour of this solution is that it is conducive to simple and efficient administration, and that it is more closely adapted to the way in which business is commonly transacted. The organisation of modern business is highly complex. In O.E.C.D. countries, there are a considerable number of companies each of which is engaged in a wide diversity of activities and is carrying on business extensively in many countries. Current trends of political thought in Europe seem likely to make such companies even more common in future than they are at present. It may be that such a company may have set up a permanent establishment in a second country and may be transacting a considerable amount of business through that permanent establishment in one particular kind of manufacture; that a different part of the same company may be selling quite different goods or manufactures in that second country through independent agents; and that the company may have perfectly genuine reasons for taking this course -- reasons based, for example, either on the historical pattern of its business or on commercial convenience. Is it desirable that the fiscal authorities of the country should go so far as to insist on trying to search out the profit element of each of the transactions carried on through independent agents, with a view to aggregating that profit with the profits of the permanent establishment? Such an Article might interfere seriously with ordinary commercial processes, and so be out of keeping with the aims of the Convention."

Paragraph 78: Corresponds to paragraph 65 as it read before 22 July 2010. On 22 July 2010 paragraph 78 was renumbered as paragraph 88 (see history of paragraph 88). At the same time paragraph 65 was amended, by replacing the cross reference to "paragraph 8" with "paragraph 77", renumbered as paragraph 78 and the preceding heading was moved with it by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 65 read as follows:

"65. *Italy* and *Portugal* deem as essential to take into consideration that — irrespective of the meaning given to the fourth sentence of paragraph 8 — as far as the method for computing taxes is concerned, national systems are not affected by the new wording of the model, *i.e.* by the elimination of Article 14."

Paragraph 65 as it read after 17 July 2008 corresponded to paragraph 39. On 18 July 2008 paragraph 39 was amended, by replacing the cross-reference to "paragraph 2.1" with "paragraph 8" and renumbered as paragraph 65 and the heading preceding paragraph 38 was relocated immediately before paragraph 65 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 39 read as follows:

"39. *Italy* and *Portugal* deem as essential to take into consideration that — irrespective of the meaning given to the fourth sentence of paragraph 2.1 — as far as the method for computing taxes is concerned, national systems are not affected by the new wording of the model, *i.e.* by the elimination of Article 14."

Paragraph 39 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 39 as it read after 23 July 1992 and until 31 March 1994 was amended and renumbered as paragraph 53 (see history of paragraph 53) by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 79: Corresponds to paragraph 66 as it read before 22 July 2010. On 22 July 2010 paragraph 79 was renumbered as paragraph 89 (see history of paragraph 89) and paragraph 66 was amended, by replacing the cross-reference to "paragraph 13" with "paragraph 14", and renumbered as paragraph 79 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 66 read as follows:

"66. *Belgium* cannot share the views expressed in paragraph 13 of the Commentary. Belgium considers that the application of controlled foreign companies legislation is contrary to the provisions of paragraph 1 of Article 7. This is especially the case where a contracting State taxes one of its residents on income derived by a foreign entity by using a fiction attributing to that resident, in proportion to his participation in the capital of the foreign entity, the income derived by that entity. By doing so, that State increases the tax base of its resident by including in it income which has not been derived by that resident but by a foreign entity which is not taxable in that State in accordance with paragraph 1 of Article 7. That contracting State thus disregards the legal personality of the foreign entity and acts contrary to paragraph 1 of Article 7."

Paragraph 66 as it read after 17 July 2008 corresponded to paragraph 40.1. On 17 July 2008 paragraph 40.1 was amended, by replacing the cross-reference to "paragraph 10.1" with "paragraph 13", and renumbered as paragraph 66 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 40.1 read as follows:

"40.1 *Belgium* cannot share the views expressed in paragraph 10.1 of the Commentary. Belgium considers that the application of controlled foreign companies legislation is contrary to the provisions of paragraph 1 of Article 7. This is especially the case where a contracting State taxes one of its residents on income derived by a foreign entity by using a fiction attributing to that resident, in proportion to his participation in the capital of the foreign entity, the income derived by that entity. By doing so, that State increases the tax base of its resident by including in it income which has not been derived by that resident but by a foreign entity which is not taxable in that State in accordance with paragraph 1 of Article 7. That contracting State thus disregards the legal personality of the foreign entity and acts contrary to paragraph 1 of Article 7."

Paragraph 40.1 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 80: Corresponds to paragraph 67 as it read before 22 July 2010. On 22 July 2010, paragraph 80 was renumbered as paragraph 90 (see history of paragraph 90). At the same time paragraph 67 was amended, by replacing the cross reference to "paragraph 13" with "paragraph 14" and renumbered as paragraph 80 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD

Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 67 read as follows:

> "67. *Luxembourg* does not share the interpretation in paragraphs 13 which provides that paragraph 1 of Article 7 does not restrict a Contracting State's right to tax its own residents under controlled foreign companies provisions found in its domestic law as this interpretation challenges the fundamental principle contained in paragraph 1 of Article 7."

Paragraph 67 as it read after 17 July 2008 corresponded to paragraph 40.2. On 17 July 2008 paragraph 40.2 was amended, by replacing the cross-reference to "paragraph 10.1" with "paragraph 13", and renumbered as paragraph 67 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 40.2 read as follows:

> "40.2 *Luxembourg* does not share the interpretation in paragraphs 10.1 which provides that paragraph 1 of Article 7 does not restrict a Contracting State's right to tax its own residents under controlled foreign companies provisions found in its domestic law as this interpretation challenges the fundamental principle contained in paragraph 1 of Article 7."

Paragraph 40.2 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 81: Corresponds to paragraph 68 as it read before 22 July 2010. On 22 July 2010 paragraph 81 was renumbered as paragraph 91 (see history of paragraph 91) and paragraph 68 was amended, by replacing the cross reference to "paragraph 13" with "paragraph 14", and renumbered as paragraph 81 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 68 read as follows:

> "68. With reference to paragraph 13, *Ireland* notes its general observation in paragraph 27.5 of the Commentary on Article 1"

Paragraph 68 as it read after 17 July 2008 corresponded to paragraph 40.3. On 17 July 2008 paragraph 40.3 was amended, by replacing the cross-reference to "paragraph 10.1" with "paragraph 13", and renumbered as paragraph 68 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 40.3 read as follows:

> "40.3 With reference to paragraph 10.1, *Ireland* notes its general observation in paragraph 27.5 of the Commentary on Article 1."

Paragraph 40.3 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 82: Replaced paragraph 82 as it read before 22 July 2010. On 22 July 2010 paragraph 82 was renumbered as paragraph 92 (see history of paragraph 92) and a new paragraph 82 was added by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 83: Replaced paragraph 83 as it read before 22 July 2010. On 22 July 2010 paragraph 83 was renumbered as paragraph 93 (see history of paragraph 93) and a new paragraph 83 was added by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 84: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 85: Corresponds to paragraph 75 as it read before 22 July 2010. Paragraph 75 was amended, by deleting New Zealand from the list of countries making the

reservation, and renumbered as paragraph 85 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. At the same time and the heading preceding paragraph 75 was moved with it. After 17 July 2008 and until 22 July 2010, paragraph 75 read as follows:

> "75. *Australia* and *New Zealand* reserve the right to include a provision that will permit their domestic law to apply in relation to the taxation of profits from any form of insurance."

Paragraph 75 as it read after 17 July 2008 corresponded to paragraph 45. On 17 July 2008 paragraph 45 was renumbered as paragraph 75 and the heading preceding paragraph 41 was moved with it by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 41 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 41 read as follows:

> "41. *New Zealand* reserves the right to exclude from the scope of this Article income from the business of any form of insurance."

Paragraph 41 as it read after 23 July 1992 corresponded to paragraph 39 of the 1977 Model Convention. On 23 July 1992 paragraph 39 was renumbered as paragraph 41 and the heading preceding paragraph 39 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 39 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 86: Corresponds to paragraph 76 as it read before 22 July 2010. Paragraph 76 was amended, by deleting New Zealand from the list of countries making the reservation, and renumbered as paragraph 86 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 76 read as follows:

> "76. *Australia* and *New Zealand* reserve the right to include a provision clarifying their right to tax a share of business profits to which a resident of the other Contracting State is beneficially entitled where those profits are derived by a trustee of a trust estate (other than certain unit trusts that are treated as companies for Australian and New Zealand tax purposes) from the carrying on of a business in Australia or New Zealand, as the case may be, through a permanent establishment."

Paragraph 76 as it read after 17 July 2008 corresponded to paragraph 42. On 17 July 2008 paragraph 42 was renumbered as paragraph 76 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42 was previously amended on 29 April 2000, by adding New Zealand as a country making the reservation, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 42 read as follows:

> "42. *Australia* reserves the right to include a provision clarifying its right to tax a share of business profits to which a resident of the other Contracting State is beneficially entitled where those profits are derived by a trustee of a trust estate (other than certain unit trusts that are treated as companies for Australian tax purposes) from the carrying on of a business in Australia through a permanent establishment."

Paragraph 42 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 87: Corresponds to paragraph 77 as it read before 22 July 2010. Paragraph 77 was renumbered as paragraph 87 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 77 as it read after 17 July 2008 corresponded to paragraph 43. On 17 July 2008 paragraph 43 was amended, by deleting Spain from the list of countries making the reservation, and renumbered as paragraph 77 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 43 read as follows:

> "43. *Korea*, *Portugal* and *Spain* reserve the right to tax persons performing professional services or other activities of an independent character if they are present on their territory for a period or periods exceeding in the aggregate 183 days in any twelve month period, even if they do not have a permanent establishment (or a fixed base) available to them for the purpose of performing such services or activities."

Paragraph 43 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 43 as it read after 23 July 1992 and until 21 September 1995 was renumbered as paragraph 39 of the Commentary on Article 12 (see history of paragraph 39 of the Commentary on Article 12) by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 88: Corresponds to paragraph 78 as it read before 22 July 2010. Paragraph 78 was renumbered as paragraph 88 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 78 as it read after 17 July 2008 corresponded to paragraph 44. On 17 July 2008 paragraph 44 was renumbered as paragraph 78 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 44 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 44 was deleted on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", which was adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 44 read as follows:

> "44. *Canada* and *Japan* reserve the right to subject income derived from the leasing of industrial, commercial or scientific equipment and of containers to a withholding tax at source at a rate equal to that on royalties. However, they would be prepared to agree to apply, on a reciprocal basis, the rules of Article 8 to income derived from the leasing of containers used in international traffic."

Paragraph 44 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 29 of a previous report entitled "The Taxation of Income Derived from the Leasing of Industrial, Commercial and Scientific Equipment" (adopted by the OECD Council on 13 September 1983) and of paragraph 47 of another report entitled "The Taxation of Income Derived from the Leasing of Containers" (also adopted by the OECD Council on 13 September 1983.

Paragraph 89: Corresponds to paragraph 79 as it read before 22 July 2010. Paragraph 79 was renumbered as paragraph 89 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 79 as it read after 17 July 2008 corresponded to paragraph 45. On 17 July 2008 paragraph 45 was renumbered as paragraph 79 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 45 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 45 as it read after 23 July 1992 and until 21 September 1995 was amended and renumbered as paragraph 41 of the Commentary on Article 12 (see history of paragraph 41 of the Commentary on Article 12) by the report entitled "The 1995 Update to the Model Tax Convention", which was adopted by the OECD Council on 21 September 1995.

Paragraph 90: Corresponds to paragraph 80 as it read before 22 July 2010. Paragraph 80 was renumbered as paragraph 90 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 80 as it read after 17 July 2008 corresponded to paragraph 50. On 17 July 2008 paragraph 50 was renumbered as paragraph 80 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 50 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 50 of a previous report entitled "The Taxation of Income Derived from the Leasing of Containers" (adopted by the OECD Council on 13 September 1983).

Paragraph 91: Corresponds to paragraph 81 as it read before 22 July 2010. Paragraph 81 was renumbered as paragraph 91 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 81 as it read after 17 July 2008 corresponded to paragraph 51. On 17 July 2008 paragraph 51 was renumbered as paragraph 81 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 51 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 92: Corresponds to paragraph 82 as it read before 22 July 2010. Paragraph 82 was renumbered as paragraph 92 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 82 as it read after 17 July 2008 corresponded to paragraph 52. On 17 July 2008 paragraph 52 was renumbered as paragraph 82 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 52 was previously amended on 29 April 2000, by changing the list of countries making the reservation to delete New Zealand and add Portugal, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 31 March 1994 and until 29 April 2000, paragraph 52 read as follows:

> "52. *Australia* and *New Zealand* reserve the right to propose in bilateral negotiations a provision to the effect that, if the information available to the competent authority of a Contracting State is inadequate to determine the profits to be attributed to the permanent establishment of an enterprise, the competent authority may apply to that enterprise for that purpose the provisions of the taxation law of that State, subject to the qualification that such law will be applied, so far as the information available to the competent authority permits, in accordance with the principles of this Article."

Paragraph 52 as it read after 31 March 1994 corresponded to paragraph 38. On 31 March 1994 paragraph 38 was amended and renumbered as paragraph 52 by the

report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 38 read as follows:

> "38. *Australia* and *New Zealand* would wish to be free to propose in bilateral negotiations a provision to the effect that, if the information available to the competent authority of a Contracting State is inadequate to determine the profits to be attributed to the permanent establishment of an enterprise, the competent authority may apply to that enterprise for that purpose the provisions of the taxation law of that State, subject to the qualification that such law will be applied, so far as the information available to the competent authority permits, in accordance with the principles of this Article."

Paragraph 38, as it read after 23 July 1992, corresponded to paragraph 36 of the 1977 Model Convention. On 23 July 1992 paragraph 38 of the 1977 Model Convention was renumbered as paragraph 40 (see history of paragraph 40), paragraph 36 was renumbered as paragraph 38 and the heading preceding paragraph 36 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 36 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 93: Corresponds to paragraph 83 as it read before 22 July 2010. Paragraph 83 was renumbered as paragraph 93 on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 83 as it read after 17 July 2008 corresponded to paragraph 54. On 17 July 2008 paragraph 54 was renumbered as paragraph 83 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 54 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 94: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 95: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 96: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 97: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 98: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

COMMENTARY ON ARTICLE 8
CONCERNING THE TAXATION OF PROFITS FROM SHIPPING, INLAND WATERWAYS TRANSPORT AND AIR TRANSPORT

Paragraph 1

1. The object of paragraph 1 concerning profits from the operation of ships or aircraft in international traffic is to secure that such profits will be taxed in one State alone. The provision is based on the principle that the taxing right shall be left to the Contracting State in which the place of effective management of the enterprise is situated. The term "international traffic" is defined in subparagraph *e)* of paragraph 1 of Article 3.

(Amended on 11 April 1977; see HISTORY)

2. In certain circumstances the Contracting State in which the place of effective management is situated may not be the State of which an enterprise operating ships or aircraft is a resident, and some States therefore prefer to confer the exclusive taxing right on the State of residence. Such States are free to substitute a rule on the following lines:

> Profits of an enterprise of a Contracting State from the operation of ships or aircraft in international traffic shall be taxable only in that State.

(Replaced on 11 April 1977; see HISTORY)

3. Some other States, on the other hand, prefer to use a combination of the residence criterion and the place of effective management criterion by giving the primary right to tax to the State in which the place of effective management is situated while the State of residence eliminates double taxation in accordance with Article 23, so long as the former State is able to tax the total profits of the enterprise, and by giving the primary right to tax to the State of residence when the State of effective management is not able to tax total profits. States wishing to follow that principle are free to substitute a rule on the following lines:

> Profits of an enterprise of a Contracting State from the operation of ships or aircraft, other than those from transport by ships or aircraft operated solely between places in the other Contracting State, shall be taxable only in the first-mentioned State. However, where the place of effective management of the enterprise is situated in the other State and that other State imposes tax on the whole of the profits of the enterprise from the operation of ships or aircraft, the profits from the operation of ships or aircraft, other than those from transport by ships or aircraft operated solely between places in the first-mentioned State, may be taxed in that other State.

(Replaced on 11 April 1977; see HISTORY)

4. The profits covered consist in the first place of the profits directly obtained by the enterprise from the transportation of passengers or cargo by ships or aircraft (whether owned, leased or otherwise at the disposal of the enterprise) that it operates in international traffic. However, as international transport has evolved, shipping and air transport enterprises invariably carry on a large variety of activities to permit, facilitate or support their international traffic operations. The paragraph also covers profits from activities directly connected with such operations as well as profits from activities which are not directly connected with the operation of the enterprise's ships or aircraft in international traffic as long as they are ancillary to such operation.

(Amended on 15 July 2005; see HISTORY)

4.1 Any activity carried on primarily in connection with the transportation, by the enterprise, of passengers or cargo by ships or aircraft that it operates in international traffic should be considered to be directly connected with such transportation.

(Added on 15 July 2005; see HISTORY)

4.2 Activities that the enterprise does not need to carry on for the purposes of its own operation of ships or aircraft in international traffic but which make a minor contribution relative to such operation and are so closely related to such operation that they should not be regarded as a separate business or source of income of the enterprise should be considered to be ancillary to the operation of ships and aircraft in international traffic.

(Added on 15 July 2005; see HISTORY)

4.3 In light of these principles, the following paragraphs discuss the extent to which paragraph 1 applies with respect to some particular types of activities that may be carried on by an enterprise engaged in the operation of ships or aircraft in international traffic.

(Added on 15 July 2005; see HISTORY)

5. Profits obtained by leasing a ship or aircraft on charter fully equipped, crewed and supplied must be treated like the profits from the carriage of passengers or cargo. Otherwise, a great deal of business of shipping or air transport would not come within the scope of the provision. However, Article 7, and not Article 8, applies to profits from leasing a ship or aircraft on a bare boat charter basis except when it is an ancillary activity of an enterprise engaged in the international operation of ships or aircraft.

(Amended on 15 July 2005; see HISTORY)

6. Profits derived by an enterprise from the transportation of passengers or cargo otherwise than by ships or aircraft that it operates in international

traffic are covered by the paragraph to the extent that such transportation is directly connected with the operation, by that enterprise, of ships or aircraft in international traffic or is an ancillary activity. One example would be that of an enterprise engaged in international transport that would have some of its passengers or cargo transported internationally by ships or aircraft operated by other enterprises, *e.g.* under code-sharing or slot-chartering arrangements or to take advantage of an earlier sailing. Another example would be that of an airline company that operates a bus service connecting a town with its airport primarily to provide access to and from that airport to the passengers of its international flights.

(Replaced on 15 July 2005; see HISTORY)

7. A further example would be that of an enterprise that transports passengers or cargo by ships or aircraft operated in international traffic which undertakes to have those passengers or that cargo picked up in the country where the transport originates or transported or delivered in the country of destination by any mode of inland transportation operated by other enterprises. In such a case, any profits derived by the first enterprise from arranging such transportation by other enterprises are covered by the paragraph even though the profits derived by the other enterprises that provide such inland transportation would not be.

(Replaced on 15 July 2005; see HISTORY)

8. An enterprise will frequently sell tickets on behalf of other transport enterprises at a location that it maintains primarily for purposes of selling tickets for transportation on ships or aircraft that it operates in international traffic. Such sales of tickets on behalf of other enterprises will either be directly connected with voyages aboard ships or aircraft that the enterprise operates (*e.g.* sale of a ticket issued by another enterprise for the domestic leg of an international voyage offered by the enterprise) or will be ancillary to its own sales. Profits derived by the first enterprise from selling such tickets are therefore covered by the paragraph.

(Replaced on 15 July 2005; see HISTORY)

8.1 Advertising that the enterprise may do for other enterprises in magazines offered aboard ships or aircraft that it operates or at its business locations (*e.g.* ticket offices) is ancillary to its operation of these ships or aircraft and profits generated by such advertising fall within the paragraph.

(Added on 15 July 2005; see HISTORY)

9. Containers are used extensively in international transport. Such containers frequently are also used in inland transport. Profits derived by an enterprise engaged in international transport from the lease of containers are

usually either directly connected or ancillary to its operation of ships or aircraft in international traffic and in such cases fall within the scope of the paragraph. The same conclusion would apply with respect to profits derived by such an enterprise from the short-term storage of such containers (*e.g.* where the enterprise charges a customer for keeping a loaded container in a warehouse pending delivery) or from detention charges for the late return of containers.

(Replaced on 15 July 2005; see HISTORY)

10. An enterprise that has assets or personnel in a foreign country for purposes of operating its ships or aircraft in international traffic may derive income from providing goods or services in that country to other transport enterprises. This would include (for example) the provision of goods and services by engineers, ground and equipment-maintenance staff, cargo handlers, catering staff and customer services personnel. Where the enterprise provides such goods to, or performs services for, other enterprises and such activities are directly connected or ancillary to the enterprise's operation of ships or aircraft in international traffic, the profits from the provision of such goods or services to other enterprises will fall under the paragraph.

(Replaced on 15 July 2005; see HISTORY)

10.1 For example, enterprises engaged in international transport may enter into pooling arrangements for the purposes of reducing the costs of maintaining facilities needed for the operation of their ships or aircraft in other countries. For instance, where an airline enterprise agrees, under an International Airlines Technical Pool agreement, to provide spare parts or maintenance services to other airlines landing at a particular location (which allows it to benefit from these services at other locations), activities carried on pursuant to that agreement will be ancillary to the operation of aircraft in international traffic.

(Replaced on 15 July 2005; see HISTORY)

11. *(Deleted on 15 July 2005; see HISTORY)*

12. The paragraph does not apply to a shipbuilding yard operated in one country by a shipping enterprise having its place of effective management in another country.

(Amended on 15 July 2005; see HISTORY)

13. *(Renumbered on 15 July 2005; see HISTORY)*

14. Investment income of shipping or air transport enterprises (*e.g.* income from stocks, bonds, shares or loans) is to be subjected to the treatment

ordinarily applied to this class of income, except where the investment that generates the income is made as an integral part of the carrying on of the business of operating the ships or aircraft in international traffic in the Contracting State so that the investment may be considered to be directly connected with such operation. Thus, the paragraph would apply to interest income generated, for example, by the cash required in a Contracting State for the carrying on of that business or by bonds posted as security where this is required by law in order to carry on the business: in such cases, the investment is needed to allow the operation of the ships or aircraft at that location. The paragraph would not apply, however, to interest income derived in the course of the handling of cash-flow or other treasury activities for permanent establishments of the enterprise to which the income is not attributable or for associated enterprises, regardless of whether these are located within or outside that Contracting State, or for the head office (centralisation of treasury and investment activities), nor would it apply to interest income generated by the short-term investment of the profits generated by the local operation of the business where the funds invested are not required for that operation.

(Amended on 15 July 2005; see HISTORY)

Paragraph 2

15. The rules with respect to the taxing right of the State of residence as set forth in paragraphs 2 and 3 above apply also to this paragraph of the Article.

(Replaced on 11 April 1977; see HISTORY)

16. The object of this paragraph is to apply the same treatment to transport on rivers, canals and lakes as to shipping and air transport in international traffic. The provision applies not only to inland waterways transport between two or more countries, but also to inland waterways transport carried on by an enterprise of one country between two points in another country.

(Renumbered on 11 April 1977; see HISTORY)

16.1 Paragraphs 4 to 14 above provide guidance with respect to the profits that may be considered to be derived from the operation of ships or aircraft in international traffic. The principles and examples included in these paragraphs are applicable, with the necessary adaptations, for purposes of determining which profits may be considered to be derived from the operation of boats engaged in inland waterways transport.

(Added on 15 July 2005; see HISTORY)

17. The provision does not prevent specific tax problems which may arise in connection with inland waterways transport, in particular between adjacent countries, from being settled specially by bilateral agreement.

(Renumbered and amended on 11 April 1977; see HISTORY)

17.1 It may also be agreed bilaterally that profits from the operation of vessels engaged in fishing, dredging or hauling activities on the high seas be treated as income falling under this Article.

(Renumbered on 15 July 2005; see HISTORY)

Enterprises not exclusively engaged in shipping, inland waterways transport or air transport

18. It follows from the wording of paragraphs 1 and 2 that enterprises not exclusively engaged in shipping, inland waterways transport or air transport nevertheless come within the provisions of these paragraphs as regards profits arising to them from the operation of ships, boats or aircraft belonging to them.

(Renumbered and amended on 11 April 1977; see HISTORY)

19. If such an enterprise has in a foreign country permanent establishments exclusively concerned with the operation of its ships or aircraft, there is no reason to treat such establishments differently from the permanent establishments of enterprises engaged exclusively in shipping, inland waterways transport or air transport.

(Renumbered and amended on 11 April 1977; see HISTORY)

20. Nor does any difficulty arise in applying the provisions of paragraphs 1 and 2 if the enterprise has in another State a permanent establishment which is not exclusively engaged in shipping, inland waterways transport or air transport. If its goods are carried in its own ships to a permanent establishment belonging to it in a foreign country, it is right to say that none of the profit obtained by the enterprise through acting as its own carrier can properly be taxed in the State where the permanent establishment is situated. The same must be true even if the permanent establishment maintains installations for operating the ships or aircraft (*e.g.* consignment wharves) or incurs other costs in connection with the carriage of the enterprise's goods (*e.g.* staff costs). In this case, even though certain functions related to the operation of ships and aircraft in international traffic may be performed by the permanent establishment, the profits attributable to these functions are taxable exclusively in the State where the place of effective management of the enterprise is situated. Any expenses, or part thereof, incurred in performing such functions must be deducted in computing that part of the

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

profit that is not taxable in the State where the permanent establishment is located and will not, therefore, reduce the part of the profits attributable to the permanent establishment which may be taxed in that State pursuant to Article 7.

(Amended on 22 July 2010; see HISTORY)

21. Where ships or aircraft are operated in international traffic, the application of the Article to the profits arising from such operation will not be affected by the fact that the ships or aircraft are operated by a permanent establishment which is not the place of effective management of the whole enterprise; thus, even if such profits could be attributed to the permanent establishment under Article 7, they will only be taxable in the State in which the place of effective management of the enterprise is situated (a result that is confirmed by paragraph 4 of Article 7).

(Amended on 22 July 2010; see HISTORY)

Paragraph 3

22. This paragraph deals with the particular case where the place of effective management of the enterprise is aboard a ship or a boat. In this case tax will only be charged by the State where the home harbour of the ship or boat is situated. It is provided that if the home harbour cannot be determined, tax will be charged only in the Contracting State of which the operator of the ship or boat is a resident.

(Renumbered and amended on 11 April 1977; see HISTORY)

Paragraph 4

23. Various forms of international co-operation exist in shipping or air transport. In this field international co-operation is secured through pooling agreements or other conventions of a similar kind which lay down certain rules for apportioning the receipts (or profits) from the joint business.

(Renumbered and amended on 11 April 1977; see HISTORY)

24. In order to clarify the taxation position of the participant in a pool, joint business or in an international operating agency and to cope with any difficulties which may arise the Contracting States may bilaterally add the following, if they find it necessary:

> ... but only to so much of the profits so derived as is attributable to the participant in proportion to its share in the joint operation.

(Renumbered and amended on 11 April 1977; see HISTORY)

25. *(Renumbered and amended on 31 March 1994; see HISTORY)*

Observations on the Commentary

26. *(Renumbered and amended on 28 January 2003; see HISTORY)*

27. *(Deleted on 15 July 2005; see HISTORY)*

28. *Greece* and *Portugal* reserve their position as to the application of this Article to income from ancillary activities (see paragraphs 4 to 10.1).

(Replaced on 15 July 2005; see HISTORY)

29. *Germany*, *Greece* and *Turkey* reserve their position as to the application of the Article to income from inland transportation of passengers or cargo and from container services (see paragraphs 4, 6, 7 and 9 above).

(Amended on 15 July 2005; see HISTORY)

30. *Greece* will apply Article 12 to payments from leasing a ship or aircraft on a bareboat charter basis.

(Replaced on 21 September 1995; see HISTORY)

30.1 *(Deleted on 15 July 2005; see HISTORY)*

Reservations on the Article

31. *Canada*, *Hungary*, *Mexico* and *New Zealand* reserve the right to tax as profits from internal traffic, profits from the carriage of passengers or cargo taken on board at one place in a respective country for discharge at another place in the same country. New Zealand also reserves the right to tax as profits from internal traffic profits from other coastal and continental shelf activities.

(Amended on 17 July 2008; see HISTORY)

32. *Belgium*, *Canada*, *Greece*, *Mexico*, *Turkey*, the *United Kingdom* and the *United States* reserve the right not to extend the scope of the Article to cover inland transportation in bilateral conventions (paragraph 2 of the Article).

(Amended on 17 July 2008; see HISTORY)

33. *Denmark*, *Norway* and *Sweden* reserve the right to insert special provisions regarding profits derived by the air transport consortium Scandinavian Airlines System (SAS).

(Renumbered on 21 September 1995; see HISTORY)

34. *(Deleted on 15 July 2005; see HISTORY)*

35. In view of its particular situation in relation to shipping, *Greece* will retain its freedom of action with regard to the provisions in the Convention relating to profits from the operation of ships in international traffic.

(Renumbered on 21 September 1995; see HISTORY)

36. *Mexico* reserves the right to tax at source profits derived from the provision of accommodation.

(Added on 21 September 1995; see HISTORY)

37. *(Deleted on 15 July 2005; see HISTORY)*

38. *Australia* reserves the right to tax profits from the carriage of passengers or cargo taken on board at one place in Australia for discharge in Australia.

(Amended on 22 July 2010; see HISTORY)

39. The *United States* reserves the right to include within the scope of paragraph 1, income from the rental of ships and aircraft on a full basis, and on a bareboat basis if either the ships or aircraft are operated in international traffic by the lessee, or if the rental income is incidental to profits from the operation of ships or aircraft in international traffic. The United States also reserves the right to include within the scope of the paragraph, income from the use, maintenance or rental of containers used in international traffic.

(Added on 29 April 2000; see HISTORY)

40. The *Slovak Republic* reserves the right to tax under Article 12 profits from the leasing of ships, aircraft and containers.

(Added on 28 January 2003; see HISTORY)

41. *Ireland* reserves the right to include within the scope of the Article income from the rental of ships or aircraft on a bareboat basis if either the ships or aircraft are operated in international traffic by the lessee or if the rental income is incidental to profits from the operation of ships or aircraft in international traffic.

(Added on 28 January 2003; see HISTORY)

42. *Turkey* reserves the right in exceptional cases to apply the permanent establishment rule in taxation of profit from international transport. Turkey also reserves the right to broaden the scope of the Article to cover transport by road vehicle and to make a corresponding change to the definition of "international traffic" in Article 3.

(Renumbered and amended on 28 January 2003; see HISTORY)

43. *Chile* and *Slovenia* reserve the right not to extend the scope of the Article to cover inland waterways transportation in bilateral conventions and to make corresponding modifications to paragraph 3 of Articles 13, 15 and 22.

(Added on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

> "1. The object of paragraph 1 concerning profits from the operation of ships or aircraft in international traffic is to secure that such profits will be taxed in one State alone. Operation in international traffic means any operation of ships or aircraft which extends over more than one country, whatever the number of places of call in a particular country. The provision is based on the principle that the taxing power shall be left to the Contracting State in which the place of effective management of the enterprise is situated. This makes it unnecessary to devise detailed rules, *e.g.* for defining the profits covered, this being rather a question of application for which general principles of interpretation must be taken into account. It seems useful, however, to give a few examples and comments to clarify the question."

Paragraph 2: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 2 of the 1963 Draft Convention was renumbered as paragraph 4 (see history of paragraph 4) and a new paragraph 2 was added.

Paragraph 3: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 3 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 5 (see history of paragraph 5) and a new paragraph 3 was added.

Paragraph 4: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 4 read as follows:

> "4. The profits covered consist in the first place of the profits obtained by the enterprise from the carriage of passengers or cargo. With this definition, however, the provision would be unduly restrictive, in view of the development of shipping and air transport, and for practical considerations also. The provision therefore covers other classes of profits as well, *i.e.* those which by reason of their nature or their close relationship with the profits directly obtained from transport may all be placed in a single category. Some of these classes of profits are mentioned in the following paragraphs."

Paragraph 4 of the 1977 Model Convention corresponded to paragraph 2 of the 1963 Draft Convention. Paragraph 4 of the 1963 Draft Convention was renumbered as paragraph 7 (see history of paragraph 7) and paragraph 2 was renumbered as paragraph 4 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 4.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 4.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 4.3: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 5: Amended on15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 31 March 1994 and until 15 July 2005, paragraph 5 read as follows:

"5. Profits obtained by leasing a ship or aircraft on charter fully equipped, manned and supplied must be treated like the profits from the carriage of passengers or cargo. Otherwise, a great deal of business of shipping or air transport would not come within the scope of the provision. However, Article 7, and not Article 8, applies to profits from leasing a ship or aircraft on a bare boat charter basis except when it is an occasional source of income for an enterprise engaged in the international operation of ships or aircraft."

Paragraph 5 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 5 read as follows:

"5. Profits obtained by leasing a ship or aircraft on charter fully equipped, manned and supplied must be treated like the profits from the carriage of passengers or cargo. Otherwise, a great deal of business of shipping or air transport would not come within the scope of the provision. The Article does not apply to profits from leasing a ship or aircraft on a bare boat charter basis except when it is an occasional source of income for an enterprise engaged in the international operation of ships or aircraft."

Paragraph 5 of the 1977 Model Convention corresponded to paragraph 3 of the 1963 Draft Convention. Paragraph 5 of the 1963 Draft Convention was amended and renumbered as paragraph 8 (see history of paragraph 8) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 3 of the 1963 Draft Convention was amended and renumbered as paragraph 5 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. Profits obtained by leasing a ship or an aircraft on charter fully equipped, manned and supplied must be treated like the profits from the carriage of passengers or cargo. Otherwise, a great deal of business of shipping or air transport would not come within the scope of the provision. The Article does not, however, apply to profits from a bare boat charter."

Paragraph 6: Replaced on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until it was deleted on 15 July 2005, paragraph 6 read as follows:

"6. The principle that the taxing right should be left to one Contracting State alone makes it unnecessary to devise detailed rules, *e.g.* for defining the profits covered, this being rather a question of applying general principles of interpretation."

Paragraph 6 of the 1977 Model Convention previously replaced paragraph 6 of the 1963 Draft Convention, which was amended and renumbered as paragraph 11 (see history of paragraph 11) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 7: Replaced on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 7 read as follows:

"7. Shipping and air transport enterprises — particularly the latter — often engage in additional activities more or less closely connected with the direct operation of ships and aircraft. Although it would be out of the question to list here all the auxiliary activities which could properly be brought under the provision, nevertheless a few examples may usefully be given."

Paragraph 7 of the 1977 Model Convention corresponded to paragraph 4 of the 1963 Draft Convention. Paragraph 7 of the 1963 Draft Convention was renumbered as paragraph 12 (see history of paragraph 12) and paragraph 4 was renumbered as paragraph 7 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 8: Replaced on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 8 read as follows:

"8. The provision applies, *inter alia*, to the following activities:

a) the sale of passage tickets on behalf of other enterprises;

b) the operation of a bus service connecting a town with its airport;

c) advertising and commercial propaganda;

d) transportation of goods by truck connecting a depot with a port or airport."

Paragraph 8 of the 1977 Model Convention corresponded to paragraph 5 of the 1963 Draft Convention. Paragraph 8 of the 1963 Draft Convention was amended and renumbered as paragraph 14 (see history of paragraph 14) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 5 of the 1963 Draft Convention was amended and renumbered as paragraph 8 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

"5. The provision covers, inter alia, the following activities:

a) the sale of passage tickets on behalf of other enterprises;

b) the operation of a bus service connecting a town with its airport;

c) advertising and commercial propaganda."

Paragraph 8.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 9: Replaced on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until it was deleted on 15 July 2005, paragraph 9 read as follows:

"9. If an enterprise engaged in international transport undertakes to see to it that, in connection with such transport, goods are delivered directly to the consignee in the other Contracting State, such inland transportation is considered to fall within the scope of the international operation of ships or aircraft and, therefore, is covered by the provisions of this Article."

Paragraph 9 of the 1977 Model Convention previously replaced paragraph 9 of the 1963 Draft Convention, which was amended and renumbered as paragraph 23 (see history of paragraph 23) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 10: Replaced on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until it was deleted on 15 July 2005, paragraph 10 read as follows:

"10. Recently, "containerisation" has come to play an increasing role in the field of international transport. Such containers frequently are also used in inland transport. Profits derived by an enterprise engaged in international transport from the lease of containers which is supplementary or incidental to its international operation of ships or aircraft fall within the scope of this Article."

Paragraph 10 of the 1977 Model Convention previously replaced paragraph 10 of the 1963 Draft Convention, which was amended and renumbered as paragraph 24 (see history of paragraph 24) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 10.1: Replaced on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 10.1 read as follows:

> "10.1 Another case would be that of a transport enterprise that would be required to have assets or personnel in a foreign country for purposes of operating its ships or aircraft in international traffic and that would derive income from providing goods or services in that country to other transport enterprises. This would include (for example) the provision of goods and services by engineers, ground staff, cargo handlers, catering staff and customer services personnel. Since the income so derived would not be related to the operation of ships or aircraft by the enterprise itself, that income would normally not fall within the scope of Article 8. Where, however, the enterprise provides goods to, or performs services for, another person that are supplementary or incidental to its operation of ships or aircraft in international traffic, the profits from the provision of such goods or services will fall under Article 8. Although the same considerations apply to a pool, joint business or international operating agency for the purposes of paragraph 4, what is required in that case is to examine how closely the activity is connected with the international transport activities of the pool, joint business or international operating agency as opposed to the activities of the individual enterprises participating in such arrangements."

Paragraph 10.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 11: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 11 read as follows:

> "11. On the other hand, the provision does not cover a clearly separate activity such as the keeping of a hotel as a separate business; the profits from such an establishment are in any case easily determinable. In certain cases, however, circumstances are such that the provision must apply even to a hotel business *e.g.* the keeping of a hotel for no other purpose than to provide transit passengers with night accommodation, the cost of such a service being included in the price of the passage ticket. In such a case, the hotel can be regarded as a kind of waiting room."

Paragraph 11 of the 1977 Model Convention corresponded to paragraph 6 of the 1963 Draft Convention. Paragraph 11 of the 1963 Draft Convention was amended and renumbered as paragraph 16 (see history of paragraph 16) and the heading preceding paragraph 11 was moved immediately before paragraph 15 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 6 of the 1963 Draft Convention was amended and renumbered as paragraph 11 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 6 read as follows:

> "6. On the other hand, the provision does not cover a clearly separate activity, such as the keeping of a hotel as a separate business. The profits from such an establishment are in any case easily determinable. In certain cases, however, circumstances are such that the provision must apply even to a hotel business, *e.g.* the keeping of a hotel for no other purpose than to provide transit passengers with

night accommodation, the cost of such a service being included in the price of the passage ticket. In such a case, the hotel is simply a kind of waiting room."

Paragraph 12: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 12 read as follows:

> "12. There is another activity which is excluded from the field of application of the provision, namely a shipbuilding yard operated in one country by a shipping enterprise having its place of effective management in another country."

Paragraph 12 of the 1977 Model Convention corresponded to paragraph 7 of the 1963 Draft Convention. Paragraph 12 of the 1963 Draft Convention was amended and renumbered as paragraph 17 (see history of paragraph 17) and paragraph 7 (adopted by the OECD Council on 30 July 1963), was renumbered as paragraph 12 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 13: Renumbered as paragraph 17.1 (see history of paragraph 17.1) on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 14: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 14 read as follows:

> "14. Investment income of shipping, inland waterways or air transport enterprises (*e.g.* income from stocks, bonds, shares or loans) is to be subjected to the treatment ordinarily applied to this class of income, except where the investment that generates the income is made as an integral part of the carrying on of the business of operating the ships or aircraft in international traffic in the Contracting State. Thus, the Article would apply to interest income generated, for example, by the cash required in a Contracting State for the carrying on of that business or by bonds posted as security where this is required by law in order to carry on the business; it would not apply, however, to interest income derived in the course of the handling of cash-flow or other treasury activities for permanent establishments of the enterprise to which the income is not attributable or for associated enterprises, regardless of whether these are located within or outside that Contracting State, or for the head office (centralisation of treasury and investment activities), nor would it apply to interest income generated by the short-term investment of the profits generated by the local operation of the business where the funds invested are not required for that operation."

Paragraph 14 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. In the 1977 Model Convention and until 29 April 2000, paragraph 14 read as follows:

> "14. Investment income of shipping, inland waterways or air transport enterprises (*e.g.* income from stocks, bonds, shares or loans) is to be subjected to the treatment ordinarily applied to this class of income."

Paragraph 14 of the 1977 Model Convention corresponded to paragraph 8 of the 1963 Draft Convention. Paragraph 14 of the 1963 Draft Convention was amended and renumbered as paragraph 19 (see history of paragraph 19) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 8 of the 1963 Draft Convention was amended and renumbered as paragraph 14 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 8 read as follows:

"8. Investment income of shipping, inland waterways or air transport enterprises (income from stocks, bonds, shares and loans is to be subjected to the treatment ordinarily applied to this class of income in general)."

Paragraph 15: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 15 of the 1963 Draft Convention was amended and renumbered as paragraph 20 (see history of paragraph 20) and the heading preceding paragraph 11 was moved immediately before paragraph 15.

Paragraph 16: Corresponds to paragraph 11 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 16 of the 1963 Draft Convention was amended and renumbered as paragraph 21 (see history of paragraph 21) and paragraph 11 was renumbered as paragraph 16 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 16.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 17: Corresponds to paragraph 12 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 17 of the 1963 Draft Convention was amended and renumbered as paragraph 22 (see history of paragraph 22) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 12 of the 1963 Draft Convention was amended and renumbered as paragraph 17 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 12 read as follows:

"12. The provision does not prevent specific taxation problems which may arise in connection with inland waterways transport, in particular between adjacent countries, from being settled specially by bilateral agreement."

Paragraph 17.1: Corresponds to paragraph 13 of the 1977 Model Convention as it read before 15 July 2005. Paragraph 13 of the 1977 Model Convention was renumbered as paragraph 17.1 on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 13 of the 1977 Model Convention replaced paragraph 13 of the 1963 Draft Convention, which was amended and renumbered as paragraph 18 (see history of paragraph 18) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, the heading preceding paragraph 13 was moved with it.

Paragraph 18: Corresponds to paragraph 13 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 13 of the 1963 Draft Convention was amended and renumbered as paragraph 18 and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 13 read as follows:

"13. It follows from the wording of paragraphs 1 and 2 of the Article that enterprises not exclusively engaged in shipping, inland waterways transport or air transport nevertheless come within the provisions of these paragraphs as regards profits arising to them from the operation of ships, boats or aircraft belonging to them."

Paragraph 19: Corresponds to paragraph 14 of the 1963 Draft Convention. Paragraph 14 of the 1963 Draft Convention was amended and renumbered as paragraph 19 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 14 read as follows:

"14. If such an enterprise possesses in a foreign country permanent establishments exclusively concerned with the operation of its ships or aircraft, there is no reason to treat such establishments differently from the permanent establishments of enterprises engaged exclusively in shipping, inland waterways or air transport."

Paragraph 20: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. In the 1977 Model Convention and until 22 July 2010, paragraph 20 read as follows:

"20. Nor does any difficulty arise in applying the provisions of paragraphs 1 and 2 if the enterprise has in another State a permanent establishment which is not exclusively engaged in shipping, inland waterways transport or air transport. If its goods are carried in its own ships to a permanent establishment belonging to it in a foreign country, it is right to say that none of the profit obtained by the enterprise through acting as its own carrier can properly be attributed to the permanent establishment. The same must be true even if the permanent establishment maintains installations for operating the ships or aircraft (*e.g.* consignment wharves) or incurs other costs in connection with the carriage of the enterprise's goods (*e.g.* staff costs). In this case, the permanent establishment's expenditure in respect of the operation of the ships, boats or aircraft should be attributed not to the permanent establishment but to the enterprise itself, since none of the profit obtained through the carrying benefits the permanent establishment."

Paragraph 20 of the 1977 Model Convention corresponded to paragraph 15 of the 1963 Draft Convention. Paragraph 15 of the 1963 Draft Convention was amended and renumbered as paragraph 20 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 15 read as follows:

"15. Nor does any difficulty arise in applying the provisions of paragraphs 1 and 2 if the enterprise possesses in another State a permanent establishment which is not exclusively engaged in a shipping, inland waterways transport or air transport. For if its goods are carried in its own ships to a permanent establishment belonging to it in a foreign country, it is right to say that none of the profit obtained by the enterprise through acting as its own carrier can properly be attributed to the permanent establishment. The same must be true even if the permanent establishment maintains installations for operating the ships or aircraft (*e.g.* consignment wharves) or incurs other costs in connection with the carriage of the enterprise's goods (*e.g.* staff costs). In this case, the permanent establishment's expenditure in respect of the operation of the ships, boats or aircraft should be attributed not to the permanent establishment but to the enterprise itself, since none of the profit obtained through the carrying benefits the permanent establishment."

Paragraph 21: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 29 April 2000 and until 22 July 2010, paragraph 21 read as follows:

"21. Where ships or aircraft are operated in international traffic, the application of the Article to the profits arising from such operation will not be affected by the fact that the ships or aircraft are operated by a permanent establishment which is not the place of effective management of the whole enterprise (for example, ships or aircraft put into service by the permanent establishment or figuring on the balance sheet of the permanent establishment)."

Paragraph 21 was replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on

29 April 2000. In the 1977 Model Convention and until it was deleted on 29 April 2000, paragraph 21 read as follows:

> "21. Where the enterprise's ships or aircraft are operated by a permanent establishment which is not the place of effective management of the whole enterprise (*e.g.* ships or aircraft put into service by the permanent establishment and figuring on its balance sheet), then the effective management for the purposes of paragraphs 1 and 2 must be considered, as regards the operation of the ships or aircraft, as being in the Contracting State in which the permanent establishment is situated."

Paragraph 21 of the 1977 Model Convention corresponded to paragraph 16 of the 1963 Draft Convention. Paragraph 16 of the 1963 Draft Convention was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 16 read as follows:

> "16. In cases — which are probably purely theoretical — where the enterprise's ships or aircraft are operated by a permanent establishment which is not the place of effective management of the whole enterprise (*e.g.* ships or aircraft put into service by the permanent establishment and figuring on its balance sheet), then the effective management for the purposes of paragraphs 1 and 2 must be considered, as regards the operation of the ships or aircraft, as being in the Contracting State in which the permanent establishment is situated."

Paragraph 22: Corresponds to paragraph 17 of the 1963 Draft Convention. Paragraph 17 of the 1963 Draft Convention was amended and renumbered as paragraph 22 and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 17 read as follows:

> "17. This paragraph deals with the particular case where the place of effective management of the enterprise is aboard a ship or a boat. In this case tax will only be charged by the State where the home harbour of the ship or boat is situated. It is provided that if the home harbour cannot be determined, tax will only be charged by the Contracting State of which the operator of the ship or boat is a resident."

Paragraph 23: Corresponds to paragraph 9 of the 1963 Draft Convention. Paragraph 9 of the 1963 Draft Convention was amended and renumbered as paragraph 23 and the heading preceding paragraph 23 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 9 read as follows:

> "9. Since the Second World War, various forms of international co-operation have come into existence, particularly in air transport. In this field international co-operation is secured through pooling agreements or other Conventions of a similar kind which lay down certain rules for apportioning the receipts (or profits) from the joint business."

Paragraph 24: Corresponds to paragraph 10 of the 1963 Draft Convention. Paragraph 10 of the 1963 Draft Convention was amended and renumbered as paragraph 24 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 10 read as follows:

> "10. Generally speaking, participation in a pool, in a joint business or in an international operating agency does not appear to offer any special difficulties. If the provision recommended is applicable to any enterprise engaged in shipping, inland waterways transport or air transport, it follows that it must also extend to profits obtained through the type of co-operation described above; indeed, such an interpretation results directly from the text of the provision."

Paragraph 25: Renumbered as paragraph 34 (see history of paragraph 35) and amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 26: Renumbered as paragraph 42 (see history of paragraph 42) and amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003.

Paragraph 27: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 27 read as follows:

> "27. *Portugal* and *Turkey* reserve the right, in the course of negotiations for concluding conventions with other member countries, to propose that the part of inland transport (cf. paragraph 9 above) carried out by means other than that employed for international transport be excluded from the scope of the Article, whether or not the means of transport belong to the transporting enterprise."

Paragraph 27 was amended on 23 July 1992, by deleting Spain from the list of countries making the observation, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 27 read as follows:

> "27. *Portugal*, *Spain* and *Turkey* reserve the right, in the course of negotiations for concluding conventions with other member countries, to propose that the part of inland transport (cf. paragraph 9 above) carried out by means other than that employed for international transport be excluded from the scope of the Article, whether or not the means of transport belong to the transporting enterprise."

Paragraph 27 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 28: Replaced on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until it was deleted on 15 July 2005, paragraph 28 read as follows:

> "28. *Portugal* and *Turkey* also reserve the right, in the course of such negotiations, to propose that the leasing of containers (cf. paragraph 10 above) even if supplementary or incidental be regarded as an activity separate from international shipping or aircraft operations, and consequently be excluded from the scope of the Article."

Paragraph 28 was amended on 23 July 1992, by replacing the words "These countries" at the beginning of the paragraph with "*Portugal* and *Turkey*" by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 28 read as follows:

> "28. These countries also reserve the right, in the course of such negotiations, to propose that the leasing of containers (cf. paragraph 10 above) even if supplementary or incidental be regarded as an activity separate from international shipping or aircraft operations, and consequently be excluded from the scope of the Article."

Paragraph 28 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 29: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 29 read as follows:

"29. *Germany* reserves its position as to the application of the Article to income from inland transportation and container services (cf. paragraphs 9 and 10 above)."

Paragraph 29 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 30: Replaced paragraph 30 as it read before 21 September 1995, which was renumbered as paragraph 31 (see history of paragraph 31) by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. At the same time, the heading preceding paragraph 30 was moved immediately before paragraph 31.

Paragraph 30.1: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 30.1 read as follows:

"30.1 *Australia* does not agree with the interpretations given in paragraphs 8 *d)* and 9. Australia takes the view that international operation of ships and aircraft does not include inland transportation."

Paragraph 30.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 31: Amended on 17 July 2008, by deleting Poland from the list of countries making the reservation, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 31 read as follows:

"31. *Canada*, *Hungary*, *Mexico*, *New Zealand* and *Poland* reserve the right to tax as profits from internal traffic, profits from the carriage of passengers or cargo taken on board at one place in a respective country for discharge at another place in the same country. *New Zealand* also reserves the right to tax as profits from internal traffic profits from other coastal and continental shelf activities."

Paragraph 31 was previously amended on 29 April 2000, by deleting Australia from the list of countries making the reservation, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 31 read as follows:

"31. *Australia*, *Canada*, *Hungary*, *Mexico*, *New Zealand* and *Poland* reserve the right to tax as profits from internal traffic profits from the carriage of passengers or cargo taken on board at one place in a respective country for discharge at another place in the same country. *Australia* and *New Zealand* also reserve the right to tax as profits from internal traffic profits from other coastal and continental shelf activities."

Paragraph 31 was previously amended on 23 October 1997, by adding Hungary and Poland to the list of countries making the reservation, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 31 read as follows:

"31. *Australia*, *Canada*, *Mexico* and *New Zealand* reserve the right to tax as profits from internal traffic profits from the carriage of passengers or cargo taken on board at one place in a respective country for discharge at another place in the same country. *Australia* and *New Zealand* also reserve the right to tax as profits from internal traffic profits from other coastal and continental shelf activities."

Paragraph 31 as it read before 21 September 1995 corresponded to paragraph 30 of the 1977 Model Convention. On 21 September 1995 paragraph 31 of the 1977 Model Convention was renumbered paragraph 32 (cf. history paragraph 32) by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. At the same time, paragraph 30 of the 1977 Model Convention was amended, by adding Mexico and New Zealand to the list of countries making the reservation, renumbered as paragraph 31 and the preceding heading was moved with it. In the 1977 Model Convention and until 21 September 1995, paragraph 30 read as follows:

> "30. *Australia* and *Canada*, reserve the right to tax as profits from internal traffic profits from the carriage of passengers or cargo taken on board at one place in a respective country for discharge at another place in the same country. *Australia* also reserves the right to tax as profits from internal traffic profits from other coastal and continental shelf activities."

Paragraph 30 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 32: Amended on 17 July 2008, by adding Belgium to the list of countries making the reservation, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 32 read as follows:

> "32. *Canada*, *Greece*, *Mexico*, *Turkey* the *United Kingdom* and the *United States* reserve the right not to extend the scope of the Article to cover inland transportation in bilateral conventions (paragraph 2 of the Article)."

Paragraph 32 was previously amended on 15 July 2005, by adding Greece, Mexico and the United Kingdom to the list of countries making the reservation, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 21 September 1995 and until 15 July 2005, paragraph 32 read as follows:

> "32. *Canada*, *Turkey* and the *United States* reserve the right not to extend the scope of the Article to cover inland transportation in bilateral conventions (paragraph 2 of the Article)."

Paragraph 32 as it read before 21 September 1995 corresponded to paragraph 31 of the 1977 Model Convention. Paragraph 31 of the 1977 Model Convention was renumbered as paragraph 32 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 31 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 33: Corresponds to paragraph 32 as it read after 23 July 1992 and until 21 September 1995. On 21 September 1995 paragraph 33 was renumbered as paragraph 34 (see history of paragraph 34) and paragraph 32 was renumbered as paragraph 33 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 32 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 34: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 21 September 1995 and until 15 July 2005, paragraph 34 read as follows:

> "34. The *United Kingdom* reserves the right to include in paragraph 1 of the Article profits from the leasing of ships or aircraft on a bare boat basis (cf. paragraph 5 above) and from the leasing of containers (cf. paragraph 10 above)."

Paragraph 34 corresponded to paragraph 33 as it read before 21 September 1995. Paragraph 34 as it read before 21 September 1995 was renumbered as paragraph 35 (see history of paragraph 35) and paragraph 33 was renumbered as paragraph 34 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 33 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 35: Corresponds to paragraph 34 as it read before 21 September 1995. Paragraph 34 was renumbered as paragraph 35 by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 34 as it read before 31 March 1994 corresponded to paragraph 25 of the 1977 Model Convention. On 31 March 1994 paragraph 25 was amended and renumbered as paragraph 34 on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 25 read as follows:

> "25. In view of its particular situation in relation to shipping, *Greece* will retain its freedom of action with regard to the provisions in the Convention relating to profits from the operation of ships in international traffic, to remuneration of crews of such ships, to capital represented by ships in international traffic and by movable property pertaining to the operation of such ships, and to capital gains from the alienation of such ships and assets."

Paragraph 25 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 36: Added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 37: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 October 1997 and until 15 July 2005, paragraph 37 read as follows:

> "37. *Poland* reserves the right to broaden the scope of the Article to cover transport by road vehicles and to make a corresponding change to the definition of "international traffic" in Article 3."

Paragraph 37 was added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 38: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 29 April 2000 and until 22 July 2010, paragraph 38 read as follows:

> "38. *Australia* reserves the right to tax profits from the carriage of passengers or cargo taken on board at one place in Australia for discharge in Australia. Australia also reserves the right to tax profits from other coastal and continental shelf activities."

Paragraph 38 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 39: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 40: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 41: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 42: Corresponds to paragraph 26 of the 1977 Model Convention as it read before 28 January 2003. Paragraph 26 was amended and renumbered as paragraph 42 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 26 read as follows:

> "26. While agreeing in principle to abide by the provisions of Article 8 in bilateral conventions, *Turkey* intends in exceptional cases to apply the permanent establishment rule in taxing international transport profits."

Paragraph 26 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 43: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

COMMENTARY ON ARTICLE 9 CONCERNING THE TAXATION OF ASSOCIATED ENTERPRISES

1. This Article deals with adjustments to profits that may be made for tax purposes where transactions have been entered into between associated enterprises (parent and subsidiary companies and companies under common control) on other than arm's length terms. The Committee has spent considerable time and effort (and continues to do so) examining the conditions for the application of this Article, its consequences and the various methodologies which may be applied to adjust profits where transactions have been entered into on other than arm's length terms. Its conclusions are set out in the report entitled *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*,[1] which is periodically updated to reflect the progress of the work of the Committee in this area. That report represents internationally agreed principles and provides guidelines for the application of the arm's length principle of which the Article is the authoritative statement.

(Renumbered and amended on 23 October 1997; see HISTORY)

Paragraph 1

2. This paragraph provides that the taxation authorities of a Contracting State may, for the purpose of calculating tax liabilities of associated enterprises, re-write the accounts of the enterprises if, as a result of the special relations between the enterprises, the accounts do not show the true taxable profits arising in that State. It is evidently appropriate that adjustment should be sanctioned in such circumstances. The provisions of this paragraph apply only if special conditions have been made or imposed between the two enterprises. No re-writing of the accounts of associated enterprises is authorised if the transactions between such enterprises have taken place on normal open market commercial terms (on an arm's length basis).

(Renumbered and amended on 23 October 1997; see HISTORY)

3. As discussed in the Committee on Fiscal Affairs' Report on "Thin Capitalisation",[2] there is an interplay between tax treaties and domestic rules on thin capitalisation relevant to the scope of the Article. The Committee considers that:

---

1 The original version of that report was approved by the Council of the OECD on 27 June 1995. Published in a loose-leaf format as *Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations*, OECD, Paris, 1995.

2 Adopted by the Council of the OECD on 26 November 1986 and reproduced in Volume II at page R(4)-1.

a) the Article does not prevent the application of national rules on thin capitalisation insofar as their effect is to assimilate the profits of the borrower to an amount corresponding to the profits which would have accrued in an arm's length situation;

b) the Article is relevant not only in determining whether the rate of interest provided for in a loan contract is an arm's length rate, but also whether a *prima facie* loan can be regarded as a loan or should be regarded as some other kind of payment, in particular a contribution to equity capital;

c) the application of rules designed to deal with thin capitalisation should normally not have the effect of increasing the taxable profits of the relevant domestic enterprise to more than the arm's length profit, and that this principle should be followed in applying existing tax treaties.

(Renumbered and amended on 23 October 1997; see HISTORY)

4. The question arises as to whether special procedural rules which some countries have adopted for dealing with transactions between related parties are consistent with the Convention. For instance, it may be asked whether the reversal of the burden of proof or presumptions of any kind which are sometimes found in domestic laws are consistent with the arm's length principle. A number of countries interpret the Article in such a way that it by no means bars the adjustment of profits under national law under conditions that differ from those of the Article and that it has the function of raising the arm's length principle at treaty level. Also, almost all member countries consider that additional information requirements which would be more stringent than the normal requirements, or even a reversal of the burden of proof, would not constitute discrimination within the meaning of Article 24. However, in some cases the application of the national law of some countries may result in adjustments to profits at variance with the principles of the Article. Contracting States are enabled by the Article to deal with such situations by means of corresponding adjustments (see below) and under mutual agreement procedures.

(Replaced on 23 July 1992; see HISTORY)

Paragraph 2

5. The re-writing of transactions between associated enterprises in the situation envisaged in paragraph 1 may give rise to economic double taxation (taxation of the same income in the hands of different persons), insofar as an enterprise of State A whose profits are revised upwards will be liable to tax on an amount of profit which has already been taxed in the hands of its associated enterprise in State B. paragraph 2 provides that in these

circumstances, State B shall make an appropriate adjustment so as to relieve the double taxation.

(Renumbered on 23 July 1992; see HISTORY)

6. It should be noted, however, that an adjustment is not automatically to be made in State B simply because the profits in State A have been increased; the adjustment is due only if State B considers that the figure of adjusted profits correctly reflects what the profits would have been if the transactions had been at arm's length. In other words, the paragraph may not be invoked and should not be applied where the profits of one associated enterprise are increased to a level which exceeds what they would have been if they had been correctly computed on an arm's length basis. State B is therefore committed to make an adjustment of the profits of the affiliated company only if it considers that the adjustment made in State A is justified both in principle and as regards the amount.

(Renumbered and amended on 23 July 1992; see HISTORY)

7. The paragraph does not specify the method by which an adjustment is to be made. OECD member countries use different methods to provide relief in these circumstances and it is therefore left open for Contracting States to agree bilaterally on any specific rules which they wish to add to the Article. Some States, for example, would prefer the system under which, where the profits of enterprise X in State A are increased to what they would have been on an arm's length basis, the adjustment would be made by re-opening the assessment on the associated enterprise Y in State B containing the doubly taxed profits in order to reduce the taxable profit by an appropriate amount. Some other States, on the other hand, would prefer to provide that, for the purposes of Article 23, the doubly taxed profits should be treated in the hands of enterprise Y of State B as if they may be taxed in State A; accordingly, the enterprise of State B is entitled to relief in State B, under Article 23, in respect of tax paid by its associate enterprise in State A.

(Renumbered on 23 July 1992; see HISTORY)

8. It is not the purpose of the paragraph to deal with what might be called "secondary adjustments". Suppose that an upward revision of taxable profits of enterprise X in State A has been made in accordance with the principle laid down in paragraph 1 and suppose also that an adjustment is made to the profits of enterprise Y in State B in accordance with the principle laid down in paragraph 2. The position has still not been restored exactly to what it would have been had the transactions taken place at arm's length prices because, as a matter of fact, the money representing the profits which are the subject of the adjustment is found in the hands of enterprise Y instead of in those of enterprise X. It can be argued that if arm's length pricing had operated and

enterprise X had subsequently wished to transfer these profits to enterprise Y, it would have done so in the form of, for example, a dividend or a royalty (if enterprise Y were the parent of enterprise X) or in the form of, for example, a loan (if enterprise X were the parent of enterprise Y) and that in those circumstances there could have been other tax consequences (*e.g.* the operation of a withholding tax) depending upon the type of income concerned and the provisions of the Article dealing with such income.

(Renumbered on 23 July 1992; see HISTORY)

9. These secondary adjustments, which would be required to establish the situation exactly as it would have been if transactions had been at arm's length, depend on the facts of the individual case. It should be noted that nothing in paragraph 2 prevents such secondary adjustments from being made where they are permitted under the domestic laws of Contracting States.

(Renumbered on 23 July 1992; see HISTORY)

10. The paragraph also leaves open the question whether there should be a period of time after the expiration of which State B would not be obliged to make an appropriate adjustment to the profits of enterprise Y following an upward revision of the profits of enterprise X in State A. Some States consider that State B's commitment should be open-ended — in other words, that however many years State A goes back to revise assessments, enterprise Y should in equity be assured of an appropriate adjustment in State B. Other States consider that an open-ended commitment of this sort is unreasonable as a matter of practical administration. In the circumstances, therefore, this problem has not been dealt with in the text of the Article; but Contracting States are left free in bilateral conventions to include, if they wish, provisions dealing with the length of time during which State B is to be under obligation to make an appropriate adjustment (see on this point paragraphs 39, 40 and 41 of the Commentary on Article 25).

(Amended on 17 July 2008; see HISTORY)

11. If there is a dispute between the parties concerned over the amount and character of the appropriate adjustment, the mutual agreement procedure provided for under Article 25 should be implemented; the Commentary on that Article contains a number of considerations applicable to adjustments of the profits of associated enterprises carried out on the basis of the present Article (following, in particular, adjustment of transfer prices) and to the corresponding adjustments which must then be made in pursuance of paragraph 2 thereof (see in particular paragraphs 10, 11, 12, 33, 34, 40 and 41 of the Commentary on Article 25).

(Amended on 17 July 2008; see HISTORY)

Observation on the Commentary

12. *(Renumbered and amended on 31 March 1994; see HISTORY)*

13. *(Deleted on 31 March 1994; see HISTORY)*

14. *(Deleted on 22 July 2010; see HISTORY)*

15. The *United States* observes that there may be reasonable ways to address cases of thin capitalisation other than changing the character of the financial instrument from debt to equity and the character of the payment from interest to a dividend. For instance, in appropriate cases, the character of the instrument (as debt) and the character of the payment (as interest) may be unchanged, but the taxing State may defer the deduction for interest paid that otherwise would be allowed in computing the borrower's net income.

(Added on 23 July 1992; see HISTORY)

Reservations on the Article

16. The *Czech Republic* and *Hungary* reserve the right not to insert paragraph 2 in their conventions but are prepared in the course of negotiations to accept this paragraph and at the same time to add a third paragraph limiting the potential corresponding adjustment to *bona fide* cases.

(Amended on 15 July 2005; see HISTORY)

17. *Germany* reserves the right not to insert paragraph 2 in its conventions but is prepared in the course of negotiations to accept this paragraph based on Germany's long-standing and unaltered understanding that the other Contracting State is only obliged to make an adjustment to the amount of tax to the extent that it agrees, unilaterally or in a mutual agreement procedure, with the adjustment of profits by the first-mentioned State.

(Added on 17 July 2008; see HISTORY)

17.1 *Italy* reserves the right to insert in its treaties a provision according to which it will make adjustments under paragraph 2 of Article 9 only in accordance with the procedure provided for by the mutual agreement article of the relevant treaty.

(Added on 17 July 2008; see HISTORY)

18. *Australia* reserves the right to propose a provision to the effect that, if the information available to the competent authority of a Contracting State is inadequate to determine the profits to be attributed to an enterprise, the competent authority may apply to that enterprise for that purpose the provisions of the taxation law of that State, subject to the qualification that

such law will be applied, as far as the information available to the competent authority permits, in accordance with the principles of this Article.

(Amended on 29 April 2000; see HISTORY)

19. *Slovenia* reserves the right to specify in paragraph 2 that a correlative adjustment will be made only if it considers that the primary adjustment is justified

(Added on 22 July 2010; see HISTORY)

HISTORY

Title: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title read as follows:

"COMMENTARY ON ARTICLE 9 ON THE TAXATION OF ASSOCIATED ENTERPRISES"

Paragraph 1: Corresponds to paragraph 3 as it read before 23 October 1997. Paragraph 1 was amended and renumbered as paragraph 2 (see history of paragraph 2) and paragraph 3 was amended and renumbered as paragraph 1 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. At the same time, the heading preceding paragraph 1 was moved with it. After 23 July 1992 and until 23 October 1997, paragraph 3 read as follows:

"3. The Committee has also studied the transfer pricing of goods, technology, trade marks and services between associated enterprises and the methodologies which may be applied for determining correct prices where transfers have been made on other than arm's length terms. Its conclusions, which are set out in the report entitled "Transfer Pricing and Multinational Enterprises",[1] represent internationally agreed principles and provide valid guidelines for the application of the arm's length principle which underlies the Article.

1 Adopted by the Council of the OECD on 16 May 1979. Published as "Transfer Pricing and Multinational Enterprises", OECD, Paris, 1979."

Paragraph 3, as it read after 23 July 1992, replaced paragraph 3 of the 1977 Model Convention. On 23 July 1992 paragraph 3 of the 1977 Model Convention was amended and renumbered as paragraph 6 (see history of paragraph 6) and a new paragraph 3 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraphs 30 to 32 of a previous report entitled "Double Taxation Conventions and the Use of Base Companies" (adopted by the OECD Council on 27 November 1986).

Paragraph 2: Corresponds to paragraph 1 as it read before 23 October 1997. On 23 October 1997 paragraph 2 was amended and renumbered as paragraph 3 (see history of paragraph 3), paragraph 1 was amended and renumbered as paragraph 2 and the heading preceding paragraph 1 was moved with it by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. In the 1977 Model Convention and until 23 October 1997, paragraph 1 read as follows:

"1. This Article deals with associated enterprises (parent and subsidiary companies and companies under common control) and its paragraph 1 provides that in such cases the taxation authorities of a Contracting State may for the purpose of calculating tax liabilities re-write the accounts of the enterprises if as a result of the special relations between the enterprises the accounts do not show

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

the true taxable profits arising in that State. It is evidently appropriate that adjustment should be sanctioned in such circumstances, and this paragraph seems to call for very little comment. It should perhaps be mentioned that the provisions of this paragraph apply only if special conditions have been made or imposed between the two enterprises. No re-writing of the accounts of associated enterprises is authorised if the transactions between such enterprises have taken place on normal open market commercial terms (on an arm's length basis)."

Paragraph 1 was previously amended and the heading preceding it was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

"1. This Article deals with associated enterprises (parent and subsidiary companies and companies under common control) and provides that in such cases the taxation authorities of a Contracting State may for the purpose of calculating tax liabilities re-write the accounts of the enterprises if as a result of the special relations between the enterprises the accounts do not show the true taxable profits arising in that country. It is evidently appropriate that rectification should be sanctioned in such circumstances, and the Article seems to call for very little comment. It should perhaps be mentioned that the provisions of the Article apply only if special conditions have been made or imposed between the two enterprises. No re-writing of the accounts of associated enterprises is authorised if the transactions between such enterprises have taken place on normal open market commercial terms."

C (9)

Paragraph 3: Corresponds to paragraph 2 as it read before 23 October 1997. Paragraph 3 was amended and renumbered as paragraph 1 (see history of paragraph 1) and paragraph 2 was amended, by replacing the footnote thereto, and renumbered as paragraph 3 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, the footnote to paragraph 2 read as follows:

"1 Adopted by the Council of the OECD on 26 November 1986. Published in *Thin Capitalisation — Taxation of Entertainers, Artistes and Sportsmen*, in "Issues in International Taxation" No. 2, OECD, Paris, 1987."

Paragraph 2 as it read after 23 July 1992 replaced paragraph 2 of the 1977 Model Convention. Paragraph 2 of the 1977 Model Convention was renumbered as paragraph 5 (see history of paragraph 5), the heading preceding paragraph 2 was moved with it and a new paragraph 2 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraphs 48, 50 and 84 of a previous report entitled "Thin Capitalisation" (adopted by the OECD Council on 26 November 1986).

Paragraph 4: Replaced paragraph 4 of the 1977 Model Convention on 23 July 1992. Paragraph 4 of the 1977 Model Convention was renumbered as paragraph 7 (see history of paragraph 7) and a new paragraph 4 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraphs 30 to 32 of a previous report entitled "Double Taxation Conventions and the Use of Base Companies" (adopted by the OECD Council on 27 November 1986).

Paragraph 5: Corresponds to paragraph 2 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 5 of the 1977 Model Convention was renumbered as paragraph 8 (see history of paragraph 8) and paragraph 2 was renumbered as paragraph 5 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. At the same time, the heading preceding paragraph 2 was moved with it.

Paragraph 2 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 6: Corresponds to paragraph 3 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 6 of the 1977 Model Convention was renumbered as paragraph 9 (see history of paragraph 9) and paragraph 3 was renumbered as paragraph 6 and its second sentence amended by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of a previous report entitled "Transfer Pricing, Corresponding Adjustments and the Mutual Agreement Procedure" (adopted by the OECD Council on 24 November 1982). In the 1977 Model Convention and until 23 July 1992, paragraph 3 read as follows:

> "3. It should be noted, however, that an adjustment is not automatically to be made in State B simply because the profits in State A have been increased; the adjustment is due only if State B considers that the figure of adjusted profits correctly reflects what the profits would have been if the transactions had been at arm's length. In other words, the paragraph does not seek to avoid a double charge to tax which arises where the profits of one associated enterprise are increased to a level which exceeds what they would have been if they had been correctly computed on an arm's length basis. State B is therefore committed to make an adjustment of the profits of the affiliated company only if it considers that the adjustment made in State A is justified both in principle and as regards the amount."

Paragraph 3 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 7: Corresponds to paragraph 4 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 7 of the 1977 Model Convention was amended and renumbered as paragraph 10 (see history of paragraph 10) and paragraph 4 was renumbered as paragraph 7 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 4 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 8: Corresponds to paragraph 5 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 8 of the 1977 Model Convention was amended and renumbered as paragraph 11 (see history of paragraph 11) and paragraph 5 was renumbered as paragraph 8 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 5 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 9: Corresponds to paragraph 6 of the 1977 Model Convention as it read before 23 July 1992. Paragraph 9 of the 1977 Model Convention was renumbered as paragraph 12 (see history of paragraph 18) and paragraph 6 was renumbered as paragraph 9 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. At the same time, the heading preceding paragraph 9 was moved with it.

Paragraph 6 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 10: Amended on 17 July 2008, by replacing the cross-references to paragraphs "28, 29 and 30" of the Commentary on Article 25 by "39, 40 and 41" respectively, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Treaty Disputes" (adopted by the OECD Committee

on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 10 read as follows:

"10. The paragraph also leaves open the question whether there should be a period of time after the expiration of which State B would not be obliged to make an appropriate adjustment to the profits of enterprise Y following an upward revision of the profits of enterprise X in State A. Some States consider that State B's commitment should be open-ended — in other words, that however many years State A goes back to revise assessments, enterprise Y should in equity be assured of an appropriate adjustment in State B. Other States consider that an open-ended commitment of this sort is unreasonable as a matter of practical administration. In the circumstances, therefore, this problem has not been dealt with in the text of the Article; but Contracting States are left free in bilateral conventions to include, if they wish, provisions dealing with the length of time during which State B is to be under obligation to make an appropriate adjustment (see on this point paragraphs 28, 29 and 30 of the Commentary on Article 25)."

Paragraph 10, as it read after 23 July 1992, corresponded to paragraph 7 of the 1977 Model Convention. Paragraph 10 of the 1977 Model Convention was renumbered as paragraph 13 (see history of paragraph 13) and paragraph 7 was renumbered as paragraph 10 and amended, by adding the reference to the Commentary on Article 25 at the end thereof, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 7 read as follows:

"7. The paragraph also leaves open the question whether there should be a period of time after the expiration of which State B would not be obliged to make an appropriate adjustment to the profits of enterprise Y following an upward revision of the profits of enterprise X in State A. Some States consider that State B's commitment should be open-ended — in other words, that however many years State A goes back to revise assessments, enterprise Y should in equity be assured of an appropriate adjustment in State B. Other States consider that an open-ended commitment of this sort is unreasonable as a matter of practical administration. In the circumstances, therefore, this problem has not been dealt with in the text of the Article; but Contracting States are left free in bilateral conventions to include, if they wish, provisions dealing with the length of time during which State B is to be under obligation to make an appropriate adjustment."

Paragraph 7 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 11: Amended by replacing the cross-references to "9, 10, 22, 23, 29 and 30 of the Commentary on Article 25" with "10, 11, 12, 33, 34, 40 and 41" by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Improving the Resolution of Tax Treaty Disputes" (adopted by the OECD Committee on Fiscal Affairs on 30 January 2007). After 23 July 1992 and until 17 July 2008, paragraph 11 read as follows:

"11. If there is a dispute between the parties concerned over the amount and character of the appropriate adjustment, the mutual agreement procedure provided for under Article 25 should be implemented; the Commentary on that Article contains a number of considerations applicable to adjustments of the profits of associated enterprises carried out on the basis of the present Article (following, in particular, adjustment of transfer prices) and to the corresponding adjustments which must then be made in pursuance of paragraph 2 thereof (see in particular paragraphs 9, 10, 22, 23, 29 and 30 of the Commentary on Article 25)."

Paragraph 11 as it read after 23 July 1992 corresponded to paragraph 8 of the 1977 Model Convention. On 23 July 1992 paragraph 11 of the 1977 Model Convention was amended and renumbered as paragraph 16 (see history of paragraph 16), the heading preceding paragraph 11 was moved with it and paragraph 8 was amended and renumbered as paragraph 11 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 8 read as follows:

"8. If there is a dispute between the interested parties over the character and amount of the appropriate adjustment, the matter will be dealt with in the same way as any other question of fact; if necessary the competent authorities may consult each other."

Paragraph 8 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 12: Amended and renumbered as paragraph 18 (see history of paragraph 18) on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 13: Deleted on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 13 read as follows:

"13. *Australia* would wish that, in this Article, there be provision that will permit resort to domestic law in relation to the taxation of the profits of an insurance enterprise."

Paragraph 13, as it read after 23 July 1992, corresponded to paragraph 10 of the 1977 Model Convention, which was renumbered as paragraph 13 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 10 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 14: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until 22 July 2010, paragraph 14 read as follows:

"14. *Germany* does not agree with the use of the term "arm's length profits" in paragraph 2 above."

Paragraph 14 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 89 of a previous report entitled "Thin Capitalisation" (adopted by the OECD Council on 26 November 1986).

Paragraph 15: Added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 16: Amended on 15 July 2005, by deleting Finland, Mexico, Norway and Switzerland from the list of countries making the reservation, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 16 read as follows:

"16. The *Czech Republic*, *Finland*, *Hungary*, *Mexico*, *Norway* and *Switzerland* reserve the right not to insert paragraph 2 in their conventions. The *Czech Republic*, however, is prepared in the course of negotiations to accept this paragraph and at the same time to add a third paragraph limiting the potential corresponding adjustment to bona fide cases."

Paragraph 16 was previously amended on 29 April 2000, by deleting Portugal from the list of countries making the reservation, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 16 read as follows:

> "16. The *Czech Republic*, *Finland*, *Hungary*, *Mexico*, *Norway*, *Portugal* and *Switzerland* reserve the right not to insert paragraph 2 in their conventions. The *Czech Republic*, however, is prepared in the course of negotiations to accept this paragraph and at the same time to add a third paragraph limiting the potential corresponding adjustment to bona fide cases."

Paragraph 16 was previously amended on 23 October 1997, by changing the list of countries making the reservation to delete Belgium and add the Czech Republic and Hungary, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 16 read as follows:

> "16. *Belgium*, *Finland*, *Mexico*, *Norway*, *Portugal* and *Switzerland* reserve the right not to insert paragraph 2 in their conventions."

Paragraph 16 was previously amended on 21 September 1995, by adding Mexico to the list of countries making the reservation, on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 16 as it read after 23 July 1992 corresponded to paragraph 11 of the 1977 Model Convention. On 23 July 1992, paragraph 11 was amended and renumbered as paragraph 16 and the heading preceding paragraph 11was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 11 read as follows:

> "11. *Belgium*, *Finland*, *Germany*, *Italy*, *Japan*, *Portugal* and *Switzerland* reserve the right not to insert paragraph 2 in their conventions."

Paragraph 11 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 17: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 17 as it read before 15 July 2005 was deleted by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 17 read as follows:

> "17. With respect to paragraph 2, *Belgium*, *France*, *Hungary*, *Poland* and *Portugal* reserve the right to specify in their conventions that they will proceed to a correlative adjustment if they consider this adjustment to be justified."

Paragraph 17 was amended on 29 April 2000, by adding Portugal to the list of countries making the reservation, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 17 read as follows:

> "17. With respect to paragraph 2, *Belgium*, *France*, *Hungary* and *Poland* reserve the right to specify in their conventions that they will proceed to a correlative adjustment if they consider this adjustment to be justified."

Paragraph 17 was previously amended on 23 October 1997, by adding Belgium, Hungary and Poland to the list of countries making the reservation, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, paragraph 17 read as follows:

"17. With respect to paragraph 2, *France* reserves the right to specify in its conventions that it will proceed to a correlative adjustment if it considers this adjustment to be justified."

Paragraph 17 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 17.1: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 18: Amended on 29 April 2000, by deleting New Zealand from the list of countries making the reservation, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 18 read as follows:

"18. *Australia* and *New Zealand* reserve the right to propose a provision to the effect that, if the information available to the competent authority of a Contracting State is inadequate to determine the profits to be attributed to an enterprise, the competent authority may apply to that enterprise for that purpose the provisions of the taxation law of that State, subject to the qualification that such law will be applied, as far as the information available to the competent authority permits, in accordance with the principles of this Article."

Paragraph 18 was previously amended on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 31 March 1994 and until 23 October 1997, paragraph 18 read as follows:

"18. In negotiating conventions with other member countries, *Australia* and *New Zealand* reserve the right to propose a provision to the effect that, if the information available to the competent authority of a Contracting State is inadequate to determine the profits to be attributed to an enterprise, the competent authority may apply to that enterprise for that purpose the provisions of the taxation law of that State, subject to the qualification that such law will be applied, as far as the information available to the competent authority permits, in accordance with the principles of this Article."

Paragraph 18 corresponded to paragraph 12, as it read before 31 March 1994. Paragraph 12 was amended and renumbered as paragraph 18 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 12 read as follows:

"12. In negotiating conventions with other member countries, *Australia* and *New Zealand* would wish to be free to propose a provision to the effect that, if the information available to the competent authority of a Contracting State is inadequate to determine the profits to be attributed to an enterprise, the competent authority may apply to that enterprise for that purpose the provisions of the taxation law of that State, subject to the qualification that such law will be applied, as far as the information available to the competent authority permits, in accordance with the principles of this Article."

Paragraph 12, as it read after 23 July 1992, corresponded to paragraph 9 of the 1977 Model Convention. On 23 July 1992 paragraph 12 of the 1977 Model Convention was deleted, paragraph 9 was renumbered as paragraph 12 and the heading preceding paragraph 9 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 9 of the 1977 Model Convention and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 12 read as follows:

> "12. The *United States* believes that this Article should apply to all related persons, not just an enterprise of one Contracting State and a related enterprise of the other Contracting State, and that it should apply to "income, deductions, credits or allowances", not just to "profits"."

Paragraph 12 of the 1977 Model Convention was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 19: Added on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010

Paragraph 19 was previously deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 19 read as follows:

> "19. *Canada* reserves the right not to insert paragraph 2 in its conventions unless the commitment to make an adjustment is subject to certain time limitations and does not apply in the case of fraud, wilful default or neglect."

Paragraph 19 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

COMMENTARY ON ARTICLE 10
CONCERNING THE TAXATION OF DIVIDENDS

I. Preliminary remarks

1. By "dividends" is generally meant the distribution of profits to the shareholders by companies limited by shares[1], limited partnerships with share capital[2], limited liability companies[3] or other joint stock companies.[4] Under the laws of the OECD member countries, such joint stock companies are legal entities with a separate juridical personality distinct from all their shareholders. On this point, they differ from partnerships insofar as the latter do not have juridical personality in most countries.

(Amended on 11 April 1977; see HISTORY)

2. The profits of a business carried on by a partnership are the partners' profits derived from their own exertions; for them they are business profits. So the partner is ordinarily taxed personally on his share of the partnership capital and partnership profits.

(Amended on 29 April 2000; see HISTORY)

3. The position is different for the shareholder; he is not a trader and the company's profits are not his; so they cannot be attributed to him. He is personally taxable only on those profits which are distributed by the company (apart from the provisions in certain countries' laws relating to the taxation of undistributed profits in special cases). From the shareholders' standpoint, dividends are income from the capital which they have made available to the company as its shareholders.

(Added on 30 July 1963; see HISTORY)

II. Commentary on the provisions of the Article

Paragraph 1

4. Paragraph 1 does not prescribe the principle of taxation of dividends either exclusively in the State of the beneficiary's residence or exclusively in the State of which the company paying the dividends is a resident.

(Renumbered and amended on 11 April 1977; see HISTORY)

5. Taxation of dividends exclusively in the State of source is not acceptable as a general rule. Furthermore, there are some States which do not have

1 *Sociétés anonymes.*
2 *Sociétés en commandite par actions.*
3 *Sociétés à responsabilité limitée.*
4 *Sociétés de capitaux.*

taxation of dividends at the source, while as a general rule, all the States tax residents in respect of dividends they receive from non-resident companies.

(Renumbered and amended on 11 April 1977; see HISTORY)

6. On the other hand, taxation of dividends exclusively in the State of the beneficiary's residence is not feasible as a general rule. It would be more in keeping with the nature of dividends, which are investment income, but it would be unrealistic to suppose that there is any prospect of it being agreed that all taxation of dividends at the source should be relinquished.

(Renumbered and amended on 11 April 1977; see HISTORY)

7. For this reason, paragraph 1 states simply that dividends may be taxed in the State of the beneficiary's residence. The term "paid" has a very wide meaning, since the concept of payment means the fulfilment of the obligation to put funds at the disposal of the shareholder in the manner required by contract or by custom.

(Renumbered and amended on 11 April 1977; see HISTORY)

8. The Article deals only with dividends paid by a company which is a resident of a Contracting State to a resident of the other Contracting State. It does not, therefore, apply to dividends paid by a company which is a resident of a third State or to dividends paid by a company which is a resident of a Contracting State which are attributable to a permanent establishment which an enterprise of that State has in the other Contracting State (for these cases, see paragraphs 4 to 6 of the Commentary on Article 21).

(Replaced on 11 April 1977; see HISTORY)

Paragraph 2

9. Paragraph 2 reserves a right to tax to the State of source of the dividends, *i.e.* to the State of which the company paying the dividends is a resident; this right to tax, however, is limited considerably. The rate of tax is limited to 15 per cent, which appears to be a reasonable maximum figure. A higher rate could hardly be justified since the State of source can already tax the company's profits.

(Renumbered and amended on 11 April 1977; see HISTORY)

10. On the other hand, a lower rate (5 per cent) is expressly provided in respect of dividends paid by a subsidiary company to its parent company. If a company of one of the States owns directly a holding of at least 25 per cent in a company of the other State, it is reasonable that payments of profits by the subsidiary to the foreign parent company should be taxed less heavily to avoid recurrent taxation and to facilitate international investment. The realisation of this intention depends on the fiscal treatment of the dividends in the State

of which the parent company is a resident (see paragraphs 49 to 54 of the Commentary on Articles 23 A and 23 B).

(Renumbered and amended on 11 April 1977; see HISTORY)

11. If a partnership is treated as a body corporate under the domestic laws applying to it, the two Contracting States may agree to modify subparagraph *a)* of paragraph 2 in a way to give the benefits of the reduced rate provided for parent companies also to such partnership.

(Renumbered and amended on 11 April 1977; see HISTORY)

12. The requirement of beneficial ownership was introduced in paragraph 2 of Article 10 to clarify the meaning of the words "paid ... to a resident" as they are used in paragraph 1 of the Article. It makes plain that the State of source is not obliged to give up taxing rights over dividend income merely because that income was immediately received by a resident of a State with which the State of source had concluded a convention. The term "beneficial owner" is not used in a narrow technical sense, rather, it should be understood in its context and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance.

(Replaced on 28 January 2003; see HISTORY)

12.1 Where an item of income is received by a resident of a Contracting State acting in the capacity of agent or nominee it would be inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption merely on account of the status of the immediate recipient of the income as a resident of the other Contracting State. The immediate recipient of the income in this situation qualifies as a resident but no potential double taxation arises as a consequence of that status since the recipient is not treated as the owner of the income for tax purposes in the State of residence. It would be equally inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption where a resident of a Contracting State, otherwise than through an agency or nominee relationship, simply acts as a conduit for another person who in fact receives the benefit of the income concerned. For these reasons, the report from the Committee on Fiscal Affairs entitled "Double Taxation Conventions and the Use of Conduit Companies"[1] concludes that a conduit company cannot normally be regarded as the beneficial owner if, though the formal owner, it has, as a practical matter, very narrow powers which render it, in relation to the income concerned, a mere fiduciary or administrator acting on account of the interested parties.

(Added on 28 January 2003; see HISTORY)

1 Reproduced in Volume II at page R(6)-1.

12.2 Subject to other conditions imposed by the Article, the limitation of tax in the State of source remains available when an intermediary, such as an agent or nominee located in a Contracting State or in a third State, is interposed between the beneficiary and the payer but the beneficial owner is a resident of the other Contracting State (the text of the Model was amended in 1995 to clarify this point, which has been the consistent position of all member countries). States which wish to make this more explicit are free to do so during bilateral negotiations.

(Added on 28 January 2003; see HISTORY)

13. The tax rates fixed by the Article for the tax in the State of source are maximum rates. The States may agree, in bilateral negotiations, on lower rates or even on taxation exclusively in the State of the beneficiary's residence. The reduction of rates provided for in paragraph 2 refers solely to the taxation of dividends and not to the taxation of the profits of the company paying the dividends.

(Renumbered and amended on 11 April 1977; see HISTORY)

13.1 Under the domestic laws of many States, pension funds and similar entities are generally exempt from tax on their investment income. In order to achieve neutrality of treatment as regards domestic and foreign investments by these entities, some States provide bilaterally that income, including dividends, derived by such an entity resident of the other State shall be exempt from source taxation. States wishing to do so may agree bilaterally on a provision drafted along the lines of the provision found in paragraph 69 of the Commentary on Article 18.

(Added on 15 July 2005; see HISTORY)

13.2 Similarly, some States refrain from levying tax on dividends paid to other States and some of their wholly-owned entities, at least to the extent that such dividends are derived from activities of a governmental nature. Some States are able to grant such an exemption under their interpretation of the sovereign immunity principle (see paragraphs 6.38 and 6.39 of the Commentary on Article 1); others may do it pursuant to provisions of their domestic law. States wishing to do so may confirm or clarify, in their bilateral conventions, the scope of these exemptions or grant such an exemption in cases where it would not otherwise be available. This may be done by adding to the Article an additional paragraph drafted along the following lines:

> Notwithstanding the provisions of paragraph 2, dividends referred to in paragraph 1 shall be taxable only in the Contracting State of which the recipient is a resident if the beneficial owner of the dividends is that State or a political subdivision or local authority thereof.

(Added on 22 July 2010; see HISTORY)

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

14. The two Contracting States may also, during bilateral negotiations, agree to a holding percentage lower than that fixed in the Article. A lower percentage is, for instance, justified in cases where the State of residence of the parent company, in accordance with its domestic law, grants exemption to such a company for dividends derived from a holding of less than 25 per cent in a non-resident subsidiary.

(Renumbered and amended on 11 April 1977; see HISTORY)

15. In subparagraph *a)* of paragraph 2, the term "capital" is used in relation to the taxation treatment of dividends, *i.e.* distributions of profits to shareholders. The use of this term in this context implies that, for the purposes of subparagraph *a)*, it should be used in the sense in which it is used for the purposes of distribution to the shareholder (in the particular case, the parent company).

a) As a general rule, therefore, the term "capital" in subparagraph *a)* should be understood as it is understood in company law. Other elements, in particular the reserves, are not to be taken into account.

b) Capital, as understood in company law, should be indicated in terms of par value of all shares which in the majority of cases will be shown as capital in the company's balance sheet.

c) No account need be taken of differences due to the different classes of shares issued (ordinary shares, preference shares, plural voting shares, non-voting shares, bearer shares, registered shares, etc.), as such differences relate more to the nature of the shareholder's right than to the extent of his ownership of the capital.

d) When a loan or other contribution to the company does not, strictly speaking, come as capital under company law but when on the basis of internal law or practice ("thin capitalisation", or assimilation of a loan to share capital), the income derived in respect thereof is treated as dividend under Article 10, the value of such loan or contribution is also to be taken as "capital" within the meaning of subparagraph *a)*.

e) In the case of bodies which do not have a capital within the meaning of company law, capital for the purpose of subparagraph *a)* is to be taken as meaning the total of all contributions to the body which are taken into account for the purpose of distributing profits.

In bilateral negotiations, Contracting States may depart from the criterion of "capital" used in subparagraph *a)* of paragraph 2 and use instead the criterion of "voting power".

(Replaced on 11 April 1977; see HISTORY)

16. Subparagraph *a)* of paragraph 2 does not require that the company receiving the dividends must have owned at least 25 per cent of the capital for a relatively long time before the date of the distribution. This means that all that counts regarding the holding is the situation prevailing at the time material for the coming into existence of the liability to the tax to which paragraph 2 applies, *i.e.* in most cases the situation existing at the time when the dividends become legally available to the shareholders. The primary reason for this resides in the desire to have a provision which is applicable as broadly as possible. To require the parent company to have possessed the minimum holding for a certain time before the distribution of the profits could involve extensive inquiries. Internal laws of certain OECD member countries provide for a minimum period during which the recipient company must have held the shares to qualify for exemption or relief in respect of dividends received. In view of this, Contracting States may include a similar condition in their conventions.

(Replaced on 11 April 1977; see HISTORY)

17. The reduction envisaged in subparagraph *a)* of paragraph 2 should not be granted in cases of abuse of this provision, for example, where a company with a holding of less than 25 per cent has, shortly before the dividends become payable, increased its holding primarily for the purpose of securing the benefits of the above-mentioned provision, or otherwise, where the qualifying holding was arranged primarily in order to obtain the reduction. To counteract such manoeuvres Contracting States may find it appropriate to add to subparagraph *a*) a provision along the following lines:

> provided that this holding was not acquired primarily for the purpose of taking advantage of this provision.

(Replaced on 22 July 2010; see HISTORY)

18. Paragraph 2 lays down nothing about the mode of taxation in the State of source. It therefore leaves that State free to apply its own laws and, in particular, to levy the tax either by deduction at source or by individual assessment.

(Renumbered and amended on 11 April 1977; see HISTORY)

19. The paragraph does not settle procedural questions. Each State should be able to use the procedure provided in its own laws. It can either forthwith limit its tax to the rates given in the Article or tax in full and make a refund (see, however, paragraph 26.2 of the Commentary on Article 1). Specific questions arise with triangular cases (see paragraph 71 of the Commentary on Article 24).

(Amended on 17 July 2008; see HISTORY)

20. It does not specify whether or not the relief in the State of source should be conditional upon the dividends being subject to tax in the State of residence. This question can be settled by bilateral negotiations.

(Renumbered and amended on 11 April 1977; see HISTORY)

21. The Article contains no provisions as to how the State of the beneficiary's residence should make allowance for the taxation in the State of source of the dividends. This question is dealt with in Articles 23 A and 23 B.

(Renumbered and amended on 11 April 1977; see HISTORY)

22. Attention is drawn generally to the following case: the beneficial owner of the dividends arising in a Contracting State is a company resident of the other Contracting State; all or part of its capital is held by shareholders resident outside that other State; its practice is not to distribute its profits in the form of dividends; and it enjoys preferential taxation treatment (private investment company, base company). The question may arise whether in the case of such a company it is justifiable to allow in the State of source of the dividends the limitation of tax which is provided in paragraph 2. It may be appropriate, when bilateral negotiations are being conducted, to agree upon special exceptions to the taxing rule laid down in this Article, in order to define the treatment applicable to such companies.

(Renumbered and amended on 11 April 1977; see HISTORY)

Paragraph 3

23. In view of the great differences between the laws of OECD member countries, it is impossible to define "dividends" fully and exhaustively. Consequently, the definition merely mentions examples which are to be found in the majority of the member countries' laws and which, in any case, are not treated differently in them. The enumeration is followed up by a general formula. In the course of the revision of the 1963 Draft Convention, a thorough study has been undertaken to find a solution that does not refer to domestic laws. This study has led to the conclusion that, in view of the still remaining dissimilarities between member countries in the field of company law and taxation law, it did not appear to be possible to work out a definition of the concept of dividends that would be independent of domestic laws. It is open to the Contracting States, through bilateral negotiations, to make allowance for peculiarities of their laws and to agree to bring under the definition of "dividends" other payments by companies falling under the Article.

(Amended on 23 July 1992; see HISTORY)

24. The notion of dividends basically concerns distributions by companies within the meaning of subparagraph *b)* of paragraph 1 of Article 3. Therefore the definition relates, in the first instance, to distributions of profits the title

to which is constituted by shares, that is holdings in a company limited by shares (joint stock company). The definition assimilates to shares all securities issued by companies which carry a right to participate in the companies' profits without being debt-claims; such are, for example, "jouissance" shares or "jouissance" rights, founders' shares or other rights participating in profits. In bilateral conventions, of course, this enumeration may be adapted to the legal situation in the Contracting States concerned. This may be necessary in particular, as regards income from "jouissance" shares and founders' shares. On the other hand, debt-claims participating in profits do not come into this category (see paragraph 19 of the Commentary on Article 11); likewise interest on convertible debentures is not a dividend.

(Amended on 23 July 1992; see HISTORY)

25. Article 10 deals not only with dividends as such but also with interest on loans insofar as the lender effectively shares the risks run by the company, *i.e.* when repayment depends largely on the success or otherwise of the enterprise's business. Articles 10 and 11 do not therefore prevent the treatment of this type of interest as dividends under the national rules on thin capitalisation applied in the borrower's country. The question whether the contributor of the loan shares the risks run by the enterprise must be determined in each individual case in the light of all the circumstances, as for example the following:

- — the loan very heavily outweighs any other contribution to the enterprise's capital (or was taken out to replace a substantial proportion of capital which has been lost) and is substantially unmatched by redeemable assets;
- — the creditor will share in any profits of the company;
- — repayment of the loan is subordinated to claims of other creditors or to the payment of dividends;
- — the level or payment of interest would depend on the profits of the company;
- — the loan contract contains no fixed provisions for repayment by a definite date.

(Replaced on 23 July 1992; see HISTORY)

26. The laws of many of the States put participations in a *société à responsabilité limitée* (limited liability company) on the same footing as shares. Likewise, distributions of profits by co-operative societies are generally regarded as dividends.

(Renumbered on 23 July 1992; see HISTORY)

27. Distributions of profits by partnerships are not dividends within the meaning of the definition, unless the partnerships are subject, in the State where their place of effective management is situated, to a fiscal treatment substantially similar to that applied to companies limited by shares (for instance, in Belgium, Portugal and Spain, also in France as regards distributions to *commanditaires* in the *sociétés en commandite simple*). On the other hand, clarification in bilateral conventions may be necessary in cases where the taxation law of a Contracting State gives the owner of holdings in a company a right to opt, under certain conditions, for being taxed as a partner of a partnership, or, vice versa, gives the partner of a partnership the right to opt for taxation as the owner of holdings in a company.

(Renumbered on 23 July 1992; see HISTORY)

28. Payments regarded as dividends may include not only distributions of profits decided by annual general meetings of shareholders, but also other benefits in money or money's worth, such as bonus shares, bonuses, profits on a liquidation and disguised distributions of profits. The reliefs provided in the Article apply so long as the State of which the paying company is a resident taxes such benefits as dividends. It is immaterial whether any such benefits are paid out of current profits made by the company or are derived, for example, from reserves, *i.e.* profits of previous financial years. Normally, distributions by a company which have the effect of reducing the membership rights, for instance, payments constituting a reimbursement of capital in any form whatever, are not regarded as dividends.

(Renumbered on 23 July 1992; see HISTORY)

29. The benefits to which a holding in a company confer entitlement are, as a general rule, available solely to the shareholders themselves. Should, however, certain of such benefits be made available to persons who are not shareholders within the meaning of company law, they may constitute dividends if:

— the legal relations between such persons and the company are assimilated to a holding in a company ("concealed holdings"); and

— the persons receiving such benefits are closely connected with a shareholder; this is the case, for example, where the recipient is a relative of the shareholder or is a company belonging to the same group as the company owning the shares.

(Renumbered on 23 July 1992; see HISTORY)

30. When the shareholder and the person receiving such benefits are residents of two different States with which the State of source has concluded conventions, differences of views may arise as to which of these conventions is applicable. A similar problem may arise when the State of source has

concluded a convention with one of the States but not with the other. This, however, is a conflict which may affect other types of income, and the solution to it can be found only through an arrangement under the mutual agreement procedure.

(Renumbered on 23 July 1992; see HISTORY)

Paragraph 4

31. Certain States consider that dividends, interest and royalties arising from sources in their territory and payable to individuals or legal persons who are residents of other States fall outside the scope of the arrangement made to prevent them from being taxed both in the State of source and in the State of the beneficiary's residence when the beneficiary has a permanent establishment in the former State. paragraph 4 is not based on such a conception which is sometimes referred to as "the force of attraction of the permanent establishment". It does not stipulate that dividends flowing to a resident of a Contracting State from a source situated in the other State must, by a kind of legal presumption, or fiction even, be related to a permanent establishment which that resident may have in the latter State, so that the said State would not be obliged to limit its taxation in such a case. The paragraph merely provides that in the State of source the dividends are taxable as part of the profits of the permanent establishment there owned by the beneficiary which is a resident of the other State, if they are paid in respect of holdings forming part of the assets of the permanent establishment or otherwise effectively connected with that establishment. In that case, paragraph 4 relieves the State of source of the dividends from any limitations under the Article. The foregoing explanations accord with those in the Commentary on Article 7.

(Renumbered on 23 July 1992; see HISTORY)

32. It has been suggested that the paragraph could give rise to abuses through the transfer of shares to permanent establishments set up solely for that purpose in countries that offer preferential treatment to dividend income. Apart from the fact that such abusive transactions might trigger the application of domestic anti-abuse rules, it must be recognised that a particular location can only constitute a permanent establishment if a business is carried on therein and, as explained below, that the requirement that a shareholding be "effectively connected" to such a location requires more than merely recording the shareholding in the books of the permanent establishment for accounting purposes.

(Amended on 22 July 2010; see HISTORY)

32.1 A holding in respect of which dividends are paid will be effectively connected with a permanent establishment, and will therefore form part of its business assets, if the "economic" ownership of the holding is allocated to that permanent establishment under the principles developed in the Committee's report entitled *Attribution of Profits to Permanent Establishments*[1] (see in particular paragraphs 72-97 of Part I of the report) for the purposes of the application of paragraph 2 of Article 7. In the context of that paragraph, the "economic" ownership of a holding means the equivalent of ownership for income tax purposes by a separate enterprise, with the attendant benefits and burdens (*e.g.* the right to the dividends attributable to the ownership of the holding and the potential exposure to gains or losses from the appreciation or depreciation of the holding).

(Added on 22 July 2010; see HISTORY)

32.2 In the case of the permanent establishment of an enterprise carrying on insurance activities, the determination of whether a holding is effectively connected with the permanent establishment shall be made by giving due regard to the guidance set forth in Part IV of the Committee's report with respect to whether the income on or gain from that holding is taken into account in determining the permanent establishment's yield on the amount of investment assets attributed to it (see in particular paragraphs 165-170 of Part IV). That guidance being general in nature, tax authorities should consider applying a flexible and pragmatic approach which would take into account an enterprise's reasonable and consistent application of that guidance for purposes of identifying the specific assets that are effectively connected with the permanent establishment.

(Added on 22 July 2010; see HISTORY)

Paragraph 5

33. The Article deals only with dividends paid by a company which is a resident of a Contracting State to a resident of the other State. Certain States, however, tax not only dividends paid by companies resident therein but even distributions by non-resident companies of profits arising within their territory. Each State, of course, is entitled to tax profits arising in its territory which are made by non-resident companies, to the extent provided in the Convention (in particular in Article 7). The shareholders of such companies should not be taxed as well at any rate, unless they are residents of the State and so naturally subject to its fiscal sovereignty.

(Renumbered on 23 July 1992; see HISTORY)

1 *Attribution of Profits to Permanent Establishments*, OECD, Paris, 2010.

34. Paragraph 5 rules out the extra-territorial taxation of dividends, *i.e.* the practice by which States tax dividends distributed by a non-resident company solely because the corporate profits from which the distributions are made originated in their territory (for example, realised through a permanent establishment situated therein). There is, of course, no question of extra-territorial taxation when the country of source of the corporate profits taxes the dividends because they are paid to a shareholder who is a resident of that State or to a permanent establishment situated in that State.

(Amended on 29 April 2000; see HISTORY)

35. Moreover, it can be argued that such a provision does not aim at, or cannot result in, preventing a State from subjecting the dividends to a withholding tax when distributed by foreign companies if they are cashed in its territory. Indeed, in such a case, the criterion for tax liability is the fact of the payment of the dividends, and not the origin of the corporate profits allotted for distribution. But if the person cashing the dividends in a Contracting State is a resident of the other Contracting State (of which the distributing company is a resident), he may under Article 21 obtain exemption from, or refund of, the withholding tax of the first-mentioned State. Similarly, if the beneficiary of the dividends is a resident of a third State which had concluded a double taxation convention with the State where the dividends are cashed, he may, under Article 21 of that convention, obtain exemption from, or refund of, the withholding tax of the last-mentioned State.

(Renumbered on 23 July 1992; see HISTORY)

36. Paragraph 5 further provides that non-resident companies are not to be subjected to special taxes on undistributed profits.

(Renumbered on 23 July 1992; see HISTORY)

37. It might be argued that where the taxpayer's country of residence, pursuant to its controlled foreign companies legislation or other rules with similar effect seeks to tax profits which have not been distributed, it is acting contrary to the provisions of paragraph 5. However, it should be noted that the paragraph is confined to taxation at source and, thus, has no bearing on the taxation at residence under such legislation or rules. In addition, the paragraph concerns only the taxation of the company and not that of the shareholder.

(Amended on 28 January 2003; see HISTORY)

38. The application of such legislation or rules may, however, complicate the application of Article 23. If the income were attributed to the taxpayer then each item of the income would have to be treated under the relevant provisions of the Convention (business profits, interest, royalties). If the

amount is treated as a deemed dividend then it is clearly derived from the base company thus constituting income from that company's country. Even then, it is by no means clear whether the taxable amount is to be regarded as a dividend within the meaning of Article 10 or as "other income" within the meaning of Article 21. Under some of these legislation or rules the taxable amount is treated as a dividend with the result that an exemption provided for by a tax convention, *e.g.* an affiliation exemption, is also extended to it. It is doubtful whether the Convention requires this to be done. If the country of residence considers that this is not the case it may face the allegation that it is obstructing the normal operation of the affiliation exemption by taxing the dividend (in the form of "deemed dividend") in advance.

(Amended on 28 January 2003; see HISTORY)

39. Where dividends are actually distributed by the base company, the provisions of a bilateral convention regarding dividends have to be applied in the normal way because there is dividend income within the meaning of the convention. Thus, the country of the base company may subject the dividend to a withholding tax. The country of residence of the shareholder will apply the normal methods for the elimination of double taxation (*i.e.* tax credit or tax exemption is granted). This implies that the withholding tax on the dividend should be credited in the shareholder's country of residence, even if the distributed profit (the dividend) has been taxed years before under controlled foreign companies legislation or other rules with similar effect. However, the obligation to give credit in that case remains doubtful. Generally the dividend as such is exempted from tax (as it was already taxed under the relevant legislation or rules) and one might argue that there is no basis for a tax credit. On the other hand, the purpose of the treaty would be frustrated if the crediting of taxes could be avoided by simply anticipating the dividend taxation under counteracting legislation. The general principle set out above would suggest that the credit should be granted, though the details may depend on the technicalities of the relevant legislation or rules) and the system for crediting foreign taxes against domestic tax, as well as on the particularities of the case (*e.g.* time lapsed since the taxation of the "deemed dividend"). However, taxpayers who have recourse to artificial arrangements are taking risks against which they cannot fully be safeguarded by tax authorities.

(Amended on 28 January 2003; see HISTORY)

III. Effects of special features of the domestic tax laws of certain countries

40. Certain countries' laws seek to avoid or mitigate economic double taxation *i.e.* the simultaneous taxation of the company's profits at the level of

the company and of the dividends at the level of the shareholder. There are various ways of achieving this:

- company tax in respect of distributed profits may be charged at a lower rate than that on retained profits;
- relief may be granted in computing the shareholder's personal tax;
- dividends may bear only one tax, the distributed profits not being taxed at the level of the company.

The Committee on Fiscal Affairs has examined the question whether the special features of the tax laws of the member countries would justify solutions other than those contained in the Model Convention.

(Renumbered and amended on 23 July 1992; see HISTORY)

A. *Dividends distributed to individuals*

41. In contrast to the notion of juridical double taxation, which has, generally, a quite precise meaning, the concept of economic double taxation is less certain. Some States do not accept the validity of this concept and others, more numerously, do not consider it necessary to relieve economic double taxation at the national level (dividends distributed by resident companies to resident shareholders). Consequently, as the concept of economic double taxation was not sufficiently well defined to serve as a basis for the analysis, it seemed appropriate to study the problem from a more general economic standpoint, *i.e.* from the point of view of the effects which the various systems for alleviating such double taxation can have on the international flow of capital. For this purpose, it was necessary to see, among other things, what distortions and discriminations the various national systems could create; but it was necessary to have regard also to the implications for States' budgets and for effective fiscal verification, without losing sight of the principle of reciprocity that underlies every convention. In considering all these aspects, it became apparent that the burden represented by company tax could not be wholly left out of account.

(Renumbered on 23 July 1992; see HISTORY)

1. *States with the classical system*

42. The Committee has recognised that economic double taxation need not be relieved at the international level when such double taxation remains unrelieved at the national level. It therefore considers that in relations between two States with the classical system, *i.e.* States which do not relieve economic double taxation, the respective levels of company tax in the Contracting States should have no influence on the rate of withholding tax on the dividend in the State of source (rate limited to 15 per cent by

subparagraph *b)* of paragraph 2 of Article 10). Consequently, the solution recommended in the Model Convention remains fully applicable in the present case.

(Renumbered and amended on 23 July 1992; see HISTORY)

2. *States applying a split rate company tax*

43. These States levy company tax at different rates according to what the company does with its profits: the high rate is charged on any profits retained and the lower rate on those distributed.

(Renumbered and amended on 23 July 1992; see HISTORY)

44. None of these States, in negotiating double taxation conventions, has obtained, on the grounds of its split rate of company tax, the right to levy withholding tax of more than 15 per cent (see subparagraph *b)* of paragraph 2 of Article 10) on dividends paid by its companies to a shareholder who is an individual resident in the other State.

(Renumbered on 23 July 1992; see HISTORY)

45. The Committee considered whether such a State (State B) should not be recognised as being entitled to levy withholding tax exceeding 15 per cent on dividends distributed by its companies to residents of a State with a classical system (State A), with the proviso that the excess over 15 per cent, which would be designed to offset, in relation to the shareholder concerned, the effects of the lower rate of company tax on distributed profits of companies of State B, would not be creditable against the tax payable by the shareholder in State A of which he is a resident.

(Renumbered and amended on 23 July 1992; see HISTORY)

46. Most member countries considered that in State B regard should be had to the average level of company tax, and that such average level should be considered as the counterpart to the charge levied in the form of a single-rate tax on companies resident of State A. The levy by State B of an additional withholding tax not credited in State A would, moreover, create twofold discrimination: on the one hand, dividends, distributed by a company resident of State B would be more heavily taxed when distributed to residents of State A than when distributed to residents of State B, and, on the other hand, the resident of State A would pay higher personal tax on his dividends from State B than on his dividends from State A. The idea of a “balancing tax” was not, therefore, adopted by the Committee.

(Renumbered and amended on 23 July 1992; see HISTORY)

3. *States which provide relief at the shareholder's level*

47. In these States, the company is taxed on its total profits, whether distributed or not, and the dividends are taxed in the hands of the resident shareholder (an individual); the latter, however, is entitled to relief, usually as a tax credit against his personal tax, on the grounds that — in the normal course at least — the dividend has borne company tax as part of the company's profits.

(Renumbered and amended on 23 July 1992; see HISTORY)

48. Internal law of these States does not provide for the extension of the tax relief to the international field. Relief is allowed only to residents and only in respect of dividends of domestic sources. However, as indicated below, some States have, in some conventions, extended the right to the tax credit provided for in their legislation to residents of the other Contracting State.

(Renumbered and amended on 23 July 1992; see HISTORY)

49. In many States that provide relief at the shareholder's level, the resident shareholder receives a credit in recognition of the fact that the profits out of which the dividends are paid have already been taxed in the hands of the company. The resident shareholder is taxed on his dividend grossed up by the tax credit; this credit is set off against the tax payable and can possibly give rise to a refund. In some double taxation conventions, some countries that apply this system have agreed to extend the credit to shareholders who are residents of the other Contracting State. Whilst most States that have agreed to such extensions have done so on a reciprocal basis, a few countries have concluded conventions where they unilaterally extend the benefits of the credit to residents of the other Contracting State.

(Renumbered and amended on 23 July 1992; see HISTORY)

50. Some States that also provide relief at the shareholder's level claim that under their systems the company tax remains in its entirety a true company tax, in that it is charged by reference solely to the company's own situation, without any regard to the person and the residence of the shareholder, and in that, having been so charged, it remains appropriated to the Treasury. The tax credit given to the shareholder is designed to relieve his personal tax liability and in no way constitutes an adjustment of the company's tax. No refund, therefore, is given if the tax credit exceeds that personal tax.

(Renumbered and amended on 23 July 1992; see HISTORY)

51. The Committee could not reach a general agreement on whether the systems of the States referred to in paragraph 50 above display a fundamental difference that could justify different solutions at the international level.

(Renumbered and amended on 23 July 1992; see HISTORY)

52. Some member countries were of the opinion that such a fundamental difference does not exist. This opinion leaves room for the conclusion that the States referred to in paragraph 50 above should agree to extend the tax credit to non-resident shareholders, at least on a reciprocal basis, in the same way as some of the countries referred to in paragraph 49 above do. Such a solution tends to ensure neutrality as regards dividends distributed by companies of these countries, the same treatment being given to resident and non-resident shareholders. On the other hand, it would in relation to shareholders who are residents of a Contracting State (a State with a classical system in particular) encourage investment in a State that provides relief at the shareholder's level since residents of the first State would receive a tax credit (in fact a refund of company tax) for dividends from the other State while they do not receive one for dividends from their own country. However, these effects are similar to those which present themselves between a State applying a split rate company tax and a State with a classical system or between two States with a classical system one of which has a lower company tax rate than the other (paragraphs 42 and 43 to 46 above).

(Renumbered and amended on 23 July 1992; see HISTORY)

53. On the other hand, many member countries stressed the fact that a determination of the true nature of the tax relief given under the systems of the States referred to in paragraph 50 above reveals a mere alleviation of the shareholder's personal income tax in recognition of the fact that his dividend will normally have borne company tax. The tax credit is given once and for all (*forfaitaire*) and is therefore not in exact relation to the actual company tax appropriate to the profits out of which the dividend is paid. There is no refund if the tax credit exceeds the personal income tax.

(Renumbered and amended on 23 July 1992; see HISTORY)

54. As the relief in essence is not a refund of company tax but an alleviation of the personal income tax, the extension of the relief to non-resident shareholders who are not subject to personal income tax in the countries concerned does not come into consideration. On the other hand, however, on this line of reasoning, the question whether States which provide relief at the shareholder's level should give relief against personal income tax levied from resident shareholders on foreign dividends deserves attention. In this respect it should be observed that the answer is in the affirmative if the question is looked at from the standpoint of neutrality as regards the source of the dividends; otherwise, residents of these States will be encouraged to acquire shares in their own country rather than abroad. But such an extension of the tax credit would be contrary to the principle of reciprocity: not only would the State concerned thereby be making a unilateral budgetary sacrifice (allowing the tax credit over and above the withholding tax levied in the other State), but

it would do so without receiving any economic compensation, since it would not be encouraging residents of the other State to acquire shares in its own territory.

(Renumbered and amended on 23 July 1992; see HISTORY)

55. To overcome these objections, it might be a conceivable proposition, amongst other possibilities, that the State of source — which will have collected company tax on dividends distributed by resident companies — should bear the cost of the tax credit that a State which provides relief at the shareholder's level would allow, by transferring funds to that State. As, however, such transfers are hardly favoured by the States this might be more simply achieved by means of a "compositional" arrangement under which the State of source would relinquish all withholding tax on dividends paid to residents of the other State, and the latter would then allow against its own tax, not the 15 per cent withholding tax (abolished in the State of source) but a tax credit similar to that which it gives on dividends of domestic source.

(Renumbered and amended on 23 July 1992; see HISTORY)

56. When everything is fully considered, it seems that the problem can be solved only in bilateral negotiations, where one is better placed to evaluate the sacrifices and advantages which the Convention must bring for each Contracting State.

(Renumbered on 23 July 1992; see HISTORY)

57. *(Deleted on 31 March 1994; see HISTORY)*

58. *(Deleted on 31 March 1994; see HISTORY)*

B. Dividends distributed to companies

59. Comments above relating to dividends paid to individuals are generally applicable to dividends paid to companies which hold less than 25 per cent of the capital of the company paying the dividends. The treatment of dividends paid to collective investment vehicles raises particular issues which are addressed in paragraphs 6.8 to 6.34 of the Commentary on Article 1.

(Amended on 22 July 2010; see HISTORY)

60. In respect of dividends paid to companies which hold at least 25 per cent of the capital of the company paying the dividends, the Committee has examined the incidence which the particular company taxation systems quoted in paragraphs 42 and following have on the tax treatment of dividends paid by the subsidiary.

(Renumbered and amended on 23 July 1992; see HISTORY)

61. Various opinions were expressed in the course of the discussion. Opinions diverge even when the discussion is limited to the taxation of subsidiaries and parent companies. They diverge still more if the discussion takes into account more general economic considerations and extends to the taxation of shareholders of the parent company.

(Renumbered on 23 July 1992; see HISTORY)

62. In their bilateral conventions States have adopted different solutions, which were motivated by the economic objectives and the peculiarities of the legal situation of those States, by budgetary considerations, and by a whole series of other factors. Accordingly, no generally accepted principles have emerged. The Committee did nevertheless consider the situation for the more common systems of company taxation.

(Renumbered on 23 July 1992; see HISTORY)

1. *Classical system in the State of the subsidiary* (paragraph 42 above)

63. The provisions of the Convention have been drafted to apply when the State of which the distributing company is a resident has a so-called "classical" system of company taxation, namely one under which distributed profits are not entitled to any benefit at the level either of the company or of the shareholder (except for the purpose of avoiding recurrent taxation of inter-company dividends).

(Renumbered and amended on 23 July 1992; see HISTORY)

2. *Split-rate company tax system in the State of the subsidiary* (paragraphs 43 to 46 above)

64. States of this kind collect company tax on distributed profits at a lower rate than on retained profits which results in a lower company tax burden on profits distributed by a subsidiary to its parent company. In view of this situation, most of these States have obtained, in their conventions, rates of tax at source of 10 or 15 per cent, and in some cases even above 15 per cent. It has not been possible in the Committee to get views to converge on this question, the solution of which is left to bilateral negotiations.

(Renumbered and amended on 23 July 1992; see HISTORY)

3. *Imputation system in the State of the subsidiary* (paragraphs 47 and following)

65. In such States, a company is liable to tax on the whole of its profits, whether distributed or not; the shareholders resident of the State of which the

distributing company is itself a resident are subject to tax on dividends distributed to them, but receive a tax credit in consideration of the fact that the profits distributed have been taxed at company level.

(Renumbered on 23 July 1992; see HISTORY)

66. The question has been considered whether States of this kind should extend the benefit of the tax credit to the shareholders of parent companies resident of another State, or even to grant the tax credit directly to such parent companies. It has not been possible in the Committee to get views to converge on this question, the solution of which is left to bilateral negotiations.

(Renumbered and amended on 23 July 1992; see HISTORY)

67. If, in such a system, profits, whether distributed or not, are taxed at the same rate, the system is not different from a "classical" one at the level of the distributing company. Consequently, the State of which the subsidiary is a resident can only levy a tax at source at the rate provided in subparagraph *a)* of paragraph 2.

(Renumbered on 23 July 1992; see HISTORY)

IV. Distributions by Real Estate Investment Trusts

67.1 In many States, a large part of portfolio investment in immovable property is done through Real Estate Investment Trusts (REITs). A REIT may be loosely described as a widely held company, trust or contractual or fiduciary arrangement that derives its income primarily from long-term investment in immovable property, distributes most of that income annually and does not pay income tax on the income related to immovable property that is so distributed. The fact that the REIT vehicle does not pay tax on that income is the result of tax rules that provide for a single-level of taxation in the hands of the investors in the REIT.

(Added on 17 July 2008; see HISTORY)

67.2 The importance and the globalisation of investments in and through REITs have led the Committee on Fiscal Affairs to examine the tax treaty issues that arise from such investments. The results of that work appear in a report entitled "Tax Treaty Issues Related to REITS."[1]

(Added on 17 July 2008; see HISTORY)

67.3 One issue discussed in the report is the tax treaty treatment of cross-border distributions by a REIT. In the case of a small investor in a REIT, the investor has no control over the immovable property acquired by the REIT and no connection to that property. Notwithstanding the fact that the REIT itself

1 Reproduced in Volume II at R(23)-1.

will not pay tax on its distributed income, it may therefore be appropriate to consider that such an investor has not invested in immovable property but, rather, has simply invested in a company and should be treated as receiving a portfolio dividend. Such a treatment would also reflect the blended attributes of a REIT investment, which combines the attributes of both shares and bonds. In contrast, a larger investor in a REIT would have a more particular interest in the immovable property acquired by the REIT; for that investor, the investment in the REIT may be seen as a substitute for an investment in the underlying property of the REIT. In this situation, it would not seem appropriate to restrict the source taxation of the distribution from the REIT since the REIT itself will not pay tax on its income.

(Added on 17 July 2008; see HISTORY)

67.4 States that wish to achieve that result may agree bilaterally to replace paragraph 2 of the Article by the following:

2. However, such dividends may also be taxed in the Contracting State of which the company paying the dividends is a resident and according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other Contracting State (other than a beneficial owner of dividends paid by a company which is a REIT in which such person holds, directly or indirectly, capital that represents at least 10 per cent of the value of all the capital in that company), the tax so charged shall not exceed:

a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends (other than a paying company that is a REIT);

b) 15 per cent of the gross amount of the dividends in all other cases.

According to this provision, a large investor in a REIT is an investor holding, directly or indirectly, capital that represents at least 10 per cent of the value of all the REIT's capital. States may, however, agree bilaterally to use a different threshold. Also, the provision applies to all distributions by a REIT; in the case of distributions of capital gains, however, the domestic law of some countries provides for a different threshold to differentiate between a large investor and a small investor entitled to taxation at the rate applicable to portfolio dividends and these countries may wish to amend the provision to preserve that distinction in their treaties. Finally, because it would be inappropriate to restrict the source taxation of a REIT distribution to a large investor, the drafting of subparagraph *a)* excludes dividends paid by a REIT from its application; thus, the subparagraph can never apply to such dividends, even if a company that did not hold capital representing 10 per cent or more of the value of the capital of a REIT held at least 25 per cent of its capital as computed in accordance with paragraph 15 above. The State of source will therefore be

able to tax such distributions to large investors regardless of the restrictions in subparagraphs *a)* and *b)*.

(Added on 17 July 2008; see HISTORY)

67.5 Where, however, the REITs established in one of the Contracting States do not qualify as companies that are residents of that Contracting State, the provision will need to be amended to ensure that it applies to distributions by such REITs.

(Added on 17 July 2008; see HISTORY)

67.6 For example, if the REIT is a company that does not qualify as a resident of the State, paragraphs 1 and 2 of the Article will need to be amended as follows to achieve that result:

> 1. Dividends paid by a company which is a resident, or a REIT organised under the laws, of a Contracting State to a resident of the other Contracting State may be taxed in that other State.
>
> 2. However, such dividends may also be taxed in, and according to the laws of, the Contracting State of which the company paying the dividends is a resident or, in the case of a REIT, under the laws of which it has been organised, but if the beneficial owner of the dividends is a resident of the other Contracting State (other than a beneficial owner of dividends paid by a company which is a REIT in which such person holds, directly or indirectly, capital that represents at least 10 per cent of the value of all the capital in that company), the tax so charged shall not exceed:
>
> *a)* 5 per cent of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends (other than a paying company that is a REIT);
>
> *b)* 15 per cent of the gross amount of the dividends in all other cases.

(Added on 17 July 2008; see HISTORY)

67.7 Similarly, in order to achieve that result where the REIT is structured as a trust or as a contractual or fiduciary arrangement and does not qualify as a company, States may agree bilaterally to add to the alternative version of paragraph 2 set forth in paragraph 67.4 above an additional provision drafted along the following lines:

> For the purposes of this Convention, where a REIT organised under the laws of a Contracting State makes a distribution of income to a resident of the other Contracting State who is the beneficial owner of that distribution, the distribution of that income shall be treated as a dividend paid by a company resident of the first-mentioned State.

Under this additional provision, the relevant distribution would be treated as a dividend and not, therefore, as another type of income (*e.g.* income from immovable property or capital gain) for the purposes of applying Article 10 and the other Articles of the Convention. Clearly, however, that would not change the characterisation of that distribution for purposes of domestic law so that domestic law treatment would not be affected except for the purposes of applying the limitations imposed by the relevant provisions of the Convention.

(Added on 17 July 2008; see HISTORY)

Observations on the Commentary

68. *Canada* and the *United Kingdom* do not adhere to paragraph 24 above. Under their law, certain interest payments are treated as distributions, and are therefore included in the definition of dividends.

(Renumbered and amended on 23 July 1992; see HISTORY)

68.1 *Belgium* cannot share the views expressed in paragraph 37 of the Commentary. Belgium considers that paragraph 5 of Article 10 is a particular application of a general principle underlying various provisions of the Convention (paragraph 7 of Article 5, paragraph 1 of Article 7, and paragraphs 1 and 5 of Article 10), which is the prohibition for a Contracting State, except in exceptional cases expressly provided for in the Convention, to levy a tax on the profits of a company which is a resident of the other Contracting State. paragraph 5, which deals with taxation where the income has its source, confirms this general prohibition and provides that the prohibition applies even where the undistributed profits derived by the entity that is a resident of the other Contracting State arise from business carried out in the State of source. paragraph 5 prohibits the taxation of the undistributed profits of the foreign entity even where the State where those profits arise taxes them in the hands of a resident shareholder. The fact that a Contracting State taxes one of its residents on profits that are beneficially owned by a resident of the other State cannot change the nature of the profits, their beneficiary and, therefore, the allocation of the taxing rights on these profits.

(Added on 28 January 2003; see HISTORY)

68.2 With reference to paragraph 37, *Ireland* notes its general observation in paragraph 27.5 of the Commentary on Article 1.

(Added on 28 January 2003; see HISTORY)

Reservations on the Article

Paragraph 2

69. *(Deleted on 22 July 2010; see HISTORY)*

70. *(Deleted on 29 April 2000; see HISTORY)*

71. *(Deleted on 29 April 2000; see HISTORY)*

72. The *United States* reserves the right to provide that shareholders of certain pass-through entities, such as Regulated Investment Companies and Real Estate Investment Trusts, will not be granted the direct dividend investment rate, even if they would qualify based on their percentage ownership.

(Amended on 29 April 2000; see HISTORY)

73. *(Deleted on 22 July 2010; see HISTORY)*

74. In view of its particular taxation system, *Chile* retains its freedom of action with regard to the provisions in the Convention relating to the rate and form of distribution of profits by companies.

(Added on 22 July 2010; see HISTORY)

75. *Mexico*, *Portugal* and *Turkey* reserve their positions on the rates of tax in paragraph 2.

(Amended on 29 April 2000; see HISTORY)

76. *(Deleted on 22 July 2010; see HISTORY)*

77. *Poland* reserves its position on the minimum percentage for the holding (25 per cent) and the rates of tax (5 per cent and 15 per cent).

(Added on 23 October 1997; see HISTORY)

Paragraph 3

78. *Belgium* reserves the right to broaden the definition of dividends in paragraph 3 so as to cover expressly income — even when paid in the form of interest — which is subjected to the same taxation treatment as income from shares by its internal law.

(Amended on 31 March 1994; see HISTORY)

79. *Denmark* reserves the right, in certain cases, to consider as dividends the selling price derived from the sale of shares.

(Replaced on 23 July 1992; see HISTORY)

80. *France* and *Mexico* reserve the right to amplify the definition of dividends in paragraph 3 so as to cover all income subjected to the taxation treatment of distributions.

(Amended on 15 July 2005; see HISTORY)

81. *Canada* and *Germany* reserve the right to amplify the definition of dividends in paragraph 3 so as to cover certain interest payments which are treated as distributions under their domestic law.

(Amended on 22 July 2010; see HISTORY)

81.1 *Portugal* reserves the right to amplify the definition of dividends in paragraph 3 so as to cover certain payments, made under profit participation arrangements, which are treated as distributions under its domestic law.

(Added on 31 March 1994; see HISTORY)

81.2 *Chile* and *Luxembourg* reserve the right to expand the definition of dividends in paragraph 3 in order to cover certain payments which are treated as distributions of dividends under their domestic law.

(Amended on 22 July 2010; see HISTORY)

82. *(Deleted on 22 July 2010; see HISTORY)*

Paragraph 5

83. *Canada* and the *United States* reserve the right to impose their branch tax on the earnings of a company attributable to a permanent establishment situated in these countries. Canada also reserves the right to impose this tax on profits attributable to the alienation of immovable property situated in Canada by a company carrying on a trade in immovable property.

(Amended on 28 January 2003; see HISTORY)

84. *(Deleted on 21 September 1995; see HISTORY)*

85. *Turkey* reserves the right to tax, in a manner corresponding to that provided by paragraph 2 of the Article, the part of the profits of a company of the other Contracting State that carries on business through a permanent establishment situated in Turkey that remains after taxation pursuant to Article 7.

(Replaced on 23 July 1992; see HISTORY)

86. *(Deleted on 29 April 2000; see HISTORY)*

HISTORY

Paragraph 1: Amended, and the preceding heading was deleted, in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977. In the 1963 Draft

Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 and the heading preceding it read as follows:

"A. THE PROBLEMS

1. By "dividends" is generally meant the distributions of profits to the shareholders or members by companies limited by shares[1], limited partnerships with share capital[2], limited liability companies[3] or other joint stock companies[4]. Under the laws of O.E.C.D. Member countries, such joint stock companies are legal entities with a separate juridical personality distinct from all their shareholders or members. On this point, they differ from partnerships in so far as the latter do not have juridical personality in most countries."

Paragraph 2: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 2 read as follows:

"2. The profits of a business carried on by a partnership are the partners' profits derived from their own exertions; for them they are industrial or commercial profits. So the partner is ordinarily taxed personally on his share of the partnership capital and partnership profits."

Paragraph 2 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. The profits of a business carried on by a partnership are the partners' profits derived from their own exertions: for them they are industrial or commercial profits. So the partner is ordinarily taxed personally on his share of the partnership capital and partnership profits."

Paragraph 3: Unchanged since the adoption of the 1963 Model Convention by the OECD Council on 30 July 1963.

Paragraph 4: Corresponds to paragraph 22 of the 1963 Draft Convention. Paragraph 4 and the preceding heading of the 1963 Draft Convention were deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 22 of the 1963 Draft Convention was amended and renumbered as paragraph 4 and the preceding headings were moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 22 read as follows:

"22. The results of an enquiry made into the taxation of dividends as at 30th June, 1963, are summarised in the attached table which gives an overall picture of the situation at the time."

Paragraph 4 and the preceding heading of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until they were deleted when the 1977 Model Convention was adopted, read as follows:

"B. TAXATION OF COMPANIES LIMITED BY SHARES AND OF DIVIDENDS

4. The results of an enquiry made into the taxation of dividends as at 30th June, 1963, are summarised in the attached table which gives an overall picture of the situation at the time."

Paragraph 5: Corresponds to paragraph 23 of the 1963 Draft Convention. Paragraph 5 and the preceding headings of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) were deleted when the 1977 Model Convention was adopted

by the OECD Council on 11 April 1977. At the same time paragraph 23 of the 1963 Draft Convention was amended and renumbered as paragraph 5. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 23 read as follows:

"23. Taxation of dividends exclusively in the State of source is not acceptable as a general rule. Furthermore, there are some States which do not have taxation of dividends at the source, while as a general rule all the States tax residents in respect of dividends they receive from non-resident companies."

Paragraph 5 and the preceding headings of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until they were deleted when the 1977 Model Convention was adopted, read as follows:

"*a) Taxation of resident companies*

i) Taxation of the company's profits

5. In all the States, companies are taxed on their profits. The taxes paid by companies are generally of a particular kind, that is, they are distinct from those paid by individuals."

Paragraph 6: Corresponds to paragraph 24 of the 1963 Draft Convention. Paragraph 6 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 6. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 24 read as follows:

"24. On the other hand, taxation of dividends exclusively in the State of the recipient's residence is not feasible as a general rule. It would be more in keeping with the nature of dividends, which are investment income, but it would be unrealistic to suppose that there is any prospect of its being agreed that all taxation of dividends at the source should be relinquished."

Paragraph 6 and the preceding headings of the 1963 Draft Convention and until they were deleted when the 1977 Model Convention was adopted, read as follows:

"6. In most of the States, a company's total profits are taxed uniformly. In taxing a company's profits, four States make a distinction according to whether the profits are distributed or not:

— Belgium: the rate of company tax in respect of distributed profits is always 30 percent. The rate of company tax in respect of undistributed profits is generally 30 per cent also; it is 25 per cent in respect of any profits placed to reserve and expenditure not allowed as business expenses, where these items of taxable income total not more than 1000,000 Belgian Francs; it is 35 per cent in respect of any excess of profits placed to reserve over 5 million Belgian Francs, but the surcharge of 5 per cent is repaid to the company if such profits are subsequently distributed.

— Germany: the rate of the company tax for distributed profits is lower than that for undistributed profits (15 per cent instead of 51 per cent).

— Greece: profits distributed by the company are not taxed at all.

— Iceland: profits distributed by the company to the amount of 10 per cent of its capital stock are not taxed.

In the Netherlands, the Government has introduced a Bill which proposes a rate on distributed profits of 30 per cent, while the rate on undistributed profits would remain at 45 per cent."

Paragraph 7: Corresponds to paragraph 25 of the 1963 Draft Convention. Paragraph 7 and the preceding heading of the 1963 Draft Convention, were deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 25 of the 1963 Draft Convention was amended and renumbered as paragraph 7. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 25 read as follows:

> "25. For this reason, the first paragraph states simply that dividends may be taxed in the State of the recipient's residence."

Paragraph 5 and the preceding heading of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until they were deleted when the 1977 Model Convention was adopted, read as follows:

> *"ii) Taxation of the company's capital and reserves*
>
> 7. Six States (Austria, Germany, Italy, Luxembourg, Norway and Switzerland) tax the capital and reserves of companies limited by shares."

Paragraph 8: Replaced paragraph 8 and the preceding headings of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 8 and the preceding headings read as follows:

> *"b) Taxation of shareholders of a Resident Company*
>
> *i) Taxes at the source*
>
> 8. Many States impose taxes at the source on dividends from resident companies. In most cases such taxes are borne by all the shareholders (Austria, Belgium, Germany, France, Italy, Luxembourg, the Netherlands, Portugal, Spain, Switzerland, Turkey); in Belgium the tax at the source is charged at the rate of 15 per cent on 85/70ths of the gross dividend declared, the object here being to take account of a tax credit allowed to the shareholder of 15/70ths of the dividend declared. In some cases the tax at the source is only payable by non-resident shareholders (Norway, Sweden) or non-resident alien shareholders (United States, Italy). Two States do not charge a tax at the source on dividends but make the company distributing the dividends pay taxes on its profits, leaving it the right to recover tax by deduction from dividends paid out of those profits to shareholders: this is the case in the United Kingdom and the Republic of Ireland as regards their income taxes: Denmark does not tax non-resident shareholders at all. Italy imposes a tax at the source of 15 per cent. This tax will be definitively levied as tax on distributed profits in the case where the shareholder is not liable to the complementary tax ("imposta complementare") or to the Italian company tax ("imposta sulle societa")."

Paragraph 9: Corresponds to paragraph 26 of the 1963 Draft Convention. Paragraph 9 and the preceding heading of the 1963 Draft Convention were deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 26 of the 1963 Draft Convention was amended and renumbered as paragraph 9 and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 26 read as follows:

> "26. In all the States dividends paid by resident companies are included in the taxable income of a resident shareholder, in some of the States as to their net amount, in the others as to their gross amount. Tax levied at the source by the same State is generally credited against the general income tax. Exceptions to this

rule are: Spain as regards its “dividends tax”, and Switzerland as regards its “coupon tax”.”

Paragraph 9 and the preceding heading of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until they were deleted when the 1977 Model Convention was adopted, read as follows:

“ii) Taxation of resident shareholders

9. Paragraph 2 reserves a right to tax to the State of source of the dividends, *i.e.* to the State of which the company paying the dividends is a resident; this right to tax, however, is limited considerably. The rate of tax is limited to 15 per cent, which appears to be a reasonable maximum figure. A higher rate could hardly be justified since the State of source can already tax the company’s profits.”

Paragraph 10: Corresponds to the first three sentences of paragraph 27 of the 1963 Draft Convention. Paragraph 10 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the first three sentences of paragraph 27 of the 1963 Draft Convention were amended and renumbered as paragraph 10. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 27 read as follows:

“27. On the other hand, a lower rate of 5 per cent is expressly provided in respect of dividends paid by subsidiary companies. If a company of one of the States owns directly a holding of at least 25 per cent in a company of the other State, it is reasonable that payments of profits by the subsidiary to the foreign parent company should be taxed less heavily, to facilitate international investment and to avoid recurrent taxation. The realisation of the latter intention depends, of course, on the fiscal treatment provided for parent companies in their State of residence. Some laws and Conventions already contain similar provisions. If a partnership is treated as a body corporate under the national law applying to it, the two Contracting States may agree to modify paragraph 2 (a) in a way to give the benefits of the reduced rate provided for parent companies also to such partnerships.”

Paragraph 10 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, read as follows:

“10. Some States give certain relief to resident shareholders:

— In the United Kingdom and the Republic of Ireland, the income tax paid by the company on its profits also counts as the shareholder’s tax on its dividends he receives. The shareholder is entitled to have the personal allowances and reliefs he may claim taken into account in calculating his income tax on the dividends. This can result in a part of the tax paid by the company on its profits being refunded to the shareholder. The gross amount of the dividend is included in the shareholder’s total income for the purposes of the surtax.

— In certain States the recipient is not further liable on his dividends to tax already charged on the profits of the company paying the dividends. Thus in the United Kingdom and the Republic of Ireland, the profits tax is not charged again; the same holds good in Italy for the “imposta sul reddito di ricchezza mobile”. In Belgium, dividends received by resident individuals, which have already borne company tax and tax at the source, are added as to 85/70ths of their gross amount to the shareholder’s other taxable income an charged to personal income tax; against the personal income tax are set off the tax charged at the source and the tax credit of 15 per cent referred to in paragraph 8 above. Dividends received by resident

companies go to constitute their profits, but, on the principle "non bis in idem", the net dividend received is excluded from the taxable profits to the extent that it forms part of such profits and so escapes company tax, it is deemed, before all other income, to form part, of the distributed profits of the recipient company and when distributed is not charged to tax at the source.

— In most of the States the law gives preferential treatment, on one form or another, to holding companies.

— In Norway, companies are not taxed on dividends paid by resident companies. Resident individuals are neither liable to local income tax (varying from 16 to 19 per cent) nor to local capital tax (generally 4 per mille) on dividends paid by and shares held in resident companies."

Paragraph 11: Corresponds to the last sentence of paragraph 27 of the 1963 Draft Convention. Paragraph 11 and the preceding heading of the 1963 Draft Convention were deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the last sentence of paragraph 27 of the 1963 Draft Convention was amended and renumbered as paragraph 11 (see history of paragraph 27 in paragraph 10).

Paragraph 11 and the preceding heading of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until they were deleted when the 1977 Model Convention was adopted, read as follows:

"*iii) Taxation of non-resident shareholders*

11. In seven States non-resident individuals who are shareholders of resident companies are liable to a graduated tax on total income: The United Kingdom and the Republic of Ireland (surtax), Greece (income tax), Iceland, Italy ("imposta complementare"), the United States in the case of a non-resident alien shareholder whose income from United States sources exceeds $15,400, and Spain if the income from Spanish sources exceeds 100,000 pesetas per year. In Belgium, such persons are liable to a graduated tax on their total income of Belgian origin, if they possess an establishment or dwelling in Belgium or receive there certain income in the capacity of a partner or director performing actual whole time service; non-resident companies which are shareholders of resident companies are subject to a flat rate tax if the possess an establishment in Belgium. In both cases economic double taxation is avoided in the same manner as in the case of resident shareholders (see paragraph 10 above). In Greece and Iceland, non-resident companies which are shareholders of resident companies are liable to a flat rate tax."

Paragraph 12: Replaced on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). Paragraph 12 as it read before 28 January 2003 was amended and renumbered as paragraph 12.2 and a new paragraph 12 was added by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003 (see history of paragraph 12.2).

Paragraph 12.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 12.2: Corresponds to paragraph 12 as it read before 28 January 2003. Paragraph 12 was amended and renumbered as paragraph 12.2 by the report entitled

"The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 21 September 1995 and until 28 January 2003, paragraph 12 read as follows:

> "12. Under paragraph 2, the limitation of tax in the State of source is not available when an intermediary, such as an agent or nominee, is interposed between the beneficiary and the payer, unless the beneficial owner is a resident of the other Contracting State. (The text of the Model was amended in 1995 to clarify this point, which has been the consistent position of all member countries.) States which wish to make this more explicit are free to do so during bilateral negotiations."

Paragraph 12 was amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", which was adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 12 read as follows:

> "12. Under paragraph 2, the limitation of tax in the State of source is not available when an intermediary, such as an agent or nominee, is interposed between the beneficiary and the payer, unless the beneficial owner is a resident of the other Contracting State. States which wish to make this more explicit are free to do so during bilateral negotiations."

Paragraph 12 of the 1977 Model Convention replaced paragraph 12 and the preceding heading of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until they were deleted when the 1977 Model Convention was adopted, paragraph 12 and the preceding heading read as follows:

> *"c) Taxation of resident shareholders in respect of dividends from a non-resident company*
>
> 12. Dividends paid to a shareholder resident in a State by a non-resident company are subject in that State to the general taxes on income and profits. The following peculiarities should be mentioned:
>
> — In Italy, individuals, as a rule, are taxed on foreign dividends only if these are remitted to Italy ("goduto in Italia"). Italy charges the "imposta sul reddito di ricchezza mobile" on certain foreign dividends only. Dividends received by companies are included in their taxable income for the purposes of the Italian Company tax ("imposta sulle società"). In any case a withholding tax of 15 per cent is imposed on the dividends paid by foreign companies when these dividends are paid by banksor credit institutes. This withholding tax is, however, credited if the beneficiary of the dividends is liable to the complementary tax (ïmposta sulle societa");
>
> — Spain has, in addition, a tax at the source. It is charged on only so much of the dividends as corresponds to the proportion that the profits made in Spain bear to the total profits, furthermore, it is charged on the dividends from foreign sources actually paid in Spain;
>
> — In Belgium, dividends paid by foreign companies are charged on their entry into Belgium to a tax at the source or prelevy ("precompte mobilier") of 15 per cent. In the case of resident individuals this pre-levy is credited against the personal income tax, as also is a fixed quota of 15 per cent which is deemed to represent the foreign tax. In the case of resident companies double taxation is avoided in the same manner as in the case of dividends paid by resident companies (see paragraph 10 above);

— The United States and the United Kingdom give credit for foreign taxes against their own income taxes. Germany and Denmark only give credit for the tax charged on the dividends;

— Portugal levies, in addition, a tax at the source on dividends actually paid in Portugal."

Paragraph 13: Corresponds to paragraph 28 of the 1963 Draft Convention. Paragraph 13 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 28 of the 1963 Draft Convention was amended and renumbered as paragraph 13. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 28 read as follows:

"28. The tax rates fixed by the Article for the tax in the State of source are maximum rates. The States may agree, in bilateral negotiations, on lower rates or even on taxation exclusively in the State of the recipient's residence. The reduction of rates provided for in paragraph 2 refers solely to the taxation of dividends and not to the taxation of the profits of the company paying the dividends."

Paragraph 13 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, read as follows:

"13. In some States the preferential treatment given to holding companies in respect of dividends arising in such States does not apply to dividends received from foreign companies."

Paragraph 13.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 13.2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 14: Corresponds to paragraph 29 of the 1963 Draft Convention. Paragraph 14 and the preceding headings of the 1963 Draft Convention were deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 29 of the 1963 Draft Convention was amended and renumbered as paragraph 14. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 29 read as follows:

"29. The two Contracting States may also, in bilateral negotiations, agree to a holding percentage lower than that fixed in the Article."

Paragraph 14 and the preceding headings of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until they were deleted when the 1977 Model Convention was adopted, read as follows:

"II. SOLUTIONS

A. WORK OF THE INTERNATIONAL ORGANISATIONS

14. In this matter of dividends, differences between taxation laws and conflicts of interests have an inhibiting effect that is not apparent in any other part of international fiscal law. Many States feel unable to relinquish the right to tax dividends paid by resident companies to non-resident shareholders, either because their taxation systems are based on the principle of territoriality, or because they fear that to do so would mean a loss of tax revenue."

Paragraph 15: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 15 read as follows:

"15. The League of Nations took up the problems of international double taxation at a comparatively early date. A commission of four economists stated, in a report dated 5th April, 1923, that the right to tax movable property (including shares in companies and debt claims) should belong to the State of the taxpayer's residence. A second committee of seven taxation experts, in a report dated 7th February, 1925, formulated other proposals which the General Meeting of Government Experts on Double Taxation adopted in its report of 31st October, 1928, but not without modifying them on certain points and adding two further proposals, so that the proposals of the League of Nations in 1928 consisted of the following variants:

Variant A: Imposition of impersonal taxes by the State in which the enterprise has its effective place of management, and imposition of personal taxes exclusively in the State of the shareholder's residence;

Variant B: Taxation exclusively in the State of the shareholder's residence;

Variant C: Taxation in the State of the shareholder's residence, with a reservation in favour of taxes charged at the source in the other State; it is recommended to the Contracting States that they should avoid or mitigate any resulting double taxation by arrangements for the full or part refund of the taxes levied in the State of source, or for giving credit for the taxes charged at the source against the taxes imposed in the State of the shareholder's residence."

Paragraph 16: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 16 read as follows:

"16. From 1929 to 1939 no further solutions to the problem of dividend taxation were devised by the Fiscal Committee of the League of Nations. On the other hand, the drafts prepared at later conferences, in Mexico in 1943 and in London in 1946, contain provisions which differ essentially from the proposals contained in the 1928 draft. The Mexico and London drafts give the right to tax dividends to the State in which the capital is invested or in which the company has its fiscal domicile. It is only where a company has a "dominant participation" in the management or capital of the company paying the dividends that the London draft allows an exemption in the country where that company has its fiscal domicile. The proposals of the London and Mexico Model Convention regarding dividends have not been adopted by the O.E.C.D. Member countries."

Paragraph 17: Replaced paragraph 17 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention and until it was deleted when the 1977 Model Convention was adopted paragraph 17 read as follows:

"B. THE CONVENTIONS CONCLUDED BY THE EUROPEAN STATES

17. The Conventions for the avoidance of double taxation concluded between the Member countries of the O.E.C.D. contain the following solutions:

a) In a first category of Conventions, dividends are taxable only in the State of the recipient's residence (Convention between France and Sweden of 1936-1950).

b) Other Conventions provide for dividends to be taxed in the State of the recipient's residence; but they contain an unlimited reservation in favour of taxes charged at the source in the other State (Conventions concluded by Germany and Sweden in 1928).

c) In a third category, the right to tax dividends is conferred on the State of the recipient's residence; a reservation is made in favour of taxes imposed at the source in the other State, but such taxes are not to be levied, or must be

refunded fully or in part if the shareholder satisfies certain conditions (Conventions concluded by Switzerland with Sweden in 1948, with the Netherlands in 1951, with Austria in 1953, and with France in 1953).

d) In a last category, both States may tax dividends. But the State of the shareholder's residence undertakes to give credit for the tax levied in the State of source (which tax may or may not be limited to a certain rate) against its own taxes on the same income (Conventions concluded between Germany and Austria in 1954, between Sweden and Norway in 1947, by France with Norway in 1953 and with Germany in 1959, and by Italy with the United States in 1955, with Sweden in 1956, with France in 1958, and with the United Kingdom in 1960)."

Paragraph 18: Corresponds to paragraph 30 of the 1963 Draft Convention. Paragraph 18 and the preceding heading of the 1963 Draft Convention were deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 30 of the 1963 Draft Convention was amended and renumbered as paragraph 18. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 30 read as follows:

"30. Paragraph 2 says nothing about the mode of taxation. Each State is free to apply its own laws. The State of source may levy, not only taxes at the source, but also taxes charged by direct assessment."

Paragraph 18 and the preceding heading of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until they was deleted when the 1977 Model Convention was adopted, read as follows:

"C. SOLUTION RECOMMENDED BY THE FISCAL COMMITTEE OF THE O.E.C.D.

18. The solution recommended by the Committee is not new. It takes into account the work of the international organisations and the Conventions concluded up to now. The Committee has submitted a text which should be acceptable to the great majority of the O.E.C.D. Member countries."

Paragraph 19: Amended on 17 July 2008, by replacing the cross-reference to "paragraph 53" of the Commentary on Article 24" by "paragraph 71", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "The Application and Interpretation of Article 24 (Non-Discrimination)" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008). After 28 January 2003 and until 17 July 2008, paragraph 19 read as follows:

"19. The paragraph does not settle procedural questions. Each State should be able to use the procedure provided in its own laws. It can either forthwith limit its tax to the rates given in the Article or tax in full and make a refund (see, however, paragraph 26.2 of the Commentary on Article 1). Specific questions arise with triangular cases (see paragraph 71 of the Commentary on Article 24)."

Paragraph 19 was previously amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 19 read as follow:

"19. The paragraph does not settle procedural questions. Each State should be able to use the procedure provided in its own laws. It can either forthwith limit its tax to the rates given in the Article or tax in full and make a refund. Specific questions arise with triangular cases (see paragraph 53 of the Commentary on Article 24)."

Paragraph 19 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 60 of another report entitled "Triangular Cases" (adopted by the OECD Council on 23 July 1992). In the 1977 Model Convention and until 23 July 1992, paragraph 19 read as follows:

> "19. The paragraph does not settle procedural questions. Each State should be able to use the procedure provided in its own laws. It can either forthwith limit its tax to the rates given in the Article or tax in full and make a refund."

Paragraph 19 of the 1977 Model Convention corresponded to paragraph 31 of the 1963 Draft Convention. Paragraph 19 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 31 of the 1963 Draft Convention was amended and renumbered as paragraph 19. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 31 read as follows:

> "31. Paragraph 2 does not settle procedural questions. Each State should be able to use the procedure provided in its own law. It can either forthwith limit its tax to the rates given in the Article or tax in full and make a repayment."

Paragraph 19 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, read as follows:

> "19. The Article states that dividends shall be taxable in the State of the shareholder's residence, but it confers a limited concurrent right to tax on the State of source."

Paragraph 20: Corresponds to paragraph 32 of the 1963 Draft Convention. Paragraph 20 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 32 of the 1963 Draft Convention was amended and renumbered as paragraph 20. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 32 read as follows:

> "32. It has not been determined whether a relief in a State of source should be given only where the recipient is subject to tax in respect of the dividends in the State of residence. The formula chosen may be supplemented accordingly by bilateral agreement."

Paragraph 20 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, read as follows:

> "20. The Article deals with the relationship between itself and the provisions of Article 7 concerning the taxation of business profits and it defines the term "dividends"."

Paragraph 21: Corresponds to paragraph 33 of the 1963 Draft Convention. Paragraph 21 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 33 of the 1963 Draft Convention was amended and renumbered as paragraph 21. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 33 read as follows:

> "33. The Article says nothing on how the State of the recipient's residence should make allowance for the taxation in the State of source. This question is considered in the Articles 23(A) and 23(B) concerning methods of avoiding double taxation in the State of residence."

Paragraph 21 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, read as follows:

"21. The Committee has confined itself to settling principles. Particular questions, in particular the manner in which the State of source must reduce its taxes, are not dealt with. Nor is the manner in which allowance is to be made for the peculiarities of certain countries' laws. There are too many possible solutions, so that it appears impossible to find a single formula which can satisfy all the States. There is still vast scope for bilateral negotiations without subtracting from the value of the proposed provisions."

Paragraph 22: Corresponds to paragraph 34 of the 1963 Draft Convention. Paragraph 22 of the 1963 Draft Convention was amended and renumbered as paragraph 4 (see history of paragraph 4) and the preceding headings were moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 34 of the 1963 Draft Convention was amended and renumbered as paragraph 22 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 34 read as follows:

"34. Attention is drawn generally to the following case: the recipient of the dividends arising in a Contracting State is a company resident in the other Contracting State; all or part of its capital is held by shareholders resident outside that other State; its practice is not to distribute its profits in the form of dividends; and it enjoys preferential taxation treatment ("private investment company", "base company"). The question may arise whether in the case of such a company it is justifiable to allow in the State of source of the dividends the restriction of tax which is provided in paragraph 2 of the Article. It may be appropriate, when bilateral negotiations are being conducted, to agree upon special exceptions to the taxing rule laid down in this Article, in order to define the treatment applicable to such companies."

Paragraph 23: Amended on 23 July 1992, by replacing the words "it does not yet appear to be possible" by "it did not appear possible", in the fifth sentence, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 23 read as follows:

"23. In view of the great differences between the laws of OECD Member countries, it is impossible to define "dividends" fully and exhaustively. Consequently, the definition merely mentions examples which are to be found in the majority of the Member countries' laws and which, in any case, are not treated differently in them. The enumeration is followed up by a general formula. In the course of the revision of the 1963 Draft Convention, a thorough study has been undertaken to find a solution that does not refer to domestic laws. This study has led to the conclusion that, in view of the still remaining dissimilarities between Member countries in the field of company law and taxation law, it does not yet appear to be possible to work out a definition of the concept of dividends that would be independent of domestic laws. It is open to the Contracting States, through bilateral negotiations, to make allowance for peculiarities of their laws and to agree to bring under the definition of "dividends" other payments by companies falling under the Article."

Paragraph 23 of the 1977 Model Convention corresponded to paragraph 35 of the 1963 Draft Convention. Paragraph 23 of the 1963 Draft Convention was renumbered as paragraph 5 (see history of paragraph 5) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 35 of the 1963 Draft Convention was amended and renumbered as paragraph 23 of the 1977

Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 35 read as follows:

> "35. In view of the great differences between the laws of the O.E.C.D. Member countries, it is impossible to define "dividends" fully and exhaustively. Consequently, the definition merely mentions examples which are to be found in the majority of the Member countries' laws and which, in any case, are not treated differently in them. The enumeration is followed up by a general formula. It is open to the Contracting States, through bilateral negotiations, to make allowance for the peculiarities of their laws and to agree to bring other distributions of profits within the Article."

Paragraph 24: Amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, by replacing the reference therein to paragraph 18 of the Commentary on Article 11 by a reference to paragraph 19 of that Commentary. In the 1977 Model Convention and until 23 July 1992, paragraph 24 read as follows:

> "24. The notion of dividends basically concerns distributions by companies within the meaning of subparagraph *b)* of paragraph 1 of Article 3. Therefore the definition relates, in the first instance, to distributions of profits the title to which is constituted by shares, that is holdings in a company limited by shares (joint stock company). The definition assimilates to shares all securities issued by companies which carry a right to participate in the companies' profits without being debt-claims; such are, for example, "jouissance" shares or "jouissance" rights, founders' shares or other rights participating in profits. In bilateral conventions, of course, this enumeration may be adapted to the legal situation in the Contracting States concerned. This may be necessary in particular, as regards income from "jouissance" shares and founders' shares. On the other hand, debt-claims participating in profits do not come into this category; (see paragraph 18 of the Commentary on Article 11); likewise interest on convertible debentures is not a dividend."

Paragraph 24 of the 1977 Model Convention corresponded to paragraph 36 of the 1963 Draft Convention. Paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 6 (see history of paragraph 6) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 36 of the 1963 Draft Convention was amended and renumbered as paragraph 24 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 36 read as follows:

> "36. The Article relates, basically, to distributions of profits the title to which is constituted by shares, that is holdings in a company limited by shares ("Société anonyme"). The Article assimilates to shares all securities issued by companies limited by shares which carry a right to participate in the profits without being debt claims; such are, for example, "jouissance" shares or "jouissance" rights, founders' shares or other rights participating in profits. On the other hand, debt claims participating in profits do not come into this category. Likewise, interest on convertible debentures is not dividend."

Paragraph 25: Replaced paragraph 25 of the 1977 Model Convention. On 23 July 1992 paragraph 25 of the 1977 Model Convention was renumbered as paragraph 26 (see history of paragraph 26) and a new paragraph 25 added by the report entitled "The Revision of the Model Convention", adopted by the Council of the OECD on 23 July 1992, on the basis of paragraph 29 of a previous report entitled "Thin Capitalisation" (adopted by the OECD Council on 26 November 1986).

Paragraph 26: Corresponds to paragraph 25 of the 1977 Model Convention. On 23 July 1992 paragraph 26 of the 1977 Model Convention was renumbered as paragraph 27 (see history of paragraph 27) and paragraph 25 was renumbered as paragraph 26 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 25 of the 1977 Model Convention corresponded to paragraph 37 of the 1963 Draft Convention. Paragraph 25 of the 1963 Draft Convention was amended and renumbered as paragraph 7 (see history of paragraph 7) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 37 of the 1963 Draft Convention was amended and renumbered as paragraph 26 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 37 read as follows:

> "37. The laws of many of the States put participations in a "Société à responsabilité limitée" (limited liability companies) on the same footing as shares. Again, distributions of profits by co-operative societies are generally regarded as dividends."

Paragraph 27: Corresponds to paragraph 26 of the 1977 Model Convention. On 23 July 1992 paragraph 27 of the 1977 Model Convention was renumbered as paragraph 28 (see history of paragraph 28) and paragraph 26 was renumbered as paragraph 27 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 26 of the 1977 Model Convention corresponded to paragraph 38 of the 1963 Draft Convention. Paragraph 26 of the 1963 Draft Convention was amended and renumbered as paragraph 9 (see history of paragraph 9) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 38 of the 1963 Draft Convention was amended and renumbered as paragraph 26 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 38 read as follows:

> "38. Distributions of profits by partnerships of individuals are not dividends. French law, however, makes certain exceptions to this principle."

Paragraph 28: Corresponds to paragraph 27 of the 1977 Model Convention. On 23 July 1992 paragraph 28 of the 1977 Model Convention was renumbered as paragraph 29 (see history of paragraph 29) and paragraph 27 was renumbered as paragraph 28 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 27 of the 1977 Model Convention corresponded to paragraph 39 of the 1963 Draft Convention. Paragraph 27 of the 1963 Draft Convention was amended and incorporated into paragraphs 10 and 11 (see history of paragraph 10) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 39 of the 1963 Draft Convention was amended and renumbered as paragraph 27 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 39 read as follows:

> "39. Payments regarded as dividends may include not only distributions of profits by annual resolutions of general meetings of shareholders, but also other benefits in money or money's worth, such as bonus shares, bonuses, profits on a liquidation and disguised distributions of profits. The reliefs provided in the Article apply so long as the State of which the paying company is a resident taxes such benefits as dividends."

Paragraph 29: Corresponds to paragraph 28 of the 1977 Model Convention. On 23 July 1992 paragraph 29 of the 1977 Model Convention was renumbered as paragraph 30 (see history of paragraph 30) and paragraph 28 was renumbered as paragraph 29 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 28 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 28 of the 1963 Draft Convention was amended and renumbered as paragraph 13 (see history of paragraph 13) and a new paragraph 28 was added.

Paragraph 30: Corresponds to paragraph 29 of the 1977 Model Convention. On 23 July 1992 paragraph 30 of the 1977 Model Convention was renumbered as paragraph 31 (see history of paragraph 31), the heading preceding paragraph 30 was moved with it and paragraph 29 was renumbered as paragraph 30 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 29 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 29 of the 1963 Draft Convention was amended and renumbered as paragraph 14 (see history of paragraph 14) and a new paragraph 29 was added.

Paragraph 31: Corresponds to paragraph 30 of the 1977 Model Convention. On 23 July 1992 paragraph 31 of the 1977 Model Convention was renumbered as paragraph 32 (see history of paragraph 32), paragraph 30 was renumbered as paragraph 31 and the heading preceding paragraph 30 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 30 of the 1977 Model Convention corresponded to paragraph 40 of the 1963 Draft Convention. Paragraph 30 of the 1963 Draft Convention was amended and renumbered as paragraph 18 (see history of paragraph 18) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 40 of the 1963 Draft Convention was amended and renumbered as paragraph 30 of the 1977 Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 40 read as follows:

> "40. Certain States consider that dividends, interest and royalties arising from sources in their territory and payable to individuals or legal persons who are residents of other States fall outside the scope of the arrangement made to prevent them from being taxed both in the State of source and in the State of the recipient's residence when the recipient possesses a permanent establishment in the former State. Paragraph 4 of the Article is not based on such a conception which is sometimes referred to as "the force of attraction of the permanent establishment". It does not stipulate that dividends arising to a resident of a Contracting State from a source situated in the territory of the other State must, by a kind of legal presumption, or fiction even, be related to a permanent establishment which that resident may happen to possess in the latter State, so that the said State would not be obliged to limit its taxation in such a case. The paragraph merely provides that in the State of source the dividends are taxable as part of the profits of the permanent establishment there owned by the recipient residing in the other State, if they are paid in respect of holdings forming part of the assets of the permanent establishment or otherwise effectively connected with that establishment. In that case, paragraph 4 relieves the State of source of the dividends from any limitations under the Article. The foregoing explanations accord with those in the Commentaries on Article 7 on the taxation of business profits."

Paragraph 32: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 32 read as follows:

> "32. It has been suggested that the paragraph could give rise to abuses through the transfer of shares to permanent establishments set up solely for that purpose in countries that offer preferential treatment to dividend income. Apart from the fact that such abusive transactions might trigger the application of domestic anti-abuse rules, it must be recognised that a particular location can only constitute a permanent establishment if a business is carried on therein and, also, that the requirement that a shareholding be "effectively connected" to such a location requires that the shareholding be genuinely connected to that business"

Paragraph 32 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2002, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 32 was deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 32 read as follows:

> "32. The rules set out above also apply where the beneficiary of the dividends has in the other Contracting State, for the purpose of performing any of the kinds of independent personal services mentioned in Article 14, a fixed base with which the holding in respect of which the dividends are paid is effectively connected."

Paragraph 32, as it read after 23 July 1992, corresponded to paragraph 31 of the 1977 Model Convention. On 23 July 1992 paragraph 32 of the 1977 Model Convention was renumbered as paragraph 33 (see history of paragraph 33), the heading preceding paragraph 32 was moved with it and paragraph 31 was renumbered as paragraph 32 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 31 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 31 of the 1963 Draft Convention was amended and renumbered as paragraph 19 (see history of paragraph 19) and a new paragraph 31 was added.

Paragraph 32.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 32.2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 33: Corresponds to paragraph 32 of the 1977 Model Convention. On 23 July 1992 paragraph 33 of the 1977 Model Convention was renumbered as paragraph 34 (see history of paragraph 34), paragraph 32 was renumbered as paragraph 33 and the heading preceding paragraph 32 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 32 of the 1977 Model Convention corresponded to paragraph 41 of the 1963 Draft Convention. Paragraph 32 of the 1963 Draft Convention was amended and renumbered as paragraph 20 (see history of paragraph 20) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time

paragraph 41 of the 1963 Draft Convention was amended and renumbered as paragraph 32 of the 1977 Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 41 read as follows:

"41. The Article deals only with dividends paid by a company resident in one of the States to a resident of the other State. Certain States, however, tax not only dividends paid by companies resident in them but even distributions by non-resident companies of profits arising in them. Each State, of course, is entitled to tax profits arising in its territory which are made by non-resident companies, to the extent provided in the Convention (in particular in Article 7 concerning the taxation of business profits). The shareholders of such companies should not be taxed as well at any rate unless they are resident in the State and so naturally subject to its fiscal sovereignty."

Paragraph 34: Amended on 29 April 2000, by deleting the words "or fixed base", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 34 read as follows:

"34. Paragraph 5 rules out the extra-territorial taxation of dividends, *i.e.* the practice by which States tax dividends distributed by a non-resident company solely because the corporate profits from which the distributions are made originated in their territory (for example, realised through a permanent establishment situated therein). There is, of course, no question of extra-territorial taxation when the country of source of the corporate profits taxes the dividends because they are paid to a shareholder who is a resident of that State or to a permanent establishment or fixed base situated in that State."

Paragraph 34 as it read after 23 July 1992 corresponded to paragraph 33 of the 1977 Model Convention. On 23 July 1992 paragraph 34 of the 1977 Model Convention was renumbered as paragraph 35 (see history of paragraph 35) and paragraph 33 was renumbered as paragraph 34 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 33 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 33 of the 1963 Draft Convention was amended and renumbered as paragraph 21 (see history of paragraph 21) and a new paragraph 33 was added.

Paragraph 35: Corresponds to paragraph 34 of the 1977 Model Convention. On 23 July 1992 paragraph 35 of the 1977 Model Convention was renumbered as paragraph 36 (see history of paragraph 36) and paragraph 34 was renumbered as paragraph 35 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 34 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 34 of the 1963 Draft Convention was amended and renumbered as paragraph 22 (see history of paragraph 22) and a new paragraph 34 was added.

Paragraph 36: Corresponds to paragraph 35 of the 1977 Model Convention. On 23 July 1992 paragraph 36 of the 1977 Model Convention was amended and renumbered as paragraph 40 (see history of paragraph 40), the heading preceding paragraph 36 was moved with it and paragraph 35 was renumbered as paragraph 36 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 35 of the 1977 Model Convention corresponded to paragraph 42 of the 1963 Draft Convention. Paragraph 35 of the 1963 Draft Convention was amended and renumbered as paragraph 23 (see history of paragraph 23) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 42 of the 1963 Draft Convention was amended and renumbered as paragraph 35 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 42 read as follows:

> "42. Paragraph 5 adopts a provision already contained in a number of Conventions. It rules out extraterritorial taxation of dividends and further provides that non-resident companies are not to be subjected to special taxes on undistributed profits."

Paragraph 37: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 37 read as follow:

> "37. It might be argued that where the taxpayer's country of residence, pursuant to its counteracting measures (such as sub-Part F legislation in the United States), seeks to tax profits which have not been distributed it is acting contrary to the provisions of paragraph 5. However, it should be noted that the paragraph is confined to taxation at source and, thus, has no bearing on the taxation at residence under a counteracting legislation. In addition, the paragraph concerns only the taxation of the company and not that of the shareholder."

Paragraph 37 was replaced on 23 July 1992. Paragraph 37 of the 1977 Model Convention was renumbered as paragraph 41 (see history of paragraph 41), the heading preceding paragraph 37 was moved with it and a new paragraph 37 added by the report entitled "The Revision of the Model Convention", adopted by the Council of the OECD on 23 July 1992, on the basis of paragraph 49 of a previous report entitled "Double Taxation Conventions and the Use of Base Companies" (adopted by the Council of the OECD on 27 November 1986).

Paragraph 38: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 38 read as follow:

> "38. The application of counteracting legislation may, however, pose some difficulties. If the income is attributed to the taxpayer then each item of the income would have to be treated under the relevant provisions of the Convention (business profits, interest, royalties). If the amount is treated as a deemed dividend then it is clearly derived from the base company thus constituting income from that company's country. Even then, it is by no means clear whether the taxable amount is to be regarded as a dividend within the meaning of Article 10 or as "other income" within the meaning of Article 21. Under some counteracting measures the taxable amount is treated as a dividend with the result that an exemption provided for by a tax convention, *e.g.* an affiliation exemption, is also extended to it (for instance, in Germany). It is doubtful whether the Convention requires this to be done. If the country of residence considers that this is not the case it may face the allegation that it is obstructing the normal operation of the affiliation exemption by taxing the dividend (in the form of "deemed dividend") in advance."

Paragraph 38 was replaced on 23 July 1992. Paragraph 38 of the 1977 Model Convention was amended and renumbered as paragraph 42 (see history of paragraph 42), the heading preceding paragraph 38 was amended and moved with it and new paragraph 38 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of

paragraph 50 of a previous report entitled "Double Taxation Conventions and the Use of Base Companies" (adopted by the OECD Council on 27 November 1986).

Paragraph 39: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 39 read as follow:

"39. Where dividends are actually distributed by the base company, the provisions of a bilateral convention regarding dividends have to be applied in the normal way because there is dividend income within the meaning of the convention. Thus, the country of the base company may subject the dividend to a withholding tax. The country of residence of the shareholder will apply the normal methods for the elimination of double taxation (*i.e.* tax credit or tax exemption is granted). This implies that the withholding tax on the dividend should be credited in the shareholder's country of residence, even if the distributed profit (the dividend) has been taxed years before under counteracting legislation. However, the obligation to give credit in that case remains doubtful. Generally the dividend as such is exempted from tax (as it was already taxed under the counteracting legislation) and one might argue that there is no basis for a tax credit. On the other hand, the purpose of the treaty would be frustrated if the crediting of taxes could be avoided by simply anticipating the dividend taxation under counteracting legislation. The general principle set out above would suggest that the credit should be granted, though the details may depend on the technicalities of the counteracting measures and the system for crediting foreign taxes against domestic tax, as well as on the particularities of the case (*e.g.* time lapsed since the taxation of the "deemed dividend"). However, taxpayers who have recourse to artificial arrangements are taking risks against which they cannot fully be safeguarded by tax authorities."

Paragraph 39 was replaced on 23 July 1992. Paragraph 39 of the 1977 Model Convention was amended and renumbered as paragraph 43 (see history of paragraph 43), the heading preceding paragraph 39 was amended and moved with it and a new paragraph 39 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 51 of a previous report entitled "Double Taxation Conventions and the Use of Base Companies" (adopted by the Council of the OECD on 27 November 1986).

Paragraph 40: Corresponds to paragraph 36 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 40 of the 1977 Model Convention was renumbered as paragraph 44 (see history of paragraph 44), paragraph 36 was amended and renumbered as paragraph 40, the heading preceding paragraph 36 was moved with it and the footnote off the heading was deleted by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the footnote to the heading and paragraph 36 read as follows:

"1 This Section reflects the position as of 1st January, 1977.

36. Certain countries' laws seek to avoid or mitigate economic double taxation, *i.e.* the simultaneous taxation of the company's profits at the level of the company and of the dividends at the level of the shareholder. There are various ways of achieving this:

- — company tax in respect of distributed profits is charged at a lower rate than that on retained profits (Austria, Finland, Germany, Iceland, Japan, Norway);
- — the tax paid by the company on the distributed profits is partly set off against the shareholder's personal tax (Belgium; Canada; Denmark, from

1977; France; Germany, from 1977; Ireland, from 1976; Turkey; United Kingdom);

— dividends bear only one tax, the distributed profits not being taxed at the level of the company (Greece).

The Committee on Fiscal Affairs has examined the question whether the special features of the tax laws of such countries would justify solutions other than those contained in the Model Convention."

Paragraph 36 of the 1977 Model Convention corresponded to paragraph 43 of the 1963 Draft Convention. Paragraph 36 of the 1963 Draft Convention was amended and renumbered as paragraph 24 (see history of paragraph 24) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 43 of the 1963 Draft Convention was amended and renumbered as paragraph 36 of the 1977 Model Convention and the preceding headings were replaced. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 43 and the preceding headings read as follows:

"IV. SPECIAL POSITION OF CERTAIN COUNTRIES DUE TO PECULIARITIES OF THE NATIONAL TAX LAWS

A. GENERAL

43. Certain laws seek to avoid or mitigate economic double taxation, that is the simultaneous taxation of the company's profits in its hands and of the distributed profits in the hands of the shareholder. There are various ways of achieving this:

— the shareholder is not taxed in respect of the dividends paid to him by the company, the company having already been taxed in respect of the profits distributed; the tax paid by the company is allowed to be recovered from the shareholder (United Kingdom, Ireland: see C below);

— the shareholder pays the bulk or the whole of the tax on the profits distributed, while in respect of those same profits the company either pays a considerably reduced tax or is even exempted from tax (Germany, Greece and proposed legislation in the Netherlands: see D below).

— Part of the tax paid by the company on its distributed profits is credited against the tax payable by the shareholder (Belgium: see B below)."

Paragraph 41: Corresponds to paragraph 37 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 41 of the 1977 Model Convention was renumbered as paragraph 45 (see history of paragraph 45), paragraph 37 was renumbered as paragraph 41 and the heading preceding paragraph 37 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 37 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 37 of the 1963 Draft Convention was amended and renumbered as paragraph 25 (see history of paragraph 25) and a new paragraph 37 and heading were added.

Paragraph 42: Corresponds to paragraph 38 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 42 of the 1977 Model Convention was renumbered as paragraph 46 (see history of paragraph 46), paragraph 38 was renumbered as paragraph 42 and amended, by replacing, in the last line thereof, the words "in 1963" with "in the Model Convention". At the same time the heading preceding paragraph 38 was moved with it and amended, by deleting its last part and the footnote to it, by the report entitled "The Revision of the Model Convention",

adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the heading, the footnote and paragraph 38 read as follows:

> "1. *States with the classical system*
>
> (no relief of economic double taxation: All member countries not referred to in paragraph 36 above[1]; hereinafter called type A States)
>
> 1 The Italian system in force as from 1st January, 1974, may be considered as close to the classical system although it will be noted that economic double taxation is mitigated to a certain extent by the fact that the shareholder is not subject to local tax on the income he receives."
>
> "38. The Committee has recognised that economic double taxation need not be relieved at the international level when such double taxation remains unrelieved at the national level. It therefore considers that in relations between two States with the classical system, *i.e.* States which do not relieve economic double taxation, the respective levels of company tax in the Contracting States should have no influence on the rate of withholding tax on the dividend in the State of source (rate limited to 15 per cent by subparagraph *b)* of paragraph 2 of Article 10). Consequently, the solution recommended in 1963 remains fully applicable in the present case."

Paragraph 38 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 38 of the 1963 Draft Convention was amended and renumbered as paragraph 26 (see history of paragraph 26) and a new paragraph 38 and heading were added.

Paragraph 43: Corresponds to paragraph 39 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 43 of the 1977 Model Convention was renumbered as paragraph 47 (see history of paragraph 47), the heading preceding paragraph 43 was amended and moved with it and paragraph 39 was amended and renumbered as paragraph 43. In addition, the heading preceding paragraph 39 was moved with it and amended, by deleting its last part and the footnote to it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 39 and the heading preceding it read as follows:

> "2. *States applying a split rate company tax*
>
> (Austria; Finland; Germany; Iceland[2]; Japan; Norway; hereinafter called type B States)
>
> 39. These States levy company tax at different rates according to what the company does with its profits: the high rate is charged on any profits retained and the lower rate on those distributed. These rates are, respectively, in Austria, 55 and 27.5 per cent (maximum rates); in Germany, 56 and 36 per cent; in Japan, 40 and 30 percent (maximum rates) and in Norway 50.8 and 23 per cent. Finland should be considered among the split rate countries as it grants in the state income taxation a deduction calculated at 40 per cent on profits distributed. While undistributed profits are taxed at the rate of 43 per cent distributed profits are taxed at a correspondingly lower effective rate Therefore, the effects of this deduction are similar to those of the normal split rate system.
>
> 2 The effects of the Icelandic corporation tax system are similar to those of a split-rate system, insofar as dividends paid out during the fiscal year are deductible from net income in that year, to a maximum of 10 per cent of the nominal value of capital stock."

Paragraph 39 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 39 of the 1963 Draft Convention was amended and renumbered as paragraph 27 (see history of paragraph 27) and a new paragraph 39 and heading were added when the 1977 Model Convention was adopted.

Paragraph 44: Corresponds to paragraph 40 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 44 of the 1977 Model Convention was amended and renumbered as paragraph 48 (see history of paragraph 48) and paragraph 40 was renumbered as paragraph 44 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 40 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 40 of the 1963 Draft Convention was amended and renumbered as paragraph 30 (see history of paragraph 30), the preceding heading was moved with it and a new paragraph 40 was added.

Paragraph 45: Corresponds to paragraph 41 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 45 of the 1977 Model Convention was amended and renumbered as paragraph 49 (see history of paragraph 49), the heading preceding paragraph 45 was deleted (see history of paragraph 49) and paragraph 41 was amended and renumbered as paragraph 45 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 41 read as follows:

> "41. The Committee considered whether States in that group should not be recognised as being entitled to levy withholding tax exceeding 15 per cent on dividends distributed by their companies to residents of the other State (type A), with the proviso that the excess over 15 per cent, which would be designed to offset, in relation to the shareholder concerned, the effects of the lower rate of company tax on distributed profits of companies of State B, would not be creditable against the tax payable by the shareholder in the type A State of which he is a resident."

Paragraph 41 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 41 of the 1963 Draft Convention was amended and renumbered as paragraph 32 (see history of paragraph 32), the preceding heading was moved with it and a new paragraph 41 was added.

Paragraph 46: Corresponds to paragraph 42 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 46 of the 1977 Model Convention and the heading preceding it were deleted and paragraph 42 was amended and renumbered as paragraph 46 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 42 read as follows:

> "42. Most members considered that in a type B State regard should be had to the average level of company tax, and that such average level should be considered as the counterpart to the charge levied in the form of a single-rate tax on companies resident of State A. The levy by State B of an additional withholding tax not credited in State A would, moreover, create twofold discrimination: on the one hand, dividends, distributed by a company resident of State B would be more heavily taxed when distributed to residents of State A than when distributed to residents of State B, and, on the other hand, the resident of State A would pay higher personal tax on his dividends from State B than on his dividends from State A. The idea of a "balancing tax" was not, therefore, adopted by the Committee."

Paragraph 42 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 42 of the 1963 Draft Convention was amended and renumbered as paragraph 35 (see history of paragraph 35) and a new paragraph 42 was added.

In the 1977 Model Convention and until 23 July 1992, paragraph 46 and the heading preceding it read as follows:

"Case of Turkey

46. Certain features of the Turkish system suggest that it should be regarded as analogous to the French and British systems. The Turkish Delegation has pointed out that account ought to be taken of the requirements of Turkey's economic and fiscal policy; for this reason, Turkey would not consider extending in a bilateral convention the tax credit (set off for additional withholding tax levy) to non-resident shareholders. The Turkish Delegation furthermore considers that this problem can be dealt with only in bilateral negotiations where the sacrifices and advantages which the convention entails for each Contracting State may be best appreciated."

Paragraph 46 of the 1977 Model Convention replaced paragraph 46 and the preceding heading of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention and until they were deleted when the 1977 Model Convention was adopted, paragraph 46 and the preceding heading read as follows:

"B. BELGIUM

46. In Belgium, the company distributing the dividends is normally charged to company tax on its distributed profits. In the hands of a shareholder who is an individual the dividends are charged to personal income tax, but the shareholder has a tax credit equal to one-half of the tax paid by the company. In the hands of a company the net amount of the dividends received is excluded from the taxable profits to the extent that it forms part of such profits and so escapes company tax. As the share holder receives a tax credit equal to half of the amount of the company tax, Belgium considers that this tax credit should not be taken into consideration with regard to the 15 per cent limit and that the base taxable at the rate of 15 per cent should include this tax credit ("impôt de distribution" calculated at 15 per cent on 85/70 ths of the dividend paid)."

Paragraph 47: Corresponds to paragraph 43 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 47 of the 1977 Model Convention was amended and renumbered as paragraph 50 (see history of paragraph 50) and the heading preceding paragraph 47 was deleted (see history of paragraph 50). Paragraph 43 of the 1977 Model Convention was renumbered as paragraph 47 and the heading preceding paragraph 43 was amended by the report entitled "The Revision of the Model Convention", adopted by the Council of the OECD on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, this heading preceding paragraph 43 read as follows:

"3. *States which allow a part of company tax against the shareholder's tax*

(Belgium; Canada; Denmark, from 1977; France; Germany, from 1977; Ireland, from 1976; Turkey; the United Kingdom; hereinafter called type C States)"

Paragraph 43 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 43 of the 1963 Draft Convention was amended and renumbered as paragraph 36, the preceding headings were amended and moved with it (see history of paragraph 36) and a new paragraph 43 was added.

Paragraph 48: Corresponds to paragraph 44 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 48 of the 1977 Model Convention was amended and renumbered as paragraph 51 (see history of paragraph 51), by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. At the same time, paragraph 44 was amended and renumbered as paragraph 48 and the footnote to paragraph 44 was deleted. In the 1977 Model Convention and until 23 July 1992, paragraph 44 and its footnote read as follows:

"44. The rate of this tax credit, in terms of the dividend declared, is 46 per cent in Belgium (where it is called the "crédit d'impôt"), 33 1/3 per cent in Canada, about 15 per cent in Denmark, 50 per cent in France (where it is called the "avoir fiscal"), 9/16 in Germany, 7/13 in Ireland, 15/60 in Turkey and 35/65 in the United Kingdom. Internal law of States in this group does not provide for the extension of the tax credit to the international field. This credit is allowed only to residents and only in respect of dividends of domestic sources[1]. However, in recent conventions, some States extended the right to the tax credit to residents of the other Contracting States.

1 In Ireland and in the United Kingdom, however, the right to the tax credit is given to shareholders who are not residents of those States but are nationals of the States."

Paragraph 44 of the 1977 Model Convention replaced paragraph 44 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 44 read as follows:

"44. In the first case, the tax is paid by the company and is then regarded as borne by the shareholder; such treatment of the tax confers a dual character on it. The tax falls on the company's profits but enters into the computation of the shareholder's tax liability as well. This dual character becomes particularly apparent when the tax is charged only on the profits distributed. The above observation still applies even in the case where, besides the tax paid by the company and then regarded as borne by the shareholder, the recipient of the dividend, if an individual, has to pay other taxes (United Kingdom and Republic of Ireland: surtax)."

Paragraph 49: Corresponds to paragraph 45 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 49 of the 1977 Model Convention was amended and renumbered as paragraph 52 (see history of paragraph 52) and paragraph 45 was amended and renumbered as paragraph 49 by the report entitled "The Revision of the Model Convention", adopted by the Council of the OECD on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 45 and the heading preceding it read as follows:

"Case of France and the United Kingdom

45. Under the French "avoir fiscal" system and the United Kingdom tax credit system, the resident shareholder receives a credit in recognition of the fact that the profits out of which the dividends are paid have already been taxed in the hands of the company. The resident shareholder is taxed on his dividend grossed up by the "avoir fiscal" or tax credit; this "avoir fiscal" or tax credit is set against the tax payable and can possibly give rise to refund. These imputation systems differ in structure from the split rate systems of type B States, but both these types of systems may, if the conditions are comparable, have a similar result, provided that the shareholder of the company in the type B State reports his dividends. In double taxation conventions France and the United Kingdom have respectively given the "avoir fiscal" and the tax credit to shareholders who are residents of the other Contracting States."

Paragraph 45 of the 1977 Model Convention replaced paragraph 45 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 45 read as follows:

"45. In the second case, the taxation in question comes within the Article on the taxation of dividends. However, the reduction of such tax as provided in the present Article would cause difficulties for Germany, the Netherlands and Greece, owing to the peculiarities of their national tax laws."

Paragraph 50: Corresponds to paragraph 47 in the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 50 of the 1977 Model Convention was amended and renumbered as paragraph 53 (see history of paragraph 53), paragraph 47 was amended and renumbered as paragraph 50 and the heading preceding paragraph 47 was deleted by the report entitled "The Revision of the Model Convention", adopted by the Council of the OECD on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 47 and the heading preceding it read as follows:

"*Case of Belgium and Canada*

47. These States claim that under their systems the company tax remains in its entirety a true company tax, in that it is charged by reference solely to the company's own situation, without any regard to the person and the residence of the shareholder, and in that, having been so charged, it remains appropriated to the Treasury. The tax credit given to the shareholder is designed to relieve his personal tax liability and in no way constitutes an adjustment of the company's tax. No refund, therefore, is given if the tax credit exceeds that personal tax."

Paragraph 47 of the 1977 Model Convention (adopted by the OECD Council on 11 April 1977), replaced paragraph 47 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963). Paragraph 47 and the preceding heading of the 1963 Draft Convention, were deleted and a new paragraph 47 and heading were added when the 1977 Model Convention was adopted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 47 and the preceding heading read as follows:

"C. UNITED KINGDOM, IRELAND

47. The United Kingdom and Ireland could not envisage the repayment to non-resident shareholders of the tax charged on the company, with a view to reducing the tax indirectly borne by them to the amount provided for in the Article. In bilateral Conventions the United Kingdom and the Republic of Ireland commonly give up surtax payable by non-resident shareholders. The United Kingdom and the Republic of Ireland are further prepared to give non-resident individuals the relief provided in Section 227 of the United Kingdom's Income Tax Act, 1952, and Section 8 of the Republic of Ireland's Finance Act, 1935, respectively (proportionate personal allowances). Non-resident bodies corporate which are shareholders of companies resident in the United Kingdom or in Ireland cannot, however, obtain relief in respect of taxes indirectly borne by them."

Paragraph 51: Corresponds to paragraph 48 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 51 of the 1977 Model Convention was amended and renumbered as paragraph 54 (see history of paragraph 54) and paragraph 48 was amended and renumbered as paragraph 51 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 48 read as follows:

"48. The Committee could not reach a general agreement on whether these two countries' systems and the French or British system display a fundamental difference that could justify different solutions at the international level."

Paragraph 48 of the 1977 Model Convention replaced paragraph 48 and the preceding heading of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until they were deleted when the 1977 Model Convention was adopted, paragraph 48 and the preceding heading read as follows:

"D. GERMANY, GREECE AND ICELAND

48. The solution proposed in paragraph 2 of the Article is based on the hypothesis that the purpose of a double taxation Convention is not to prevent the economic double taxation that occurs when a State taxes not only in the hands of the company its total industrial or commercial profits, but also, in addition, the profits distributed as dividends in the hands of the shareholder. If a State mitigates or abolishes such double taxation by charging on the company only a very low tax or no tax at all in respect of the part of profits to be distributed (because it fully taxes the profit distribution in the hands of resident shareholders), it must have the right to tax, at a higher rate than those mentioned in paragraph 2, the dividends received by a non-resident shareholder. The imposition of a higher tax at the source would thus be compensation for the fact that the distributed profits have not been taxed, or have been taxed at a reduced rate, in the hands of the company. In this case, it may also be necessary to charge a higher tax at the source than those mentioned in paragraph 2 in order to ensure that non-resident shareholders (or certain categories of shareholders, *e.g.* non-resident parent companies) are not in a more favourable tax position than resident shareholders. A number of States which have concluded Conventions with these countries have taken this peculiarity in their laws into account."

Paragraph 52: Corresponds to paragraph 49 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 52 of the 1977 Model Convention was amended and renumbered as paragraph 55 (see history of paragraph 55) and paragraph 49 was amended and renumbered as paragraph 52 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 49 read as follows:

"49. Some members were of the opinion that such a fundamental difference does not exist. This opinion leaves room for the conclusion that the two countries concerned should — like France and the United Kingdom (paragraph 45 above) — extend the tax credit to non-resident shareholders. Such a solution tends to ensure neutrality as regards dividends distributed by companies of these countries the same treatment being given to resident and non-resident shareholders. On the other hand, it would in relation to shareholders who are residents of a Contracting State (a type A State in particular) encourage investment in a type C State; residents of State A receive a tax credit (in fact a refund of company tax) for dividends from State C while they do not receive one for dividends from their own country. However, these effects, which also occur in the case of France and the United Kingdom, are similar to those which present themselves between a type B and a type A State or between two type A States one of which has a lower company tax rate than the other (paragraphs 38 and 39 to 42 above)."

Paragraph 49 of the 1977 Model Convention replaced paragraph 49 and the preceding heading of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until they were deleted when the 1977 Model Convention was adopted, paragraph 49 and the preceding heading read as follows:

"E. APPRECIATION OF THE POSITION

49. Different views may be taken as to the exact nature of taxes (in the United Kingdom and Ireland) which, though not levied directly on the shareholder, are regarded as borne by him. Whatever these views may be, however, States negotiating double taxation Conventions with the United Kingdom or Ireland should have the opportunity to decide, in each particular case, whether they are prepared to reduce their own taxes to the rate specified in the present Article, taking into account the other concessions which these two countries can offer."

Paragraph 53: Corresponds to paragraph 50 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 53 of the 1977 Model Convention was renumbered as paragraph 56 (see history of paragraph 56) and paragraph 50 was amended and renumbered as paragraph 53 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 50 read as follows:

> "50. On the other hand, many members stressed the fact that a determination of the true nature of the tax relief given under these two countries' systems, reveals a mere alleviation of the shareholder's personal income tax in recognition of the fact that his dividend will normally have borne company tax. The tax credit is given once and for all (forfaitaire) and is therefore not in exact relation to the actual company tax appropriate to the profits out of which the dividend is paid. There is no refund if the tax credit exceeds the personal income tax."

Paragraph 50 of the 1977 Model Convention replaced paragraph 50 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 50 read as follows:

> "50. With regard to the position in Belgium, Germany, Greece and Iceland, the Committee considers that a final settlement should be reached through bilateral negotiations."

Paragraph 54: Corresponds to paragraph 51 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 54 of the 1977 Model Convention and the heading preceding it were deleted and paragraph 51 was amended and renumbered as paragraph 54 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 51 read as follows:

> "51. As the relief in essence is not a refund of company tax but an alleviation of the personal income tax, the extension of the relief to non-resident shareholders who are not subject to personal income tax in the countries concerned does not come into consideration. On the other hand, however, on this line of reasoning, the question whether a type C State should give relief against personal income tax levied from resident shareholders on foreign dividends deserves attention. In this respect it should be observed that the answer is in the affirmative if the question is looked at from the standpoint of neutrality as regards the source of the dividends; otherwise, residents of State C will be encouraged to acquire shares in their own country rather than abroad. But such an extension of the tax credit would be contrary to the principle of reciprocity: not only would the State concerned thereby be making a unilateral budgetary sacrifice (allowing the tax credit over and above the withholding tax levied in the other State), but it would do so without receiving any economic compensation, since it would not be encouraging residents of the other State to acquire shares in its own territory."

Paragraph 51 of the 1977 Model Convention replaced paragraph 51 and the preceding headings of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until they were deleted when the 1977 Model Convention was adopted, paragraph 51 and the preceding headings read as follows:

> "V. RESERVATION ON THE ARTICLE
>
> *Paragraph 2, sub-paragraph a) (Holdings)*
>
> 51. The Netherlands has entered a reservation respecting the rate of 5 per cent, since it considers that transfers of profits within a group of enterprises should be entirely exempted from tax at the source."

In the 1977 Model Convention and until 23 July 1992, paragraph 54 and the heading preceding it read as follows:

> *"Case of Denmark, Germany and Ireland*
>
> 54. Denmark and Ireland have company tax systems similar to the French and British ones. The German company tax system as it is in effect from 1977, differs from the other systems insofar as it combines the economic effects of a split rate system and a credit system. The rate of tax on company profits is 56 per cent, but it is reduced by 20 percentage points in respect to profits distributed, which are therefore taxed at a rate of 36 per cent (see paragraph 39 above). Moreover, resident shareholders of a German company (individuals and companies) are entitled to a tax credit of 9/16 of the cash dividends received from the company with the effect that the whole company tax on profits distributed to such shareholders is credited against the latter's tax on income. If the tax on income is lower than the credit to be given the excess part is reimbursed. As their systems have been introduced very recently, these countries wish to leave to bilateral negotiations the question whether the special features of their tax laws would justify solutions other than those contained in the Model Convention.[1]
>
> 1 Since the introduction in Ireland of the imputation system of company taxation, that country has concluded only one double taxation convention, namely, that with the United Kingdom. The convention provides for giving the tax credit to United Kingdom portfolio investors but this is not regarded by Ireland as constituting a guideline for future conventions."

Paragraph 54 of the 1977 Model Convention (adopted by the OECD Council on 11 April 1977), replaced paragraph 54 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963). Paragraph 54 of the 1963 Draft Convention was deleted and a new paragraph 54 and heading were added when the 1977 Model Convention was adopted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 54 read as follows:

> "54. France wishes to retain its freedom of judgment, both as regards the limit on the tax and the determination of the minimum percentage for the holding."

Paragraph 55: Corresponds to paragraph 52 of the 1977 Model Convention. On 23 July 1992 paragraph 55 of the 1977 Model Convention was renumbered as paragraph 57 (see history of paragraph 57), the heading preceding paragraph 55 was moved with it and paragraph 52 was amended and renumbered as paragraph 55 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 52 read as follows:

> "52. To overcome these objections, it might be a conceivable proposition, amongst other possibilities, that State A — which will have collected company tax on dividends distributed by resident companies — should bear the cost of the tax credit that State C would allow, by transferring funds to that State. As, however, such transfers are hardly favoured by the States this might be more simply achieved by means of a "compositional" arrangement under which State A would relinquish all withholding tax on dividends paid to residents of State C, and the latter would then allow against its own tax, not the 15 per cent withholding tax (abolished in State A) but a tax credit similar to that which it gives on dividends of domestic source."

Paragraph 52 of the 1977 Model Convention replaced paragraph 52 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 52 read as follows:

"52. Spain and Italy have a reservation concerning the percentage envisaged for the holding (25 per cent). They can only agree to a rate of tax of 5 per cent for a direct holding of at least 51 per cent."

Paragraph 56: Corresponds to paragraph 53 of the 1977 Model Convention. On 23 July 1992 paragraph 56 of the 1977 Model Convention was renumbered as paragraph 58 (see history of paragraph 58) and paragraph 53 was renumbered as paragraph 56 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 53 of the 1977 Model Convention replaced paragraph 53 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 53 read as follows:

"53. Portugal has a reservation regarding the rate of tax of 5 per cent. It can only accept in the Article itself a rate of 10 per cent, but might consider reducing this percentage in bilateral negotiations."

Paragraph 57: Deleted together with the preceding heading on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 57 and the heading preceding it read as follows:

"4. State with a special system

(Greece)

57. Under the Greek system, a company's profits are taxed at the level of the company, but any part of them which is distributed — whether immediately or subsequently — to the shareholders is taxed once only, the tax paid by the company on this part of its profits being refunded to it."

Paragraph 57, as it read after 23 July 1992, corresponded to paragraph 55 of the 1977 Model Convention. On 23 July 1992 paragraph 57 of the 1977 Model Convention was amended and renumbered as paragraph 59 (see history of paragraph 59), the heading preceding paragraph 57 was moved with it, paragraph 55 was renumbered as paragraph 57 and the heading preceding paragraph 55 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 55 of the 1977 Model Convention replaced paragraph 55 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 55 read as follows:

"55. Germany enters a reservation concerning the application of subparagraph (*a*) in certain cases where it does not seem necessary to reduce its tax at the source below 15 per cent in order to avoid substantial recurrent taxation."

Paragraph 58: Deleted on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 58 read as follows:

"58. Since Greece does not tax distributed profits at the level of the company, the Committee recognises this State's right to tax at source profits distributed by its companies at a higher rate than those specified in paragraph 2. The maximum rate must in this case be fixed by bilateral negotiations, regard being had to the special features of each situation, *e.g.* the respective levels of the taxes in the two States, the budgetary sacrifices accepted by the two States, etc."

Paragraph 58, as it read after 23 July 1992, corresponded to paragraph 56 of the 1977 Model Convention. On 23 July 1992 paragraph 58 of the 1977 Model Convention was

amended and renumbered as paragraph 60 (see history of paragraph 60) and paragraph 56 was renumbered as paragraph 58 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 56 of the 1977 Model Convention replaced paragraph 56 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 56 read as follows:

"56. Belgium has a reservation on sub-paragraph (a) because, as regards the treatment of subsidiaries, it has not up to now made any special concession in the case of holdings of less than 90 per cent. Belgium's Conventions with the United Kingdom and Sweden contain a special (fairly complicated) solution for the benefit of subsidiaries controlled as to at least 90 per cent; where a British or Swedish company owns at least 90 per cent of the share capital of a Belgian company, the total charge to the "taxe mobilière" and the "contribution nationale de crise" in respect of the dividends distributed to the parent company is restricted to a sum equal to the additional "taxe professionnelle" which would have been payable had there been no distribution of dividends. In addition, owing to the changes introduced by the new Law of 20th November, 1962, Belgium wishes to retain its freedom of action with regard to the treatment of holdings (parent companies and subsidiaries)."

C (10)

Paragraph 59: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until 22 July 2010, paragraph 59 read as follows:

"59. Comments above relating to dividends paid to individuals are generally applicable to dividends paid to companies which hold less than 25 per cent of the capital of the company paying the dividends. Moreover, the Committee on Fiscal Affairs has not covered in the Commentary the special problem of dividends paid to collective investment institutions (investment companies or investment funds)."

Paragraph 59, as it read after 23 July 1992, corresponded to paragraph 57 of the 1977 Model Convention. On 23 July 1992 paragraph 59 of the 1977 Model Convention was renumbered as paragraph 61 (see history of paragraph 61), paragraph 57 was amended, by deleting a footnote to it, and renumbered as paragraph 59 and the heading preceding paragraph 57 was moved with it by the Report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the footnote to paragraph 57 read as follows:

"1 This problem is the subject of other work by the Committee on Fiscal Affairs."

Paragraph 57 of the 1977 Model Convention replaced paragraph 57 and the preceding heading of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until they were deleted when the 1977 Model Convention was adopted, paragraph 57 and the preceding heading read as follows:

"Paragraph 2, sub-paragraphs (a) and (b)

57. Turkey cannot accept a rate of tax which is lower than 20 per cent."

Paragraph 60: Corresponds to paragraph 58 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 60 of the 1977 Model Convention was renumbered as paragraph 62 (see history of paragraph 62) and paragraph 58 was renumbered as paragraph 60 and amended, by replacing the reference therein to paragraph 39 with a reference to paragraph 42, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 58 read as follows:

"58. In respect of dividends paid to companies which hold at least 25 per cent of the capital of the company paying the dividends, the Committee has examined the incidence which the particular company taxation systems quoted in paragraphs 39 and following have on the tax treatment of dividends paid by the subsidiary."

Paragraph 58 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 58 of the 1963 Draft Convention was amended and renumbered as paragraph 70 (see history of paragraph 70), the preceding heading was moved with it and a new paragraph 58 was added.

Paragraph 61: Corresponds to paragraph 59 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 61 of the 1977 Model Convention was renumbered as paragraph 63 (see history of paragraph 63), the heading preceding paragraph 61 was amended and moved with it and paragraph 59 was renumbered as paragraph 61 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 59 of the 1977 Model Convention (adopted by the OECD Council on 11 April 1977), replaced paragraph 59 of the 1963 Draft Convention. Paragraph 59 of the 1963 Draft Convention was deleted and a new paragraph 59 was added. At the same time the heading preceding paragraph 59 was moved immediately before paragraph 77. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 59 read as follows:

"59. With respect to paragraph 3 of the Article, Belgium in view of the fact that the income tax reform Law on 20th November, 1962, excludes liquidation bonuses from the category of income from movable property and subjects them to special levy in lieu of company tax, reserves its position as regards:

a) the special levy imposed by the new law in the case of the redemption of their shares or stock by companies limited by shares and limited partnerships with share capital or by any companies, associations establishments or bodies constituted in Belgium otherwise than in one of the forms specified in the Commercial Code;

b) the special levy imposed by the same law in the case of the division of the assets of such legal persons as are mentioned in sub-paragraph a) above or of partnerships of individuals not opting for their profits to be charged to personal income tax in the name of the partners.

This reservation is dictated by the consideration that these special levies on the company, etc., are really in the nature of a composition satisfying all personal taxes that would be due from the shareholders or partners on the capital gains or distributions of profits in question. Belgium considers that the limitations provided for in the case of distribution taxes on dividends do not apply to these special levies."

Paragraph 62: Corresponds to paragraph 60 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 62 of the 1977 Model Convention was renumbered as paragraph 64 (see history of paragraph 64), the heading preceding paragraph 62 was amended and moved with it and paragraph 60 was renumbered as paragraph 62 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 60 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 60 of the 1963 Draft Convention was amended and renumbered as paragraph 79 (see history of paragraph 79), the preceding heading was moved with it and a new paragraph 60 was added.

Paragraph 63: Corresponds to paragraph 61 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 63 of the 1977 Model Convention was

renumbered as paragraph 65 (see history of paragraph 65), the heading preceding paragraph 63 was amended and moved with it, paragraph 61 was renumbered as paragraph 63 and the heading preceding paragraph 61 was moved with it and amended by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the heading preceding paragraph 61 read as follows:

"1. *Classical system in the State of the subsidiary*

(Type A States — paragraph 38 above)."

Paragraph 61 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 61 of the 1963 Draft Convention was amended and renumbered as paragraph 81 (see history of paragraph 81), the heading preceding paragraph 61 was moved immediately before paragraph 80 and a new paragraph 61 was added.

Paragraph 64: Corresponds to paragraph 62 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 64 of the 1977 Model Convention was renumbered as paragraph 66 (see history of paragraph 66), paragraph 62 was renumbered as paragraph 64 and the heading preceding paragraph 62 was moved with it amended by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the heading preceding paragraph 62 read as follows:

"2. *Split-rate company tax system in the State of the subsidiary*

(Type B States — paragraphs 39 to 42 above)."

Paragraph 62 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 65: Corresponds to paragraph 63 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 65 of the 1977 Model Convention was renumbered as paragraph 67 (see history of paragraph 67), paragraph 63 was renumbered as paragraph 65 and the heading preceding paragraph 63 was moved with it and amended by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the heading preceding paragraph 63 read as follows:

"3. *Imputation system in the State of the subsidiary*

(Type C States — paragraphs 43 and following)."

Paragraph 63 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 66: Corresponds to paragraph 64 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 66 of the 1977 Model Convention was deleted, the heading preceding paragraph 66 was moved immediately before paragraph 68 and paragraph 64 was amended by deleting a footnote to it and renumbered as paragraph 66 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, the footnote to paragraph 64 read as follows:

"1 This solution is provided for in a Draft Directive presented on 1st August, 1975 by the Commission of the European Communities. According to this draft, the State in which the parent company is resident should, when shareholders resident in its territory are taxed, wholly or partly offset the company tax levied in the State in which the subsidiary is a resident. The draft also provides for compensation for the tax burden resulting from offsetting between the State in which the parent company is a resident and that in which the subsidiary is a resident."

Paragraph 64 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 66 read as follows:

> "66. *Portugal* makes the following observations as regards paragraph 27 above. Indeed gains from the increase in capital of companies with a head office or place of effective management in Portugal, when the increase results from the capitalisation of reserves or the issue of shares, are taxed under the Portuguese domestic law as capital gains. In bilateral conventions, Portugal usually inserts in Article 13 a provision allowing it to tax such gains."

Paragraph 66 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 67: Corresponds to paragraph 65 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 67 of the 1977 Model Convention was amended and renumbered as paragraph 68 (see history of paragraph 68) and paragraph 65 was renumbered as paragraph 67 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 65 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 67.1: Added, together with the heading preceding it, on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Tax Treaty Issues Relating to REITs" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 67.2: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Tax Treaty Issues Relating to REITs" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 67.3: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Tax Treaty Issues Relating to REITs" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 67.4: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Tax Treaty Issues Relating to REITs" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 67.5: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Tax Treaty Issues Relating to REITs" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 67.6: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Tax Treaty Issues Relating to REITs" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 67.7: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another report entitled "Tax Treaty Issues Relating to REITs" (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 68: Corresponds to paragraph 67 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 68 of the 1977 Model Convention was amended and renumbered as paragraph 69 (see history of paragraph 69), the headings preceding paragraph 68 were moved with it, the heading preceding paragraph 66 was moved immediately before paragraph 68 and paragraph 67 was amended and

renumbered as paragraph 68 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 67 read as follows:

> "67. The *United Kingdom* does not adhere to paragraph 24 above. Under United Kingdom law, certain interest payments are treated as distributions, and are therefore included by the United Kingdom in the definition of dividends."

Paragraph 67 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 68.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 68.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 69: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 69 read as follows:

> "69. *New Zealand* reserves the right to tax, at a rate of 15 per cent, dividends paid by a company that is a resident of New Zealand."

Paragraph 69 was amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 69 read as follows:

> "69. *New Zealand* reserves the right to tax, at a rate of 15 per cent, dividends paid by a company that is a resident of New Zealand for purposes of its tax."

Paragraph 69 was replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 31 March 1994 and until 29 April 2000, paragraph 69 read as follows:

> "69. *Australia* reserves the right to tax, at a rate of not less than 15 per cent, dividends paid by a company that is a resident of Australia for purposes of its tax."

Paragraph 69 was previously amended on 31 March 1994, by deleting the word "always" from the reservation, by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 69 read as follows:

> "69. *Australia* reserves the right always to tax, at a rate of not less than 15 per cent, dividends paid by a company which is a resident of Australia for purposes of its tax."

Paragraph 69 as it read after to 23 July 1992, corresponded to paragraph 68 of the 1977 Model Convention. On 23 July 1992 paragraph 69 of the 1977 Model Convention was amended and renumbered as paragraph 70 (see history of paragraph 70), paragraph 68 was renumbered as paragraph 69 and the headings preceding paragraph 68 were moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 68 and the preceding heading were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 70: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 70 read as follows:

> "70. *New Zealand* reserves its positions on subparagraph *a)* because it wishes to retain its freedom of action with regard to the treatment of holding (parent companies and subsidiaries)."

Paragraph 70, as it read after 23 July 1992, corresponded to paragraph 69 of the 1977 Model Convention. On 23 July 1992 paragraph 70 of the 1977 Model Convention was amended and renumbered as paragraph 71 (see history of paragraph 71) and paragraph 69 was amended and renumbered as paragraph 70 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 69 read as follows:

> "69. *Belgium*, *Japan* and *New Zealand* reserve their positions on subparagraph *a)* because they wish to retain their freedom of action with regard to the treatment of holding (parent companies and subsidiaries)."

Paragraph 69 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 71: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 71 read as follows:

> "71. *Canada* reserves the right to apply a 10 per cent rate of tax at source in the case of holdings (parent companies and subsidiaries)."

Paragraph 71, as it read after 23 July 1992, corresponded to paragraph 70 of the 1977 Model Convention. On 23 July 1992 paragraph 71 of the 1977 Model Convention was renumbered as paragraph 72 (see history of paragraph 72) and paragraph 70 was renumbered as paragraph 71 and amended by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 70 read as follows:

> "70. *Canada* reserves the right to apply a 15 per cent rate of tax at source on dividends paid to non-residents without regard to the relation between the company paying the dividends and the beneficial owner."

Paragraph 70 of the 1977 Model Convention corresponded to paragraph 58 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 58 of the 1963 Draft Convention was amended and renumbered as paragraph 70 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 58 read as follows:

> "58. *Canada* reserves its position on the second paragraph of this Article."

Paragraph 72: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 72 read as follows:

> "72. The *United States* reserves the right to provide that shareholders of pass-through entities will not be granted the direct dividend investment rate, even if they would qualify (based on their percentage of ownership)."

Paragraph 72 replaced paragraph 71 of the 1977 Model Convention on 23 July 1992. On 23 July 1992 paragraph 72 of the 1977 Model Convention was renumbered as paragraph 73 (see history of paragraph 73) and paragraph 71 was replaced by the Report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention paragraph 71 read as follows:

> "71. *Germany*, with a view to its system of company taxation, reserves its position on paragraph 2."

Paragraph 71 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 73: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until 22 July 2010, paragraph 73 read as follows:

"73. *Italy* reserves its position concerning the percentage envisaged for the holding (25 per cent) and can only agree to a rate of tax of 5 per cent for a direct holding of more than 50 per cent."

Paragraph 73, as it read after 23 July 1992, corresponded to paragraph 72 of the 1977 Model Convention. On 23 July 1992 paragraph 73 of the 1977 Model Convention was renumbered as paragraph 74 (see history of paragraph 74) and paragraph 72 was renumbered as paragraph 73 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 72 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 74: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 74 was previously deleted on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 74 read as follow:

"74. *The Netherlands* reserves its position on the rate of 5 per cent, since it considers that transfers of profits within a group of enterprises should be entirely exempted from tax at the source."

Paragraph 74 as it read after 23 July 1992 corresponded to paragraph 73 of the 1977 Model Convention. On 23 July 1992 paragraph 74 of the 1977 Model Convention was renumbered as paragraph 75 (see history of paragraph 75) and paragraph 73 of the 1977 Model was renumbered as paragraph 74 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 73 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 75: Amended on 29 April 2000, by deleting the second sentence, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 21 September 1995 and until 29 April 2000, paragraph 75 read as follows:

"75. *Portugal*, *Mexico* and *Turkey* reserve their positions on the rates of tax in paragraph 2. *Mexico* will seek a zero tax rate for all dividends, because it does not levy tax on profits in the hands of the shareholders but taxes profits only at the corporate level."

Paragraph 75 was previously amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", which was adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 75 read as follows:

"75. *Portugal* reserves its position on the rates of tax in paragraph 2."

Paragraph 75 as it read before 23 July 1992 corresponded to paragraph 74 of the 1977 Model Convention. Paragraph 75 of the 1977 Model Convention was renumbered as paragraph 76 (see history of paragraph 76) and paragraph 74 was renumbered as paragraph 75 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 74 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 76: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until 22 July 2010, paragraph 76 read as follows:

> "76. *Spain* reserves its position on the rate of tax of 5 per cent and the determination of the minimum percentage for the holding."

Paragraph 76, as it read after 23 July 1992, corresponded to paragraph 75 of the 1977 Model Convention. On 23 July 1992 paragraph 76 of the 1977 Model Convention was amended and renumbered as paragraph 77 (see history of paragraph 77) and paragraph 75 was renumbered as paragraph 76 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 75 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 77: Added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 77 was deleted on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 77 read as follows:

> "77. *Turkey* reserves its position on the rate of tax in paragraph 2."

Paragraph 77, as it read after 23 July 1992, corresponded to paragraph 76 of the 1977 Model Convention. On 23 July 1992 paragraph 77 of the 1977 Model Convention was amended and renumbered as paragraph 78 (see history of paragraph 78), the heading preceding paragraph 77 was moved with it and paragraph 76 was amended and renumbered as paragraph 77 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 76 read as follows:

> "76. *Turkey* cannot accept a rate of tax which is lower than 20 per cent."

Paragraph 76 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 78: Amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 78 read as follows:

> "78. *Belgium* reserves the right to amplify the definition of dividends in paragraph 3 so as to cover expressly income from capital invested by partners in Belgian partnerships even when this income is paid in the form of interest."

Paragraph 78 as it read after 23 July 1992 corresponded to paragraph 77 of the 1977 Model Convention. On 23 July 1992 paragraph 78 of the 1977 Model Convention was deleted and paragraph 77 was amended and renumbered as paragraph 78 and the heading preceding paragraph 77 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 77 read as follows:

> "77. *Belgium* reserves the right to amplify the definition of dividends in paragraph 3 so as to cover expressly income — even when paid in the form of interest — which is taxable as income from capital invested by partners in Belgian partnerships which have not opted for their profits to be charged to personal income tax in the names of such partners individually."

Paragraph 77 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977 and the heading preceding paragraph 59 was moved immediately before it.

In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 78 read as follows:

"78. In view, moreover, of the fact that Belgian law excludes distributions of liquidation surpluses from the movable capital income category ("revenus mobiliers") and subjects them to a compositional charge to company tax which relieves the individual shareholders or partners from any liability to personal tax, *Belgium* reserves the right to levy, in accordance with its internal law, such "special contributions", either in the case of the redemption of its own shares or partnership shares by a company or partnership resident in Belgium or on the division of its assets by such a company or partnership among its shareholders or members. Such special contributions fall neither under the restrictions provided in paragraph 2, as regards distribution tax charged on dividends, nor under any other restrictive provision whatever of the Convention (paragraph 4 of Article 13; paragraph 1 of Article 21, etc.)."

Paragraph 78 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 79: Replaced paragraph 79 of the 1977 Model Convention on 23 July 1992. Paragraph 79 of the 1977 Model Convention was renumbered as paragraph 82 (see history of paragraph 82), the heading preceding paragraph 79 was moved with it and new paragraph 79 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 80: Amended on 15 July 2005, by adding Mexico as a country making the reservation, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 80 read as follows:

"80. *France* reserves the right to amplify the definition of dividends in paragraph 3 so as to cover all income subjected to the taxation treatment of distributions."

Paragraph 80 as it read after 23 July 1992 replaced paragraph 80 of the 1977 Model Convention. On 23 July 1992 paragraph 80 of the 1977 Model Convention was deleted, new paragraph 80 was added and the heading preceding paragraph 80 was moved immediately before paragraph 83 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 80 read as follows:

"80. *Australia* reserves the right to impose tax on the undistributed Australian income of a private (close) company which is a resident of the other State."

Paragraph 80 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 81: Amended on 22 July 2010, by deleting Spain from the list of countries making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 81 read as follows:

"81. *Canada*, *Germany* and *Spain* reserve the right to amplify the definition of dividends in paragraph 3 so as to cover certain interest payments which are treated as distributions under their domestic law."

Paragraph 81 was previously amended on 17 July 2008, by deleting Ireland from the list of countries making the reservation, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 31 March 1994 and until 17 July 2008, paragraph 81 read as follows:

"81. *Canada*, *Germany*, *Ireland* and *Spain* reserve the right to amplify the definition of dividends in paragraph 3 so as to cover certain interest payments which are treated as distributions under their domestic law."

Paragraph 81 was previously amended on 31 March 1994, by deleting Portugal from the list of countries making the reservation, by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 81 read as follows:

> "81. *Canada*, *Germany*, *Ireland*, *Portugal* and *Spain* reserve the right to amplify the definition of dividends in paragraph 3 so as to cover certain interest payments which are treated as distributions under their domestic law."

Paragraph 81 as it read after 23 July 1992 replaced paragraph 81 of the 1977 Model Convention. On 23 July 1992 paragraph 81 of the 1977 Model Convention was amended and renumbered as paragraph 84 (see history of paragraph 84) and a new paragraph 81 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 81.1: Added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 81.2: Amended on 22 July 2010, by adding Chile as a country making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 81.2 read as follows:

> "81.2 *Luxembourg* reserves the right to expand the definition of dividends in paragraph 3 in order to cover certain payments which are treated as distributions of dividends under its domestic law."

Paragraph 81.2 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 82: Deleted, together with the heading that preceded it, on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until 22 July 2010, paragraph 82 and the preceding heading read as follows:

> "*Paragraph 4*
>
> 82. *Italy* reserves the right to subject dividends to the taxes imposed by its law whenever the recipient thereof has a permanent establishment in Italy, even if the holding on which the dividends are paid is not effectively connected with such permanent establishment."

Paragraph 82, as it read after 23 July 1992, corresponded to paragraph 79 of the 1977 Model Convention. On 23 July 1992 paragraph 82 of the 1977 Model Convention was deleted and paragraph 79 was renumbered as paragraph 82 and the heading preceding paragraph 79 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 79 of the 1977 Model Convention corresponded to paragraph 60 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 60 of the 1963 Draft Convention was amended and renumbered as paragraph 79 and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 60 read as follows:

> "60. Italy reserves the right to subject dividends to the taxes imposed by its law whenever the recipient thereof has a permanent establishment in Italy, even if the holding on which the dividends are paid is not effectively connected with such permanent establishment."

In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 82 read as follows:

"82. *Spain* cannot adhere without a reservation to the provisions of this paragraph owing to the structure of its fiscal law which provides that permanent establishments in Spain of foreign companies are to be taxed under the same conditions as Spanish companies."

Paragraph 82 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 83: Amended on 28 January 2003, by added a second sentence, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 31 March 1994 and until 28 January 2003, paragraph 83 read as follow:

"83. *Canada* and the *United States* reserve the right to impose their branch tax on the earnings of a company attributable to a permanent establishment situated in these countries."

Paragraph 83 was previously amended on 31 March 1994, by adding the United States as a country making the reservation, by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 83 read as follows:

"83. *Canada* reserves its right to impose its branch tax on the earnings of a company attributable to a permanent establishment in Canada."

Paragraph 83 was replaced on 23 July 1992. On 23 July 1992 paragraph 83 of the 1977 Model Convention was deleted, a new paragraph 83 was added and the heading preceding paragraph 80 was moved immediately before paragraph 83 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 83 read as follows:

"83. The *United States* believes that the text should clarify that the prohibition of paragraph 5 will apply regardless of whether the company derives profits or income from the other Contracting State."

Paragraph 83 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 84: Deleted on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", which was adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 84 read as follows:

"84. In order to align the tax treatment of permanent establishments and subsidiaries, *France* wishes to retain the possibility of applying the provisions in its laws according to which profits made in France by foreign companies are deemed to be distributed to non-resident shareholders and are taxed accordingly. France is prepared, however, to reduce in bilateral conventions the rate provided for in its domestic laws."

Paragraph 84 as it read after 23 July 1992 corresponded to paragraph 81 of the 1977 Model Convention. On 23 July 1992 paragraph 84 of the 1977 Model Convention was renumbered as paragraph 86 (see history of paragraph 86) and paragraph 81 was amended and renumbered as paragraph 84 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 81 read as follows:

"81. *France* cannot adhere to the provisions of this paragraph. France wishes to retain the possibility of applying the provisions in its laws according to which profits made in France by foreign companies are deemed to be distributed to non-

resident shareholders and are taxed accordingly. France is prepared, however, to reduce in bilateral conventions the rate provided for in its domestic laws."

Paragraph 81 of the 1977 Model Convention corresponded to paragraph 61 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 61 of the 1963 Draft Convention was amended and renumbered as paragraph 81 and the preceding heading was moved immediately before paragraph 80 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 61 read as follows:

"61. France cannot adhere without a reservation to the provisions of this paragraph owing to the structure of its fiscal law which provides that permanent establishments in France of foreign companies are to be taxed under the same conditions as French companies."

Paragraph 85: Replaced paragraph 85 on 23 July 1992. Paragraph 85 of the 1977 Model Convention was deleted and new paragraph 85 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 85 read as follows:

"85. The *United States* reserves the right to apply its dividend withholding tax to dividends paid by a company which is incorporated outside the United States, if at least one half of the company's income consists of profits attributable to a permanent establishment in the United States."

Paragraph 85 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 86: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 86 read as follows:

"86. *The United States* reserves the right to impose its accumulated earnings tax and personal holding company tax, to prevent tax avoidance."

Paragraph 86 as it read after 23 July 1992 corresponded to paragraph 84 of the 1977 Model Convention. Paragraph 84 of the 1977 Model Convention was renumbered as paragraph 86 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 84 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

COMMENTARY ON ARTICLE 11 CONCERNING THE TAXATION OF INTEREST

I. Preliminary remarks

1. "Interest" is generally taken to mean remuneration on money lent, being remuneration coming within the category of "income from movable capital" (*revenus de capitaux mobiliers*). Unlike dividends, interest does not suffer economic double taxation, that is, it is not taxed both in the hands of the debtor and in the hands of the creditor. Unless it is provided to the contrary by the contract, payment of the tax charged on interest falls on the recipient. If it happens that the debtor undertakes to bear any tax chargeable at the source, this is as though he had agreed to pay his creditor additional interest corresponding to such tax.

(Renumbered and amended on 11 April 1977; see HISTORY)

2. But, like dividends, interest on bonds or debentures or loans usually attracts tax charged by deduction at the source when the interest is paid. This method is, in fact, commonly used for practical reasons, as the tax charged at the source can constitute an advance of the tax payable by the recipient in respect of his total income or profits. If in such a case the recipient is a resident of the country which practises deduction at the source, any double taxation he suffers is remedied by internal measures. But the position is different if he is a resident of another country: he is then liable to be taxed twice on the interest, first by the State of source and then by the State of which he is a resident. It is clear that his double charge of tax can reduce considerably the interest on the money lent and so hamper the movement of capital and the development of international investment.

(Renumbered and amended on 11 April 1977; see HISTORY)

3. A formula reserving the exclusive taxation of interest to one State, whether the State of the beneficiary's residence or the State of source, could not be sure of receiving general approval. Therefore a compromise solution was adopted. It provides that interest may be taxed in the State of residence, but leaves to the State of source the right to impose a tax if its laws so provide, it being implicit in this right that the State of source is free to give up all taxation on interest paid to non-residents. Its exercise of this right will however be limited by a ceiling which its tax cannot exceed but, it goes without saying, the Contracting States can agree to adopt an even lower rate of taxation in the State of source. The sacrifice that the latter would accept in such conditions will be matched by a relief to be given by the State of residence, in order to take into account the tax levied in the State of source

(see Article 23 A or 23 B).

(Renumbered and amended on 11 April 1977; see HISTORY)

4. Certain countries do not allow interest paid to be deducted for the purposes of the payer's tax unless the recipient also resides in the same State or is taxable in that State. Otherwise they forbid the deduction. The question whether the deduction should also be allowed in cases where the interest is paid by a resident of a Contracting State to a resident of the other State, is dealt with in paragraph 4 of Article 24.

(Amended on 23 July 1992; see HISTORY)

II. Commentary on the provisions of the Article

Paragraph 1

5. Paragraph 1 lays down the principle that interest arising in a Contracting State and paid to a resident of the other Contracting State may be taxed in the latter. In doing so, it does not stipulate an exclusive right to tax in favour of the State of residence. The term "paid" has a very wide meaning, since the concept of payment means the fulfilment of the obligation to put funds at the disposal of the creditor in the manner required by contract or by custom.

(Renumbered and amended on 11 April 1977; see HISTORY)

6. The Article deals only with interest arising in a Contracting State and paid to a resident of the other Contracting State. It does not, therefore, apply to interest arising in a third State or to interest arising in a Contracting State which is attributable to a permanent establishment which an enterprise of that State has in the other Contracting State (for these cases, see paragraphs 4 to 6 of the Commentary on Article 21).

(Replaced on 11 April 1977; see HISTORY)

Paragraph 2

7. Paragraph 2 reserves a right to tax interest to the State in which the interest arises; but it limits the exercise of that right by determining a ceiling for the tax, which may not exceed 10 per cent. This rate may be considered a reasonable maximum bearing in mind that the State of source is already entitled to tax profits or income produced on its territory by investments financed out of borrowed capital. The Contracting States may agree in bilateral negotiations upon a lower tax or on exclusive taxation in the State of the beneficiary's residence with respect to all interest payments or, as explained below, as regards some specific categories of interest.

(Amended on 15 July 2005; see HISTORY)

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

7.1 In certain cases, the approach adopted in paragraph 2, which is to allow source taxation of payments of interest, can constitute an obstacle to international trade or may be considered inappropriate for other reasons. For instance, when the beneficiary of the interest has borrowed in order to finance the operation which earns the interest, the profit realised by way of interest will be much smaller than the nominal amount of interest received; if the interest paid is equal to or exceeds the interest received, there will be either no profit at all or even a loss. The problem, in that case, cannot be solved by the State of residence, since little or no tax will be levied in that State where the beneficiary is taxed on the net profit derived from the transaction. That problem arises because the tax in the State of source is typically levied on the gross amount of the interest regardless of expenses incurred in order to earn such interest. In order to avoid that problem, creditors will, in practice, tend to shift to the debtor the burden of the tax levied by the State of source on the interest and therefore increase the rate of interest charged to the debtor, whose financial burden is then increased by an amount corresponding to the tax payable to the State of source.

(Added on 15 July 2005; see HISTORY)

7.2 The Contracting States may wish to add an additional paragraph to provide for the exclusive taxation in the State of the beneficiary's residence of certain interest. The preamble of that paragraph, which would be followed by subparagraphs describing the various interest subject to that treatment (see below), might be drafted along the following lines:

> 3. Notwithstanding the provisions of paragraph 2, interest referred to in paragraph 1 shall be taxable only in the Contracting State of which the recipient is a resident if the beneficial owner of the interest is a resident of that State, and:
>
> *a)* [*description of the relevant category of interest*] ...

(Added on 15 July 2005; see HISTORY)

7.3 The following are some of the categories of interest that Contracting States may wish to consider for the purposes of paragraph 7.2 above.

(Added on 15 July 2005; see HISTORY)

Interest paid to a State, its political subdivisions and to central banks

7.4 Some States refrain from levying tax on income derived by other States and some of their wholly-owned entities (*e.g.* a central bank established as a separate entity), at least to the extent that such income is derived from activities of a governmental nature. Some States are able to grant such an exemption under their interpretation of the sovereign immunity principle (see paragraphs 6.38 and 6.39 of the Commentary on Article 1); others may do it

pursuant to provisions of their domestic law. In their bilateral conventions, many States wish to confirm or clarify the scope of these exemptions with respect to interest or to grant such an exemption in cases where it would not otherwise be available. States wishing to do so may therefore agree to include the following category of interest in a paragraph providing for exemption of certain interest from taxation in the State of source:

a) is that State or the central bank, a political subdivision or local authority thereof;

(Amended on 22 July 2010; see HISTORY)

Interest paid by a State or its political subdivisions

7.5 Where the payer of the interest happens to be the State itself, a political subdivision or a statutory body, the end result may well be that the tax levied at source may actually be borne by that State if the lender increases the interest rate to recoup the tax levied at source. In that case, any benefits for the State taxing the interest at source will be offset by the increase of its borrowing costs. For that reason, many States provide that such interest will be exempt from any tax at source. States wishing to do so may agree to include the following category of interest in a paragraph providing for exemption of certain interest from taxation in the State of source:

b) if the interest is paid by the State in which the interest arises or by a political subdivision, a local authority or statutory body thereof;

In this suggested provision, the phrase “statutory body” refers to any public sector institution. Depending on their domestic law and terminology, some States may prefer to use phrases such as “agency or instrumentality” or “legal person of public law” [*personne morale de droit public*] to refer to such an institution.

(Added on 15 July 2005; see HISTORY)

Interest paid pursuant to export financing programmes

7.6 In order to promote international trade, many States have established export financing programmes or agencies which may either provide export loans directly or insure or guarantee export loans granted by commercial lenders. Since that type of financing is supported by public funds, a number of States provide bilaterally that interest arising from loans covered by these programmes shall be exempt from source taxation. States wishing to do so may agree to include the following category of interest in a paragraph providing for exemption of certain interest from taxation in the State of source:

c) if the interest is paid in respect of a loan, debt-claim or credit that is owed to, or made, provided, guaranteed or insured by, that State or a political subdivision, local authority or export financing agency thereof;

(Added on 15 July 2005; see HISTORY)

Interest paid to financial institutions

7.7 The problem described in paragraph 7.1, which essentially arises because taxation by the State of source is typically levied on the gross amount of the interest and therefore ignores the real amount of income derived from the transaction for which the interest is paid, is particularly important in the case of financial institutions. For instance, a bank generally finances the loan which it grants with funds lent to it and, in particular, funds accepted on deposit. Since the State of source, in determining the amount of tax payable on the interest, will usually ignore the cost of funds for the bank, the amount of tax may prevent the transaction from occurring unless the amount of that tax is borne by the debtor. For that reason, many States provide that interest paid to a financial institution such as a bank will be exempt from any tax at source. States wishing to do so may agree to include the following interest in a paragraph providing from exemption of certain interest from taxation in the State of source:

d) is a financial institution;

(Added on 15 July 2005; see HISTORY)

Interest on sales on credit

7.8 The disadvantages described in paragraph 7.1 also arise frequently in the case of sales on credit of equipment and other commercial credit sales. The supplier in such cases very often merely passes on to the customer, without any additional charge, the price he will himself have had to pay to a bank or an export finance agency to finance the credit. In these cases, the interest is more an element of the selling price than income from invested capital. In fact, in many cases, the interest incorporated in the amounts of instalments to be paid will be difficult to separate from the actual sale price. States may therefore wish to include interest arising from such sales on credit in a paragraph providing for exemption of certain interest from taxation in the State of source, which they can do by adding the following subparagraph:

e) if the interest is paid with respect to indebtedness arising as a consequence of the sale on credit of any equipment, merchandise or services;

(Renumbered and amended on 15 July 2005; see HISTORY)

7.9 The types of sales on credit referred to in this suggested provision comprise not only sales of complete units, but also sales of separate components thereof. Sales financed through a general line of credit provided by a seller to a customer constitute sales on credit as well for the purposes of the provision. Also, it is immaterial whether the interest is stipulated separately in addition to the sale price or is included from the outset in the price payable by instalments.

(Renumbered on 15 July 2005; see HISTORY)

Interest paid to some tax-exempt entities (e.g. pension funds)

7.10 Under the domestic laws of many States, pension funds and similar entities are generally exempt from tax on their investment income. In order to achieve neutrality of treatment as regards domestic and foreign investments by these entities, some States provide bilaterally that income, including interest, derived by such an entity resident of the other State shall also be exempt from source taxation. States wishing to do so may agree bilaterally on a provision drafted along the lines of the provision found in paragraph 69 of the Commentary on Article 18.

(Added on 15 July 2005; see HISTORY)

7.11 If the Contracting States do not wish to exempt completely any or all of the above categories of interest from taxation in the State of source, they may wish to apply to them a lower rate of tax than that provided for in paragraph 2 (that solution would not, however, seem very practical in the case of interest paid by a State or its political subdivision or statutory body). In that case, paragraph 2 might be drafted along the following lines:

> 2. However, such interest may also be taxed in the Contracting State in which it arises and according to the laws of that State, but if the beneficial owner of the interest is a resident of the other Contracting State, the tax so charged shall not exceed:
>
> *a)* *[lower rate of tax]* per cent of the gross amount of the interest in the case of interest paid *[description of the relevant category of interest]* ...
>
> *b)* 10 per cent of the gross amount of the interest in all other cases.
>
> The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of this limitation.

If the Contracting States agree to exempt some of the above categories of interest, this alternative provision would be followed by a paragraph 3 as suggested in paragraph 7.2 above.

(Added on 15 July 2005; see HISTORY)

7.12 Contracting States may add to the categories of interest enumerated in the paragraphs above, other categories in regard to which the imposition of a tax in the State of source might appear to them to be undesirable.

(Renumbered on 15 July 2005; see HISTORY)

8. Attention is drawn generally to the following case: the beneficial owner of interest arising in a Contracting State is a company resident in the other Contracting State; all or part of its capital is held by shareholders resident outside that other State; its practice is not to distribute its profits in the form of dividends; and it enjoys preferential taxation treatment (private investment company, base company). The question may arise whether, in the case of such a company, it is justifiable to allow in the State of source of the interest the limitation of tax which is provided in paragraph 2. It may be appropriate, when bilateral negotiations are being conducted, to agree upon special exceptions to the taxing rule laid down in this Article, in order to define the treatment applicable to such companies.

(Renumbered on 15 July 2005; see HISTORY)

8.1 *(Renumbered on 15 July 2005; see HISTORY)*

8.2 *(Renumbered on 15 July 2005; see HISTORY)*

9. The requirement of beneficial ownership was introduced in paragraph 2 of Article 11 to clarify the meaning of the words "paid to a resident" as they are used in paragraph 1 of the Article. It makes plain that the State of source is not obliged to give up taxing rights over interest income merely because that income was immediately received by a resident of a State with which the State of source had concluded a convention. The term "beneficial owner" is not used in a narrow technical sense, rather, it should be understood in its context and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance.

(Renumbered on 28 January 2003; see HISTORY)

10. Relief or exemption in respect of an item of income is granted by the State of source to a resident of the other Contracting State to avoid in whole or in part the double taxation that would otherwise arise from the concurrent taxation of that income by the State of residence. Where an item of income is received by a resident of a Contracting State acting in the capacity of agent or nominee it would be inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption merely on account of the status of the immediate recipient of the income as a resident of the other Contracting State. The immediate recipient of the income in this situation qualifies as a resident but no potential double taxation arises as a consequence of that status since the recipient is not treated as the owner of

the income for tax purposes in the State of residence. It would be equally inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption where a resident of a Contracting State, otherwise than through an agency or nominee relationship, simply acts as a conduit for another person who in fact receives the benefit of the income concerned. For these reasons, the report from the Committee on Fiscal Affairs entitled "Double Taxation Conventions and the Use of Conduit Companies"[1] concludes that a conduit company cannot normally be regarded as the beneficial owner if, though the formal owner, it has, as a practical matter, very narrow powers which render it, in relation to the income concerned, a mere fiduciary or administrator acting on account of the interested parties.

(Renumbered on 15 July 2005; see HISTORY)

11. Subject to other conditions imposed by the Article, the limitation of tax in the State of source remains available when an intermediary, such as an agent or nominee located in a Contracting State or in a third State, is interposed between the beneficiary and the payer but the beneficial owner is a resident of the other Contracting State (the text of the Model was amended in 1995 to clarify this point, which has been the consistent position of all member countries). States which wish to make this more explicit are free to do so during bilateral negotiations.

(Renumbered on 15 July 2005; see HISTORY)

12. The paragraph lays down nothing about the mode of taxation in the State of source. It therefore leaves that State free to apply its own laws and, in particular, to levy the tax either by deduction at source or by individual assessment. Procedural questions are not dealt with in this Article. Each State should be able to apply the procedure provided in its own law (see, however, paragraph 26.2 of the Commentary on Article 1). Specific questions arise with triangular cases (see paragraph 71 of the Commentary on Article 24).

(Renumbered on 15 July 2005; see HISTORY)

13. It does not specify whether or not the relief in the State of source should be conditional upon the interest being subject to tax in the State of residence. This question can be settled by bilateral negotiations.

(Renumbered on 15 July 2005; see HISTORY)

14. The Article contains no provisions as to how the State of the beneficiary's residence should make allowance for the taxation in the State of source of the interest. This question is dealt with in Articles23 A and 23 B.

(Renumbered on 15 July 2005; see HISTORY)

17. *(Renumbered and amended on 15 July 2005; see HISTORY)*

Paragraph 3

18. Paragraph 3 specifies the meaning to be attached to the term "interest" for the application of the taxation treatment defined by the Article. The term designates, in general, income from debt-claims of every kind, whether or not secured by mortgage and whether or not carrying a right to participate in profits. The term "debt-claims of every kind" obviously embraces cash deposits and security in the form of money, as well as government securities, and bonds and debentures, although the three latter are specially mentioned because of their importance and of certain peculiarities that they may present. It is recognised, on the one hand, that mortgage interest comes within the category of income from movable capital (*revenus de capitaux mobiliers*), even though certain countries assimilate it to income from immovable property. On the other hand, debt-claims, and bonds and debentures in particular, which carry a right to participate in the debtor's profits are nonetheless regarded as loans if the contract by its general character clearly evidences a loan at interest.

(Amended on 23 July 1992; see HISTORY)

19. Interest on participating bonds should not normally be considered as a dividend, and neither should interest on convertible bonds until such time as the bonds are actually converted into shares. However, the interest on such bonds should be considered as a dividend if the loan effectively shares the risks run by the debtor company (see *inter alia* paragraph 25 of the Commentary on Article 10). In situations of presumed thin capitalisation, it is sometimes difficult to distinguish between dividends and interest and in order to avoid any possibility of overlap between the categories of income dealt with in Article 10 and Article 11 respectively, it should be noted that the term "interest" as used in Article 11 does not include items of income which are dealt with under Article 10.

(Replaced on 23 July 1992; see HISTORY)

20. As regards, more particularly, government securities, and bonds and debentures, the text specifies that premiums or prizes attaching thereto constitute interest. Generally speaking, what constitutes interest yielded by a loan security, and may properly be taxed as such in the State of source, is all that the institution issuing the loan pays over and above the amount paid by the subscriber, that is to say, the interest accruing plus any premium paid at redemption or at issue. It follows that when a bond or debenture has been

issued at a premium, the excess of the amount paid by the subscriber over that repaid to him may constitute negative interest which should be deducted from the interest that is taxable. On the other hand, any profit or loss which a holder of such a security realises by the sale thereof to another person does not enter into the concept of interest. Such profit or loss may, depending on the case, constitute either a business profit or a loss, a capital gain or a loss, or income falling under Article 21.

(Replaced on 23 July 1992; see HISTORY)

21. Moreover, the definition of interest in the first sentence of paragraph 3 is, in principle, exhaustive. It has seemed preferable not to include a subsidiary reference to domestic laws in the text; this is justified by the following considerations:

- *a)* the definition covers practically all the kinds of income which are regarded as interest in the various domestic laws;
- *b)* the formula employed offers greater security from the legal point of view and ensures that conventions would be unaffected by future changes in any country's domestic laws;
- *c)* in the Model Convention references to domestic laws should as far as possible be avoided.

It nevertheless remains understood that in a bilateral convention two Contracting States may widen the formula employed so as to include in it any income which is taxed as interest under either of their domestic laws but which is not covered by the definition and in these circumstances may find it preferable to make reference to their domestic laws.

(Renumbered on 23 July 1992; see HISTORY)

21.1 The definition of interest in the first sentence of paragraph 3 does not normally apply to payments made under certain kinds of nontraditional financial instruments where there is no underlying debt (for example, interest rate swaps). However, the definition will apply to the extent that a loan is considered to exist under a "substance over form" rule, an "abuse of rights" principle, or any similar doctrine.

(Added on 21 September 1995; see HISTORY)

22. The second sentence of paragraph 3 excludes from the definition of interest penalty charges for late payment but Contracting States are free to omit this sentence and treat penalty charges as interest in their bilateral conventions. Penalty charges, which may be payable under the contract, or by customs or by virtue of a judgement, consist either of payments calculated *pro rata temporis* or else of fixed sums; in certain cases they may combine both forms of payment. Even if they are determined *pro rata temporis* they constitute

not so much income from capital as a special form of compensation for the loss suffered by the creditor through the debtor's delay in meeting his obligations. Moreover, considerations of legal security and practical convenience make it advisable to place all penalty charges of this kind, in whatever form they be paid, on the same footing for the purposes of their taxation treatment. On the other hand, two Contracting States may exclude from the application of Article 11 any kinds of interest which they intend to be treated as dividends.

(Renumbered on 23 July 1992; see HISTORY)

23. Finally, the question arises whether annuities ought to be assimilated to interest; it is considered that they ought not to be. On the one hand, annuities granted in consideration of past employment are referred to in Article 18 and are subject to the rules governing pensions. On the other hand, although it is true that instalments of purchased annuities include an interest element on the purchase capital as well as return of capital, such instalments thus constituting "*fruits civils*" which accrue from day to day, it would be difficult for many countries to make a distinction between the element representing income from capital and the element representing a return of capital in order merely to tax the income element under the same category as income from movable capital. Taxation laws often contain special provisions classifying annuities in the category of salaries, wages and pensions, and taxing them accordingly.

(Renumbered on 23 July 1992; see HISTORY)

Paragraph 4

24. Certain States consider that dividends, interest and royalties arising from sources in their territory and payable to individuals or legal persons who are residents of other States fall outside the scope of the arrangement made to prevent them from being taxed both in the State of source and in the State of the beneficiary's residence when the beneficiary has a permanent establishment in the former State. paragraph 4 is not based on such a conception which is sometimes referred to as "the force of attraction of the permanent establishment". It does not stipulate that interest arising to a resident of a Contracting State from a source situated in the other State must, by a kind of legal presumption, or fiction even, be related to a permanent establishment which that resident may have in the latter State, so that the said State would not be obliged to limit its taxation in such a case. The paragraph merely provides that in the State of source the interest is taxable as part of the profits of the permanent establishment there owned by the beneficiary which is a resident in the other State, if it is paid in respect of debt-claims forming part of the assets of the permanent establishment or

otherwise effectively connected with that establishment. In that case, paragraph 4 relieves the State of source of the interest from any limitation under the Article. The foregoing explanations accord with those in the Commentary on Article 7.

(Renumbered on 23 July 1992; see HISTORY)

25. It has been suggested that the paragraph could give rise to abuses through the transfer of loans to permanent establishments set up solely for that purpose in countries that offer preferential treatment to interest income. Apart from the fact that such abusive transactions might trigger the application of domestic anti-abuse rules, it must be recognised that a particular location can only constitute a permanent establishment if a business is carried on therein and, as explained below, that the requirement that a debt-claim be "effectively connected" to such a location requires more than merely recording the debt-claim in the books of the permanent establishment for accounting purposes.

(Amended on 22 July 2010; see HISTORY)

25.1 A debt-claim in respect of which interest is paid will be effectively connected with a permanent establishment, and will therefore form part of its business assets, if the "economic" ownership of the debt-claim is allocated to that permanent establishment under the principles developed in the Committee's report entitled *Attribution of Profits to Permanent Establishments*[1] (see in particular paragraphs 72-97 of Part I of the report) for the purposes of the application of paragraph 2 of Article 7. In the context of that paragraph, the "economic" ownership of a debt-claim means the equivalent of ownership for income tax purposes by a separate enterprise, with the attendant benefits and burdens (*e.g.* the right to the interest attributable to the ownership of the debt-claim and the potential exposure to gains or losses from the appreciation or depreciation of the debt-claim).

(Added on 22 July 2010; see HISTORY)

25.2 In the case of the permanent establishment of an enterprise carrying on insurance activities, the determination of whether a debt-claim is effectively connected with the permanent establishment shall be made by giving due regard to the guidance set forth in Part IV of the Committee's report with respect to whether the income on or gain from that debt-claim is taken into account in determining the permanent establishment's yield on the amount of investment assets attributed to it (see in particular paragraphs 165-170 of Part IV). That guidance being general in nature, tax authorities should consider applying a flexible and pragmatic approach which would take into

1 *Attribution of Profits to Permanent Establishments*, OECD, Paris, 2010

account an enterprise's reasonable and consistent application of that guidance for purposes of identifying the specific assets that are effectively connected with the permanent establishment.

(Added on 22 July 2010; see HISTORY)

Paragraph 5

26. This paragraph lays down the principle that the State of source of the interest is the State of which the payer of the interest is a resident. It provides, however, for an exception to this rule in the case of interest-bearing loans which have an obvious economic link with a permanent establishment owned in the other Contracting State by the payer of the interest. If the loan was contracted for the requirements of that establishment and the interest is borne by the latter, the paragraph determines that the source of the interest is in the Contracting State in which the permanent establishment is situated, leaving aside the place of residence of the owner of the permanent establishment, even when he resides in a third State.

(Amended on 21 September 1995; see HISTORY)

27. In the absence of an economic link between the loan on which the interest arises and the permanent establishment, the State where the latter is situated cannot on that account be regarded as the State where the interest arises; it is not entitled to tax such interest, not even within the limits of a "taxable quota" proportional to the importance of the permanent establishment. Such a practice would be incompatible with paragraph 5. Moreover, any departure from the rule fixed in the first sentence of paragraph 5 is justified only where the economic link between the loan and the permanent establishment is sufficiently clear-cut. In this connection, a number of possible cases may be distinguished:

- *a)* The management of the permanent establishment has contracted a loan which it uses for the specific requirements of the permanent establishment; it shows it among its liabilities and pays the interest thereon directly to the creditor.
- *b)* The head office of the enterprise has contracted a loan the proceeds of which are used solely for the purposes of a permanent establishment situated in another country. The interest is serviced by the head office but is ultimately borne by the permanent establishment.
- *c)* The loan is contracted by the head office of the enterprise and its proceeds are used for several permanent establishments situated in different countries.

In cases *a)* and *b)* the conditions laid down in the second sentence of paragraph 5 are fulfilled, and the State where the permanent establishment is

situated is to be regarded as the State where the interest arises. Case *c*), however, falls outside the provisions of paragraph 5, the text of which precludes the attribution of more than one source to the same loan. Such a solution, moreover, would give rise to considerable administrative complications and make it impossible for lenders to calculate in advance the taxation that interest would attract. It is, however, open to two Contracting States to restrict the application of the final provision in paragraph 5 to case *a*) or to extend it to case *c*).

(Renumbered on 23 July 1992; see HISTORY)

28. Paragraph 5 provides no solution for the case, which it excludes from its provisions, where both the beneficiary and the payer are indeed residents of the Contracting States, but the loan was borrowed for the requirements of a permanent establishment owned by the payer in a third State and the interest is borne by that establishment. As paragraph 5 now stands, therefore, only its first sentence will apply in such a case. The interest will be deemed to arise in the Contracting State of which the payer is a resident and not in the third State in whose territory is situated the permanent establishment for the account of which the loan was effected and by which the interest is payable. Thus the interest will be taxed both in the Contracting State of which the payer is a resident and in the Contracting State of which the beneficiary is a resident. But, although double taxation will be avoided between these two States by the arrangements provided in the Article, it will not be avoided between them and the third State if the latter taxes the interest on the loan at the source when it is borne by the permanent establishment in its territory.

(Renumbered on 23 July 1992; see HISTORY)

29. It has been decided not to deal with that case in the Convention. The Contracting State of the payer's residence does not, therefore, have to relinquish its tax at the source in favour of the third State in which is situated the permanent establishment for the account of which the loan was effected and by which the interest is borne. If this were not the case and the third State did not subject the interest borne by the permanent establishment to source taxation, there could be attempts to avoid source taxation in the Contracting State through the use of a permanent establishment situated in such a third State. States for which this is not a concern and that wish to address the issue described in the paragraph above may do so by agreeing to use, in their bilateral convention, the alternative formulation of paragraph 5 suggested in paragraph 30 below. The risk of double taxation just referred to could also be avoided through a multilateral convention. Also, if in the case described in paragraph 28, the State of the payer's residence and the third State in which is situated the permanent establishment for the account of which the loan is effected and by which the interest is borne, together claim the right to tax the

interest at the source, there would be nothing to prevent those two States together with, where appropriate, the State of the beneficiary's residence, from concerting measures to avoid the double taxation that would result from such claims using, where necessary, the mutual agreement procedure (as envisaged in paragraph 3 of Article 25).

(Amended on 15 July 2005; see HISTORY)

30. As mentioned in paragraph 29, any such double taxation could be avoided either through a multilateral convention or if the State of the beneficiary's residence and the State of the payer's residence agreed to word the second sentence of paragraph 5 in the following way, which would have the effect of ensuring that paragraphs 1 and 2 of the Article did not apply to the interest, which would then typically fall under Article 7 or 21:

> Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a State other than that of which he is a resident a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment, then such interest shall be deemed to arise in the State in which the permanent establishment is situated.

(Amended on 15 July 2005; see HISTORY)

31. If two Contracting States agree in bilateral negotiations to reserve to the State where the beneficiary of the income resides the exclusive right to tax such income, then ipso facto there is no value in inserting in the convention which fixes their relations that provision in paragraph 5 which defines the State of source of such income. But it is equally obvious that double taxation would not be fully avoided in such a case if the payer of the interest owned, in a third State which charged its tax at the source on the interest, a permanent establishment for the account of which the loan had been borrowed and which bore the interest payable on it. The case would then be just the same as is contemplated in paragraphs 28 to 30 above.

(Renumbered and amended on 23 July 1992; see HISTORY)

Paragraph 6

32. The purpose of this paragraph is to restrict the operation of the provisions concerning the taxation of interest in cases where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the interest paid exceeds the amount which would have been agreed upon by the payer and the beneficial owner had they stipulated at arm's length. It provides that in such a case the provisions of the Article apply only to that last-mentioned amount

and that the excess part of the interest shall remain taxable according to the laws of the two Contracting States, due regard being had to the other provisions of the Convention.

(Renumbered on 23 July 1992; see HISTORY)

33. It is clear from the text that for this clause to apply the interest held excessive must be due to a special relationship between the payer and the beneficial owner or between both of them and some other person. There may be cited as examples cases where interest is paid to an individual or legal person who directly or indirectly controls the payer, or who is directly or indirectly controlled by him or is subordinate to a group having common interest with him. These examples, moreover, are similar or analogous to the cases contemplated by Article 9.

(Renumbered and amended on 23 July 1992; see HISTORY)

34. On the other hand, the concept of special relationship also covers relationship by blood or marriage and, in general, any community of interests as distinct from the legal relationship giving rise to the payment of the interest.

(Renumbered on 23 July 1992; see HISTORY)

35. With regard to the taxation treatment to be applied to the excess part of the interest, the exact nature of such excess will need to be ascertained according to the circumstances of each case, in order to determine the category of income in which it should be classified for the purposes of applying the provisions of the tax laws of the States concerned and the provisions of the Convention. This paragraph permits only the adjustment of the rate at which interest is charged and not the reclassification of the loan in such a way as to give it the character of a contribution to equity capital. For such an adjustment to be possible under paragraph 6 of Article 11 it would be necessary as a minimum to remove the limiting phrase "having regard to the debt-claim for which it is paid". If greater clarity of intent is felt appropriate, a phrase such as "for whatever reason" might be added after "exceeds". Either of these alternative versions would apply where some or all of an interest payment is excessive because the amount of the loan or the terms relating to it (including the rate of interest) are not what would have been agreed upon in the absence of the special relationship. Nevertheless, this paragraph can affect not only the recipient but also the payer of excessive interest and if the law of the State of source permits, the excess amount can be disallowed as a deduction, due regard being had to other applicable provisions of the Convention. If two Contracting States should have difficulty in determining the other provisions of the Convention applicable, as cases require, to the excess part of the interest, there would be nothing to prevent

them from introducing additional clarifications in the last sentence of paragraph 6, as long as they do not alter its general purport.

(Amended on 28 January 2003; see HISTORY)

36. Should the principles and rules of their respective laws oblige the two Contracting States to apply different Articles of the Convention for the purpose of taxing the excess, it will be necessary to resort to the mutual agreement procedure provided by the Convention in order to resolve the difficulty.

(Renumbered on 23 July 1992; see HISTORY)

Observation on the Commentary

37. *Canada* and the *United Kingdom* do not adhere to paragraph 18 above. Under their domestic legislation, certain interest payments are treated as distributions, and are therefore dealt with under Article 10.

(Renumbered and amended on 23 July 1992; see HISTORY)

Reservations on the Article

Paragraph 2

38. *Chile*, *Hungary*, *Mexico*, *Portugal*, the *Slovak Republic* and *Turkey* reserve their positions on the rate provided in paragraph 2.

(Amended on 22 July 2010; see HISTORY)

39. *(Deleted on 28 January 2003; see HISTORY)*

40. The *United States* reserves the right to tax certain forms of contingent interest at the rate applicable to portfolio dividends under subparagraph *b)* of paragraph 2 of Article 11. It also reserves the right to tax under its law a form of interest that is “an excess inclusion with respect to residual interest in a real estate mortgage investment conduit”.

(Added on 29 April 2000; see HISTORY)

Paragraph 3

41. *Mexico* reserves the right to consider as interest other types of income, such as income derived from financial leasing and factoring contracts.

(Amended on 28 January 2003; see HISTORY)

42. *Belgium*, *Canada* and *Ireland* reserve the right to amend the definition of interest so as to secure that interest payments treated as distributions under their domestic law fall within Article 10.

(Added on 23 July 1992; see HISTORY)

43. *Canada*, *Chile* and *Norway* reserve the right to delete the reference to debt-claims carrying the right to participate in the debtor's profits.

(Amended on 22 July 2010; see HISTORY)

44. *Greece*, *Portugal* and *Spain* reserve the right to widen the definition of interest by including a reference to their domestic law in line with the definition contained in the 1963 Draft Convention.

(Amended on 21 September 1995; see HISTORY)

45. *(Deleted on 22 July 2010; see HISTORY)*

Paragraph 6

46. *Mexico* reserves the right to include a provision regarding the treatment of interest derived from back-to-back loans, as a safeguard against abuse.

(Added on 15 July 2005; see HISTORY)

HISTORY

Paragraph 1: Corresponds in part to paragraphs 1 and 2 of the 1963 Draft Convention. Paragraphs 1 and 2, as they read in the 1963 Draft Convention were amended and combined when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the headings immediately preceding paragraphs 1 and 2 were deleted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraphs 1 and 2 and the preceding headings read as follows:

"A. Definition of Interest for the Purposes of this Report

1. "Interest" is generally taken to mean remuneration on money lent, being remuneration coming within the category of "income from movable capital" (revenus de capitaux mobiliers). Such remuneration includes, in particular, interest on and all other income — to which certain taxation laws assimilate prizes and redemption premiums — from:

- — bonds or debentures, whether or not secured on immovable property and whether or not carrying a right to participate in profits, which are negotiable securities just as company shares are, being issued in representation of collective loans, offered to the public in equal fractions and ordinarily redeemable at long term or by drawing lots, and quoted on a Stock Exchange or capable of being so quoted;
- — government securities;
- — indebtedness or debt claims of every kind (whether secured by mortgage, preferential or unsecured);
- — notes of indebtedness, deposits, security lodged in money and other rights which can be assimilated to debt claims or loans.

"B. International Double Taxation of Interest

2. Unlike dividends, interest does not suffer economic double taxation, that is, it is not taxed both in the hands of the debtor and in the hands of the creditor. Unless it is provided to the contrary by the contract, payment of the tax charged on interest falls on the recipient. If it happens that the debtor undertakes to bear any

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

tax chargeable at the source, this is as though he had agreed to pay his creditor additional interest corresponding to such tax. Subject to the remarks made later (paragraph 17), the debtor may nevertheless show the interest paid and any tax so borne in his enterprise's general expense."

Paragraph 2: Corresponds to paragraph 3 of the 1963 Draft Convention. Paragraph 2 of the 1963 Draft Convention was amended and incorporated into paragraph 1 (see history of paragraph 1) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 3 of the 1963 Draft Convention was amended and renumbered as paragraph 2 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. But, like dividends, interest on bonds or debentures or loans usually attracts tax charged by deduction at the source when the interest is paid. This method is, in fact, commonly used for practical reasons, as the tax charged at the source can constitute an advance of the tax payable by the recipient in respect of his total income or profits. If in such a case the recipient is a resident of the country which practices deduction at the source, any double taxation he suffers is remedied by internal measures. But the position is different if he is a resident of another country: he is then liable to be taxed twice on the interest, first by the State of source and then by the State in which he resides. It is clear that his double charge of tax can reduce considerably the interest on the money lent and so hamper the movement of capital and the development of international investment."

Paragraph 3: Corresponds in part to paragraphs 14 and 15 of the 1963 Draft Convention. Paragraph 3 of the 1963 Draft Convention was amended and renumbered as paragraph 2 (see history of paragraph 2) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraphs 14 and 15 of the 1963 Draft Convention were amended and incorporated into paragraph 3 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraphs 14 and 15 read as follows:

"14. The discussions further showed that a formula reserving the exclusive taxation of interest to one State, whether the State of the recipient's residence or the State of source, could not be sure of receiving general approval. Some countries stated that their preference was for taxation in the State of residence, others for taxation in the State of source. A number of countries which practise taxation at the source considered that they would be able to give up the right to tax at the source if certain conditions were concurrently present; but they at once made it clear that they could not be bound by a text which left them no discretion in this respect.

15. The Fiscal Committee therefore has been obliged to turn towards a compromise solution, first laying down the principle that interest shall be taxed in the State of residence — particularly as this is the practice in the generality of the Member states — but leaving the State of source the right to impose a tax if its laws so provide, it being implicit in this right that the State of source is free to give up all taxation on interest paid to non-residents. Its exercise of this right will however be limited by a ceiling which its tax cannot exceed but, it goes without saying, the Contracting States can agree to adopt an even lower rate of taxation in the State of source. The sacrifice that the latter would accept in such conditions will be matched by a similar sacrifice for the State of residence, since it will have to take into account the tax levied in the State of source in order to prevent the double taxation that the interest would suffer if the State of residence imposed on itself no restriction in the exercise of its right (on this subject see Articles 23(A) and 23(B) on

methods of avoiding double taxation in the State of residence of the recipient of the income).”

Paragraph 4: Amended on 23 July 1992, by replacing the reference to paragraph 5 of Article 24 by a reference to paragraph 4 of that Article, by the Report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 4 read as follows:

“4. Certain countries do not allow interest paid to be deducted for the purposes of the payer’s tax unless the recipient also resides in the same State or is taxable in that State. Otherwise they forbid the deduction. The question whether the deduction should also be allowed in cases where the interest is paid by a resident of a Contracting State to a resident of the other State, is dealt with in paragraph 5 of Article 24.”

Paragraph 4 of the 1977 Model Convention corresponded to paragraph 17 of the 1963 Draft Convention. Paragraph 4 of the 1963 Draft Convention was deleted and paragraph 17 was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 17 read as follows:

“17. Certain countries do not allow interest paid to be deducted for the purposes of the payer’s tax unless the recipient also resides in the same State or is taxable in that State. Otherwise they forbid the deduction. The Fiscal Committee considers it desirable that the deduction in question should also be allowed in cases where the interest is paid by a resident of a Contracting State to a resident of the other State, the case of fraud being, of course, reserved; it considers that the deduction should not be forbidden simply because the tax payable by the recipient of such interest is reduced in the State of source in application of the proposed Article. Any other method of procedure might cancel out the beneficial effects of the measures taken to avoid double taxation.”

Paragraph 4 of the 1963 Draft Convention and the preceding heading (adopted by the OECD Council on 30 July 1963), before they were deleted when the 1977 Model Convention was adopted, read as follows:

“C. How Can Double Taxation of Interest be Avoided?

4. There is no point in re-opening doctrinal arguments on the respective merits of taxing interest in the State of source or in the State of the recipient’s residence, according to whether the tax is impersonal or personal; or in considering whether the theoretically ideal solution would not be for the right to tax to be the privilege of the State of the creditor’s residence, on the principle that movable property is intimately associated with the person of its owner and that tax on the income that is produces should properly be borne by the owner. Very detailed studies were made on this subject in the League of Nations. These resulted in the elaboration of different, not to say conflicting, proposals as to the taxation of interest.”

Paragraph 5: Corresponds to paragraph 18 of the 1963 Draft Convention. Paragraph 5 of the 1963 Draft Convention was deleted and paragraph 18 was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the headings preceding paragraph 18 were amended and moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 18 and the preceding headings read as follows:

“II. COMMENTARY ON THE ARTICLE

Paragraph 1

18. This paragraph lays down the principle that interest arising in a Contracting State and paid to a resident of the other Contracting State may be taxed in the latter. In doing so, it does not stipulate an exclusive right to tax in favour of the State of residence, but simply repeats the rule deriving from the generality of tax laws which include the right to tax income of this kind in the State of the recipient's residence."

Paragraph 5 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), before it was deleted when the 1977 Model Convention was adopted, read as follows:

"5. The fact is that countries which export capital and countries in which it is invested have apparently opposed interests. The former are naturally inclined to advocate that income from exported capital should be taxed in the State of the recipient's residence, and the latter in the State of source of the income."

Paragraph 6: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 6 read as follows:

"6. Although the State in which the capital is invested may be entitled to tax income paid as interest on capital coming from another State, on the ground that the income results from the use of such capital and has its source in its territory, it would be exorbitant for it to claim that it alone had the right to tax it. The State exporting the capital can no less justifiably maintain that if the payment of the interest on the capital is made possible by the use of the capital, it is also, and primarily, due to the very existence of the capital, so that it too is justified in calling upon the owners of the capital — the recipients of the interest — to participate in the public expenses, by reason of their possession of such income."

Paragraph 7: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 7 read as follows:

"7. Paragraph 2 reserves a right to tax interest to the State in which the interest arises; but it limits the exercise of that right by determining a ceiling for the tax, which may not exceed 10 per cent. This rate may be considered a reasonable maximum bearing in mind that the State of source is already entitled to tax profits or income produced on its territory by investments financed out of borrowed capital. The Contracting States may agree in bilateral negotiations upon a lower tax or even on exclusive taxation in the State of the beneficiary's residence."

Paragraph 7 of the 1977 Model Convention corresponded to 19 of the 1963 Draft Convention. Paragraph 7 of the 1963 Draft Convention was deleted, paragraph 19 was amended and renumbered and the preceding heading moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 19 read as follows:

"19. Paragraph 2 reserves a right to tax interest to the State in which the interest arises; but it limits the exercise of that right by determining a ceiling for the tax, which may not exceed 10 per cent. This rate may be considered a reasonable maximum if it is remembered that the State of source is already entitled to tax profits or income produced on its territory by investments financed out of borrowed capital. The two Contracting States may agree through bilateral negotiations upon a lower tax or even on exclusive taxation in the State of the recipient's residence (see on this point the reservation entered by Italy which is recorded in Section III)."

Paragraph 7 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), before it was deleted when the 1977 Model Convention was adopted, read as follows:

"7. Thus it is clear that both solutions — that which would give an exclusive right to tax to the country of source of the interest and that which would reserve it to the country of the creditor's residence — are too rigid."

Paragraph 7.1: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7.2: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7.3: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7.4: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 15 July 2005 and until 22 July 2010, paragraph 7.4 read as follows:

"7.4 Some States refrain from levying tax on income derived by other States, at least to the extent that such income is derived from activities of a governmental nature. In their bilateral conventions, many States wish to confirm or clarify the scope of that exemption with respect to interest. States wishing to do so may therefore agree to include the following category of interest in a paragraph providing for exemption of certain interest from taxation in the State of source:

"*a)* is that State or the central bank, a political subdivision or local authority thereof;""

Paragraph 7.4 was added together with the heading preceding it on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7.5: Added together with the heading preceding it on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7.6: Added together with the heading preceding it on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7.7: Added together with the heading preceding it on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7.8: Corresponds to paragraph 14 of the 1977 Model Convention as it read before 15 July 2005. On 15 July 2005, paragraph 14 was amended and renumbered as paragraph 7.8 and the heading preceding it was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 14 read as follows:

"14. The disadvantages just mentioned arise in business, particularly with the sale on credit of equipment, other commercial credit sales, and loans granted by banks. The supplier in such cases very often merely passes on to the customer, without any additional charge, the price he will himself have had to pay to a bank or an export finance agency to finance the credit; similarly, the banker generally finances the loan which he grants with funds lent to his bank and, in particular, funds accepted by him on deposit. In the case especially of the person selling equipment on credit, the interest is more an element of the selling price than income from invested capital."

Paragraph 14 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 14 of the 1963 Draft Convention was amended and incorporated into paragraph 3 (see history of paragraph 3) and a new paragraph 14 was added.

Paragraph 7.9: Corresponds to paragraph 16 of the 1977 Model Convention as it read before 15 July 2005. On 15 July 2005 paragraph 16 of the 1977 Model Convention was amended and renumbered as paragraph 7.9 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 16 read as follows:

> "16. As regards, more particularly, the types of credit sale referred to in subparagraph *a)* of the text suggested above, they comprise not only sales of complete units, but also sales of separate components thereof. Furthermore, as regards credit sales of the types referred to in subparagraphs *a)* and *b)* of the suggested text, it is immaterial whether the interest is stipulated separately and as additional to the sale price, or is included from the outset in the price payable by instalments."

Paragraph 16 of the 1977 Model Convention replaced paragraph 16 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 16 read as follows:

> "16. Views were divided on the determination of the ceiling of the tax levied in the State of source. A very large majority, however, was found for a rate of 10 per cent. The reservations entered by some Member countries are indicated in Section III of this commentary."

Paragraph 7.10: Added together with the heading preceding it on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7.11: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 7.12: Corresponds to paragraph 17 of the 1977 Model Convention as it read before 15 July 2005. On 15 July 2005 paragraph 17 of the 1977 Model was amended and renumbered as paragraph 7.12 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 17 read as follows:

> "17. Contracting States may add to the categories of interest enumerated in the text suggested in paragraph 15 above, other categories in regard to which the imposition of a tax in the State of source might appear to them to be undesirable. They may also agree that the exclusion of a right to tax in the State of source shall be limited to certain of the categories of interest mentioned."

Paragraph 17 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 17 of the 1963 Draft Convention was amended and renumbered as paragraph 4 (see history of paragraph 4) and a new paragraph 17 was added. At the same time the heading preceding paragraph 17 of the 1963 Draft Convention was deleted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the heading preceding paragraph 17 read as follows:

> "F. Deductibility of Interest for the Purposes of the Payer's Tax"

Paragraph 8: Corresponds to paragraph 12 of the 1977 Model Convention as it read before 15 July 2005. On 15 July 2005 paragraph 8 was renumbered as paragraph 9 (see history of paragraph 9) and paragraph 12 was renumbered as paragraph 8 by the

report entitled “The 2005 Update to the Model Tax Convention”, adopted by the OECD Council on 15 July 2005.

Paragraph 12 of the 1977 Model Convention corresponded to paragraph 23 of the 1963 Draft Convention. Paragraph 12 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 23 of the 1963 Draft Convention was amended and renumbered as paragraph 12. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 23 read as follows:

> “23. Attention is drawn generally to the following case: the recipient of interest arising in a Contracting State is a company resident in the other Contracting State; all or part of its capital is held by shareholders resident outside that other State; its practice is not to distribute its profits in the form of dividends; and it enjoys preferential taxation treatment (“private investment company”, “base company”). The question may arise whether, in the case of such a company, it is justifiable to allow in the State of source the restriction of tax which is provided in paragraph 2 of the Article. It may be appropriate, when bilateral negotiations are being conducted, to agree upon special exceptions to the taxing rule laid down in this Article, in order to define the treatment applicable to such companies.”

Paragraph 12 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, read as follows:

> “12. Finally, special treatment is applied to income from indebtedness secured by mortgage of immovable property, the taxation of which is often reserved to the State of the mortgaged property’s situs (Netherlands-United Kingdom, 1948, Art. 8; Netherlands-Switzerland, 1951, Art. 3).”

Paragraph 8.1: Paragraph 8.1 as it read before 15 July 2005 was renumbered as paragraph 10 (see history of paragraph 10) by the report entitled “The 2005 Update to the Model Tax Convention”, adopted by the OECD Council on 15 July 2005.

Paragraph 8.2: Paragraph 8.2 as it read before 15 July 2005 was renumbered as paragraph 11 (see history of paragraph 11) by the report entitled “The 2005 Update to the Model Tax Convention”, adopted by the OECD Council on 15 July 2005.

Paragraph 9: Corresponds to paragraph 8 as it read before 15 July 2005. On 15 July 2005 paragraph 9 was renumbered as paragraph 12 (see history of paragraph 12) and paragraph 8 was renumbered as paragraph 9 by the report entitled “The 2005 Update to the Model Tax Convention”, adopted by the OECD Council on 15 July 2005.

Paragraph 8 as it read after 28 January 2003 replaced a previous paragraph 8. On 28 January 2003 paragraph 8 was amended and renumbered as paragraph 8.2 (see history of paragraph 11) and a new paragraph 8 was added by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Committee on Fiscal Affairs on 28 January 2003, on the basis of another report entitled “Restricting the Entitlement to Treaty Benefits” (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 10: Corresponds to paragraph 8.1 as it read before 15 July 2005. On 15 July 2005 paragraph 10 was renumbered as paragraph 13 (see history of paragraph 13) and paragraph 8.1 was renumbered as paragraph 10 by the report entitled “The 2005 Update to the Model Tax Convention”, adopted by the OECD Council on 15 July 2005.

Paragraph 8.1 was added on 28 January 2003 by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Committee on Fiscal Affairs on 28 January 2003, on the basis of another report entitled “Restricting the Entitlement to

Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 11: Corresponds to paragraph 8.2 as it read before 15 July 2005. On 15 July 2005 paragraph 11 was renumbered as paragraph 14 (see history of paragraph 14) and paragraph 8.2 was renumbered as paragraph 11 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 8.2 as it read after 28 January 2003 corresponded to paragraph 8. On 28 January 2003 paragraph 8 was amended and renumbered as paragraph 8.2 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 21 September 1995 and until 28 January 2003, paragraph 8 read as follows:

> "8. Under paragraph 2, the limitation of tax in the State of source is not available when an intermediary, such as an agent or nominee, is interposed between the beneficiary and the payer, unless the beneficial owner is a resident of the other Contracting State. (The text of the Model was amended in 1995 to clarify this point, which has been the consistent position of all Member countries.) States which wish to make this more explicit are free to do so during bilateral negotiations."

C (11)

Paragraph 8 was amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995. In the 1977 Model Convention and until 21 September 1995, paragraph 8 read as follows:

> "8. Under paragraph 2, the limitation of tax in the State of source is not available when an intermediary, such as an agent or nominee, is interposed between the beneficiary and the payer, unless the beneficial owner is a resident of the other Contracting State. States which wish to make this more explicit are free to do so during bilateral negotiations."

Paragraph 8 of the 1977 Model Convention replaced paragraph 8 and the preceding heading of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 8 and the preceding heading read as follows:

> "D. Solutions Adopted in the Bilateral Conventions Already Concluded for the Purpose of Avoiding Double Taxation
>
> 8. In the Conventions concluded between them the O.E.C.D. Member countries have adopted various methods for avoiding double taxation of interest."

Paragraph 12: Corresponds to paragraph 9 as it read before 15 July 2005. On 15 July 2005 paragraph 12 was renumbered as paragraph 8 (see history of paragraph 8) and paragraph 9 was renumbered as paragraph 12 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 9 was amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 9 read as follows:

> "9. The paragraph lays down nothing about the mode of taxation in the State of source. It therefore leaves that State free to apply its own laws and, in particular, to levy the tax either by deduction at source or by individual assessment. Procedural questions are not dealt with in this Article. Each State should be able to apply the

procedure provided in its own law. Specific questions arise with triangular cases (see paragraph 53 of the Commentary on Article 24)."

Paragraph 9 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on , on the basis of paragraph 60 of another report entitled "Triangular Cases" (adopted by the OECD Council on 23 July 1992). In the 1977 Model Convention and until 23 July 1992, paragraph 9 read as follows:

"9. The paragraph lays down nothing about the mode of taxation in the State of source. It therefore leaves that State free to apply its own laws and, in particular, to levy the tax either by deduction at source or by individual assessment."

Paragraph 9 of the 1977 Model Convention corresponded to paragraph 20 of the 1963 Draft Convention. Paragraph 9 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 20 of the 1963 Draft Convention was amended and renumbered as paragraph 9. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 20 read as follows:

"20. Paragraph 2 of the Article lays down nothing about the mode of taxation in the State of source. It therefore leaves that State free to apply its own law and, in particular, to levy the tax either by deduction at source or by individual assessment."

Paragraph 9 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), until it was deleted when the 1977 Model Convention was adopted, read as follows:

"9. Sometimes taxation is reserved exclusively to the State of source (see Convention concluded in 1957, between Italy and the Netherlands, Art. 8), or to the State of the recipient's residence (see Denmark-Netherlands 1957, Art. 10; France-Norway, 1953, Art. 9; Denmark-France, 1957, Arts. 8 and 9; France-Netherlands, 1949, and Additional Agreement of 1952, Arts. 8 and 9; France-Sweden, 1936, and Additional Agreement of 1950, Arts. 8 and 9; Netherlands-Sweden, 1952, Art. 10)."

Paragraph 13: Corresponds to paragraph 10 as it read before 15 July 2005. On 15 July 2005 paragraph 10 of the 1977 Model Convention was renumbered and replaced paragraph 13 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 10 of the 1977 Model Convention corresponded to paragraph 21 of the 1963 Draft Convention. Paragraph 10 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 21 of the 1963 Draft Convention was amended and renumbered as paragraph 10. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 21 read as follows:

"21. It does not specify whether the relief in the State of source should be conditional upon the interest being subject to tax in the State of residence. It has already been stated that taxation in the State of residence is the general rule. There is, however, nothing to prevent the formula proposed in paragraph 2 from being supplemented in this respect by means of bilateral negotiations."

Paragraph 10 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) until it was deleted when the 1977 Model Convention was adopted, read as follows:

"10. Sometimes taxation is shared between the State of the recipient's residence and the State of source (see Denmark-Switzerland, 1957, Arts. 2 and 9; Norway-

Switzerland, 1956, Arts. 2 and 9; France-Switzerland 1953, Art. 10; United States-France, 1956, Art. 6 A (new) of the Convention of 1939, and Art. 14; France-Germany, 1959, Art. 10, para. 1)."

Paragraph 13, as it read before it was deleted on 15 July 2005, was included in the 1977 Model Convention. In the 1977 Model Convention and until 15 July 2005, paragraph 13 read as follows:

"13. It should, however, be pointed out that the solution adopted, given the combined effect of the right to tax accorded to the State of source and the allowance to be made for the tax levied there against that due in the State of residence, could, in certain cases, result in maintaining partial double taxation and lead to adverse economic consequences. In fact, when the beneficiary of the interest has himself had to borrow in order to finance the operation which earns him interest, the profit he will realise by way of interest will be much smaller than the nominal amount of interest he receives; if the interest he pays and that which he receives balance, there will be no profit at all. In such a case, the allowance to be made under paragraph 2 of Article 23 A, or paragraph 1 of Article 23 B, raises a difficult and sometimes insoluble problem in view of the fact that the tax levied in the State where the interest arises is calculated on the gross amount thereof, whereas the same interest is reflected in the beneficiary's business results at its net amount only. The result of this is that part, or sometimes even the whole amount, of the tax levied in the State where the interest arises cannot be allowed as a credit in the beneficiary's State of residence and so constitutes an excess charge for the beneficiary, who, to that extent, suffers double taxation. Moreover, the latter, in order to avoid the disadvantage just mentioned, will tend to increase the rate of interest he charges his debtor, whose financial burden would then be increased to a corresponding extent. Thus in certain cases the practice of taxation at the source can constitute an obstacle to international trade. Furthermore, if the payer of the interest happens to be the State itself, a public sector institution, or an enterprise guaranteed by the State, the end result may well be that the tax levied at source is actually borne by the Treasury of the debtor's State, which latter thus derives no real benefit from its own taxation."

Paragraph 13 of the 1977 Model Convention replaced paragraph 13 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 13 and the preceding heading read as follows:

"E. Solution Adopted by the Fiscal Committee of O.E.C.D

13. Sometimes taxation is shared between the State of the recipient's residence and the State of source (see Denmark-Switzerland, 1957, Arts. 2 and 9; Norway-Switzerland, 1956, Arts. 2 and 9; France-Switzerland 1953, Art. 10; United States-France, 1956, Art. 6 A (new) of the Convention of 1939, and Art. 14; France-Germany, 1959, Art. 10, para. 1)."

Paragraph 14: Corresponds to paragraph 11 as it read before 15 July 2005. On 15 July 2005 paragraph 14 was amended and renumbered as paragraph 7.8 (see history paragraph 7.8) and paragraph 11 of 1977 Model Convention was renumbered as paragraph 14 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 11 of the 1977 Model Convention corresponded to paragraph 22 of the 1963 Draft Convention. Paragraph 11 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 22 of the 1963 Draft Convention was amended and renumbered

as paragraph 11. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 22 read as follows:

> "22. Moreover, the Article contains no provisions concerning any obligation on the State of the Recipient's residence to take account of the tax in the State of source of the interest. This question is dealt with in Articles 23(A) and 23(B) concerning method of avoiding double taxation in the former State."

Paragraph 11 of the 1963 Draft Convention, until it was deleted when the 1977 Model Convention was adopted, read as follows:

> "11. In other cases the tax in the State of source is to be levied at the ordinary rate and credit given for it against the tax payable in the State of the recipient's residence (see Belgium-France, 1931, Art. 6; Italy-Sweden, 1956, Art. 9)."

Paragraph 15: Deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. In the 1977 Model Convention and until 15 July 2005, paragraph 15 read as follows:

> "15. If two Contracting States, in order to eliminate all risks of double taxation, should desire to avoid the imposition of a tax in the State of source on interest arising from the above-mentioned categories of debts, their common intention can be expressed by an additional paragraph which would follow paragraph 2 of the Article, and which might be drafted in the following terms:
>
> > "3. Notwithstanding the provisions of paragraph 2, any such interest as is mentioned in paragraph 1 shall be taxable only in the Contracting State of which the recipient is a resident, if such recipient is the beneficial owner of the interest and if such interest is paid:
> >
> > *a)* in connection with the sale on credit of any industrial, commercial or scientific equipment,
> >
> > *b)* in connection with the sale on credit of any merchandise by one enterprise to another enterprise, or
> >
> > *c)* on any loan of whatever kind granted by a bank.""

Paragraph 15 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 15 of the 1963 Draft Convention was amended and incorporated into paragraph 3 (see history of paragraph 3) and a new paragraph 15 was added.

Paragraph 16: Amended and renumbered as paragraph 7.9 (see history of paragraph 7.9) on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 17: Amended and renumbered as paragraph 7.12 (see history of paragraph 7.12) on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 18: Amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, by deleting the sixth sentence and by moving the seventh and subsequent sentences to a new paragraph 20 (see history of paragraph 20). In the 1977 Model Convention and until 23 July 1992, paragraph 18 read as follows:

> "18. Paragraph 3 specifies the meaning to be attached to the term "interest" for the application of the taxation treatment defined by the Article. The term designates, in general, income from debt-claims of every kind, whether or not secured by mortgage and whether or not carrying a right to participate in profits. The term "debt-claims of every kind" obviously embraces cash deposits and security in the form of money, as well as Government securities, and bonds and

debentures, although the three latter are specially mentioned because of their importance and of certain peculiarities that they may present. It is recognised, on the one hand, that mortgage interest comes within the category of income from movable capital ("revenus de capitaux mobiliers"), even though certain countries assimilate it to income from immovable property. On the other hand, debt-claims, and bonds and debentures in particular, which carry a right to participate in the debtor's profits are nonetheless regarded as loans if the contract by its general character clearly evidences a loan at interest. In the contrary case, where the participation in profits rests upon a provision of funds that is subject to the hazards of the enterprise's business, the operation is not in the nature of a loan and Article 11 does not apply. As regards, more particularly, Government securities, and bonds and debentures, the text specifies that premiums or prizes attaching thereto constitute interest. Generally speaking, what constitutes interest yielded by a loan security, and may properly be taxed as such in the State of source, is all that the institution issuing the loan pays over and above the amount paid by the subscriber, that is to say, the interest accruing plus any premium paid at redemption or at issue. It follows that when a bond or debenture has been issued at a premium, the excess of the amount paid by the subscriber over that repaid to him may constitute negative interest which should be deducted from the interest that is taxable. On the other hand, any profit or loss which a holder of such a security realises by the sale thereof to another person does not enter into the concept of interest. Such profit or loss may, depending on the case, constitute either a business profit or a loss, a capital gain or a loss, or income falling under Article 21."

Paragraph 18 of the 1977 Model Convention corresponded to paragraph 24 of the 1963 Draft Convention. Paragraph 18 of the 1963 Draft Convention was amended and renumbered as paragraph 5 (see history of paragraph 5) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 18 of the 1977 Model Convention and the preceding heading moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 24 read as follows:

"24. This paragraph specifies the meaning to be attached to the term "interest" for the application of the taxation treatment defined by the Article. In particular, the term designates income from bonds or debentures, whether or not secured by mortgage and whether or not carrying a fight to participate in profits, and debt claims of all kinds, including mortgages. Bonds or debentures which participate in profits are nonetheless regarded as loan securities if the contract of issue by its general character constitutes evidence of a loan at interest. It is also recognised that mortgage interest comes within the category of income from movable capital ("revenus de capitaux mobiliers"), although certain countries assimilate it to income from immovable capital."

Paragraph 19: Replaced paragraph 19 of the 1977 Model Convention. On 23 July 1992 paragraph 19 of the 1977 Model Convention was renumbered as paragraph 21 (see history of paragraph 21) and a new paragraph 19 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraphs 59 and 60 and subparagraph 85 b) of a previous report entitled "Thin Capitalisation" (adopted by the OECD Council on 26 November 1986).

Paragraph 20: Replaced paragraph 20 of the 1977 Model Convention. On 23 July 1992 paragraph 20 of the 1977 Model Convention was renumbered as paragraph 22 (see history of paragraph 22) and a new paragraph 20, which contains the text of the part of paragraph 18 of the 1977 Model Convention that followed the 6th sentence thereof

(see history of paragraph 18), was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 21: Corresponds to paragraph 19 of the 1977 Model Convention. On 23 July 1992 paragraph 21 of the 1977 Model Convention was renumbered as paragraph 23 (see history of paragraph 23) and paragraph 19 was renumbered as paragraph 21 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 19 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 19 of the 1963 Draft Convention was amended and renumbered as paragraph 7 (see history of paragraph 7) and the preceding heading was moved with it and a new paragraph 19 was added.

Paragraph 21.1: Added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", which was adopted by the OECD Council on 21 September 1995.

Paragraph 22: Corresponds to paragraph 20 of the 1977 Model Convention. On 23 July 1992 paragraph 22 of the 1977 Model Convention was renumbered as paragraph 24 (see history of paragraph 24), the heading preceding paragraph 22 was moved with it and paragraph 20 was renumbered as paragraph 22 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 20 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 20 of the 1963 Draft Convention was amended and renumbered as paragraph 9 (see history of paragraph 12) and a new paragraph 20 was added.

Paragraph 23: Corresponds to paragraph 21 of the 1977 Model Convention. On 23 July 1992, paragraph 23 of the 1977 Model Convention was renumbered as paragraph 25 (see history of paragraph 25) and paragraph 21 was renumbered as paragraph 23 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 21 of the 1977 Model Convention corresponded to paragraph 26 of the 1963 Draft Convention. Paragraph 21 of the 1963 Draft Convention was amended and renumbered as paragraph 10 (see history of paragraph 11) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 26 of the 1963 Draft Convention was amended and renumbered as paragraph 21 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 26 read as follows:

> "26. Finally, the question arose whether annuities ought to be assimilated to interest; it was decided that they ought not to be. On the one hand, annuities granted in consideration of past employment are referred to in Article 18 and are subject to the rules governing pensions. On the other hand, although it is true that installments of purchased annuities include an interest element on the purchase capital as well as return of capital, such installments thus constituting "fruits civils" which accrue from day to day, it would be difficult for many countries to make a distinction between the element representing income from capital and the element representing a return of capital in order merely to tax the income element under the same category as income from movable capital. Taxation laws often contain special provisions classifying annuities in the category of salaries, wages and pensions, and taxing them accordingly."

Paragraph 24: Corresponds to paragraph 22 of the 1977 Model Convention. On 23 July 1992 paragraph 24 of the 1977 Model Convention was renumbered as

paragraph 26 (see history of paragraph 26), the heading preceding paragraph 24 was moved with it. At the same time paragraph 22 was renumbered as paragraph 24 and the heading preceding paragraph 22 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 22 of the 1977 Model Convention corresponded to paragraph 27 of the 1963 Draft Convention. Paragraph 22 of the 1963 Draft Convention was amended and renumbered as paragraph 11 (see history of paragraph 12) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 27 of the 1963 Draft Convention was amended and renumbered as paragraph 22 of the 1977 Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 27 read as follows:

> "27. Certain States consider that dividends, interest and royalties arising from sources in their territory and payable to individuals or legal persons who are residents of other States fall outside the scope of the arrangement made to prevent them from being taxed both in the State of source and in the State of the recipient's residence when the recipient possesses a permanent establishment in the former State. Paragraph 4 of the Article is not based on such a conception which is sometimes referred to as "the force of attraction of the permanent establishment". It does not stipulate that interest arising to a resident of a Contracting State from a source situated in the territory of the other State must, by a kind of legal presumption, or fiction even, be related to a permanent establishment which that resident may happen to possess in the latter State, so that the said State would not be obliged to limit its taxation in such a case. The paragraph merely provides that in the State of source the interest is taxable as part of the profits of the permanent establishment there owned by the recipient residing in the other State, if it is paid in respect of debt claims forming part of the assets of the permanent establishment or otherwise effectively connected with that establishment. In that case, paragraph 4 relieves the State of source of the interest from any limitation under the Article. The foregoing explanations accord with those in the Commentaries on Article 7 on the taxation of business profits."

Paragraph 25: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 25 read as follows:

> "25. It has been suggested that the paragraph could give rise to abuses through the transfer of loans to permanent establishments set up solely for that purpose in countries that offer preferential treatment to interest income. Apart from the fact that such abusive transactions might trigger the application of domestic anti-abuse rules, it must be recognised that a particular location can only constitute a permanent establishment if a business is carried on therein and, also, that the requirement that a debt-claim be "effectively connected" to such a location requires that the debt-claim be genuinely connected to that business."

Paragraph 25 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 25 was deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on

Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 25 read as follows:

> "25. The rules set out above also apply where the beneficiary of the interest has in the other Contracting State, for the purpose of performing any of the kinds of independent personal services mentioned in Article 14, a fixed base with which the debt-claim in respect of which the interest is paid is effectively connected."

Paragraph 25, as it read after 23 July 1992 corresponded to paragraph 23 of the 1977 Model Convention. On 23 July 1992 paragraph 25 was renumbered as paragraph 27 (see history of paragraph 27) and paragraph 23 was renumbered as paragraph 25 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 23 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 23 of the 1963 Draft Convention was amended and renumbered as paragraph 12 (see history of paragraph 8) and a new paragraph 23 was added.

Paragraph 25.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 25.2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 26: Amended on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 26 read as follows:

> "26. This paragraph lays down the principle that the State of source of the interest is the State of which the payer of the interest is a resident, who may, moreover, be that State itself or one of its political subdivisions or local authorities. It provides, however, for an exception to this rule in the case of interest-bearing loans which have an obvious economic link with a permanent establishment owned in the other Contracting State by the payer of the interest. If the loan was contracted for the requirements of that establishment and the interest is borne by the latter, the paragraph determines that the source of the interest is in the Contracting State in which the permanent establishment is situated, leaving aside the place of residence of the owner of the permanent establishment, even when he resides in a third State."

Paragraph 26, as it read after 23 July 1992, corresponded to paragraph 24 of the 1977 Model Convention. On 23 July 1992 paragraph 26 of the 1977 Model Convention was renumbered as paragraph 28 (see history of paragraph 28), paragraph 24 was renumbered as paragraph 26 and the heading preceding paragraph 24 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 24 of the 1977 Model Convention corresponded to paragraph 28 of the 1963 Draft Convention. Paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 18 (see history of paragraph 18) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 28 of the 1963 Draft Convention was amended and renumbered as paragraph 24 of the 1977 Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 28 read as follows:

> "28. This paragraph lays down the principle that the State of source of the interest is the State in which the payer of the interest resides, who may, moreover,

be that State itself or one of its political subdivisions. It provides, however, for an exception to this rule in the case of interest bearing loans which have an obvious economic link with a permanent establishment owned in the other Contracting State by the payer of the interest. If the loan was contracted for the requirements of that establishment and the interest is borne by the latter, the paragraph determines that the source of the interest is in the Contracting State in which the permanent establishment is situated, leaving aside the place of residence of the owner of the permanent establishment, even where he resides in a third State."

Paragraph 27: Corresponds to paragraph 25 of the 1977 Model Convention. On 23 July 1992 paragraph 27 of the 1977 Model Convention was renumbered as paragraph 29 (see history of paragraph 29) and paragraph 25 was renumbered as paragraph 27 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 25 of the 1977 Model Convention replaced paragraph 25 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 25 read as follows:

"25. In any case, the Article does not give a complete and exhaustive list of the various kinds of interest. Such a list might not be fully in harmony with the various States' laws, which may differ among themselves in their interpretation of the concept of interest. It therefore seems preferable to include in a general formula all income which is assimilated by those laws to remuneration on money lent. This applies in particular to interest derived from cash deposits and security lodged in money."

Paragraph 28: Corresponds to paragraph 26 of the 1977 Model Convention. On 23 July 1992 paragraph 28 of the 1977 Model Convention was renumbered as paragraph 30 (see history of paragraph 30) and paragraph 26 was renumbered as paragraph 28 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 26 of the 1977 Model Convention corresponded to paragraph 29 of the 1963 Draft Convention. Paragraph 26 of the 1963 Draft Convention was amended and renumbered as paragraph 21 (see history of paragraph 23) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 29 of the 1963 Draft Convention was amended and renumbered as paragraph 26 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 29 read as follows:

"29. Paragraph 5 provides no solution for the case, which it excludes from its provisions, where both the recipient and the payer are indeed residents of the Contracting States, but the loan was borrowed for the requirements of a permanent establishment owned by the payer in a third State and the interest is borne by that establishment. As paragraph 5 of the Article now stands, therefore, only its first sentence will apply in such a case. The interest will be deemed to arise in the Contracting State where the payer resides, and not in the third State in whose territory is situated the permanent establishment for the account of which the loan was effected and by which the interest is payable. Thus the interest will be taxed both in the Contracting State where the payer resides and in the Contracting State where the recipient resides. But, although double taxation will be avoided between these two States by the arrangements provided in the Article, it will not be avoided between them and the third State if the latter taxes the interest on the loan at the source when it is borne by the permanent establishment in its territory."

Paragraph 29: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 29 read as follows:

> "29. It has not, however, been considered possible to refer to such a case in a bilateral convention and provide for it a solution consisting for example, in obliging the Contracting State of the payer's residence to relinquish its tax at the source in favour of the third State in which is situated the permanent establishment for the account of which the loan was effected and by which the interest is borne. The risk of double taxation just referred to can only be fully avoided through a bilateral convention containing a similar provision to that in paragraph 5, between the Contracting State of which the payer of the interest is a resident and the third State in which the permanent establishment paying the interest is situated, or through a multilateral convention containing such a provision."

Paragraph 29 as it read after 23 July 1992 corresponded to paragraph 27 of the 1977 Model Convention. On 23 July 1992 paragraph 29 was amended and renumbered as paragraph 31 (see history of paragraph 31) and paragraph 27 was renumbered as paragraph 29 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 27 of the 1977 Model Convention corresponded to paragraph 30 of the 1963 Draft Convention. Paragraph 27 of the 1963 Draft Convention was amended and renumbered as paragraph 22 (see history of paragraph 24) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 30 of the 1963 Draft Convention was amended and renumbered as paragraph 27 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 30 read as follows:

> "30. It has not, however, been considered possible to refer to such a case in a bilateral Convention and provide for it a solution consisting, for example, in obliging the Contracting State of the payer's residence to relinquish its tax at the source in favour of the third State in which is situated the permanent establishment for the account of which the loan was effected and by which the interest is borne. The risk of double taxation just referred to can only be fully avoided through a bilateral Convention containing a similar provision to that in paragraph 5 of the proposed Article, between the Contracting State where the payer of the interest resides and the third State in which the permanent establishment paying the interest is situated, or through a multilateral Convention containing such a provision."

Paragraph 30: Amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 29 April 2000 and until 15 July 2005, paragraph 30 read as follows:

> "30. Moreover, in the case — not settled in paragraph 5 — where whichever of the two Contracting States is that of the payer's residence and the third State in which is situated the permanent establishment for the account of which the loan is effected and by which the interest is borne, together claim the right to tax the interest at the source, there would be nothing to prevent those two States together with, where appropriate, the State of the beneficiary's residence from concerting measures to avoid the double taxation that would result from such claims. The proper remedy, it must be said again, would be the establishment between these different States of bilateral conventions, or a multilateral convention, containing a provision similar to that in paragraph 5. Another solution would be for two Contracting States to word the second sentence of paragraph 5 in the following way:

"Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a State other than that of which he is a resident a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment, then such interest shall be deemed to arise in the State in which the permanent establishment is situated.""

Paragraph 30 was previously amended on 29 April 2000, by deleting the words "or fixed base" and "or a fixed base", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 30 read as follows:

"30. Moreover, in the case — not settled in paragraph 5 — where whichever of the two Contracting States is that of the payer's residence and the third State in which is situated the permanent establishment for the account of which the loan is effected and by which the interest is borne, together claim the right to tax the interest at the source, there would be nothing to prevent those two States together with, where appropriate, the State of the beneficiary's residence from concerting measures to avoid the double taxation that would result from such claims. The proper remedy, it must be said again, would be the establishment between these different States of bilateral conventions, or a multilateral convention, containing a provision similar to that in paragraph 5. Another solution would be for two Contracting States to word the second sentence of paragraph 5 in the following way:

"Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a State other than that of which he is a resident a permanent establishment or a fixed base in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment or fixed base, then such interest shall be deemed to arise in the State in which the permanent establishment or fixed base is situated.""

Paragraph 30 as it read after 23 July 1992 corresponded to paragraph 28 of the 1977 Model Convention. On 23 July 1992 paragraph 30 of the 1977 Model Convention was renumbered as paragraph 32 (see history of paragraph 32), the heading preceding paragraph 30 was moved with it and paragraph 28 was renumbered as paragraph 30 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 28 of the 1977 Model Convention corresponded to paragraph 31 of the 1963 Draft Convention. Paragraph 28 of the 1963 Draft Convention was amended and renumbered as paragraph 24 (see history of paragraph 26) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 31 of the 1963 Draft Convention was amended and renumbered as paragraph 28 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 31 read as follows:

"31. Moreover, in the case — not settled in paragraph 5 of the Article — where whichever of the two Contracting States is that of the payer's residence and the third State in which is situated the permanent establishment for the account of which the loan is effected and by which the interest is borne, together claim the right to tax the interest at the source, there would be nothing to prevent those two States — together with, where appropriate, the State of the recipient's residence —

from concerting measures to avoid the double taxation that would result from such claims. The proper remedy, it must be said again, would be the establishment between these different States of bilateral Conventions, or a multilateral Convention, containing a provision similar to that in paragraph 5 of the Article."

Paragraph 31: Corresponds to paragraph 29 of the 1977 Model Convention. On 23 July 1992 paragraph 31 of the 1977 Model Convention was amended and renumbered as paragraph 33 (see history of paragraph 33) and paragraph 29 was renumbered as paragraph 31, and amended, by replacing the reference therein to paragraphs 26 to 28 by a reference to paragraphs 28 to 30, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 29 of the 1977 Model Convention corresponded to paragraph 32 of the 1963 Draft Convention. Paragraph 29 of the 1963 Draft Convention was amended and renumbered as paragraph 26 (see history of paragraph 28) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 32 of the 1963 Draft Convention was amended and renumbered as paragraph 29 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 32 read as follows:

"32. It goes without saying that if two Contracting States agree in bilateral negotiations to reserve to the State where the recipient of the income resides the exclusive right to tax such income, then ipso facto there is no value in inserting in the Convention which fixes their relations that provision in paragraph 5 of the Article which defines the State of source of such income. But it is equally obvious that double taxation would not be fully avoided in such a case if the payer of the interest owned, in a third State which charged its tax at the source on the interest, a permanent establishment for the account of which the loan had been borrowed and which bore the interest payable on them. The case would then be just the same as is contemplated in paragraphs 29 to 31 above."

Paragraph 32: Corresponds to paragraph 30 of the 1977 Model Convention. On 23 July 1992 paragraph 32 of the 1977 Model Convention was renumbered as paragraph 34 (see history of paragraph 34), paragraph 30 was renumbered as paragraph 32 and the heading preceding paragraph 30 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 30 of the 1977 Model Convention corresponded to paragraph 33 of the 1963 Draft Convention. Paragraph 30 of the 1963 Draft Convention was amended and renumbered as paragraph 27 (see history of paragraph 29) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 33 of the 1963 Draft Convention was amended and renumbered as paragraph 30 of the 1977 Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 33 read as follows:

"33. The purpose of this paragraph is to restrict the operation of the provisions concerning the taxation of interest in cases where, owing to a special relationship between the payer and the recipient or between both of them and some other person, the amount of the interest paid exceeds the amount which would have been agreed upon by the payer and the recipient had they stipulated at arm's length. It provides that in such a case the provisions of the Article apply only to that last-mentioned amount and that the excess part of the interest shall remain taxable according to the laws of the two Contracting States, due regard being had to the other provisions of the Convention."

Paragraph 33: Corresponds to paragraph 31 of the 1977 Model Convention. On 23 July 1992 paragraph 33 was amended and renumbered as paragraph 35 (see history of paragraph 35) and paragraph 31 was renumbered as paragraph 33 and amended, by substituting the words "both of them and some other person" for "either of them and some other person" at the end of the first sentence, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 31 read as follows:

> "31. It is clear from the text that for this clause to apply the interest held excessive must be due to a special relationship between the payer and the beneficial owner or between either of them and some other person. There may be cited as examples cases where interest is paid to an individual or legal person who directly or indirectly controls the payer, or who is directly or indirectly controlled by him or is subordinate to a group having common interest with him. These examples, moreover, are similar or analogous to the cases contemplated by Article 9."

Paragraph 31 of the 1977 Model Convention corresponded to paragraph 34 of the 1963 Draft Convention. Paragraph 31 of the 1963 Draft Convention was amended and renumbered as paragraph 28 (see history of paragraph 30) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 34 of the 1963 Draft Convention was amended and renumbered as paragraph 31 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 34 read as follows:

> "34. It is clear from the text that for this clause to apply the interest held excessive must be due to a special relationship between the payer and the recipient or between either of them and some other person. There may be cited as examples cases where interest is paid to an individual or legal person who directly or indirectly controls the payer, or who is directly or indirectly controlled by him or is subordinate to a group having common interests with him. These examples, moreover, are similar or analogous to the cases contemplated by Article 9 on the taxation of associated enterprises."

Paragraph 34: Corresponds to paragraph 32 of the 1977 Model Convention. On 23 July 1992 paragraph 34 was renumbered as paragraph 36 (see history of paragraph 36) and paragraph 32 was renumbered as paragraph 34 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 32 of the 1977 Model Convention corresponded to paragraph 35 of the 1963 Draft Convention. Paragraph 32 of the 1963 Draft Convention was amended and renumbered as paragraph 29 (see history of paragraph 31) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 35 of the 1963 Draft Convention was renumbered as paragraph 32 of the 1977 Model Convention.

Paragraph 35: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 35 read as follow:

> "35. With regard to the taxation treatment to be applied to the excess part of the interest, the exact nature of such excess will need to be ascertained according to the circumstances of each case, in order to determine the category of income in which it should be classified for the purposes of applying the provisions of the tax laws of the States concerned and the provisions of the Convention. This paragraph permits only the adjustment of the rate at which interest is charged and not the reclassification of the loan in such a way as to give it the character of a

> contribution to equity capital. For such an adjustment to be possible under paragraph 6 of Article 11 it would be necessary to substitute other words for the phrase "having regard to the debt-claim for which it is paid". Nevertheless, this paragraph can affect not only the recipient but also the payer of excessive interest and if the law of the State of source permits, the excess amount can be disallowed as a deduction, due regard being had to other applicable provisions of the Convention. If two Contracting States should have difficulty in determining the other provisions of the Convention applicable, as cases require, to the excess part of the interest, there would be nothing to prevent them from introducing additional clarifications in the last sentence of paragraph 6, as long as they do not alter its general purport."

Paragraph 35, as it read after 23 July 1992, corresponded to paragraph 33 of the 1977 Model Convention. On 23 July 1992 paragraph 35 was amended and renumbered as paragraph 37 (see history of paragraph 37), the heading preceding paragraph 35 was moved with it and paragraph 33 was renumbered as paragraph 35 and amended by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraphs 61 and 62 of a previous report entitled "Thin Capitalisation" (adopted by the OECD Council on 26 November 1986). In the 1977 Model Convention and until 23 July 1992, paragraph 33 read as follows:

> "33. With regard to the taxation treatment to be applied to the excess part of the interest, the exact nature of such excess will need to be ascertained according to the circumstances of each case, in order to determine the category of income in which it should be classified for the purposes of applying the provisions of the tax laws of the States concerned and the provisions of the Convention. If two Contracting States should have difficulty in determining the other provisions of the Convention applicable, as cases require, to the excess part of the interest, there would be nothing to prevent them from introducing additional clarifications in the last sentence of paragraph 6, as long as they do not alter its general purport."

Paragraph 33 of the 1977 Model Convention corresponded to paragraph 36 of the 1963 Draft Convention. Paragraph 33 of the 1963 Draft Convention was amended and renumbered as paragraph 30 (see history of paragraph 32) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 36 of the 1963 Draft Convention was amended and renumbered as paragraph 33 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 36 read as follows:

> "36. With regard to the taxation treatment to be applied to the excess part of the interest, the exact nature of such excess will need to be ascertained according to the circumstances of each case, in order to determine the category of income in which it should be classified for the purposes of applying the provisions of the tax laws of the States concerned and the provisions of the Convention for the avoidance of double taxation."

Paragraph 36: Corresponds to paragraph 34 of the 1977 Model Convention. On 23 July 1992 paragraph 36 was deleted and paragraph 34 was renumbered as paragraph 36 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 34 of the 1977 Model Convention corresponded to paragraph 37 of the 1963 Draft Convention. Paragraph 34 of the 1963 Draft Convention was amended and renumbered as paragraph 31 (see history of paragraph 33) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 37 of the 1963 Draft Convention was amended and renumbered as paragraph 34 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by

the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 37 read as follows:

"37. It goes without saying that should the principles and rules of their respective laws oblige the two Contracting States to apply different Articles of the Convention for the purpose of taxing the excess, it will be necessary to resort to the mutual agreement procedure provided by the Convention in order to resolve the difficulty."

In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 36 read as follows:

"36. The *United States* observes that the Article does not limit the taxation by internal law of interest not attributable to a United States permanent establishment in cases where 50 per cent or more of a non-resident payer's gross income is effectively connected with a trade or business in the United States. The United States is willing, in appropriate situations, to limit such taxation by making appropriate modifications in the text of the Article."

Paragraph 36 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 36 of the 1963 Draft Convention was amended and renumbered as paragraph 33 (see history of paragraph 35) and a new paragraph 36 was added.

Paragraph 37: Corresponds to paragraph 35 of the 1977 Model Convention. On 23 July 1992 paragraph 37 of the 1977 Model Convention was amended and renumbered as paragraph 38 (see history of paragraph 38) and the headings preceding paragraph 37 were moved with it. At the same time paragraph 35 was amended and renumbered as paragraph 37 and the heading preceding paragraph 37 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 35 read as follows:

"35. The *United Kingdom* does not adhere to paragraph 18 above. Under United Kingdom law, certain interest payments are treated as distributions, and are therefore dealt with under Article 10."

Paragraph 35 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 35 of the 1963 Draft Convention was renumbered as paragraph 32 (see history of paragraph 34) and a new paragraph 35 was added together with the heading preceding it when the 1977 Model Convention was adopted.

Paragraph 38: Amended on 22 July 2010, by adding Chile to the list of countries making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 38 read as follows:

"38. *Hungary*, *Mexico*, *Portugal*, the *Slovak Republic* and *Turkey* reserve their positions on the rate provided in paragraph 2."

Paragraph 38 was previously amended on 28 January 2003, by adding the Slovak Republic to the list of countries making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 38 read as follows:

"38. *Hungary*, *Mexico*, *Portugal* and *Turkey* reserve their positions on the rate provided in paragraph 2."

Paragraph 38 was previously amended on 23 October 1997, by adding Hungary to the list of countries making the reservation, by the report entitled "The 1997 Update to the

Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 38 read as follows:

"38. *Mexico*, *Portugal* and *Turkey* reserve their positions on the rate provided in paragraph 2."

Paragraph 38 was previously amended on 21 September 1995, by adding Mexico and Turkey as countries making the reservation, by a Report by the Committee on Fiscal Affairs entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 38 read as follows:

"38. *Portugal* reserves its position on the rate provided in paragraph 2."

Paragraph 38 corresponded to paragraph 37 of the 1977 Model Convention. On 23 July 1992 paragraph 38 of the 1977 Model Convention was deleted, paragraph 37 was amended and renumbered as paragraph 38 and the headings preceding paragraph 37 were moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 37 read as follows:

"37. *Belgium*, *Portugal* and *Spain* reserve their position on the rate provided in paragraph 2."

Paragraph 37 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 37 of the 1963 Draft Convention was amended and renumbered as paragraph 34 (see history of paragraph 36) and a new paragraph 37 was added when the 1977 Model Convention was adopted. At the same time, the section heading preceding paragraph 38 and the heading preceding paragraph 39 were moved immediately before paragraph 37.

In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 38 read as follows:

"38. *Canada* reserves its position on paragraph 2 and wishes to retain a 15 per cent rate of tax at source in its bilateral conventions."

Paragraph 38 of the 1977 Model Convention corresponded to paragraph 40 of the 1963 Draft Convention. Paragraph 38 and the heading preceding it, as they read in the 1963 Draft Convention were deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 40 of the 1963 Draft Convention was amended and renumbered as paragraph 38. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 40 read as follows:

"40. Canada reserves its position on the second paragraph of this Article."

Paragraph 38 and the heading preceding it, as they read in the 1963 Draft Convention and until they were deleted when the 1977 Model Convention was adopted, read as follows:

"*Paragraphs 1 and 2*

38. In view of the special structure of its taxation system, Italy is unable to accept paragraphs 1 and 2 of the Article insofar as it applies to that country. However, in its bilateral Conventions for the avoidance of double taxation, Italy could possibly agree to the non-application of the progressive complementary tax on total income ("imposta complementare progressiva sul reddito complessivo") to interest arising from Italian sources to persons resident in the other Contracting State and, where such interest is not exempt from the tax on income from movable property ("imposta sui redditi di ricchezza mobile"), of the tax on bonds and debentures ("imposta sulle obbligazioni") as well."

Paragraph 39: Deleted on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 39 read as follows:

"39. *Norway* reserves the right to treat interest as taxable only in the State where the beneficial owner of the interest is a resident."

Paragraph 39 was replaced on 23 July 1992. Paragraph 39 of the 1963 Draft Convention was amended and renumbered as paragraph 40 (see history of paragraph 41) and new paragraph 39 was added by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 40: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

A previous paragraph 40 was deleted on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 40 read as follows:

"40. *Turkey* reserves its position on the rate of tax in paragraph 2."

Paragraph 40, as it read after 23 July 1992, corresponded to paragraph 39 of the 1963 Draft Convention. On 23 July 1992, paragraph 40 of the 1977 Model Convention was renumbered as paragraph 45 (see history of paragraph 45), the heading preceding paragraph 40 was moved with it and paragraph 39 was amended and renumbered as paragraph 40 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992. In the 1963 Draft Convention and until 30 July 1963, paragraph 39 read as follows:

"39. *Turkey* cannot accept a rate of tax which is lower than 20 per cent."

Paragraph 41: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 41 read as follows:

"41. *Greece* and *Mexico* reserve the right to exclude from the scope of this Article interest from debt-claim created or assigned mainly for the purpose of taking advantage of this Article and not for *bona fide* commercial reasons. *Mexico* reserves the right to consider as interest other types of income, such as income derived from financial leasing and factoring contracts."

Paragraph 41 was previously amended on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 41 read as follows:

"41. *Greece* reserves it right to exclude from the scope of this Article interest from debt-claim created or assigned mainly for the purpose of taking advantage of this Article and not for *bona fide* commercial reasons."

Paragraph 41 and the heading preceding it were added on 23 July 1992 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 42: Added on 23 July 1992 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 43: Amended on 22 July 2010, by adding Chile to the list of countries making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until 22 July 2010, paragraph 43 read as follows:

"43. *Canada* and *Norway* reserve the right to delete the reference to debt-claims carrying the right to participate in the debtor's profits."

Paragraph 43 was added on 23 July 1992 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 44: Amended on 21 September 1995, by adding Greece to the list of countries making the reservation, on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 44 read as follows:

"44. *Portugal* and *Spain* reserve the right to widen the definition of interest by including a reference to their domestic law in line with the definition contained in the 1963 Draft Convention."

Paragraph 44 was added on 23 July 1992 by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 45: Deleted, together with the preceding heading, on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until 22 July 2010, paragraph 45 and the preceding heading read as follows:

"Paragraph 4

45. *Italy* reserves the right to subject interest to the taxes imposed by its law whenever the recipient thereof has a permanent establishment in Italy, even if the indebtedness in respect of which the interest is paid is not effectively connected with such permanent establishment."

Paragraph 45, as it read after 23 July 1992, corresponded to paragraph 40 of the 1977 Model Convention. On 23 July 1992 paragraph 40 of the 1977 Model Convention was renumbered as paragraph 45 and the heading preceding paragraph 40 was moved with it by the report entitled "The Revision of the 1977 Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 40 of the 1977 Model Convention corresponded to paragraph 41 of the 1963 Draft Convention. Paragraph 40 of the 1963 Draft Convention was amended and renumbered as paragraph 38 (see history of paragraph 38) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 41 of the 1963 Draft Convention was renumbered as paragraph 40 of the 1977 Model Convention.

Paragraph 46: Added with the heading preceding it on 15 July 2005, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 46 as it read before 8 January 2003 was deleted, together with the heading preceding it, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 46 and the heading preceding it read as follows:

"Paragraph 6

46. As regards paragraph 6 of the Article, *Mexico* and the *United Kingdom* reserve the right (in accordance with paragraph 35 above) to include after "exceeds" the words "for whatever reason" in place of "having regard to the debt-claim for which it is paid". This permits interest and other payments in respect of certain loans to be dealt with as distributions in a range of circumstances provided for in its domestic law, including those where the amount of the loan or the rate of interest or other terms relating to it are not what would have been agreed in the absence of a special relationship."

Paragraph 46 was previously amended on 21 September 1995 by adding Mexico as a country making the Reservation, reflecting a Report by the Committee on Fiscal Affairs entitled "The 1995 Update to the Model Tax Convention". After 31 March 1994 and until 21 September 1995, paragraph 46 read as follows:

> "46. As regards paragraph 6 of the Article, the *United Kingdom* reserves the right (in accordance with paragraph 35 above) to include after "exceeds" the words "for whatever reason" in place of "having regard to the debt-claim for which it is paid". This permits interest and other payments in respect of certain loans to be dealt with as distributions in a range of circumstances provided for in its domestic law, including those where the amount of the loan or the rate of interest or other terms relating to it are not what would have been agreed in the absence of a special relationship."

Paragraph 46 was previously amended on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 46 read as follows:

> "46. As regards paragraph 6 of the Article (see paragraph 32 above), the *United Kingdom* reserves the right to include after "exceeds" the words "for whatever reason" in place of "having regard to the debt-claim for which it is paid" so as to make it clear that abuse may occur not only where an uncommercial rate of interest is charged on the loan but also where the amount of the loan to which the interest relates exceeds that which would have been loaned between two parties acting at arm's length."

Paragraph 46 and the heading preceding it were added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

COMMENTARY ON ARTICLE 12
CONCERNING THE TAXATION OF ROYALTIES

I. Preliminary remarks

1. In principle, royalties in respect of licences to use patents and similar property and similar payments are income to the recipient from a letting. The letting may be granted in connection with an enterprise (*e.g.* the use of literary copyright granted by a publisher or the use of a patent granted by the inventor) or quite independently of any activity of the grantor (*e.g.* use of a patent granted by the inventor's heirs).

(Amended on 29 April 2000; see HISTORY)

2. Certain countries do not allow royalties paid to be deducted for the purposes of the payer's tax unless the recipient also resides in the same State or is taxable in that State. Otherwise they forbid the deduction. The question whether the deduction should also be allowed in cases where the royalties are paid by a resident of a Contracting State to a resident of the other State, is dealt with in paragraph 4 of Article 24.

(Amended on 23 July 1992; see HISTORY)

II. Commentary on the provisions of the Article

Paragraph 1

3. Paragraph 1 lays down the principle of exclusive taxation of royalties in the State of the beneficial owner's residence. The only exception to this principle is that made in the cases dealt with in paragraph 3.

(Renumbered and amended on 11 April 1977; see HISTORY)

4. The requirement of beneficial ownership was introduced in paragraph 1 of Article 12 to clarify how the Article applies in relation to payments made to intermediaries. It makes plain that the State of source is not obliged to give up taxing rights over royalty income merely because that income was immediately received by a resident of a State with which the State of source had concluded a convention. The term "beneficial owner" is not used in a narrow technical sense, rather, it should be understood in its context and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance.

(Replaced on 28 January 2003; see HISTORY)

4.1 Relief or exemption in respect of an item of income is granted by the State of source to a resident of the other Contracting State to avoid in whole or in part the double taxation that would otherwise arise from the concurrent

taxation of that income by the State of residence. Where an item of income is received by a resident of a Contracting State acting in the capacity of agent or nominee it would be inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption merely on account of the status of the immediate recipient of the income as a resident of the other Contracting State. The immediate recipient of the income in this situation qualifies as a resident but no potential double taxation arises as a consequence of that status since the recipient is not treated as the owner of the income for tax purposes in the State of residence. It would be equally inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption where a resident of a Contracting State, otherwise than through an agency or nominee relationship, simply acts as a conduit for another person who in fact receives the benefit of the income concerned. For these reasons, the report from the Committee on Fiscal Affairs entitled "Double Taxation Conventions and the Use of Conduit Companies"[1] concludes that a conduit company cannot normally be regarded as the beneficial owner if, though the formal owner, it has, as a practical matter, very narrow powers which render it, in relation to the income concerned, a mere fiduciary or administrator acting on account of the interested parties.

(Added on 28 January 2003; see HISTORY)

4.2 Subject to other conditions imposed by the Article, the limitation of tax in the State of source remains available when an intermediary, such as an agent or nominee, is interposed between the beneficiary and the payer, in those cases where the beneficial owner is a resident of the other Contracting State (the text of the Model was amended in 1995 to clarify this point, which has been the consistent position of all member countries). States which wish to make this more explicit are free to do so during bilateral negotiations.

(Renumbered and amended on 28 January 2003; see HISTORY)

5. The Article deals only with royalties arising in a Contracting State and beneficially owned by a resident of the other Contracting State. It does not, therefore, apply to royalties arising in a third State as well as to royalties arising in a Contracting State which are attributable to a permanent establishment which an enterprise of that State has in the other Contracting State (for these cases see paragraphs 4 to 6 of the Commentary on Article 21). Procedural questions are not dealt with in this Article. Each State should be able to apply the procedure provided in its own law. Specific questions arise with triangular cases (see paragraph 71 of the Commentary on Article 24).

(Amended on 17 July 2008; see HISTORY)

1 Reproduced in Volume II at page R(6)-1.

6. The paragraph does not specify whether or not the exemption in the State of source should be conditional upon the royalties being subject to tax in the State of residence. This question can be settled by bilateral negotiations.

(Renumbered and amended on 11 April 1977; see HISTORY)

7. Attention is drawn generally to the following case: the beneficial owner of royalties arising in a Contracting State is a company resident in the other Contracting State; all or part of its capital is held by shareholders resident outside that other State; its practice is not to distribute its profits in the form of dividends; and it enjoys preferential taxation treatment (private investment company, base company). The question may arise whether in the case of such a company it is justifiable to allow in the State of source of the royalties the tax exemption which is provided in paragraph 1. It may be appropriate, when bilateral negotiations are being conducted, to agree upon special exceptions to the taxing rule laid down in this Article, in order to define the treatment applicable to such companies.

(Renumbered and amended on 11 April 1977; see HISTORY)

Paragraph 2

8. paragraph 2 contains a definition of the term “royalties”. These relate, in general, to rights or property constituting the different forms of literary and artistic property, the elements of intellectual property specified in the text and information concerning industrial, commercial or scientific experience. The definition applies to payments for the use of, or the entitlement to use, rights of the kind mentioned, whether or not they have been, or are required to be, registered in a public register. The definition covers both payments made under a license and compensation which a person would be obliged to pay for fraudulently copying or infringing the right.

(Amended on 17 July 2008; see HISTORY)

8.1 The definition does not, however, apply to payments that, whilst based on the number of times a right belonging to someone is used, are made to someone else who does not himself own the right or the right to use it (see, for instance, paragraph 18 below).

(Replaced on 17 July 2008; see HISTORY)

8.2 Where a payment is in consideration for the transfer of the full ownership of an element of property referred to in the definition, the payment is not in consideration “for the use of, or the right to use” that property and cannot therefore represent a royalty. As noted in paragraphs 15 and 16 below as regards software, difficulties can arise in the case of a transfer of rights that could be considered to form part of an element of property referred to in the definition where these rights are transferred in a way that is presented as an

alienation. For example, this could involve the exclusive granting of all rights to an intellectual property for a limited period or all rights to the property in a limited geographical area in a transaction structured as a sale. Each case will depend on its particular facts and will need to be examined in the light of the national intellectual property law applicable to the relevant type of property and the national law rules as regards what constitutes an alienation but in general, if the payment is in consideration for the alienation of rights that constitute distinct and specific property (which is more likely in the case of geographically-limited than time limited rights), such payments are likely to be business profits within Article 7 or a capital gain within Article 13 rather than royalties within Article 12. That follows from the fact that where the ownership of rights has been alienated, the consideration cannot be for the use of the rights. The essential character of the transaction as an alienation cannot be altered by the form of the consideration, the payment of the consideration in instalments or, in the view of most countries, by the fact that the payments are related to a contingency.

(Added on 17 July 2008; see HISTORY)

8.3 The word "payment", used in the definition, has a very wide meaning since the concept of payment means the fulfilment of the obligation to put funds at the disposal of the creditor in the manner required by contract or by custom.

(Added on 17 July 2008; see HISTORY)

8.4 As a guide, certain explanations are given below in order to define the scope of Article 12 in relation to that of other Articles of the Convention, as regards, in particular, the provision of information.

(Added on 17 July 2008; see HISTORY)

8.5 Where information referred to in paragraph 2 is supplied or where the use or the right to use a type of property referred to in that paragraph is granted, the person who owns that information or property may agree not to supply or grant to anyone else that information or right. Payments made as consideration for such an agreement constitute payments made to secure the exclusivity of that information or an exclusive right to use that property, as the case may be. These payments being payments "of any kind received as a consideration for … the right to use" the property "or for information", fall under the definition of royalties.

(Renumbered on 17 July 2008; see HISTORY)

9. Whilst the definition of the term "royalties" in the 1963 Draft Convention and the 1977 Model Convention included payments "for the use of, or the right to use, industrial, commercial or scientific equipment", the reference to these

payments was subsequently deleted from the definition. Given the nature of income from the leasing of industrial, commercial or scientific equipment, including the leasing of containers, the Committee on Fiscal Affairs decided to exclude income from such leasing from the definition of royalties and, consequently, to remove it from the application of Article 12 in order to make sure that it would fall under the rules for the taxation of business profits, as defined in Articles 5 and 7.

(Replaced on 23 July 1992; see HISTORY)

9.1 Satellite operators and their customers (including broadcasting and telecommunication enterprises) frequently enter into "transponder leasing" agreements under which the satellite operator allows the customer to utilise the capacity of a satellite transponder to transmit over large geographical areas. Payments made by customers under typical "transponder leasing" agreements are made for the use of the transponder transmitting capacity and will not constitute royalties under the definition of paragraph 2: these payments are not made in consideration for the use of, or right to use, property, or for information, that is referred to in the definition (they cannot be viewed, for instance, as payments for information or for the use of, or right to use, a secret process since the satellite technology is not transferred to the customer). As regards treaties that include the leasing of industrial, commercial or scientific (ICS) equipment in the definition of royalties, the characterisation of the payment will depend to a large extent on the relevant contractual arrangements. Whilst the relevant contracts often refer to the "lease" of a transponder, in most cases the customer does not acquire the physical possession of the transponder but simply its transmission capacity: the satellite is operated by the lessor and the lessee has no access to the transponder that has been assigned to it. In such cases, the payments made by the customers would therefore be in the nature of payments for services, to which Article 7 applies, rather than payments for the use, or right to use, ICS equipment. A different, but much less frequent, transaction would be where the owner of the satellite leases it to another party so that the latter may operate it and either use it for its own purposes or offer its data transmission capacity to third parties. In such a case, the payment made by the satellite operator to the satellite owner could well be considered as a payment for the leasing of industrial, commercial or scientific equipment. Similar considerations apply to payments made to lease or purchase the capacity of cables for the transmission of electrical power or communications (*e.g.* through a contract granting an indefeasible right of use of such capacity) or pipelines (*e.g.* for the transportation of gas or oil).

(Added on 22 July 2010; see HISTORY)

9.2 Also, payments made by a telecommunications network operator to another network operator under a typical "roaming" agreement (see paragraph 9.1 of the Commentary on Article 5) will not constitute royalties under the definition of paragraph 2 since these payments are not made in consideration for the use of, or right to use, property, or for information, referred to in the definition (they cannot be viewed, for instance, as payments for the use of, or right to use, a secret process since no secret technology is used or transferred to the operator). This conclusion holds true even in the case of treaties that include the leasing of industrial, commercial or scientific (ICS) equipment in the definition of royalties since the operator that pays a charge under a roaming agreement is not paying for the use, or the right to use, the visited network, to which it does not have physical access, but rather for the telecommunications services provided by the foreign network operator.

(Added on 22 July 2010; see HISTORY)

9.3 Payments for the use of, or the right to use, some or all of part of the radio frequency spectrum (*e.g.* pursuant to a so-called "spectrum license" that allows the holder to transmit media content over designated frequency ranges of the electromagnetic spectrum) do not constitute payments for the use of, or the right to use, property, or for information, that is referred in the definition of royalties in paragraph 2. This conclusion holds true even in the case of treaties that include the leasing of industrial, commercial or scientific (ICS) equipment in the definition of royalties since the payment is not for the use, or the right to use, any equipment.

(Added on 22 July 2010; see HISTORY)

10. Rents in respect of cinematograph films are also treated as royalties, whether such films are exhibited in cinemas or on the television. It may, however, be agreed through bilateral negotiations that rents in respect of cinematograph films shall be treated as business profits and, in consequence, subjected to the provisions of Articles 7 and 9.

(Amended on 29 April 2000; see HISTORY)

10.1 Payments that are solely made in consideration for obtaining the exclusive distribution rights of a product or service in a given territory do not constitute royalties as they are not made in consideration for the use of, or the right to use, an element of property included in the definition. These payments, which are best viewed as being made to increase sales receipts, would rather fall under Article 7. An example of such a payment would be that of a distributor of clothes resident in one Contracting State who pays a certain sum of money to a manufacturer of branded shirts, who is a resident of the other Contracting State, as consideration for the exclusive right to sell in the

first State the branded shirts manufactured abroad by that manufacturer. In that example, the resident distributor does not pay for the right to use the trade name or trade mark under which the shirts are sold; he merely obtains the exclusive right to sell in his State of residence shirts that he will buy from the manufacturer.

(Added on 17 July 2008; see HISTORY)

10.2 A payment cannot be said to be "for the use of, or the right to use" a design, model or plan if the payment is for the development of a design, model or plan that does not already exist. In such a case, the payment is made in consideration for the services that will result in the development of that design, model or plan and would thus fall under Article 7. This will be the case even if the designer of the design, model or plan (*e.g.* an architect) retains all rights, including the copyright, in that design, model or plan. Where, however, the owner of the copyright in previously-developed plans merely grants someone the right to modify or reproduce these plans without actually performing any additional work, the payment received by that owner in consideration for granting the right to such use of the plans would constitute royalties.

(Added on 17 July 2008; see HISTORY)

11. In classifying as royalties payments received as consideration for information concerning industrial, commercial or scientific experience, paragraph 2 is referring to the concept of "know-how". Various specialist bodies and authors have formulated definitions of know-how. The words "payments … for information concerning industrial, commercial or scientific experience" are used in the context of the transfer of certain information that has not been patented and does not generally fall within other categories of intellectual property rights. It generally corresponds to undivulged information of an industrial, commercial or scientific nature arising from previous experience, which has practical application in the operation of an enterprise and from the disclosure of which an economic benefit can be derived. Since the definition relates to information concerning previous experience, the Article does not apply to payments for new information obtained as a result of performing services at the request of the payer.

(Amended on 17 July 2008; see HISTORY)

11.1 In the know-how contract, one of the parties agrees to impart to the other, so that he can use them for his own account, his special knowledge and experience which remain unrevealed to the public. It is recognised that the grantor is not required to play any part himself in the application of the

formulas granted to the licensee and that he does not guarantee the result thereof.

(Added on 28 January 2003; see HISTORY)

11.2 This type of contract thus differs from contracts for the provision of services, in which one of the parties undertakes to use the customary skills of his calling to execute work himself for the other party. Payments made under the latter contracts generally fall under Article 7.

(Added on 28 January 2003; see HISTORY)

11.3 The need to distinguish these two types of payments, *i.e.* payments for the supply of know-how and payments for the provision of services, sometimes gives rise to practical difficulties. The following criteria are relevant for the purpose of making that distinction:

— Contracts for the supply of know-how concern information of the kind described in paragraph 11 that already exists or concern the supply of that type of information after its development or creation and include specific provisions concerning the confidentiality of that information.

— In the case of contracts for the provision of services, the supplier undertakes to perform services which may require the use, by that supplier, of special knowledge, skill and expertise but not the transfer of such special knowledge, skill or expertise to the other party.

— In most cases involving the supply of know-how, there would generally be very little more which needs to be done by the supplier under the contract other than to supply existing information or reproduce existing material. On the other hand, a contract for the performance of services would, in the majority of cases, involve a very much greater level of expenditure by the supplier in order to perform his contractual obligations. For instance, the supplier, depending on the nature of the services to be rendered, may have to incur salaries and wages for employees engaged in researching, designing, testing, drawing and other associated activities or payments to sub-contractors for the performance of similar services.

(Added on 28 January 2003; see HISTORY)

11.4 Examples of payments which should therefore not be considered to be received as consideration for the provision of know-how but, rather, for the provision of services, include:

— payments obtained as consideration for after-sales service,

— payments for services rendered by a seller to the purchaser under a warranty,

— payments for pure technical assistance,

— payments for a list of potential customers, when such a list is developed specifically for the payer out of generally available information (a payment for the confidential list of customers to which the payee has provided a particular product or service would, however, constitute a payment for know-how as it would relate to the commercial experience of the payee in dealing with these customers),

— payments for an opinion given by an engineer, an advocate or an accountant, and

— payments for advice provided electronically, for electronic communications with technicians or for accessing, through computer networks, a trouble-shooting database such as a database that provides users of software with non-confidential information in response to frequently asked questions or common problems that arise frequently.

(Amended on 17 July 2008; see HISTORY)

11.5 In the particular case of a contract involving the provision, by the supplier, of information concerning computer programming, as a general rule the payment will only be considered to be made in consideration for the provision of such information so as to constitute know-how where it is made to acquire information constituting ideas and principles underlying the program, such as logic, algorithms or programming languages or techniques, where this information is provided under the condition that the customer not disclose it without authorisation and where it is subject to any available trade secret protection.

(Added on 28 January 2003; see HISTORY)

11.6 In business practice, contracts are encountered which cover both know-how and the provision of technical assistance. One example, amongst others, of contracts of this kind is that of franchising, where the franchisor imparts his knowledge and experience to the franchisee and, in addition, provides him with varied technical assistance, which, in certain cases, is backed up with financial assistance and the supply of goods. The appropriate course to take with a mixed contract is, in principle, to break down, on the basis of the information contained in the contract or by means of a reasonable apportionment, the whole amount of the stipulated consideration according to the various parts of what is being provided under the contract, and then to apply to each part of it so determined the taxation treatment proper thereto. If, however, one part of what is being provided constitutes by far the principal purpose of the contract and the other parts stipulated therein are only of an ancillary and largely unimportant character, then the treatment applicable to

the principal part should generally be applied to the whole amount of the consideration.

(Added on 28 January 2003; see HISTORY)

12. Whether payments received as consideration for computer software may be classified as royalties poses difficult problems but is a matter of considerable importance in view of the rapid development of computer technology in recent years and the extent of transfers of such technology across national borders. In 1992, the Commentary was amended to describe the principles by which such classification should be made. Paragraphs 12 to 17 were further amended in 2000 to refine the analysis by which business profits are distinguished from royalties in computer software transactions. In most cases, the revised analysis will not result in a different outcome.

(Amended on 29 April 2000; see HISTORY)

12.1 Software may be described as a program, or series of programs, containing instructions for a computer required either for the operational processes of the computer itself (operational software) or for the accomplishment of other tasks (application software). It can be transferred through a variety of media, for example in writing or electronically, on a magnetic tape or disk, or on a laser disk or CD-Rom. It may be standardised with a wide range of applications or be tailor-made for single users. It can be transferred as an integral part of computer hardware or in an independent form available for use on a variety of hardware.

(Added on 29 April 2000; see HISTORY)

12.2 The character of payments received in transactions involving the transfer of computer software depends on the nature of the rights that the transferee acquires under the particular arrangement regarding the use and exploitation of the program. The rights in computer programs are a form of intellectual property. Research into the practices of OECD member countries has established that all but one protect rights in computer programs either explicitly or implicitly under copyright law. Although the term "computer software" is commonly used to describe both the program — in which the intellectual property rights (copyright) subsist — and the medium on which it is embodied, the copyright law of most OECD member countries recognises a distinction between the copyright in the program and software which incorporates a copy of the copyrighted program. Transfers of rights in relation to software occur in many different ways ranging from the alienation of the entire rights in the copyright in a program to the sale of a product which is subject to restrictions on the use to which it is put. The consideration paid can also take numerous forms. These factors may make it difficult to determine where the boundary lies between software payments that are properly to be

regarded as royalties and other types of payment. The difficulty of determination is compounded by the ease of reproduction of computer software, and by the fact that acquisition of software frequently entails the making of a copy by the acquirer in order to make possible the operation of the software.

(Added on 29 April 2000; see HISTORY)

13. The transferee's rights will in most cases consist of partial rights or complete rights in the underlying copyright (see paragraphs 13.1 and 15 below), or they may be (or be equivalent to) partial or complete rights in a copy of the program (the "program copy"), whether or not such copy is embodied in a material medium or provided electronically (see paragraphs 14 to 14.2 below). In unusual cases, the transaction may represent a transfer of "know-how" or secret formula (paragraph 14.3).

(Replaced on 29 April 2000; see HISTORY)

13.1 Payments made for the acquisition of partial rights in the copyright (without the transferor fully alienating the copyright rights) will represent a royalty where the consideration is for granting of rights to use the program in a manner that would, without such license, constitute an infringement of copyright. Examples of such arrangements include licenses to reproduce and distribute to the public software incorporating the copyrighted program, or to modify and publicly display the program. In these circumstances, the payments are for the right to use the copyright in the program (*i.e.* to exploit the rights that would otherwise be the sole prerogative of the copyright holder). It should be noted that where a software payment is properly to be regarded as a royalty there may be difficulties in applying the copyright provisions of the Article to software payments since paragraph 2 requires that software be classified as a literary, artistic or scientific work. None of these categories seems entirely apt. The copyright laws of many countries deal with this problem by specifically classifying software as a literary or scientific work. For other countries treatment as a scientific work might be the most realistic approach. Countries for which it is not possible to attach software to any of those categories might be justified in adopting in their bilateral treaties an amended version of paragraph 2 which either omits all references to the nature of the copyrights or refers specifically to software.

(Added on 29 April 2000; see HISTORY)

14. In other types of transactions, the rights acquired in relation to the copyright are limited to those necessary to enable the user to operate the program, for example, where the transferee is granted limited rights to reproduce the program. This would be the common situation in transactions for the acquisition of a program copy. The rights transferred in these cases are

specific to the nature of computer programs. They allow the user to copy the program, for example onto the user's computer hard drive or for archival purposes. In this context, it is important to note that the protection afforded in relation to computer programs under copyright law may differ from country to country. In some countries the act of copying the program onto the hard drive or random access memory of a computer would, without a license, constitute a breach of copyright. However, the copyright laws of many countries automatically grant this right to the owner of software which incorporates a computer program. Regardless of whether this right is granted under law or under a license agreement with the copyright holder, copying the program onto the computer's hard drive or random access memory or making an archival copy is an essential step in utilising the program. Therefore, rights in relation to these acts of copying, where they do no more than enable the effective operation of the program by the user, should be disregarded in analysing the character of the transaction for tax purposes. Payments in these types of transactions would be dealt with as commercial income in accordance with Article 7.

(Replaced on 29 April 2000; see HISTORY)

14.1 The method of transferring the computer program to the transferee is not relevant. For example, it does not matter whether the transferee acquires a computer disk containing a copy of the program or directly receives a copy on the hard disk of her computer via a modem connection. It is also of no relevance that there may be restrictions on the use to which the transferee can put the software.

(Added on 29 April 2000; see HISTORY)

14.2 The ease of reproducing computer programs has resulted in distribution arrangements in which the transferee obtains rights to make multiple copies of the program for operation only within its own business. Such arrangements are commonly referred to as "site licences", "enterprise licenses", or "network licences". Although these arrangements permit the making of multiple copies of the program, such rights are generally limited to those necessary for the purpose of enabling the operation of the program on the licensee's computers or network, and reproduction for any other purpose is not permitted under the license. Payments under such arrangements will in most cases be dealt with as business profits in accordance with Article 7.

(Added on 29 April 2000; see HISTORY)

14.3 Another type of transaction involving the transfer of computer software is the more unusual case where a software house or computer programmer agrees to supply information about the ideas and principles underlying the program, such as logic, algorithms or programming languages or techniques.

In these cases, the payments may be characterised as royalties to the extent that they represent consideration for the use of, or the right to use, secret formulas or for information concerning industrial, commercial or scientific experience which cannot be separately copyrighted. This contrasts with the ordinary case in which a program copy is acquired for operation by the end user.

(Added on 29 April 2000; see HISTORY)

14.4 Arrangements between a software copyright holder and a distribution intermediary frequently will grant to the distribution intermediary the right to distribute copies of the program without the right to reproduce that program. In these transactions, the rights acquired in relation to the copyright are limited to those necessary for the commercial intermediary to distribute copies of the software program. In such transactions, distributors are paying only for the acquisition of the software copies and not to exploit any right in the software copyrights. Thus, in a transaction where a distributor makes payments to acquire and distribute software copies (without the right to reproduce the software), the rights in relation to these acts of distribution should be disregarded in analysing the character of the transaction for tax purposes. Payments in these types of transactions would be dealt with as business profits in accordance with Article 7. This would be the case regardless of whether the copies being distributed are delivered on tangible media or are distributed electronically (without the distributor having the right to reproduce the software), or whether the software is subject to minor customisation for the purposes of its installation.

(Added on 17 July 2008; see HISTORY)

15. Where consideration is paid for the transfer of the full ownership of the rights in the copyright, the payment cannot represent a royalty and the provisions of the Article are not applicable. Difficulties can arise where there is a transfer of rights involving:

- — exclusive right of use of the copyright during a specific period or in a limited geographical area;
- — additional consideration related to usage;
- — consideration in the form of a substantial lump sum payment.

(Amended on 17 July 2008; see HISTORY)

16. Each case will depend on its particular facts but in general if the payment is in consideration for the transfer of rights that constitute a distinct and specific property (which is more likely in the case of geographically-limited than time limited rights), such payments are likely to be business profits within Article 7 or a capital gain within Article 13 rather than royalties

within Article 12. That follows from the fact that where the ownership of rights has been alienated, the consideration cannot be for the use of the rights. The essential character of the transaction as an alienation cannot be altered by the form of the consideration, the payment of the consideration in instalments or, in the view of most countries, by the fact that the payments are related to a contingency.

(Amended on 17 July 2008; see HISTORY)

17. Software payments may be made under mixed contracts. Examples of such contracts include sales of computer hardware with built-in software and concessions of the right to use software combined with the provision of services. The methods set out in paragraph 11 above for dealing with similar problems in relation to patent royalties and know-how are equally applicable to computer software. Where necessary the total amount of the consideration payable under a contract should be broken down on the basis of the information contained in the contract or by means of a reasonable apportionment with the appropriate tax treatment being applied to each apportioned part.

(Amended on 29 April 2000; see HISTORY)

17.1 The principles expressed above as regards software payments are also applicable as regards transactions concerning other types of digital products such as images, sounds or text. The development of electronic commerce has multiplied the number of such transactions. In deciding whether or not payments arising in these transactions constitute royalties, the main question to be addressed is the identification of that for which the payment is essentially made.

(Added on 28 January 2003; see HISTORY)

17.2 Under the relevant legislation of some countries, transactions which permit the customer to electronically download digital products may give rise to use of copyright by the customer, *e.g.* because a right to make one or more copies of the digital content is granted under the contract. Where the consideration is essentially for something other than for the use of, or right to use, rights in the copyright (such as to acquire other types of contractual rights, data or services), and the use of copyright is limited to such rights as are required to enable downloading, storage and operation on the customer's computer, network or other storage, performance or display device, such use of copyright should not affect the analysis of the character of the payment for purposes of applying the definition of "royalties".

(Added on 28 January 2003; see HISTORY)

17.3 This is the case for transactions that permit the customer (which may be an enterprise) to electronically download digital products (such as software, images, sounds or text) for that customer's own use or enjoyment. In these transactions, the payment is essentially for the acquisition of data transmitted in the form of a digital signal and therefore does not constitute royalties but falls within Article 7 or Article 13, as the case may be. To the extent that the act of copying the digital signal onto the customer's hard disk or other non-temporary media involves the use of a copyright by the customer under the relevant law and contractual arrangements, such copying is merely the means by which the digital signal is captured and stored. This use of copyright is not important for classification purposes because it does not correspond to what the payment is essentially in consideration for (*i.e.* to acquire data transmitted in the form of a digital signal), which is the determining factor for the purposes of the definition of royalties. There also would be no basis to classify such transactions as "royalties" if, under the relevant law and contractual arrangements, the creation of a copy is regarded as a use of copyright by the provider rather than by the customer.

(Added on 28 January 2003; see HISTORY)

17.4 By contrast, transactions where the essential consideration for the payment is the granting of the right to use a copyright in a digital product that is electronically downloaded for that purpose will give rise to royalties. This would be the case, for example, of a book publisher who would pay to acquire the right to reproduce a copyrighted picture that it would electronically download for the purposes of including it on the cover of a book that it is producing. In this transaction, the essential consideration for the payment is the acquisition of rights to use the copyright in the digital product, *i.e.* the right to reproduce and distribute the picture, and not merely for the acquisition of the digital content.

(Added on 28 January 2003; see HISTORY)

18. The suggestions made above regarding mixed contracts could also be applied in regard to certain performances by artists and, in particular, in regard to an orchestral concert given by a conductor or a recital given by a musician. The fee for the musical performance, together with that paid for any simultaneous radio broadcasting thereof, seems to fall under Article 17. Where, whether under the same contract or under a separate one, the musical performance is recorded and the artist has stipulated that he, on the basis of his copyright in the sound recording, be paid royalties on the sale or public playing of the records, then so much of the payment received by him as consists of such royalties falls to be treated under Article 12. Where, however, the copyright in a sound recording, because of either the relevant copyright law or the terms of contract, belongs to a person with whom the artist has

contractually agreed to provide his services (*i.e.* a musical performance during the recording), or to a third party, the payments made under such a contract fall under Articles 7 (*e.g.* if the performance takes place outside the State of source of the payment) or 17 rather than under this article, even if these payments are contingent on the sale of the recordings.

(Amended on 28 January 2003; see HISTORY)

19. It is further pointed out that variable or fixed payments for the working of mineral deposits, sources or other natural resources are governed by Article 6 and do not, therefore, fall within the present Article.

(Renumbered and amended on 23 July 1992; see HISTORY)

Paragraph 3

20. Certain States consider that dividends, interest and royalties arising from sources in their territory and payable to individuals or legal persons who are residents of other States fall outside the scope of the arrangement made to prevent them from being taxed both in the State of source and in the State of the beneficiary's residence when the beneficiary has a permanent establishment in the former State. Paragraph 3 is not based on such a conception which is sometimes referred to as "the force of attraction of the permanent establishment". It does not stipulate that royalties arising to a resident of a Contracting State from a source situated in the other State must, by a kind of legal presumption, or fiction even, be related to a permanent establishment which that resident may have in the latter State, so that the said State would not be obliged to limit its taxation in such a case. The paragraph merely provides that in the State of source the royalties are taxable as part of the profits of the permanent establishment there owned by the beneficiary which is a resident of the other State, if they are paid in respect of rights or property forming part of the assets of the permanent establishment or otherwise effectively connected with that establishment. In that case, paragraph 3 relieves the State of source of the royalties from any limitations under the Article. The foregoing explanations accord with those in the Commentary on Article 7.

(Renumbered on 23 July 1992; see HISTORY)

21. It has been suggested that the paragraph could give rise to abuses through the transfer of rights or property to permanent establishments set up solely for that purpose in countries that offer preferential treatment to royalty income. Apart from the fact that such abusive transactions might trigger the application of domestic anti-abuse rules, it must be recognised that a particular location can only constitute a permanent establishment if a business is carried on therein and, as explained below, that the requirement

that a right or property be "effectively connected" to such a location requires more than merely recording the right or property in the books of the permanent establishment for accounting purposes.

(Amended on 22 July 2010; see HISTORY)

21.1 A right or property in respect of which royalties are paid will be effectively connected with a permanent establishment, and will therefore form part of its business assets, if the "economic" ownership of that right or property is allocated to that permanent establishment under the principles developed in the Committee's report entitled *Attribution of Profits to Permanent Establishments*[1] (see in particular paragraphs 72-97 of Part I of the report) for the purposes of the application of paragraph 2 of Article 7. In the context of that paragraph, the "economic" ownership of a right or property means the equivalent of ownership for income tax purposes by a separate enterprise, with the attendant benefits and burdens (*e.g.* the right to the royalties attributable to the ownership of the right or property, the right to any available depreciation and the potential exposure to gains or losses from the appreciation or depreciation of that right or property).

(Added on 22 July 2010; see HISTORY)

21.2 In the case of the permanent establishment of an enterprise carrying on insurance activities, the determination of whether a right or property is effectively connected with the permanent establishment shall be made by giving due regard to the guidance set forth in Part IV of the Committee's report with respect to whether the income on or gain from that right or property is taken into account in determining the permanent establishment's yield on the amount of investment assets attributed to it (see in particular paragraphs 165-170 of Part IV). That guidance being general in nature, tax authorities should consider applying a flexible and pragmatic approach which would take into account an enterprise's reasonable and consistent application of that guidance for purposes of identifying the specific assets that are effectively connected with the permanent establishment.

(Added on 22 July 2010; see HISTORY)

Paragraph 4

22. The purpose of this paragraph is to restrict the operation of the provisions concerning the taxation of royalties in cases where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the royalties paid exceeds the amount which would have been agreed upon by the payer and the

1 *Attribution of Profits to Permanent Establishments*, OECD, Paris, 2010.

beneficial owner had they stipulated at arm's length. It provides that in such a case the provisions of the Article apply only to that last-mentioned amount and that the excess part of the royalty shall remain taxable according to the laws of the two Contracting States due regard being had to the other provisions of the Convention. The paragraph permits only the adjustment of the amount of royalties and not the reclassification of the royalties in such a way as to give it a different character, *e.g.* a contribution to equity capital. For such an adjustment to be possible under paragraph 4 of Article 12 it would be necessary as a minimum to remove the limiting phrase "having regard to the use, right or information for which they are paid". If greater clarity of intent is felt appropriate, a phrase such as "for whatever reason" might be added after "exceeds".

(Amended on 28 January 2003; see HISTORY)

23. It is clear from the text that for this clause to apply the payment held excessive must be due to a special relationship between the payer and the beneficial owner or between both of them and some other person. There may be cited as examples cases where royalties are paid to an individual or legal person who directly or indirectly controls the payer, or who is directly or indirectly controlled by him or is subordinate to a group having common interest with him. These examples, moreover, are similar or analogous to the cases contemplated by Article 9.

(Renumbered on 23 July 1992; see HISTORY)

24. On the other hand, the concept of special relationship also covers relationship by blood or marriage and, in general, any community of interests as distinct from the legal relationship giving rise to the payment of the royalty.

(Renumbered on 23 July 1992; see HISTORY)

25. With regard to the taxation treatment to be applied to the excess part of the royalty, the exact nature of such excess will need to be ascertained according to the circumstances of each case, in order to determine the category of income in which it should be classified for the purpose of applying the provisions of the tax laws of the States concerned and the provisions of the Convention. If two Contracting States should have difficulty in determining the other provisions of the Convention applicable, as cases required, to the excess part of the royalties, there would be nothing to prevent them from introducing additional clarifications in the last sentence of paragraph 4, as long as they do not alter its general purport.

(Renumbered on 23 July 1992; see HISTORY)

26. Should the principles and rules of their respective laws oblige the two Contracting States to apply different Articles of the Convention for the

purpose of taxing the excess, it will be necessary to resort to the mutual agreement procedure provided by the Convention in order to resolve the difficulty.

(Renumbered on 23 July 1992; see HISTORY)

Observations on the Commentary

27. *Italy* and *Spain* do not adhere to the interpretation in paragraph 8.2. They hold the view that payments in consideration for the transfer of the ownership of an element referred to in the definition of royalties fall within the scope of this Article where less than the full ownership is transferred. Italy also takes that view with respect to paragraphs 15 and 16.

(Added on 17 July 2008; see HISTORY)

27.1 As regards paragraph 10.1, *Italy* considers that where contracts grant exclusive distribution rights of a product or a service together with other rights referred to in the definition of royalties, the part of the payment made, under these contracts, in consideration for the exclusive distribution rights of a product or a service may, depending on the circumstances, be covered by the Article.

(Added on 17 July 2008; see HISTORY)

28. *Mexico*, *Portugal* and *Spain* do not adhere to the interpretation in paragraphs 14, 14.4, 15, 16 and 17.1 to 17.4. Mexico, Portugal and Spain hold the view that payments relating to software fall within the scope of the Article where less than the full rights to software are transferred either if the payments are in consideration for the right to use a copyright on software for commercial exploitation (except payments for the right to distribute standardised software copies, not comprising the right neither to customise nor to reproduce them) or if they relate to software acquired for the business use of the purchaser, when, in this last case, the software is not absolutely standardised but somehow adapted to the purchaser.

(Amended on 17 July 2008; see HISTORY)

29. *Mexico* does not adhere to the interpretation in paragraph 8.2. Mexico holds the view that payments in consideration for the transfer of rights presented as an alienation (*e.g.* geographically limited or time limited rights) fall within the scope of this Article because less than the full rights inherent to an element of property referred to in the definition are transferred.

(Added on 17 July 2008; see HISTORY)

30. The *Slovak Republic* does not adhere to the interpretation in paragraphs 14, 15 and 17. The Slovak Republic holds the view that payments relating to software fall within the scope of the Article where less than the full

rights to software are transferred, either if the payments are in consideration for the right to use a copyright on software for commercial exploitation or if they relate to software acquired for the personal or business use of the purchaser when, in this last case, the software is not absolutely standardised but somehow adapted to the purchaser.

(Added on 28 January 2003; see HISTORY)

31. *Greece* does not adhere to the interpretation in paragraphs 14 and 15 above. Greece takes the view that payments related to software fall within the scope of this Article, whether the payments are in consideration for the use of (or the right to use) software for commercial exploitation or for the personal or business use of the purchaser.

(Replaced on 21 September 1995; see HISTORY)

31.1 With respect to paragraph 14, *Korea* is of the opinion that the paragraph may neglect the fact that know-how can be transferred in the form of computer software. Therefore, Korea considers know-how imparted by non-residents through software or computer program to be treated in accordance with Article 12.

(Added on 23 October 1997; see HISTORY)

31.2 *Italy* does not agree that the interpretation in paragraph 14.4 will apply in all cases. It will examine each case taking into account all circumstances, including the rights granted in relation to the acts of distribution.

(Added on 17 July 2008; see HISTORY)

Reservations on the Article

Paragraph 1

32. Concerning paragraph 9.1, *Germany* reserves its position on whether and under which circumstances payments made for the acquisition of the right of disposal over the transport capacity of pipelines or the capacity of technical installations, lines or cables for the transmission of electrical power or communications (including the distribution of radio and television programs) could be regarded as payments made for the leasing of industrial, commercial or scientific equipment.

(Added on 22 July 2010; see HISTORY)

32.1 *Greece* reserves the right to include the payments referred to in paragraphs 9.1, 9.2 and 9.3 in the definition of royalties.

(Added on 22 July 2010; see HISTORY)

33. *Greece* is unable to accept a provision which would preclude it, in bilateral conventions for the avoidance of double taxation, from stipulating a clause conferring on it the right to tax royalties at a rate of up to 10 per cent.

(Amended on 23 October 1997; see HISTORY)

34. The *Czech Republic* reserves the right to tax at a rate of 10 per cent royalties that, under Czech law, have a source in the Czech Republic. The Czech Republic also reserves the right to subject payments for the use of, or the right to use, software rights to a tax regime different from that provided for copyrights.

(Added on 23 October 1997; see HISTORY)

35. *Canada* reserves its position on paragraph 1 and wishes to retain a 10 per cent rate of tax at source in its bilateral conventions. However, Canada would be prepared to provide an exemption from tax for copyright royalties in respect of cultural, dramatic, musical or artistic work, but not including royalties in respect of motion picture films and works on films or video tape or other means of reproduction for use in connection with television. Canada would also be prepared in most circumstances to provide an exemption for royalties in respect of computer software, patents and know-how.

(Amended on 29 April 2000; see HISTORY)

36. *Australia*, *Chile, Korea*, *Mexico*, *New Zealand*, *Poland*, *Portugal*, the *Slovak Republic*, *Slovenia* and *Turkey* reserve the right to tax royalties at source.

(Amended on 22 July 2010; see HISTORY)

37. *Italy* reserves the right to tax royalties at source, but is prepared to grant favourable treatment to certain royalties (*e.g.* copyright royalties). Italy also reserves the right to subject the use of, or the right to use, software rights to a tax regime different from that provided for copyright.

(Renumbered on 21 September 1995; see HISTORY)

Paragraph 2

38. *(Deleted on 15 July 2005; see HISTORY)*

39. *Australia* reserves the right to amend the definition of royalties to include payments or credits which are treated as royalties under its domestic law.

(Replaced on 15 July 2005; see HISTORY)

40. *Canada*, *Chile*, the *Czech Republic*, *Hungary*, *Korea* and the *Slovak Republic* reserve the right to add the words “for the use of, or the right to use, industrial, commercial or scientific equipment” to paragraph 2.

(Amended on 22 July 2010; see HISTORY)

41. *Greece*, *Italy* and *Mexico* reserve the right to continue to include income derived from the leasing of industrial, commercial or scientific equipment and of containers in the definition of "royalties" as provided for in paragraph 2 of Article 12 of the 1977 Model Convention.

(Amended on 17 July 2008; see HISTORY)

41.1 *Poland* reserves the right to include in the definition of "royalties" income derived from the use of, or the right to use, industrial, commercial or scientific equipment and containers.

(Added on 17 July 2008; see HISTORY)

42. *New Zealand* reserves the right to tax at source payments from the leasing of industrial, commercial or scientific equipment and of containers.

(Renumbered on 21 September 1995; see HISTORY)

43. *(Deleted on 17 July 2008; see HISTORY)*

43.1 *Portugal* reserves the right to tax at source as royalties income from the leasing of industrial, commercial or scientific equipment and of containers, as well as income arising from technical assistance in connection with the use of, or the right to use, such equipment and containers.

(Added on 28 January 2003; see HISTORY)

44. *Portugal* reserves the right to tax at source as royalties income arising from technical assistance in connection with the use of, or right to use, rights or information of the type referred to in paragraph 2 of the Article.

(Amended on 22 July 2010; see HISTORY)

45. *Spain* reserves its right to continue to adhere in its conventions to a definition of royalties which includes income from the leasing of industrial, commercial or scientific equipment and of containers.

(Renumbered on 21 September 1995; see HISTORY)

46. *Turkey* reserves the right to tax at source income from the leasing of industrial, commercial or scientific equipment.

(Renumbered on 21 September 1995; see HISTORY)

46.1 *Mexico* and the *United States* reserve the right to treat as a royalty a gain derived from the alienation of a property described in paragraph 2 of the Article, provided that the gain is contingent on the productivity, use or disposition of the property.

(Amended on 28 January 2003; see HISTORY)

46.2 *Greece* does not adhere to the interpretation in the sixth dash of paragraph 11.4 and takes the view that all concerning payments are falling within the scope of the Article.

(Amended on 17 July 2008; see HISTORY)

46.3 *Greece* does not adhere to the interpretation in paragraphs 17.2 and 17.3 because the payments related to downloading of computer software ought to be considered as royalties even if those products are acquired for the personal or business use of the purchaser.

(Added on 28 January 2003; see HISTORY)

47. *(Deleted on 22 July 2010; see HISTORY)*

Other reservations

48. *Australia*, *Belgium*, *Canada*, *Chile*, the *Czech Republic*, *France*, *Mexico*, the *Slovak Republic* and *Slovenia* reserve the right, in order to fill what they consider as a gap in the Article, to propose a provision defining the source of royalties by analogy with the provisions of paragraph 5 of Article 11, which deals with the same problem in the case of interest.

(Amended on 22 July 2010; see HISTORY)

49. *Mexico* reserves the right to propose a provision considering that royalties will be deemed to arise in a Contracting State where such royalties relate to the use of, or the right to use, in that Contracting State, any property or right described in paragraph 2 of Article 12.

(Added on 15 July 2005; see HISTORY)

50. The *Slovak Republic* reserves the right to subject payments for the use of, or the right to use, software rights to a tax regime different from that provided for copyrights.

(Added on 17 July 2008; see HISTORY)

HISTORY

Title: Amended, by adding the word "THE" to the title of the Commentary on Article 12, when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the title read as follows:

"COMMENTARY ON ARTICLE 12 CONCERNING TAXATION OF ROYALTIES"

Paragraph 1: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1963 Draft Model Convention (adopted by the OECD Council on 30 July 1963) and until 29 April 2000, paragraph 1 read as follows:

"1. In principle, royalties in respect of licences to use patents and similar property and similar payments are income to the recipient from a letting. The letting may be granted in connection with an industrial or commercial enterprise (*e.g.* the use of literary copyright granted by a publisher) or an independent profession (*e.g.* use of a patent granted by the inventor) or quite independently of any activity of the grantor (*e.g.* use of a patent granted by the inventor's heirs)."

The heading immediately preceding paragraph 1 was deleted in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, the heading immediately preceding paragraph 1 read as follows:

"A. General Observations"

Paragraph 2: Amended on 23 July 1992, by replacing the reference to paragraph 5 of Article 24 paragraph with a reference to paragraph 4 of Article 24 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 2 read as follows:

"2. Certain countries do not allow royalties paid to be deducted for the purposes of the payer's tax unless the recipient also resides in the same State or is taxable in that State. Otherwise they forbid the deduction. The question whether the deduction should also be allowed in cases where the royalties are paid by a resident of a Contracting State to a resident of the other State, is dealt with in paragraph 5 of Article 24."

Paragraph 2 of the 1977 Model Convention corresponded to paragraph 9 of the 1963 Draft Convention. Paragraph 1 of the 1963 Draft Convention was deleted and paragraph 9 was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. The same time the heading preceding paragraph 9 was deleted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 9 and the heading preceding it read as follows:

"B. Deductibility of Royalties for the Purposes of the Payer's Tax

9. Certain countries do not allow royalties paid to be deducted for the purposes of the payer's tax unless the recipient also resides in the same State or is taxable in that State. Otherwise they forbid the deduction. The Fiscal Committee considers it desirable that the deduction in question should also be allowed in cases where the royalties are paid by a resident of a Contracting State to a resident of the other State, the case of fraud being, of course, reserved; it considers that the deduction should not be forbidden simply because the tax payable by the recipient of such royalties is not levied in the State of source in application of the proposed Article. Any other method of procedure might cancel out the beneficial effects of the measures taken to avoid double taxation."

Paragraph 2 of the 1963 Draft Convention, until it was deleted when the 1977 Model Convention was adopted, read as follows:

"2. The Model Conventions drawn up by the Fiscal Committee of the League of Nations in 1928 did not contain any specific rules about the taxation of such royalties and similar payments. These could thus only be taxed in the State in which the grantor resided, unless they were obtained in connection with a permanent establishment maintained by the grantor in the other State, the concept of "permanent establishment" including here a fixed place of business used for the performance of professional services."

Paragraph 3: Corresponds to paragraph 10 of the 1963 Draft Convention. Paragraph 3 of the 1963 Draft Convention was deleted and paragraph 10 and the preceding

headings were amended and renumbered as paragraph 3 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 10 and the preceding headings read as follows:

> "II. COMMENTARY ON THE DRAFT ARTICLE
>
> *Paragraph 1*
>
> 10. The first paragraph follows the Model Conventions drafted in London in 1946 by the Fiscal Committee of the League of Nations and the solutions adopted in many Conventions between O.E.C.D. Member countries, in adopting the principle of exclusive taxation of royalties in the State of the recipient's residence. The only exception to this principle is that made in the cases dealt with by paragraph 3."

Paragraph 3 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), until it was deleted when the 1977 Model Convention was adopted, read as follows:

> "3. The Model Convention drafted in Mexico in 1943 by the Fiscal Committee of the League of Nations does contain a special provision on the taxation of royalties and similar payments (Article X). In this Model Convention, a distinction was made between royalties and amounts received as a consideration for the right to use:
>
> *a)* a patent, a secret process or formula, a trade mark or other analogous right; and
>
> *b)* a musical, artistic, literary, scientific or other cultural work."

C (12)

Paragraph 4: Replaced on 28 January 2003. Paragraph 4 as it read before 28 January 2003 was amended and renumbered as paragraph 4.2 (see history of paragraph 4.2) and a new paragraph 4 was added by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 4.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 4.2: Corresponds to paragraph 4 as it read before 28 January 2003. On 28 January 2003 paragraph 4 was amended and renumbered paragraph 4.2 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 23 October 1997 and until 28 January 2003, paragraph 4 read as follows:

> "4. Under paragraph 1, the exemption from tax in the State of source is not available when an intermediary, such as an agent or nominee, is interposed between the beneficiary and the payer, unless the beneficial owner is a resident of the other Contracting State (the text of the Model was amended in 1995 to clarify this point, which has been the consistent position of all member countries). States which wish to make this more explicit are free to do so during bilateral negotiations."

Paragraph 4 was amended on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. In the 1977 Model Tax Convention and until 23 October 1997, paragraph 4 read as follows:

"4. Under paragraph 1, the exemption from tax in the State of source is not available when an intermediary, such as an agent or nominee, is interposed between the beneficiary and the payer, unless the beneficial owner is a resident of the other Contracting State. States which wish to make this more explicit are free to do so during bilateral negotiations. The term "paid" has a very wide meaning, since the concept of payment means the fulfilment of the obligation to put funds at the disposal of the creditor in the manner required by contract or by custom."

Paragraph 4 of the 1977 Model Convention (adopted by the OECD Council on 11 April 1977), replaced paragraph 4 of the 1963 Draft Convention. Paragraph 4 of the 1963 Draft Convention was deleted and a new paragraph 4 was added when the 1977 Model Convention was adopted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 read as follows:

"4. In case *a*), the royalties and other payments were only taxable in the State where the right or property was used. In case *b*), the right to tax rested solely with the State of which the grantor — in this case the grantor of the work — was a resident, unless the royalties were obtained in connection with a permanent establishment maintained by the grantor in the other State, the concept of "permanent establishment" here again including a fixed place of business used for the performance of professional services."

Paragraph 5: Amended on 17 July 2008, by replacing the cross-reference to "paragraph 53 of the Commentary on Article 24" with "paragraph 71 of the Commentary on Article 24", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 23 October 1997 and until 17 July 2008, paragraph 5 read as follows:

"5. The Article deals only with royalties arising in a Contracting State and beneficially owned by a resident of the other Contracting State. It does not, therefore, apply to royalties arising in a third State as well as to royalties arising in a Contracting State which are attributable to a permanent establishment which an enterprise of that State has in the other Contracting State (for these cases see paragraphs 4 to 6 of the Commentary on Article 21). Procedural questions are not dealt with in this Article. Each State should be able to apply the procedure provided in its own law. Specific questions arise with triangular cases (see paragraph 53 of the Commentary on Article 24)."

Paragraph 5 was previously amended on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, paragraph 5 read as follows:

"5. The Article deals only with royalties arising in a Contracting State and paid to a resident of the other Contracting State. It does not, therefore, apply to royalties arising in a third State as well as to royalties arising in a Contracting State which are attributable to a permanent establishment which an enterprise of that State has in the other Contracting State (for these cases see paragraphs 4 to 6 of the Commentary on Article 21). Procedural questions are not dealt with in this Article. Each State should be able to apply the procedure provided in its own law. Specific questions arise with triangular cases (see paragraph 53 of the Commentary on Article 24)."

Paragraph 5 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 60 of another report entitled "Triangular Cases" (adopted by the OECD Council on 23 July 1992). In the 1977 Model Convention and until 23 July 1992, paragraph 5 read as follows:

"5. The Article deals only with royalties arising in a Contracting State and paid to a resident of the other Contracting State. It does not, therefore, apply to royalties arising in a third State as well as to royalties arising in a Contracting State which are attributable to a permanent establishment which an enterprise of that State has in the other Contracting State (for these cases see paragraphs 4 to 6 of the Commentary on Article 21)."

Paragraph 5 of the 1977 Model Convention replaced paragraph 5 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 5 read as follows:

"5. On this question of the taxation of patent royalties and similar payments, the Model Convention drafted in London in 1946 by the Fiscal Committee of the League of Nations shows the following departure from the Mexico text:

a) as regards both the rights mentioned in paragraph 3(*a*) and those mentioned in paragraph 3(*b*), the right to tax always rests with the State of residence of the grantor, and

b) where an enterprise of one of the Contracting States pays royalties to an enterprise of the other Contracting State and there is a particularly close economic connection between the two enterprises, then the royalties can be subjected to tax in the State where the rights in question are used."

Paragraph 6: Corresponded to paragraph 11 of the 1963 Draft Convention. Paragraph 6 of the 1963 Draft Convention was deleted and paragraph 11 was renumbered and amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 11 read as follows:

"11. Paragraph 1 does not state whether or not exemptions in the State of source must be conditional upon the royalties being subject to tax in the State of residence. This question can be determined either way by bilateral negotiations."

Paragraph 6 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), before it was deleted when the 1977 Model Convention was adopted, read as follows:

"6. A study of more recent Conventions has revealed that the principles in the London draft have been adopted by most O.E.C.D. Member countries:

a) the right to tax patent royalties and similar payments is conferred in principle, therefore, on the State of the grantor's residence;

b) where patent royalties and similar payments are derived in connection with a permanent establishment situated in one of the States and forming part of an industrial or commercial enterprise carried on in the other State by the grantor, or are derived in connection with professional services performed by the grantor in one of the States and the grantor is a resident of the other State, then they are treated in accordance with the rules applicable under the Convention to income from an industrial or commercial enterprise or to income from the performance of professional services, respectively."

Paragraph 7: Corresponds to paragraph 12 of the 1963 Draft Convention. Paragraph 7 of the 1963 Draft Convention was deleted and paragraph 12 was amended and renumbered when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 12 read as follows:

"12. Attention is drawn generally to the following case; the recipient of royalties arising in a Contracting State is a company resident in the other Contracting State; all or part of its capital is held by shareholders resident outside that other State; its practice is not to distribute its profits in the form of dividends; and it enjoys preferential taxation treatment ("private investment company", "base company"). The question may arise in the case of such a company whether it is justifiable to allow in the State of source the tax exemption which is provided by the Article. It may be appropriate, when bilateral negotiations are being conducted, to agree upon special exceptions to the taxing rule laid down in this Article, in order to define the treatment applicable to such companies."

Paragraph 7 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), before it was deleted when the 1977 Model Convention was adopted, read as follows:

"7. In addition to the rules in the London Model Convention drawn up by the League of Nations, more recent Conventions between O.E.C.D. Member countries contain special provisions regarding:

a) rents in respect of cinematograph films. In most Conventions, these are treated like patent royalties and other similar payments; in some cases, however, they are considered as industrial or commercial income;

b) payments for the use of scientific or industrial equipment. These are treated like patent royalties and the like;

c) royalties representing more than an adequate consideration. In this case, the royalty stipulated differs from the amount that would normally be agreed in the same circumstances, this being a device to prevent income from being taxed by a particular State. The State in which the rights are used has the right to tax so much of the royalty or other payment as exceeds an adequate consideration."

C (12)

Paragraph 8: Amended on 17 July 2008, by moving the fifth, penultimate and last sentences to paragraphs 8.1, 8.3 and 8.4 respectively, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 8 read as follows:

"8. Paragraph 2 contains a definition of the term "royalties". These relate, in general, to rights or property constituting the different forms of literary and artistic property, the elements of intellectual property specified in the text and information concerning industrial, commercial or scientific experience. The definition applies to payments for the use of, or the entitlement to use, rights of the kind mentioned, whether or not they have been, or are required to be, registered in a public register. The definition covers both payments made under a license and compensation which a person would be obliged to pay for fraudulently copying or infringing the right. The definition does not, however, apply to payments that, whilst based on the number of times a right belonging to someone is used, are made to someone else who does not himself own the right or the right to use it (see, for instance, paragraph 18 below). It should also be noted that the word "payment", used in the definition, has a very wide meaning since the concept of payment means the fulfilment of the obligation to put funds at the disposal of the creditor in the manner required by contract or by custom. As a guide, certain explanations are given below in order to define the scope of Article 12 in relation to that of other Articles of the Convention, as regards, in particular, the provision of information."

Paragraph 8 was previously amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on

28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 8 read as follows:

> "8. Paragraph 2 contains a definition of the term "royalties". These relate, in general, to rights or property constituting the different forms of literary and artistic property, the elements of intellectual property specified in the text and information concerning industrial, commercial or scientific experience. The definition applies to payments for the use of, or the entitlement to use, rights of the kind mentioned, whether or not they have been, or are required to be, registered in a public register. The definition covers both payments made under a licence and compensation which a person would be obliged to pay for fraudulently copying or infringing the right. It should also be noted that the word "payment", used in the definition, has a very wide meaning since the concept of payment means the fulfilment of the obligation to put funds at the disposal of the creditor in the manner required by contract or by custom. As a guide, certain explanations are given below in order to define the scope of Article 12 in relation to that of other Articles of the Convention, as regards, in particular, the provision of information."

Paragraph 8 was previously amended on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, paragraph 8 read as follows:

> "8. Paragraph 2 contains a definition of the term "royalties". These relate, in general, to rights or property constituting the different forms of literary and artistic property, the elements of intellectual property specified in the text and information concerning industrial, commercial or scientific experience. The definition applies to payments for the use of, or the entitlement to use, rights of the kind mentioned, whether or not they have been, or are required to be, registered in a public register. The definition covers both payments made under a licence and compensation which a person would be obliged to pay for fraudulently copying or infringing the right. As a guide, certain explanations are given below in order to define the scope of Article 12 in relation to that of other Articles of the Convention, as regards, in particular, the provision of information."

Paragraph 8 was previously amended on 23 July 1992, by deleting the words "equipment renting and" in the last line, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 8 read as follows:

> "8. Paragraph 2 contains a definition of the term "royalties". These relate, in general, to rights or property constituting the different forms of literary and artistic property, the elements of industrial and commercial property specified in the text and information concerning industrial, commercial or scientific experience. The definition applies to payments for the use of, or the entitlement to use, rights of the kind mentioned, whether or not they have been, or are required to be, registered in a public register. The definition covers both payments made under a licence and compensation which a person would be obliged to pay for fraudulently copying of infringing the right. As a guide, certain explanations are given below in order to define the scope of Article 12 in relation to that of other Articles of the Convention, as regards, in particular, equipment renting and the provision of information."

Paragraph 8 of the 1977 Model Convention corresponded to paragraphs 13, 14 and 15 of the 1963 Draft Convention. Paragraph 8 of the 1963 Draft Convention was deleted and paragraphs 13, 14 and 15 were amended and incorporated into paragraph 8 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time the heading preceding paragraph 13 was moved immediately before

paragraph 8. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraphs 13, 14 and 15 read as follows:

> "13. Paragraph 2 contains a definition of the term "royalties". These relate, in general, to rights or property constituting the different forms of literary and artistic property, the elements of industrial and commercial property specified in the text and information concerning industrial, commercial or scientific experience.
>
> 14. The definition applies to payments for the use of, or the entitlement to use, rights of the kind mentioned, whether or not they have been, or are required to be, registered in a public register.
>
> 15. The definition covers both payments made under a licence and compensation which a person would be obliged to pay for fraudulently copying or infringing the right."

Paragraph 8 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), before it was deleted when the 1977 Model Convention was adopted, read as follows:

> "8. In the light of the above considerations, the Fiscal Committee has prepared the Article on the direct taxation of patent royalties and similar payments."

Paragraph 8.1: Corresponds to the fifth sentence of paragraph 8 as it read before 17 July 2008. Paragraph 8.1 was renumbered as paragraph 8.5 (see history of paragraph 8.5) and the fifth sentence of paragraph 8 replaced paragraph 8.1 (see history of paragraph 8) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.2: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.3: Corresponds to the penultimate sentence of paragraph 8 as it read before 17 July 2008. The penultimate sentence of paragraph 8 was amended incorporated into a new paragraph 8.3 (see history of paragraph 8) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.4: Corresponds to the last sentence of paragraph 8 as it read before 17 July 2008. The last sentence of paragraph 8 was incorporated into a new paragraph 8.4 (see history of paragraph 8) by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.5: Corresponds to paragraph 8.1 as it read before 17 July 2008. Paragraph 8.1 was renumbered as paragraph 8.5 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 8.1 was added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 9: Replaced paragraph 9 of the 1977 Model Convention. On 23 July 1992, paragraph 9 of the 1977 Model Convention was deleted and a new paragraph 9 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of two previous reports entitled "The Taxation of Income Derived from the Leasing of Industrial, Commercial or Scientific Equipment" (adopted by the OECD Council on 13 September 1983) and "The Taxation of Income Derived from the Leasing of Containers" (adopted by the OECD Council on 13 September 1983). In the 1977 Model Convention and until 23 July 1992, paragraph 9 read as follows:

> "9. A clear distinction must be made between royalties paid for the use of equipment, which fall under Article 12, and payments constituting consideration

for the sale of equipment, which may, depending on the case, fall under Articles 7, 13, 14 or 21. Some contracts combine the hire element and the sale element, so that it sometimes proves difficult to determine their true legal import. In the case of credit sale agreements and hire purchase agreements, it seems clear that the sale element is the paramount use, because the parties have from the outset agreed that the ownership of the property in question shall be transferred from one to the other, although they have made this dependent upon the payment of the last instalment. Consequently, the instalments paid by the purchaser/hirer do not, in principle, constitute royalties. In the case, however, of lend-lease, and of leasing in particular, the sole, or at least the principal, purpose of the contract is normally that of hire, even if the hirer has the right thereunder to opt during its term to purchase the equipment in question outright. Article 12 therefore applies in the normal case to the rentals paid by the hirer, including all rentals paid by him up to the date he exercises any right to purchase."

Paragraph 9 of the 1977 Model Convention (adopted by the OECD Council on 11 April 1977), replaced paragraph 9 of the 1963 Draft Convention, which was amended and renumbered as paragraph 2 (see history of paragraph 2) and a new paragraph 9 was added when the 1977 Model Convention was adopted.

Paragraph 9.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 9.2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 9.3: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 10: Amended on 29 April 2000, by replacing the words "industrial and commercial" with the word "business", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 10 read as follows:

"10. Rents in respect of cinematograph films are also treated as royalties, whether such films are exhibited in cinemas or on the television. It may, however, be agreed through bilateral negotiations that rents in respect of cinematograph films shall be treated as industrial and commercial profits and, in consequence, subjected to the provisions of Articles 7 and 9."

Paragraph 10 of the 1977 Model Convention corresponded to paragraphs 16 and 17 of the 1963 Draft Convention. Paragraph 10 of the 1963 Draft Convention was amended and renumbered as paragraph 3 (see history of paragraph 3) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraphs 16 and 17 of the 1963 Draft Convention were amended and renumbered and incorporated into paragraph 10 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraphs 16 and 17 read as follows:

"16. In accordance with the prevailing practice in the Convention between O.E.C.D. Member countries, rents in respect of cinematograph films are also treated as royalties, whether such films are exhibited in Cinemas or on the television.

17. It may, however, be agreed through bilateral negotiations that rents in respect of cinematograph films shall be treated as industrial and commercial profits and, in consequence, subjected to the provisions of Articles 5, 7 and 9."

Paragraph 10.1: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 10.2: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 11: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 11 read as follows:

> "11. In classifying as royalties payments received as consideration for information concerning industrial, commercial or scientific experience, paragraph 2 alludes to the concept of "know-how". Various specialist bodies and authors have formulated definitions of know-how which do not differ intrinsically. One such definition, given by the *"Association des Bureaux pour la Protection de la Propriété Industrielle"* (ANBPPI), states that "know-how is all the undivulged technical information, whether capable of being patented or not, that is necessary for the industrial reproduction of a product or process, directly and under the same conditions; inasmuch as it is derived from experience, know-how represents what a manufacturer cannot know from mere examination of the product and mere knowledge of the progress of technique"."

Paragraph 11 was previously amended on 28 January 2003, by deleting the fourth and subsequent sentences, which were amended and incorporated into new paragraphs 11.1, 11.2, 11.4 and 11.6, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Treaty Characterisation Issues Arising from E-Commerce" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). After 29 April 2000 and until 28 January 2003, paragraph 11 read as follows:

> "11. In classifying as royalties payments received as consideration for information concerning industrial, commercial or scientific experience, paragraph 2 alludes to the concept of "know-how". Various specialist bodies and authors have formulated definitions of know-how which do not differ intrinsically. One such definition, given by the *"Association des Bureaux pour la Protection de la Propriété Industrielle"* (ANBPPI), states that "know-how is all the undivulged technical information, whether capable of being patented or not, that is necessary for the industrial reproduction of a product or process, directly and under the same conditions; inasmuch as it is derived from experience, know-how represents what a manufacturer cannot know from mere examination of the product and mere knowledge of the progress of technique." In the know-how contract, one of the parties agrees to impart to the other, so that he can use them for his own account, his special knowledge and experience which remain unrevealed to the public. It is recognised that the grantor is not required to play any part himself in the application of the formulas granted to the licensee and that he does not guarantee the result thereof. This type of contract thus differs from contracts for the provision of services, in which one of the parties undertakes to use the customary skills of his calling to execute work himself for the other party. Thus, payments obtained as consideration for after-sales service, for services rendered by a seller to the purchaser under a guarantee, for pure technical assistance, or for an opinion given by an engineer, an advocate or an accountant, do not constitute royalties within the meaning of paragraph 2. Such payments generally fall under Article 7. In business practice, contracts are encountered which cover both know-how and the provision of technical assistance. One example, amongst others, of contracts of this kind is that of franchising, where the franchisor imparts his knowledge and experience to the franchisee and, in addition, provides him with varied technical assistance, which, in certain cases, is backed up with financial assistance and the supply of goods. The appropriate course to take with a mixed contract is, in

principle, to break down, on the basis of the information contained in the contract or by means of a reasonable apportionment, the whole amount of the stipulated consideration according to the various parts of what is being provided under the contract, and then to apply to each part of it so determined the taxation treatment proper thereto. If, however, one part of what is being provided constitutes by far the principal purpose of the contract and the other parts stipulated therein are only of an ancillary and largely unimportant character, then it seems possible to apply to the whole amount of the consideration the treatment applicable to the principal part."

Paragraph 11 was previously amended on 29 April 2000, by deleting the words "or Article 14", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 11 read as follows:

"11. In classifying as royalties payments received as consideration for information concerning industrial, commercial or scientific experience, paragraph 2 alludes to the concept of "know-how". Various specialist bodies and authors have formulated definitions of know-how which do not differ intrinsically. One such definition, given by the "*Association des Bureaux pour la Protection de la Propriété Industrielle*" (ANBPPI), states that "know-how is all the undivulged technical information, whether capable of being patented or not, that is necessary for the industrial reproduction of a product or process, directly and under the same conditions; inasmuch as it is derived from experience, know-how represents what a manufacturer cannot know from mere examination of the product and mere knowledge of the progress of technique." In the know-how contract, one of the parties agrees to impart to the other, so that he can use them for his own account, his special knowledge and experience which remain unrevealed to the public. It is recognised that the grantor is not required to play any part himself in the application of the formulas granted to the licensee and that he does not guarantee the result thereof. This type of contract thus differs from contracts for the provision of services, in which one of the parties undertakes to use the customary skills of his calling to execute work himself for the other party. Thus, payments obtained as consideration for after-sales service, for services rendered by a seller to the purchaser under a guarantee, for pure technical assistance, or for an opinion given by an engineer, an advocate or an accountant, do not constitute royalties within the meaning of paragraph 2. Such payments generally fall under Article 7 or Article 14. In business practice, contracts are encountered which cover both know-how and the provision of technical assistance. One example, amongst others, of contracts of this kind is that of franchising, where the franchisor imparts his knowledge and experience to the franchisee and, in addition, provides him with varied technical assistance, which, in certain cases, is backed up with financial assistance and the supply of goods. The appropriate course to take with a mixed contract is, in principle, to break down, on the basis of the information contained in the contract or by means of a reasonable apportionment, the whole amount of the stipulated consideration according to the various parts of what is being provided under the contract, and then to apply to each part of it so determined the taxation treatment proper thereto. If, however, one part of what is being provided constitutes by far the principal purpose of the contract and the other parts stipulated therein are only of an ancillary and largely unimportant character, then it seems possible to apply to the whole amount of the consideration the treatment applicable to the principal part."

Paragraph 11, as it read after on 23 July 1992, corresponded to paragraph 12 of the 1977 Model Convention. On 23 July 1992, paragraph 11 of the 1977 Model Convention was deleted and paragraph 12 was renumbered as paragraph 11 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 12 of the 1977 Model Convention was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 12 of the 1963 Draft Convention, was amended and renumbered as paragraph 7 (see history of paragraph 7) and a new paragraph 12 was added when the 1977 Model Convention was adopted.

Paragraph 11 of the 1977 Model Convention and until it was deleted on 23 July 1992, read as follows:

> "11. The rules set out above in regard to rents in respect of cinematograph films could also be applied in regard to rentals derived by a shipping enterprise from the hire of its containers for the conveyance of goods on land after leaving the ship. It is considered, however, that where the hire of the containers is a supplementary or incidental activity of a transport company, the income should be treated as profits falling under Article 8."

Paragraph 11 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 11 of the 1963 Draft Convention, was amended and renumbered as paragraph 6 (see history of paragraph 6) and a new paragraph 11 was added when the 1977 Model Convention was adopted.

Paragraph 11.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Treaty Characterisation Issues Arising from E-Commerce" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). New paragraph 11.1 corresponds to the fourth and fifth sentences of paragraph 11 as they read before 28 January 2003 (see history of paragraph 11).

Paragraph 11.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Treaty Characterisation Issues Arising from E-Commerce" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). New paragraph 11.2 corresponds to the sixth and eighth sentences of paragraph 11 as they read before 28 January 2003 (see history of paragraph 11).

Paragraph 11.3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Treaty Characterisation Issues Arising from E-Commerce" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 11.4: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 11.4 read as follows:

> "11.4 Examples of payments which should therefore not be considered to be received as consideration for the provision of know-how but, rather, for the provision of services, include:
>
> — payments obtained as consideration for after-sales service,
>
> — payments for services rendered by a seller to the purchaser under a guarantee,
>
> — payments for pure technical assistance,
>
> — payments for an opinion given by an engineer, an advocate or an accountant, and

— payments for advice provided electronically, for electronic communications with technicians or for accessing, through computer networks, a trouble-shooting database such as a database that provides users of software with non-confidential information in response to frequently asked questions or common problems that arise frequently."

Paragraph 11.4 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Treaty Characterisation Issues Arising from E-Commerce" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). New paragraph 11.4 includes examples previously included in the seventh sentence of paragraph 11 as it read before 28 January 2003 (see history of paragraph 11).

Paragraph 11.5: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Treaty Characterisation Issues Arising from E-Commerce" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 11.6: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Treaty Characterisation Issues Arising from E-Commerce" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002). New paragraph 11.6 includes most of the text of the last four sentences of paragraph 11 as they read before 28 January 2003 (see history of paragraph 11).

Paragraph 12: Amended on 29 April 2000, by moving all but the first sentence of paragraph 12 into new paragraphs 12.1 and 12.2 and adding three new sentences after the first sentence, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 12 read as follows:

"12. Whether payments received as consideration for computer software may be classified as royalties poses difficult problems but is a matter of considerable importance in view of the rapid development of computer technology in recent years and the extent of transfers of such technology across national borders. Software may be described as a programme, or series of programmes, containing instructions for a computer required either for the operational processes of the computer itself (operational software) or for the accomplishment of other tasks (application software). It can be transferred through a variety of media, for example in writing, on a magnetic tape or disc, or on a laser disc. It may be standardised with a wide range of applications or be tailor-made for single users. It can be transferred as an integral part of computer hardware or in an independent form available for use on a variety of hardware. The rights in computer software are a form of intellectual property. Research into the practices of OECD member countries has established that all but one protect software rights either explicitly or implicitly under copyright law. Transfers of rights occur in many different ways ranging from the alienation of the entire rights to the sale of a product which is subject to restrictions on the use to which it is put. The consideration paid can also take numerous forms. These factors may make it difficult to determine where the boundary lies between software payments that are properly to be regarded as royalties and other types of payment."

Paragraph 12 of the 1977 Model Convention was replaced on 23 July 1992. Paragraph 12 of the 1977 Model Convention was renumbered as paragraph 11 (see history of paragraph 11) and a new paragraph 12 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Appendix 3 to the Report entitled "The Tax Treatment of Software", adopted by the OECD Council on 23 July 1992.

Paragraph 12.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. Paragraph 12.1 corresponds, with minor amendment, to the second to fifth sentences of paragraph 12 as they read before 29 April 2000 (see history of paragraph 12).

Paragraph 12.2: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. Paragraph 12.2 includes the sixth to tenth sentences of paragraph 12 as they read and until 29 April 2000 (see history of paragraph 12).

Paragraph 13: Replaced paragraph 13 as it read before 29 April 2000. The first five sentences of paragraph 13 were deleted and the remaining sentences of paragraph 13 were incorporated into a new paragraph 13.1 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 13 read as follows:

> "13. Three situations are considered. The first is of payments made where less than the full rights in software are transferred. In a partial transfer of rights the consideration is likely to represent a royalty only in very limited circumstances. One such case is where the transferor is the author of the software (or has acquired from the author his rights of distribution and reproduction) and he has placed part of his rights at the disposal of a third party to enable the latter to develop or exploit the software itself commercially, for example by development and distribution of it. It should be noted that even where a software payment is properly to be regarded as a royalty there are difficulties in applying the copyright provisions of the Article to software royalties since paragraph 2 requires that software should be classified as a literary, artistic or scientific work. None of these categories seems entirely apt but treatment as a scientific work might be the most realistic approach. Countries for which it is not possible to attach software to any of those categories might be justified in adopting in their bilateral treaties an amended version of paragraph 2 which either omits all references to the nature of copyrights or refers specifically to software."

Paragraph 13, as it read after 23 July 1992, replaced paragraph 13 of the 1977 Model Convention. Paragraph 13 of the 1977 Model Convention was renumbered as paragraph 18 (see history of paragraph 18) and a new paragraph 13 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Appendix 3 to the Report entitled "The Tax Treatment of Software", adopted by the OECD Council on 23 July 1992.

Paragraph 13.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. Paragraph 13.1 includes, with minor amendment, the fifth, sixth and seventh sentence of paragraph 13 (see history of paragraph 13) as they read after 23 July 1992 and until 29 April 2000.

Paragraph 14: Replaced on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 14 read as follows:

> "14. In other cases, the acquisition of the software will generally be for the personal or business use of the purchaser. The payment will then fall to be dealt with as commercial income in accordance with Articles 7 or 14. It is of no relevance that the software is protected by copyright or that there may be restrictions on the use to which the purchaser can put it."

Paragraph 14, as it read after 23 July 1992, replaced paragraph 14 of the 1977 Model Convention. On 23 July 1992 paragraph 14 of the 1977 Model Convention was amended and renumbered as paragraph 19 (see history of paragraph 19) and a new

paragraph 14 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Appendix 3 to the Report entitled "The Tax Treatment of Software", adopted by the OECD Council on 23 July 1992.

Paragraph 14.1: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 14.2: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 14.3: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 14.4: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 15: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 15 read as follows:

> "15. Where consideration is paid for the transfer of the full ownership of the rights in the copyright, the payment cannot represent a royalty and the provisions of the Article are not applicable. Difficulties can arise where there are extensive but partial alienation of rights involving:
>
> — exclusive right of use during a specific period or in a limited geographical area;
>
> — additional consideration related to usage;
>
> — consideration in the form of a substantial lump sum payment."

Paragraph 15 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 15 read as follows:

> "15. The second situation is where the payments are made as consideration for the alienation of rights attached to the software. It is clear that where consideration is paid for the transfer of the full ownership, the payment cannot represent a royalty and the provisions of the Article are not applicable. Difficulties can arise where there are extensive but partial alienation of rights involving:
>
> — exclusive right of use during a specific period or in a limited geographical area;
>
> — additional consideration related to usage;
>
> — consideration in the form of a substantial lump sum payment."

Paragraph 15, as it read after 23 July 1992, replaced paragraph 15 of the 1977 Model Convention. On 23 July 1992, paragraph 15 of the 1977 Model Convention was renumbered as paragraph 20 (see history of paragraph 20), the heading preceding paragraph 15 was moved with it and a new paragraph 15 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Appendix 3 to the Report entitled "The Tax Treatment of Software", adopted by the OECD Council on 23 July 1992.

Paragraph 16: Amended on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 29 April 2000 and until 17 July 2008, paragraph 16 read as follows:

"16. Each case will depend on its particular facts but in general such payments are likely to be commercial income within Article 7 or a capital gains matter within Article 13 rather than royalties within Article 12. That follows from the fact that where the ownership of rights has been alienated in full or in part, the consideration cannot be for the use of the rights. The essential character of the transaction as an alienation cannot be altered by the form of the consideration, the payment of the consideration in instalments or, in the view of most countries, by the fact that the payments are related to a contingency."

Paragraph 16 was previously amended on 29 April 2000, by deleting "or 14" in the second line, by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 16 read as follows:

"16. Each case will depend on its particular facts but in general such payments are likely to be commercial income within Article 7 or 14 or a capital gains matter within Article 13 rather than royalties within Article 12. That follows from the fact that where the ownership of rights has been alienated in full or in part, the consideration cannot be for the use of the rights. The essential character of the transaction as an alienation cannot be altered by the form of the consideration, the payment of the consideration in installments or, in the view of most countries, by the fact that the payments are related to a contingency."

Paragraph 16, as it read after 23 July 1992, replaced paragraph 16 of the 1977 Model Convention. On 23 July 1992 paragraph 16 of the 1977 Model Convention was renumbered as paragraph 21 (see history of paragraph 21) and a new paragraph 16 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Appendix 3 to the Report entitled "The Tax Treatment of Software", adopted by the OECD Council on 23 July 1992.

Paragraph 17: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 17 read as follows:

"17. The third situation is where software payments are made under mixed contracts. Examples of such contracts include sales of computer hardware with built-in software and concessions of the right to use software combined with the provision of services. The methods set out in paragraph 11 above for dealing with similar problems in relation to patent royalties and know-how are equally applicable to computer software. Where necessary the total amount of the consideration payable under a contract should be broken down on the basis of the information contained in the contract or by means of a reasonable apportionment with the appropriate tax treatment being applied to each apportioned part."

Paragraph 17, as it read after 23 July 1992, replaced paragraph 17 of the 1977 Model Convention. On 23 July 1992, paragraph 17 of the 1977 Model Convention was renumbered as paragraph 22 (see history of paragraph 22), the heading preceding paragraph 17 was moved with it and a new paragraph 17 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Appendix 3 to the Report entitled "The Tax Treatment of Software", adopted by the OECD Council on 23 July 1992.

Paragraph 17.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Treaty Characterisation Issues Arising from E-Commerce" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 17.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Treaty Characterisation Issues Arising from

E-Commerce" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 17.3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Treaty Characterisation Issues Arising from E-Commerce" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 17.4: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Treaty Characterisation Issues Arising from E-Commerce" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 18: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 18 read as follows:

> "18. The suggestions made above regarding mixed contracts could also be applied in regard to certain performances by artists and, in particular, in regard to an orchestral concert given by a conductor or a recital given by a musician. The fee for the musical performance, together with that paid for any simultaneous radio broadcasting thereof, seems to fall to be treated under Article 17. Where, whether under the same contract or under a separate one, the musical performance is recorded and the artist has stipulated that he be paid royalties on the sale or public playing of the records, then so much of the payment received by him as consists of such royalties falls to be treated under Article 12."

Paragraph 18, as it read after 23 July 1992, corresponded to paragraph 13 of the 1977 Model Convention. On 23 July 1992, paragraph 18 of the 1977 Model Convention was renumbered as paragraph 23 (see history of paragraph 23) and paragraph 13 was renumbered as paragraph 18 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 13 of the 1963 Draft Convention was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 13 of the 1963 Draft Convention, was incorporated into paragraph 8 (see history of paragraph 8), the heading preceding paragraph 13 was moved with it and a new paragraph 13 was added when the 1977 Model Convention was adopted.

Paragraph 19: Corresponds to paragraph 14 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992, paragraph 19 of the 1977 Model Convention was renumbered as paragraph 24 (see history of paragraph 24) and paragraph 14 was renumbered as paragraph 19 and amended, by deleting the second sentence thereof as a consequence of the change to the definition of the term "royalties" in paragraph 2 of Article 12, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 14 read as follows:

> "14. It is further pointed out that variable or fixed payments for the working of mineral deposits, sources or other natural resources are governed by Article 6 and do not, therefore, fall within the present Article. If two Contracting States should have difficulty from the legal standpoint in applying this distinction in regard to consideration for the use of, or the right to use, equipment, they could add to the text of paragraph 2, after the words "industrial, commercial or scientific equipment", the words "not constituting immovable property referred to in Article 6"."

Paragraph 14 of the 1977 Model Convention corresponded to paragraph 18 of the 1963 Draft Convention. Paragraph 14 of the 1963 Draft Convention was incorporated into paragraph 8 (see history of paragraph 8) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 18 of the

1963 Draft Convention was amended and renumbered as paragraph 14 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 18 read as follows:

> "18. It is further pointed out that variable or fixed payments for the working of mineral deposits, sources or other natural resources are governed by Article 6 on the taxation of income from immovable property and do not, therefore, fall within the present Article."

Paragraph 20: Corresponds to paragraph 15 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 20 of the 1977 Model Convention was renumbered as paragraph 25 (see history of paragraph 25), paragraph 15 was renumbered as paragraph 20 and the heading preceding paragraph 15 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 15 of the 1977 Model Convention corresponded to paragraph 19 of the 1963 Draft Convention. Paragraph 15 of the 1963 Draft Convention was incorporated into paragraph 8 (see history of paragraph 8) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 19 of the 1963 Draft Convention was amended and renumbered as paragraph 15 of the 1977 Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 19 read as follows:

> "19. Certain States consider that dividends, interest and royalties arising from sources in their territory and payable to individuals or legal persons who are residents of other States fall outside the scope of the arrangement made to prevent them from being taxed both in the State of source and in the State of the recipient's residence when the recipient possesses a permanent establishment in the former State. Paragraph 3 of the Article is not based on such a conception which is sometimes referred to as "the force of attraction of the permanent establishment". It does not stipulate that royalties arising to a resident of a Contracting State from a source situated in the territory of the other State must, by a kind of legal presumption, or fiction even, be related to a permanent establishment which that resident may happen to possess in the latter State, so that the said State would not be obliged to limit its taxation in such a case. The paragraph merely provides that in the State of source the royalties are taxable as part of the profits of the permanent establishment there owned by the recipient residing in the other State, if they are paid in respect of rights or property forming part of the assets of the permanent establishment or otherwise effectively connected with that establishment. In that case, paragraph 3 relieves the State of source of the royalties from any limitations under the Article. The foregoing explanations accord with those in the Commentaries on Article 7 on the taxation of business profits."

Paragraph 21: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 21 read as follows:

> "21. It has been suggested that the paragraph could give rise to abuses through the transfer of rights or property to permanent establishments set up solely for that purpose in countries that offer preferential treatment to royalty income. Apart from the fact that such abusive transactions might trigger the application of domestic anti-abuse rules, it must be recognised that a particular location can only constitute a permanent establishment if a business is carried on therein and, also, that the requirement that a right or property be "effectively connected" to such a

> location requires that the right or property be genuinely connected to that business."

Paragraph 21 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003, on the basis of another report entitled "Issues Arising under Article 5 (Permanent Establishment) of the Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 7 November 2002).

Paragraph 21 was previously deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000, paragraph 21 read as follows:

> "21. The rules set out above also apply where the beneficiary of the royalties has in the other Contracting State, for the purpose of performing any of the kinds of independent personal services mentioned in Article 14, a fixed base with which the right or property in respect of which the royalties are paid is effectively connected."

C (12)

Paragraph 21 as it read after 23 July 1992 corresponded to paragraph 16 of the 1977 Model Convention. On 23 July 1992 paragraph 21 of the 1977 Model Convention was renumbered as paragraph 26 (see history of paragraph 26) and paragraph 16 was renumbered as paragraph 21 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 16 of the 1963 Draft Convention was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 16 of the 1963 Draft Convention, was incorporated into paragraph 10 (see history of paragraph 10) and a new paragraph 16 was added when the 1977 Model Convention was adopted.

Paragraph 21.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 21.2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 22: Amended on 28 January 2003, by adding the three sentences at the end of the paragraph, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 22 read as follows:

> "22. The purpose of this paragraph is to restrict the operation of the provisions concerning the taxation of royalties in cases where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the royalties paid exceeds the amount which would have been agreed upon by the payer and the beneficial owner had they stipulated at arm's length. It provides that in such a case the provisions of the Article apply only to that last-mentioned amount and that the excess part of the royalty shall remain taxable according to the laws of the two Contracting States due regard being had to the other provisions of the Convention."

Paragraph 22, as it read after 23 July 1992, corresponded to paragraph 17 of the 1977 Model Convention. On 23 July 1992, paragraph 22 of the 1977 Model Convention was deleted, the heading preceding paragraph 22 was moved immediately before paragraph 27, paragraph 17 was renumbered as paragraph 22 and the heading preceding paragraph 17 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 17 of the 1977 Model Convention corresponded to paragraph 20 of the 1963 Draft Convention. Paragraph 17 of the 1963 Draft Convention was incorporated into paragraph 10 (see history of paragraph 10) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 20 of the 1963 Draft Convention was amended and renumbered as paragraph 17 of the 1977 Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 20 read as follows:

> "20. The purpose of this paragraph is to restrict the operation of the provisions concerning the taxation of royalties in cases where, owing to a special relationship between the payer and the recipient or between both of them and some other person, the amount of the royalties paid exceeds the amount which would have been agreed upon by the payer and the recipient had they stipulated at arm's length. It provides that in such a case the provisions of the Article apply only to that last-mentioned amount and that the excess part of the royalty shall remain taxable according to the laws of the two Contracting States, due regard being had to the other provisions of the Convention."

In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 22 read as follows:

> "22. The observation made by *Portugal*, *Spain* and *Turkey* on the Commentary on Article 8 (see paragraph 28 of the Commentary thereon) applies also to paragraph 11 of the present Commentary for the leasing of containers."

Paragraph 22 was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 22 of the 1963 Draft Convention, was renumbered as paragraph 19 (see history of paragraph 24) and a new paragraph 22 and the heading preceding it were added when the 1977 Model Convention was adopted.

Paragraph 23: Corresponds to paragraph 18 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992, paragraph 23 of the 1977 Model Convention was renumbered as paragraph 31 (see history of paragraph 32), the headings preceding paragraph 23 were moved with it and paragraph 18 was renumbered as paragraph 23 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 18 of the 1977 Model Convention corresponded to paragraph 21 of the 1963 Draft Convention. Paragraph 18 of the 1963 Draft Convention was amended and renumbered as paragraph 14 (see history of paragraph 19) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 21 of the 1963 Draft Convention was amended and renumbered as paragraph 18 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 21 read as follows:

> "21. It is clear from the text that for this clause to apply the payment held excessive must be due to a special relationship between the payer and the recipient or between both of them and some other person. There may be cited as examples cases where royalties are paid to an individual or legal person who directly or indirectly controls the payer, or who is directly or indirectly controlled by him or is subordinate to a group having common interest with him. These examples, moreover, are similar or analogous to the cases contemplated by Article 9 on the taxation of associated enterprises."

Paragraph 24: Corresponds to paragraph 19 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992, paragraph 24 of the 1977 Model Convention was amended and renumbered as paragraph 32 (see history of paragraph 33) and

paragraph 19 was renumbered as paragraph 24 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 19 of the 1977 Model Convention corresponded to paragraph 22 of the 1963 Draft Convention. Paragraph 19 of the 1963 Draft Convention, was amended and renumbered as paragraph 15 (see history of paragraph 20) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 22 of the 1963 Draft Convention was renumbered as paragraph 19 of the 1977 Model Convention.

Paragraph 25: Corresponds to paragraph 20 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 25 of the 1977 Model Convention was amended and renumbered as paragraph 33 (see history of paragraph 35) and paragraph 20 was renumbered as paragraph 25 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 20 of the 1977 Model Convention corresponded to paragraph 23 of the 1963 Draft Convention. Paragraph 20 of the 1963 Draft Convention was amended and renumbered as paragraph 17 (see history of paragraph 22) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 23 of the 1963 Draft Convention was amended and renumbered as paragraph 20 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 23 read as follows:

> “23. With regard to the taxation treatment to be applied to the excess part of the royalty, the exact nature of such excess will need to be ascertained according to the circumstances of each case, in order to determine the category of income in which it should be classified for the purpose of applying the provisions of the tax laws of the States concerned and the provisions of the Convention for the avoidance of double taxation.”

Paragraph 26: Corresponds to paragraph 21 of the 1977 Model Convention as it read before 23 July 1992. On 23 July 1992 paragraph 26 of the 1977 Model Convention was deleted and paragraph 21 was renumbered as paragraph 26 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 21 of the 1977 Model Convention corresponded to paragraph 24 of the 1963 Draft Convention. Paragraph 21 of the 1963 Draft Convention was amended and renumbered as paragraph 18 (see history of paragraph 23) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 21 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 24 read as follows:

> “24. It goes without saying that should the principles and rules of their respective laws oblige the two Contracting States to apply different Articles of the Convention for the purpose of taxing the excess, it will be necessary to resort to the mutual agreement procedure provided by the Convention in order to resolve the difficulty.”

Paragraph 26 of the 1977 Model Convention, until it was deleted on 23 July 1992, read as follows:

> “26. *Finland* reserves the right to tax royalties at source. However, Finland would be prepared to provide an exemption from tax for copyright royalties in respect of any literary, artistic or scientific work.”

Paragraph 27: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008.

Paragraph 27 was deleted on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 27 read as follows:

> "27. *Canada* does not adhere to paragraphs 14 through 14.3. In Canada, payments by a user of computer software pursuant to a contract that requires that the source code or program be kept confidential, are payments for the use of a secret formula or process and thus are royalties within the meaning of paragraph 2 of the Article."

Paragraph 27 was amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 27 read as follows:

> "27. *Canada* does not adhere to paragraph 14. In Canada, payments by a user of computer software pursuant to a contract that requires that the source code or program be kept confidential, are payments for the use of a secret formula or process and thus are royalties within the meaning of paragraph 2 of the Article."

Paragraph 27, as it read after 23 July 1992, replaced paragraph 27 of the 1977 Model Convention. On 23 July 1992 paragraph 27 of the 1977 Model Convention was renumbered as paragraph 34 (see history of paragraph 34), the heading that previously preceded paragraph 22 was moved immediately before paragraph 27 and a new paragraph 27 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 27.1: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 28: Amended on 17 July 2008, by adding Portugal to the list of countries making the reservation together with other amendments, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 28 read as follows:

> "28. *Mexico* and *Spain* do not adhere to the interpretation in paragraphs 14, 15 and 17.1 to 17.4. Mexico and Spain hold the view that payments relating to software fall within the scope of the Article where less than the full rights to software are transferred either if the payments are in consideration for the right to use a copyright on software for commercial exploitation or if they relate to software acquired for the business use of the purchaser, when, in this last case, the software is not absolutely standardised but somehow adapted to the purchaser."

Paragraph 28 was previously amended on 15 July 2005, by adding Mexico as a country making the reservation, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 28 read as follows:

> "28. *Spain* does not adhere to the interpretation in paragraphs 14, 15 and 17.1 to 17.4. Spain holds the view that payments relating to software fall within the scope of the Article where less than the full rights to software are transferred either if the payments are in consideration for the right to use a copyright on software for commercial exploitation or if they relate to software acquired for the business use of the purchaser, when, in this last case, the software is not absolutely standardised but somehow adapted to the purchaser."

Paragraph 28 was previously amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 28 read as follows:

> "28. *Spain* does not adhere to the interpretation in paragraphs 14 and 15. Spain holds the view that payments relating to software fall within the scope of the Article where less than the full rights to software are transferred, either if the

payments are in consideration for the right to use a copyright on software for commercial exploitation or if they relate to software acquired for the personal or business use of the purchaser."

Paragraph 28 as it read after 23 July 1992 replaced paragraph 28 of the 1977 Model Convention. On 23 July 1992 paragraph 28 of the 1977 Model Convention was amended and renumbered as paragraph 35 (see history of paragraph 36) and a new paragraph 28 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 29: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 29 was deleted on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 29 read as follows:

"29. *Mexico* holds the view that payments relating to software fall within the scope of the Article where less than the full rights to software are transferred either if the payments are in consideration for the right to use a copyright on software for commercial exploitation or if they relate to software acquired for the business use of the purchaser."

Paragraph 29 as it read before 28 January 2003 was replaced by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 29 read as follows:

"29. The *United States* believes that in interpreting the definition of "royalties" in paragraph 2 of the Article, with respect to payments for software, it should be understood that where a payment for the acquisition of software for the personal or business use of the purchaser is measured by reference to the productivity or use of such software, the payment may represent a royalty under the Article."

Paragraph 29 of the 1977 Model Convention replaced paragraph 29 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 29 read as follows:

"29. *Turkey* cannot accept a rate of tax which is lower than 20 per cent."

Paragraph 30: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2002.

Paragraph 30 was previously deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 July 1992 and until 29 April 2000, paragraph 30 read as follows:

"30. In relation to paragraphs 13 and 14, *Australia* takes the view that payments made for the right to copy or adapt the software in a manner which would, without the permission of the copyright owner, constitute an infringement of copyright, are royalties."

Paragraph 30 of the 1977 Model Convention was replaced on 23 July 1992. Paragraph 30 of the 1977 Model Convention was amended and renumbered as paragraph 42 (see history of paragraph 47), the heading preceding paragraph 30 was moved with it and a new paragraph 30 was added by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 31: Replaced paragraph 31 as it read before 21 September 1995. Paragraph 31 was renumbered as paragraph 32 (see history of paragraph 32), the headings preceding paragraph 31 were moved with it and a new paragraph 31 was

added by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 31.1: Added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 31.2: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 32: Added on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010.

Paragraph 32 was deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 21 September 1995 and until 29 April 2000, paragraph 32 read as follows:

> "32. *Australia* reserves the right to tax royalties that, under Australian law, have a source in Australia."

Paragraph 32, as it read after 21 September 1995 corresponded to paragraph 31. On 21 September 1995 paragraph 32 was renumbered as paragraph 33 (see history of paragraph 33), paragraph 31 was renumbered as paragraph 32 and the headings preceding paragraph 31 were moved with it by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 31 as it read after 23 July 1992 corresponded to paragraph 23 of the 1977 Model Convention. On 23 July 1992 paragraph 31 of the 1977 Model Convention was renumbered as paragraph 43 (see history of paragraph 48), paragraph 23 was renumbered as paragraph 31 and the headings preceding paragraph 23 were moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 23 of the 1963 Draft Convention was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 23 of the 1963 Draft Convention, was renumbered as paragraph 20 (see history of paragraph 25) and a new paragraph 23 was added when the 1977 Model Convention was adopted. At the same time, the heading preceding paragraph 28 were moved immediately before paragraph 23.

Paragraph 32.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 33: Amended on 23 October 1997, by deleting Austria from the list of countries making the reservation, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 33 read as follows:

> "33. *Austria* and *Greece* are unable to accept a provision which would preclude them, in bilateral conventions for the avoidance of double taxation, from stipulating a clause conferring on them the right to tax royalties at a rate of up to 10 per cent."

Paragraph 33 as it read after 21 September 1995 corresponded to paragraph 32. On 21 September 1995 paragraph 33 was renumbered as paragraph 35 (see history of paragraph 35) and paragraph 32 was renumbered as paragraph 33, by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 32, as it read after 23 July 1992, corresponded to paragraph 24 of the 1977 Model Convention. On 23 July 1992, paragraph 24 was amended, by deleting Luxembourg from the list of countries making the reservation and renumbered as paragraph 32 by the report entitled "The Revision of the Model Convention", adopted

by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 24 read as follows:

"24. *Austria*, *Greece* and *Luxembourg* are unable to accept a provision which would preclude them, in bilateral conventions for the avoidance of double taxation, from stipulating a clause conferring on them the right to tax royalties at a rate of up to 10 per cent."

Paragraph 24 of the 1977 Model Convention corresponded to paragraphs 25 and 28 of the 1963 Draft Convention. Paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 21 (see history of paragraph 26) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraphs 25 and 28 of the 1963 Draft Convention were amended and renumbered as paragraph 24 of the 1977 Model Convention and the heading preceding paragraph 25 was deleted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraphs 25 and 28 and the heading preceding paragraph 25 read as follows:

"III. SPECIAL DEROGATION IN FAVOUR OF CERTAIN COUNTRIES.

25. The following Member countries, Greece, Luxembourg, Portugal and Spain consider that they are unable to relinquish all taxation at the source as regards royalties arising in their territories and paid to residents of another State. They are prepared, however, to limit their tax at the source on such royalties to a maximum of 5 per cent of the gross amount of the royalties.

28. Austria is unable to accept a provision which would preclude it, in bilateral Conventions for the avoidance of double taxation, from stipulating a clause conferring on it the right to tax royalties at a rate up to 10 per cent."

Paragraph 34: Added on 23 October 1997 by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997.

Paragraph 34 was previously deleted on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 34 read as follows:

"34. *France* reserves the right to retain some tax on royalties of French origin when flows of royalties between France and the other Contracting State are unbalanced to France's disadvantage."

Paragraph 34, as it read after 23 July 1992, corresponded to paragraph 27 of the 1977 Model Convention. On 23 July 1992, paragraph 27 of the 1977 Model Convention was renumbered as paragraph 34 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 27 of the 1977 Model Convention replaced paragraph 27 of the 1963 Draft Convention when the 1977 Model Convention was adopted on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until it was deleted when the 1977 Model Convention was adopted, paragraph 27 read as follows:

"27. Whenever use is made of the above derogation in a bilateral Convention, the Contracting States are recommended to model the special clause giving a limited right to tax to the State of source on the formulas employed in paragraphs 1 and 2 of the Article on the taxation of interest. In such a case it will also be necessary to define the State of source. For this purpose, the formula employed in paragraph 5 of the Article on the taxation of interest will serve as a model."

Paragraph 35: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on

29 April 2000. After 21 September 1995 and until 23 July 1992, paragraph 35 read as follows:

> "35. *Canada* reserves its position on paragraph 1 and wishes to retain a 10 per cent rate of tax at source in its bilateral conventions. However, Canada would be prepared to provide an exemption from tax for copyright royalties in respect of a cultural, dramatic, musical or artistic work, but not including royalties in respect of motion picture films and works on film or videotape or other means of reproduction for use in connection with television."

Paragraph 35, as it read after 21 September 1995, corresponded to paragraph 33. On 21 September 1995 paragraph 35 was amended and renumbered as paragraph 36 (see history of paragraph 36) and paragraph 33 was renumbered as paragraph 35, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 33, as it read after 23 July 1992, corresponded to paragraph 25 of the 1977 Model Convention. On 23 July 1992 paragraph 25 of the 1977 Model Convention was amended and renumbered as paragraph 33 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 25 read as follows:

> "25. *Canada* reserves its position on paragraph 1 and wishes to retain a 10 per cent rate of tax at source in its bilateral conventions. However, Canada would be prepared to provide an exemption from tax for copyright royalties in respect of any literary, dramatic, musical or artistic work, but not including royalties in respect of motion picture films, and films or video tapes for use in connection with television."

Paragraph 25 of the 1977 Model Convention corresponded to paragraph 30 of the 1963 Draft Convention. Paragraph 25 of the 1963 Draft Convention was amended and renumbered as paragraph 24 (see history of paragraph 33) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 30 of the 1963 Draft Convention was amended and renumbered as paragraph 25 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 30 read as follows:

> "30. Canada reserves its position on paragraphs 1 and 2 of this Article. However the Canadian authorities would be prepared to provide an exemption from tax for copyright royalties and other like payments made in respect of the production or reproduction of any literary, dramatic, musical or artistic work (but not including rents or royalties in respect of motion picture films, including films or video tapes for use in connection with television) derived from sources within one of the Contracting States by a resident of the other Contracting State."

Paragraph 36: Amended on 22 July 2010, by changing the list of countries making the reservation by adding Chile and Slovenia and deleting Japan and Spain, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 36 read as follows:

> "36. *Australia*, *Japan*, *Korea*, *Mexico*, *New Zealand*, *Poland*, *Portugal*, the *Slovak Republic*, *Spain* and *Turkey* reserve the right to tax royalties at source."

Paragraph 36 was previously amended on 28 January 2003, by adding the Slovak Republic to the list of countries making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 36 read as follows:

> “36. *Australia*, *Japan*, *Korea*, *Mexico*, *New Zealand*, *Poland*, *Portugal*, *Spain* and *Turkey* reserve the right to tax royalties at source.”

Paragraph 36 was previously amended on 29 April 2000, by adding Australia to the list of countries making the reservation, by the report entitled “The 2000 Update to the Model Tax Convention”, adopted by the OECD Committee on Fiscal Affairs on 29 April 2000. After 23 October 1997 and until 29 April 2000, paragraph 36 read as follows:

> “36. *Korea*, *Japan*, *Mexico*, *New Zealand*, *Poland*, *Portugal*, *Spain* and *Turkey* reserve the right to tax royalties at source.”

Paragraph 36 was previously amended on 23 October 1997, by adding Korea and Poland to the list of countries making the reservation, by the report entitled “The 1997 Update to the Model Tax Convention”, adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 36 read as follows:

> “36. *Japan*, *Mexico*, *New Zealand*, *Portugal*, *Spain* and *Turkey* reserve the right to tax royalties at source.”

Paragraph 36 as it read after 21 September 1995 corresponded to paragraph 35. On 21 September 1995 paragraph 36 was renumbered as paragraph 37 (see history of paragraph 37), paragraph 35 was renumbered as paragraph 36 and amended by adding Mexico to the list of countries making the reservation by the report entitled “The 1995 Update to the Model Tax Convention”, adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 35 read as follows:

> “35. *Japan*, *New Zealand*, *Portugal*, *Spain* and *Turkey* reserve the right to tax royalties at source.”

Paragraph 35 as it read after 23 July 1992 corresponded to paragraph 28 of the 1977 Model Convention. On 23 July 1992 paragraph 28 of the 1977 Model Convention was amended, by adding Turkey to the list of countries making the reservation, and renumbered as paragraph 35 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 28 read as follows:

> “28. *Japan*, *New Zealand*, *Portugal* and *Spain* reserve the right to tax royalties at source.”

Paragraph 28 of the 1963 Draft Convention was replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 28 of the 1963 Draft Convention, was amended and renumbered as paragraph 24 (see history of paragraph 33), the headings preceding paragraph 28 were moved immediately before paragraph 23 and a new paragraph 28 was added when the 1977 Model Convention was adopted.

Paragraph 37: Corresponds to paragraph 36 as it read after 21 September 1995. Paragraph 37 was renumbered as paragraph 38 (see history of paragraph 38) and paragraph 36 was renumbered as paragraph 37, by the report entitled “The 1995 Update to the Model Tax Convention”, adopted by the OECD Council on 21 September 1995.

Paragraph 36 was added on 23 July 1992 by the report entitled “The Revision of the Model Convention”, adopted by the OECD Council on 23 July 1992.

Paragraph 38: Deleted on 15 July 2005 by the report entitled “The 2005 Update to the Model Tax Convention”, adopted by the OECD Council on 15 July 2005. After 21 September 1995 and until 15 July 2005, paragraph 38 read as follows:

"38. *Greece* and *Mexico* reserve the right to exclude from the scope of this Article royalties arising from property or rights created or assigned mainly for the purpose of taking advantage of this Article and not for *bona fide* commercial reasons."

Paragraph 38 as it read after 21 September 1995 corresponded to paragraph 40. On 21 September 1995 paragraph 38 was renumbered as paragraph 44 (see history of paragraph 44), paragraph 40 was amended, by adding Mexico to the list of countries making the reservation, and renumbered as paragraph 38 and the heading preceding paragraph 39 was moved immediately before paragraph 38, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 40 read as follows:

"40. *Greece* reserves its right to exclude from the scope of this Article royalties arising from property or rights created or assigned mainly for the purpose of taking advantage of this Article and not for *bona fide* commercial reasons."

Paragraph 40 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 39: Replaced paragraph 39 as it read before 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 21 September 1995 and until 15 July 2005, paragraph 39 read as follows:

"39. *Australia* reserves the right to tax income derived from the leasing of industrial, commercial or scientific equipment and of containers as royalties under its double taxation agreements, where such income, under Australian law, has a source in Australia."

Paragraph 39 as it read after 21 September 1995 corresponded to paragraph 43 of the Commentary on Article 7. On 21 September 1995 paragraph 39 was renumbered as paragraph 40 (see history of paragraph 40) and paragraph 43 of the Commentary on Article 7 was renumbered as paragraph 39 of the Commentary on Article 12 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 43 of the Commentary on Article 7 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 28 of a previous report entitled "The Taxation of Income Derived from the Leasing of Industrial, Commercial or Scientific Equipment" (adopted by the OECD Council on 13 September 1983).

Paragraph 40: Amended on 22 July 2010, by adding Chile to the list of countries making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 40 read as follows:

"40. *Canada*, the *Czech Republic*, *Hungary*, *Korea* and the *Slovak Republic* reserve the right to add the words "for the use of, or the right to use, industrial, commercial or scientific equipment" to paragraph 2."

Paragraph 40 was previously amended on 17 July 2008, by deleting Poland from the list of countries making the reservation, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 40 read as follows:

"40. *Canada*, *the Czech Republic*, *Hungary*, *Korea*, *Poland* and the *Slovak Republic* reserve the right to add the words "for the use of, or the right to use, industrial, commercial or scientific equipment" to paragraph 2."

Paragraph 40 was previously amended on 28 January 2003, by adding the Slovak Republic to the list of countries making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 40 read as follows:

> "40. *Canada*, the *Czech Republic*, *Hungary*, *Korea and Poland* reserve the right to add the words "for the use of, or the right to use, industrial, commercial or scientific equipment" to paragraph 2."

Paragraph 40 was previously amended on 23 October 1997, by adding the Czech Republic, Hungary, Korea and Poland to the list of countries making the reservation, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 40 read as follows:

> "40. *Canada* reserves the right to add the words "for the use of, or the right to use, industrial, commercial or scientific equipment" to paragraph 2."

Paragraph 40 as it read after 21 September 1995 corresponded to paragraph 39. On 21 September 1995 paragraph 40 was amended and renumbered as paragraph 38 (see history of paragraph 38), paragraph 39 was renumbered as paragraph 40 and the heading preceding paragraph 39 was moved immediately before paragraph 38 by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 39 and the heading preceding it were added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 41: Amended on 17 July 2008, by deleting Poland from the list of countries making the reservation, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 41 read as follows:

> "41. *Greece*, *Italy*, *Poland* and *Mexico* reserve the right to continue to include income derived from the leasing of industrial, commercial or scientific equipment and of containers in the definition of "royalties" as provided for in paragraph 2 of Article 12 of the 1977 Model Convention."

Paragraph 41 was previously amended on 28 January 2003, by adding Poland to the list of countries making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 41 read as follows:

> "41. *Greece*, *Italy* and *Mexico* reserve the right to continue to include income derived from the leasing of industrial, commercial or scientific equipment and of containers in the definition of "royalties" as provided for in paragraph 2 of Article 12 of the 1977 Model Convention."

Paragraph 41 as it read after 21 September 1995 corresponded to paragraph 45 of the Commentary on Article 7 as it read before 21 September 1995. On 21 September 1995 paragraph 41 was renumbered as paragraph 45 (see history of paragraph 45) and paragraph 45 of the Commentary on Article 7 was renumbered as paragraph 41 of the Commentary on Article 12 and amended by adding Mexico to the list of countries making the reservation, by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 45 of the Commentary on Article 7 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis, in the case of Italy, of paragraph 30 of a previous report entitled "The Taxation of Income Derived from the Leasing of Industrial, Commercial

or Scientific Equipment" (adopted by the OECD Council on 13 September 1983) and of paragraph 48 of another report entitled "The Taxation of Income Derived from the Leasing of Containers" (also adopted by the OECD Council on 13 September 1983).

Paragraph 41.1: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

Paragraph 42: Corresponds to paragraph 46 of the Commentary on Article 7 as it read before 21 September 1995. On 21 September 1995 paragraph 42 was renumbered as paragraph 47 (see history of paragraph 47), the heading preceding paragraph 42 was moved with it and paragraph 46 of the Commentary on Article 7 was renumbered as paragraph 42 of the Commentary on Article 12 on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 46 of the Commentary on Article 7 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 31 of a previous report entitled "The Taxation of Income Derived from the Leasing of Industrial, Commercial or Scientific Equipment" (adopted by the OECD Council on 13 September 1983) and of paragraph 49 of another report entitled "The Taxation of Income Derived from the Leasing of Containers" (also adopted by the OECD Council on 13 September 1983).

Paragraph 43: Deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 43 read as follows:

> "43. *Poland* and *Portugal* reserve the right to treat and tax as royalties all software income that is not derived from a total transfer of the rights attached to the software."

Paragraph 43 was previously amended on 28 January 2003, by adding Poland as a country making the reservation and by incorporating the second sentence of paragraph 43 into paragraph 43.1, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 43 read as follows:

> "43. *Portugal* reserves the right to treat and tax as royalties all software income that is not derived from a total transfer of the rights attached to the software. Portugal also reserves the right to tax at source as royalties income from the leasing of industrial, commercial or scientific equipment and of containers, as well as income arising from technical assistance in connection with the use of, or the right to use, such equipment and containers."

Paragraph 43 as it read after 21 September 1995 corresponded to paragraph 37. On 21 September 1995 paragraph 43 was renumbered as paragraph 48 (see history of paragraph 48) and paragraph 37 was renumbered as paragraph 43 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 37 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 43.1: Corresponds with minor amendment to the second sentence of paragraph 43 as it read before 28 January 2003 (see history of paragraph 43). Paragraph 43.1 was added by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 44: Amended on 22 July 2010, by deleting Spain from the list of countries making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 21 September 1995 and until 22 July 2010, paragraph 44 read as follows:

"44. *Portugal* and *Spain* reserve the right to tax at source as royalties income arising from technical assistance in connection with the use of, or right to use, rights or information of the type referred to in paragraph 2 of the Article."

Paragraph 44 as it read before 21 September 1995 corresponded to paragraph 38. On 21 September 1995 paragraph 38 was renumbered as paragraph 44 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 38 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 45: Corresponds to paragraph 41 as it read before 21 September 1995. Paragraph 41 was renumbered as paragraph 45, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 41 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 46: Corresponds to paragraph 49 of the Commentary on Article 7 as it read before 21 September 1995. Paragraph 49 of the Commentary on Article 7 was renumbered as paragraph 46 of the Commentary on Article 12 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 49 of the Commentary on Article 7 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of paragraph 31 of a previous report entitled "The Taxation of Income Derived from the Leasing of Industrial, Commercial or Scientific Equipment" (adopted by the OECD Council on 13 September 1983).

Paragraph 46.1: Amended on 28 January 2003, by adding Mexico as a country making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 46.1 read as follows:

"46.1 The *United States* reserves the right to treat as a royalty a gain derived from the alienation of a property described in paragraph 2 of the Article, provided that the gain is contingent on the productivity, use or disposition of the property."

Paragraph 46.1 was added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 46.2: Amended on 17 July 2008, by replacing the reference to the "fifth dash" with a reference to the "sixth dash", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 46.2 read as follows:

"46.2 *Greece* does not adhere to the interpretation in the fifth dash of paragraph 11.4 and takes the view that all concerning payments are falling within the scope of the Article."

Paragraph 46.2 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 46.3: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 47: Deleted, together with the preceding heading, on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 21 September 1995 and until 22 July 2010, paragraph 47 and the preceding heading read as follows:

"Paragraph 3

47. *Italy* reserves the right to subject royalties and profits from the alienation of rights or property giving rise to royalties to the taxes imposed by its law whenever the recipient thereof has a permanent establishment in Italy, even if the rights or property in respect of which the royalties are paid is not effectively connected with such permanent establishment."

Paragraph 47 as read after 21 September 1995 corresponded to paragraph 42. On 21 September 1995 paragraph 42 was renumbered as paragraph 47 and the heading preceding paragraph 42 was moved with it by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 42 as it read after 23 July 1992 corresponded to paragraph 30 of the 1977 Model Convention. On 23 July 1992 paragraph 30 of the 1977 Model Convention was renumbered as paragraph 42 and the heading preceding paragraph 30 was moved with it by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 30 of the 1977 Model Convention corresponded to paragraph 31 of the 1963 Draft Convention. Paragraph 30 of the 1963 Draft Convention was amended and renumbered as paragraph 25 (see history of paragraph 35) and the preceding heading, "*Paragraphs 1 and 2*", was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 31 of the 1963 Draft Convention was amended and renumbered as paragraph 30 of the 1977 Model Convention and the preceding heading was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 31 read as follows:

"31. Italy reserves the right to subject royalties and profits from the alienation of rights or property giving rise to royalties to the taxes imposed by its law whenever the recipient thereof has a permanent establishment in Italy, even if the rights or property in respect of which the royalties are paid is not effectively connected with such permanent establishment."

Paragraph 48: Amended on 22 July 2010, by adding Australia, Chile and Slovenia to the list of countries making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 48 read as follows:

"48. *Belgium*, *Canada*, the *Czech Republic*, *Mexico*, *France* and the *Slovak Republic* reserve the right, in order to fill what they consider as a gap in the Article, to propose a provision defining the source of royalties by analogy with the provisions of paragraph 5 of Article 11, which deals with the same problem in the case of interest."

Paragraph 48 was previously amended on 28 January 2003, by adding the Slovak Republic to the list of countries making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 48 read as follows:

"48. *Belgium*, *Canada*, *the Czech Republic*, *Mexico* and *France* reserve the right, in order to fill what they consider as a gap in the Article, to propose a provision defining the source of royalties by analogy with the provisions of paragraph 5 of Article 11, which deals with the same problem in the case of interest."

Paragraph 48 was previously amended on 23 October 1997, by adding the Czech Republic to the list of countries making the reservation, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on

23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 48 read as follows:

"48. *Belgium*, *Canada*, *Mexico* and *France* reserve the right, in order to fill what they consider as a gap in the Article, to propose a provision defining the source of royalties by analogy with the provisions of paragraph 5 of Article 11, which deals with the same problem in the case of interest."

Paragraph 48 as it read after 21 September 1995 corresponded to paragraph 43. On 21 September 1995 paragraph 43 was amended, by adding Mexico to the list of countries making the reservation, and renumbered as paragraph 48 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 23 July 1992 and until 21 September 1995, paragraph 43 read as follows:

"43. *Belgium*, *Canada*, and *France* reserve the right, in order to fill what they consider as a gap in the Article, to propose a provision defining the source of royalties by analogy with the provisions of paragraph 5 of Article 11, which deals with the same problem in the case of interest."

Paragraph 43 as it read after 23 July 1992 corresponded to paragraph 31 of the 1977 Model Convention. On 23 July 1992 paragraph 31 of the 1977 Model Convention was amended, by adding Canada and France to the list of countries making the reservation, and renumbered as paragraph 43 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 31 read as follows:

"31. *Belgium* reserves the right, in order to fill what it considers as a gap in the Article, to propose a provision defining the source of royalties by analogy with the provision in paragraph 5 of Article 11, which deals with the same problem in the case of interest."

Paragraph 31 of the 1963 Draft Convention was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 31 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 30 (see history of paragraph 47) and a new paragraph 31 was added when the 1977 Model Convention was adopted.

Paragraph 49: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 50: Added on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008.

COMMENTARY ON ARTICLE 13
CONCERNING THE TAXATION OF CAPITAL GAINS

I. Preliminary remarks

1. A comparison of the tax laws of the OECD member countries shows that the taxation of capital gains varies considerably from country to country:

- in some countries capital gains are not deemed to be taxable income;
- in other countries capital gains accrued to an enterprise are taxed, but capital gains made by an individual outside the course of his trade or business are not taxed;
- even where capital gains made by an individual outside the course of his trade or business are taxed, such taxation often applies only in specified cases, *e.g.* profits from the sale of immovable property or speculative gains (where an asset was bought to be resold).

(Added on 30 July 1963; see HISTORY)

C (13)

2. Moreover, the taxes on capital gains vary from country to country. In some OECD member countries, capital gains are taxed as ordinary income and therefore added to the income from other sources. This applies especially to the capital gains made by the alienation of assets of an enterprise. In a number of OECD member countries, however, capital gains are subjected to special taxes, such as taxes on profits from the alienation of immovable property, or general capital gains taxes, or taxes on capital appreciation (increment taxes). Such taxes are levied on each capital gain or on the sum of the capital gains accrued during a year, mostly at special rates, which do not take into account the other income (or losses) of the taxpayer. It does not seem necessary to describe all those taxes.

(Amended on 11 April 1977; see HISTORY)

3. The Article does not deal with the above-mentioned questions. It is left to the domestic law of each Contracting State to decide whether capital gains should be taxed and, if they are taxable, how they are to be taxed. The Article can in no way be construed as giving a State the right to tax capital gains if such right is not provided for in its domestic law. The Article does not specify to what kind of tax it applies. It is understood that the Article must apply to all kinds of taxes levied by a Contracting State on capital gains. The wording of Article 2 is large enough to achieve this aim and to include also special taxes on capital gains.

(Amended on 11 April 1977; see HISTORY)

II. Commentary on the provisions of the Article

General remarks

4. It is normal to give the right to tax capital gains on a property of a given kind to the State which under the Convention is entitled to tax both the property and the income derived therefrom. The right to tax a gain from the alienation of a business asset must be given to the same State without regard to the question whether such gain is a capital gain or a business profit. Accordingly, no distinction between capital gains and commercial profits is made nor is it necessary to have special provisions as to whether the Article on capital gains or Article 7 on the taxation of business profits should apply. It is however left to the domestic law of the taxing State to decide whether a tax on capital gains or on ordinary income must be levied. The Convention does not prejudge this question.

(Amended on 11 April 1977; see HISTORY)

5. The Article does not give a detailed definition of capital gains. This is not necessary for the reasons mentioned above. The words "alienation of property" are used to cover in particular capital gains resulting from the sale or exchange of property and also from a partial alienation, the expropriation, the transfer to a company in exchange for stock, the sale of a right, the gift and even the passing of property on death.

(Amended on 11 April 1977; see HISTORY)

6. Most States taxing capital gains do so when an alienation of capital assets takes place. Some of them, however, tax only so-called realised capital gains. Under certain circumstances, though there is an alienation no realised capital gain is recognised for tax purposes (*e.g.* when the alienation proceeds are used for acquiring new assets). Whether or not there is a realisation has to be determined according to the applicable domestic tax law. No particular problems arise when the State which has the right to tax does not exercise it at the time the alienation takes place.

(Amended on 11 April 1977; see HISTORY)

7. As a rule, appreciation in value not associated with the alienation of a capital asset is not taxed, since, as long as the owner still holds the asset in question, the capital gain exists only on paper. There are, however, tax laws under which capital appreciation and revaluation of business assets are taxed even if there is no alienation.

(Added on 30 July 1963; see HISTORY)

8. Special circumstances may lead to the taxation of the capital appreciation of an asset that has not been alienated. This may be the case if

the value of a capital asset has increased in such a manner that the owner proceeds to the revaluation of this asset in his books. Such revaluation of assets in the books may also occur in the case of a depreciation of the national currency. A number of States levy special taxes on such book profits, amounts put into reserve, an increase in the paid-up capital and other revaluations resulting from the adjustment of the book-value to the intrinsic value of a capital asset. These taxes on capital appreciation (increment taxes) are covered by the Convention according to Article 2.

(Amended on 11 April 1977; see HISTORY)

9. Where capital appreciation and revaluation of business assets are taxed, the same principle should, as a rule, apply as in the case of the alienation of such assets. It has not been found necessary to mention such cases expressly in the Article or to lay down special rules. The provisions of the Article as well as those of Articles 6, 7 and and 21, seem to be sufficient. As a rule, the right to tax is conferred by the above-mentioned provisions on the State of which the alienator is a resident, except that in the cases of immovable property or of movable property forming part of the business property of a permanent establishment, the prior right to tax belongs to the State where such property is situated. Special attention must be drawn, however, to the cases dealt with in paragraphs 13 to 17 below.

(Amended on 29 April 2000; see HISTORY)

10. In some States the transfer of an asset from a permanent establishment situated in the territory of such State to a permanent establishment or the head office of the same enterprise situated in another State is assimilated to an alienation of property. The Article does not prevent these States from taxing profits or gains deemed to arise in connection with such a transfer, provided, however, that such taxation is in accordance with Article 7.

(Amended on 11 April 1977; see HISTORY)

11. The Article does not distinguish as to the origin of the capital gain. Therefore all capital gains, those accruing over a long term, parallel to a steady improvement in economic conditions, as well as those accruing in a very short period (speculative gains) are covered. Also capital gains which are due to depreciation of the national currency are covered. It is, of course, left to each State to decide whether or not such gains should be taxed.

(Amended on 11 April 1977; see HISTORY)

12. The Article does not specify how to compute a capital gain, this being left to the domestic law applicable. As a rule, capital gains are calculated by deducting the cost from the selling price. To arrive at cost all expenses incidental to the purchase and all expenditure for improvements are added to

the purchase price. In some cases the cost after deduction of the depreciation allowances already given is taken into account. Some tax laws prescribe another base instead of cost, *e.g.* the value previously reported by the alienator of the asset for capital tax purposes.

(Amended on 11 April 1977; see HISTORY)

13. Special problems may arise when the basis for the taxation of capital gains is not uniform in the two Contracting States. The capital gain from the alienation of an asset computed in one State according to the rules mentioned in paragraph 12 above, may not necessarily coincide with the capital gain computed in the other State under the accounting rules used there. This may occur when one State has the right to tax capital gains because it is the State of situs while the other State has the right to tax because the enterprise is a resident of that other State.

(Amended on 11 April 1977; see HISTORY)

14. The following example may illustrate this problem: an enterprise of State A bought immovable property situated in State B. The enterprise may have entered depreciation allowances in the books kept in State A. If such immovable property is sold at a price which is above cost, a capital gain may be realised and, in addition, the depreciation allowances granted earlier may be recovered. State B, in which the immovable property is situated and where no books are kept, does not have to take into account, when taxing the income from the immovable property, the depreciation allowances booked in State A. Neither can State B substitute the value of the immovable property shown in the books kept in State A for the cost at the time of the alienation. State B cannot, therefore, tax the depreciation allowances realised in addition to the capital gain as mentioned in paragraph 12 above.

(Amended on 11 April 1977; see HISTORY)

15. On the other hand, State A of which the alienator is a resident, cannot be obliged in all cases to exempt such book profits fully from its taxes under paragraph 1 of the Article and Article 23 A (there will be hardly any problems for States applying the tax credit method). To the extent that such book profits are due to the realisation of the depreciation allowances previously claimed in State A and which had reduced the income or profits taxable in such State A, that State cannot be prevented from taxing such book profits. The situation corresponds to that dealt with in paragraph 44 of the Commentary on Article 23 A.

(Amended on 11 April 1977; see HISTORY)

16. Further problems may arise in connection with profits due to changes of the rate of exchange between the currencies of State A and State B. After the

devaluation of the currency of State A, enterprises of such State A may, or may have to, increase the book value of the assets situated outside the territory of State A. Apart from any devaluation of the currency of a State, the usual fluctuations of the rate of exchange may give rise to so-called currency gains or losses. Take for example an enterprise of State A having bought and sold immovable property situated in State B. If the cost and the selling price, both expressed in the currency of State B, are equal, there will be no capital gain in State B. When the value of the currency of State B has risen between the purchase and the sale of the asset in relation to the currency of State A, in the currency of that State a profit will accrue to such enterprise. If the value of the currency of State B has fallen in the meantime, the alienator will sustain a loss which will not be recognised in State B. Such currency gains or losses may also arise in connection with claims and debts contracted in a foreign currency. If the balance sheet of a permanent establishment situated in State B of an enterprise of State A shows claims and debts expressed in the currency of State B, the books of the permanent establishment do not show any gain or loss when repayments are made. Changes of the rate of exchange may be reflected, however, in the accounts of the head office. If the value of the currency of State B has risen (fallen) between the time the claim has originated and its repayment, the enterprise, as a whole, will realise a gain (sustain a loss). This is true also with respect to debts if between the time they have originated and their repayment, the currency of State B has fallen (risen) in value.

(Amended on 11 April 1977; see HISTORY)

17. The provisions of the Article do not settle all questions regarding the taxation of such currency gains. Such gains are in most cases not connected with an alienation of the asset; they may often not even be determined in the State on which the right to tax capital gains is conferred by the Article. Accordingly, the question, as a rule, is not whether the State in which a permanent establishment is situated has a right to tax, but whether the State of which the taxpayer is a resident must, if applying the exemption method, refrain from taxing such currency gains which, in many cases, cannot be shown but in the books kept in the head office. The answer to that latter question depends not only on the Article but also on Article 7 and on Article 23 A. If in a given case differing opinions of two States should result in an actual double taxation, the case should be settled under the mutual agreement procedure provided for by Article 25.

(Amended on 11 April 1977; see HISTORY)

18. Moreover the question arises which Article should apply when there is paid for property sold an annuity during the lifetime of the alienator and not a fixed price. Are such annuity payments, as far as they exceed costs, to be

dealt with as a gain from the alienation of the property or as "income not dealt with" according to Article 21? Both opinions may be supported by arguments of equivalent weight, and it seems difficult to give one rule on the matter. In addition such problems are rare in practice, so it therefore seems unnecessary to establish a rule for insertion in the Convention. It may be left to Contracting States who may be involved in such a question to adopt a solution in the mutual agreement procedure provided for by Article 25.

(Replaced on 11 April 1977; see HISTORY)

19. The Article is not intended to apply to prizes in a lottery or to premiums and prizes attaching to bonds or debentures.

(Renumbered and amended on 11 April 1977; see HISTORY)

20. The Article deals first with the gains which may be taxed in the State where the alienated property is situated. For all other capital gains, paragraph 5 gives the right to tax to the State of which the alienator is a resident.

(Amended on 28 January 2003; see HISTORY)

21. As capital gains are not taxed by all States, it may be considered reasonable to avoid only actual double taxation of capital gains. Therefore, Contracting States are free to supplement their bilateral convention in such a way that a State has to forego its right to tax conferred on it by the domestic laws only if the other State on which the right to tax is conferred by the Convention makes use thereof. In such a case, paragraph 5 of the Article should be supplemented accordingly. Besides, a modification of paragraph 23 A as suggested in paragraph 35 of the Commentary on Article 23 A is needed.

(Amended on 28 January 2003; see HISTORY)

Paragraph 1

22. paragraph 1 states that gains from the alienation of immovable property may be taxed in the State in which it is situated. This rule corresponds to the provisions of Article 6 and of paragraph 1 of Article 22. It applies also to immovable property forming part of the assets of an enterprise. For the definition of immovable property paragraph 1 refers to Article 6. Paragraph 1 of Article 13 deals only with gains which a resident of a Contracting State derives from the alienation of immovable property situated in the other Contracting State. It does not, therefore, apply to gains derived from the alienation of immovable property situated in the Contracting State of which the alienator is a resident in the meaning of Article 4 or situated in a third State; the provisions of paragraph 5 shall apply to such gains (and not, as was mentioned in this Commentary before 2002, those of paragraph 1 of

MODEL TAX CONVENTION (FULL VERSION) – © OECD 2012

Article 21).

(Amended on 28 January 2003; see HISTORY)

23. The rules of paragraph 1 are supplemented by those of paragraph 4, which applies to gains from the alienation of all or part of the shares in a company holding immovable property (see paragraphs 28.3 to 28.8 below).

(Replaced on 28 January 2003; see HISTORY)

Paragraph 2

24. paragraph 2 deals with movable property forming part of the business property of a permanent establishment of an enterprise. The term "movable property" means all property other than immovable property which is dealt with in paragraph 1. It includes also incorporeal property, such as goodwill, licences, etc. Gains from the alienation of such assets may be taxed in the State in which the permanent establishment is situated, which corresponds to the rules for business profits (Article 7).

(Amended on 29 April 2000; see HISTORY)

25. The paragraph makes clear that its rules apply when movable property of a permanent establishment is alienated as well as when the permanent establishment as such (alone or with the whole enterprise) is alienated. If the whole enterprise is alienated, then the rule applies to such gains which are deemed to result from the alienation of movable property forming part of the business property of the permanent establishment. The rules of Article 7 should then apply *mutatis mutandis* without express reference thereto. For the transfer of an asset from a permanent establishment in one State to a permanent establishment (or the head office) in another State, see paragraph 10 above.

(Amended on 29 April 2000; see HISTORY)

26. On the other hand, paragraph 2 may not always be applicable to capital gains from the alienation of a participation in an enterprise. The provision applies only to property which was owned by the alienator, either wholly or jointly with another person. Under the laws of some countries, capital assets of a partnership are considered to be owned by the partners. Under some other laws, however, partnerships and other associations are treated as body corporate for tax purposes, distinct from their partners (members), which means that participations in such entities are dealt with in the same way as shares in a company. Capital gains from the alienation of such participations, like capital gains from the alienation of shares, are therefore taxable only in the State of residence of the alienator. Contracting States may agree bilaterally

on special rules governing the taxation of capital gains from the alienation of a participation in a partnership.

(Renumbered and amended on 11 April 1977; see HISTORY)

27. Certain States consider that all capital gains arising from sources in their territory should be subject to their taxes according to their domestic laws, if the alienator has a permanent establishment within their territory. paragraph 2 is not based on such a conception which is sometimes referred to as "the force of attraction of the permanent establishment". The paragraph merely provides that gains from the alienation of movable property forming part of the business property of a permanent establishment may be taxed in the State where the permanent establishment is situated. The gains from the alienation of all other movable property are taxable only in the State of residence of the alienator as provided in paragraph 5. The foregoing explanations accord with those in the Commentary on Article 7.

(Added on 22 July 2010; see HISTORY)

27.1 For the purposes of the paragraph, property will form part of the business property of a permanent establishment if the "economic" ownership of the property is allocated to that permanent establishment under the principles developed in the Committee's report entitled *Attribution of Profits to Permanent Establishments*[1] (see in particular paragraphs 72-97 of Part I of the report) for the purposes of the application of paragraph 2 of Article 7. In the context of that paragraph, the "economic" ownership of property means the equivalent of ownership for income tax purposes by a separate enterprise, with the attendant benefits and burdens (*e.g.* the right to any income attributable to the ownership of that property, the right to any available depreciation and the potential exposure to gains or losses from the appreciation or depreciation of that property). The mere fact that the property has been recorded, for accounting purposes, on a balance sheet prepared for the permanent establishment will therefore not be sufficient to conclude that it is effectively connected with that permanent establishment.

(Added on 22 July 2010; see HISTORY)

27.2 In the case of the permanent establishment of an enterprise carrying on insurance activities, the determination of whether property will form part of the business property of the permanent establishment shall be made by giving due regard to the guidance set forth in Part IV of the Committee's report with respect to whether the income on or gain from that property is taken into account in determining the permanent establishment's yield on the amount of investment assets attributed to it (see in particular paragraphs 165-170 of

1 *Attribution of Profits to Permanent Establishments*, OECD, Paris, 2010.

Part IV). That guidance being general in nature, tax authorities should consider applying a flexible and pragmatic approach which would take into account an enterprise's reasonable and consistent application of that guidance for purposes of identifying the specific assets that form part of the business property of the permanent establishment.

(Added on 22 July 2010; see HISTORY)

Paragraph 3

28. An exception from the rule of paragraph 2 is provided for ships and aircraft operated in international traffic and for boats engaged in inland waterways transport and movable property pertaining to the operation of such ships, aircraft and boats. Normally, gains from the alienation of such assets are taxable only in the State in which the place of effective management of the enterprise operating such ships, aircraft and boats is situated. This rule corresponds to the provisions of Article 8 and of paragraph 3 of Article 22. It is understood that paragraph 3 of Article 8 is applicable if the place of effective management of such enterprise is aboard a ship or a boat. Contracting States which would prefer to confer the exclusive taxing right on the State of residence or to use a combination of the residence criterion and the place of effective management criterion are free, in bilateral conventions, to substitute for paragraph 3 a provision corresponding to those proposed in paragraphs 2 and 3 of the Commentary on Article 8.

(Amended on 28 January 2003; see HISTORY)

28.1 paragraph 3 applies where the enterprise that alienates the property operates itself the boats, ships or aircraft referred to in the paragraph, whether for its own transportation activities or when leasing the boats, ships or aircraft on charter fully equipped, manned and supplied. It does not apply, however, where the enterprise owning the boats, ships or aircraft does not operate them (for example, where the enterprise leases the property to another person, other than in the case of an occasional bare boat lease as referred to in paragraph 5 of the Commentary on Article 8). In such a case, the gains accruing to the true owner of the property, or connected moveable property, will be covered by paragraph 2 or 5.

(Added on 28 January 2003; see HISTORY)

28.2 In their bilateral conventions, member countries are free to clarify further the application of Article 13 in this situation. They might adopt the following alternative version of paragraph 3 of the Article (see also paragraphs 4.1 and 4.2 of the Commentary on Article 22):

> 3. Gains from the alienation of property forming part of the business property of an enterprise and consisting of ships or aircraft operated by that

enterprise in international traffic or movable property pertaining to the operation of such ships or aircraft, shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated.

(Added on 28 January 2003; see HISTORY)

Paragraph 4

28.3 By providing that gains from the alienation of shares deriving more than 50 per cent of their value directly or indirectly from immovable property situated in a Contracting State may be taxed in that State, paragraph 4 provides that gains from the alienation of such shares and gains from the alienation of the underlying immovable property, which are covered by paragraph 1, are equally taxable in that State.

(Added on 28 January 2003; see HISTORY)

28.4 paragraph 4 allows the taxation of the entire gain attributable to the shares to which it applies even where part of the value of the share is derived from property other than immovable property located in the source State. The determination of whether shares of a company derive more than 50 per cent of their value directly or indirectly from immovable property situated in a Contracting State will normally be done by comparing the value of such immovable property to the value of all the property owned by the company without taking into account debts or other liabilities of the company (whether or not secured by mortgages on the relevant immovable property).

(Added on 28 January 2003; see HISTORY)

28.5 In their bilateral conventions, many States either broaden or narrow the scope of the paragraph. For instance, some States consider that the provision should not only cover gains from shares but also gains from the alienation of interests in other entities, such as partnerships or trusts, that do not issue shares, as long as the value of these interests is similarly derived principally from immovable property. States wishing to extend the scope of the paragraph to cover such interests are free to amend the paragraph as follows:

4. Gains derived by a resident of a Contracting State from the alienation of shares or comparable interests deriving more than 50 per cent of their value directly or indirectly from immovable property situated in the other Contracting State may be taxed in that other State.

(Added on 28 January 2003; see HISTORY)

28.6 It is also possible for States to increase or reduce the percentage of the value of the shares that must be derived directly or indirectly from immovable property for the provision to apply. This would simply be done by replacing

"50 per cent" by the percentage that these States would agree to. Another change that some States may agree to make is to restrict the application of the provision to cases where the alienator holds a certain level of participation in the entity.

(Added on 28 January 2003; see HISTORY)

28.7 Also, some States consider that the paragraph should not apply to gains derived from the alienation of shares of companies that are listed on an approved stock exchange of one of the States, to gains derived from the alienation of shares in the course of a corporate reorganisation or where the immovable property from which the shares derive their value is immovable property (such as a mine or a hotel) in which a business is carried on. States wishing to provide for one or more of these exceptions are free to do so.

(Added on 28 January 2003; see HISTORY)

28.8 Another possible exception relates to shares held by pension funds and similar entities. Under the domestic laws of many States, pension funds and similar entities are generally exempt from tax on their investment income. In order to achieve neutrality of treatment as regards domestic and foreign investments by these entities, some States provide bilaterally that income derived by such an entity resident of the other State, which would include capital gains on shares referred to in paragraph 4, shall be exempt from source taxation. States wishing to do so may agree bilaterally on a provision drafted along the lines of the provision found in paragraph 69 of the Commentary on Article 18.

(Replaced on 15 July 2005; see HISTORY)

28.9 Finally, a further possible exception relates to shares and similar interests in a Real Estate Investment Trust (see paragraphs 67.1 to 67.7 of the Commentary on Article 10 for background information on REITs). Whilst it would not seem appropriate to make an exception to paragraph 4 in the case of the alienation of a large investor's interests in a REIT, which could be considered to be the alienation of a substitute for a direct investment in immovable property, an exception to paragraph 4 for the alienation of a small investor's interest in a REIT may be considered to be appropriate.

(Replaced on 17 July 2008; see HISTORY)

28.10 As discussed in paragraph 67.3 of the Commentary on Article 10, it may be appropriate to consider a small investor's interest in a REIT as a security rather than as an indirect holding in immovable property. In this regard, in practice it would be very difficult to administer the application of source taxation of gains on small interests in a widely held REIT. Moreover, since REITs, unlike other entities deriving their value primarily from immovable

property, are required to distribute most of their profits, it is unlikely that there would be significant residual profits to which the capital gain tax would apply (as compared to other companies). States that share this view may agree bilaterally to add, before the phrase "may be taxed in that other State", words such as "except shares held by a person who holds, directly or indirectly, interests representing less than 10 per cent of all the interests in a company if that company is a REIT". (If paragraph 4 is amended along the lines of paragraph 28.5 above to cover interests similar to shares, these words should be amended accordingly.)

(Added on 17 July 2008; see HISTORY)

28.11 Some States, however, consider that paragraph 4 was intended to apply to any gain on the alienation of shares in a company that derives its value primarily from immovable property and that there would be no reason to distinguish between a REIT and a publicly held company with respect to the application of that paragraph, especially since a REIT is not taxed on its income. These States consider that as long as there is no exception for the alienation of shares in companies quoted on a stock exchange (see paragraph 28.7 above), there should not be a special exception for interests in a REIT.

(Added on 17 July 2008; see HISTORY)

28.12 Since the domestic laws of some States do not allow them to tax the gains covered by paragraph 4, States that adopt the exemption method should be careful to ensure that the inclusion of the paragraph does not result in a double exemption of these gains. These States may wish to exclude these gains from exemption and apply the credit method, as suggested by paragraph 35 of the Commentary on Articles 23 A and 23 B.

(Renumbered on 17 July 2008; see HISTORY)

Paragraph 5

29. As regards gains from the alienation of any property other than that referred to in paragraphs 1, 2, 3 and 4, paragraph 5 provides that they are taxable only in the State of which the alienator is a resident. This corresponds to the rules laid down in Article 22.

(Amended on 28 January 2003; see HISTORY)

30. The Article does not contain special rules for gains from the alienation of shares in a company (other than shares of a company dealt with in paragraph 4) or of securities, bonds, debentures and the like. Such gains are, therefore, taxable only in the State of which the alienator is a resident.

(Amended on 28 January 2003; see HISTORY)

31. If shares are sold by a shareholder to the issuing company in connection with the liquidation of such company or the reduction of its paid-up capital, the difference between the selling price and the par value of the shares may be treated in the State of which the company is a resident as a distribution of accumulated profits and not as a capital gain. The Article does not prevent the State of residence of the company from taxing such distributions at the rates provided for in Article 10: such taxation is permitted because such difference is covered by the definition of the term "dividends" contained in paragraph 3 of Article 10 and interpreted in paragraph 28 of the Commentary relating thereto. The same interpretation may apply if bonds or debentures are redeemed by the debtor at a price which is higher than the par value or the value at which the bonds or debentures have been issued; in such a case, the difference may represent interest and, therefore, be subjected to a limited tax in the State of source of the interest in accordance with Article 11 (see also paragraphs 20 and 21 of the Commentary on Article 11).

(Amended on 23 July 1992; see HISTORY)

32. There is a need to distinguish the capital gain that may be derived from the alienation of shares acquired upon the exercise of a stock-option granted to an employee or member of a board of directors from the benefit derived from the stock-option that is covered by Articles 15 or 16. The principles on which that distinction is based are discussed in paragraphs 12.2 to 12.5 of the Commentary on Article 15 and paragraph 3 of the Commentary on Article 16.

(Added on 15 July 2005; see HISTORY)

Reservations on the Article

33. *Spain* reserves its right to tax gains from the alienation of shares or other rights where the ownership of such shares or rights entitles, directly or indirectly, to the enjoyment of immovable property situated in Spain.

(Added on 22 July 2010; see HISTORY)

34. *(Deleted on 28 January 2003; see HISTORY)*

35. *Finland* reserves the right to tax gains from the alienation of shares or other corporate rights in Finnish companies, where the ownership of such shares or other corporate rights entitles to the enjoyment of immovable property situated in Finland and held by the company.

(Amended on 23 July 1992; see HISTORY)

36. *France* can accept the provisions of paragraph 5, but wishes to retain the possibility of applying the provisions in its laws relative to the taxation of

gains from the alienation of shares or rights which are part of a substantial participation in a company which is a resident of France.

(Amended on 28 January 2003; see HISTORY)

37. *(Deleted on 22 July 2010; see HISTORY)*

38. *New Zealand* reserves its position on paragraphs 3 and 5.

(Amended on 28 January 2003; see HISTORY)

39. *Chile* and *Sweden* reserve the right to tax gains from the alienation of shares or other corporate rights in their companies.

(Amended on 22 July 2010; see HISTORY)

40. *Turkey* reserves the right, in accordance with its legislation, to tax capital gains from the alienation, within its territory, of movable capital and any property other than those mentioned in paragraph 2 if the delay between their acquisition and their alienation is less than two years.

(Added on 11 April 1977; see HISTORY)

41. Notwithstanding paragraph 5 of this Article, where the selling price of shares is considered to be dividends under Danish legislation, *Denmark* reserves the right to tax this selling price as dividends in accordance with paragraph 2 of Article 10.

(Amended on 28 January 2003; see HISTORY)

42. *Japan* reserves the right to tax gains from the alienation of a Japanese financial institution's shares if these shares were previously acquired by the alienator from the Government of Japan which had itself previously acquired the shares as part of the bail-out of the financial institution due to its insolvency.

(Amended on 22 July 2010; see HISTORY)

43. *Denmark*, *Ireland*, *Norway* and the *United Kingdom* reserve the right to insert in a special article provisions regarding capital gains relating to offshore hydrocarbon exploration and exploitation and related activities.

(Amended on 28 January 2003; see HISTORY)

43.1 *Greece* reserves the right to insert in a special article provisions regarding capital gains relating to offshore exploration and exploitation and related activities.

(Added on 28 January 2003; see HISTORY)

44. *Denmark*, *Norway* and *Sweden* reserve the right to insert special provisions regarding capital gains derived by the air transport consortium Scandinavian Airlines System (SAS).

(Added on 23 July 1992; see HISTORY)

45. *Korea* reserves the right to tax gains from the alienation of shares or other rights forming part of a substantial participation in a company which is a resident.

(Amended on 22 July 2010; see HISTORY)

46. The *United States* wants to reserve its right to apply its tax on certain real estate gains under the Foreign Investment in Real Property Tax Act.

(Added on 23 July 1992; see HISTORY)

47. In view of its particular situation in relation to shipping, *Greece* will retain its freedom of action with regard to the provisions in the Convention relating to capital gains from the alienation of ships in international traffic and movable property pertaining to the operation of such ships.

(Renumbered and amended on 31 March 1994; see HISTORY)

48. *Ireland* reserves the right to tax gains from the alienation of property by an individual who was a resident of Ireland at any time during the five years preceding such alienation.

(Amended on 17 July 2008; see HISTORY)

49. *Mexico* reserves its position to retain the possibility of applying the provisions in its laws relative to the taxation of gains from the alienation of shares or similar rights in a company that is a resident of Mexico.

(Amended on 28 January 2003; see HISTORY)

50. The *United States* reserves the right to include gains from the alienation of containers within the scope of paragraph 3 of the Article.

(Added on 29 April 2000; see HISTORY)

51. *Belgium*, *Luxembourg*, the *Netherlands* and *Switzerland* reserve the right not to include paragraph 4 in their conventions.

(Amended on 22 July 2010; see HISTORY)

HISTORY

Paragraph 1: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 2: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council

on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 2 read as follows:

"2. Moreover, the taxes applicable to capital gains vary from country to country. In some States capital gains are taxed as ordinary income and therefore added to the income from other sources. This applies especially to the capital gains made by the alienation of assets of an enterprise. In a number of States, however, capital gains are subjected to special taxes, such as taxes on profits from the alienation of immovable property, or capital gains taxes, or taxes on capital appreciation (increment taxes). Such taxes are levied on each capital gain or on the sum of the capital gains accrued during a year, mostly at special rates, which do not take into account the other income (or losses) of the taxpayer. It does not seem necessary to describe all those taxes."

Paragraph 3: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. Article 13 does not deal with the above mentioned questions. It is left to the domestic law of each Contracting State to decide whether capital gains should be taxed and, if they are taxable, how they are to be taxed. The Article can in no way be construed as giving a State the right to tax capital gains if such right is not provided for in its domestic law. The Article does not prescribe what kind of tax may be levied. It should be understood that the Article must apply to all kind of taxes levied by a Contracting State on capital gains. The wording of Article 2 on taxes covered by the Convention is large enough to achieve this aim and to include also special taxes on capital gains."

Paragraph 4: Amended, together with the section heading preceding it, in the 1977 Model Convention, adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 4 and the section heading read as follows:

"II. COMMENTARY ON THE ARTICLE

4. It is justified to give the right to tax capital gains to the State which is entitled to tax both the property and the income derived therefrom before such property was alienated. A gain from the alienation of an asset must be taxable in the same State without regard to the question whether such gain is a capital gain or a business profit. Accordingly, no distinction between capital gains and commercial profits is made nor is it necessary to have special provisions as to whether the Article on capital gains or Article 7 in the taxation of business profits should apply. It is however left to the domestic law of the taxing State to decide whether a tax on capital gains or on ordinary income must be levied. The Convention does not prejudice this question."

Paragraph 5: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 5 read as follows:

"5. The Article does not give a detailed definition of capital gains. This is not necessary for the reasons mentioned above. The words "alienation of property" are used to cover in particular capital gains resulting from the sale or exchange of property and also from a partial alienation, the expropriation, the transfer to a company in exchange for stock, the sale of a right, the alienation free of charge and even the passing of property on death."

Paragraph 6: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 6 read as follows:

> "6. Most States taxing capital gains do so when an alienation of capital assets takes place. Some of them, however, tax only so-called realised capital gains. Under certain circumstances, though there is an alienation no realised capital gains is recognised for tax purposes (*e.g.* replacement of equipment). Whether or not there is a realisation has to be determined according to the applicable domestic tax law. No particular problems arise when the State which has the right to tax does not exercise it at the time the alienation takes places."

Paragraph 7: Unchanged since the adoption of the 1963 Draft Convention by the OECD Council on 30 July 1963.

Paragraph 8: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 8 read as follows:

> "8. Special circumstances may lead to the taxation of the capital appreciation of an asset that has not been alienated. Such taxation may occur of the value of a capital asset has increased in such a manner that the owner proceeds to the revaluation of this asset in his books. Such revaluation of assets in the books may also occur in the case of a devaluation of the national currency. A number of States levy special taxes on book profits, amounts put into reserve, an increase in the paid-up capital and other revaluations resulting from the adjustment of the book-value to the intrinsic value of a capital asset. These taxes on capital appreciation (increment taxes) are covered by the Convention according to Article 2 on taxes covered by the Convention."

Paragraph 9: Amended on 29 April 2000, by deleting the words "or pertaining to a fixed base", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 9 read as follows:

> "9. Where capital appreciation and revaluation of business assets are taxed, the same principle should, as a rule, apply as in the case of the alienation of such assets. It has not been found necessary to mention such cases expressly in the Article or to lay down special rules. The provisions of the Article as well as those of Articles 6, 7 and 21, seem to be sufficient. As a rule, the right to tax is conferred by the above-mentioned provisions on the State of which the alienator is a resident, except that in the cases of immovable property or of movable property forming part of the business property of a permanent establishment or pertaining to a fixed base, the prior right to tax belongs to the State where such property is situated. Special attention must be drawn, however, to the cases dealt with in paragraphs 13 to 17 below."

Paragraph 9 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 9 read as follows:

> "9. Where capital appreciation and revaluation of business assets are taxed, the same principle should, as a rule, apply as in the case of the alienation of such assets. It is not found necessary to mention such cases expressly in the present Article or to lay down special rules. The rules of the present Article on the taxation

of capital gains as well as the provisions of Article 6 on the taxation of income from immovable property. Article 7 on the taxation of business profits and Article 21 on the taxation of income not expressly mentioned in the Convention seem to be sufficient. As a rule, the right to tax is conferred by the aforementioned provisions to the State of which the taxpayer is a resident, except that in the cases of immovable property or of movable property employed in a permanent establishment or pertaining to a fixed base, the prior right to tax belongs to the State where such property is situated. Special attention must be drawn, however, to the cases dealt with in paragraph 13 to 17 below."

Paragraph 10: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 10 read as follows:

"10. In some States the transfer of property from a permanent establishment situated in the territory of such State to a permanent establishment or the head office of the same enterprise situated in another State is assimilated to an alienation of property. The present Article does not prevent these States from taxing profits or gains deemed to arise in connection with such a transfer, it being assumed, however, that such taxation is in accordance with Article 7 concerning the taxation of business profits."

Paragraph 11: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 11 read as follows:

"11. The Article does not discriminate as to the reason instrumental in producing the capital gain. Therefore all capital gains, those accruing over a long term, parallel to a steady improvement in economic conditions, as well as those accruing in a very short of the national currency are covered. It is, of course, left to each State to decide whether or not such gains should be taxed."

Paragraph 12: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 12 read as follows:

"12. The Article does not determine how to compute a capital gain, this being left to the domestic law applicable. As a rule, capital gains are calculated by deducting the cost from the selling price. To arrive at cost all expenses incidental to the purchase and all expenditure for improvements are added to the purchase price. In some cases the cost after deduction of the depreciation allowances already granted by the tax authorities is taken into account. Some tax laws prescribe another base instead of cost, *e.g.* the value previously reported by the alienator of the asset for property tax purposes."

Paragraph 13: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 13 read as follows:

"13. Special problems may arise when the basis for the taxation of capital gains is not uniform in the two Contracting States. The capital gain from the alienation of an asset computed in one State according to the rules mentioned in paragraph 12 above, may not necessarily coincide with the capital gain computed by the other State under the accounting rules used there. This may occur when one State has the right to tax capital gains because they pertain to property situated therein, while the other State has the right to tax because the enterprise is resident there."

Paragraph 14: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 14 read as follows:

"14. The following example may illustrate this problem; an enterprise of State A has bought immovable property situated in State B. The enterprise may have entered depreciation allowances in the books kept in State A. If such immovable property is sold at a price which is above cost, a capital gain may be realised and, in addition, the depreciation allowances granted earlier may be recovered. State B in which the immovable property is situated and where no books are kept does not have to take into account, when taxing the income from the immovable property, the depreciation allowances booked in State A. Neither can State B substitute the value of the immovable property shown in the books kept in State A for the cost at the time of the alienation. State B cannot, therefore, tax the depreciation allowances realised in addition to the capital gain as mentioned above."

Paragraph 15: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 15 read as follows:

"15. On the other hand, State A of which the alienator is a resident, cannot be obliged in all cases to exempt such book profits fully from its taxes under paragraph 1 of the present Article and Article 23(A) on the exemption method (there will be hardly any problems for States applying the tax credit method). As far as such book profits are due to the realisation of the depreciation allowances which State A had granted previously and which had reduced the income or profits taxable in such State A that State cannot be prevented from taxing such book profits. The situation corresponds to that dealt with in paragraph 38 of the commentary to Article 23(A)."

Paragraph 16: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 16 read as follows:

"16. Further problems may arise in connection with profits due to changes of the rate of exchange between the currencies of State A and State B. After the devaluation of the national currency of State A, enterprises of such State A may, or may have to, increase the book value of the assets, including assets situated outside the State A. Besides, and apart from any devaluation of the national currency of a State, the usual fluctuations of the rate of exchange may give rise to so-called monetary gains of losses. Take for example an enterprise of State A having bought and sold immovable property situated in State B. If the cost and the selling price, both expressed in the currency of State B, are equal, there will be no capital gain in State B. When the value of the currency of State B has risen between the purchase and the sale of the asset in relation to the currency of State A, a profit will accrue to such enterprise expressed in the currency of State A. If the value of the currency of State B has fallen in the meantime, the alienator will sustain a loss which will not be recognised by State B. Such currency gains or losses may also arise in connection with claims and debts contracted in a foreign currency. If the balance-sheet of a permanent establishment situated in State B of an enterprise of State A shows claims and debts expressed in the currency of State B, the books of the permanent establishment do not show any gain of loss when repayments are made. Changes of the rate of exchange may be reflected, however, in the accounts of the head office. If the value of the currency of State B has risen (fallen) between the time the claim has originated and its repayment, the enterprise, as a whole,

will realise a gain (sustain a loss). This is true also with respect to debts if between the time they have originated and their repayment, the currency of State B has fallen (risen) in value."

Paragraph 17: Amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 17 read as follows:

"17. The provisions of the present Article on the taxation of capital gains do not answer all questions regarding the taxation of such currency gains. Such gains are in most cases not connected with an alienation of the asset; they may often not even be determined by the State on which, for instance, according to the situation of the permanent establishment, the right to tax capital gains is conferred by the present Article. Accordingly, the question, as a rule, is not, whether the State in which the permanent establishment is situated has a right to tax, but whether the State of which the taxpayer is a resident must, if applying the exemption method, refrain from taxing such currency gains which, in many cases, cannot be shown but in the books kept in the head office. The answer to that latter question depends not only on the present Article but also on Article 7 on the taxation of business profits and on Article 23(A) on the exemption method. It seems difficult to give one definite answer to all possible cases. The Fiscal Committee will examine the matter in a more detailed manner at a later stage. If in a given case different opinions of two States should result in an actual double taxation, the case could be settled under the mutual agreement procedure provided for by Article 25."

Paragraph 18: Replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At that time, paragraph 18 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 19 (see history of paragraph 19) and a new paragraph 18 was added when the 1977 Model Convention was adopted.

Paragraph 19: Corresponds to paragraph 18 of the 1963 Draft Convention. Paragraph 19 of the 1963 Draft Convention was amended and renumbered as paragraph 20 (see history of paragraph 20) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 18 of the 1963 Draft Convention was amended and renumbered as paragraph 19 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 18 read as follows:

"18. The Article is not intended to apply to prizes in a lottery or to bonuses on premium bonds."

Paragraph 20: Amended on 28 January 2003 by changing the reference to "paragraph 4" in the second sentence to "paragraph 5", as a consequence of the renumbering of paragraph 4 of Article 13, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 20 read as follows:

"20. The Article deals first with the gains which may be taxed in the State where the alienated property is situated. For all other capital gains, paragraph 4 gives the right to tax to the State of which the alienator is a resident."

Paragraph 20 of the 1977 Model Convention corresponded to paragraph 19 of the 1963 Draft Convention. Paragraph 20 of the 1963 Draft Convention was amended and renumbered as paragraph 21 (see history of paragraph 21) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time, paragraph 19 of the 1963 Draft Convention was amended and renumbered as paragraph 20 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by

the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 19 read as follows:

> "19. The Article deals first with the gains from the alienation of property which may be taxed in the State where such property is situated (paragraph 1 and first sentence of paragraph 2). For all other capital gains paragraph 3 gives the right to tax to the State of which the alienator is a resident."

Paragraph 21: Amended on 28 January 2003 by changing the reference to "paragraph 4" in the third sentence to "paragraph 5" as a consequence of the renumbering of paragraph 4 of Article 13 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 21 read as follows:

> "21. As capital gains are not taxed by all States, it may be considered reasonable to avoid only actual double taxation of capital gains. Therefore, Contracting States are free to supplement their bilateral convention in such a way that a State has to forego its right to tax conferred on it by the domestic laws only if the other State on which the right to tax is conferred by the Convention makes use thereof. In such a case, paragraph 4 of the Article should be supplemented accordingly. Besides, a modification of Article 23 A as suggested in paragraph 35 of the Commentary on Article 23 A is needed."

Paragraph 21 of the 1977 Model Convention corresponded to paragraph 20 of the 1963 Draft Convention. Paragraph 21 of the 1963 Draft Convention was amended and renumbered as paragraph 22 (see history of paragraph 22) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 20 of the 1963 Draft Convention was amended and renumbered as paragraph 21 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 20 read as follows:

> "20. As capital gains are not taxed by all States, two States may find it reasonable to avoid only any actual double taxation of capital gains. The negotiating States are free to supplement their bilateral agreement in such a way that a State has to forego its right to tax conferred on it by the domestic law only if the State on which the right to tax is conferred by the Convention makes use thereof. In such a case, paragraph 3 of the Article should be supplemented accordingly. Besides, a modification of Article 23(A) on the exemption method as suggested in paragraph 33 of the Commentary to Articles 23(A) is needed."

Paragraph 22: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 22 read as follows:

> "22. Paragraph 1 states that gains from the alienation of immovable property may be taxed in the State in which it is situated. This rule corresponds to the provisions of Article 6 and of paragraph 1 of Article 22. It applies also to immovable property forming part of the assets of an enterprise. For the definition of immovable property paragraph 1 refers to Article 6. Paragraph 1 of Article 13 deals only with gains which a resident of a Contracting State derives from the alienation of immovable property situated in the other Contracting State. It does not, therefore, apply to gains derived from the alienation of immovable property situated in the Contracting State of which the alienator is a resident in the meaning of Article 4 or situated in a third State; the provisions of paragraph 1 of Article 21 shall apply to such gains."

Paragraph 22 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues

Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 22 read as follows:

> "22. Paragraph 1 states that gains from the alienation of immovable property may be taxed in the State in which it is situated. This rule corresponds to the provisions of Article 6 and of paragraph 1 of Article 22. It applies also to immovable property forming part of the assets of an enterprise or used for performing independent personal services. For the definition of immovable property paragraph 1 refers to Article 6. Paragraph 1 of Article 13 deals only with gains which a resident of a Contracting State derives from the alienation of immovable property situated in the other Contracting State. It does not, therefore, apply to gains derived from the alienation of immovable property situated in the Contracting State of which the alienator is a resident in the meaning of Article 4 or situated in a third State; the provisions of paragraph 1 of Article 21 shall apply to such gains."

Paragraph 22 of the 1977 Model Convention corresponded to paragraph 21 of the 1963 Draft Convention. Paragraph 22 of the 1963 Draft Convention was amended and renumbered as paragraph 24 (see history of paragraph 24) and the preceding heading was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 21 of the 1963 Draft Convention was amended and renumbered as paragraph 22 of the 1977 Model Convention and the footnote off paragraph 21 was deleted. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 21 read as follows:

> "21. Paragraph 1 states that gains from the alienation of immovable property may be taxed in the State in which it is situated. This rule is in accordance with the provisions of Article 6 on the taxation of income from immovable property and paragraph 1 of Article 22 on the taxation of capital. The rule applies also to immovable property forming part of the assets of an enterprise or used for performing professional services. For the definition of immovable property paragraph 1 refers to paragraph 2 of Article 6[1].
>
> 1 Attention is drawn to the fact that for capital gains tax purposes (as well as for the purposes of other taxes such as taxes on the transfer of property) it is the practice in some countries to assimilate the alienation of all shares in a company, the exclusive or main aim of which is to hold immovable property, to the alienation of such immovable property. This point of view is not shared by all States; some of them could object to the disregard of a distinct legal subject and therefore not apply paragraph 2 of Article 6. The State of which the shareholder is a resident may contend that the shares come within the scope of paragraph 3 of the Article which would mean that a capital gain realised from the sale of these shares would be taxable only in the State of the residence of the alienator. The different qualification of the same fact could result in a double taxation."

Paragraph 23: Replaced on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until it was deleted on 28 January 2003, paragraph 23 read as follows:

> "23. Certain tax laws assimilate the alienation of all or part of the shares in a company, the exclusive or main aim of which is to hold immovable property, to the alienation of such immovable property. In itself paragraph 1 does not allow that practice: a special provision in the bilateral convention can alone provide for such an assimilation. Contracting States are of course free either to include in their bilateral conventions such special provision, or to confirm expressly that the alienation of shares cannot be assimilated to the alienation of the immovable property."

Paragraph 23 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 23 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 28 (see history of paragraph 28) and a new paragraph 23 was added when the 1977 Model Convention was adopted.

Paragraph 24: Amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 24 read as follows:

> "24. Paragraph 2 deals with movable property forming part of the business property of a permanent establishment of an enterprise or pertaining to a fixed base used for performing independent personal services. The term "movable property" means all property other than immovable property which is dealt with in paragraph 1. It includes also incorporeal property, such as goodwill, licences, etc. Gains from the alienation of such assets may be taxed in the State in which the permanent establishment or fixed base is situated, which corresponds to the rules for business profits and for income from independent personal services (Articles 7 and 14)."

Paragraph 24 of the 1977 Model Convention corresponded to paragraph 22 of the 1963 Draft Convention. Paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 25 (see history of paragraph 25) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 22 of the 1963 Draft Convention was amended and renumbered as paragraph 24 of the 1977 Model Convention and the heading preceding paragraph 22 was moved with it. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 22 read as follows:

> "22. Paragraph 2 deals with movable property forming part of the business assets employed in a permanent establishment of the enterprise or pertaining to a fixed base used for performing professional services. The term "movable property" means all property other than immovable property which is dealt with in paragraph 1. It includes also incorporeal property, such as goodwill, licences etc. Gains from the alienation of such assets may be taxed in the State in which the permanent establishment or fixed base is situated, which is in accordance with the rules for business or professional income (Article 7 and 14)."

Paragraph 25: Amended on 29 April 2000, by deleting the references to "fixed base", by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 25 read as follows:

> "25. The paragraph makes clear that its rules apply when movable property of a permanent establishment or fixed base is alienated as well as when the permanent establishment as such (alone or with the whole enterprise) or the fixed base as such is alienated. If the whole enterprise is alienated, then the rule applies to such gains which are deemed to result from the alienation of movable property forming part of the business property of the permanent establishment. The rules of Article 7 should then apply *mutatis mutandis* without express reference thereto. For the transfer of an asset from a permanent establishment in one State to a

permanent establishment (or the head office) in another State, see paragraph 10 above."

Paragraph 25 of the 1977 Model Convention corresponded to paragraph 24 of the 1963 Draft Convention. Paragraph 25 of the 1963 Draft Convention was amended and renumbered as paragraph 26 (see history of paragraph 26) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 24 of the 1963 Draft Convention was amended and renumbered as paragraph 25 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 24 read as follows:

"24. The paragraph makes clear that its rules apply when movable property of a permanent establishment or fixed base is alienated as well as when the permanent establishment as such (alone or together with the whole enterprise) or the fixed base as such is alienated. If the whole enterprise is alienated, then the rule applies to such gains which are deemed to result from the alienation of movable property employed in the permanent establishment. The rules of Article 7 should then apply mutatis mutandis without express reference thereto. For the transfer of property from a permanent establishment in one State to a permanent establishment (or the head office) in another State, see paragraph 10 above."

Paragraph 26: Corresponds to paragraph 25 of the 1963 Draft Convention. Paragraph 26 of the 1963 Draft Convention was amended and renumbered as paragraph 27 (see history of paragraph 27) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 25 of the 1963 Draft Convention was amended and renumbered as paragraph 26 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 25 read as follows:

"25. On the other hand, the first sentence of paragraph 2 may not always be applicable to capital gains from the alienation of a participation in an enterprise. The provision applies only to property which was owned by the alienator, either wholly or jointly with another person. Under the laws of some countries, capital assets of a partnership are considered to be owned by the partners. Under some other laws, however, partnerships and other associations are treated as legal entities, distinct from their partners (members), which means that participation in such entities are dealt with in the same way as shares in a company. Capital gains from the alienation of such participations, like capital gains from the alienation of shares, are therefore only taxable in the State of residence of the alienator. Negotiating States may agree bilaterally on special rules governing the taxation of capital gains from the alienation of a participation in a partnership."

Paragraph 27: Amended on 28 January 2003, by changing the reference to "paragraph 4" in the fourth sentence to "paragraph 5" as a consequence of the renumbering of paragraph 4 of Article 13, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 29 April 2000 and until 28 January 2003, paragraph 27 read as follows:

"27. Certain States consider that all capital gains arising from sources in their territory should be subject to their taxes according to their domestic laws, if the alienator has a permanent establishment within their territory. Paragraph 2 is not based on such a conception which is sometimes referred to as "the force of attraction of the permanent establishment". The paragraph merely provides that gains from the alienation of movable property forming part of the business property of a permanent establishment may be taxed in the State where the permanent establishment is situated. The gains from the alienation of all other

movable property are taxable only in the State of residence of the alienator as provided in paragraph 4. The foregoing explanations accord with those in the Commentary on Article 7."

Paragraph 27 was previously amended on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 27 read as follows:

"27. Certain States consider that all capital gains arising from sources in their territory should be subject to their taxes according to their domestic laws, if the alienator has a permanent establishment within their territory. Paragraph 2 is not based on such a conception which is sometimes referred to as "the force of attraction of the permanent establishment". The paragraph merely provides that gains from the alienation of movable property forming part of the business property of a permanent establishment or of movable property pertaining to a fixed base used for performing independent personal services may be taxed in the State where the permanent establishment or the fixed base is situated. The gains from the alienation of all other movable property are taxable only in the State of residence of the alienator as provided in paragraph 4. The foregoing explanations accord with those in the Commentary on Article 7."

Paragraph 27 of the 1977 Model Convention corresponded to paragraph 26 of the 1963 Draft Convention. Paragraph 27 of the 1963 Draft Convention was amended and renumbered as paragraph 29 (see history of paragraph 29) and the preceding heading was moved immediately before paragraph 28 with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 26 of the 1963 Draft Convention was amended and renumbered as paragraph 27 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 26 read as follows:

"26. Certain States consider that all capital gains arising from sources in their territory should be subject to their taxes according to their domestic law, if the alienator has a permanent establishment within their territory. Paragraph 2 is not based on such a conception which is sometimes referred to as "the force of attraction of the permanent establishment". The paragraph merely provides that gains from the alienation of assets forming part of the business property employed in a permanent establishment or of assets pertaining to a fixed base used for performing professional services may be taxed in the State of source. All other assets or property is taxable in the State of residence of the alienator under paragraph 3 of the Article. The foregoing explanations are in accordance with those in the Commentaries on Article 7 on the taxation of business profits."

Paragraph 27.1: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 27.2: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 28: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 28 read as follows:

"28. An exception from the rule of paragraph 2 is provided for ships and aircraft operated in international traffic and for boats engaged in inland waterways transport and movable property pertaining to the operation of such ships, aircraft and boats. Gains from the alienation of such assets are taxable only in the State in

which the place of effective management of the enterprise operating such ships, aircraft and boats is situated. This rule corresponds to the provisions of Article 8 and of paragraph 3 of Article 22. It is understood that paragraph 3 of Article 8 is applicable if the place of effective management of such enterprise is aboard a ship or a boat. Contracting States which would prefer to confer the exclusive taxing right on the State of residence or to use a combination of the residence criterion and the place of effective management criterion are free, in bilateral conventions, to substitute to paragraph 3 a provision corresponding to those proposed in paragraphs 2 and 3 of the Commentary on Article 8."

Paragraph 28 of the 1977 Model Convention corresponded to paragraph 23 of the 1963 Draft Convention. Paragraph 28 of the 1963 Draft Convention was amended and renumbered as paragraph 30 (see history of paragraph 30) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 23 of the 1963 Draft Convention was amended and renumbered as paragraph 28 of the 1977 Model Convention and the heading preceding paragraph 27 was moved immediately before paragraph 28. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 23 read as follows:

"23. An exception from the above mentioned general rule is provided for ships and aircraft operated in international traffic and for boats engaged in inland waterways transport and movable property pertaining to the operation of such ships, aircraft and boats. Gains from the alienation of such assets are taxable only in the State in which the effective place of management of the enterprise operating such ships, aircraft and boats is situated. This rule is in accordance with Article 8 on the taxation of income from shipping, inland waterways transport and air transport and with paragraph 3 of Article 22 on taxation of capital to which the second sentence of paragraph 2 of the present Article refers."

Paragraph 28.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 28.2: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 28.3: Added together with the heading preceding it on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 28.4: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 28.5: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 28.6: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 28.7: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 28.8: Replaced paragraph 28.8 as it read before 29 July 2005. Paragraph 28.8 was renumbered as paragraph 28.9 (see history of paragraph 28.12) and a new paragraph 28.8 was added by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005.

Paragraph 28.9: Replaced paragraph 28.9 as it read before 17 July 2008. Paragraph 28.9 was renumbered as paragraph 28.12 (see history of paragraph 28.12) and a new paragraph 28.9 was added by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008, on the basis of another

report entitled “Tax Treaty Issues Related to REITs” (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 28.10: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Tax Treaty Issues Relating to REITs” (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 28.11: Added on 17 July 2008 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008, on the basis of another report entitled “Tax Treaty Issues Relating to REITs” (adopted by the OECD Committee on Fiscal Affairs on 20 June 2008).

Paragraph 28.12: Corresponds to paragraph 28.9 as it read before 17 July 2008. Paragraph 28.9 was renumbered as paragraph 28.12 by the report entitled “The 2008 Update to the Model Tax Convention”, adopted by the OECD Council on 17 July 2008.

Paragraph 28.9, as it read before 17 July 2008, corresponded to paragraph 28.8 as it read before 15 July 2005. Paragraph 28.8 was renumbered as paragraph 28.9 by the report entitled “The 2005 Update to the Model Tax Convention”, adopted by the OECD Council on 15 July 2005.

Paragraph 28.8 was added on 28 January 2003 by the report entitled “The 2002 Update to the Model Tax Convention”, adopted by the OECD Council on 28 January 2003.

Paragraph 29: Amended together with the preceding heading, by replacing the number “4” with “5”, on 28 January 2003 by the report entitled “The 2002 Update to the Model Tax Convention” adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 29 and the preceding heading read as follows:

> “*Paragraph 4*
>
> 29. As regards gains from the alienation of any property other than that referred to in paragraphs 1, 2 and 3, paragraph 4 provides that they are taxable only in the State of which the alienator is a resident. This corresponds to the rules laid down in Article 22.”

Paragraph 29 of the 1977 Model Convention corresponded to paragraph 27 of the 1963 Draft Convention. Paragraph 29 of the 1963 Draft Convention was amended and renumbered as paragraph 31 (see history of paragraph 31) when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 27 of the 1963 Draft Convention was amended and renumbered as paragraph 29 of the 1977 Model Convention and the preceding heading was added. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 27 read as follows:

> “27. As regards gains from the alienation of capital assets other than those listed in paragraphs 1 and 2, paragraph 3 of the Article provides that they are taxable only in the State of which the alienator of such assets is a resident. This is in accordance with the rules laid down in Article 22 on the taxation of capital.”

Paragraph 30: Amended on 28 January 2003 by the report entitled “The 2002 Update to the Model Tax Convention” adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 30 read as follows:

> “30. The Article does not contain special rules for gains from the alienation of shares in a company or of securities, bonds, debentures and the like. Such gains are, therefore, taxable only in the State of which the alienator is a resident.”

Paragraph 30 of the 1977 Model Convention corresponded to paragraph 28 of the 1963 Draft Convention. Paragraph 30 of the 1963 Draft Convention was amended and renumbered as paragraph 37 (see history of paragraph 37) and the preceding heading

was moved with it when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 28 of the 1963 Draft Convention was amended and renumbered as paragraph 30 of the 1977 Model Convention. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 28 read as follows:

> "28. The present Article does not provide for special rules for gains from the alienation of shares in a company or of securities, bonds, debentures and the like. Such gains are therefore, taxable only in the state of which the alienator is a resident[1].
>
> 1 As regards the special provisions relating to capital gains from the alienation of shares in a company, see footnote relating to paragraph 21 above."

Paragraph 31: Amended on 23 July 1992 by replacing the reference therein to paragraph 27 of the Commentary on Article 10 and to paragraphs 18 and 19 of the Commentary on Article 11 by a reference to paragraph 28 and to paragraphs 20 and 21 respectively, by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 31 read as follows:

> "31. If shares are sold by a shareholder to the issuing company in connection with the liquidation of such company or the reduction of its paid-up capital, the difference between the selling price and the par value of the shares may be treated in the State of which the company is a resident as a distribution of accumulated profits and not as a capital gain. The Article does not prevent the State of residence of the company from taxing such distributions at the rates provided for in Article 10: such taxation is permitted because such difference is covered by the definition of the term "dividends" contained in paragraph 3 of Article 10 and interpreted in paragraph 27 of the Commentary relating thereto. The same interpretation may apply if bonds or debentures are redeemed by the debtor at a price which is higher than the par value or the value at which the bonds or debentures have been issued; in such a case, the difference may represent interest and, therefore, be subjected to a limited tax in the State of source of the interest in accordance with Article 11 (see also paragraphs 18 and 19 of the Commentary on Article 11)."

Paragraph 31 of the 1977 Model Convention corresponded to paragraph 29 of the 1963 Draft Convention. Paragraph 31 of the 1963 Draft Convention was deleted when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. At the same time paragraph 29 of the 1963 Draft Convention was amended and renumbered as paragraph 31. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 29 read as follows:

> "29. If shares are sold by a shareholder to the issuing company in connection with the liquidation of such company or the reduction of its paid-up capital, the difference between the selling price and the par-value of the shares may be treated by the State of which the company is a resident as a distribution of accumulated profits and not as a capital gain. The present Article is not intended to prevent the State of the residence of the company from taxing such distributions at the rates provided for in Article 10 on the taxation of dividends: such taxation is in accordance with the definition contained in paragraph 3 of Article 10 and with the interpretation given to this provision in paragraph 39 of the Commentary relating thereto. The same interpretation may apply if bonds or debentures are redeemed by the debtor at a price which is higher than the par-value or the value at which the bonds or debentures have been issued; in such a case, the difference may represent interest and, therefore, be subjected to a limited tax in the State of source of the

interest in accordance with Article II on the taxation of interest (see also paragraphs 24 and 25 of the Commentary to Article 11)."

Paragraph 31 of the 1963 Draft Convention, until it was deleted when the 1977 Model Convention was adopted, read as follows:

"31. The United States, in accordance with its basic position, reserves the right to tax its citizens and corporations on gains from the alienation of property, whenever they may be resident or the property situated. In accordance with its law, the United States also reserves the right to tax non-resident aliens on the capital gains derived from the sale in the United States of personal (movable) property if such sale occurs while the nonresident is in the United States (or under certain other circumstances described in its law). Because "movable property" and "immovable property" are terms not used in the United States law, the United States reserves the right to employ the terms "personal property" and "real property" in its bilateral negotiations."

Paragraph 32: Added on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005, on the basis of another report entitled "Cross-Border Income Tax Issues Arising From Employee Stock Option Plans" (adopted by the OECD Committee on Fiscal Affairs on 16 June 2004).

Paragraph 32 as it read before 31 March 1994 was amended and renumbered as paragraph 47 and the heading preceding paragraph 32 was deleted (see history of paragraph 47) by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 33: Added on 22 July 2010 by the report entitled the "2010 Update to the Model Tax Convention" adopted by the OECD Council on 22 July 2010.

Paragraph 33 was deleted on 17 July 2008 by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 33 read as follows:

"33. *Australia* reserves the right to tax gains from the alienation of property connected with Australia other than property mentioned in the first four paragraphs of this Article."

Paragraph 33 was amended on 15 July 2005 by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 23 July 1992 and until 15 July 2005, paragraph 33 read as follows:

"33. *Australia* reserves the right to tax gains from the alienation of property other than property mentioned in the first three paragraphs of this Article. It also reserves the right to propose changes to reflect the fact that the terms "movable property" and "immovable property" are terms not used in Australian law."

Paragraph 33 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention" adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 33 read as follows:

"33. *Australia* reserves the right to propose changes to reflect the facts that Australia does not levy a capital gains tax and that the terms "movable property" and "immovable property" are terms not used in Australian law."

Paragraph 33 of the 1977 Model Convention replaced paragraph 33 of the 1963 Draft Convention, which was deleted and a new paragraph 33 was added, together with the heading preceding it, by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 33 read as follows:

"33. With respect to paragraph 3 of the Article, Belgium, in view of the income tax reform law of 20th November, 1962, reserves its position as regards:

a) the special levy imposed by the new law in the case of the redemption of their shares or stock by companies limited by shares and limited partnerships with share capital or by any companies, associations, establishments or bodies constituted in Belgium otherwise than in one of the forms specified in the Commercial Code;

b) the special levy imposed by the same law in the case of the division of the assets of such legal persons as are mentioned in sub-paragraph a) above or of partnerships of individuals not opting for their profits to be charged to personal income tax in the name of the partners.

This reservation is dictated by the consideration that these special levies on the company, etc., are really in the nature of a composition satisfying all personal taxes that would be due from the shareholders or partners on the capital gains or distributions of profits in question here. Belgium considers that the limitations provided for in the case of distribution taxes on dividends do not apply to these special levies."

Paragraph 34: Deleted on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 34 read as follows:

"34. *Canada* reserves its position on paragraph 4 in order to keep the right to tax gains from the alienation of shares of a company, or of interests in a partnership or trust, the value of which is derived principally from immovable property situated in Canada and in order to keep the right to tax gains of an individual who was a resident of Canada at any time during the 6 years preceding the alienation of a particular property."

Paragraph 34 was previously amended on 23 July 1992 by the report entitled "The Revision of the Model Convention" adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 34 read as follows:

"34. *Canada* reserves its position on paragraph 4 of the Article, in order to reserve the right to tax gains from the alienation of property, other than those mentioned in the first three paragraphs."

Paragraph 34 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 35: Amended on 23 July 1992, by substituting the word "held" for the word "owned" by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 35 read as follows:

"35. *Finland* reserves the right to tax gains from the alienation of shares or other corporate rights in Finnish companies, where the ownership of such shares or other corporate rights entitles to the enjoyment of immovable property situated in Finland and owned by the company."

Paragraph 35 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 36: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 36 read as follows:

"36. *France* can accept the provisions of paragraph 4, but wishes to retain the possibility of applying the provisions in its laws relative to the taxation of gains from the alienation of shares or rights which are part of a substantial participation in a company which is a resident of France, or of shares or rights of companies the assets of which consist mainly of immovable property situated in France."

Paragraph 36 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 37: Deleted on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. In the 1977 Model Convention and until 22 July 2010, paragraph 37 read as follows:

> "37. *Italy* reserves the right to subject capital gains from Italian sources to the taxes imposed by its law whenever the alienator has a permanent establishment in Italy, even if the property or assets alienated did not form part of the business property employed in such permanent establishment"

Paragraph 37 as it read after 11 April 1977 corresponded to paragraph 30 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 30 of the 1963 Draft Convention was renumbered as paragraph 37 and the preceding heading was moved immediately before paragraph 33 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 38: Amended on 28 January 2003, by changing the reference to "paragraph 4" in the reservation to "paragraph 5" as a consequence of the renumbering of paragraph 4 of Article 13, by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. In the 1977 Model Convention and until 28 January 2003, paragraph 38 read as follows:

> "38. *New Zealand* reserves its position on paragraphs 3 and 4."

Paragraph 38 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 39: Amended on 22 July 2010, by adding Chile as a country making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until 22 July 2010, paragraph 39 read as follows:

> "39. *Sweden* wants to reserve the right to tax gains from the alienation of shares or other corporate rights in Swedish companies."

Paragraph 39 was previously replaced on 23 July 1992 by the report entitled "The Revision of the Model Convention" adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 39 read as follows:

> "39. *Portugal* reserves the right to tax gains from the increase in capital of companies with a head office or place of effective management in Portugal, when the increase results from the capitalisation of reserves or the issue of shares."

Paragraph 39 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 40: Added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 41: Amended on 28 January 2003 by changing the reference to "paragraph 4" in the reservation to "paragraph 5" as a consequence of the renumbering of paragraph 4 of Article 13 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 July 1992 and until 28 January 2003, paragraph 41 read as follows:

> "41. Notwithstanding paragraph 4 of this Article, where the selling price of shares is considered to be dividends under Danish legislation, *Denmark* reserves the right to tax this selling price as dividends in accordance with paragraph 2 of Article 10."

Paragraph 41 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 42: Amended on 22 July 2010 by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 23 July 1992 and until 22 July 2010, paragraph 42 read as follows:

> "42. *Japan* wishes to retain the right to tax gains from the alienation of shares or other corporate rights which are part of a substantial participation in a Japanese company."

Paragraph 42 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 43: Amended on 28 January 2003, by adding Ireland to the list of countries making the reservation, by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003. After 31 March 1984 and until 28 January 2003, paragraph 43 read as follows:

> "43. *Denmark*, *Norway* and the *United Kingdom* reserve the right to insert in a special article provisions regarding capital gains relating to offshore hydrocarbon exploration and exploitation and related activities."

Paragraph 43 was previously amended on 31 March 1994, by adding the United Kingdom to the list of countries making the reservation, by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 43 read as follows:

> "43. *Denmark* and *Norway* reserve the right to insert in a special article provisions regarding capital gains relating to offshore hydrocarbon exploration and exploitation and related activities."

Paragraph 43 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 43.1: Added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

Paragraph 44: Added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 45: Amended on 22 July 2010, by deleting Spain from the list of countries making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 28 January 2003 and until 22 July 2010, paragraph 45 read as follows:

> "45. *Korea* and *Spain* reserve the right to tax gains from the alienation of shares or other rights forming part of a substantial participation in a company which is a resident."

Paragraph 45 was previously amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 23 October 1997 and until 28 January 2003, paragraph 45 read as follows:

> "45. *Korea* and *Spain* reserve the right to tax gains from the alienation of shares or other rights in a company whose assets consist mainly of immovable property situated on their territory. They also reserve the right to tax gains from the alienation of shares or other rights forming part of a substantial participation in a company which is a resident."

Paragraph 45 was previously amended on 23 October 1997, by adding Korea as a country making the reservation, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 23 July 1992 and until 23 October 1997, paragraph 45 read as follows:

"45. *Spain* reserves its right to tax gains from the alienation of shares or other rights in a company whose assets consist mainly of immovable property situated in Spain. It also reserves its right to tax gains from the alienation of shares or other rights forming part of a substantial participation in a company which is a resident of Spain."

Paragraph 45 was added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 46: Added on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992.

Paragraph 47: Corresponds to paragraph 32, as it read before 31 March 1994. Paragraph 32 was amended and renumbered as paragraph 47 and the heading preceding paragraph 32 was deleted by the report entitled "The 1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 32 and the heading preceding it read as follows:

"*Special Derogation*

32. In view of its particular situation in relation to shipping, *Greece* will retain its freedom of action with regard to the provisions in the Convention relating to profits from the operation of ships in international traffic, to remuneration of crews of such ships, to capital represented by ships in international traffic and by movable property pertaining to the operation of such ships, and to capital gains from the alienation of such ships and assets."

Paragraph 32 of the 1977 Model Convention replaced paragraph 32 of the 1963 Draft Convention, which was deleted and a new paragraph 32 was added, together with the heading preceding it, when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 32 read as follows:

"32. Spain reserves the right to tax capital gains from the alienation of movable capital within its territory. This reserve takes into account that the Spanish exchange control regulations are far more liberal with regard to the repatriation of foreign capital or profits derived therefrom than with regard to investments of Spanish residents abroad. Moreover Spain should not be deprived of the right to tax capital gains as long as such taxation can be used as an instrument of economic policy."

Paragraph 48: Amended on 17 July 2008, by replacing the duration of "three years" with "five years", by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 28 January 2003 and until 17 July 2008, paragraph 48 read as follows:

"48. *Ireland* reserves the right to tax gains from the alienation of property by an individual who was a resident of Ireland at any time during the three years preceding such alienation."

Paragraph 48 as it read before 28 January 2003 was replaced by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until it was deleted on 28 January 2003, paragraph 48 read as follows:

"48. *Ireland* reserves the right to subject to tax gains from the alienation of shares, rights, or an interest in a company the assets of which consist primarily of immovable property."

Paragraph 48 was added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention" adopted by the OECD Council on 21 September 1995.

Paragraph 49: Amended on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention" adopted by the OECD Council on 28 January 2003. After 21 September 1995 and until 28 January 2003, paragraph 49 read as follows:

> "49. *Mexico* reserves its position to retain the possibility of applying the provisions in its laws relative to the taxation of gains from the alienation of shares or rights that are part of a substantial participation in a company that is a resident of Mexico, or of shares or rights of companies the assets of which consist mainly of immovable property situated in Mexico."

Paragraph 49 was added on 21 September 1995 by the Report by entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 50: Added on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000.

Paragraph 51: Amended on 22 July 2010, by adding Switzerland to the list of countries making the reservation, by the report entitled "The 2010 Update to the Model Tax Convention", adopted by the OECD Council on 22 July 2010. After 17 July 2008 and until 22 July 2010, paragraph 51 read as follows:

> "51. *Belgium*, *Luxembourg* and the *Netherlands* reserve the right not to include paragraph 4 in their conventions."

Paragraph 51 was previously amended on 17 July 2008, by adding the Netherlands to the list of countries making the reservation, by the report entitled "The 2008 Update to the Model Tax Convention", adopted by the OECD Council on 17 July 2008. After 15 July 2005 and until 17 July 2008, paragraph 51 read as follows:

> "51. *Belgium* and *Luxembourg* reserve the right not to include paragraph 4 in their conventions."

Paragraph 51 was previously amended on 15 July 2005, by adding Belgium as a country making the reservation, by the report entitled "The 2005 Update to the Model Tax Convention", adopted by the OECD Council on 15 July 2005. After 28 January 2003 and until 15 July 2005, paragraph 51 read as follows:

> "51. *Luxembourg* reserves the right not to include paragraph 4 in its conventions."

Paragraph 51 was added on 28 January 2003 by the report entitled "The 2002 Update to the Model Tax Convention", adopted by the OECD Council on 28 January 2003.

COMMENTARY ON ARTICLE 14
CONCERNING THE TAXATION OF INDEPENDENT PERSONAL SERVICES

[Article 14 was deleted from the Model Tax Convention on 29 April 2000 on the basis of the report entitled Issues Related to Article 14 of the OECD Model Tax Convention (adopted by the Committee on Fiscal Affairs on 27 January 2000 and reproduced in Volume II at page R(16)-1). That decision reflected the fact that there were no intended differences between the concepts of permanent establishment, as used in Article 7, and fixed base, as used in Article 14, or between how profits were computed and tax was calculated according to which of Article 7 or 14 applied. In addition, it was not always clear which activities fell within Article 14 as opposed to Article 7. The effect of the deletion of Article 14 is that income derived from professional services or other activities of an independent character is now dealt with under Article 7 as business profits.]

HISTORY

[The whole of Article 14 and the Commentary thereon were deleted from the Model Tax Convention on 29 April 2000.]

Paragraph 1: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000 paragraph 1 read as follows:

> "1. The Article is concerned with what are commonly known as professional services and with other activities of an independent character. This excludes industrial and commercial activities and also professional services performed in employment, *e.g.* a physician serving as a medical officer in a factory. It should, however, be observed that the Article does not concern independent activities of artistes and sportsmen, these being covered by Article 17."

Paragraph 1 was amended on 23 July 1992 by replacing the words "entertainers and athletes" at the end thereof by "artistes and sportsmen", by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until 23 July 1992, paragraph 1 read as follows:

> "1. The Article is concerned with what are commonly known as professional services and with other activities of an independent character. This excludes industrial and commercial activities and also professional services performed in employment, *e.g.* a physician serving as a medical officer in a factory. It should, however, be observed that the Article does not concern independent activities of entertainers and athletes, these being covered by Article 17."

Paragraph 1 was previously amended when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 1 read as follows:

"1. Article 14 is concerned with what are commonly known as professional services and with other independent activities of a similar character. This excludes industrial and commercial activities and also professional services performed in employment, *e.g.* a physician serving as a medical officer in a factory. It should, however, be observed that the Article does not concern performances by public entertainers and athletes working on their own account, all public entertainers coming under a special Article covering their activities whether independent or not (Article 17)."

Paragraph 2: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until 29 April 2000, paragraph 2 read as follows:

"2. The meaning of the term "professional services" is illustrated by some examples of typical liberal professions. The enumeration has an explanatory character only and is not exhaustive. Difficulties of interpretation which might arise in special cases may be solved by mutual agreement between the competent authorities of the Contracting States concerned."

Paragraph 3: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 July 1992 and until 29 April 2000 paragraph 3 read as follows:

"3. The provisions of the Article are similar to those for business profits and rest in fact on the same principles as those of Article 7. The provisions of Article 7 and the Commentary thereon could therefore be used as guidance for interpreting and applying Article 14. Thus the principles laid down in Article 7 for instance as regards allocation of profits between head office and permanent establishment could be applied also in apportioning income between the State of residence of a person performing independent personal services and the State where such services are performed from a fixed base. Equally, expenses incurred for the purposes of a fixed base, including executive and general expenses, should be allowed as deductions in determining the income attributable to a fixed base in the same way as such expenses incurred for the purposes of a permanent establishment (see paragraph 3 of Article 7). Also in other respects Article 7 and the Commentary thereon could be of assistance for the interpretation of Article 14, *e.g.* in determining whether computer software payments should be classified as commercial income within Articles 7 or 14 or as royalties within Article 12."

Paragraph 3 was amended on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992, on the basis of Appendix 3 of the Report entitled "The Tax Treatment of Software" (adopted by the OECD Council on 23 July 1992). In the 1977 Model Convention and until 23 July 1992, paragraph 3 read as follows:

"3. The provisions of the Article are similar to those for business profits and rest in fact on the same principles as those of Article 7. The provisions of Article 7 and the Commentary thereon could therefore be used as guidance for interpreting and applying Article 14. Thus the principles laid down in Article 7 for instance as regards allocation of profits between head office and permanent establishment could be applied also in apportioning income between the State of residence of a person performing independent personal services and the State where such

services are performed from a fixed base. Equally, expenses incurred for the purposes of a fixed base, including executive and general expenses, should be allowed as deductions in determining the income attributable to a fixed base in the same way as such expenses incurred for the purposes of a permanent establishment (see paragraph 3 of Article 7). Also in other respects Article 7 and the Commentary thereon could be of assistance for the interpretation of Article 14."

Paragraph 3 was previously replaced when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. Paragraph 3 of the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963), was amended and renumbered as paragraph 4 (see history of paragraph 4) and a new paragraph 3 was added when the 1977 Model Convention was adopted.

Paragraph 4: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 4 read as follows:

"4. Even if Articles 7 and 14 are based on the same principles, it was thought that the concept of permanent establishment should be reserved for commercial and industrial activities. The term "fixed base" has therefore been used. It has not been thought appropriate to try to define it, but it would cover, for instance, a physician's consulting room or the office of an architect or a lawyer. A person performing independent personal services would probably not as a rule have premises of this kind in any other State than of his residence. But if there is in another State a centre of activity of a fixed or a permanent character, then that State should be entitled to tax the person's activities."

Paragraph 4 of the 1977 Model Convention corresponded to paragraph 3 of the 1963 Draft Convention, adopted by the OECD Council on 30 July 1963. Paragraph 3 was amended and renumbered as paragraph 4 when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977. In the 1963 Draft Convention (adopted by the OECD Council on 30 July 1963) and until the adoption of the 1977 Model Convention, paragraph 3 read as follows:

"3. The provisions of Article 14 are similar to those customarily adopted for income from industrial or commercial activities. Nevertheless it was thought that the concept of permanent establishment should be reserved for commercial and industrial activities. The term "fixed base", which is to be found in various Conventions, has therefore been used. It has not been thought appropriate to try to define it, but it would cover, for instance, a physician's consulting room or the office of an architect or a lawyer. A person performing professional services would probably not as a rule have premises of this kind in any other State than that of his residence. But if there is in another State a centre of activity of a fixed or permanent character, then that State should be entitled to tax the person's activities."

Paragraph 4.1: Deleted on 29 April 2000 together with the heading preceding it by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 21 September 1995 and until 29 April 2000, paragraph 4.1 and the heading preceding it read as follows:

"Observation on the Commentary

4.1 *Mexico* considers that this Article is applicable to companies that perform professional services."

Paragraph 4.1 together with the heading preceding it were added on 21 September 1995 by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

Paragraph 5: Deleted on 29 April 2000 together with the heading preceding it by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 31 March 1994 and until 29 April 2000, paragraph 5 and the heading preceding it read as follows:

"Reservations on the Article

5. *Turkey* reserves the right to tax persons performing professional services or other activities of an independent character if they are present in this country for a period or periods exceeding in the aggregate 183 days in the calendar year, even if they do not have a fixed base available to them for the purpose of performing such services or activities."

Paragraph 5 was amended on 31 March 1994, by deleting the reference to New Zealand and making the reservation by New Zealand a separate paragraph 9 (see history of paragraph 9), by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. In the 1977 Model Convention and until 31 March 1994, paragraph 5 read as follows:

"5. *New Zealand* and *Turkey* reserve the right to tax persons performing professional services or other activities of an independent character if they are present in these countries for a period or periods exceeding in the aggregate 183 days in the fiscal (for New Zealand) or calendar (for Turkey) year, even if they do not have a fixed base available to them for the purpose of performing such services or activities."

Paragraph 5 and the heading preceding it were added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 6: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). In the 1977 Model Convention and until 29 April 2000, paragraph 6 read as follows:

"6. *Portugal* and *Spain* reserve their position on paragraph 1."

Paragraph 6 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 7: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 21 September 1995 and until 29 April 2000, paragraph 7 read as follows:

"7. *Denmark*, *Mexico* and *Norway* reserve the right to tax individuals performing professional services or other activities of an independent character if they are

present on their respective territory for a period or periods exceeding in the aggregate 183 days in any twelve month period."

Paragraph 7 was amended on 21 September 1995, by adding Mexico to the list of countries making the reservation, reflecting a Report by the Committee on Fiscal Affairs entitled "The 1995 Update to the Model Tax Convention". After 31 March 1994 and until 21 September 1995, paragraph 7 read as follows:

"7. *Denmark* and *Norway* reserve the right to tax individuals performing professional services or other activities of an independent character if they are present on their respective territory for a period or periods exceeding in the aggregate 183 days in any twelve month period."

Paragraph 7 was previously amended on 31 March 1994, by transforming the second sentence into a separate paragraph 8 (see history of paragraph 8), by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994. After 23 July 1992 and until 31 March 1994, paragraph 7 read as follows:

"7. *Denmark* and *Norway* reserve the right to tax individuals performing professional services or other activities of an independent character if they are present on their respective territory for a period or periods exceeding in the aggregate 183 days in any twelve month period. They also reserve the right to insert in a special article provisions regarding income derived from independent personal services relating to offshore hydrocarbon exploration and exploitation and related activities."

Paragraph 7 was replaced on 23 July 1992 by the report entitled "The Revision of the Model Convention", adopted by the OECD Council on 23 July 1992. In the 1977 Model Convention and until it was deleted on 23 July 1992, paragraph 7 read as follows:

"7. The *United States* reserves the right to tax services performed by individuals who are present in the United States for more than 183 days during the taxable year. The United States also believes that this Article should be limited to individuals and to income from the performance of personal services."

Paragraph 7 was added when the 1977 Model Convention was adopted by the OECD Council on 11 April 1977.

Paragraph 8: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 21 September 1995 and until 29 April 2000, paragraph 8 read as follows:

"8. *Denmark*, *Ireland*, *Norway* and the *United Kingdom* reserve the right to insert in a special article provisions regarding income derived from independent personal services relating to offshore hydrocarbon exploration and exploitation and related activities."

Paragraph 8 was amended on 21 September 1995, by adding Ireland to the list of countries making the reservation, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 31 March 1994 and until 21 September 1995, paragraph 8 read as follows:

"8. *Denmark*, *Norway* and the *United Kingdom* reserve the right to insert in a special article provisions regarding income derived from independent personal services relating to offshore hydrocarbon exploration and exploitation and related activities."

Paragraph 8 corresponded to the second sentence of paragraph 7, as it read after 23 July 1992 and until 31 March 1994. The second sentence of paragraph 7, as it read

before 31 March 1994, became paragraph 8 (see history of paragraph 7) and the United Kingdom was added to the list of countries making the reservation in that new paragraph by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 9: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 23 October 1997 and until 29 April 2000, paragraph 9 read as follows:

> "9. *Greece*, the *Czech Republic* and *New Zealand* reserve the right to tax individuals performing professional services or other activities of an independent character if they are present on their respective territory for a period or periods exceeding in the aggregate 183 days in any twelve month period, even if they do not have a fixed base available to them for the purpose of performing such services or activities."

Paragraph 9 was amended on 23 October 1997, by adding the Czech Republic to the list of countries making the reservation, by the report entitled "The 1997 Update to the Model Tax Convention", adopted by the OECD Council on 23 October 1997. After 21 September 1995 and until 23 October 1997, paragraph 9 read as follows:

> "9. *Greece* and *New Zealand* reserve the right to tax individuals performing professional services or other activities of an independent character if they are present on their respective territory for a period or periods exceeding in the aggregate 183 days in any twelve month period, even if they do not have a fixed base available to them for the purpose of performing such services or activities."

Paragraph 9 was previously amended on 21 September 1995, by adding Greece to the list of countries making the reservation, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995. After 31 March 1994 and until 21 September 1995, paragraph 9 read as follows:

> "9. *New Zealand* reserves the right to tax individuals performing professional services or other activities of an independent character if they are present in New Zealand for a period or periods exceeding in the aggregate 183 days in any twelve month period, even if they do not have a fixed base available to them for the purpose of performing such services or activities."

Paragraph 9 as it read after 31 March 1994 corresponded in part to the reservation by New Zealand that was previously found in paragraph 5 (see history of paragraph 5). Paragraph 9 was added on 31 March 1994 by the report entitled "1994 Update to the Model Tax Convention", adopted by the OECD Council on 31 March 1994.

Paragraph 10: Deleted on 29 April 2000 by the report entitled "The 2000 Update to the Model Tax Convention", adopted by the OECD Committee on Fiscal Affairs on 29 April 2000 on the basis of the Annex of another report entitled "Issues Related to Article 14 of the OECD Model Tax Convention" (adopted by the OECD Committee on Fiscal Affairs on 27 January 2000). After 21 September 1995 and until 29 April 2000, paragraph 10 read as follows:

> "10. *Greece* reserves the right to insert special provisions regarding income derived from independent personal services relating to offshore activities."

Paragraph 10 was added on 21 September 1995, by the report entitled "The 1995 Update to the Model Tax Convention", adopted by the OECD Council on 21 September 1995.

COMMENTARY ON ARTICLE 15 CONCERNING THE TAXATION OF INCOME FROM EMPLOYMENT[1]

1. Paragraph 1 establishes the general rule as to the taxation of income from employment (other than pensions), namely, that such income is taxable in the State where the employment is actually exercised. The issue of whether or not services are provided in the exercise of an employment may sometimes give rise to difficulties which are discussed in paragraphs 8.1 ff. Employment is exercised in the place where the employee is physically present when performing the activities for which the employment income is paid. One consequence of this would be that a resident of a Contracting State who derived remuneration, in respect of an employment, from sources in the other State could not be taxed in that other State in respect of that remuneration merely because the results of this work were exploited in that other State.

(Amended on 22 July 2010; see HISTORY)

2. The general rule is subject to exception only in the case of pensions (Article 18) and of remuneration and pensions in respect of government service (Article 19). Non-employment remuneration of members of boards of directors of companies is the subject of Article 16.

(Amended on 23 October 1997; see HISTORY)

2.1 Member countries have generally understood the term "salaries, wages and other similar remuneration" to include benefits in kind received in respect of an employment (*e.g.* stock-options, the use of a residence or automobile, health or life insurance coverage and club memberships).

(Amended on 15 July 2005; see HISTORY)

2.2 The condition provided by the Article for taxation by the State of source is that the salaries, wages or other similar remuneration be derived from the exercise of employment in that State. This applies regardless of when that income may be paid to, credited to or otherwise definitively acquired by the employee.

(Added on 15 July 2005; see HISTORY)

3. Paragraph 2 contains, however, a general exception to the rule in paragraph 1. This exception covers all individuals rendering services in the

---

1 Before 2000, the title of Article 15 referred to "Dependent Personal Services" by contrast to the title of Article 14 which referred to "Independent Personal Services". As a result of the elimination of the latter Article (see the history of Article 14), the title of Article 15 was changed to refer to "Employment", a term that is more commonly used to describe the activities to which the Article applies. This change was not intended to affect the scope of the Article in any way.

course of an employment (sales representatives, construction workers, engineers, etc.), to the extent that their remuneration does not fall under the provisions of other Articles, such as those applying to government services or artistes and sportsmen.

(Amended on 29 April 2000; see HISTORY)

4. The three conditions prescribed in this paragraph must be satisfied for the remuneration to qualify for the exemption. The first condition is that the exemption is limited to the 183 day period. It is further stipulated that this time period may not be exceeded "in any twelve month period commencing or ending in the fiscal year concerned". This contrasts with the 1963 Draft Convention and the 1977 Model Convention which provided that the 183 day period should not be exceeded "in the fiscal year concerned", a formulation that created difficulties where the fiscal years of the Contracting States did not coincide and which opened up opportunities in the sense that operations were sometimes organised in such a way that, for example, workers stayed in the State concerned for the last 5 ½ months of one year and the first 5 ½ months of the following year. The present wording of subparagraph 2 *a)* does away with such opportunities for tax avoidance. In applying that wording, all possible periods of twelve consecutive months must be considered, even periods which overlap others to a certain extent. For instance, if an employee is present in a State during 150 days between 1 April 01 and 31 March 02 but is present there during 210 days between 1 August 01 and 31 July 02, the employee will have been present for a period exceeding 183 days during the second 12 month period identified above even though he did not meet the minimum presence test during the first period considered and that first period partly overlaps the second.

(Amended on 15 July 2005; see HISTORY)
